AVIATION: At Fort Myer, Virginia, Lieutenant George C. Sweet and Naval Constructor William McEntee are the first naval observers to evaluate the military trials of Wilbur and Orville Wright's flying machine.

September 9

AVIATION: Lieutenant Frank P. Lahm becomes the nation's first military airplane passenger when he accompanies Orville Wright on a six-and-a-half minute test

hop over Fort Myer, Virginia. Lahm subsequently becomes one of the original 24 army aviators appointed by the army.

September 12

AVIATION: A biplane flown by aeronautical pioneer Orville Wright stays aloft for one hour, 14 minutes, and 20 seconds, a new world's record.

September 17

AVIATION: The perils of airplane technology are painfully underscored when pioneering aeronaut Orville Wright crashes his machine at Fort Myer, Virginia, killing army lieutenant Thomas E. Selfridge. This is the first recorded airplane fatality and it is traced to a split propeller, which severed a support wire. The War Department consequently suspends further flight testing until 1909.

November 12

MARINES: In a major development, President Theodore Roosevelt signs Executive Order No. 969 removing all marine detachments from navy ships.

December 1

NAVAL: In Washington, D.C., assistant secretary of the navy Truman H. Newberry is promoted to be the 39th secretary.

December 2

AVIATION: In Washington, D.C., the chief of the Bureau of Equipment, Rear Admiral William S. Cowles, hands over a report by Lieutenant George C. Sweet to the secretary of the navy. In it, Sweet delineates specifications for an airplane working in close conjunction with the surface fleet, especially in terms of scouting and reconnaissance. He concludes with a recommendation that several aircraft be obtained to pursue development along these lines.

December 4

NAVAL: U.S. delegates, along with those of nine other naval powers, attend a London Naval Conference to clearly delineate the rules of naval warfare. The ensuing declaration touches upon blockades, contraband, convoy, destruction of neutral prizes, and compensation for ships and materials illegally seized.

1909

January

MILITARY: The Army of Cuban Occupation removes its last remaining units to the mainland, formally restoring civilian rule to Cuban authorities.

January 1

MARINES: The Marine Officers School relocates to Port Royal Navy Base, South Carolina.

January 27

NAVAL: The Commission on Naval Reorganization is formed by President Theodore Roosevelt, which advocates breaking up the Navy Department into five divisions, the heads of which would constitute a military council to advise the secretary of the navy. The plan is never adopted by Congress but it does highlight the trend toward administrative reform in the service.

January 28

MILITARY: The last remaining army units are withdrawn from Cuba following the election of President José Miguel Gomez.

February 22

NAVAL: The “Great White Fleet” under Rear Admiral Charles Sperry (Commodore Robley “Fighting Bob” Evans being ill) returns to Hampton Roads, Virginia, after circumnavigating the globe across 46,000 miles. Not a single vessel broke down. The fleet is reviewed by President Theodore Roosevelt from onboard the presidential yacht *Mayflower*. This carefully choreographed parade by 16 battle-ships favorably impresses host nations with American power, Japan in particular, and highlights to U.S. Navy planners the acute need for additional coaling stations worldwide. The trip also illustrates pressing needs for auxiliary vessels such as destroyers and cruisers to support the capital ships.

March

AVIATION: The Glenn H. Curtiss motor works at Hammondsport, New York, becomes part of the Herring-Curtiss Company. This year they sell what is probably the first commercially available aircraft to the New York Aeronautical Society. The price is \$5,000.

March 3

MILITARY: Congress orders a complete investigation of the August 1906 shooting “incident” at Brownsville, Texas, suspecting that racism may have played a part in the dismissal of three companies of the primarily African-American 25th Infantry. Most of the soldiers are subsequently reinstated and allowed to return to their unit.

MARINES: Congress thwarts an attempt by President Theodore Roosevelt to transfer Marine Corps personnel from ships to shore by mandating that 8 percent of all ship complements consist of naval infantry.

March 4

MILITARY: In Washington, D.C., William Howard Taft is sworn in as president and commander in chief.

March 6

NAVAL: In Washington, D.C., George von Lengerke Meyer is appointed the 40th secretary of the navy.

March 12

MILITARY: President William Howard Taft appoints Jacob McGavock Dickinson to replace Luke Wright as his secretary of war.

April 1

DIPLOMACY: The United States withdraws its armed forces from Cuba once President José Miguel Gomez is serving in office.

April 6

SCIENCE: After 36 days in a stark wilderness, the small expedition headed by Commander Robert Edwin Peary reaches 90 degrees north for the first time, that is, the North Pole, accompanied by four Inuit guides and Matthew Henson, his

African-American assistant. He raises the American flag and claims the region for the United States, a gesture that is never acted upon. Unknown to the admiral at the time, Dr. Frederick A. Cooke reached the same spot a year earlier and their dispute remains a source of scientific contention for decades. In the course of seven expeditions to the far north, Peary has lost all but two toes to frostbite.

June 10

NAVAL: In Annapolis, Maryland, Captain John M. Bowers gains appointment as the 21st superintendent of the U.S. Naval Academy.

June 11

MILITARY: Chinese student Ting Chia is among 103 cadets who graduate from the U.S. Military Academy, class of 1909. George S. Patton is another distinguished alumnus.

Peary, Robert (1856–1920)

Explorer

Robert Peary was born in Cresson, Pennsylvania, on May 6, 1856, and he obtained a degree in civil engineering from Bowdoin College in 1876. Three years later he joined the U.S. Coast and Geodetic Service, served capably for five years, then transferred to the navy as a civil engineer in 1881. Peary was subsequently tasked with surveying a proposed Atlantic-Pacific canal through Nicaragua (1884–86), and he handled his charge competently, but nothing became of the project. Meanwhile, he had become fascinated by reading literature about the Arctic Circle, a largely unexplored region, and he began to press superiors to launch an expedition into the heart of Greenland. In 1891 Peary conducted his first foray northward, and, over the ensuing 18 months, he sledded across the snowy wilderness of what became known as Pearyland. He returned with much useful scientific information, but he remained obsessed by becoming the first man to physically reach the North Pole.

Peary's daring made him something of a national celebrity, and in 1893–95, 1896, and 1897, he conducted three more expeditions to Greenland, each time successively venturing farther north. On one occasion Peary returned to the United States hauling two large meteorites that he uncovered. In 1898 he published his account in the book *Northward over the "Great Ice."* Once home, he also convinced superiors to let him try again and he obtained a five-year leave from the navy to reach the North Pole. Between 1898 and 1902 he tried and failed several times to attain his objective, although each time gradually inching closer to success. Peary also parleyed his national celebrity into raising money for future expeditions and, assisted by the Peary Arctic Club, he had the specially constructed icebreaker *Roosevelt* outfitted for the harsh environment to try again. He then doggedly steamed and sailed to within 175 miles of his quest, only to be turned back by horrendous weather conditions.

July 2

MILITARY: On Patain Island, Philippines, a detachment of the 6th Cavalry is attacked by Moro tribesmen; they are repulsed through the heroic exertions of Sergeant Joseph Henderson, who receives a Medal of Honor.

July 4

MILITARY: Mop up operations against Moro tribesmen continue as a detachment of the 6th Cavalry attacks hostile tribesmen occupying caves on Patain Island, Philippines. Lieutenant John T. Kennedy distinguishes himself in this action, winning a Medal of Honor.

July 27

AVIATION: The aircraft developed by the Wright brothers, flying before a crowd of 10,000 onlookers, including President William H. Taft, passes all its army

Undeterred by defeat, Peary published his book *Nearest the Pole* in 1907 and, the following year, he prepared for a final, maximum effort. Rough sledding ensued as he proceeded with 24 men, 19 sleds, and 133 dogs, yet took only four Inuits and African-American Matthew A. Henson as far as the North Pole, which he reached on April 6, 1909. However, after returning home Peary learned that Dr. Frederick Cook, who had accompanied him in 1891, also claimed to have reached the pole a year earlier. A contentious and acrimonious debate ensued, but, in the end, Peary's claim was officially recognized. In 1910 he published *The North Pole* and received both the thanks of Congress and a promotion to rear admiral a year later. Peary subsequently championed air power, and, in 1918, he organized the National Aerial Patrol Commission while also chairing the National Committee on Coast Defense by Air. This intrepid explorer, who lost several toes to frostbite pursuing his dream, died in Washington, D.C., on February 20, 1920.

Explorer Robert Peary (Library of Congress)

requirements and even exceeds the one-hour time aloft specified by the contract. At the time, Orville Wright is accompanied by U.S. Army lieutenant Frank P. Lahm.

August 2

AVIATION: After observing several flights, a skeptical army acquires its first airplane—a Wright Flyer—by purchasing it from the Wright brothers. The builders earned a \$5,000 bonus by flying their machine at 42.5 miles per hour—2.5 miles faster than stipulated in the contract. The machine is subsequently dubbed *Miss Columbia*.

August 16

AVIATION: An increasingly aerial-minded Navy Bureau of Equipment seeks authority from the secretary of the navy to purchase two “heavier-than-air flying machines” but the secretary demurs, claiming that the service has no use for them in their present state of development.

August 25

AVIATION: At College Park, Maryland, the army leases land from the University of Maryland to serve as its first Signal Corps airfield.

September 1

AVIATION: In Paris, France, Commander Frederick L. Chapin, the naval attaché, issues a report of his observations of the recent aviation meet at Reims. In it he prophetically states that future naval use of aircraft would probably include catapults to launch aircraft from battleships and cruiser turrets, and use of flat-decked vessels to act as mobile airfields.

October 26

AVIATION: Lieutenant Frank E. Humphreys, having been tutored by Wilbur Wright, is the first army officer to complete a solo flight at College Park, Maryland, which lasts all of three minutes and three seconds. He conducts several flights in concert with another early aviator, Lieutenant Frank P. Lahm. However, the nation remains slow to realize the military application of airplanes compared to military establishments in Europe.

November 3

AVIATION: At College Park, Maryland, Lieutenant George C. Sweet becomes the first naval officer to fly when he accompanies army pilot Lieutenant Frank P. Lahm aloft as a passenger. Sweet was previously the navy observer during an acceptance trial held at Fort Myer, Virginia.

November 11

NAVAL: Plans are drawn up to turn Pearl Harbor, Oahu, Hawaii, into a major naval facility.

December 1

NAVAL: A new administrative scheme is adopted by the Navy Department with four new bureaus to administer fleet operations, materiel, inspections, and personnel. Moreover, the head of each division (an “aide”) reports directly to the secretary of the navy in an advisory capacity. This system anticipates the chief of naval operations, created six years hence.

December 18–20

MARINES: To underscore its displeasure with the revolutionary regime of Nicaraguan dictator José S. Zelaya, a battalion of marines under Colonel E. J. Mahoney deploys at Cortino from the transport *Buffalo*; they are joined by the Panamanian battalion under Major Smedley B. Butler. Sufficiently intimidated, Zelaya resigns from power before they arrive.

1910

January 4

NAVAL: The new battleship *Michigan* is commissioned, patterned after the revolutionary British vessel *Dreadnaught*, representing the newest and most modern warship of its class. Unlike earlier vessels, this ship displaces 16,000 tons and carries a main armament of 12 8-inch guns in superimposed, mainline turrets. The “all big gun” battleship dominates naval thinking around the world for the next three decades.

January 19

AVIATION: At Los Angeles, California, Lieutenant Paul Beck conducts the first aerial “bomb run” when he drops three small sand bags from his Farman biplane during a flying meet.

February 15

AVIATION: The Signal Corps authorizes the transfer of flight training operations from College Park, Maryland, to Fort Sam Houston, San Antonio, Texas, to avoid wintry conditions farther north.

February 22

MARINES: A battalion of marines under Major Smedley D. Butler lands at Corino, Nicaragua, to protect local rail lines.

March 2

AVIATION: Lieutenant Benjamin D. Foulois becomes the first military aviator to fly west of the Mississippi River when he performs his solo flight over Fort Sam Houston, Texas. He does so after being told by superiors to teach himself how to fly! Foulois is also presently the only pilot assigned to the Aeronautical Division, Army Signal Corps.

March 19

AVIATION: At Montgomery, Alabama, Orville Wright opens a flying school on the site of the future Maxwell Field (and Air Force Base).

April 4

NAVAL: The new battleship *Delaware* is commissioned, which displaces 20,380 tons and is armed with 12-inch guns.

April 22

MILITARY: General Leonard Wood, a progressive reformer, gains appointment as the new army chief of staff. He is a vocal proponent of military preparedness and a major force behind the creation of four-week “citizen camps” to impart basic military education to businessmen and professionals.

May 19

MARINES: Detachments from the gunboats *Paducah* and *Dubuque* land at Bluefields, Nicaragua, to protect American lives and property from violence arising from a battle between government troops and local rebels. Commander William W. Gilmer forbids the Nicaraguan gunboat *Venus* from shelling the town, noting that there are no military targets present.

May 30

MILITARY: The army accepts delivery of its first aluminum canteens and a cup, both featuring a folding handle.

MARINES: The Panamanian battalion under Major Smedley B. Butler redeploys in Nicaragua and helps establish a neutral zone around the town of Bluefields.

June 30

AVIATION: Aeronautical pioneer Glenn Curtiss conducts history's first aerial bombing test by dropping several dummy weapons on Keuka Lake, New York. His target is a series of buoyed flags laid out in the general shape of a battleship and 15 of his 17 projectiles score "hits." Several admirals observing the proceedings remain unimpressed and dismiss any potential threat to capital warships.

July 1

AVIATION: Captain Arthur S. Cowan replaces Captain Charles D. Chandler as head of the Aeronautical Division, Army Signal Corps.

July 11

NAVAL: The submarine *Bonita* accidentally collides with the gunboat *Castine* off Provincetown, Massachusetts, in the first recorded underwater accident. *Bonita* escapes without damage but the *Castine* is hurriedly beached to prevent sinking.

August 18

AVIATION: At Fort Sam Houston, a minor technological revolution occurs when Oliver G. Simmons, a civilian airplane mechanic, and Corporal Glen Madole fashion a tricycle landing gear for Signal Corps Airplane No. 1, allowing it to operate from level fields instead of launching rails.

August 20

AVIATION: Army Lieutenant Jacob E. Fickel becomes the first man to fire a weapon from an airplane when he shoots a .30-caliber Springfield rifle from a Curtiss biplane while flying over Sheepshead Bay Track, New York; four passes result in two hits.

September 4

MARINES: The final elements of Major Smedley B. Butler's Panamanian battalion depart Bluefields, Nicaragua, and redeploy in Panama. By this time, rebel factions favored by the United States have secured control of the government.

September 26

AVIATION: In Washington, D.C., the secretary of the navy appoints Captain Washington I. Chambers, assistant to the aid for material, to serve as the correspondent for all civilian inquiries respecting naval aviation. He does so in response to

repeated inquiries from the newly formed U.S. Aeronautical Reserve, consisting of civilians interested in advancing the military application of aeronautics. Their exchanges also constitute the first mention of an aviation interest within the Navy Department.

October

AVIATION: Ever ebullient, former president Theodore Roosevelt becomes the first former chief executive to pilot an airplane, in this instance over St. Louis, Missouri.

October 7

AVIATION: The chief of the Bureau of Steam Engineering is informed by Captain Hutch I. Cone that the rapidly improving technical state of aircraft underscores their usefulness to the navy. Furthermore, he requests acquisition of an airplane for the cruiser *Chester*, along with an instructor to teach naval officers the art of flying.

October 11

AVIATION: The Navy General Board, chaired by Admiral George Dewey, recommends to the secretary of the navy that continuing interest be placed in the state of aeronautics for the advantages it might convey to the navy. They also advocate provisions to berth airplanes or small dirigibles on all new classes of scouting vessels.

October 13

AVIATION: In Washington, D.C., the secretary of the navy orders two officers to be authorized to monitor and report on progress in the field of aviation with a view toward future naval applications.

October 18

AVIATION: Commander Walter Wellman loses control of the 228-foot long dirigible *America* during its first attempt to fly across the Atlantic, and it crashes off Cape Hatteras, North Carolina. The crew is rescued by a passing British steamer. It has established a new, 71-hour, 1,000-mile duration record.

October 22–30

NAVAL: Captain Washington I. Chambers, a former battleship commander, naval constructor William McEntee, and Lieutenant N. H. Wright attend the International Air Meet at Belmont Park, New York. Singularly impressed by the military potential of what transpires, Chambers becomes a staunch advocate of naval aviation at a time when such views are held as heretical by the naval establishment.

October 26

AVIATION: Aeronautical pioneer Ralph Johnson flies his Bleriot airplane to 9,714 feet over Long Island, establishing a new altitude record.

October 31

AVIATION: In Washington, D.C., the secretary of the navy is advised by the chief of the Bureau of Construction and Repair that funding ought to be requested to acquire one or more airplanes, with additional funding to modify the battleship *Texas* to launch aircraft from its turret.

November 14

AVIATION: Off Hampton Roads, Virginia, a Curtiss pusher biplane flown by civilian pilot Eugene B. Ely flies from a wooden platform erected on the bow of the cruiser *Birmingham*. It lands safely at Willoughby Spit. This is the first time an aircraft launches from a warship.

November 29

AVIATION: Aeronautical pioneer Glenn H. Curtiss contacts the secretary of the navy, offering to instruct a naval officer in the construction and operation of his aircraft.

December 23

AVIATION: At North Island, San Diego, California, Lieutenant Theodore G. "Spuds" Ellyson becomes the first naval officer ordered to earn his wings by learning how to fly the first naval aircraft, a Curtiss A-1 Triad.

December 31

NAVAL: As an indication of American naval expansion, by this date the U.S. Navy boasts a total tonnage of 717,202, making it the second-largest surface force in the world after Great Britain's Royal Navy. An additional 824,162 tons of shipping are also under construction.

1911

January 1

MILITARY: In another sign of growing professionalism among the officer class, the *Field Artillery Journal* begins publication.

January 11

MILITARY: President William Howard Taft requests \$5 million from Congress for military fortifications throughout the Panama Canal Zone and another \$7 million for cannon, barracks, searchlights, and a standing garrison there.

January 15

AVIATION: In San Francisco, California, a Wright biplane piloted by Lieutenants Philip O. Parmalee and Myron S. Crissy conducts the first live bomb drop in aviation history. The 36-pound weapon successfully detonates after being delivered from 1,500 feet. Aviation technology is assuming more of a military character.

January 16

AVIATION: Over the San Bruno Hills, California, a Wright flier piloted by Lieutenant G. E. M. Kelly conducts the first known aerial reconnaissance mission when he flies over camouflaged troops and tries unsuccessfully to photograph and detect their location from 2,000 feet.

January 17

AVIATION: Aeronautical pioneer Glenn H. Curtiss founds an aviation school on North Island, San Diego, California, the site of a future Signals Corps Aviation School.

January 18

AVIATION: In San Francisco Bay, California, a Curtiss pusher biplane piloted by civilian Eugene B. Ely touches down on a wooden platform on the stern of the

armored cruiser *Pennsylvania*, making the first landing on a ship. He promptly turns his craft around and takes off to land safely at Selfridge Field, demonstrating the basic viability of naval aviation.

January 21

AVIATION: A Wright Flyer piloted by Lieutenant Paul W. Beck relays the first radio-transmitted message while aloft over Selfridge Field, Michigan. The test is conducted at an altitude of 100 feet and the receiver picks up the message at a distance of 1.5 miles.

January 26

AVIATION: At North Island, San Diego, California, aeronautical pioneer Glenn H. Curtiss impresses navy authorities by demonstrating the viability of his amphibious hydroaeroplane, which he calls a “flying boat.” Lieutenant Theodore G. Ellyson, destined to be the first naval pilot, is on hand to help prepare the test flight.

January 28

AVIATION: At San Diego, California, Lieutenant Theodore G. Ellyson inadvertently becomes the first naval officer to fly when he pushes his Curtiss pusher too hard while taxiing and accidentally lifts off.

February 1

AVIATION: At San Diego, California, aeronaut Glenn H. Curtiss successfully takes off and lands in his hydroaeroplane, which has been modified to operate on a single, centerline float instead of three. Success here results in adoption of the so-called sled profile float, which remains in widespread use until World War I.

MARINES: A landing party of sailors and marines from the cruiser *Tacoma* goes ashore at Puerto Cortez, Honduras, to protect American lives and property from revolutionary violence.

February 3

MARINES: President William H. Taft appoints Colonel William P. Biddle as commandant of the Marine Corps to replace retiring major general George F. Elliott.

February 10

AVIATION: In the latest sign of technical innovation for airplanes, the Wireless Station at Point Loma Linda, California, is instructed by the assistant secretary of the navy to cooperate with Captain Harry S. Harkness, U.S. Aeronautical Reserve. Harkness is authorized to conduct experiments involving wireless transmission from airplanes in flight.

February 14

MILITARY: Fighting bolo-wielding fanatics in the Philippines convinces the army that it needs a hand gun with greater stopping power, and on this day it adopts the famous M1911 Colt .45 automatic pistol. This is a clip-fed weapon firing a very large projectile with tremendous stopping power and replaces the smaller Colt .38 revolver. It remains in service with many military units today.

February 15

MILITARY: The army turns over Fort Trumbull, New London, Connecticut, to the Treasury Department, prior to use as a revenue cutter base.

February 17

AVIATION: In San Diego Harbor, California, aviator Glenn H. Curtiss demonstrates the utility of his first flying boat by landing alongside the anchored armored cruiser *Pennsylvania*. It is then hoisted onboard by a crane. The craft is subsequently lowered back into the water and Curtiss flies back to base.

February 27

AVIATION: In a series of test flights held near Fort McIntosh, Laredo, Texas, a Wright B Flyer piloted by Lieutenants Benjamin D. Foulois and Philip O. Parmelee demonstrate the potential of aircraft to cooperate with ground forces. The aircraft was lent to the military by noted publisher Robert F. Collier.

March 3

AVIATION: The secretary of war authorizes the army's first aviation appropriation of \$125,000 to fund 51 units of its Aviation Section. Thereafter expenditures directed toward airplanes, airfields, and all requisite equipment and training climbs steadily.

MILITARY: Congress establishes the U.S. Army Dental Corps as a division of the Army Medical Service and also allows officers drawn from the regular establishment to train National Guard units.

March 4

AVIATION: Congress approves the first Naval Appropriations Act to include funding for nascent naval aviation (\$25,000). Such funding is to be administered by the Bureau of Navigation for additional flight testing.

March 7

MILITARY: President William H. Taft, concerned over rising instability in Mexico, orders 20,000 army troops deployed along the southern border.

March 8

MARINES: In Cuba, a provisional regiment of marines is assembled under Colonel George Barnett for possible use in a war with Mexico.

March 9

AVIATION: Facing competition from Glenn H. Curtiss, the Wright Company of Dayton, Ohio, offers to train a navy pilot in exchange for the purchase of a \$5,000 Wright flier.

March 10

MARINES: At Mare Island, California, a second provisional regiment under Colonel Charles A. Doyen prepares for possible expeditionary duty against Mexico.

March 13

MARINES: At Guantánamo, Cuba, a third provisional battalion of marines under Major George C. Thorpe arrives to bolster those already on the island; a period of political unrest appears in the offing.

March 17

AVIATION: A Curtiss D pusher aircraft is the first machine adopted by the army to utilize tricycle landing gear.

- Lieutenant John Rodgers is instructed to report to Dayton, Ohio, for flight instruction through the Wright Company. He is destined to become Naval Aviator No. 2.

April 1

AVIATION: In another sign of aviation's significance, Captain Washington I. Chambers is ordered to report for duty with the Navy General Board. The move was suggested by Admiral George Dewey because that space was lacking at the office of the Aid for Operations.

April 11

AVIATION: The army establishes its first, permanent flying school outside College Park, Maryland, although fliers are expected to train at Augusta, Georgia, during winter months. The school later relocates to San Diego, California.

April 12

AVIATION: Lieutenant Theodore G. Ellyson emerges from the Curtiss Aviation Center, San Diego, California, as the navy's first pilot. He goes on to establish a number of records in his distinguished career.

April 13

MILITARY: Captain Julien E. Gaujot, 1st Cavalry, takes his troop across a field of fire at Aqua Prieta, Mexico, and removes a number of Mexican regulars to safety, apparently with the permission of local rebels.

April 14

AVIATION: In the latest sign of increasing significance, the nascent Office of Naval Aviation transfers from the General Board to the Bureau of Navigation.

April 21

AVIATION: Future aviation leader Lieutenant Henry H. Arnold is ordered to Dayton, Ohio, for flight instructions at the Wright Flying School.

April 26

MARINES: The Marines Corps Association is unofficially founded by Colonel Franklin J. Moses in Guantánamo, Cuba; its purpose is to organize politically and thwart any attempt to abolish the corps.

April 27

AVIATION: At Fort Sam Houston, Texas, a Curtiss IV Model D and a Wright Type B become the second and third aircraft in the Signal Corps's small but growing aerial inventory.

May 8

AVIATION: At the behest of naval observer Captain Washington I. Chambers, the navy's chief of the Bureau of Navigation issues its first contract to obtain two Curtiss A-1 Triad biplanes—signaling the birth of naval aviation. The total cost to taxpayers is \$25,000.

May 10

AVIATION: A Curtiss D. Pusher aircraft piloted by Lieutenant George E. M. Kelly crashes at Fort Sam Houston, Texas, killing him. Kelly Field, San Antonio, will be named in his honor in 1917.

May 15

NAVAL: In Annapolis, Maryland, Captain John H. Gibbons is appointed the 22nd superintendent of the U.S. Naval Academy.

May 22

MILITARY: Henry Lewis Stimson is appointed secretary of war. He presses for greater authority over the chief of staff of the army.

June 11

MILITARY: The army founds the School of Fire at Fort Sill, Oklahoma, as its new artillery school.

June 20

AVIATION: Captain Charles D. Chandler no sooner returns from attending the Army Signal School at Fort Leavenworth, Kansas, than he replaces Captain Arthur S. Cowan as head of the Aeronautical Division, Army Signal Corps.

June 24

MILITARY: Once Mexican revolutionaries overthrow the regime of Porfirio Diaz, the 20,000 American troops drawn up along the southwestern border are withdrawn by President William Howard Taft.

June 27

AVIATION: At Hammondsport, New York, Lieutenant John H. Towers reports for flight instruction at the Curtiss facility; he becomes Naval Aviator No. 3.

July 1

AVIATION: At Lake Keuka, Hammondsport, New York, aeronautical pioneer Glenn H. Curtiss successfully demonstrates his A-1 Triad aircraft built for the navy. The craft flies off the lake for five minutes, reaching an altitude of 25 feet. Lieutenant Theodore G. Ellyson also performs two solo flights today.

July 3

AVIATION: The Signal Corps Aviation School is formally established at College Park, Maryland, under Captain Charles D. Chandler, who also employs two lieutenants, Henry H. Arnold and Lomas D. Milling, as flight instructors. The two latter pilots only recently earned their wings by attending the Wright aviation school at Dayton, Ohio.

- At Lake Keuka, Hammondsport, New York, Navy lieutenant Theodore G. Ellyson makes the first night flight by a naval aviator by successfully landing on water without the aid of lights.

July 6

AVIATION: At Annapolis, Maryland, Captain Washington I. Chambers reports for duty at the U.S. Naval Academy to help select a site for the navy's first aviation base. The site chosen is nearby Greenbury Point, which is not formally occupied until the fall.

July 10

AVIATION: At Hammondsport, New York, aeronaut Glenn H. Curtiss makes the first amphibious flight by lifting off on land, cranking his wheels up, and then landing with pontoons on the water.

July 13

AVIATION: At Hammondsport, New York, the Curtiss A-2 debuts as the navy's second aircraft; it is flown by both Glenn H. Curtiss and Lieutenant Theodore G. Ellyson.

July 15

MEDICAL: Research conducted by Captain W. W. Russell of the U.S. Army Medical Corps highlights the need for compulsive typhoid vaccination for all army personnel.

July 19

AVIATION: A Wright Type B airplane is delivered to Annapolis, Maryland, where it is fitted with pontoons and becomes the navy's first seaplane.

August–September

MILITARY: Army troops are employed to help fight raging forest fires in Montana, Idaho, Washington, and Oregon.

August 23

AVIATION: Naval aviators at Dayton, Ohio, and Hammondsport, New York, are ordered to Annapolis, Maryland, to begin work with the Engineering Experiment Station, U.S. Naval Academy, and help set up the new naval aviation base at nearby Greenbury Point.

August 30

MARINES: The Marine Officers School is relocated from Port Royal, South Carolina, to Norfolk, Virginia; recruit training functions are split between the two locales.

August 31

NAVAL: The battleship *Utah* is placed in commission under Captain William S. Benson, a future chief of naval operations.

September

AVIATION: The navy establishes its aviation camp at Greenbury Point in Annapolis, Maryland, across the Severn River from the U.S. Naval Academy. The fact that it shares property with the midshipman's rifle range and is susceptible to errant rounds speaks volumes as to the prevailing attitude toward airplanes.

September 4

MILITARY: At La Purap, Basilan, Philippines, Moro forces attack a small detachment of soldiers and scouts and are repulsed after a stiff fire fight. Private José B. Nisperos, though gravely wounded, is highly commended for maintaining a steady fire upon enemy troops.

September 7

AVIATION: At Hammondsport, New York, Lieutenant Theodore G. Ellyson makes the first successful test of a shipboard launching device by gliding his Curtis Triad along an inclined wire rigged from the beach down to the water.

September 8

MILITARY: A new campaign hat is adopted by the army, which gains renown as the "Montana Peak" or "Smokey the Bear" hat. It is associated with drill instructors to present times.

September 11

MARINES: The new Advance Base School relocates from New London, Connecticut, to the Philadelphia Navy Yard, Pennsylvania.

September 16

AVIATION: In light of the exposed condition of naval aviators in their Curtis and Wright fliers, Lieutenant Theodore G. Ellyson contacts the Navy Department with a recommendation that they purchase helmets, goggles, fur-lined leather jackets and leather pants, rubber galoshes, and life preservers.

September 20

AVIATION: The future need for navigation equipment of some sort on aircraft is reflected in a request by the Bureau of Navigation to the U.S. Naval Observatory to borrow a boat compass for experimental work.

September 24

NAVAL: The gunboat *Pampanga* disgorges a landing party on Basilan Island, Philippines, which captures the village of Mundang after a fierce firefight with Moro rebel forces. Five Medals of Honor are awarded in consequence.

October 10

AVIATION: Lieutenant Thomas M. Dilling becomes the first army pilot to test drop live bombs from an aircraft while using a primitive bombsight invented by Riley E. Scott. These are the first such armament tests conducted by air.

- At the Washington Navy Yard, D.C., Lieutenant Holden C. Richardson becomes naval aviation's first engineering and maintenance officer.

MARINES: A detachment from the gunboat *Helena* under Major Philip M. Bannon disembarks at Hankow, China, to protect the U.S. consulate in Beijing during difficulties associated with the overthrow of the Manchu dynasty and establishment of the Chinese Republic.

October 17

AVIATION: In a very prescient letter, Captain Washington I. Chambers contacts aeronaut Glenn H. Curtiss about the future use of turbine (jet) propulsion in aircraft, along with the possibility of diesel-powered ones.

October 18

AVIATION: In Michigan, Captain George W. McKay becomes the first National Guard officer issued a pilot's license.

October 25

AVIATION: A Curtiss A-1 Triad flown by Lieutenants Theodore G. Ellyson and John H. Towers experiences a leaking radiator while flying from Annapolis, Maryland, to Fortress Monroe, Virginia. They still managed to cover 112 miles in 122 minutes.

November 4

AVIATION: The navy seeks to convert its Wright B-1 landplane into a hydroaeroplane by contacting the Burgess Company, Marblehead, Massachusetts, for installation of a suitable float.

November 4–14

NAVAL: The cruiser *Albany* lands a detachment of 24 marines at Shanghai, China, to guard a cable station after the Chinese Revolution erupts.

November 5

AVIATION: Calbraith R. Rodgers completes the first-ever cross-country flight by touching down at Long Beach, California, in a Burgess biplane. It has taken him seven weeks to cover 3,220 miles and he remains airborne for a total of 82 hours and four minutes—Rodgers only glided in after his engine completely failed.

November 24

NAVAL: The armored cruiser *Saratoga* departs Shanghai and makes for Taku, China, where its landing party will guard foreign missionaries residing there.

November 28

AVIATION: In light of continuing problems with cold weather, the Signal Corps Army Aviation School temporarily relocates from College Park, Maryland, to Augusta, Georgia, to enjoy better flying conditions.

December 14

NAVAL: The armored cruiser *California* becomes the first American capital warship to enter the channel at Pearl Harbor, Hawaii. Previously, the Hawaiian Dredging Company was hard at work widening the channel by 1,100 feet and to a uniform depth of 35 feet.

December 20

AVIATION: At Annapolis, Maryland, in a Curtiss A-1 Triad, Lieutenant John H. Towers and Ensign Charles H. Maddox experiment with airborne wireless transmissions by reeling out a trailing wire behind the aircraft as an antenna. The signals, however, were too weak to be practicable.

December 22

MILITARY: Army troops under Captain John J. Pershing surround and capture the Moro stronghold of Bad Dajo, Jolo Island, the Philippines, taking several prisoners.

December 26

AVIATION: In Washington, D.C., Captain Washington I. Chambers, still looking for a practical, shipboard-launching device for aircraft, reports that the Bureau of Ordnance sought to try out devices similar to those used for launching torpedoes.

December 29

AVIATION: All aviators and their equipment are ordered transferred from Annapolis, Maryland, to North Island, San Diego, California, to establish an aviation camp on land owned by aeronaut Glenn H. Curtiss.

1912**January 9**

MARINES: A detachment is landed in Honduras to protect American lives and property in a rebellion against President Manuel Bonilla.

January 14

MILITARY: Cavalry under Captain E. G. Peyton, assisted by Philippine Scouts, makes a sweep of Jolo Island and captures several bands of renegade Moros for the loss of two wounded.

January 22

MILITARY: The city of Tientsin is occupied by army troops to protect American lives and property as the Chinese Revolution against the Manchu dynasty continues.

January 25

AVIATION: Lieutenant Henry H. Arnold of the army establishes an altitude record by reaching 4,674 feet over Augusta, Georgia.

February

MILITARY: The course of military reforms apparently rankles aged general Fred C. Ainsworth, adjutant general of the army, who then composes an insulting memo to Chief of Staff Leonard Wood. Upon Wood's recommendation, Secretary of War Henry Lewis Stimson relieves Ainsworth, but he then allows the elderly officer to retire rather than face a court-martial.

February 11

NAVAL: The sunken battleship *Maine* is raised from Havana Harbor by the U.S. Army Corps of Engineers.

February 14

NAVAL: The *Skipjack* becomes the U.S. Navy's first diesel-powered submarine under Captain Chester W. Nimitz. The craft subsequently serves as a test bed for underwater radio transmissions and gyrocompass navigation.

February 17

MEDICAL: The War Department publishes its first physical examination test for prospective pilots at a time when the effects of prolonged flying on human physiology were not completely understood. It is assumed at the time that any healthy individual could fly an airplane as easily as he could drive an automobile.

February 23

AVIATION: As the army becomes more firmly committed to acquiring airplanes, *War Department Bulletin No. 32* issues a new rating for "military aviator" and stipulates that prospective candidates must be able to reach and hold an altitude of 2,500 feet in a 15-mile per hour wind and make a dead stick landing within 150 feet of a designated area.

March 1

AVIATION: Over Jefferson Barracks, Missouri, Captain Albert Berry jumps from a Bleriot pusher airplane using a trapeze bar and deploys a parachute for the first time. He lands safely from an altitude of 1,500 feet.

March 9

AVIATION: One of the earliest expressions of interest in steel and aluminum as building materials in aircraft originates with an assistant naval constructor, Holden C. Richardson.

March 10

MARINES: A landing detachment from the Rainbow arrives at Beijing, China, to reinforce the Legation Guard already present.

March 11

AVIATION: The secretary of the navy displays early interest in helicopter-type aircraft although he authorizes an expenditure of no more than \$50 in developing a model.

March 21

AVIATION: Lieutenant Frank P. Lahm is the first American military pilot to serve overseas when he flies his Wright Model B, Signal Corps No. 7, over Fort William McKinley in the Philippines.

March 23

AVIATION: At Mare Island Navy Yard, San Francisco, California, a chief electrician, having mounted wireless equipment in a dummy airplane fuselage raised to a height of 85 feet, emits signals that are received 20 miles away by a radio station at Point Richard.

April 6

AVIATION: Captain Washington J. Chambers, head of the navy's flight department, suggests using the word airplane to replace the term aeroplane then in vogue. He also suggest such commonplace terms as landing gear and fuselage.

May 7

AVIATION: At College Park, Maryland, a Wright flier flown by Lieutenant Thomas D. Milling is armed with a Lewis machine gun for the first time and employs a gunner, Lieutenant Charles D. Chandler.

May 11

AVIATION: Rear Admiral Bradley A. Fiske becomes the first flag officer to take off and land on water in a Wright B-1 hydroaeroplane at Salem, Massachusetts. The experience reaffirms his belief that airplanes have an important use as scouting craft at sea.

May 19

NAVAL: In consequence of the recent *Titanic* tragedy, the cruiser *Birmingham* begins patrolling the North Atlantic on the first-ever ice patrol. Within two years, this activity is conducted on an international basis and the duty is assumed by the U.S. Coast Guard.

May 22

AVIATION: Marine Corps aviation begins when Lieutenant Alfred A. Cunningham is assigned to flight instruction classes at the Burgess Company in Marblehead, Massachusetts. He is designated Naval Aviator No. 5.

May 28

NAVAL: American gunboats *Paducah*, *Nashville*, and *Petrel* drop anchor off Guantánamo and Nipe Bay, Cuba, to afford protection to American-owned sugar mills in the vicinity.

May 28–June 5

MARINES: The 1st Provisional Regiment goes ashore from the transport *Prairie* at Guantánamo, Cuba, and maintains order in 26 towns after revolutionary activity breaks out.

June 1

AVIATION: Lieutenant Henry H. (“Hap”) Arnold reaches a record-breaking 6,540 feet in a Burgess-Wright biplane.

June 5

AVIATION: In Augusta, Georgia, Lieutenant Colonel Charles B. Winder becomes the first National Guard officer to complete flight training.

MILITARY: President William Howard Taft orders a contingent of 750 marines deployed to Cuba to protect American lives and property there. Taft’s response is best described as “Dollar Diplomacy,” whereby he refrains from the use of force and instead interjects new capital to stabilize oppressive but friendly regimes.

MARINES: In Cuba, a provisional marine brigade is cobbled together under Colonel Lincoln Karmany; it is tasked with maintaining order in Cuba during an outbreak of revolutionary activity.

June 7

AVIATION: Over College Park, Maryland, a Wright B airplane manned by Captain Charles D. Chandler and Lieutenant Thomas D. Milling fires a Lewis automatic weapon while airborne for the first time. The cloth target they aimed at was effectively sieved.

June 10

MARINES: Total Marine Corps strength in Cuba rises to brigade level following the arrival of the 2nd Regiment. The marines are ordered into the field around Guantánamo and Santiago to protect towns, rail lines, and plantations.

June 11

AVIATION: A Wright C pusher aircraft crashes, taking the life of Lieutenant Leighton W. Hazelhurst and civilian Arthur L. Welsh.

June 12

MILITARY: The army adopts the so-called Munson Last, designed by Colonel Edward L. Munson, Medical Corps, as its standard footgear for ground-pounding military personnel.

June 14

AVIATION: Corporal Vernon Burge of the army is the first American enlisted man to qualify as a pilot after passing through the Army Air School located in the Philippines.

June 21

AVIATION: Pushing the envelope, Lieutenant Theodore G. Ellyson flies his Curtiss A-1 to 900 feet over Annapolis, Maryland, in only three minutes and 30 seconds.

July 5

AVIATION: Captain Charles D. Chandler and Lieutenants Thomas D. Milling and Henry H. Arnold qualify to become that service’s first “Military Aviators”; they are also the first recipients of a new golden badge. Arnold, in particular, would become closely associated with the growth and maturation of American military air power.

July 16

NAVAL: A patent is issued to Rear Admiral Bradley Fiske for the design of an air-launched torpedo, one of his many innovative designs with military applications.

July 25

AVIATION: In another sign of mounting sophistication, the secretary of the navy releases the first aircraft specifications, "Requirements for Hydroaeroplanes," to standardized construction and safety features from future manufacturers.

July 26

AVIATION: In another pioneering wireless transmission, a Wright B-1 hydroaeroplane flown by Lieutenant John Rodgers and Midshipman Charles Maddox transmits the letter "D" in Morse code while flying over Chesapeake Bay. The signal is received by the torpedo boat *Bailey* at distance of one mile.

July 31

AVIATION: At Annapolis, Maryland, Lieutenant Theodore G. Ellyson makes the first attempt to launch an aircraft using a compressed air catapult. His A-1 roars off the Santee Wharf only to collapse in the Severn River; Ellyson remains unhurt. The system in question was designed at the Naval Gun Factory, Washington Navy Yard, from plans proposed by Captain Washington I. Chambers.

August 3

MARINES: In light of ongoing civil disorders, a permanent marine garrison of 250 men is assigned to the naval base at Guantánamo, Cuba.

August 4

NAVAL: Revolutionary violence against President Adolfo Diaz in Nicaragua prompts the landing of 100 sailors and marines from the gunboat *Annapolis*, which marches overland to guard the American legation in Managua. The Panamanian battalion of Major Smedley D. Butler is also ordered back to Nicaragua as a precautionary measure.

August 12

AVIATION: In a harbinger of things to come, three Signal Corps airplanes participate in military maneuvers at Bridgeport, Connecticut. Specifically, the craft are tested as radio and reconnaissance platforms for close cooperation with ground troops.

August 14

MARINES: A force of 354 marines under Major Smedley D. Butler deploys in Nicaragua to protect an overland canal route from foreign occupation. This move stems from that country's inability to pay off debts owed to European banks. President William Howard Taft subsequently arranges a treaty whereby American banks can handle Nicaraguan finances until the debts have been accounted for; as previously it fails to pass muster in the Senate.

August 17

MARINES: Sailors and marines from the cruiser *Tacoma* again arrive at Bluefields, Nicaragua, to maintain order during a period of revolutionary turmoil.

August 20

AVIATION: Lieutenant Alfred Cunningham solos for the first time, becoming the first Marine Corps aviator.

August 22

MARINES: Congress votes to expand Marine Corps manpower levels to 348 officers and 9,921 enlisted men; this is the first time corps personnel has exceeded the 10,000 mark.

August 24–26

MILITARY: Congress creates the Quartermaster Corps by incorporating the existing Quartermaster, Pay, and Subsistence Departments into a single entity.

MARINES: Off Shanghai, China, marines from the transport *Rainbow* are ordered ashore to protect American citizens and property during an interval of revolutionary violence.

August 28–30

MARINES: Continuing unrest in Nicaragua results in additional marines from the cruisers *California* and *Denver* landing at Cortino and San Juan del Sur to maintain order.

September 4

NAVAL: Colonel Joseph H. Pendleton lands 790 men of the 1st Provisional Marine Regiment ashore at Cortino, Nicaragua, to bolster security and order in that war-racked region.

September 5

MARINES: The armored cruiser *Colorado* lands an additional 323 sailors and marines at Cortino, Nicaragua. Colonel Joseph H. Pendleton now commands a force of over 2,000 men, and he deploys them along the railway from Cortino to Managua to divide the revolutionaries.

September 19

MARINES: Nicaraguan rebels ambush Major Smedley D. Butler's marines as they ride onboard a train; no losses are incurred and the rebels are driven off.

September 22

MARINES: Two marine battalions and an artillery battery under Major Smedley D. Butler arrive at Granada, Nicaragua, to relieve the government garrison and scatter the rebel troops besieging it.

October 2

MARINES: A relief column under Major Smedley D. Butler marches to Masaya, half-way between Managua and Granada, and demands that a rebel force of 1,000 men under General Benjamin Zeledon surrender. The rebels refuse and skirmishing ensues.

October 3–4

AVIATION: At the Naval Proving Ground, Indian Head, Maryland, a recoilless gun designed by Commander Cleland Davis undergoes initial testing. This was intended to fire a shell large enough to sink a submarine while possessing a slight enough recoil to be fired from an aircraft.

NAVAL: Near the town of Masaya, Nicaragua, marines and sailors under Major Smedley D. Butler attack and storm a rebel position at nearby Coyotepe Hill. Resistance is fierce but a charge by marines under Major W. N. McKelvy carries their position. The defenders are routed and lose 60 men killed, including their commander, General Benjamin Zeledon; marine losses amount to 18 dead and wounded. After this encounter, the Nicaraguan insurgency begins to fade.

October 6

AVIATION: At Annapolis, Maryland, Lieutenant John H. Towers set an American endurance record by flying his Curtiss A-2 for 6 hours, 10 minutes, and 35 seconds.

NAVAL: Newly arrived in Nicaragua, Colonel Joseph H. Pendleton conducts 1,200 sailors and marines on a campaign to storm the rebel strong point at León. Six Americans are wounded but the insurgents are routed and organized resistance to the government collapses.

October 8

AVIATION: At the Engineering Experimental Station, Annapolis, Maryland, the navy conducts tests with the Gyro 50-horsepower rotary engine; this is the first instance where an engine has been scientifically evaluated with laboratory equipment, including a dynamometer.

MEDICAL: A circular letter released by the Bureau of Medicine and Surgery outlines the physical requirements for prospective naval aviators for the first time.

October 9

AVIATION: At College Park, Maryland, Lieutenant Henry H. Arnold wins the first-ever Mackay Trophy by successfully completing a triangular reconnaissance course.

October 26–December 18

AVIATION: Over Chesapeake Bay, Lieutenant John H. Towers conducts the first attempts to spot submerged submarines from the air; he reports that 800 feet appears to be the optimum altitude, although the target craft can be seen only a few feet below the surface under muddy conditions.

November 5–13

AVIATION: At Fort Riley, Kansas, several aircraft successfully employ direct communications (by radio, dropping cards, or smoke signals) in concert with artillery units. This is the origin of aircraft “spotting” for artillery.

November 12

AVIATION: Lieutenant Theodore G. Ellyson of the navy, manning a Curtiss A-1 Triad hydroaeroplane, is successfully catapulted from a specially designed barge on the Anacostia River opposite Washington, D.C. Such technology is essential if aircraft are to be launched from warships at sea in the future.

November 21

MARINES: Following the reestablishment of civil rule in Nicaragua, Major Smedley D. Butler withdraws his marine battalion to Panama while the balance under Colonel Joseph H. Pendleton board ships. A further 101 marines remain behind

as a U.S. legation guard in Managua while a battalion under Colonel C. G. Long occupies the town of León as a precaution.

November 27

AVIATION: The Army Signal Corps purchases its first three Curtiss F biplane flying boats, which also serve in the navy under the designation of C-1.

November 30

AVIATION: A Curtiss C-1, the navy's first flying boat, is piloted by Lieutenant Theodore G. Ellyson over Lake Keuka, Hammondsport, New York. The navy ultimately acquires and operates various flying boats up through the Vietnam War.

December 8

AVIATION: North Island, San Diego, California, is the site of the new Signal Corps Aviation School, which grows in significance over the years. Here Lieutenant Thomas D. Milling invents a quick-release safety pilot for pilots and passengers.

December 19

AVIATION: In Washington, D.C., President William H. Taft authorizes a "Commission on Aerodynamic Laboratory" for the express purpose of exploring the best methods of creating such an institution for naval aviation. Commission members will include Captain Washington I. Chambers and Naval Constructor David W. Taylor.

1913

MILITARY: To promote better management, the army is divided into six geographic departments—Eastern, Central, Western, Southern, Philippine, and Hawaiian.

January 6

AVIATION: Naval maneuvers off Guantánamo Bay, Cuba, employ the entire naval aircraft inventory, which, for the first time, are launched from the collier *Sterling*. The men and machines are tested for their abilities to scout, spot submerged submarines and mines, and generally serve as visual adjuncts to the battle fleet. The machines will be evaluated throughout the exercise as the potential "eyes of the fleet" for a period of eight weeks.

February 1

NAVAL: The Naval Postgraduate School opens its doors in the former Marine Barracks at the U.S. Naval Academy, Annapolis, Maryland; it is later transferred to Monterey, California.

February 11

AVIATION: In a sign of things to come, Representative James Hay, West Virginia, introduces legislation in Congress mandating an independent air force; it fails to pass.

February 17

TECHNOLOGY: Pioneering inventor Elmer Sperry successfully conducts initial experiments with his gyrostabilizer (autopilot) on an army aircraft.

February 26

AVIATION: The chief constructor of the navy approves plans to provide naval aviation researchers with their first wind tunnel to scientifically study aerodynamic

properties. The resulting device is constructed at the Washington Navy Yard and remains in service through the end of World War II.

March 2

AVIATION: Given the inherent risks of flying, the army establishes flight pay at 35 percent over base pay for prescribed aviation duties. At this juncture, only 30 officer qualify for such emoluments. It also mandates that no more than 30 officers could be involved with flying activities at any given time, and they could rank no higher than lieutenant commander in the navy, or major in the marines.

March 4

AVIATION: The Naval Appropriations Act of 1914 allows a 35 percent increase in flight pay for naval aviators.

MILITARY: In Washington, D.C., Woodrow Wilson is sworn in as the new president and commander in chief.

March 5

AVIATION: In response to a possible border crisis with Mexico, the 1st Provisional Aero Squadron is formed with five pilots, seven Wright pushers, and 21 enlisted men at Augusta, Georgia. The unit subsequently ships to Texas City, Texas, for additional training before field operations commence. This unit is the lineal predecessor of the 1st Reconnaissance Squadron, which remains the oldest formation in the U.S. Air Force.

- In clearer waters outside Guantánamo Bay, Cuba, Lieutenant John H. Towers reports that submarines could be spotted from the air at depths of 30 to 40 feet.

MILITARY: In Washington, D.C., Lindley Miller Garrison is appointed the new secretary of war.

NAVAL: In Washington, D.C., Josephus Daniels gains appointment as the 41st secretary of the navy; he shortly after names Franklin D. Roosevelt his assistant secretary.

- Dr. Harry E. Harvey is the first certified dentist to serve with a naval vessel when he is berthed aboard the hospital ship *Solace*.

March 6

AVIATION: During winter naval maneuvers at Guantánamo Bay, Cuba, a C-1 flying boat piloted by Lieutenant John H. Towers and Ensign Godfrey DeC. Chevalier successfully performs spotting and reconnaissance flights in concert with surface vessels. In this instance, they espied a column of battleships and alerted a squadron of destroyers, which then attacked.

March 13

AVIATION: The Aeronautical Society awards Captain Washington I. Chambers for his contributions to advancing the state of aviation, particularly as it applies to seaplanes and catapult technology.

March 26

MILITARY: Units of the Corps of Engineers, assisted by National Guard units, fight to contain rising flood waters in Indiana and Ohio. The problem is severe enough that martial law is declared in West Indianapolis and National Guard troops patrol the streets.

March 31

AVIATION: According to latest regulations, the navy's newest aircraft, the Burgess Company and Curtiss D-1, is the first to be outfitted with a compass, altimeter, inclinometer, speed indicator, chart board, radio, and generator.

April 7

NAVAL: The *Jupiter* becomes the navy's first electrically powered vessel in commission; in 1922 it is converted into the *Langley* (CV-1), the nation's first aircraft carrier.

April 10

AVIATION: Performance standards are established by the Office of the Secretary of the Navy for the new qualification of navy air pilot. They are described as "more exacting" than those affecting land pilots and requirements spelled out by the Fédération Aéronautique Internationale.

April 25

MARINES: The Marine Corps Association is formally chartered to preserve the history of the corps and publish a journal of interest to its members.

April 28

AVIATION: In another significant development, Rear Admiral Victor Blue, chief of the Bureau of Navigation, approves a gyroscopic stabilizer to be jointly developed by the Navy Department, Glenn Curtiss, and the Sperry Corporation.

May 3

AVIATION: Captain Washington I. Chambers and Lieutenant Holden C. Richardson are appointed naval representatives to an advisory committee working with the Langley Aerodynamical Laboratory.

May 28

AVIATION: Lieutenants Thoms D. Milling and W. C. Sherman of the U.S. Army set a flight endurance record of four hours and 22 minutes while flying between Texas City and San Antonio, Texas.

June 9

MILITARY: The army establishes the curiously named School for Musketry at Fort Sill, Oklahoma, a precursor to the Infantry School.

June 11

MILITARY: At Gagsak Mountain, Jolo, Philippines, Moro tribesmen attack American soldiers; Lieutenant Louis Mosher bravely rescues a fallen comrade under fire, winning a Medal of Honor.

June 12

AVIATION: The first Curtiss tractor-type aircraft, a vest aerodynamic improvement over earlier pushers, is accepted by the Army Signal Corps.

- Lieutenant Jerome C. Hunsaker is detailed by the secretary of the navy to the Massachusetts Institute of Technology to help develop a course in aeronautical engineering within that institutions's Department of Naval Architecture.

June 13

AVIATION: Over Annapolis, Maryland, Lieutenant Patrick N. L. Bellinger reaches 6,200 feet in his Curtiss A-3, setting an American altitude record for seaplanes.

June 13–15

MILITARY: The 8th U.S. Infantry and Philippine Scouts under Brigadier General John J. Pershing capture the final Moro stronghold at Bud Bagsak on Jolo Island, effectively crushing the rebellion at the cost of 27 casualties. Pershing himself leads from the front and greatly distinguishes himself in combat.

June 20

AVIATION: Over Annapolis, Maryland, Ensign William D. Billingsley is thrown from his Wright B-2 hydroaeroplane by a violent downdraft and plummets 1,500 feet to his death, becoming the navy's first aviation-related fatality. His passenger, Lieutenant J. H. Towers, is also tossed overboard but manages to cling to his craft until it crashes in the water, sustaining serious injuries. Hereafter, safety belts are standard equipment on all naval aircraft.

June 23

AVIATION: A navy general order recognizes the significance of aviation bureaus, which now enjoy equal status with those controlling naval vessels.

June 30

GENERAL: Thousands of Civil War veterans, Union and Confederate alike, gather at the carefully preserved battlefield of Gettysburg, Pennsylvania, on the 50th anniversary.

July 7

NAVAL: A marine detachment from the cruiser *Albany* lands at Shanghai, China, to protect American lives and property during a time of civil disorder.

August 8

AVIATION: In Hawaii, Lieutenant Harold Geiger pilots a Curtiss E airplane over the island for the first time, having graduated from the new aviation school at Fort Kamehameha.

August 30

AVIATION: In a report to the secretary of the navy, Admiral George Dewey and the General Board of the Navy strongly recommend the establishment of an "efficient Naval Air Service" as soon as possible.

- Over Hammondsport, New York, a Curtiss C-2 flying boat piloted by Lieutenant Patrick N. L. Bellinger tests a Sperry gyroscopic stabilizer (or automatic pilot) for the first time.

September 5–7

NAVAL: American citizens are evacuated from Ciaris Estero, Mexico, by a marine detachment from the transport *Buffalo*.

October 5

AVIATION: At Hammondsport, New York, the navy conducts its first extended trials of E-1 amphibian flying boats. These are Curtiss A-2 aircraft fitted with a flying boat hull and three-wheeled landing gear; it is nicknamed Owl for "Over Water Land" type.

October 7

AVIATION: The secretary of the navy, cognizant of the growing importance of aviation to the fleet, appoints an Aeronautical Board under Captain Washington Irving

Chambers. The board's first act is to recommend establishment of an aeronautical center at Pensacola, Florida, plus the assignment of at least one scout aircraft to every battleship and cruiser in the fleet. An aviation office is also established within the secretary's office; projected expenditures to initiate said programs are \$1.2 million.

December 4

AVIATION: In light of the growing number of aircraft available, a standard organization for Aero Squadrons is established by the War Department.

December 17

AVIATION: In Washington, D.C., Captain Washington I. Chambers is relieved of duties as the Navy Department's special duty officer in charge of aviation matters; his replacement is Captain Mark L. Bristol.

December 19

MARINES: Congress limits the tenure of all future Marine Corps commandants to four years, although a subsequent four-year reappointment is possible.

December 23

MARINES: The Advance Base Force, consisting of two regiments under Colonel George Barnett, is organized to participate in fleet maneuvers for the first time. The experience they provide leads to increasing skill at amphibious tactics in the 1920s and 1930s.

December 27

AVIATION: Marine Corps aviation begins assuming definite form once the Aviation Detachment, consisting of two officers and seven enlisted men, is assigned to the Advance Base Force.

December 30

NAVAL: A communication breakthrough appears when the naval station at Arlington, Virginia, picks up the signal indicating the time "6:40," which had been broadcast in France at the Eiffel Tower.

1914

MILITARY: Lieutenant George S. Patton, presently master of the sword, Mounted Service School at Fort Riley, Kansas, writes the manual *Saber Regulations* as a standard military text.

January 1

MILITARY: The army turns over the administration of Moro Province, Mindanao, the Philippines, to civil authorities.

NAVAL: Secretary of the Navy Josephus Daniels institutes mandatory, off-duty education for all enlisted men in an attempt to raise academic standards. He subsequently starts the practice of allowing 100 enlisted men to compete for entry into the U.S. Naval Academy yearly.

January 6

AVIATION: The small Marine Corps element at the navy's aviation camp, Annapolis, Maryland, consisting of a flying boat and an amphibian craft, are ordered to Cul-ebra Island, Puerto Rico, to commence exercises with the Advance Base Unit.

January 7

AVIATION: The 1st Aero Squadron is formally organized by the chief of signals at San Diego, California, with eight airplanes, 20 officers, and 90 men.

- In Washington, D.C., the Office of Aeronautics is transferred from the Bureau of Navigation to the Division of Operations within the Office of the Secretary of the Navy. This is the latest sign of aviation's growing significance to naval operations.

January 10

AVIATION: Secretary of the Navy Josephus Daniels declares that the technical science of aeronautics has evolved to such a point that it must be considered a vital element of naval forces for offensive and defensive purposes.

January 15

AVIATION: At San Diego, California, the Signal Corps Aviation School issues the first flying safety regulations. Henceforth, all prospective pilots and passengers are required to wear helmets and coats.

January 20

AVIATION: The naval aviation force arrives at Pensacola, Florida, from Annapolis, Maryland, to establish a flying school. It consists of nine officers, 23 enlisted men, and seven aircraft under the command of Lieutenant John H. Towers. The aircraft utilize tents as hangars to protect them from the elements as the station's regular facilities are in disrepair.

January 28–February 9

MARINES: A detachment from the battleship *South Carolina*, accompanied by forces from Britain, France, and Germany, lands at Port-au-Prince, Haiti, as part of an international peacekeeping force.

January 31

AVIATION: The first naval air station is established at Pensacola, Florida.

February 7

NAVAL: At Annapolis, Maryland, Captain William F. Fullham gains appointment as the 23rd superintendent of the U.S. Naval Academy.

February 16

AVIATION: Off Pensacola, Florida, a Burgess D-1 crashes in water 200 feet from shore, killing Lieutenant James M. Murray.

NAVAL: Congress creates a national naval militia force to supplement the standing establishment in wartime.

MARINES: Addition detachments come ashore at Port-de-Paix, Haiti, to shore up law enforcement efforts.

February 21

MARINES: Continuing violence in Haiti necessitates a marine detachment from the gunboat *Wheeling* to land at Cape Haitien to guard the U.S. consulate there.

February 24

AVIATION: A staff meeting at the Signal Corps Aviation School, San Diego, California, concludes that pusher-type aircraft should be condemned as too dangerous to fly. All are to be replaced with safer, tractor-type machines, such as the Curtiss Model J.

February 25

MARINES: In Washington, D.C., Colonel George Barnett becomes commandant of the Marine Corps to succeed retiring commandant William P. Biddle, a veteran of 39 years. Barnett is also the first Annapolis graduate to hold this key post.

March 9

AVIATION: In Washington, D.C., the wind tunnel constructed at the Washington Navy Yard commences a series of calibration tests that last over the next three months.

March 12

NAVAL: The new battleship *Texas* is placed in commission; a veteran of World War II fighting, it still resides at San Jacinto, Texas, as a war memorial.

March 23

MILITARY: A fire sweeps through horse stables at the Cavalry School, Fort Riley, Kansas, killing 29 animals.

March 27

AVIATION: A new series of official aircraft designations are adopted by the Navy Department, with four classes denoted as A for heavier than air, D for dirigible or airships, B for balloons, and K for kites. Second letters L, H, B, X, N, and C represent land machines, hydroaeroplanes, flying boats, amphibians, and convertibles, respectively.

April 2

MILITARY: In Washington, D.C., General William W. Wotherspoon is chosen to serve as the new army chief of staff.

April 9

NAVAL: President Woodrow Wilson refuses to recognize the violent regime of General Victoriano Huerta in Mexico, which was never elected to power. Consequently, when a boatload of American sailors from the *Dolphin* under Assistant Paymaster Charles W. Copp goes ashore at Tampico to purchase supplies, they are arrested by Mexican authorities and briefly detained. The local commander, General Ignacio Morelos Zaragoza, orders the captives released and apologizes to the U.S. consul there. However, an angry admiral Henry T. Mayo, commanding the Atlantic Fleet's Fourth Division and without authorization, demands a 21-gun salute to the American flag by his Mexican hosts and tensions between the two nations increase. President Wilson has just been handed a convenient pretext for directly intervening in Mexico's civil war on behalf of the Constitutionalists.

April 11–14

DIPLOMACY: Mexican president Victoriano Huerta apologizes to President Woodrow Wilson for the arrest of American sailors at Tampico, but he refuses to hoist the American flag and fire a salute. Huerta subsequently agrees to fire a salute, provided that the Americans return it, round for round.

April 14

NAVAL: President Woodrow Wilson, feeling obliged to support Admiral Henry T. Mayo, orders the Atlantic Fleet into Tampico Bay. He also give the Mexican government until April 18 to fire an official salute to the American flag as penance.

April 16

MARINES: In light of present difficulties with Mexico, the 4th Marine Regiment begins assembling along the West Coast prior to embarking upon ships of the Pacific Fleet.

April 18

NAVAL: At Veracruz, Mexico, U.S. consul William W. Canada notifies the State Department that the German transport *Ypiranga* is due to land shortly and carries a huge cache of weapons and ammunition for the Huerta regime. President Woodrow Wilson is determined that the arms should not reach the Mexican regime.

April 20

AVIATION: The cruiser *Birmingham* carries an aviation detachment from Pensacola, Florida, for service in the Mexican crisis off Tampico. It consists of three pilots, 12 enlisted men, and three aircraft, under the command of Lieutenant John H. Towers.

- The secretary of the navy is alerted by A. B. Lambert of St. Louis, Missouri, that the Aviation Reserve he organized from civilians can provide the navy with 44 pilots, of which no less than 20 own their own aircraft.

NAVAL: In a major escalation, the Navy Department alerts Admiral Frank F. Fletcher, commanding the First Division of the Atlantic Fleet off Veracruz, Mexico, that the German transport *Ypiranga* must not be allowed to discharge its cargo of guns and ammunition.

April 21–22

AVIATION: The battleship *Mississippi* conveys a second aviation detachment from Pensacola, Florida, for use off Veracruz, Mexico. They are commanded by Lieutenant Patrick N. L. Bellinger.

NAVAL: A navy force lands 800 marines and sailors under Admiral Frank F. Fletcher at Veracruz, Mexico, seizing control of all customs facilities and cutting off the regime of General Victoriano Huerta from German arms shipments. Street fighting from the roofs costs the Americans 17 dead and 63 wounded to a Mexican tally of 126 killed and 195 injured. No less than 55 Medals of Honor will be awarded, the highest ever granted in a single action. The German transport *Ypiranga*, meanwhile, enters Veracruz Harbor, although it makes no attempt to unload its cargo. International pressure consequently begins building on Huerta to resign from power and leave the country.

MARINES: The 2nd Marine Regiment goes ashore at Veracruz, Mexico, from the auxiliary cruiser *Prairie* and is in the thick of street fighting against Mexican soldiers.

April 22

AVIATION: The Bureau of Navigation authorizes formal flight instruction and mechanical repair courses at the Flying School, Pensacola, Florida.

April 23

MARINES: Once the 1st Marine Regiment debarks from the transport *Hancock*, Colonel John A. Lejeune assumes command of two regiments of marines at Veracruz, Mexico, and forms them into a brigade.

April 24

AVIATION: The cruiser *Birmingham* and the battleship *Mississippi* arrive off Veracruz, Mexico, having onboard the 1st and 2nd Aero Sections under Lieutenant John H. Towers and Patrick N. L. Bellinger.

MARINES: No sooner does President Woodrow Wilson accept mediation from Argentina, Brazil, and Chile for the dispute with Mexico than he instructs marine and naval units at Veracruz not to conduct offensive operations.

April 25

AVIATION: In the Gulf of Mexico, Lieutenant Patrick N. L. Bellinger pilots his Curtis AB-3 flying boat off the battleship *Mississippi* and flies over the occupied city of Veracruz to scout for mines in the harbor. This is the first American aircraft to operate in a live combat zone.

MILITARY: In light of heightened tensions along the Mexican border, officers enrolled in cavalry and artillery courses at Fort Riley, Kansas, are hurriedly graduated and sent back to their parent unit.

April 28

AVIATION: Lieutenant Patrick N. L. Bellinger and Ensign Walter D. LaMont make a reconnaissance flight over Veracruz, Mexico, and photograph harbor installations.

MILITARY: President Woodrow Wilson orders army troops to cross the Mexican border and restore order in Tampico, Mexico, where American sailors have been seized and harassed.

April 29

MARINES: The three marine regiments deployed as a brigade at Veracruz, Mexico, fall under army occupation authorities.

April 30

MILITARY: Brigadier General Frederick Funston arrives at Veracruz, Mexico, with an infantry brigade and begins relieving marine and naval forces there.

May 2

AVIATION: After marines are encamped near Tejar, Mexico, and are fired upon, an AH-3 hydroaeroplane flown by Lieutenant Patrick N. L. Bellinger and Ensign W. D. LaMont flies the first recorded ground support mission by buzzing overhead to spot the attackers.

MILITARY: Brigadier General Frederick Funston is appointed commander of all American forces presently occupying Veracruz, Mexico. His force consists of 3,607 soldiers and 3,446 marines.

May 5–6

MILITARY: Captain Douglas MacArthur leads a daring, nighttime reconnaissance through the lines outside Veracruz, Mexico, and returns with three captured locomotives.

May 6

AVIATION: Over Veracruz, Mexico, a reconnaissance flight by Lieutenant Patrick N. L. Bellinger and his Curtis AH-3 hydroaeroplane takes antiaircraft fire, which wounds his observer, Lieutenant Richard C. Saufley—America's first aerial casualty.

May 19

AVIATION: In light of diminishing needs for reconnaissance over Veracruz, Mexico, the aviation detachment resumes training missions while awaiting a recall order to Pensacola, Florida.

May 24

AVIATION: The cruiser *Birmingham* arrives outside Veracruz, Mexico, carrying with it the second small aviation detachment from Pensacola, Florida, where they resume training activities.

May 26

AVIATION: Lieutenant Holden C. Richardson, after observing flight tests, recommends that the navy purchase two Burgess-Dune hydroaeroplanes for expanded evaluation; these enter the service as the AH-7 and AH-10.

June 24

AVIATION: At San Diego, California, the Signal Corps Aviation School accepts delivery of its first Curtiss J, a precursor of the famous JN-2 "Jenny."

June 28

DIPLOMACY: The assassination of Austrian archduke Franz Ferdinand and his wife by a Serbian nationalist sets in motion a series of diplomatic crises that triggers the onset of World War I. This is the bloodiest conflict in human history up to that point, during which 65 million men are called to the colors across Europe, Africa, and Asia Minor. The United States, however, remains cautiously neutral.

July 1

AVIATION: In Washington, D.C., the Office of Naval Aeronautics gains official recognition and becomes a recognized branch within the Division of Operations under the secretary of the navy. The office is created to facilitate the future development of aerial operations within that branch and Captain Mark L. Bristol gains appointment as the first "director of aeronautics" in the fall.

NAVAL: Secretary of the Navy Josephus Daniels orders wine rations to be eliminated from flag and wardroom messes of all U.S. Navy vessels, which have remained dry ever since.

July 7–14

AVIATION: Dr. Robert H. Goddard receives a government patent for his multistage rocket concept. He shortly afterward receives another covering his liquid-fuel rocket design.

MARINES: The 4th Marine Regiment, having sailed for several weeks off Mexico's western coast, returns to its training camp at San Diego, California.

July 11

NAVAL: The new battleship *Nevada*, the first naval vessel to utilize fuel oil for propulsion, slides off the ways at Quincy, Massachusetts. The battleship is an enhanced design capable of bringing more fire power—10 14-inch guns—to bear on targets than previous ships of its class.

July 18

AVIATION: The new Aviation Section replaces the former Aeronautical Division within the Army Signal Corps; it has an assigned strength of six aircraft,

67 officers, and 260 enlisted personnel under Lieutenant Colonel Samuel Reber. It is tasked with supervising all aeronautical activities conducted by the army, including balloons, airplanes, and the signaling apparatuses they employ. Moreover, all pilot candidates are to be unmarried lieutenants under 30 years of age.

July 28

AVIATION: At the Indian Head Proving Grounds, Stumpneck, Maryland, early bombing tests are carried out by Lieutenant Victor D. Herbster and Ensign Bernard L. Smith. The two drop both dummy and live bombs over the side of their craft at an altitude of 1,000 feet and monitor the results.

DIPLOMACY: World War I breaks out in Europe after Austria declares war on Serbia.

August 1

MILITARY: Kaiser Wilhelm II, unable to prevent Russia from mobilizing its vast army, declares war on Russia and also orders part of his army to move through neutral Belgium toward France. Within two days, the French and British also declare war on Germany.

August 3

MILITARY: U.S. Army engineer Colonel George W. Goethals completes construction work on the Panama Canal six months ahead of schedule, a monumental task facilitated by the elimination of malaria and yellow fever from the region by Colonel William C. Gorgas.

August 5

DIPLOMACY: The recent Bryan-Chamorro Treaty between the United States and Nicaragua enables the former to assume control of the latter's financial institutions, while also allowing the construction of naval bases on either coast with a 99-year lease.

August 6

MILITARY: Denis Patrick Dowd, Jr., sails to France and joins the French foreign legion, in effect, becoming the first American to fight in World War I. He later flies in the Lafayette Escadrille and dies in a plane crash in 1916.

NAVAL: The cruiser *Tennessee* is loaded with \$5.8 million in gold bullion and sent to Europe to assist Americans stranded there by the outbreak of war.

August 10–September 6

MILITARY: The army establishes an experimental military training camp at Plattsburgh, New York, to provide for a reserve of trained leaders in wartime. The initial cadre is drawn exclusively from businessmen.

August 15

NAVAL: The Panama Canal, an engineering marvel, is officially opened. It proves itself a highly significant strategic asset that shortens the transit of warships between the Atlantic and Pacific Oceans.

MARINES: A landing detachment from the *Hancock* goes ashore at Port-au-Prince, Haiti, to protect American lives and property during a period of political unrest.

August 19

DIPLOMACY: In Washington, D.C., President Woodrow Wilson sends the Senate a message insisting that the United States remain neutral “in fact as well as name.” He advocates this policy despite the fact that Wilson, a committed Anglophile, desires the Allied powers to win.

August 21

AVIATION: In a significant precedent, three naval officers are dispatched to Paris, France, for a two-day inspection of aircraft factories and nearby aerodromes. This is the first time naval aviators have been sent abroad as foreign observers, and, by year’s end, officers are dispatched to London, Great Britain, and Berlin, Germany.

October

MILITARY: In light of escalating combat along the Mexican border, and the threat that it may spill over, elements of the 9th and 10th Cavalries are dispatched to Naco on the Arizona border. The town is besieged by revolutionaries under Francisco “Pancho” Villa, whose wild firing kills one American soldier and injures 18.

October 10–12

NAVAL: The collier *Jupiter* becomes the first navy vessel to transit through the Panama Canal, while en route to Philadelphia from the West Coast.

November 2

NAVAL: Great Britain, responding to increasingly effective attacks by German U-boats, issues the Declaration of London, which renders the North Sea a military area. Henceforth, all neutral shipping plying its sea lanes do so at the risk of search and seizure. The British, while willing to confiscate cargoes, always offers compensation for goods removed, thereby lessening the sting. Secretary of State William Jennings Bryan initially protests such interference but Britain is determined to deny Germany any chance of securing valuable military supplies and raw materials by sea.

November 16

AVIATION: Administrative affairs at Pensacola, Florida, are shifted from the command vessel offshore to land facilities, which now receive the official designation of Naval Aeronautical Station, Pensacola.

November 19

AVIATION: An airplane belonging to the U.S. Air Service completes a 429-mile cross-country flight from Fort Sill, Oklahoma, to Fort Sam Houston, Texas.

November 23

AVIATION: In Washington, D.C., Captain Mark L. Bristol gains formal appointment as the new “director of naval aeronautics,” and he is ordered to report to the secretary of the navy.

MILITARY: With General Victoriano Huerta gone from power, the United States disengages itself from military commitments in Mexico by withdrawing the expeditionary force of Brigadier General Frederick Funston from Veracruz. However, President Woodrow Wilson instructs Funston to depart neutrally and not hand over power to any particular faction in the city.

Mahan, Alfred T. (1840–1914)

Naval officer, theorist

Alfred Thayer Mahan was born in West Point, New York, on September 27, 1840, the son of an instructor at the U.S. Military Academy. He attended Columbia University for two years before transferring to the U.S. Naval Academy, Annapolis, Maryland, from which he graduated second in his class in 1859. Over the next four decades he served conscientiously in a variety of naval capacities, both on sea and ashore. When the Civil War broke out in 1861 he was assigned to the blockading squadron of Admiral John A. D. Dahlgren, was retained in the peacetime establishment after 1865, and, in 1883, he published his first book, *The Gulf and Inland Waters*, as part of the official Civil War history. Mahan rose to captain in 1885, by which time he enjoyed a reputation for sterling scholarship, so the following year he was invited to deliver a series of lectures to students at the U.S. Naval War College at Newport, Rhode Island. His

ideas were well received and in 1889 he became that institution's second president. These activities spurred him to research the strategic nuances of naval power, and, in 1890, he published his seminal text, *The Influence of Sea Power upon History, 1660–1783*. In this book, Mahan held that all great nations and empires must possess adequate naval forces to ensure their safety and continuing viability. Coming as it did on the eve of the Spanish-American War and the acquisition of overseas territory, his thesis was widely embraced and helped justify new naval construction programs. Moreover, Mahan's treatise was also an immediate best-seller overseas, was translated into several languages, and became standard reading for a generation of British, German, and Japanese naval officers. It also cemented his reputation as America's leading naval theorist and, widely endorsed by politicians such as Theodore Roosevelt, it

December 1

NAVAL: In Washington, D.C., the noted naval theorist and rear admiral Alfred Thayer Mahan, dies at the age of 74. His writings did much to invigorate naval construction programs around the world.

December 11

AVIATION: Lieutenants Herbert A. Dargue and Joseph O. Mauborgne of the U.S. Army successfully demonstrate two-way radio communication with ground stations while flying over Fort William McKinley, Philippines.

December 17

NAVAL: Secretary of State William Jennings Bryan dispatches the gunboat *Machias* to Port-au-Prince, Haiti. Once there the vessel lands 50 marines ashore, who seize the \$500,000 gold reserve of the national bank and convey it back to New York for safe-keeping. This is done to prevent revolutionaries from looting the national treasury.

provided political impetus for continuing naval rearmament.

In 1892 Mahan followed up his initial success by writing *The Influence of Sea Power upon the French Revolution and Empire*, also regarded as a classic examination of naval strategy. That year he again served as president of the War College, and, in 1893, he captained the cruiser USS *Chicago* in a goodwill tour of European waters. He was feted by the British government and received honorary degrees from both Cambridge and Oxford. Mahan retired from active duty in 1896, but he lent his expertise to a naval strategy board throughout the Spanish-American War. Afterward, he served on the U.S. delegation to the peace conference at The Hague in 1899, and, in 1902, he crowned his success in being elected president of the American Historical Association in Washington, D.C. Mahan died there on December 1, 1914, among the most influential military writers in history. His various publications and the strategic

Alfred Thayer Mahan (Library of Congress)

vision he articulated laid the foundations for strategy that dominated naval affairs throughout most of the 20th century.

December 24

AVIATION: The first German air raid on England serves as a wake up call for army officials, and they closely study its military implications.

December 25

AVIATION: In light of potentially stormy conditions as Pensacola, Florida, the director of naval aeronautics, Captain Mark L. Bristol authorizes installment of meteorological equipment to measure wind gusts and squalls.

1915

January

MARINES: The Marine Corps acquires its first field artillery school at Annapolis, Maryland.

January 1

MILITARY: The long-heralded Panama Canal opens for business following eight grueling years of construction by the U.S. Corps of Engineers.

January 7

MILITARY: At Naco, Mexico, Major General Hugh Scott enters into negotiations with Mexican guerrilla leader Francisco “Pancho” Villa in an attempt to end fighting along the U.S.-Mexico border.

January 9

AVIATION: The Navy Flying School, Pensacola, Florida, establishes the Marine Section to train marine aviators.

January 15

AVIATION: Army Lieutenants J. C. Carberry and Arthur C. Christie set a two-man altitude record by reaching 11,690 feet in a Curtiss 100 biplane.

- At San Diego, California, Army Lieutenant B. Q. Jones sets a one-man endurance record by flying for eight hours, 53 minutes in a Martin biplane.

January 21

AVIATION: In Washington, D.C., the first seven navy pilot “Certificates” are issued by the Bureau of Navigation.

NAVAL: The cruiser *San Diego* experiences a boiler explosion and Fireman Second Class Telesforo Trinidad wins the Medal of Honor for saving his shipmates.

January 23

NAVAL: The cruiser *Washington* under Captain Edward L. Beach arrives off Cap-Haitien, Haiti, where meetings are scheduled with the rebel leader, General Sam. The Americans insist on accompanying the insurgents south to monitor their activities and prevent excesses.

January 28

NAVAL: The American cargo ship *William P. Frye* is torpedoed without warning by the German auxiliary cruiser *Prinz Eitel Friedrich* in the South Atlantic. This is the first American merchant vessel sunk in World War I.

January 30

NAVAL: In light of the need to enhance coastal security, Congress creates the new U.S. Coast Guard by combining the Revenue Cutter Service and the Life Saving Service. The new force is placed under the Treasury Department in time of peace and tasked with the suppression of contraband shipping and patrolling nearby sea lanes. However, in wartime, the Coast Guard operates under the authority of the Navy Department.

February 1

AVIATION: The Bureau of Navigation’s Division of Naval Militia Affairs authorizes creation of aeronautic corps within each state naval militia.

February 4

NAVAL: Germany counters the British blockade by establishing a war zone around the British Isles, one which is forbidden for neutral vessels to enter. Henceforth, German submarines, or U-boats, will sink any neutral shipping without stopping to rescue passengers or other personnel. The kaiser insists upon such measures

because Great Britain refuses to implement naval rules espoused by the London Declaration—to which Britain and Germany are signatories.

February 10

DIPLOMACY: In Washington, D.C., President Woodrow Wilson remonstrates angrily to the German government that it will be held strictly accountable for any property damage or lost lives.

February 16

MARINES: Visitors to the Panama-Pacific Exposition at San Francisco, California, witness a military camp established by the 1st Battalion, 4th Marine Regiment.

March 1

MILITARY: Captain George Van Horn Moseley of the Army General Staff's War College Division submits a plan for universal military training to the Senate's Military Committee. Lively debate ensues, but no action.

March 3

AVIATION: In Washington, D.C., Brigadier General George P. Scriven becomes chairman of the National Advisory Committee on Aeronautics (NACA), the first government organization dedicated to advancing the state of aviation research and technology. It is created by Congress in light of the growing military significance of aviation.

- The Naval Act of 1915 increases personnel limits assigned to naval aviation units to 48 officers and 96 men while the Marine Corps is restricted to 12 officers and 24 men. However, enlisted men and student pilots become eligible for increased pay and benefits as qualified aviators.

NAVAL: Congress approves the Naval Act of 1915, which stipulates creation of a naval reserve and a new post, the chief of naval operations. This position is designed to give senior naval officers more control over administration of the service. Long advocated by naval reformers, it had been fiercely resisted by Secretary of the Navy Josephus Daniels, who viewed it as a threat to civilian authority. The Naval Act of 1915 also establishes the U.S. Navy Reserve Force.

March 8

NAVAL: The *Baltimore*, the world's first dedicated mine-laying ship, is commissioned following its conversion from a cruiser.

March 22

AVIATION: The designation "Navy Air Pilot" is formally replaced by "Naval Aviator," signifying those naval officers qualified by flying credentials.

March 23

NAVAL: A German U-boat torpedoes and sinks the British passenger liner *Falaba* in the St. George's Channel; 50 lives are lost, including Leon C. Thrasher, the first American to die as a result of military action.

March 25

NAVAL: Off Honolulu, Hawaii, the submarine *F-4* sinks with the loss of all 21 crew members.

April 13

AVIATION: Lieutenants Thomas D. Milling and B. Q. Jones are detached from the 1st Aero Squadron and ordered to report for duty along the Mexican border with a single airplane. They are there to scout and find the location of Mexican bandit leader Francisco “Pancho” Villa.

April 16

AVIATION: At Pensacola, Florida, an AB-2 flying boat flown by Lieutenant Patrick N. L. Bellinger is successfully catapulted from a barge.

April 17

NAVAL: During salvage operations to raise the submarine *F-4* off Honolulu, Hawaii, diver William F. Loughman’s air hose becomes ensnared. Chief Gunner’s Mate Frank W. Crilley dons a diving suit and rescues him, winning the Medal of Honor.

April 20

AVIATION: A single plane piloted by Lieutenants Thomas D. Milling and B. Q. Jones of the 1st Aero Squadron fly the army’s first combat reconnaissance mission along the Mexican border.

April 23

AVIATION: Over Pensacola, Florida, Lieutenant Patrick N. L. Bellinger works his Burgess-Dunne AH-10 up to an altitude of 10,000 feet, establishing a new American record for seaplanes.

May 1

NAVAL: A German U-boat sinks the American tanker *Gulflight* off the Scilly Isles southwest of England, killing three sailors, although the German government promises to make speedy reparations. However, badly outnumbered by the Royal Navy on the surface, undersea warfare is Germany’s only method of challenging British maritime supremacy. On this same day, German ambassador Count von Bernstorff reiterates a warning in New York newspapers for neutral civilians not to travel on vessels of the belligerent powers.

May 7

NAVAL: The huge Cunard liner *Lusitania* sinks in 18 minutes after being torpedoed off Old Head of Kinsale off the Irish coast by German submarine *U-20*, losing 1,198 of its 1,924 passengers—with 128 Americans (including 63 children) among the dead. Despite the fact the vessel was illegally carrying munitions in its hold, this single act dramatically shifts American public opinion against Germany. U.S. neutrality is again being compromised by events at sea—as it had prior to the War of 1812, but President Woodrow Wilson clings steadfastly to noninvolvement.

May 8

AVIATION: At Pensacola, Florida, the crash of an AH-9 hydroaeroplane takes the life of Lieutenant Melvin L. Stolz.

May 11

NAVAL: In Washington, D.C., Admiral William S. Benson, an officer who was never closely identified with the currents of naval reform, gains appointment as the first chief of naval operations (CNO).

May 13

DIPLOMACY: The American government demands that Germany apologize for the sinking of the *Lusitania* and also pay reparations to the families of Americans who were killed.

May 20

AVIATION: The Army Aviation Service selects the Curtiss JN-2 as the first mass-produced aircraft in the United States. Tough, reliable, and easy to fly, it becomes affectionately known to thousands of trainees as the “Jenny.”

May 28

AVIATION: The Flying School at Pensacola, Florida, informs the naval militia that refresher flights are available to a limited number of aviators.

June 1

AVIATION: The navy signs a contract with the Connecticut Aircraft Company, New Haven, to acquire its first lighter-than-air vehicle, the dirigible DN-1.

June 2

MARINES: In Washington, D.C., the General Board of the navy appoints Marine Corps commandant George Barnett an ex-officio member.

June 17

MARINES: Off Mexico, several companies attached to the 4th Marines go ashore from the battleship *Colorado*.

July 1

NAVAL: Continuing unrest in Haiti prompts deployment of the cruiser *Washington* off Cap-Haïtien to secure American lives and property. Admiral William B. Caperton also comes ashore to help establish direct radio communication between his vessel and the American consulate. Rebels in and around the city are warned not to commence fighting between themselves or the Americans.

July 7

AVIATION: In Washington, D.C., Secretary of the Navy Josephus Daniels begins soliciting greater cooperation with the civilian sector in order to mobilize the latest science and technology for the naval service. Ultimately, his efforts lead to the founding of the Naval Consulting Board to assist the war effort during World War I.

July 9

MARINES: A detachment is sent ashore at Cap-Haïtien, Haiti, by the cruiser *Washington* to protect a radio station and American lives and property.

July 10

AVIATION: The increasing emphasis on scientific testing manifests in the new Aeronautical Engine Laboratory, Washington Navy Yard, D.C., which is authorized to check out all aviation machinery associated with flying.

- At Pensacola, Florida, flight tests involving sextants employing a pendulum-type artificial horizon are deemed unworkable in aircraft; it is suggested that sextants equipped with a gyroscopically stabilized artificial horizon might yield better results.

- The Navy Department issues a general order imposing organizational unity on the Naval Militia's aeronautical force. Henceforth, these are to consist of not more than six officers and 28 enlisted men, with two sections forming a division. The highest rank allowed to a commanding officer is lieutenant commander.

July 16

NAVAL: The battleships *Missouri*, *Ohio*, and *Wisconsin* are the first warships to wend their way through the Panama Canal, confirming its utility as a strategic asset.

July 21

POLITICS: Fearing the worst, President Woodrow Wilson instructs Secretary of War Lindley M. Garrison and Secretary of the Navy Josephus Daniels to draw up plans for increased defense expenditures to be submitted to Congress in the fall.

July 22

AVIATION: Upon urging from the Flying School, Pensacola, Florida, the director of naval aeronautics releases new requirements for standardized equipment to be fitted to all naval aircraft: air speed meter, incidence indicator, tachometer, skidding and sideslip indicator, altitude barometer, oil gauge, fuel gauge, compass, course and distance indicator, magazine camera, binoculars, clock, and sextant.

July 25

NAVAL: The American vessel *Leelanaw* is sunk by German U-boats off the coast of Scotland, along with its shipment of flax.

July 27

MILITARY: Fighting between rival groups commences in Port-au-Prince, Haiti, which prompts General Oscar Étienne to execute 167 political prisoners held in the National Penitentiary. News of the massacre results in open street fighting throughout the city. Several rebel leaders are hacked to death in the streets.

July 28

MARINES: Admiral William B. Caperton orders a large detachment of sailors and marines from the cruiser *Washington* deployed to Port-au-Prince, Haiti, following the assassination of President Vilbrun G. Sam, to protect American lives and property. The gunboat *Eagle* also lands a detachment of 20 marines at Cap-Haïtien to protect the French embassy there. An American-backed protectorate ensues for the next 19 years until stability can be restored. However, Haitian insurgents (Cacos) attack this particular detachment once ashore, losing six members; two Americans die, including the nephew of American labor leader Samuel Gompers.

July 29

AVIATION: The 1st Aero Squadron is transferred from Augusta, Georgia, to new facilities at Fort Sill, Oklahoma, under Captain Benjamin D. Foulois. Once established, a crew and aircraft are flown to Brownsville, Texas, in support of the army's border patrol efforts.

August 1

MARINES: Landing parties from the collier *Jason* and gunboat *Nashville* go ashore at both Port-au-Prince and Cap-Haïtien, Haiti, to reinforce troops and sailors already there and help restore order.

August 4

MARINES: The battleship *Connecticut* drops anchor off Port-au-Prince, Haiti, and sends five companies of the Second Marine Regiment under Colonel E. K. Cole to seize the local arsenal and disband warring factions.

August 5

AVIATION: At Fortress Monroe, Virginia, a Burgess-Dunne AH-10 flown by Lieutenant Patrick N. L. Bellinger spots mortar fire for army batteries using a flare pistol.

August 10

MILITARY: A series of volunteer camps is established at Plattsburgh, New York, under the aegis of Major General Leonard Wood for the purpose of exposing civilians to the rigors of military discipline. In this manner, a valuable trained cadre of men is made available without resorting to a military draft, which President Woodrow Wilson deems imprudent at this time.

- At El Paso, Texas, General Hugh Scott again confers with Mexican rebel leader Francisco “Pancho” Villa, convincing him to stop extorting money from American mining companies in Mexico and to return all the personal property he has pilfered.

August 11

AVIATION: In Rochester, New York, the Eastman Kodak Company is approached by the Naval Observatory to develop aerial cameras with high-speed lens capable of reconnaissance photography at altitudes of 1,000–2,000 feet.

August 12

NAVAL: Elections arranged by Admiral William B. Caperton make Sudre Dartiguenave, a favored candidate, Haiti’s seventh president in as many years. Caperton also imposes a military government at Cap-Haïtien to prevent the formation of a rival administration under Dr. Rosalvo BoBo.

August 13

NAVAL: The outbreak of rebellion is stifled at Port-de-Paix, Haiti, by the arrival of the armored cruiser *Tennessee*, which is conveying 850 marines of the 1st Marine Regiment under Colonel Littleton T. Waller.

August 15

MARINES: Continuing instability in Haiti results in the deployment of 850 marines of the 1st Marine Regiment under Colonel Littleton W. T. Waller from the armored cruiser *Tennessee*. Rather than confront the Americans head-on, the Caco rebels begin filtering toward the interior of the island to wage an incessant guerrilla campaign. Meanwhile, Waller begins organizing the 1st Marine Brigade, which numbers 2,209 men in a few days.

- The 5th Regiment of Marines is culled from Guantánamo, Cuba, and dispatched to Puerto Plata, Dominican Republic, under Colonel Charles A. Doyen. They are sent to protect American lives and property during a period of revolutionary unrest.

August 16–17

MILITARY: Men of the 27th Infantry are rushed into Texas City, Texas, when that town is suddenly inundated by floodwaters brought on by a sudden storm.

August 17

AVIATION: Secretary of the Navy Josephus Daniels requests that the secretary of war provide land aircraft pilot training to navy and marine aviators.

August 19

NAVAL: German U-boats sink the British liner *Arabic* off Ireland with the loss of two American lives, despite new regulations requiring them to surface and warn the vessels in advance.

August 30

MARINES: In Haiti, the strength of the brigade deployed rises to 88 officers and 1,941 men following the arrival of a marine artillery battery.

September 1

NAVAL: Following the sinking of the British liner *Arabic*, which cost two American lives, the German government pledges to President Woodrow Wilson to stop attacking unarmed passenger vessels without warning them in advance.

September 9

NAVAL: After an explosion aboard the destroyer *Decatur*, Chief Watertender Eugene P. Smith wins the Medal of Honor for rescuing several injured sailors.

September 16

DIPLOMACY: The United States and Haiti conclude an agreement whereby a native constabulary will be established and supervised by marine personnel on the island.

September 18

MARINES: The Haiti insurrection commences as a band of 75 Caco rebels fire upon a marine patrol as it departs Gonaïves.

September 20

NAVAL: In Annapolis, Maryland, Captain Edward W. Eberle gains appointment as the 24th superintendent of the U.S. Naval Academy.

MARINES: A detachment of the 1st Marine Regiment under Major Smedley D. Butler pushes inland from Cap-Haïtien, Haiti, toward Haut-du-Cap, fighting off Caco ambushes as they proceed. By day's end they account for 60 rebels killed, while sustaining two dead and eight wounded.

September 27–28

MARINES: The Caco rebel strongpoints at Quartier Morin and Haut-du-Cap, Haiti, are captured by a column of five marine companies under Colonel Eli K. Cole. American losses are two dead and eight wounded to a rebel loss of 60 casualties.

October 4

MARINES: Colonel Littleton T. Waller embarks at Cap-Haïtien onboard the armored cruiser *Nashville*, lands at Fort Liberté, and seizes it without opposition.

October 12

AVIATION: In Washington, D.C., the Office of the Director of Naval Aeronautics is abolished by the Navy Department and its responsibilities are assumed by the new chief of naval operations.

October 15

AVIATION: The secretary of the navy approaches the General Board with a proposal, first penned by Captain Mark L. Bristol, that a merchant ship be rigged and equipped to operate aircraft. However, the secretary urges the board to determine what to do with the battleship *North Carolina*, which has been outfitted with a catapult for launching aircraft at sea.

October 19

NAVAL: The navy founds a submarine station at New London, Connecticut.

October 20

MARINES: The settlement of Bahun, Haiti, is occupied by four squads of marines who have walked from Cap-Haitien.

October 24

MARINES: A 40-man detachment under Major Smedley D. Butler successfully fights off a nighttime ambush by Cacos at Grosse Roche, Haiti. During this action, Sergeant Dan Daly wins his second Medal of Honor for retrieving a machine gun that had been packed on a horse, which had been killed while under fire.

October 25

MARINES: The U.S. Marines recruit training depot moves once again from Norfolk, Virginia, back to the former naval station at Port Royal, South Carolina.

- A detachment under Major Smedley D. Butler counterattacks the following dawn, routing his opponents and destroying another Caco position at Fort Dipitie, Haiti.

October 27

AVIATION: Oscar A. Brindley establishes a new seaplane record by flying 544 miles nonstop along the California coast in only 10 hours.

October 28

MARINES: The former naval station at Port Royal, South Carolina, is renamed Parris Island and converted into a U.S. Marine recruit training depot.

November 1

AVIATION: In Mineola, New York, the 1st Aero Company, New York National Guard, is organized under Captain Raynal C. Bolling. It is the first official National Guard aviation unit and consists of four officers, 40 enlisted men, and seven aircraft loaned by the New York City Aero Club.

November 2

MARINES: Caco rebels raid marine headquarters at Le Trou, Haiti, and are bloodily repelled by Colonel Littleton W. T. Waller with a loss of 38 lives.

November 4

POLITICS: President Woodrow Wilson, acting against the advice of William Jennings Bryan and other officials, formally endorses the concept of civilian military training camps as a precursor to an all-out draft.

November 5

AVIATION: Off Pensacola, Florida, a AB-2 flying boat piloted by Lieutenant Commander Henry C. Mustin is successfully catapulted off the stern of the battleship *North Carolina*.

Butler, Smedley D. (1881–1940)

Marine Corps general

Smedley Darlington Butler was born in West Chester, Pennsylvania, on July 30, 1881, the descendant of a noted Quaker family. When the Spanish-American War erupted in 1898, he lied about his age and joined the U.S. Marine Corps as a second lieutenant. After capable service in China and the Philippines, he volunteered for duty in China, then in the throes of the violent Boxer Rebellion. In July 1900, Butler distinguished himself in the defense of Tientsin, being wounded twice and receiving a brevet promotion to captain. He came home in 1902 and over the next 15 years served in various American interventions throughout the Caribbean region. In January 1914, rising tensions with Mexico induced him to pose as a railroad official and conduct an intelligence-gathering mission deep inside Mexico City. He rejoined his company in time for the American attack on Veracruz the following April, and he calmly walked down the streets under sniper fire,

armed only with a swagger stick. For this conspicuous display of bravery he received a Medal of Honor. The following year Butler ventured to Haiti in order to help suppress a rebellion by the Caco bandits. That November he led a small expedition against a rebel stronghold at Fort Rivière and entered the fort with two other Marines through a drainage ditch, completely upending the defenders. For this action he won a second Medal of Honor and promotion to lieutenant colonel.

Following American entry into World War I in 1917, Butler pressed superiors hard for a combat command and received the 13th Marine Regiment. However, upon arriving in France, he was ordered by General John J. Pershing to transform Camp Ponatzen, near Brest, into a functioning port of entry. The 37-year-old Butler complied and was rewarded with temporary promotion to brigadier general, the youngest in Marine

MARINES: A column drawn from the 1st Marine Regiment under Major Smedley D. Butler prepares to storm the main Caco stronghold at Fort Capois, Haiti, but the garrison hurriedly evacuates beforehand.

November 6

AVIATION: In Pensacola Bay, Florida, the cruiser *North Carolina* successfully launches Lieutenant Henry C. Mustin and his AB-2 flying boat from a catapult. Significantly, this is the first shipboard launching of an aircraft from a vessel then underway. Announcement of the feat is made by Assistant Secretary of the Navy Franklin D. Roosevelt.

November 7

NAVAL: An Austrian submarine torpedoes the Italian liner *Ancona*, carrying 27 American passengers.

November 8

MARINES: A column of the 1st Marine Regiment under Major Smedley D. Butler captures the Caco posts of Fort Seldon and Fort Berthol.

Corps history. He rose to full brigadier general in March 1921 while helping to convert Quantico, Virginia, from a wartime encampment into a permanent marine facility. Three years later he commenced an unusual, two-year leave of absence by becoming public safety director for the city of Philadelphia. In this position, Butler shook corruption out of the police force, enforced prohibition in a town known for heavy drinking, and dealt organized crime a severe blow. However, his heavy-handed, no-nonsense approach to law enforcement alienated the political establishment, and, in 1926, he was dismissed and rejoined the Marine Corps at San Diego, California. From there Butler went to Shanghai, China, on a mission to protect foreign dignitaries, and he helped defuse a very delicate situation through tact and diplomacy. In July 1929 Butler advanced to major general, but he was passed over as commandant for his outspoken criticism of U.S. foreign policy. He resigned from the marines and developed a close association

Smedley D. Butler (Library of Congress)

with left-wing interest groups. Butler died in Philadelphia on June 21, 1940, a colorful, if blunt-speaking, U.S. Marine.

November 9

MILITARY: In view of the conflict in Europe, Secretary of War Lindley M. Garrison proposes a new concept he calls the "Continental Army," which consists of 400,000 volunteers intended to replace the National Guard as a ready reserve. It becomes a source of controversy in Congress and is never adopted.

MARINES: The 4th Marine Regiment under Colonel Joseph Pendleton is deployed off the coast of Mexico.

November 11

NAVAL: Rear Admiral William B. Caperton persuades the shaky Haitian government to accept a peace treaty whereby American officials will administer local customs houses and collect revenues to reduce public debt.

MARINES: In Haiti, security is preserved by a new constabulary, the Gendarmerie d'Haiti, which is to be trained and administered by Marine Corps personnel.

November 17

MARINES: Major Smedley D. Butler leads a mixed force of three companies of marines and sailors from the battleship *Connecticut* in a successful assault upon

Haitian rebels holed up at Fort Rivière, Haiti; over 50 Cacos are slain in combat. Butler wins his second Medal of Honor for coolness under fire, and medals are won by Sergeant Ross L. Iams and Private Samuel Gross.

November 19

AVIATION: Seven aircraft of the Army Air Service begin the first squadron level cross-country flight, which commences at Fort Sill, Oklahoma, and ends at Fort Sam Houston, Texas, 429 miles distant.

December 1

AVIATION: The navy formally opens the Naval Flying School at Pensacola, Florida, with an officer, three instructors, and 12 mechanics, after relocating it from Annapolis, Maryland. Congress also earmarks \$1 million for military aviation, its largest appropriation to date.

December 3

AVIATION: Over Pensacola, Florida, a Curtis AH-14 hydroaeroplane flown by Lieutenant Richard C. Saufley establishes a new American altitude record of 11,975 feet.

December 4

NAVAL: Admiral Frank F. Fletcher is the first officer of his grade to receive the Medal of Honor for his cool-headed performance under fire at Veracruz, Mexico, in April 1914.

December 7

MILITARY: Angered by the *Lusitania* sinking and buffeted by the winds of war, President Woodrow Wilson reverses himself and asks Congress to fund a standing army of 142,000 with 400,000 trained soldiers in reserve.

NAVAL: President Woodrow Wilson seeks a crash naval expansion program totaling \$500 million for the purchase of 10 battleships, six battle cruisers, 10 cruisers, 50 destroyers, and 100 submarines.

December 11

AVIATION: The Signal Corps Aviation School, San Diego, California, hosts four Portuguese army officers as students; these are the first foreign pilots trained in the United States.

December 19

AVIATION: The 1st Aero Squadron flies six Curtiss JN-3s from Fort Sill, Oklahoma, to Fort Sam Houston, Texas, in the first cross-country flight by an aviation unit.

1916

MILITARY: General John Taliaferro Thompson invents a functioning .45-caliber submachine gun; when adopted by the U.S. military in the 1920s it gains infamy as the “Tommy gun”—and great popularity among gangsters.

January 5

AVIATION: The 1st Company, 2nd Aero Squadron is deployed in the Philippines. It is the first complete aviation unit assigned to duty outside the United States.

MILITARY: A coup attempt against the national palace at Port-au-Prince, Haiti, is easily repulsed by marines on guard there; five Cacos are killed without loss to the Americans.

January 6

AVIATION: Instruction for enlisted men commences at the Navy Flying School, Pensacola, Florida, which mushrooms to 58 officers, 431 enlisted men, and 33 seaplanes by year's end.

January 7

DIPLOMACY: Despite repeated transgressions, the German government informs the United States that it will adhere to international rules of maritime warfare, especially as they pertain to submarines.

January 8

MARINES: A permanent Marine Corps base is established by the Navy Department at San Diego, California, the future Camp Pendleton.

January 10

GENERAL: Mexican revolutionary Francisco "Pancho" Villa, seeking to ensnare the United States in a war with the Mexican regime in power, stops a train and executes 18 American mining engineers in Santa Ysabel, Sonora.

January 11

AVIATION: The Naval Observatory forwards two British Creigh-Osborne magnetic compasses for operational testing at the Flying School, Pensacola, Florida. These devices, once adopted, will be widely used on naval aircraft throughout World War I.

January 17

AVIATION: The United States is on the cusp of war with Germany, yet the strength of the Army Air Service is only 49 personnel and 25 aircraft. By the end of 1918 it will possess 19,068 aircraft of all kinds but the bulk of combat aircraft employed are obtained from either France or Britain.

January 21

AVIATION: The superintendent, Radio Service, instructs the Pensacola Radio Station to commence experiments with aircraft radio. By summer no less than 50 radio sets will be on order for the aircraft there.

January 24

NAVAL: Gunner's Mate Wilhelm Smith wins the Medal of Honor for rescuing shipmates from a gas-filled room aboard the battleship *New York*.

February 10

AVIATION: The Bureau of Construction and Repair authorizes the practice of designating assigned numbers to all aircraft under construction for identification purposes. This represents the start of serial numbers assigned to all naval aircraft.

MILITARY: Secretary of War Lindley M. Garrison, angered by President Woodrow Wilson's insistence upon expanding the National Guard instead of his proposed "Continental Army," resigns from office, as does Assistant Secretary Henry S. Breckinridge.

February 24

MILITARY: Acting Secretary of War Hugh L. Scott inquires of the War College Division if there are any comprehensive plans in the event of war with Germany. He is somewhat surprised to learn that none are extant.

March 1

MARINES: The Marine Corps Association publishes its first issue of the *Marine Corps Gazette*.

March 4

AVIATION: Captain Mark L. Bristol, formerly director of naval aeronautics, is reassigned to the battleship *North Carolina* as the new commander of the Air Service. Thus situated, he is responsible for supervision of all aircraft, air stations, and new developments within the realm of naval aviation.

March 7

MILITARY: Newton D. Baker, a pacifist, gains appointment as the new secretary of war. He replaces outgoing Lindley M. Garrison, who resigned over President Woodrow Wilson's refusal to convert National Guard units into part of the standing military establishment.

March 9

MILITARY: A body of 500 Mexican guerrillas under General Francisco "Pancho" Villa ups the international ante by raiding Columbus, New Mexico, killing 18 Americans before being rebuffed by six companies of the 13th Cavalry under Colonel H. J. Slocum. The raiders lose about 100 men killed in battle and the ensuing pursuit. The attack also prompts President Woodrow Wilson to prepare an American expeditionary force of 15,000 men under Brigadier General John J. "Black Jack" Pershing to corner the elusive raiders wherever they are hiding in Mexico.

March 11

NAVAL: The new battleship *Nevada* is commissioned; the other ship in this class is the *Oklahoma*.

March 15

MILITARY: The House of Representatives passes the Army Reorganization Bill to update and modernize the ossified U.S. Army and bring it into modern combat readiness.

- Upon the direct orders of President Woodrow Wilson, Brigadier General John J. Pershing leads three brigades of 3,000 American troops on a punitive expedition into Mexico to apprehend the guerrilla Francisco "Pancho" Villa. They cross at Chihuahua and begin fanning out into the stark countryside, but they are under orders to proceed no farther south.

March 16

AVIATION: The 1st Aero Squadron under Captain Benjamin D. Foulois, acting upon orders from the War Department, begins readying pilots and equipment at Columbus, New Mexico, to support General John J. Pershing in Mexico. It is the first American tactical air unit committed to military operations in the field.

March 21

AVIATION: The French air service authorizes creation of the Escadrille Américaine, subsequently and better known as the Lafayette Escadrille to attract volunteer pilots from the United States.

March 24

NAVAL: German U-boat *UB-29* sinks the unarmed French channel steamer *Sussex* in the English Channel—without warning—thus violating the so-called Arabic Pledge and killing three Americans. President Woodrow Wilson angrily lodges a formal protest over the sinking.

March 25

AVIATION: The Navy Department issues a General Order, which tightens up and delineates the qualifications for officers and enlisted men in the Naval Militia. These rules are brought much closer in line with standard navy requirements.

March 28–29

MILITARY: After a 17-hour forced march, the 7th Cavalry surprises a force of 500 Mexican guerrillas at Guerrero, Mexico, killing 40 and driving off the rest.

March 29

AVIATION: Over Pensacola, Florida, a Curtiss hydroaeroplane flown by Lieutenant Richard C. Saufley establishes a new American altitude record of 16,010 feet, and two days later he exceeds it by an additional 62 feet.

March 30

AVIATION: Lieutenants Charles E. Sugden and Elmer F. Stone are the first Coast Guard officers assigned to receive flight training at Pensacola, Florida.

April 1

MILITARY: The army establishes a radio telegraph link between Namiquipa and El Valle, Mexico, in order to maximize communications with the six aircraft presently scouting the Mexican border for guerrillas. Ultimately, the Signal Corps creates 19 such stations to form a comprehensive communications net.

April 3

AVIATION: Captain William “Billy” Mitchell assumes command of the Aeronautics Division, Signal Corps.

April 5

AVIATION: The 1st Aero Squadron establishes its base camp at San Geronimo, Mexico, to promote closer cooperation with ground units commanded by General John J. Pershing.

April 7

AVIATION: At Chihuahua City, Mexico, Lieutenant Herbert A. Dargue and Captain Benjamin D. Foulais are fired upon as they land to deliver dispatches to the U.S. consul there.

April 8

MILITARY: Brigadier General John J. Pershing, whose strength has been augmented to 7,000 troops, pushed southward toward Colonia Dublan, Mexico, in his search for Mexican guerrillas. This places the Americans 400 miles behind

Mexican lines and, being denied the use of national railroads, they employ new motor transport companies to ensure a steady flow of supplies and ammunition. This is the first time the army has relied on such modern technology as gasoline-powered trucks and aircraft.

April 12

MILITARY: Two troops of the 13th Cavalry under Major Frank Tompkins engage Mexican irregulars at Santa Cruz de Villegas (Parral), Mexico. The two sides exchange fire as Tompkins departs the village; American losses are three dead and seven wounded to an estimated 40 Mexican casualties.

April 13

DIPLOMACY: At Parral, Mexico, Brigadier General John J. Pershing ignores an ultimatum issued by the governor of Chihuahua to withdraw his soldiers from the province. The general replies that his orders come from the president of the United States.

April 15

AVIATION: The Bureau of Construction and Repair issues new regulations for aircraft identification markings. Henceforth, all navy airplanes will carry an anchor and a two-digit numeral painted in blue against a white background. Said markings are to be placed on the upper and lower wing surfaces and on both sides of the fuselage.

NAVAL: The navy orders 3,500 of the newly developed Lewis drum-fed machine guns, which becomes a standard infantry weapon for the U.S. Marine Corps and is also employed as a defensive weapon on seaplanes. This deadly device had been previously developed by Colonel Isaac N. Lewis, and the army eventually obtains 18,400 such weapons.

April 16

AVIATION: In France, the Escadrille Américaine forms at Luxeuil-les-Bains (Vosges) from American volunteer pilots as part of the French Aeronautique Militaire. It sees extensive service in skies over the western front and is renamed the Lafayette Escadrille in December after famed Revolutionary War hero Marquis de Lafayette.

May 4

DIPLOMACY: The Imperial German government, taking President Woodrow Wilson's threat of war seriously, makes the "Sussex Pledge" and again promises not to sink unarmed passenger vessels at sea without first warning them.

May 5

MILITARY: Army Apache scouts under Major Robert Le Howze attack and disperse a larger force of irregulars at Ojos Azules, Mexico, killing 60 guerrillas without loss. Howze wins the Medal of Honor.

MARINES: The gunboat *Castine* under Commander Kenneth Bennett, accompanied by the transport *Prairie*, drops anchor off Santo Domingo, Dominican Republic, and deploys two companies of marines under Captain Frederic M. Wise to protect American lives and property during a period of political unrest.

May 9

MILITARY: President Woodrow Wilson mobilizes additional forces of the Texas, Arizona, and New Mexico National Guard along the U.S.–Mexican border. President Venustiano Carranza orders all American forces inside his country to leave immediately.

May 12

MARINES: Two additional marine companies under Major Newt H. Hall disembark from the store ship *Culgoa* and land in the Dominican Republic to enforce stability. Admiral William B. Caperton also arrives to negotiate with rebel general Desiderio Arias, and, within two days, the rebels depart Santo Domingo voluntarily.

May 13

AVIATION: In Washington, D.C., the chief of naval operations instructs the requisite bureaus to begin development of gyroscopic modifications for airplane instruments. These will ultimately include compasses, bombsights, and turn and bank indicators.

- In France, the first seven pilots belonging to the Escadrille Américaine see action in the skies over Alsace.

May 14

NAVAL: In Santo Domingo, Dominican Republic, Rear Admiral William B. Caperton confers with General Desiderio Arias, who has taken up arms against President Juan Isidro Jimenez, and convinces him to remove his followers from the city peacefully.

May 15

MARINES: Marines begin collecting to storm the rebel stronghold of Fort Ozama, Santo Domingo, and they give the garrison until today to evacuate or face attack. The rebels comply and move into the interior.

May 18

AVIATION: Sergeant Kiffin Yates Rockwell of the Escadrille Américaine downs a German observer craft over Thann, in the Alsace region of France, the first aerial enemy kill for an American pilot in the Great War.

May 20

AVIATION: Command of the Aviation Section, Signal Corps, passes from Lieutenant Colonel Samuel Reber to Lieutenant Colonel George O. Squier.

- The Bureau of Ordnance allocates \$750 to the Sperry Gyroscope Corporation to develop a gyroscopically operated bombsight.

May 22

AVIATION: A Hess-Ives Corporation color camera arrives at the Naval Aeronautical School, Pensacola, to evaluate whether or not color photography would be a useful tool in aerial reconnaissance.

MILITARY: General Francisco “Pancho” Villa’s men again slip across the American border into Texas, attack the settlement of Glen Springs, and kill three soldiers and a child. The guerrilla leader is determined to provoke a war between the United States and Mexico at any cost.

May 28

MARINES: In the Dominican Republic, when negotiations with rebellious General Desiderio Arias break down, the 11 companies of marines presently in that country are ordered to help crush the rebellion.

June

AVIATION: In Seattle, Washington, aeronautical newcomer and former lumber salesman William E. Boeing flies the first airplane made at his Boeing Airplane Company. The navy then places an order for 50 of his Model C floatplanes.

June 1

MARINES: Two companies of marines and one of sailors under Captain Frederick M. Wise disembark from the repair ship *Panther* and destroyer *Lamson* to peacefully occupy the town of Monte Cristi, Dominican Republic, securing that part of the island's northern coast.

- Another detachment under Major Charles Hatch, assisted by cannon fire from the gunboat *Sacramento*, storm the rebel outpost of Puerto Plata, Dominican Republic, driving the garrison deep into the interior. One marine officer, Captain Herbert J. Hershinger, is slain in combat.

June 3

AVIATION: Despite mounting emphasis on aircraft, the Flying School at Pensacola, Florida, offers free and captive ballooning courses to prospective naval aviators.

MEDICAL: Given the preponderance of horses in the American military, President Woodrow Wilson signs legislation creating the Veterinary Corps, which provides one officer/doctor and 16 enlisted men per 400 animals.

MILITARY: Congress passes the National Defense Act, which raises personnel levels of the U.S. Army from 175,000 to 225,000 and that of the National Guard to 2.4 million over the next five years. The designation Army of the United States (AUS) is also adopted and applied to the regular establishment and those Reserve and National Guard elements under federal jurisdiction. Officer training courses (ROTC) are also established on college campuses as the nation begins girding itself for war.

June 9

AVIATION: An AH-9 hydroaeroplane crashes on Santa Rosa Island, Pensacola, Florida, taking the life of Lieutenant Richard C. Saufley. At the time, he was attempting a new endurance record and managed to stay aloft eight hours and 51 minutes.

June 12

NAVAL: The new battleship *Pennsylvania* is placed in commission.

June 16

MILITARY: General Jacinto Trevino, commanding Mexican forces in northern Mexico, warns General John J. Pershing that his continuing presence in that country is viewed as a hostile action.

June 17

NAVAL: The navy acquires the troop ship *Henderson*, the first transport vessel specifically designed to carry marines and their equipment.

June 18

AVIATION: Over Verdun, France, aviator H. Clyde Balsley becomes the first American shot down while flying with the Escadrille Américaine. The French air commander subsequently flies to his airfield and presents the seriously wounded aviator with a Military Medal and a War Cross.

MILITARY: As military operations in Mexico expand, additional National Guard troops are mobilized for service along the border to assist them.

June 20

AVIATION: The Navy Department issues a general order that extends bureau recognition to lighter-than-air machines currently in its inventory.

June 21

MILITARY: A fight between the 10th Cavalry, the famous African-American “Buffalo soldiers,” and Mexican regulars at Carrizal results in 10 soldiers killed, 10 wounded, and 23 captured. Mexican casualties total 74 dead, including General Félix U. Gómez. President Venustiano Carranza reiterates his demand that the foreigners leave Mexican soil immediately. President Woodrow Wilson once again refuses until order and security are restored along the entire 2,000-mile long border.

MARINES: Colonel Joseph H. Pendleton lands at Monte Cristi, Dominican Republic, with the 4th Provisional Marine Regiment, which forms the nucleus of the 2nd Provisional Marine Brigade, which he is to command.

June 23

AVIATION: Pilot Victor Emmanuel Chapman, flying with the Escadrille Américaine in France, is shot down and killed near Verdun, France, becoming the first American pilot killed in World War I. Brave to the point of recklessness, Chapman had been shot down seven times in six weeks and also claimed four German kills.

June 25

MILITARY: Mexican president Venustiano Carranza, eager to defuse a mounting border crisis with the United States, orders the release of 17 captured American servicemen taken at Carrizal.

June 26

MARINES: A column of marines under Colonel Joseph H. Pendleton departs Monte Cristi, Dominican Republic, and marches 75 miles overland to dislodge a rebel strong point along the Las Trencheros Ridge near Santiago. They are joined by another four companies under Major Hiram I. Bearss, who marches overland from Puerto Plata.

June 27

MARINES: A column commanded by Colonel Joseph H. Pendleton engages rebel forces along Las Trencheros Ridge, Dominican Republic, driving them from two hilltops with a loss of five dead.

June 29

MARINES: At Alta Mira railway, Dominican Republic, a marine column commanded by Major Hiram I. Bearss pushes through 200 entrenched rebels, routing them at a cost of two wounded.

July 3

MARINES: The 4th Marine Regiment under Colonel Joseph H. Pendleton defeats a sizable rebel force at Guayacanas, Dominican Republic. The marines sustain one dead and 10 wounded; 27 dead rebels are left on the field.

July 5

MARINES: A column of the 4th Marine Regiment under Colonel Joseph H. Pendleton advances upon Santiago, Dominican Republic, and forces rebels gathered there under General Desidero Arias to surrender. The Americans prepare to take over administrative control of the island.

July 12

AVIATION: In Pensacola Bay, Florida, an AB-3 flying boat piloted by Lieutenant Godfrey deC. Chevalier commits the final calibration catapult launch off the battleship *North Carolina*. The vessel is the first capital ship outfitted for routine aircraft operations.

July 13

AVIATION: At Mineola, New York, the 1st Aero Company, New York National Guard, mobilizes for service along the Mexican border; they are not deployed, but they do make history as the first National Guard air unit requisitioned into federal service.

July 17

AVIATION: At Norwich, Connecticut, Navy Inspector lieutenant George D. Murray observes trial flights of the Gallaudet seaplane, a revolutionary design featuring a propeller mounted midway down the fuselage.

July 18

AVIATION: In Washington, D.C., the secretary of the navy issues clothing allowances to all naval flight personnel. Hereafter pilots are to receive helmets, goggles, and safety jackets while enlisted men are also to be outfitted with wool head cover, suit, and boots.

July 22

AVIATION: In Washington, D.C., Chief Constructor rear admiral David W. Taylor requests that the Aluminum Company of America begin developing newer, lighter alloys for possible use in dirigible construction.

July 30

MILITARY: Munitions works on Black Tom Island, New York, are sabotaged by German agents and explode with such force that windows are shattered in Times Square, New York City. Seven people are killed.

August 8

AVIATION: In Washington, D.C., the secretary of the navy issues a directive that makes the General Board responsible for providing the service with desired numbers and characteristics of new aircraft while the Bureau of Construction will take the lead in aircraft procurement and development.

August 10

AVIATION: The Bureau of Construction begins business negotiations with Glenn H. Curtis over the proposed acquisition of 30 J-9 trainers; these are delivered

between November 1916 and February 1917 and serve as the navy's most popular training aircraft during World War I.

August 12

AVIATION: In Washington, D.C., the secretaries of war and the navy agree that the Deperdussin system of controlling aircraft in flight ought to become standardized equipment in the machines of both services.

August 17

AVIATION: The mission of the Naval Aeronautical Station, Pensacola, Florida, is refined to state that its primary mission is flight instruction for commissioned and enlisted personnel. Therefore, an Aeronautics School is to be founded on location with requisite departments for manufacturing, experimental test, inspection, and related functions.

August 19

NAVAL: Congress establishes the U.S. Naval Reserves while existing state naval militias are federalized as the National Naval Volunteers.

August 24

MARINES: A recent agreement concluded by Haiti and the United States establishes the new Gendarmerie d'Haiti at 115 officers and 2,533 enlisted men. All ranks are to receive training and guidance from Marine Corps personnel.

August 28

AVIATION: Major Benjamin D. Foulois reports that his 1st Aero Squadron, despite severe operational conditions, managed to complete 540 reconnaissance flights, covering 19,533 miles, and staying aloft for 346 hours without serious mishap. All told, an impressive debut for new aerial technology.

August 29

AVIATION: The Naval Appropriations Act of 1917 includes funding to found a Naval Flying Corps with a strength of 150 officers and 350 enlisted men. A Naval Flying Reserve Corps of six classes is also included.

- Congress authorizes creation of the first Coast Guard Aviation Division, but funding does not materialize until 1926. Meanwhile, Coast Guard pilots operate within navy aviation units.
- In a major development for the future of military aviation, Congress votes to provide NACA with \$82,000 to construct a large aeronautical laboratory at Langley Field, Virginia. The army likewise receives \$14 million to pursue military aviation.

MILITARY: A Council of National Defense to advise the president is established, consisting of six cabinet members and a qualified civilian staff to advise the commander in chief on industrial, technical, social, and economic preparedness for conflict. They are tasked with planning for transportation, munitions, labor, raw materials, and other commodities essential for modern warfare.

NAVAL: Congress passes the Naval Preparedness Act ("Big Navy") to enlarge and modernize the navy for possible conflict in European waters. This \$91.2 million expenditure has been fine-tuned to acquire 10 battleships, 6 battle cruisers, 10 scout cruisers, 60 destroyers, and 67 submarines over a three-year period—rendering the U.S. Navy the world's largest and best equipped.

- The cruiser *Memphis* is struck by a tidal wave off Santo Domingo, Dominican Republic, and sunk with the loss of 40 sailors. Three individuals win Medals of Honor for saving shipmates, including one awarded posthumously.

MARINES: The new National Defense Act expands Marine Corps manpower to 597 officers and 14,981 enlisted men. The Navy Department also authorizes the Marine Corps Reserve, which is subsequently subdivided into the Fleet Marine Corps Reserve, the Marine Corps Reserve A, the Marine Corps Reserve B, and the Volunteer Marine Reserve.

August 31

MILITARY: Returns indicate that 111,954 men of the National Guard are deployed along the U.S.–Mexican border, including two entire divisions from Pennsylvania and New York.

September 2

COMMUNICATION: Over North Island, San Diego, California, two naval aviators transmit radio telegraph messages to each other for the first time and at a distance of two miles. Inflight communication between airborne craft is becoming technically feasible and a tremendous boon to aerial operations.

September 7

NAVAL: The U.S. Shipping Board is created to acquire merchant ships for naval purposes, such as the conveyance of military forces abroad. Its activities are abetted by the Emergency Fleet Corporation, capitalized at \$50 million, to purchase or charter said vessels in the event of war.

September 9

AVIATION: A general order issued by the secretary of the navy initiates a program of formal flight testing as the basis of accepting all new aircraft into the service, along with the establishment of proper procedures to insure that said aircraft are safe to operate.

September 12

AVIATION: At Amityville, Long Island, New York, Lieutenant T. W. Wilkinson of the Bureau of Ordnance observes the first successful flight of an airplane guided by a gyroscope, invented by Elmer Sperry. This automatic control greatly insures the accuracy and safety of long-distance flying.

September 13

AVIATION: An aeronautics course for field officers is founded at the Signal Corps Aviation School, San Diego, California.

September 20

AVIATION: The Navy Department issues its earliest known color regulations for aircraft by mandating that all Curtiss N-9 training machines be finished in a bright yellow varnish.

September 30

MILITARY: The National Research Council is founded to better coordinate and stimulate high-level scientific developments with potential military application.

October 11

AVIATION: In Washington, D.C., the secretaries of war and the navy agree to the creation of a joint Aeronautics Board to evaluate the requirements for all lighter-than-air machines in their respective employ.

October 17

NAVAL: The new and fateful battleship *Arizona* is commissioned; today it remains entombed at the bottom of Pearl Harbor, the victim of a Japanese aerial attack in 1941.

October 24

AVIATION: The Navy Yard in Philadelphia, Pennsylvania, is directed by the Bureau of Steam Engineering to undertake develop of a radio directional finder capable of employing wavelengths gauged at 600 to 4,000 meters.

October 27

AVIATION: The chief of naval operations issues orders mandating that any all aircraft loaned or donated to the Naval Militia receive the designation NMAH and be given numbers in sequence beginning with one.

October 28

NAVAL: The British steamer *Marine* is sunk at sea by U-boats without warning, killing six Americans.

November 7

POLITICS: Woodrow Wilson is reelected to the presidency under the slogan “he kept us out of war.”

November 8

AVIATION: At the Naval Proving Ground, Indian Head, Maryland, a pair of naval aviators are killed instantly following the premature detonation of a bomb they were carrying.

November 17

AVIATION: In Washington, D.C., Chief Constructor David W. Taylor, eager to speed the development of faster seaplanes, solicits design proposals from various companies. He seeks aircraft capable of flying between 50 to 95 miles per hour, possess two and a half hours endurance, and carry a radio.

November 18–19

AVIATION: Seven Curtiss JN-4s Jenny of New York’s 1st Aero Company are flown from Mineola, New York, to Princeton, New Jersey, and back under Captain Raynal C. Bolling. They do so ostensibly to attend a football game but also to showcase their equipment and cross-country flying ability to the public.

November 29

MARINES: The United States imposes martial law throughout the Dominican Republic until its domestic affairs can be sorted out and order restored. Captain Harry S. Knapp is also appointed military governor; his marines remain in place until 1924 although they make little progress on restoring domestic instability.

- Dominican rebel Juan Pérez refuses calls to surrender and stores all his arms in a fortress at San Francisco de Macoria. This evening, two companies of marines

surround the position and 12 men under Lieutenant Ernest C. Williams rush the gateway before it is closed. Eight marines are shot down before the portal is carried, but Williams wins a Medal of Honor.

December 7

AVIATION: At the Naval Air Station, Pensacola, Florida, Lieutenant Commander Henry C. Mustin issues a test report extolling the virtues of the Eastman Aero Camera, which produced very satisfactory photographs at altitudes from 600 to 5,100 feet.

December 12

AVIATION: Commander of the Air Service Mark L. Bristol is detached from that service, and its operations are handed off to Rear Admiral Albert Gleaves, commander destroyer force, Atlantic Fleet.

December 20

AVIATION: Fort Omaha, Nebraska, is the home of the U.S. Army's new Balloon School.

December 22

AVIATION: Prolific inventor Elmer B. Sperry files a patent application for his "aerial torpedo," an unmanned airplane piloted by one of his gyrostabilizers.

December 30

AVIATION: The U.S. Army establishes a new aviation school north of Hampton, Virginia; it is now home to Langley Air Force Base, the air force's oldest active base.

- The commissioner of navy yards and naval stations issues a report recommending that a joint Army-Navy Board should decide upon the new location of air bases along the coast with a view toward enhancing national defense.

1917

January 6

AVIATION: The secretaries of war and of the navy are encouraged by an Army and Navy Board to acquire several lighter-than-air ships based on the proven German Zeppelin design. Funding is split evenly between the two services and a joint board of three officers from each service is created to ensure close cooperation.

January 8

AVIATION: In an early armament test, a Benet-Mercie machine gun, mounted in a Burgess-Dunne AH-10, is fired successfully from altitudes of 100 and 200 feet above Pensacola, Florida.

January 9

AVIATION: Captain Henry H. Arnold is dispatched to Panama to assume command of the 7th Aero Squadron, which, at that time, possessed neither bases nor airplanes.

January 10

AVIATION: The Naval Observatory places the first-ever navy order for photographic equipment by purchasing 20 aero cameras from the Eastman Kodak Company.

January 13

NAVAL: The cruiser *Milwaukee*, attempting to help refloat the sunken submarine *H-3*, is grounded off Eureka, California, and wrecked without loss of life.

January 15–March 23

AVIATION: The armored cruiser *Seattle* anchors off Culebra, Puerto Rico, while conveying an aviation detachment. These men and aircraft will participate in fleet operations by performing scouting missions while operating from the ship and shore installations.

January 28

MILITARY: President Woodrow Wilson issues orders for General John J. Pershing to withdraw all American forces from Mexico, in effect, ending the futile pursuit of Francisco “Pancho” Villa. The Americans presently have roughly 11,500 men in the vicinity of Colonia Dublán, supported by a fleet of 170 trucks. This day Pershing orders them to concentrate at Palomas in Chihuahua state before withdrawing across the border.

February 1

MILITARY: The German war effort, invigorated under the leadership of Marshal Paul von Hindenburg, abandons prior restrictions on undersea warfare in a deliberate attempt to starve Britain into submission—a tactic that nearly succeeds. Neutral shipping in war zones have until February 1 to depart or risk being sunk. He undertakes this even at the risk of U.S. intervention, believing that the German army can defeat the Allies before the Americans can arrive in force. The note is delivered to the American government by Berlin’s ambassador, Count Johann-Heinrich von Bernstorff. Appearances to the contrary, this naval escalation proves a grave military miscalculation.

February 2

MILITARY: In Oyster Bay, New York, former president Theodore Roosevelt requests a general’s commission from the War Department. He aspires to lead a division of American volunteers in Europe on behalf of the Allies. The request is denied.

February 3

DIPLOMACY: The United States formally severs diplomatic relations with Germany in response to the latter’s resumption of unrestricted submarine warfare.

NAVAL: German U-boats sink the American vessel *Housatonic* off the coast of Sicily following a one-hour warning. However, the Allies begun employing the convoy system, which drastically reduces ship losses while improved antisubmarine tactics and technology partially neutralize the threat.

February 4

AVIATION: The secretary of the navy, determined to acquire dirigibles for naval service, issues a contract for 16 nonrigid Class B airships from the Connecticut Aircraft Corporation, the Goodyear Tire & Rubber Company, and the B. F. Goodrich Company.

February 5

AVIATION: In light of the world military situation, the chief of naval operations urges that eight aeronautical coastal patrol stations be established at strategic points along the eastern seaboard.

MILITARY: In Mexico, the last detachment of American forces under General Frederick Funston withdraws to American territory. This officially concludes the punitive expedition.

February 7

MILITARY: At Oyster Bay, New York, former president Theodore Roosevelt again requests to command a division of American volunteers in Europe and is again turned down by the War Department.

February 10

AVIATION: To eliminate the threat of infringement suits brought by aeronautical firms against each other, the National Advisory Committee for Aeronautics founds a patent subcommittee to help preclude legal actions threatening the entire industry.

February 12

NAVAL: In light of mounting unrest in Cuba, the gunboat *Paducah* sends the bulk of its crew members ashore to protect American lives and property.

February 13

AVIATION: At Pensacola, Florida, the first successful loop-the-loop of a Curtiss N-9 floatplane is performed by Lieutenant Francis T. Evans of the marines, during which he also determines the correct procedure for coming out of a dangerous flat spin. He receives a Distinguished Flying Cross for his endeavors.

February 15

NAVAL: Commander Dudley Knox of the gunboat *Petrel* drops anchor off Santiago Harbor, Cuba, and strikes a bargain with rebels not to allow government vessels to enter. In return, the rebels pledge not to scuttle vessels in the channel, blocking it.

February 19

AVIATION: Command of the Aviation Service, Signal Corps passes to Lieutenant Colonel John B. Bennett while his predecessor, Lieutenant Colonel George O. Squier, is appointed chief signal officer.

MILITARY: Brigadier General John J. Pershing is ordered to remove all American troops from Mexican soil and return home. This concludes a fruitless campaign to corner the ruthless insurgent Pancho Villa.

February 25

NAVAL: Three American civilians are killed when a German U-boat torpedoes and sinks the British passenger liner *Laconia*.

MARINES: A force of 220 marines from the Atlantic Fleet comes ashore at Guantánamo Bay, Cuba, and occupies the city while an additional 200 land in Oriente Province to protect of American-owned sugar plantations.

February 26

NAVAL: When President Woodrow Wilson asks Congress for permission to pass the Armed Ship Bill to arm merchant vessels, a group of pacifist senators under Robert La Follette filibusters its passage.

February 28

AVIATION: At North Island, San Diego, California, the first successful experiments with radio/voice communications between aircraft and ground stations transpire. Previous attempts in this field utilized telegraphs.

March 1

NAVAL: Congress passes a law permitting the arming of merchant vessels to defend themselves against U-boat attacks, and President Woodrow Wilson orders navy gun crews to man the weapons. He does so without waiting for congressional authority.

March 4

NAVAL: President Woodrow Wilson signs the \$157 million Naval Appropriations Bill, which is the largest naval expenditure in history to date.

March 8

NAVAL: Rather than be captured by government forces, large numbers of Cuban rebels in Santiago surrender to landing parties from the *San Francisco*, *Olympia*, and *Machias*.

MARINES: Detachments from Guantánamo Bay, Cuba, begin fanning out into the countryside in an attempt to restore order.

March 9

NAVAL: President Woodrow Wilson, having been assured by his attorney general that he possesses the power as commander in chief, without the consent of Congress orders merchant vessels armed. Navy vessels are also ordered to return fire if attacked by submarines.

March 12

AVIATION: In Washington, D.C., the secretaries of war and the navy sign the first interservice cooperative agreement regarding the development of aeronautical technology, including organizational and operation principles.

NAVAL: U-boats sink the American merchant vessel *Algonquin*.

March 13

AVIATION: The Air Intelligence subdivision of the Signal Corps is established by Brigadier General George O. Squier, chief signal officer.

- Updating its regulations on airplane coloring, the Bureau of Construction and Repair orders that all seaplanes be finished in an overall yellow color.

March 17

NAVAL: The Navy Department authorizes the recruitment of women as “yeomanettes” to perform clerical tasks and other duties. A total of 11,275 step forward to serve their country during the Great War.

March 18

NAVAL: German U-boats attack and sink the American ships *Vigilancia* and *Illinois*.

March 24

AVIATION: A group of 29 men from the First Yale Unit enlist in the Naval Reserve Force and begin military training at West Palm Beach, Florida.

March 26

AVIATION: The Joint Army-Navy Airship Board is created to consider issues relative to their military application.

MARINES: In light of the deteriorating international situation, President Woodrow Wilson signs legislation allowing the Marine Corps to expand to 693 officers and 17,400 enlisted men.

March 29

MARINES: The United States, having acquired the Virgin Islands from Denmark to prevent their occupation by German forces, deploys a company of marines at Christiansted, St. Croix.

March 31

AVIATION: Marines on Haiti are bolstered by the arrival of seven Curtiss HS-2 flying boats, which touch down at Bizoton.

MILITARY: The Council of National Defense establishes the General Munitions Board to better coordinate what is slowly becoming a vast national war effort. In practice, however, it lacks enforcement powers and is relatively ineffective.

NAVAL: Rear Admiral James H. Oliver is appointed the first governor of the newly acquired Virgin Islands, which have been purchased from Denmark.

April 2

MILITARY: President Woodrow Wilson submits his war request to Congress “because the world must be made safe for democracy.” A seminal conflict in world history, World War I leads to the deaths of 30 million people. The war introduces aircraft, tanks, machine guns, and chemical weapons into armed conflict.

April 6

AVIATION: At the time of the declaration of war against Germany, the Aviation Section of the Signal Corps consists of 35 pilots, 55 training aircraft, and 1,987 enlisted men. The combined strength of naval aviation is 48 officers, 239 enlisted men, 54 airplanes, one airship, and three balloons. These numbers are woefully inadequate by European standards.

- The secretary of the navy approves a recommendation from the Board on Flying Equipment to establish standard flight clothing for the Naval Flight Service to include long coats, helmets, goggles, gloves, boots, and life belts.

MILITARY: Despite recent saber rattling by President Woodrow Wilson and several years of advance warning, the United States enters World War I essentially unprepared for the protracted land warfare being waged in western Europe. The army numbers around 200,000 men, lacks any tanks or armored vehicles, has no capacity to produce modern artillery and—the United States is the country where the airplane was invented—possesses only 50 qualified military aviators and a handful of obsolete craft.

NAVAL: The declaration of war against Imperial Germany finds the navy small by European standards, but well trained and led; currently it boasts a strength of 4,376 officers and 69,680 enlisted men.

April 7

NAVY: To facilitate the war effort the navy assumes control of all wireless radio stations in the United States.

- President Woodrow Wilson signs an executive order transferring the Coast Guard from the Treasury Department to the navy for operational purposes.

MARINES: Admiral Harry S. Knapp, military governor of the Dominican Republic, orders the Dominican army disbanded and replaced by a new Guardia Nacional Dominicana, which is to be trained and led by Marine Corps personnel.

April 9

NAVAL: Rear Admiral William S. Sims, an ardent Anglophile, is dispatched to London to establish high-level contacts with Royal Navy authorities. He is shocked to learn that Great Britain is within weeks of losing the war to submarines, so Sims implores the Navy Department to forward every available destroyer or patrol vessel to Europe to counter the threat. Sims goes so far as to insist that construction programs for battleships and other capital vessels be suspended in favor of obtaining more antisubmarine craft, and his view ultimately prevails. He also strongly urges that the navy adopt a convoy system advocated by several British officers.

April 13

NAVAL: The battleship *New Mexico*, the first capital ship utilizing a turbine electric drive, is launched in New York City. It is commissioned a year later.

April 14

AVIATION: In Washington, D.C., the Naval Consulting Board suggests to the secretary of the navy that \$50,000 be appropriated for the purpose of developing “aerial torpedoes” in the form of automatically controlled airplanes carrying high explosives. This suggestion constitutes the origins of the navy’s first guided missile program.

April 16

NAVAL: The Emergency Fleet Corporation is chartered by Congress and capitalized at \$50 million in order to buy, lease, and construct merchant vessels for the war effort.

April 18

NAVAL: In something of a turn of fortunes, the American transport *Mongolia*, carrying a navy armed guard, fires upon a surfaced U-boat in the Atlantic and wrecks its conning tower.

April 19

MARINES: The newly acquired Virgin Islands receive a garrison of three companies of marines, who begin mounting coastal batteries to deny harbor facilities to the Germans.

April 20

AVIATION: At Pensacola, Florida, the DN-1, the navy’s first airship, performs its initial flight tests unsatisfactorily and is grounded after a total of three flights.

April 24

AVIATION: Captain William “Billy” Mitchell becomes the first officer of the Army Air Service to fly over enemy territory by accompanying a French aircraft; he subsequently becomes an outspoken—if outlandish—spokesman for American air power.

NAVAL: The first American destroyer squadron committed to active duty in World War I, consisting of the *Porter*, *Cunningham*, *Wadsworth*, *McDougal*, *Davis*, and *Wainwright*, departs Boston, Massachusetts and sails directly for Queenstown, Ireland.

Sims, William S. (1858–1936)

Admiral

William Sowden Sims was born in Port Chester, Ontario, on October 15, 1858, the son of an American father, and raised in Orbisonia, Pennsylvania. He gained admittance to the U.S. Naval Academy in 1876, graduated four years later, and fulfilled routine tour of duties at sea. A competent officer, Sims was dispatched to observe the Sino-Japanese War of 1894–95 as an intelligence officer, and he grew alarmed over the mounting obsolescence of the U.S. Navy. However, his repeated complaints to authorities were ignored. In 1900 he returned to the Orient, where he met Captain Percy Scott of the Royal Navy, who had invented a new, continuous-aiming and firing method. When Sims adapted this system to his own vessel, it posted a remarkable increase in accuracy, and he urged the Navy Department to adopt it wholesale. When his pleas went unheeded, Sims violated the chain of command by appealing directly to President Theodore Roosevelt. This act of insubordination

might have ended his career but Roosevelt, an avowed naval reformer, appointed him inspector of target practice with the rank of lieutenant commander. Over the next five years, Sims helped to transform U.S. Navy gunnery from mediocre to among the world's finest. In 1907 he took charge of the battleship *Minnesota*, becoming the youngest naval officer to command a capital ship. Outspoken as ever, Sims also visited England and made an unauthorized speech on behalf of Anglo-American amity, pledging U.S. support in the event of a war with Germany. His remarks disturbed isolationist-minded politicians and drew a reprimand from President William Howard Taft.

Following a useful stint commanding destroyers, during which Sims pioneered the techniques behind antisubmarine warfare (ASW), Sims gained promotion to rear admiral in 1917 and also served as president of the U.S. Naval War College in Newport, Rhode Island. His tenure was interrupted

April 26

AVIATION: At the Mare Island Navy Yard, San Francisco, California, the armored cruiser *Huntington* performs dead-load tests on its newly installed aircraft catapult.

April 27

AVIATION: Captain Alfred Cunningham organizes the Marine Aeronautical Company, Advance Base Force, in Philadelphia, Pennsylvania, by combining the Marine Aviation Section at Pensacola, Florida, with the Marine Corps Flying Reserve.

April 28

MILITARY: Congress adopts the Selective Service Act to begin raising a wartime army and submits it to President Woodrow Wilson for his approval.

by President Woodrow Wilson's declaration of war against Germany, and Sims suddenly found himself in charge of all U.S. naval forces in European waters. In this office, he pushed hard for adoption of the convoy system to supply Britain and keep it from succumbing to the U-boat menace. Sims was on particularly good terms with the Royal Navy's hierarchy, whom he admired, and he closely integrated all American naval assets under British control. The results proved startling as losses to submarines dropped through a deft combination of convoys, mines, and use of aircraft as naval spotters. For his role in helping win the war, Sims received a temporary promotion to admiral in December 1918 and he came home in triumph. No sooner did he return, however, then Sims instigated a public row with Secretary of the Navy Josephus Daniels and Chief of Naval Operations William S. Benson over what he claimed was resistance to implement badly needed reforms. Sims died in Boston, Massachusetts on September 28, 1936, an outspoken architect of victory in World War I.

Rear Admiral William Sims (*Library of Congress*)

May 1

AVIATION: The navy adopts an expanded training program for prospective aircraft and dirigible pilots, which are to be offered every three months, and also includes provisions for the instruction of enlisted men as mechanics and quartermasters.

MILITARY: To facilitate the vast transportation network necessary for the transfer of thousands of soldiers to the western front, recruiting offices make a special plea for volunteers to consider joining the U.S. Railroad Engineers. In fact, detachments from the 11th, 12th and 13th Railway Engineers arrive first in Boulogne, France, ahead of most combat units.

MARINES: To promote greater stability in the Dominican Republic, the Guardia Nacional Dominicana is established and trained by Marine Corps personnel present on the island.

May 2

MILITARY: The War Department alerts General John J. Pershing, then on duty at Fort Sam Houston, Texas, that he may be tapped to serve as commander of an American Expeditionary Force (AEF) in France.

May 4

AVIATION: Naval militia stations at Squantum, Massachusetts, and Bay Shore, New York, are taken over by regular officers of the navy to expand flight training programs until more permanent stations can be constructed.

NAVAL: Commander Joseph K. Taussig, leading Destroyer Squadron Eight, anchors at Queenstown (Cobh), Ireland, with the *Conyngham*, *Davis*, *McDougal*, *Porter*, *Wainwright*, and *Wadsworth*. When queried by his British superior how much time he will need before being ready for action, Taussig replies, "We are ready now, sir!"

May 5

AVIATION: In Washington, D.C., the trend toward standardization and interservice cooperation continues as the secretaries of war and the navy consent to a "joint technical board" assembled for standardizing the design and specifications of forthcoming aircraft.

- At Pensacola, Florida, tests are held by firing a synchronized Berthier machine gun through the propeller arc of a Curtis R-3 as it taxis on water and stands idle on a beach.

May 11

MILITARY: President Woodrow Wilson receives a petition by the Central Committee of Negro College Men for a training camp to instruct African-American soldiers. No action is taken at first, but blacks are eventually drafted into the army in large numbers.

May 14

MARINES: The establishment of the Marine Barracks, Quantico, Virginia, fulfills the pressing need for a Marine Corps base along the eastern seaboard.

May 15

AVIATION: The secretary of the navy lists obtaining aircraft and their equipment as the ninth of 20 major priorities to be met during wartime preparations.

May 16

AVIATION: The Aircraft Production Board is established by the Council of National Defense and entrusted to Howard Coffin, former CEO of the Hudson Motor Car Company, which acts in an advisory capacity relative to aircraft development and procurement. This move signals a massive buildup of American aerial strength for use in World War I.

May 17

AVIATION: Encouraged by recent tests, the chief of naval operations authorizes the purchase of 50 machine guns and their synchronizing equipment in the naval air arm's first armament program.

- In Washington, D.C., Captain Noble E. Irwin replaces Lieutenant John H. Towers as officer in charge of the aviation desk, Materiel Branch, Chief of Naval Operations.

- The Curtiss Exhibition Company contracts with the navy to train 20 men of the Naval Reserve Flying Force at its field in Newport News, Virginia.

MILITARY: In Washington, D.C., the Senate debates and then passes the U.S. Army draft bill, which sets in motion laws to register and induct soldiers from a pool of 10 million eligible men. It also bans the sale of all liquor on or near army training camps.

May 18

AVIATION: The first demonstrations of self-sealing fuel tanks for aircraft are held for representatives of the army and navy Bureau of Standards. These devices consisted of double-walled galvanized iron with several layers of felt, gum rubber, and soap-whiting paste.

MEDICAL: The U.S. Army Medical Service Corps is founded, with a view toward preventing and treating disease and battle-related injuries.

MILITARY: President Woodrow Wilson signs the Selective Service Act to induct all men between 21 and 30 to the colors, commencing June 5, 1917. This is the first military conscription passed since 1863 and 3 million men out of 24 million registered are inducted. Ultimately, army manpower rises to over 4 million while the navy expands to 500,000. Several political figures oppose the draft and argue that any military recruiting should be accomplished strictly on a volunteer basis. Another unusual provision of the act is the banning of liquor from all training camps.

MARINES: The newly acquired, 5,300-acre base at Quantico, Virginia, receives its first contingent of marines.

May 19

AVIATION: A general order is released by the government to acquire a distinguishing national insignia for all military aircraft, in this instance a blue circular field upon which is imposed a white star with a red dot in the center. Airplane rudders are also to carry vertical stripes of red, white, and blue.

- The chief of naval operations requisitions two small seaplanes and one pilot for radio experiments held at Pensacola, Florida.

MARINES: In a display of military unity, Secretary of the Navy Josephus Daniels offers to send a Marine Corps regiment to France for service alongside army troops; the offer is accepted by the secretary of war.

May 22

MARINES: Congress raises Marine Corps manpower levels to 1,323 officers and 30,000 enlisted men—its greatest expansion to date.

May 23

AVIATION: Having received a request from French premier Alexander Ribot for 5,000 American pilots, 4,500 aircraft, and 50,000 aircraft mechanics, Major Benjamin D. Foulais is tasked with drawing up a plan along these lines for the government to implement.

- For the navy, the Joint Technical Board on Airplanes recommends the wartime acquisition of 30 school trainers, 200 service seaplanes, 100 speed scouts, and 100 large seaplanes.

May 24

MILITARY: The First Expeditionary Division is assembled from various army units stationed in Texas under the command of Major General William L. Sibert, an engineering officer who performed capably during the construction of the Panama Canal. This unit is to spearhead the transfer of American forces to the western front.

NAVAL: At Hampton Roads, Virginia, the first American convoy bound for Britain departs under armed escort. The convoy system proves the key to defeating the U-boat menace.

May 26

AVIATION: In a boost to the Aviation Section, Signal Corps, Major Townshend F. Dodd gains appointment as AEF aviation officer to General John J. Pershing's staff.

MILITARY: Secretary of War Newton D. Baker informs Major General John J. "Black Jack" Pershing of his appointment as commanding officer of the new American Expeditionary Force (AEF) slated for deployment in France. He is ordered to keep the Americans unified as a single fighting force and not to allow them to be parceled out in detachments to bolster the Allies.

May 28

AVIATION: In a quixotic endeavor off Mare Island, San Francisco, California, the armored cruiser *Huntington* conducts various aeronautical experiments involving kite balloons.

May 29

AVIATION: In Washington, D.C., Colonel Edwin Deeds collaborates with several engine designers to conceptualize a standardized aircraft engine to American military aircraft. This move culminates in the famous 12-cylinder, 400-horsepower Liberty engine, of which 15,000 are ultimately manufactured.

- In Akron, Ohio, the Goodyear Tire & Rubber Company contracts with the navy to train 20 men as lighter-than-air pilots.

MILITARY: Major General John J. Pershing, designated commander of the American Expeditionary Force (AEF), sails with his staff from New York City on the SS *Baltic*. He departs ahead of his army, then still being organized from scratch.

NAVAL: The navy commences routine convoy duty in the North Atlantic by escorting the first of 911,047 troops and millions of tons of supplies and equipment to the European theater—not one ship is lost to enemy action. This move is accomplished by the newly formed Cruiser and Transport Force under Rear Admiral Albert Gleaves, although in time it resides under operational control of the larger and more experienced Royal Navy. Considering the scope and lethality of the U-boat menace to shipping, the results are impressive.

MARINES: The 5th Marine Regiment is created upon the orders of Secretary of the Navy Josephus Daniels.

May 30

AVIATION: In Chicago, Illinois, the dirigible B-1 lifts off and successfully completes a maiden flight to Akron, Ohio, at the hands of Goodrich pilot Ralph H. Upson.

June 1

NAVAL: The Supreme War Council agrees that allied shipping should be concentrated in the Atlantic region for the purposes of shipping army troops to Europe as quickly as possible. One arrived, Americans troops remain in dire need of realistic tactical training before being committed to actual combat operations.

June 2

AVIATION: The Aviation Section, Army Signal Corps, is redesignated the Airplane Division.

June 4

AVIATION: The Aircraft Production Board and the Joint Technical Board on Aircraft authorize construction of five prototypes of 8- and 12-cylinder Liberty motors. These are an exceptionally conservative design, engineering-wise, and they are expressly conceived for mass-production purposes.

MARINES: The Marine Corps commandant instructs that new commissioned officers must be drawn from the enlisted ranks, in addition to graduates of the U.S. Naval Academy. Prospective officers must also successfully pass the 90-day course at the Officer's Training Camp at Quantico, Virginia.

June 5

AVIATION: The 1st Aeronautical Detachment of Lieutenant Kenneth Whiting lands at Bordeaux and Saint-Nazaire, France, becoming the first naval aviation unit deployed to continental Europe. They arrived on the decks of the colliers *Jupiter* and *Neptune*, the first of 16,000 men and 500 aircraft to follow. Ultimately, the navy constructs 16 naval air stations in France, five in Ireland, three in England, and two in Italy.

MILITARY: By this date, as per the Army Draft Bill, 10 million young American men between the ages of 21 and 30 are registered for military service. It is a formidable pool of manpower, although only 2.8 million are actually called to the colors. However, a vocal minority of politicians and public figures insists that all military service should remain a voluntary proposition.

June 7–9

MILITARY: The 1st Infantry Division of two brigades begin assembling at Hoboken, New Jersey, in preparation for transportation overseas to France.

June 8

MILITARY: Major General John J. Pershing and his staff of 150 officers, clerks, and enlisted men arrive in England onboard the liner *SS Baltic*. These are the first American troops to arrive in Europe and they arrive under a heavy escort provided by navy destroyers.

June 9

NAVAL: Six armed yachts belonging to the U.S. Patrol Squadron sail from New York and make for Brest, France, to assist patrol and mine sweeping operations in French waters. Ultimately, the patrol force comes to encompass 38 destroyers and 16 armed yachts under the command of Rear Admiral Henry B. Wilson.

June 11

AVIATION: The armored cruiser *Seattle* dispenses with its aviation detachment, who are assigned to combat units, and stores its catapult equipment on the deck, where it will not interfere with operations at sea.

June 13

MILITARY: Major General John J. Pershing and his entourage arrive at Pas-de-Calais, France, before moving to Paris, future headquarters of the American Expeditionary Force (AEF). Concerned about the inadequate levels of training among his troops, he does not allow them to be committed to combat operations until the fall.

MARINES: The 5th Marine Regiment under Colonel Charles A. Doyen sails from New York for France, where it becomes the first marine unit to land in Europe, and is assigned to perform ground operations in concert with army troops.

June 14

AVIATION: The navy signs a construction contract to acquire its first permanent aerial patrol stations at Montauk, Rockaway, and Bay Shore, New York.

MILITARY: Major General John J. Pershing arrives in Paris, France, with the advanced detachment of his American Expeditionary Force (AEF). Through under tremendous pressure to place his command under French or British guidance, he determines to keep the AEF—with an anticipated strength of 1 million men—an independent force. This is a theme he reiterates constantly to his British and French compatriots.

- The 1st Infantry Division ships out from Hoboken, New Jersey, the first large American combat unit committed to the western front.

POLITICS: President Woodrow Wilson, using his Flag Day Speech as a platform, declares that soldiers will be transported to France as efficiently as possible and also trained there in areas secured by General John J. Pershing.

June 17

AVIATION: A joint army-navy aviation board headed by Major Raynal C. Bolling is dispatched to Europe by the Aircraft Production Board to study, evaluate, and possibly incorporate European production techniques in aircraft production at home.

June 22

AVIATION: Once ashore, men of the First Aeronautical Detachment undergo preliminary flight training in French Caudron fliers at the Military Aviation School in Tours, France. A further 50 enlisted men from the detachment end up at St. Raphael for training as mechanics.

June 23

MILITARY: The War Department authorizes recruitment of the U.S. Army Ambulance Service for direct attachment to French combat divisions already in line. The move will release thousands of French soldiers employed in this capacity for service at the battlefield. Ultimately, the unit is comprised of 184 officers, 4,858 soldiers, and 13 ambulance sections.

June 26

MILITARY: The 1st Infantry Division crosses the Atlantic and arrives in Saint-Nazaire, France, under the command of Major General William L. Sibert—the

first of nearly a million troops to follow. Their arrival has an ebullient effect on the French populace, exhausted after three years of terrible sacrifice.

June 27

MILITARY: In Washington, D.C., Secretary of War Newton D. Baker draws the first draft number under the Selective Service Act. The decision as to who actually serves in the ranks is in the hands of local draft boards.

June 30

AVIATION: Lieutenant Colonel William “Billy” Mitchell replaces Major T. F. Dodd as aviation officer of the AEF staff.

July

NAVAL: Determined to neutralize the U-boat menace, the United States suspends building capital vessels in favor of smaller ships capable of antisubmarine warfare.

July 4

AVIATION: Rantoul, Illinois, is the site of the first military airfield for training purposes. At this time, the United States, which invented the airplane, only possesses 55 obsolete aircraft. It ends the war with 16,801 combat aircraft in service, mostly obtained from France.

- In Washington, D.C., the first model of the famous 8-cylinder Liberty aircraft engine, designed and built in only 33 days by the Packard Motor Company, arrives for testing and is approved for military service.

MILITARY: In Paris, France, the 1st Infantry Division parades down the Champs Elysées before marching off to various training grounds. Colonel Charles E. Stanton, delivering a speech at the grave site of the marquis de Lafayette, America’s oldest friend and ally, loudly proclaims to the war-weary nation, “Lafayette, nous voici!” (Lafayette, we are here!).

July 5

MILITARY: The 1st Infantry Division, AEF, arrives at its training area of Gondrecourt, where it is paired up with the veteran French 47th Division to sharpen its tactical proclivities. A direct line of communications between the camp and AEF headquarters in Paris is also established under the direction of General R. M. Blatchford.

- At Gondrecourt, France, Army Camp Hospital No. 1 is founded to service men of the newly arrived 1st Division.

July 9

AVIATION: Ensign Frederick S. Allen conducts a group of 24 future naval aviators to the University of Toronto, Ontario, Canada, for flight training under the auspices of the Canadian Royal Flying Corps. They form part of a larger group of 100 men that the Canadians have agreed to train.

July 10

AVIATION: A proposed plan for training officers in the Naval Reserve Flying Corps emerges and consists of three parts: a ground school for indoctrination, a preliminary flight school covering everything up to 10 hours of solo flying, and a flight finishing school to further hone their qualifications as naval aviators. The plan is ultimately implemented, although without official sanction.

July 14

MILITARY: At Arras, France, Lieutenant Louis J. Genelba, serving with the Army Medical Corps alongside British forces, becomes the first American soldier wounded in Europe.

July 16

MILITARY: At Le Valdahon, France, Brigadier General Peyton C. March assembles the 1st Artillery Brigade and commences an intensive training routine.

July 19

MILITARY: The Signal Corps is instructed to take extensive film and photographic footage of combat operations and other military endeavors in western Europe. It ultimately takes 30,000 still pictures and shoots 350,000 feet of motion picture film. Given the primitive state of wireless communications, it also accepts responsibility for more than 15,000 carrier pigeons in the AEF trained as messengers.

July 20

MILITARY: Blindfolded army officers draw 10,500 capsules to determine the sequence that registered men are to be drafted into the armed forces—the first number being 258. The drawing itself takes place in the Senate Office building next to the Capitol.

July 23

AVIATION: Major Benjamin D. Foulois gains appointment as commander of the Airplane Division, Army Signal Corps.

- Prospective naval aviators commence ground instruction at the Massachusetts Institute of Technology (MIT), Cambridge, Massachusetts, as 43 candidates under Edward H. McKitterick arrive and enroll. Similar programs are later established at the University of Seattle, Washington, and at Dunwoody Institute, Minneapolis, Minnesota.

NAVAL: While steaming to Buenos Aires, Argentina, the cruiser *Pittsburgh* suffers a deadly casemate explosion. Lieutenant Willis Winter Bradley and Seamen Ora Graves win the Medal of Honor for saving their shipmates.

July 24

AVIATION: The Army Aviation Section receives its first large appropriation from Congress, which approves \$640 million. Consequently, aviation manpower reaches 9,023 officers and 87,083 men by 1918. Significantly, the bulk of 4,500 new military aircraft manufactured in the United States are either naval patrol craft or army trainers; virtually all combat aircraft acquired are French in origin. The majority of warplanes manufactured in America are powered by a reliable motor designed by the Packard Motor Car Company, the so-called Liberty engine, of which 15,131 are constructed by war's end. Amazingly, the first working example is designed and built in only 33 days.

- A major business obstacle to mass production of airplanes is remedied when the Manufacturers Aircraft Association is created to implement a Cross Licensing Agreement, whereby member companies could access all patents at fixed low rates.

MILITARY: In Paris, Major General John J. Pershing confers with his British counterpart, Field Marshal Douglas Haig, about Allied strategy, although insisting that the Americans remain an independent force.

July 26

AVIATION: Mass helium production in the United States commences after the Army-Navy Airship Board endorses a proposal by the Bureau of Mines to allot a grant of \$100,000 and construct a small plant to that end.

July 27

AVIATION: A British-built DeHaviland DH-4, two-seat bomber arrives in the United States as a model for production of an American version. Roughly 4,500 are manufactured stateside but only a handful enter combat operations, leaving the Americans dependant upon warplanes of European manufacture.

- North Island, San Diego, California, is officially appropriated by the army and navy for the purposes of establishing permanent training facilities; in time it emerges as one of the latter's most important air stations along the West Coast.
- Authorization is granted to construct the new Naval Aircraft Factory at the Navy Yard, Philadelphia, Pennsylvania, to develop and build machines intended for use in naval aviation.

July 28

MILITARY: The General Munitions Board is replaced by a more effective organization, the War Industries Board.

August 5

AVIATION: In Columbus, New Mexico, the 1st Aero Squadron under Major Ralph Royce prepares to transfer its personnel to training facilities in Avord, France, to continue training.

August 8

AVIATION: In Washington, D.C., the secretary of the navy approves a plan of overseas base construction to construct one training and three coastal patrol stations in France. Ultimately, 27 such bases are built and operated in France, Britain, Ireland, and Italy by war's end.

August 14

AVIATION: An aircraft piloted by Lieutenant Edward O. McDonnell conducts the first experimental torpedo drop over Huntington Bay, New York—in practice the dummy ordnance ricochetes off the water and strikes the craft, nearly downing it. Significantly, this test comes five years after Rear Admiral Bradley A. Fiske had first patented the concept.

MILITARY: The 42nd Division, the first National Guard formation to be deployed to France, begins organizing at Camp Mills, New York, under General William A. Mann—its chief of staff is Colonel Douglas A. MacArthur. This is a composite division with units from 26 states and the District of Columbia, hence its nickname "Rainbow Division."

- President Woodrow Wilson nominates 184 officers to serve as generals in Europe and dispatches the list to the U.S. Senate for confirmation. It includes 37 major generals and 147 brigadier generals.

August 18

AVIATION: The first direct, two-way communication between an army airplane and an airfield is made at Langley Field, Virginia.

August 19

MILITARY: According to figures released by the War Department, outfitting the army “doughboys” will cost the taxpayers \$156.50 per soldier. The most expensive item is the Springfield rifle, costing \$19.50 apiece; in contrast, equally valuable articles such as trench spades cost a mere 50 cent each.

August 20

COMMUNICATION: Two army aircraft flying from Langley Field, Virginia, establish the first two-way radio communication while airborne.

August 21

AVIATION: In the Baltic, a seaplane flown by Ensign Charles Hammann lands in the water to rescue Ensign George N. Lulow, who had been shot down, and returns him safely to base.

MARINES: At Philadelphia, Pennsylvania, the 7th Marine Regiment under Colonel Melville J. Shaw embarks and sails for Guantánamo, Cuba, to protect of American lives and property on the island.

August 25

AVIATION: Having passed its acceptance test with flying colors, the 12-cylinder Liberty engine is ordered into production as America’s standard aircraft engine for the war.

- In Washington, D.C., Chief Constructor David W. Taylor requests development of a large seaplane capable of flying across the Atlantic in wartime. The result is the Curtiss NC flying boat, which arrives too late to see action.

August 28

MILITARY: Colonel William H. Allaire is appointed commander of all American troops in Paris, France, with responsibility to monitor and register all American personnel under the rank of brigadier general.

September 1

MILITARY: Major General John J. Pershing transfers his AEF field headquarters from Paris, France, to Chaumont, where he occupies the French army’s old Dammont barracks.

September 2

MILITARY: American forces surge ahead into German lines. Liberating the Belgian town of Voormezele. Farther south, the city of Neuve-Église is also captured in concert with British units.

September 3

AVIATION: The significance of American aerial activities receives additional recognition after Brigadier General William L. Kenly becomes chief of air service on the AEF staff. Lieutenant Colonel William “Billy” Mitchell is also made air commander of the Zone of the Advance.

Pershing, John J. (1860–1948)

Army general

John Joseph Pershing was born in Laclede, Missouri, on September 13, 1860, a son of farmers. In 1882 he gained admission to the U.S. Military Academy and graduated four years later as cadet captain. Pershing subsequently served with the 6th Cavalry, and he participated in military actions against the Apache under Geronimo and the Sioux under Sitting Bull before serving as instructor of military tactics at the University of Nebraska (1891–95). After taking his law degree there, Pershing returned to West Point as an instructor of tactics and also fought in the Spanish-American War of 1898 as a captain. During the war, he befriended Lieutenant Colonel Theodore Roosevelt and subsequently served in the Philippine campaign against Moro rebels. Pershing enjoyed considerable success and he was personally congratulated by now President Roosevelt, who appointed him military attaché in Tokyo during the Russo-Japanese War of 1904–05. Roosevelt then took the unprecedented step of promoting Pershing several steps to brigadier general, over the heads of 862 officers with more seniority. Pershing returned to the Philippines and crushed all resistance by 1913 before returning home to serve along the troubled U.S.-Mexican border. In 1915, following the guerrilla attacks by rebel Pancho Villa, Pershing commanded a punitive expedition into Mexico to hunt down the elusive raider. His quest was aided by the first use of military aircraft in America, but the campaign ended anticlimactically a year later with Villa still at large. Nevertheless, his capable performance in this difficult

General of the Armies John J. Pershing
(Library of Congress)

task enhanced his reputation as an efficient planner and organizer.

When the United States entered World War I in 1917, President Woodrow Wilson appointed Pershing commander of the new American Expeditionary Force (AEF), and he arrived in France ahead of his troops to begin planning and training operations. As American numbers swelled he received temporary promotion to four-star general in October 1917, which gave him greater

(continues)

(continued)

leverage when dealing with Allied senior commanders. Specifically, Pershing refused to allow the AEF to be broken up and distributed as reinforcements to the war-weary French and British armies and he determined to maintain a unified American force. The doughboys were committed to combat in the spring of 1918 when they blunted a determined German offensive, and they then assumed offensive operations at Saint-Mihiel and Meuse-Argonne, slowly driving

the enemy before them. At war's end, Pershing returned home a national hero and received the rank of general of the army, a distinction previously held by George Washington in 1799. He served as army chief of staff until 1924, although his rank required him to remain on active duty for the remainder of his life. Pershing's book, *My Experiences in the World War*, also won the Pulitzer Prize in 1931. He died in Washington, D.C., on July 15, 1948, among the most accomplished American generals of his time.

September 4

AVIATION: The secretary of the navy receives the Bolling Mission report, which unequivocally states that the number one priority for naval aviation ought to be antisubmarine countermeasures, along with creation of as many patrol stations in Europe as possible for the duration of the conflict. It also recommends that the United States purchase and employ contemporary European aircraft until suitable machines are developed and deployed at home.

MILITARY: Four members of the U.S. Base Hospital No. 5, operating with British forces at Dannes-Camiers, France, are the first American servicemen killed in action when German airplanes bomb their facility.

September 5

MILITARY: The 11th Engineer Regiment sustains its first losses when two members are injured by shellfire while working on a railroad at Gouzeaucourt, France, with British forces.

September 7

AVIATION: At Pensacola, Florida, recent tests with Simon radio transmitters led to signals being received at Naval Radio Station New Orleans, Louisiana, 140 miles away. Success here leads to the purchase of an additional 300 transmitters.

- Naval aviators are ordered to wear green winter service flying uniforms, of identical cut to the summer uniform.

September 8

AVIATION: An air training and patrol base is established at the Naval Operating Base, Hampton Roads, Virginia, which is also tasked with conducting experimental work in seaplane aviation.

September 13

AVIATION: In France, the 1st Aero Squadron becomes the first aviation unit to arrive and begin training with the American Expeditionary Force (AEF).

September 16

NAVAL: The *U-61* unsuccessfully attacks the destroyer *Cassin* off Mine Head, Ireland, prompting Gunner's Mate Osmond K. Ingram to roll a depth charge over the side to destroy the attacker. He is thrown overboard instead, becoming the first American sailor killed in action; Ingram receives a posthumous Medal of Honor and the new destroyer *Ingram* is christened in his honor.

September 17

NAVAL: After the cruiser *Huntington* releases an observation kite balloon, the pilot is ensnared in the rigging and is dragged underwater; the ship's fitter, Patrick McGunigal, promptly dives overboard, cuts the ropes, and rescues him, winning a Medal of Honor.

September 18

AVIATION: The Joint Technical Board on Aircraft issues a report outlining a production program for 1,700 naval aircraft.

September 22

MILITARY: Major General Hugh L. Scott retires as army chief of staff, but he is recalled to active duty to serve as a battlefield inspector and commander of the 78th Division at Camp Dix, New Jersey.

September 23

MILITARY: Major General Tasker H. Bliss receives his fourth star to become the new army chief of staff.

September 25

AVIATION: Off the Florida coast, a navy plane crashes and Chief Machinist Mate Francis E. Ormsbee wins a Medal of Honor for attempting to save the pilot's life.

September 26

AVIATION: At Akron, Ohio, the first class of 11 lighter-than-air pilots under Lieutenant Louis H. Maxfield requests their official designation as naval aviator. They subsequently receive naval aviator numbers 94–104 and are assigned to dirigible service.

September 27

MILITARY: The 101st Field Artillery becomes the first regimental-sized National Guard unit to deploy at Coetquidan, France, as part of the 26th (New England) Division.

October 2

MILITARY: Major General Peyton C. March leaves the 1st Field Artillery Brigade to become commander of all AEF artillery in France; his replacement is Brigadier General Charles P. Summerall.

October 5

MARINES: At St. Nazaire, France, the 5th Marine Regiment comes ashore; it is destined to join the 6th Marines as the 4th Marine Brigade and to be attached to the army's 2nd Infantry Division.

October 6

AVIATION: In Washington, D.C., the secretary of war authorizes the navy to employ part of the army landing field at Anacostia, D.C., to erect and maintain a seaplane hanger.

MILITARY: General John J. Pershing is promoted to full general (four stars) once American Expeditionary Force manpower exceeds 90,000 and readily approaches combat capacity.

October 7

MILITARY: Headquarters, AEF, alerts the War Department of its projected “Priority Schedule” to ship the bulk of 1.3 million soldiers to Europe in six, corps-level phases. Each army corps is to consist of six divisions, while the last phase accounts for tank and rear area personnel.

October 9

MILITARY: Major General George T. Bartlett is appointed commander of all American forces stationed in England.

October 10

MILITARY: At Langres (Haute-Marne), France, the first AEF antiaircraft troops undergo training. Nearby facilities are also constructed to facilitate trench mortar training.

October 11

AVIATION: In the Brooklyn Navy Yard, New York, the battleship *North Carolina*, which played a major role in the development of naval aircraft, is stripped of all its catapult-launching equipment.

October 12

MILITARY: At Le Valdahon, France, Army Camp Hospital No. 12 opens with a 300-bed capacity.

October 13

AVIATION: The armored cruiser *Huntington* is stripped of all its aeronautical equipment prior to being deployed on convoy duty. The period of experimenting with aircraft on combat vessels formally ends.

October 14

AVIATION: The 1st Marine Aeronautical Company, specializing in seaplanes, is transferred from Philadelphia, Pennsylvania, to Cape May, New Jersey. Meanwhile, the First Aviation Squadron, its parent unit, relocates to the army field at Mineola, New York, to begin training with land aircraft.

October 15

MILITARY: An initial batch of African-American officers receives their officer’s commissions at Des Moines, Iowa, the first of 1,300 so honored. Ultimately, 400,000 blacks serve in the ranks throughout the war, performing with distinction when allowed to fight.

October 16

AVIATION: The Naval Aircraft Factory at Philadelphia, Pennsylvania, rolls out its first completed aircraft only 67 days following its founding.

TECHNOLOGY: At Langley Field, Virginia, new radio-telephone devices installed on two aircraft transmits and receive signals at distances of 25 miles. Signals sent to ground stations can be heard also from 45 miles away.

October 18

AVIATION: To facilitate aeronautical research and development in the rapidly changing field of military aviation, the Signals Corps assigns McCook Field in Dayton, Ohio, to serve as its new testing center.

MILITARY: The new Transport Service under General William F. Atterbury is created as a department under the commander, Services of Supply. It is tasked with controlling and coordinating all canals, ports, and railroads associated with the AEF war effort.

October 21

AVIATION: At Buffalo, New York, a new 12-cylinder Liberty engine makes its successful debut by powering a Curtiss HS-1 flying boat. The engine is eventually adopted for use in both army and navy aircraft.

MILITARY: The 1st Division assumes advanced positions in the vicinity of Lun  ville (Nancy), France, which the youthful soldiers promptly dub “Looneyville.” Due to their overall inexperience as combat troops, each American unit is attached to a more seasoned French division in line.

October 23

MILITARY: Sergeant Alex Arch, Battery C, 6th Field Artillery, fires the first American artillery shells of the war at German lines near Sommervillier, Lorraine, France (the Swiss border). The unit is equipped with rapid-fire French 75mm cannon.

MARINES: In France, the 5th and 6th Marines are grouped together into the 4th Marine Brigade under newly promoted brigadier general Charles A. Doyen; they are joined shortly afterward by the 6th Machine Gun Battalion.

October 24

AVIATION: In France, the First Aeronautic Detachment is reorganized and redesignated as the U.S. Naval Aviation Force, Foreign Service, under Captain Hutch I. Cone, who ultimately commands all naval aviation forces in Europe.

- Naval Air Station Moutchic, France, commences routine flight and ground instruction through which all naval air units in Europe will pass through.

October 24–25

MILITARY: After Italian forces suffer a humiliating defeat at the hands of Austro-German forces at Caporetto, Italy, Allied forces are required to siphon off valuable troops from France to reinforce them. General John J. Pershing is also pressured to provide manpower to fill in gaps along the western front, although he continues to insist that the AEF remain an independent army.

October 26

MILITARY: At Borumont, France, the 2nd Division begins taking shape under the leadership of Major General Omar Bundy. This is a unique formation in that it consists of a brigade of army soldiers and another of marines.

October 29

AVIATION: At McCook Field, Ohio, the first American-manufactured DeHaviland DH-4 bomber goes aloft with test pilot Howard Rinehart at the controls. It is the first of several thousand to be manufactured during the war years, although only a handful actually see combat.

October 30

MILITARY: Secretary of War Newton D. Baker, apprehensive over a possible shortage of electricity in heavily industrialized regions such as western New York, asks engineers to act judiciously on the newly created Power Section of the civilian War Industries Board.

October 31

MILITARY: The 26th ("Yankee") Division under General Clarence Edwards arrives for duty at Neufchateau, France, arriving ahead of the 42nd ("Rainbow") Division. It boasts a complement of 28,000 men—roughly twice the size of worn-out British, French, or German divisions.

November 2

AVIATION: At Buffalo, New York, the 12 men of the Second Yale Detachment, who received pilot training at their own expense, are declared ensigns in the U.S. Navy Reserve Force, as well as naval aviators.

November 2–3

MILITARY: A German nighttime trench raid at Bathelemont, along the Rhine-Marne Canal, results in the deaths of three American soldiers from Company F, 16th Infantry, 1st Division, along with five wounded and 12 captured. The slain are Corporal James Gresham and Privates Merle Hay and Thomas Enright. However, the defenders resist fiercely and several of the raiders are also killed or taken in this sharp little action.

November 3

MARINES: At Philadelphia, Pennsylvania, the 1st Marine Regiment under Colonel Thomas C. Treadwell embarks on the vessel *Hancock* and sails for Cuba to protect American lives and property there.

November 5

AVIATION: In Washington, D.C., Captain Noble E. Irwin, officer in charge of aviation, requests that representatives from each bureau meet in his office every week to discuss matters and developments affecting naval aviation.

NAVAL: German U-boat *UC-71* torpedoes and sinks the motor patrol yacht *Alcedo*, with a loss of 22 men, off the French coast; it is the first U.S. Navy vessel lost in this war.

- Seaman Tedford H. Cann uncovers a leak in a flooded compartment onboard the steam yacht *May*; in risking his life to close it he wins a Medal of Honor.

November 7

AVIATION: Eugene J. Bullard becomes the first African-American pilot to shoot down a German aircraft in World War I. Due to the intense racism he encountered in America, Bullard joined the French army and subsequently flew with a French squadron.

November 9

AVIATION: At Pensacola, Florida, three Argentine naval officers, recently qualified as naval aviators, are employed at the ground school as instructors.

November 10

AVIATION: At Sperry Flying Field, Copiague, Long Island, New York, a Curtiss "Flying Bomb" is delivered for testing. This specially designed aircraft packs 1,000 pounds of explosives and has a range of 50 miles and a top speed of 90 miles per hour. Though never adopted into the service, it is a precursor of modern guided missiles.

November 14

AVIATION: In Washington, D.C., Secretary of War Newton D. Baker grants priority to the navy's efforts to develop seaplane and seaplane bases for the war effort. Such empathy proves a boon for the navy's aircraft production program.

November 15

AVIATION: NACA establishes a Committee on Light Alloys in an effort to spur the production and use of light metal alloys in aircraft production; Naval Constructor Jerome C. Hunsaker is appointed a member.

November 17

NAVAL: The destroyers *Fanning* under Lieutenant Arthur S. Carpender and *Nicholson* under Commander Frank D. Berrien spot a German submarine stalking the coast of Ireland, roll depth charges, and sink *U-58* after rescuing the crew. This is the only enemy craft sunk by American warships during World War I.

November 18

AVIATION: Naval pilots under Lieutenant William M. Corry conduct their first flying boat patrols of the war by operating out of Naval Air Station Le Croisic, France, at the mouth of the Loire River; they are flying French-built Tellier seaplanes.

November 19

NAVAL: The British merchant vessel *Rose* accidentally rams and sinks the American destroyer *Chauncey* 110 miles off Gibraltar, killing 21 crew members, including Commander Walter E. Reno.

November 20–December 4

MILITARY: The 11th, 12th, and 14th Engineers accompany a major British offensive in the Cambrai sector, putting down railway tracks and sustaining casualties. This is the first offensive in which American troops are committed to combat operations and "Cambrai" also becomes the first campaign streamer of the war.

November 21

AVIATION: In a preview of things to come, the navy demonstrates a Curtiss-built N-9 "aerial torpedo" (flying bomb) at Amityville, New York. In attendance are Major General George O. Squier, chief signal officer, who begins pushing for a parallel program within the army.

November 22–24

AVIATION: The first armed patrol by a navy-piloted seaplane ends in near disaster when it is forced down by mechanical malfunctions and drifts for two days. The crew is rescued by a French destroyer.

November 24

AVIATION: The chief of naval operations points out that current aircraft cannot carry a maximum load of more than 600 pounds, so that any torpedoes developed with this restriction in mind would prove insufficient to seriously damage a modern, armored warship.

November 25

MARINES: Marine detachments accompany the battleship divisions sent to reinforce the Royal Navy in British waters.

November 27

AVIATION: Newly promoted brigadier general Benjamin D. Foulois replaces Brigadier General William Kenly as AEF chief of the air service under General John J. Pershing.

November 28

MILITARY: The General Staff College is founded at Langres, France, for the benefit of field-grade officers. The First Army Tank School also is established there under Major George S. Patton.

November 30

MILITARY: Advanced echelons of the 42nd Infantry Division ("Rainbow"), formed from National Guard units of various states, begins arriving in French ports.

December 1

AVIATION: Naval Air Station Pauillac, France is upgraded to become an active assembly-and-repair station for all remaining naval air stations in the theater.

December 4

NAVAL: The submarine *E-1* (formerly *Skipjack*) departs Newport, Rhode Island, becoming the first such craft to cross the Atlantic Ocean under its own power. It patrols the waters between Ponta and Delgada in the Azores to deny their ports to German U-boats.

December 5

AVIATION: The Joint Technical Board on Aircraft strongly suggest increased expenditures in the field of helicopter development, but the secretaries of war and the navy offer only moral support to the project until the new technology has demonstrated meaningful military value.

December 6

NAVAL: German submarine *U-53* torpedoes and sinks the destroyer *Jacob Jones* off the Isles of Scilly, which sinks in only eight minutes. Only 38 of the 108-man crew survive, although the Germans subsequently radio the Americans at Queens-town (Cobh), Ireland, of the location of the sinking.

December 7

AVIATION: The secretary of the navy authorizes the Curtiss Company to begin development of its HA or "Dunkirk Fighter," a single pontoon seaplane sporting two forward-firing machine guns with another pair on a flexible mount in the rear cockpit. This is also the origin of fighter-type aircraft in the navy.

- The Naval Aeronautical Station, Pensacola, Florida, is officially redesignated a Naval Air Station (NAS).

MILITARY: With Colonel Douglas A. MacArthur as its chief of staff, the bulk of the 42nd “Rainbow” Division lands safely in France as part of the ever-expanding AEF.

NAVAL: Rear Admiral Hugh Rodman conducts Battleship Division Nine, consisting of the *Delaware*, *Florida*, *New York*, *Texas*, and *Wyoming* to Scapa Flow in northern Scotland. There they join the British Grand Fleet at anchor as the Sixth Battle Squadron.

December 12

MILITARY: The largely African-American 93rd Division is transferred from Camp Stuart, Virginia, to Hoboken, New Jersey, for shipment to the western front. However, black soldiers receive a low priority in terms of equipment and training, so many are armed and outfitted with equipment provided by France.

December 14

MILITARY: Major General Robert Lee Bullard, known as an aggressive leader, assumes command of the 1st Infantry Division in France.

December 15

AVIATION: The Aeronautic Detachment is established at Philadelphia, Pennsylvania, by Captain Roy Geiger.

December 17

NAVAL: Submarine *F-1* collides with its stablemate *F-3* and sinks off San Pedro, California, killing 19 sailors.

- During a heavy storm in the Bay of Biscay, Boatswain’s Mate John Mackenzie of the motor patrol boat *Remlik* secures a loose depth charge by hand and holds it until it can be discharged overboard; he wins the Medal of Honor.

December 22

AVIATION: An Aerography School begins instruction at the Massachusetts Institute of Technology, Cambridge, Massachusetts, although a major portion of the curriculum unfolds at the Blue Hill Observatory, Harvard University. By war’s end, no less than 55 men have passed through the program.

December 25

MARINES: The newly created 9th Marine Regiment disembarks at Guantánamo, Cuba, to help stop rebels who are destroying American property.

December 26

MILITARY: To facilitate the smooth transfer of thousands of troops and ton of equipment overseas, President Woodrow Wilson places all American railroads under government control for the duration of the war.

December 27

NAVAL: A German torpedo slices into the converted yacht *Santee* off Queens-town, Ireland, although it limps back into port with no casualties.

December 28

MARINES: The newly raised 1st Machine Gun Battalion arrives in France and is posted with the 4th Marine Brigade.

December 31

AVIATION: The First Aviation Squadron, Marine Corps, under Captain William M. McIlvain, is transferred from Mineola, New York, to Lake Charles, Louisiana, for additional instruction with land planes.

MILITARY: American manpower along the western front is reported at 174,664 officers and men, although very few of the troops have as yet undergone real combat experience. AEF headquarters, meanwhile, has mushroomed to 547 officers, 229 field clerks, 3,471 enlisted men, and 22 interpreters.

- To facilitate creation of a II Corps, General John J. Pershing reaches an agreement with British authorities to transfer six divisions in British ships to France, where they are to be temporarily broken up and assigned with British formations for training purposes.
- The War Department creates the new Purchase, Storage and Traffic Division under Major General George W. Goethals, noted for his previous work on the Panama Canal.

1918**January–March**

MILITARY: As they acquire combat proficiency, the 2nd, 26th, and 42nd Divisions begin deploying in front-line trenches at various sectors along the western front, relieving exhausted French formations and also providing some support to British units in the field.

January 1

AVIATION: Naval Air Station, Hampton Roads, Virginia, is the new home for the Experimental and Test Department formerly located at Pensacola, Florida. This move places the facility much closer to manufacturing and industrial areas.

January 3

NAVAL: Commander Charles Belknap gains appointment to lead the newly established Naval Overseas Transport Service (NOTS), which is tasked with orchestrating the shipment of American military supplies to Europe. The force ultimately consists of 850 transport vessels, of which only eight will be lost in combat.

January 7

MILITARY: In Washington, D.C., the U.S. Supreme Court upholds the Selective Draft Law, rejecting an argument that it violates the Thirteenth Amendment by creating “involuntary servitude.”

January 8

DIPLOMACY: Before U.S. forces are committed to full-scale military operations, President Woodrow Wilson enunciates his “Fourteen Points” for an equitable postwar settlement in Europe, which includes creation of a League of Nations. Reaction to his forward-looking ideas is less than enthusiastic from some of his revenge-seeking Allies. “Mr. Wilson bores me with his Fourteen Points,” French prime minister Georges Clemenceau remarked, “Why, God Almighty has only ten!”

January 9

MILITARY: The 93rd Division, consisting of all African-American National Guard regiments, is assigned directly to the French army to alleviate a growing manpower crisis. Here blacks receive a measure of respect and camaraderie conspicuously lacking from their white American counterparts.

- In what is the final armed encounter between the army and Native Americans, soldiers from the 10th Cavalry trade shots with a small band of Yaqui Apache from Mexico, who have crossed over into Atacosa Canyon, Arizona. No casualties result and the transgressors are arrested and sent to jail for 30 days.

January 13

MILITARY: AEF Line of Communications headquarters moves from Paris, France, to Tours—and closer to the western front.

January 15

MILITARY: The new U.S. Army I Corps is formed at Neufchâteau, France, to expedite the entry of American forces into combat.

January 17

MILITARY: Blois (Loir-et-Cher), France, becomes a central distribution point for all unassigned officers arriving from the United States. Furthermore, any officer failing to measure up to the high standards set by the AEF are sent here for “reclassification” and reassignment elsewhere.

January 19

MEDICAL: Major William H. Wilmer is appointed director of the new U.S. School of Aviation Medicine at Hazelhurst Field, Mineola, New York. Besides training medical personnel, he is also tasked with developing one of the earliest pressure chambers to simulate high-altitude flight conditions.

January 20

AVIATION: At Neufchâteau, France, Colonel William “Billy” Mitchell is appointed chief of air service, I Corps.

MILITARY: Major General Hunter S. Liggett is ordered up from the 41st Replacement Division to take command of the new I Corps. The American are girding themselves for a more active combat role.

January 21

AVIATION: At Ponta Delgada, São Miguel Island, Azores, the 12 seaplanes and six flying boats of the 1st Marine Aeronautical Company commence flying antisubmarine patrols under Captain Francis T. Evans. This is the first marine aerial unit to serve in the European war zone and it was outfitted only on January 9.

January 26

MILITARY: The U.S. Army Tank Corps is created under Brigadier General Samuel D. Rockenbach; as examples of modern military technology, tanks are still in their infancy and the majority of machines operated by the Americans are French in origin. By war’s end they are in 91 separate engagements.

February 1

AVIATION: The U.S. Army Air Service forms its first operational squadrons in France, where they are equipped largely with French-built fighters, bombers, and

observation craft. By war's end, no less than 45 combat squadrons are present, representing 800 pilots and 500 observer/tail gunners.

MILITARY: Colonel George S. Patton is tasked with drawing up the army's first regulations for drilling tanks.

February 3

AVIATION: At Camp Taliaferro, Fort Worth, Texas, aerial gunnery sessions for naval aviators commence under the watchful eyes of Canadian Royal Flying Corps instructors.

February 5

AVIATION: Lieutenant Stephen W. Thompson of the 1st Aero Squadron shoots down a German Albatros D.III fighter over Saarbrücken, Germany, scoring the first American victory over an enemy aircraft. He is serving as a tail gunner in a French aircraft.

- Captain Alfred Cunningham, U.S.M.C., prevails upon the navy's General Board to create a bombing group of land-based aircraft to attack German submarine pens located in Belgium.

MILITARY: The 26th (Yankee) Division takes its assigned position in the Chemin des Dames sector, France, to assist the French Sixth Army. It is here that the 101st Infantry becomes the first National Guard unit to experience combat in the trenches.

February 6

NAVAL: The passenger ship *Tuscania*, carrying 2,179 men from the 32nd Division (Michigan and Wisconsin National Guard), is torpedoed by German submarine *U-77* and sunk at sea. This is the first American troopship sunk in the war by hostile fire and 267 men are killed.

February 7

AVIATION: To standardize instrumentation between army and navy aircraft, the Joint Army/Navy Technical Board is created.

February 8

AVIATION: The U.S. Navy updates its national insignia regulations by dispensing with the previous white star with concentric red and blue circles around white.

MILITARY: General John J. Pershing authorizes a service newspaper named *Stars and Stripes* to be published by and for the troops weekly: 71 issues are issued from Paris before the war ends.

February 12

MILITARY: The U.S. Army begins the practice of assigning serial numbers to enlisted personnel; officers do not receive them until 1921. After 1970 Social Security numbers are used instead.

NAVAL: The first keel is laid at Hog Island Shipyard, Philadelphia, for transports acquired through the Emergency Fleet Corporation.

February 15

AVIATION: Noted dancer Vernon Castle dies in an airplane accident while undergoing military training at Fort Worth, Texas.

February 16

AVIATION: The 2nd Balloon Company is deployed at Royamieux in the Toul sector of the western front; though little-heralded, the Balloon Section makes 5,866 ascents (6,832 hours in the air) during the war for reconnaissance and artillery spotting purposes.

- Major J. T. McNarney's 89th Aero Squadron arrives at Chantillon-sur-Seine, France, for the purpose of instructing aerial observers.

MILITARY: After several weeks in the trenches, American soldiers on leave in Aix-les-Bains are serenaded by the band from the African-American 369th Infantry, the "Harlem Hellfighters."

February 18

AVIATION: The 95th Aero Squadron is the first American fighter formation deployed in France, although the first combat patrols do not commence for another month.

- The famed Lafayette Escadrille is disbanded by France so that its 90 veteran pilots may be inducted directly into the Army Air Service with the 103rd Aero Squadron. It is one of the first American units equipped with French Spad XIII fighters, a distinct improvement over the rickety Nieuport 28s.

February 21

AVIATION: Naval Air Station, Bolsena, Italy, is founded under Ensign William B. Atwater; it is the first of two such facilities established in Italy and serves primarily as a training facility.

February 22

AVIATION: In Washington, D.C., the director of naval communications requests that five naval air stations along the eastern seaboard, plus those at San Diego, California, and Coco Solo, Panama, be fitted with modern wireless transmitters and receivers so as to permit pilots on patrol to communicate with their home base.

- Lieutenant Paul J. Peyton founds Naval Air Station, Queenstown, Ireland, as an assembly and repair depot.

February 23

AVIATION: At Toul, France, the 2nd Balloon Company becomes the first unit of its kind to deploy in the field. It is later joined by 35 other such companies.

February 25

MARINES: Major General Barnett gains reappointment as Marine Corps commandant.

February 26

AVIATION: In light of the impact of meteorology on aerial operations, the chief of naval operations draws up an allowance list for aerographic equipment to be deployed at naval air stations abroad.

MILITARY: American troops receive a rather rude introduction in the use of chemical warfare when they encounter German phosgene and chloropicrin gas for the first time. High casualties are reported.

February 28

AVIATION: In Washington, D.C., President Woodrow Wilson decrees that private flying is prohibited over the United States, all territorial waters, and its overseas possessions without a special permit issued by the Joint Army and Navy Board on Aeronautics. The ban takes effect in 30 days.

March 1

AVIATION: Naval Air Station, Paimboeuf, France, is established by Lieutenant Commander Louis H. Maxfield; it functions as a dirigible station.

March 3

AVIATION: At NAS Paimboeuf, France, Naval Aviators first go aloft in a borrowed AT-1 dirigible, the first of 12 such vehicles lent to the navy.

March 4

AVIATION: The 94th Aero Squadron deploys in France, becoming only the second such unit to do so.

NAVAL: The collier *Cyclops* under Lieutenant Commander George W. Worley hoists anchor at Barbados in the West Indies and sails off, only to disappear without a trace. The fate of its 280 officers and men remains unknown.

March 5

AVIATION: In the Toul sector, France, the 2nd Balloon Company becomes the first American aerial unit deployed with the I Corps under combat conditions.

March 6

AVIATION: In Washington, D.C., the Bureau of Navigation revises its instrument allowances for naval aircraft. Henceforth, a compass, two altimeters, and a clock will be carried by seaplanes and flying boats while dirigibles and balloons will carry a compass, altimeter, clock, and stratoscope.

- At Copiague, Long Island, New York, inventors Elmer and Lawrence successfully test their "Flying Bomb," a Curtiss N-9, a seaplane launched from the roof of an automobile that then flies 1,000 yards until the engine automatically shuts off.

MILITARY: President Woodrow Wilson announces four new military decorations, namely, the Distinguished Service Cross, the Distinguished Service Medal, war service chevrons, and wound chevrons.

March 7

AVIATION: In Washington, D.C., the Office of the Chief of Naval Operations establishes the Office of the Director of Naval Aviation while the Aviation Section is now a division.

March 8

AVIATION: At Mineola, New York, an early pressure chamber successfully simulates conditions found at 34,000 feet for the first time.

March 9

AVIATION: The navy upgrades its training program for naval aviators, seaplanes, by offering elementary, advanced, and advanced specialization courses.

March 11

AVIATION: Lieutenant Paul Baer of the 103rd Aero Squadron (formerly the Lafayette Escadrille) is the first American pilot to win the Distinguished Service Cross for single-handedly tackling seven German fighters, downing one.

African Americans have made important contributions to all U.S. wars. This photograph shows members of an African-American regiment on leave in France during World War I. (*National Archives*)

March 12

AVIATION: Captain Phelps Collins becomes the first Air Service pilot killed when his Spad XIII fighter crashes following a high altitude dive.

MILITARY: The African-American 369th Infantry of Colonel William Hayward, renowned as the “Harlem Hellfighters,” is assigned to the French 16th Division at Givry-en-Argonne, France, and fights alongside them.

March 13

MILITARY: The 2nd Division is transferred to the Sommedieu sector near Verdun, France, to begin service with the French X Corps.

March 15

AVIATION: American pilots flying Nieuport 28 fighters conduct their first independent patrols of the western front over Villeneuve-les-Vertus, south of Épernay, France.

- In Washington, D.C., the Bureau of Construction and Repair decrees that all new naval aircraft will be painted in low visibility gray enamel.

March 16

MILITARY: The newly arrived 3rd Division under Major General Joseph T. Dickman arrives at the 9th Training Area, Châteauvillain, France, to hone its skills before being committed to combat.

March 17

MARINES: The first marine unit to occupy front-line trenches is the 2nd Battalion, 5th Marines, which deploys just south of Verdun. They are joined just days later by the remainder of the 4th Marine Brigade.

March 19

AVIATION: The 94th Aero Squadron (“Hat-in-the-Ring”) is the first American aerial unit to operate over enemy lines.

- The commander, Naval Aviation Force, Foreign Service distributes a circular letter calling for the training and recruitment of Air Intelligence Officers.
- Ensign Stephen Potter, flying long-range patrol missions with the Royal Flying Corps, becomes the first naval aviator to shoot down an enemy seaplane near the island of Heligoland in the North Sea. On April 25 Potter dies in a fight with seven enemy seaplanes off Felixstowe, England.

NAVAL: Off the Irish coast, the destroyer *Manley* under Commander Robert L. Berry accidentally rolls into the British auxiliary cruiser HMS *Motagua*, which detonates several depth charges stored above deck. The *Manley* loses 56 crewmen but manages to limp into port with the rear third of its hull still under water.

March 21

AVIATION: At Port Washington, Long Island, New York, the Curtiss HA seaplane (“Dunkirk fighter”) successfully makes its maiden flight.

March 21–April 6

MILITARY: Field Marshal Paul von Hindenburg, determined to defeat the Western Allies before they can be strengthened by American reinforcements, unleashes his famous *Kaiserschlacht* across the western front. The Germans come equipped with new infiltration tactics, which drive the British and French back to within 40 miles of Paris. Despite the untried nature of his 335,000 soldiers, General John J. Pershing offers to commit them to battle to help stem the German onslaught.

- Elements of the 6th Engineers, attached to British units along the Somme River near Péronne, France, are engaged in resisting the German offensive, which penetrates 37 miles. They nonetheless hold their position at Warfusee-Abancourt until relieved. They lose 78 men, including 25 killed.

March 22

MILITARY: The AEF begins training the U.S. Army Tank Corps at Bourg, France, with Renault machines provided by France. Brigadier General Samuel D. Rockenbach remains in overall command.

March 23

MILITARY: As an indication of recent German success, heavy artillery shells from the mammoth cannon “Big Bertha” begin striking suburbs of Paris from a distance of 75 miles away.

- The newly formed U.S. Army II Corps is assembled and deployed in the Pas-de-Calais Region, France, within the British 1st Army area. No commanding general is assigned at this time and the troops continue with their training activities.

March 25

AVIATION: Ensign John F. McNamara, flying out of NAS Portland, England, conducts the navy's first aerial attack by bombing a U-boat off the coast of England. He is commended by Vice Admiral William S. Sims for his efforts.

March 26

AVIATION: Colonel Raynall C. Bolling is killed on a ground reconnaissance mission, becoming the highest ranking fatality of the war thus far. Because he formerly commanded New York's 1st Aero Squadron, Bolling Air Field, Washington, D.C., is named in his honor.

March 27

AVIATION: At the Navy Yard, Philadelphia, Pennsylvania, the navy rolls out its first H-16 flying boat, the first airplane constructed at the Naval Aircraft Factory. It carries a crew of five and is armed with five machine guns and two 230-pound bombs.

March 30

AVIATION: The Navy Department orders the Curtiss 18-T fighter from the Curtiss Engineering Corporation. This is a two-seater, single-engine triplane armed with two fixed, forward-firing machine guns and two flexible guns operated by the rear gunner.

March 31

MILITARY: The 26th (Yankee) Division is rushed forward to the Toul sector, France, where it relieves the 1st Division and assorted French units.

April 1

AVIATION: In Rome, Italy, an arrangement is made for Italian pilots to train their American counterparts at the new American Aviation Headquarters.

- An important aviation development occurs when the independent Royal Air Force is created by combining the Royal Air Corps with the Royal Naval Air Service. The U.S. Air Force must wait until 1947 to reach similar status.

April 3

MILITARY: A momentous conference gets under way at Beauvais, France. To help cope with the developing crisis, Marshal Ferdinand Foch is appointed supreme Allied commander along the Western Front, and he is granted responsibility for coordinating movements across a broad front. Within days his authority is extended over French, British, and American forces.

- By this date, American forces garrisoning the Ansauville sector near Saint-Mihiel have sustained 549 casualties, principally to German gas attacks and trench raids.

April 5

MILITARY: Renewed German offensives have split French and British armies and advanced to within 10 miles of the main British depot at Amiens. American forces are gradually becoming involved in prolonged ground actions, although many more are needed to stabilize the front and rebuff the attackers.

April 8

AVIATION: The 1st Aero Squadron, which is assigned observation duties, becomes the first air squadron committed to combat operations along the western front.

Their first combat occurs four days later when they are attacked while on routine reconnaissance patrols.

April 9–27

MILITARY: Continuing German pressure along the Lys River forces the British to abandon Ypres while the French withdraw to Reims. The only American units involved in the fighting are some engineering, medical, and air service squadrons. As a final German push begins toward Paris, the Allies anxiously wait for the first combat deployment of General John J. Pershing's troops to threatened sectors.

April 10

MILITARY: Troops from the 32nd Division are utilized as a replacement source for the 41st Division, which is then advanced into the combat zone.

April 11

NAVAL: German submarine *UB-73* torpedoes and sinks the NOTS cargo ship *Lake Moor* off Corsewell Light, Scotland, the first of eight vessels sunk by enemy action; 46 lives are lost.

April 13

MARINES: Near Verdun, France, the 74th Company, 6th Marines, suffers the 4th Brigade's first substantial losses when their position is struck by mustard gas shells; 300 casualties are reported, including 40 dead.

April 14

AVIATION: Lieutenants Alan F. Winslow and Douglas Campbell of the 94th Squadron, 1st Pursuit Group, become the first army combat pilots to shoot down German aircraft over the Toul airdrome, France. At the time they are flying French-built Nieuport 28s.

- Captain Edward V. Rickenbacker, soon to become America's highest-scoring "ace of aces" of this war, completes his first combat mission over France.

MILITARY: Having been made supreme commander to stave off impending defeat, Marshal Ferdinand Foch specifically requests President Woodrow Wilson, who had agreed to his appointment, to transfer more troops to the western front as soon as possible. However, General John J. Pershing determines to keep the American Expeditionary Force fighting as a single entity and not parceled out to plug gaps in Allied lines.

April 15

AVIATION: At Miami Naval Air Station, Florida, the First Marine Aviation Squadron is expanded into the First Marine Aviation Force of four squadrons (A, B, C, and D) under Major Alfred A. Cunningham.

April 16

AVIATION: The first detachment of trained aerologists, comprising nine officers and 15 enlisted men, are dispatched to various naval air stations in Europe.

April 17

NAVAL: After the munitions vessel *Florence H.* endures an internal explosion in Quiberon Bay, France, Ship's Cook Jesse Whitfield and Quartermaster Frank Monroe Upton, serving on the nearby destroyer *Stewart*, dive overboard to rescue a drowning man; both receive Medals of Honor.

April 18

MILITARY: In Washington, D.C., President Woodrow Wilson appoints the National War Labor Board, which is tasked with promoting mediation in labor disputes for the purpose of keeping the war effort moving smoothly along.

April 20–21

MILITARY: At Saint-Mihiel, Lorraine, France, men of the 26th Division receive their baptism of fire when German artillery starts suddenly raining upon them. A German infantry attack subsequently secures the village of Seicheprey, which is retaken by a counterattack that afternoon. On the following day, the Americans advance into the adjoining woods in force, driving the Germans back. They suffer 634 casualties and 136 prisoners; the Germans leave behind 160 bodies.

April 23

AVIATION: At Naval Air Station, Pauillac, France, the first shipment of Liberty engines arrives. The base in question serves as an assembly and repair station.

NAVAL: Lieutenant Commander Alexander Gordon Lyle, a navy dentist serving with the 5th Marine Regiment in France, rescues a wounded corporal under heavy fire, saves his life by administering surgical aid, and wins the Medal of Honor.

April 27

AVIATION: Airship AT-1 under Lieutenant Frederick P. Culbert completes a 25-hour aerial patrol out of NAS Paimboeuf, France, and escorts three convoys through a mine zone. This is the longest mission ever performed by an airship of this type and Culbert is commended by the French minister of marine.

April 29

AVIATION: Captain Edward V. Rickenbacker helps shoot down a German Albatros scout craft over Toul, France, the first of 26 victories. A former race car driver, he first arrived in France as General John J. Pershing's chauffeur, but he volunteered for combat and ultimately wins the Medal of Honor.

April 30

AVIATION: In Washington, D.C., the secretary of the navy approves a proposal set forth by the General Board and U.S. Naval Forces in Europe to create a specially organized unit for air operations against German U-boat pens in the Dunkirk-Zeebrugge region. This force comes to be known as the Northern Bombing Group.

May 1

MILITARY: At an Allied Supreme War Council meeting held at Abbeville, France, General John J. Pershing continues to strenuously resist all attempts by British and French leaders to amalgamate his soldiers into their armies. He insists that the American Expeditionary Force (AEF) be maintained as an independent entity.

May 3–4

MILITARY: German mustard gas shells surprise the 18th Infantry at Villers-Tournelles, France, inflicting 900 casualties.

May 5

AVIATION: At Toul, France, the 94th and 95th Aero Squadrons become jointly administered as the 1st Pursuit Group; it survives today as part of the 1st Fighter Wing, the U.S. Air Force's senior group.

May 6

AVIATION: Naval Air Station Coco Solo, Panama, is created under Lieutenant Ralph G. Pennoyer to patrol the seaward approaches to the strategic Panama Canal.

May 7

MARINES: General John J. Pershing appoints U.S. Army brigadier general James G. Harbord to take command of the 4th Marine Brigade; previously Harbord served as the AEF chief of staff.

May 8

NAVAL: In the Mediterranean, Lieutenant Commander Richard P. McCullough of the armed yacht *Lydonia* cooperates with the British destroyer *Basilisk* to sink German submarine *UB-70*.

May 11

AVIATION: The first Liberty engine-powered DeHaviland DH-4 bombers, built in America, arrive in France. Only a handful of these craft achieve operational status and most are retained for training purposes.

May 12

NAVAL: Six 100-foot long, high-speed, wooden U.S. Navy subchasers, part of what becomes known as the "Splinter Fleet," arrive in Great Britain. Of 121 such vessels committed to combat, only two are lost to mines.

May 15–16

AVIATION: Airmail service debuts between New York City, Washington, D.C., and Philadelphia with Army lieutenants George L. Boyle and H. P. Culver flying rickety Curtiss JN-4H "Jenny" biplanes. When Boyle crashes in Maryland, Culver lands to retrieve the mail and continues on to New York.

- The Bureau of Steam Engineering announces excellent inflight results with the Marconi SE 1100 radio transmitter, which makes voice communications possible at distances of 50 miles and code communications up to 120 miles. This becomes the first tube set radio installed in naval aircraft, such as the H-16 flying boat.

May 18

AVIATION: The 96th Squadron becomes the first bomber unit organized by the American Expeditionary Force at Amanty Airdrome, France. There they begin familiarizing themselves with the excellent Breguet 14 bombers purchased for them from the French.

- The chief of naval operations orders no less than eight training squadrons to be established, with two at Key West, Florida, four at Miami, Florida, and two at Bay Shore, New York. Moreover, six advanced training squadrons are to be assembled at Pensacola, Florida, as soon as possible, with instruction in patrolling and night bombing.

May 19

AVIATION: Captain Raoul F. Lufbery, a naturalized American citizen and famed fighter pilot of the Lafayette Escadrille, dies in combat flying for the AEF. His final tally is 17 German aircraft.

MILITARY: Major General Tasker H. Bliss departs the post of Army Chief of Staff and is reassigned as War Department representative to the Supreme War Council at Versailles, France.

May 20

AVIATION: In Washington, D.C., two new War Department bureaus are created: the Division of Military Aeronautics under Major General William L. Kenly and the Bureau of Aircraft Production under John D. Ryan. The move also results in the Air Service being separated from the Army Signal Corps.

MILITARY: Major General Peyton C. March is promoted to full general, relieved of duties as chief of artillery in Europe, and reassigned as army chief of staff in Washington, D.C.

NAVAL: The battleship *New Mexico*, the first capital warship driven by electric power, is officially commissioned at the New York Navy Yard. This vessel is 624 feet long and displaces 32,000 tons.

May 21

AVIATION: In a major development, the Division of Military Aeronautics is separated from the Army Signal Corps and placed as a separate division under the secretary of war's office. It is initially commanded by Major General William L. Kenly.

NAVAL: German submarine *UC-58* torpedoes and sinks the Naval Overseas Transportation Service tanker *William Rockefeller* off the coast of Scotland, killing three crewmen.

- Ensign Daniel Augustus Joseph Sullivan, while serving on board the converted yacht *Christabel*, single-handedly secures depth charges scattered around the deck by a depth-charge detonation, winning the Medal of Honor.

May 24

AVIATION: In Washington, D.C., the Army Air Service is formally established after the Division of Military Aeronautics and Bureau of Aircraft Productions are merged.

- The first contingent of American-built HS-1 flying boats arrives at Pauillac, France, onboard the vessels *Houston* and *Lake Placid*.

NAVAL: The cruiser *Olympia* under Captain Bion B. Bierer arrives off the Russian port of Murmansk, where it sends ashore a landing party as part of the Anglo-American occupation force intended to keep a large stockpile of war materiel from falling into the hands of Bolsheviks.

May 25

NAVAL: German U-boats begin infesting American coastal waters off Cape Charles, Virginia. German submarine *U-151* manages to attack and damage three small schooners, but little else is accomplished by such raids.

May 27–29

MILITARY: The successful German offensive rolls on when their units cross the Aisne River, seize Soissons, and directly threaten Paris by pressing on to the Marne River. The French government considers relocating to Bordeaux for its

safety while the AEF's 2nd and 3rd Divisions are placed on alert in case French reinforcements cannot halt them.

May 28

MILITARY: General Robert Lee Bullard's 1st Division receives its baptism of fire by launching a determined attack against German positions at Cantigny, France, spearheaded by Colonel Hanson E. Ely's 28th Infantry. The green but enthusiastic Americans drive elements of the German 82nd Reserve Division from the town, then hold it against repeated counterattacks. At a cost of 1,067 casualties, the "doughboys" inflict over 1,600 on their more veteran adversaries, including 225 captured. Moreover, the neophytes prove themselves full of fight and eagerly come to grips with the enemy.

May 29

AVIATION: Command of the Air Service, American Expeditionary Forces, passes to Brigadier General Mason M. Patrick.

May 30

MILITARY: The German offensive rumbles on to the Marne River, only 50 miles from Paris, while the 3rd Division is brought up by rail to help defend Château-Thierry and other river crossings in concert with French reinforcements. The 2nd Division is also deployed astride the Paris-Metz road, directly in the Germans' line of advance.

May 31

MILITARY: Secretary of War Newton D. Baker orders that conscientious objectors be compelled to work on farms without pay.

- Despite General John J. Pershing's insistence that American forces not be parceled out along the western front, a machine gun battalion from the 3rd Infantry Division is assigned to cover French troops as they struggle to check the German advance at Château-Thierry.

NAVAL: German submarine *U-90* torpedoes the NOTS transport *President Lincoln*, sinking it with the loss of 26 crewmen. Lieutenant Edouard V. Izak is taken prisoner and closely observes German submarine techniques and tactics. He subsequently stages a daring escape from prison with this valuable military intelligence, winning the Medal of Honor.

May 31–June 5

MILITARY: The 3rd Division gains the nickname "Rock of the Marne" by successfully repelling repeated German attacks along its sector, particularly at Château-Thierry. German gains elsewhere have produced a vast bulge in the Allied line—a salient that will have to be reduced.

June 1

MILITARY: Soldiers and marines of the 2nd Division deploy into trenches around Château-Thierry, directly in the German line of advance toward Paris. Among those present in the deployment is Captain Harry S. Truman, Missouri National Guard, who commands an artillery battery.

June 3–4

MILITARY: The 2nd Division proves instrumental in halting the German drive toward Paris at Château-Thierry, further upsetting von Hindenburg's timetable.

Losses are 187 dead and 636 wounded. The Americans prepare to counterattack through Belleau Wood, which they believe to be lightly defended.

NAVAL: In a patriotic gesture, nearly 100 vessels of various descriptions, intending to assist the war effort, are launched.

June 4

MILITARY: In a literary footnote to history, Ernest Hemingway begins his tour as an ambulance driver along the Italian front.

June 5

MARINES: In light of a German breakthrough of Allied lines northeast of Paris, France, the 4th Marine Brigade under Brigadier General James G. Harbord rushes to plug the gap and repels a major attack along the Paris-Metz highway.

June 6

AVIATION: The 91st Squadron, the Air Service's first dedicated observation (reconnaissance) unit, begins making photo runs in the Toul sector of France. Over the next few months, it also performs useful service for the troops by spotting artillery behind enemy lines.

June 6–24

MARINES: The 4th Marine Brigade of the 2nd Division carves a name for itself by taking Bouresches, Vaux, and Belleau Wood from the Germans in a bloody, two-week struggle that costs 285 officers and 7,585 men—a staggering 55 percent loss rate. At one point, Sergeant Dan Daly, recipient of two Medals of Honor, encourages his fellow marines by shouting, “C’mon, you sons of bitches! Do you want to live forever?” Despite their relative inexperience, the Americans perform well and enthusiastically against their skilled opponents, who call them “Devil Dogs.”

- Lieutenant Weedon E. Osborne, 5th Marine Regiment, posthumously wins the Medal of Honor by rescuing several wounded marines at Belleau Wood before being killed.

June 8–September 20

NAVAL: American vessels under Rear Admiral Joseph Strauss assist the Royal Navy in laying an extensive minefield across 240 miles of the North Atlantic, from Scotland to Norway, to curtail German U-boat activity. They ultimately lay four-fifths of the 70,263 mines deposited there. The minefield proves a major impediment to submarine operations and as many as six U-boats may have been lost attempting to cross.

June 9–13

MILITARY: The German juggernaut again gathers strength and advances upon Paris on a front between Noyon and Montdidier. French and American troops are forced back six miles in a week of fighting yet manage to consolidate their lines.

June 11

MILITARY: Medical Corps lieutenant Orlando H. Petty, 5th Marine Regiment, continues working at a dressing station despite enemy artillery and gas shells, saving several wounded soldiers, then carries a wounded officer to safety. For such extreme devotion to duty he receives a Medal of Honor.

June 12

AVIATION: French-built Breguet 14 bombers manned by the 96th Aero Squadron under Major Harry M. Brown conduct their first offensive operation by bombing the Dommary-Baroncourt rail yards, France. By war's end, American bombers have delivered 196 tons of ordnance behind German lines, sometimes as far as 160 miles inland.

MILITARY: As French forces successfully counterattack along the Metz River, driving the Germans before them, Major George S. Patton of the Tank Corps is on hand as a military observer. He is especially eager to watch French tanks perform in action.

June 13

AVIATION: An HS-1 flying boat becomes the first American-made warplane assembled at Pauillac, France, and also makes its first flight under Lieutenant Charles P. Mason.

MARINES: At Belleau Wood, France, German forces mount a determined counterattack that nearly forces the marines from the village of Boursches. However, Major John A. Hughes refuses to retreat and his 6th Marines, despite 600 casualties, halt the German advance.

MEDICAL: No less than 30 ambulance sections, sporting 25 ambulances each, are culled from the AEF in France and sent to assist Allied forces in Italy.

June 15

MILITARY: Major General George W. Read assumes command of the U.S. II Corps (27th and 30th Divisions) and he prepares to support the British army's Somme offensive. In this post, Read also commands several British and Australian divisions.

June 16–17

MILITARY: American forces consisting of the 24th Infantry, and 5th and 7th Cavalry, suddenly storm across the Mexican border into Juárez, routing irregulars under Francisco "Pancho" Villa and killing several hundred.

- At Belleau Wood, France, the 7th Infantry and the 3rd Division arrive to relieve the 4th Marine Brigade, badly cut up after two weeks of incessant combat, and fighting to take the entire sector resumes.

June 17

MILITARY: Captured German documents reveal a very high appraisal of the youthful and inexperienced American fighting men; this is high praise, indeed, coming from a force as professional as the German army.

June 19

AVIATION: At Pensacola, Florida, upper atmospheric weather soundings are taken for the first time with a balloon device designed by Lieutenant W. F. Reed. Information on wind velocity and direction are necessary for navigational flight training.

June 22

MILITARY: The 4th Marine Brigade rejoins the 3rd Division at Belleau Wood, France, and resumes attacking the stubborn German defenses there.

NAVAL: The cargo vessel *California*, belonging to the Naval Overseas Transportation Service, strikes a mine in the Bay of Biscay and sinks.

June 26

MARINES: After three weeks of difficult fighting, the 4th Marine Brigade ejects the last of the German defenders from Belleau Wood, France, suffering 50 percent casualties. French Sixth Army commander General Jean Degoutte decrees that the woods be renamed the *Bois de la Brigade de Marine*. Victory here also signifies the growing influence of American forces in the overall military equation along the western front.

June 28

MILITARY: The Gas Service, AEF, is formally expanded into the Chemical Warfare Service.

June 29

MARINES: The cruiser *Brooklyn* of the U.S. Asiatic Fleet lands its detachment of marines ashore at Vladivostok, Russia, to safeguard the American consulate there. The entire country is now in the throes of a violent revolution, but the marines remain on land until being relieved by an army brigade dispatched from the Philippines.

June 30

AVIATION: The navy's Night Wing, Northern Bombing Group, takes a step closer to becoming reality when a group of naval aviators takes special training with British units, then joins RAF Squadron 214 on a night bomb run as observers.

July 1

AVIATION: In Washington, D.C., Congress repeals laws relating to the National Naval Volunteers (NNV) and authorizes the president to transfer all members at their present rank or rating to the Naval Reserve, the Naval Flying Reserve, or the Marine Corps Reserve.

MILITARY: Army units belonging to the 2nd Division storm into Vaux, near Château-Thierry, France, immediately after a prolonged bombardment. The cost for this textbook attack is only 46 lives, a sharp contrast to the costly frontal assault tactics employed by the marines.

NAVAL: German submarine *U-86* torpedoes and sinks the transport *Covington* off Brest, France, killing six crewmen.

MARINES: Congress increases manpower totals to 3,341 officers and 75,500 enlisted men.

July 3

MARINES: At Quantico, Virginia, the 13th Marine Regiment is organized under Lieutenant Colonel Smedley D. Butler.

July 4

MILITARY: General John J. Pershing announces that American troop strength in France exceeds 1 million men; ultimately the United States commits 19 divisions to the fray, each twice the size of their veteran but exhausted German counterparts.

- Corporal Thomas A. Pope, 131st (Illinois) Infantry, distinguishes himself in combat at Hamel, France, by single-handedly wiping out a German machine gun nest; he wins the first Medal of Honor given to a soldier in this conflict.

July 5

MARINES: The 4th Marine Brigade, having sustained 4,710 casualties in fierce combat since June 1, 1918, is relieved at Belleau Wood by an army brigade.

- General John A. Lejeune is appointed commander of the army's 64th Brigade within the 32nd Division.

July 6

AVIATION: A German Albatros fighter shoots down a balloon belonging to the 2nd Balloon Company; this is the Air Service's first such loss.

DIPLOMACY: In Washington, D.C., President Woodrow Wilson yields to Allied pressure to commit U.S. Army troops to an expedition into Siberia to ensure that supplies sent to the White Russian forces are not captured by the Bolsheviks. The president nonetheless expresses reservations about intervening in Russia's civil war.

July 7

AVIATION: At the Philadelphia Navy Yard, the Naval Aircraft Factory fulfills its first order to construct 50 H-16 flying boats.

MILITARY: At Remiremont, France, Major General William M. Wright's U.S. III Corps is redesignated the V Corps. Meanwhile, Major General Hunter Liggett's U.S. I Corps deploys west of Château-Thierry with the 1st, 2nd, 3rd, 4th, 26th, and 28th Divisions and the French 167th Division.

July 8

MILITARY: In northern Italy, ambulance driver Ernest Hemingway is wounded by Austrian artillery fire. He spends several months convalescing at a Red Cross hospital in Milan. He bases his novel *Farewell to Arms* (1929) on personal experiences there.

July 9

MILITARY: The army introduces the rank of warrant officer within the Mine Planter Service, then part of the Coast Artillery. The practice can be traced back to 1896 with the initial authorization of headquarter (field) clerks.

July 11

NAVAL: German submarine *U-92* torpedoes and sinks the transport *Westover* off the French coast, killing 11 sailors.

July 13

MILITARY: Major General Robert Lee Bullard is appointed commander of the U.S. III Corps at Meaux, France, and begins moving his troops into the region west of Soissons to assist the French 10th Army.

July 14

AVIATION: Twenty-one-year-old Lieutenant Quentin Roosevelt, youngest son of former president Theodore Roosevelt, is killed in action over Chamery, France, while flying with the 95th Aero Squadron. The Germans accord him full military honors.

MARINES: Army brigadier general James G. Harbord gains promotion to major general and assumes command of the 2nd Division; leadership of the 4th Marine Brigade reverts to Colonel Wendell C. Neville, 5th Marines, who is promoted to brigadier general.

July 15

MILITARY: American frontline deployments are nearly completed with 26 infantry divisions in line; their preponderant manpower grants the Allies numerical superiority over the Germans for the first time in months. This is because American formations are at full strength with twice the personnel available than their opponents. At this juncture, the Germans are also gearing up for their final offensive of the war, which culminates in the Second Battle of the Marne.

July 15–18

MILITARY: Eight American divisions, comprising 85,000 troops, are engaged in the Second Battle of the Marne (or Aisne-Marne Offensive), which finally blunts the waning but determined German offensive in the vicinity of Reims. The 3rd and 28th Divisions are particularly distinguished in combat and seal off several cracks in French lines before the Germans can pour through. Their stand forces the Germans to abandon their vaunted offensive after heavy casualties and allows Marshal Ferdinand Foch to counterattack along the Soissons-Reims salient. By now the 1 million American troops present in theater are making their impact on military events daily.

July 17

MILITARY: President Woodrow Wilson formally agrees to deploy American forces in northern Russia and Siberia for the purpose of protecting military stores and evacuating soldiers of the Czech Legion fleeing Communist forces. Ultimately, 7,000 Americans from the 85th Division and a like number of Japanese are deployed in Siberia to deter the Bolsheviks.

- Along the Aisne River, men of the 1st and 2nd Divisions begin advancing toward Soisson in conjunction with General Charles Mangin's French 10th Army.

July 18–19

MARINES: The 4th Marine Brigade repels a major German offensive, then spearheads the Allied drive at Soisson. Gunnery Sergeant Louis Cukela, a former Serbian immigrant, wins the Medal of Honor for destroying several German machine gun nests. The brigade is withdrawn after advancing six-and-a-half miles while sustaining 2,091 casualties in only two days.

July 18–August 2

MILITARY: The French army strikes suddenly at German positions along the Aisne-Marne Salient, catching the enemy off guard, with the 4th and 26th Divisions capturing several strategic positions. Success here marks the beginning of the end for Germany.

July 19

NAVAL: The armored cruiser *San Diego* strikes a German mine off Fire Island, New York, and sinks with the loss of six crewmen. This is the only major warship

lost by the Americans in World War I; the device had been laid by *U-156*, which is sunk crossing the North Sea mine barrage.

July 19–31

MILITARY: The 1st and 2nd Divisions gradually overpower German reinforcements in the ongoing Aisne-Marne counteroffensive, seizing all land west of the Soisson/Château-Thierry highway. Meanwhile, the 4th and 26th Divisions also advance, seizing much ground along with 3,500 prisoners and 68 cannon. A total of nine divisions—310,000 men—are thrown into battle and ultimately sustain 67,000 casualties.

MARINES: As the 6th Marine Regiment battles its way forward at Vierzy, France, Pharmacist's Mate John Henry Balch and Lieutenant Joel Thompson Boone brave heavy enemy fire to treat the wounded and bring forward badly needed medical supplies—both win the Medal of Honor.

July 20

AVIATION: In England, RAF Station Killingholme is turned over to the U.S. Navy as a naval air station under Lieutenant Commander Kenneth Whiting. The Americans had been flying patrols out of here since the previous February.

MILITARY: The 1st Division continues advancing toward Bersy-le-Sec along the Soisson-Château Thierry road, although French forces on either flank fail to maintain the same pace.

July 21

AVIATION: Two seaplanes sortie from the Naval Air Station, Chatham, Massachusetts, and attack surfaced German submarine *U-156*, driving it back underwater.

MILITARY: Bersy-le-Sec falls to American forces, placing the 1st Division to within three miles of Soissons. However, the exhausted troops, having lost nearly half their number, dig in and wait for French reinforcements.

NAVAL: German submarine *U-156* fires 80 rounds at the tugboat *Perth Amboy* and four barges off Nauset Bluffs, Massachusetts, and some of the shells go astray, striking the mainland. This is the first enemy action on American soil during the war.

July 23

MILITARY: Major General Omar Bundy is temporarily appointed commander of the U.S. VI Corps at Neufchâteau, France, which fulfills a training and administrative role for divisions assigned to it.

July 24

AVIATION: Naval Air Station Porto Corsini, Italy, opens under the command of Lieutenant Wallis B. Haviland; it is the only active navy seaplane base on the Italian Peninsula.

MILITARY: At an Allied conference held at Melun, France, General John J. Pershing is ordered to attack and reduce the German-held salient near Saint-Mihiel, France, in order to free up the railroad network northeast of Paris. This is the first, full-scale American offensive action of World War I.

**Luke, Frank (1897–1918)***Fighter pilot*

Frank Luke was born in Phoenix, Arizona, on May 19, 1897, and he joined the U.S. Army Signal Corps directly out of high school following American entry into World War I. He volunteered for the Army Air Service and received his flight training at Rockwell Field in San Diego, California. Luke proved himself a natural-born flier and was the first member of his class to fly solo. In January 1918 he shipped to France as a newly commissioned second lieutenant and spent several months receiving additional training at the flight instruction school at Issoudun. Luke was initially employed as a ferry pilot and, chafing under such restraint, began agitating for a combat assignment. In July 1918 he received his wish and transferred to the 27th Aero Squadron, 1st Pursuit Group. Luke quickly acquired a reputation for being a fine pilot and a superb aerial marksman, although he was a loner by nature and not given to group tactics. He shot down his first German plane by violating orders and breaking formation, which led to the first of several official reprimands. Luke, however, silenced his critics by continually racking up his tally, and, within six weeks, he was credited with four aircraft and 4 observation balloons. In fact, the extremely dangerous practice of “balloon busting” became something of a career specialty for Luke. These lumbering craft were not only difficult to set afire, but were also heavily defended by anti-aircraft batteries beneath them and usually a squadron of fighter planes circling nearby. Luke’s practice was to stalk balloons near

dusk when they were being reeled in for the night, destroy them, and quickly egress before German defenses could react. His tactic proved uncannily effective during a single week in September 1918, when he downed no less than 13 enemy craft. In light of the dangerous nature of his work, his Spad XIII fighters usually returned so peppered by bullets holes that they were scrapped.

However, Luke’s solitary habits made him unpopular with other fliers and he was ordered to team up with a newcomer, Lieutenant Joseph Werner. The two men became close friends and an efficient aerial duo. Together they flamed several more balloons and aircraft. Their luck ended on September 19, 1918, when they engaged balloons protected by a squadron of Fokker D-VII fighters. In a sizzling combat, Luke shot down three Fokkers and two balloons, but Werner was killed. Thereafter, Luke was flying for revenge and on September 29, 1918, he took off against orders for a sortie behind enemy lines. In a spectacular dogfight he claimed two more Fokkers and three additional balloons before being damaged and forced to crash land near Murvaux. Rather than surrender, Luke fought back desperately with his pistol until he was killed. In this manner he became the first American pilot to receive the Medal of Honor, posthumously. He is credited with 18 official kills, making him the second-highest American ace of the war after Captain Eddie Rickenbacker, although his unofficial tally is regarded as much higher.

July 25

AVIATION: Lieutenant Frank Luke, soon to gain renown as America's "Balloon Buster," arrives with a group of replacement pilots for the 27th Aero Squadron at Saints, France.

- The navy and army agree to accord the former service sole responsibility for developing rigid airships (dirigibles) for possible use by American forces.

MILITARY: The 332nd Infantry is detached from the 83rd Division and sent to Marseille, France, for eventual shipment to the Italian front, where it will serve with British units in the field.

July 26

MARINES: Brigadier General John A. Lejeune assumes command of the much-battered but still operational 4th Marine Brigade, although 10 days later he is promoted to major general and takes charge of the entire 2nd Division. He is the first Marine Corps officer to command a formation larger than a brigade.

July 27

AVIATION: At the Philadelphia Navy Yard, the N-1 experimental fighter, constructed by the Naval Aircraft Factory, successfully test fires its Davis gun for the first time, striking several targets moored in the nearby Delaware River.

July 28

MILITARY: Along the Ourcq River, a 35-man squad led by Corporal Sidney Manning, 167th Infantry, charges a series of German machine gun nests at Breuvannes, France. Twenty-eight soldiers are gunned down, but Manning, suffering from nine wounds, still manages to secure a foothold on the enemy heights; he wins a Medal of Honor.

July 28–August 5

MILITARY: Combined Allied forces, including 54,000 Americans, begin probing weakened German lines at the salient along the Somme River. At length the 42nd "Rainbow" Division crosses the Ourcq River under heavy fire, seizes its objectives, and is relieved by the 4th Division. The 32nd Division also takes to the offense and captures Fismes on the south bank of the Vesle River. Additional fighting lasts another month, wiping out the Aisne-Marne salient and further draining the Germans of men and materiel.

July 29

MILITARY: To unravel some long-standing logistical logjams, General John J. Pershing appoints Major General James G. Harbord to head up the Services of Supply Department, AEF, at Tours, France. He quickly whips the myriad of ports, bases, supply dumps, schools, and personnel depots into a state of greater efficiency.

- Along the Ourcq River, France, Sergeant Richard O'Neil, 165th Infantry, leads a squad in action, receives serious injuries, yet remains in command until he can return with valuable intelligence about German positions; he receives a Medal of Honor.

July 30

AVIATION: The First Marine Aviation Force under Major Alfred A. Cunningham arrives at Brest, France, along with Squadrons A, B, and C. The 100 officers and

men immediately report to aerodromes at Calais and Dunkirk to begin training with British-built DH-4 and DH-9 bombers. This unit enters operations as Day Wing, Northern Bombing Group.

August 2

AVIATION: A formation of 18 DH-4 bombers from the 135th Observation Squadron completes a mission to and from their aerodrome at Ourches, France. This action represents the combat debut of American-built warplanes.

August 5

AVIATION: At Naval Air Station Killingholme, England, a flying boat piloted by Ensign Ashton W. Hawkins successfully completes the first night patrol mission of an American aircrew. They are forced to land in poor weather and nearly out of fuel.

August 7

MILITARY: To better harmonize relations between the regular U.S. Army, the National Guard, and the wartime National Army, General Peyton C. March, army chief of staff, issues an order consolidating these disparate elements into "one army."

MARINES: Congress authorizes the Marine Corps to take full control of Parris Island, South Carolina, then consisting of 3,000 acres of land with an adjoining 3,000 acres of swamp.

August 8

MARINES: President Woodrow Wilson signs an order ending voluntary enlistment in the Marine Corps, although draftees are enabled to decline serving in the corps in favor of army or navy service. The Marine Corps Reserve is also enabled to enlist women for clerical duties.

August 9

MILITARY: In a savage little battle along Chipilly Ridge, France, part of the 131st Infantry stalls in its attack once all its officers are casualties, but Corporal Jake Alex charges ahead under fire, shoots down five German soldiers, and captures 15 others.

August 10

MILITARY: At Chaumont, France, General John J. Pershing receives permission to form the First Army as an independent strike force; Colonel George C. Marshall is his chief of operations. Now all the various American divisions in the field are brought under his personal command and he orders his headquarters transferred to Neufchâteau to be closer to the front. Pershing does so with the blessings of Marshal Ferdinand Foch, who is now convinced of their fighting abilities.

- A force of 10,000 Americans under Major General William S. Graves is to join Japanese forces in a joint occupation of Vladivostok, Russia.

August 11

AVIATION: At Mineola, New York, Ensign James B. Taylor takes the Loening M-2 Kitten prototype aloft for the first time. Although not a successful design, it is the first monoplane constructed for the U.S. Navy.

August 12

MARINES: A total of 305 women enlist in the Marine Corps to perform clerical duties during the war; the first is Opha M. Johnson, previously employed as a civil service employee at headquarters, U.S. Marine Corps.

August 14

MILITARY: Major General William S. Graves departs Camp Fremont, California, for Vladivostok, Russia, to take command of the American Expeditionary Force in Siberia. Once there, he is ordered to declare a strict policy of neutrality in light of the ongoing civil war.

August 15

AVIATION: The Northern Bombing Group, consisting entirely of naval aviators, begins independent bombing operations with a raid against German submarine pens at Ostend, Belgium. This first foray consists of a single Caproni bomber piloted by Ensign Leslie R. Taber.

MILITARY: The 27th and 31st Infantry are detached from service to the Philippines and landed at Vladivostok, Russia, to guard the Trans-Siberian Railroad and allow the anti-Bolshevik Czech Legion to escape intact. This is also a preventative move by the United States aimed at “dissuading” Japan from dominating Russia’s Far Eastern Maritimes.

August 16

MILITARY: Old habits die hard, so General John J. Pershing orders that all distinctions between the U.S. Army, the National Guard, the Reserve Corps, and the National Army are henceforth eliminated, along with all their distinct badges. “This country has but one army,” he declares to the troops, “the United States Army.”

August 17

AVIATION: The twin-engined Martin MB-1 bomber prototype performs its maiden flight. Although not available in time for combat in World War I, it served many years in the postwar decade as a mail carrier.

MILITARY: 85,000 American troops assist the French by attacking north of the Soisson-Reims line and grind forward to the Belgian border.

August 18

MILITARY: In Lorraine, France, hard-hitting major general Joseph T. Dickman of the 3rd Division is promoted to commander of the U.S. IV Corps, comprised of the 1st, 82nd, and 90th Divisions.

- The 28th, 32nd, 77th Divisions assist a French drive at Oise-Aisne by seizing the critical town of Juvigny, at which point German defenders begin falling back.

August 19

AVIATION: Naval Air Station Halifax, Nova Scotia, becomes operational under Lieutenant Richard E. Byrd; it is the first of two patrolling stations established in Canada.

- Trial runs of the Kirkham 18-T triplane fighter, built by the Curtiss Company, achieves airspeeds of 162 miles per hour. The trial runs are observed by Naval Constructors Holden C. Richardson and Charles N. Lique.

August 19–24

AVIATION: Colonel William “Billy” Mitchell distributes Air Service Circular No. 1, which precisely lays out the targets to be attacked during the upcoming Saint-Mihiel offensive. These include airdromes, troop concentrations, and ground transportation “choke points.” A number of French bombardment units are also subordinated to American command authority, bringing aircraft strength up to 1,467.

August 21

AVIATION: When a Macchi M.5 flying boat flown by Ensign George Ludlow is shot down by Austrians near their naval base at Pola on the Adriatic Sea, a second craft piloted by Quartermaster Charles H. Hammann drops down and rescues him; Ludlow, wins the Medal of Honor. The Americans are operating from Naval Air Station, Porto Corsini, Italy.

MILITARY: Nearly 108,000 American troops reinforce British forces in Belgium prior to an all-out assault against Ypres.

- Chief of the Tank Corps brigadier general Samuel D. Rockenbach declares the 326th, 327th, 344th, and 354th Tank Battalions operational and ready for combat in the forthcoming Saint-Mihiel offensive.

August 23

NAVAL: Rear Admiral Thomas S. Rodgers arrives at Bantry Bay, Ireland, with the battleships *Nevada*, *Oklahoma*, and *Utah*, to preclude possible German battle-cruiser raids against North Atlantic convoys.

August 27

NAVAL: In a disastrous incident involving friendly fire, the armed transport vessel *S. Feliz Taussig* mistakenly opens fire on the subchaser *SC 209* off Long Island, New York, killing or injuring 18 crewmen.

August 28

AVIATION: In Washington, D.C., Assistant Secretary of War John D. Ryan gains appointment as the first director of the Army Air Service. As such, he also has control over the Bureau of Aircraft Production (his prior posting) and the Division of Military Aeronautics.

August 29–September 11

MILITARY: The I and II Corps of the First Army (AEF) occupy advanced positions in the Lorraine sector, supported by the French II Colonial Corps. General John J. Pershing is in nominal control, but he places his force at the disposal of French marshal Pétain to ensure unanimity among the Allies.

August 30

MILITARY: A heated exchange ensues between French marshal Foch and General John J. Pershing when the latter requests an entire sector of the front to fight on and Foch, resigning himself to the inevitable, assigns him Meuse-Argonne.

September 1

AVIATION: In an organizational shake-up, the commander, U.S. Naval Aviation Forces, Foreign Service is reassigned as the aide to aviation on the staff of the commander, U.S. Naval Forces Operating in European Waters. Formal commands

are also established in France, Britain, Ireland, and Italy to control and direct operations in their respective areas.

MILITARY: Major General William S. Graves arrives at Vladivostok to assume command of the 4,500 American troops deployed to Siberia. He is to strictly assist in the evacuation of Czech soldiers marooned there and not to get embroiled in the ongoing Russian civil war.

September 3

AVIATION: In France, American aerial reconnaissance units begin photographing German positions prior to the commencement of ground and air offensive operations.

- At Naval Air Station Lough Foyle, the navy commences its first patrolling efforts over the North Channel entrance to the Irish Sea.

September 3–4

MILITARY: The 28th and 77th Divisions hound retreating German forces out of the Aisne-Marne salient and the latter completely abandons the Vesle River region. Both units are then transferred to the First Army in anticipation of the forthcoming Meuse-Argonne offensive.

September 4

MILITARY: British leaders transfer 4,500 American soldiers from Archangel to Murmansk, to protect the Murmansk railroad and supply dumps against Bolshevik forces. However, they do so without informing the American government until after the fact. The soldiers remain in place for the next nine months.

September 6

NAVAL: A battery of five 14-inch (346mm) naval cannon (nicknamed the “Woozlefinsches”) under Rear Admiral Charles R. Plunkett commences fire upon German forces near Soissons. This is the first instance of such naval ordnance being brought to bear in a land engagement.

September 7

MILITARY: The 27th Infantry, fresh from the Philippines, assists a Japanese division in clearing Bolshevik troops from the Ussuri Valley, Siberia. Once the city of Habarovsk is taken, the flags of both nations are flown side by side at the railroad station.

September 12–16

AVIATION: Colonel William “Billy” Mitchell, a far-sighted aerial strategist, leads 600 aircraft in America’s first, large-scale aviation offensive against Saint-Mihiel, France. When supporting French, British, and Italian units are added to the mix, Mitchell commands a force of 1,476 aircraft and 30,000 servicemen.

- Lieutenant Frank Luke, soon known as the “Arizona balloon-buster,” claims his first German observation balloon.

MILITARY: The First Army under General John J. Pershing, numbering 550,000 men, storms into the Saint-Mihiel salient south of Verdun, measuring 25 miles across and 16 miles deep, which had been occupied by the Germans since 1914. This was the first independent offensive conducted by the Americans, who gradually crush all resistance, and they take 15,000 prisoners, 443 guns, and 7,000 casu-

French-built FT-17 (Renault) Tank of C Company, 327th Tank Battalion, 3d Brigade, 1st Infantry Division, American Expeditionary Forces, in action in the Saint-Mihiel Sector, September 12, 1918 (*U.S. Army Military History Institute*)

alties in four days of intense combat. Exhausted and outnumbered, the heretofore formidable German Imperial Army begins reeling back toward its own border. Pershing wants to continue the drive toward Metz to maintain the initiative, but Marshal Ferdinand Foch redirects the Americans toward continuing action in the Meuse-Argonne sector, east of Verdun.

MARINES: The 4th Marine Brigade under Brigadier General Wendell C. Neville functions as the 2nd Division's reserve during attacks upon the Saint-Mihiel salient; it sustains a further 919 casualties over the next four days.

September 13

MILITARY: At Vieville-sous-les-Côtes, France, Captain Ernest N. Harmon of the 2nd Cavalry conducts the AEF's only mounted charge by breaking up a German withdrawal in Saint-Mihiel, taking many prisoners. The battle also marks the debut of the U.S. Army Tank Corps, spearheaded by the 304th Tank Brigade under Major George S. Patton, which performs adroitly despite thick mud and incessant mechanical failures. Both leaders subsequently earn distinguished careers in World War II.

September 14

MILITARY: Having achieved its objectives in the Saint-Mihiel sector, General John J. Pershing directs his First Army to being redeploying in the Argonne sector and continue with the Allied offensive developing there.

- At Revillion, France, Captain Warlaw L. Miles leads his company of the 208th Infantry into action along the Aisne Canal. The attack fails, but only after Miles sustains five wounds and refuses to abandon the field until evacuated on a stretcher; he wins a Medal of Honor for bravery under fire.

September 15

AVIATION: Major Carl A. Spatz (latter Spaatz) downs his first German warplane, a Fokker D-VII.

NAVAL: The transport *Mount Vernon* is torpedoed 200 miles west of Ushant, France, and loses 36 crewmen, but it stays afloat and manages to limp back to Brest.

- At Thiaucourt, France, Hospital Apprentice David E. Hayden risks his life to save a wounded marine under fire; he wins a Medal of Honor.

MARINES: Hospital apprentice David E. Hayden, serving with the 6th Marine Regiment at Thiaucourt, France, dresses a wounded marine and carries him back to safety under fire, winning a Medal of Honor.

September 16

MILITARY: Army forces skirmish with Bolsheviks near Obozerskaya, northern Russia, suffering numerous casualties.

NAVAL: The cargo vessel *Buena Ventura* is torpedoed by German submarine *U-46* off the Spanish coast, sinking with a loss of 19 crew members.

September 17–25

MILITARY: General John J. Pershing shepherds the First Army into advanced positions along the Lorraine sector, 20 miles north of Verdun, and prepares to launch a concerted drive against German positions at Sedan and Mézières.

September 19

AVIATION: The daring pilot Lieutenant Frank Luke is grounded by his commanding officer and ordered on a six-day leave in Paris. Over the past 17 days he has downed 14 heavily armed balloons and four aircraft.

September 20

MILITARY: Major General George W. Read directs his II Corps to assist the British Fourth Army in their attack upon Péronne, France, in preparation for storming the so-called Hindenburg Line into Germany itself. He also orders the 30th Division forward to relieve the 1st Australian Division.

September 21

MILITARY: Pressing forward, the First Army under General John J. Pershing relocates its headquarters to Souilly, France.

September 23

AVIATION: At Copiague, Long Island, New York, the so-called flywheel catapult successfully launches a flying bomb. This device, the forerunner of catapults first installed on the carriers *Lexington* and *Saratoga* in the 1930s, was jointly developed by the Sperry Company and the Bureau of Ordnance.

September 24

AVIATION: Over Nieuport, France, naval aviator lieutenant David S. Ingalls, flying a British Sopwith Camel with No. 213 Squadron, Royal Air Force, shoots down

a German Rumpler two-seater. This is his fifth aircraft in six weeks of flying and makes him the navy's first and only ace of World War I. Ingalls subsequently receives the Distinguished Flying Cross from the British government and the Distinguished Service Medal from President Woodrow Wilson.

September 25

AVIATION: Colonel William "Billy" Mitchell issues new orders in preparation for the upcoming Meuse-Argonne offensive, which continues with little interruption until November 11.

- Lieutenant Edward V. Rickenbacker, 94th Aero Squadron, single-handedly tackles a patrol of seven German aircraft over Etain, France, shooting down a Fokker fighter and a Halberstadt observation craft. For this deed he becomes the first American airman to win the Medal of Honor, although due to foul-ups in paperwork it is not awarded until 1930.

MILITARY: Major General John F. O'Ryan leads his 27th Division (New York) into battle alongside British and Australian troops just below the Hindenburg Line.

NAVAL: Chief machinist's mate Francis Edward Ormsbee, observing a training aircraft crash in the waters in Pensacola Bay, Florida, dives into the water, saves the gunner, then makes repeated and unsuccessful attempts to rescue the pilot trapped in his craft; he wins a Medal of Honor.

September 26

AVIATION: The Air Service commits hundreds of aircraft and airmen to offensive operations during the push through the Meuse-Argonne region.

INDIAN: Fourteen Choctaw code talkers are actively involved in U.S. Army communication throughout the Meuse-Argonne campaign. The French government is so impressed at their ability to baffle German intelligence that they are inducted as Chevaliers de l'Ordre national de Mérite.

MILITARY: The First Army under General John J. Pershing unleashes its long-awaited offensive by attacking German positions along the Meuse-Argonne front, in which 896,000 Americans attack along a 200-mile front in concert with 135,000 French. The battle kicks off at 2:30 A.M. with the massed firing of 2,700 American cannon all along the intended front. Meanwhile, Major George S. Patton leads his 304th Tank Brigade once again into action at Cheppy, France, where he is wounded but remains with the troops. German resistance is both plucky and professional, but the defenders are slowly forced back by sheer numbers. In fact, this battle constitutes the largest number of Americans committed to a single battle until 1944.

- In savage fighting at Bois-de-Forges, France, Captain George H. Mallon leads a 10-man squad into action against nine German machine gun nests. The Americans succeed in wiping the positions out, taking 100 prisoners in the process; Mallon wins a Medal of Honor for bravery under fire.

NAVAL: In the Bristol Channel, England, German submarine *UB-91* torpedoes and sinks the Coast Guard cutter *Tampa*, which goes down with all 115 crewmen.

September 28

AVIATION: Lieutenant Everett S. Brewster and Gunnery Sergeant Harry B. Wertheimer are the first marine aviators credited with shooting down a German aircraft.

MILITARY: In an attempt to stop the American juggernaut from surging through the Argonne woods, the Germans bring up 13 artillery batteries. Their concentrated fire, combined with rains that turn the roads and fields to quagmires, brings the Americans to a halt.

September 28–30

MILITARY: The African-American 370th Infantry, attached to the French XXX Corps, fights with distinction in the lines between Vauxaillon and Canal de l'Oise à l'Aisne.

September 29

AVIATION: Lieutenant Frank Luke, the celebrated “balloon buster” of the 27th Aero Squadron, crash-lands behind German lines at Murvaux, France, refuses to surrender, and dies on the ground. With 17 airplanes and 18 balloons to his credit, he is the second-highest American ace of World War I and posthumously wins the Medal of Honor.

MILITARY: The II Corps continues cooperating with the British Fourth Army in reducing the Hindenburg Line. The 27th and 30th Divisions attack parts of the heavily fortified position, taking all objectives, then halt to be relieved by Australian divisions.

- At Le Catelet, France, a group of Americans becomes isolated behind German lines during an intense smoke barrage. There they encounter a crippled American tank and rescue the crew from certain capture or death. Corporal Thomas O'Shea subsequently loses his life returning to American lines, but wins a Medal of Honor.
- The German chief of staff, unable to halt the influx of 1 million American soldiers, advises the government of Kaiser Wilhelm II to request an armistice.

NAVAL: The battleship *Minnesota* strikes a mine off the Delaware Capes and is slightly damaged without injuries to its crew.

September 30

MILITARY: In the Saint-Quentin sector, American forces push on ahead past Nauray but they are ambushed by German troops hiding in tunnels that they had failed to clear. The 107th Infantry is attacked from the rear and loses over half its men.

NAVAL: The Naval Overseas Transportation Service ship *Ticonderoga* engages in a desperate, two-hour surface battle with German submarine *U-152* while engaged in convoying duty in the North Atlantic. The transport is finally sunk by a torpedo; only 24 out of 237 crewmen survive and Lieutenant Commander James J. Madison wins the Medal of Honor for his doughty defense.

October 1–2

AVIATION: Near Stadenberg France, Marine Corps captains Francis P. Mulcahy and Robert S. Lytle, with Lieutenant Frank Nelms, perform one of the earliest known food-dropping missions when they deliver 2,600 pounds of food to a French regiment cut off behind German lines. For two days they perform low-level runs in the face of enemy fire and survive intact.

MILITARY: At Tours, France, the Service of Supply Department releases impressive figures: American base ports have handled 25,588 tons of supplies every day

while 10,398 soldiers have also disembarked. Both operations were handled by the American railway service, currently operating over 10,000 locomotives and freight cars.

October 2

AVIATION: At Dayton, Ohio, the pilotless Kettering “Bug” is successfully flight tested, although military applications are wanting.

NAVAL: In the Adriatic, American naval units assist Allied forces in clearing mines and screening against submarines during a large raid against the Austrian naval base at Durazzo.

October 2–6

MILITARY: Major Charles W. Whittelsey, commanding the 307th and 308th Infantry Regiments, 77th Division, takes his objectives in the Charlevaux Valley, France, but he is immediately surrounded by Germans and cut off. However, the Americans cling to their position tenaciously for five days and numerous runners are sent out who are all killed by the Germans. Whittelsey next resorts to carrier pigeons, of which his last, “Cher Ami”—wounded three times—arrives at headquarters with information describing his plight. By the time they are rescued, only 194 men survive out of an original total of 600. For commanding the “Lost Battalion,” Whittelsey wins a Medal of Honor.

October 3–10

MARINES: The 4th Marine Brigade, fighting as part of the 2nd Infantry Division, captures Mont Blanc Ridge (Champagne sector) after heavy fighting; two marines receive the Medal of Honor for wiping out German machine gun emplacements. The ridge and its adjoining town of Eitenne are taken with a loss of 2,538 casualties.

October 4

AVIATION: At Naval Air Station Rockaway, New York, the first Curtiss NC flying boat makes its successful maiden flight with Commander Holden C. Richardson and Lieutenant David H. McCulloch at the controls.

October 4–12

MILITARY: The First Army under General John J. Pershing continues rumbling forward across the Meuse-Argonne line and gradually sweeps the region of German defenders. The I, III, and V Corps all perform superbly in the face of heavy losses and intense opposition, only pausing on October 12 for a well-deserved respite. They also make several lodgements in the formidable Hindenburg Line.

October 5

SPORTS: Captain Eddie Grant, previously a National League infielder with the New York Giants, is killed in the Argonne Forest while leading Company H, 307th Infantry, as it labored to rescue the “Lost Battalion.”

October 6

AVIATION: Lieutenants Harold E. Goettler and Erwin R. Blecky of the 50th Observation Squadron are shot down and killed while trying to deliver mail and supplies to the army’s “Lost Battalion.” They both receive posthumous Medals of Honor.

MILITARY: As the Allied counteroffensive gathers steam, the II Corps advances to the Tincourt-Boucly sector, France, and relieves the Australian Corps.

October 8

MILITARY: Corporal Alvin York, a former conscientious objector and a fabulous marksman, single-handedly captures a 132-man German patrol at Chatel Chéhéry, Argonne Forest, France. Previously, he served as part of a 16-man patrol that was pinned down by machine gun fire. After losing six dead and three wounded, York stole around the enemy position and, with expert marksmanship, shot down two dozen Germans before they capitulated. This singular act makes him the war's most iconic hero and earns him a Medal of Honor.

October 8–November 11

MILITARY: Regiments belonging to the 93rd Division fight alongside French forces along the Vosges front, near the Swiss border.

October 9

AVIATION: In the largest, single concentration of airplanes to date, a force of 350 American bombers drops 32 tons of bombs on the region between La Waville and Damvillers, France.

NAVAL: Chief Gunner's Mate Oscar Schmidt, Jr., observing an explosion on a nearby subchaser, dives overboard to rescue a critically injured sailor dangling from the ships' bow, and wins the Medal of Honor.

October 10

MARINES: The 2nd Division is relieved in the Mont Blanc sector by French forces; the 4th Marine Brigade controls this part of Meuse-Argonne but at a cost of 2,369 casualties.

October 12

AVIATION: The 185th Aero Squadron performs the Army Air Service's first night missions over France.

MILITARY: More bad news for the Germans: Major General Robert Lee Bullard's Second Army is activated at full strength at Saint-Mihiel with the 7th, 37th, 79th, and 92nd Divisions in the front lines and the 28th Division training in reserve.

October 14

AVIATION: Marine Day Squadron 9 makes the first bomb run of the Northern Bombing Group by dropping 2,218 pounds of ordnance on the German-held railroad junction at Tielt, Belgium; Lieutenant Ralph Talbot and Corporal Robert G. Robinson become the first marine aviators to win Medals of Honor after shooting down two German aircraft, which attacked their bomber.

MILITARY: The American 126th Infantry stages a daring raid upon German positions in the Argonne, capturing 10 machine gun emplacements and clearing the way to advance upon Côte Dame Marie, south of Romange.

October 14–16

MILITARY: In their final drive, massed Americans of the 29th and 33rd Divisions advance on a broad front in concert with French forces driving north on the east bank of the Meuse River. After more intense fighting, men of the 42nd Division

**York, Alvin (1887–1964)***Soldier*

Alvin York was born in Pall Mall, Tennessee, on December 13, 1887, one of 11 children in a poverty-stricken family. Forced to hunt and provide food at an early age, he became a superb marksman. York, a large, stout individual, was also much given to drinking, gambling, and fighting until 1911, when he underwent a religious conversion and joined the Church of Christ and Christian Union. Consistent with the doctrines of his new creed, he became a church elder and a committed pacifist. York accordingly applied for conscientious objector status when America entered World War I in 1917, but it was denied by the draft board. He was then inducted into the U.S. Army as a private and consistently astounded drill instructors with his shooting abilities. As York was preparing to ship to Europe he made it clear to superiors his unease about fighting in combat, at which point they referred him to his battalion commander, Major George E. Buxton, a Bible scholar. For three days the two men debated chapter and verse relating to war and the moral obligations it posed to men of good conscience. The major then granted him a two-day leave to think it over. York agonized over his decision but returned ready to fight. For him the war had become a moral crusade. He arrived in France as a corporal and part of G Company, 328th U.S. Infantry, 82nd Division. It was in this position that York was to make military history and become part of the American military mythos of World War I.

York was committed to combat in the Argonne Forest and, on October 8, 1918, he led 17 men on a patrol into the German sector. They stealthily surprised and captured a small enemy detachment, including the major of a machine gun battalion. Suddenly, the soldiers came under fire from several emplacements, and six died while the rest were pinned down guarding their German prisoners. York immediately crept forward to engage the enemy and single-handedly shot down 17 enemy gunners. When the Germans realized their opponent was a single American soldier, a party of seven men rushed his position in a column. York, his rifle out of ammunition, pulled out his pistol and expertly shot down all seven of his antagonists with unerring aim. At this point the captive German major pleaded with him to stop and agreed to make his men surrender. York and his men then rounded up 132 prisoners and marched them back to an incredulous battalion headquarters. When General John J. Pershing heard of York's exploit, he pronounced him, "the greatest civilian soldier of the war." He received a Medal of Honor and 50 other decorations. Afterward, York returned to Tennessee and lived the rest of his life in semi-seclusion, only allowing his biography to be published in 1928. He also acted as an adviser to the patriotic film *Sergeant York* (1940), starring Gary Cooper. York gave away any money he accrued from his celebrity as a national hero, and he died in near poverty at Nashville on December 2, 1964, a unique and genuine American hero.

storm the town of Côte de Chatillon, gaining another lodgement on the Hindenburg Line. This had been their original objective since September 26, when the attack kicked off.

October 15

AVIATION: The Bureau of Steam Engineering announces that five reversible-pitch propellers are under construction by the firm Hart and Eustiss. These promising devices are to be tried out on Curtiss F-5L flying boats first.

October 16

MILITARY: General John J. Pershing turns over tactical command of the U.S. First Army to Major General Hunter Liggett while he advances to commander of the American Group of Armies in addition to serving as commander in chief of the AEF. Liggett is replaced in turn by Major General Joseph T. Dickman.

October 17

AVIATION: At Copiague, Long Island, New York, a Curtiss N-9 rigged as a “flying torpedo” is successfully launched and flies a prescribed course until the distance gear malfunctions and it continues on out of sight at an altitude of 4,000 feet!

NAVAL: The transport SS *Lucia* becomes the last American vessel sunk by German forces in World War I.

MARINES: In Haiti, a Caco attack led by Charlemagne Péralte against a marine-led Gendarmerie post near Hinche signals the opening of a new revolt; the rebels are driven off with a loss of 35 men.

October 18

MILITARY: To improve unit morale, the American Expeditionary Force is authorized to create shoulder sleeve insignia to identify to which division soldiers belonged.

- The II Corps, having advanced 20 miles, liberates 15 villages and takes 3,400 Germans captured. It is congratulated by General Sir Henry Rawlinson, British Fourth Army.
- The U.S. Army reverses itself and abandons the Women’s Overseas Corps (WOC); instead, a new Army Service Corps, drawn from recruits of “limited service,” is organized to fulfill similar tasks.

October 19

MILITARY: A directive from AEF Headquarters authorizes the wearing of unit sleeve patches for all major units.

October 20

MILITARY: New 155mm cannon belonging to the 11th Artillery Regiment are brought up in support of the 89th Division at Romagne, France. This represents the heaviest field ordnance deployed by the AEF.

October 21

NAVAL: The German government agrees to President Woodrow Wilson’s demand for a cessation of submarine warfare as a precondition for armistice negotiations.

October 21–31

MILITARY: General John J. Pershing orders the First Army to gird itself for renewed combat along the Meuse-Argonne front once fresh troops are brought up and exhausted divisions rotated out of line.

October 22

AVIATION: German antiaircraft fire downs a Marine Corps bomber flown by Lieutenants Harvey G. Norman and Caleb W. Taylor; they are the first marine aviators killed in combat.

- At Naval Air Station, Rockaway, New York, the twin-engine dirigible C-1 safely arrives following a flight from Akron, Ohio. The Aero Club of America subsequently awards pilot Major Bernard L. Smith, U.S.M.C., their Medal of Merit.

MILITARY: The First Army resumes its drive eastward through the Meuse-Argonne sector, with the 3rd Division capturing Bois de Forêt and the 89th Division seizing parts of Romagne Heights. General John J. Pershing is determined to maintain the strategic initiative and keep the Germans on the defensive.

October 24

MILITARY: A small contingent of American troops joins a successful Italian offensive at Vittorio Veneto, which finally crushes German and Austrian resistance.

October 27

MILITARY: The 78th Division advances and captures Grandpré, which assists the French Fourth Army on its right flank. The struggle took nearly two weeks and occasioned hand-to-hand fighting.

- The 332nd (Ohio) Infantry, the only American combat formation on the Italian front, captures several bridgeheads across the Piave River for Allied forces.

October 28–November 4

MILITARY: In Italy, the 332nd Infantry pursues Austrian troops north as far as the Tagliamento River before consolidating its gains.

October 30

AVIATION: Captain Eddie Rickenbacker claims his 25th and 26th German planes, making him the leading American ace. Success also results in receipt of a Mackay Trophy for becoming America's "Ace of Aces." Significantly, he flies a French-built Spad XIII fighter for the United States possesses no comparable craft.

MILITARY: At Ypres, Belgium, the 37th and 91st Divisions are detached to assist the British Group of Armies in Flanders, fighting there until the end of hostilities.

October 31

MILITARY: The First Army temporarily halts its offensive for 24 hours at the behest of the French. American ground forces take advantage of a one-day delay in offensive operations to realign themselves for a final push toward Sedan. Their mission now is to sever the strategic Metz-Sedan-Mézières railroad.

November 1

MILITARY: General John J. Pershing orders a resumption of offensive operations to break through the Meuse-Argonne front with a view toward seizing Sedan. The first wave sweeps over Barricourt Heights and launches into the heavily defended Hindenburg Line. After four days of intense fighting the German general staff orders its army to fall back from the Meuse line. The Americans subsequently pursue them up to the town limits of Sedan, cutting the strategic railroad there.

Rickenbacker, Eddie (1890–1973)

Fighter pilot

Edward Vernon Rickenbacher was born in Columbus, Ohio, on October 8, 1890, a son of Swiss immigrants. Eventually he anglicized his name to Rickenbacker and, following the death of his father, also dropped out of school to help support his family. Early on he developed a passion for automobiles and, despite his lack of technical training, acquainted himself with the fundamentals of engineering. Rickenbacker gradually gained national attention as a race car driver and, commencing in 1911, he was a regular racer at the Indianapolis 500. In 1917 he also established a land speed record of 134 miles per hour at Daytona Beach, Florida. After the United States entered World War I he tried enlisting in the U.S. Army but was turned down for want of education, but he was eventually allowed to join the staff of General John J. Pershing as a chauffeur. Rickenbacker, however, thirsted for combat and, assisted by his friend Colonel William “Billy” Mitchell, he underwent flight training at the Tours Aviation School. He proved himself a natural flier and, in March 1918, Rickenbacker was posted with the 98th Aero Pursuit Squadron, signified by its famous “hat in the ring” insignia. He was also a

winged dervish in combat, shooting down no less than 26 German planes by war’s end, and becoming America’s ace of aces. Highly decorated, he returned home to accept a Medal of Honor and also to write his best-selling memoir, *Fighting the Flying Circus* (1919). Through his inspired leadership the 94th Aero Pursuit Squadron also racked up a tally of 69 kills, making it the highest scoring American formation of the war.

Back in civilian life, Rickenbacker returned to his first love—cars—and founded the Rickenbacker Motor Company. He pioneered many innovations, such as four-wheeled braking, but he went out of business by 1926. Undeterred, he obtained controlling interest in the Indianapolis Speedway and worked as an engineer at General Motors before assuming the mantle as general manager of a failing GM subsidiary, Eastern Airlines. Exercising great business acumen, Rickenbacker turned the company completely around in three years and became its president. In 1934 he openly criticized President Franklin D. Roosevelt for his perceived hostility to the aviation industry, which made him something of a pariah in political circles. Nevertheless, in World War II Secretary of

NAVAL: Boatswain’s Mate John Otto Siegel distinguishes himself by rescuing several sailors from the burning schooner *Hjeltenaes*, nearly dying himself from smoke inhalation, and he wins the Medal of Honor.

MARINES: The 4th Marine Brigade spearheads the 2nd Division’s attack in the Meuse-Argonne region, overrunning all its objectives and penetrating the Hindenburg Line, capturing the Brunhilde and Freya strongpoints, along with 1,700 prisoners.

Captain Eddie Rickenbacker with his Spad XIII, the best French fighter aircraft of World War I
(Library of Congress)

War Henry Stimson sent him on a tour of Pacific air facilities in 1942. Rickenbacker's plane, however, crashed and he endured a harrowing three weeks at sea in a lifeboat. Once rescued, he came home and wrote a popular book about his experience, *Seven Came Through* (1943). He also resumed his leadership of Eastern Airlines, which

continually posted profits throughout a difficult period for the industry. He retired from the industry in 1963 and toured the country on behalf of various conservative causes. Rickenbacker, popularly known as "Lucky Eddie," was a hero who did much to advance public awareness and appreciation of modern aviation.

November 3

MILITARY: American troops in the Meuse-Argonne sector make a sudden night march that seizes Belval Wood behind German positions, capturing retreating enemy soldiers as they file by.

November 4

MILITARY: The 5th Division, III Corps throws bridges across the Meuse River in concert with adjoining French forces and begin a push toward Montmédy. Once

Beaufort falls, the once formidable German army is in full retreat from the Meuse River.

November 5

MILITARY: The I Corps is ordered to storm a communications center in the heart of Sedan while elements of the V Corps assist on the right flank. Some confusion results when the 1st Division crosses into zones assigned to the 42nd and 77nd Divisions, but at length the Americans take the high ground in front of the city. Meanwhile, General John J. Pershing alerts the Second Army under Major General William Lee Bullard to prepare for an ancillary advance between the Moselle River and Étang de Lachaussée.

November 6

AVIATION: At Aberdeen, Maryland, Dr. Robert H. Goddard test fires various, solid-propelled rocket weapons for Army Air Service representatives. However, direct military applications for such futuristic technology remain more than two decades off.

November 5–8

MILITARY: The First Army under General John J. Pershing, having pierced German defenses at Sedan, allows the Fourth French Army the honor of regaining their city while the Americans continue pressing ahead toward Longwy and Briey.

November 9

NAVAL: The Naval Overseas Transportation Service cargo ship *Saetia* strikes a mine and sinks near Fenwick Island, Delaware.

November 10

AVIATION: Airmen of the 94th Aero Squadron and the 104th Observation Squadron score the final American aerial victories of World War I during their final sorties over the western front.

MILITARY: With fighting along the western front in its dying gasps, the First Army continues advancing by crossing the Meuse River and approaching the city of Verdun. It falls upon the gunners of Battery E, 11th Field Artillery, supporting the 6th Division, to fire the final artillery salvo of the war at Beaufort, France. By this time, the First Army has sustained 26,000 dead and 95,000 wounded, but they captured 25,000 Germans, 874 guns, and inflicted 100,000 casualties on a very tough adversary.

MARINES: The 4th Marine Brigade launches a successful night attack across the Meuse River and secures a lodgement on the opposite bank. Marine losses in this final offensive are 1,263 officers and men.

- In Haiti, a force of 60 Haitians overrun a small Gendarmerie garrison at Mais-sade, then plunder the nearby town of Hinche.

November 11

AVIATION: At war's end, the nascent Air Service deployed 3,538 aircraft and balloons, 20,568 officers, and 175,000 enlisted men. An additional 4,865 aircraft are also in the United States. Naval aviation had also increased to 6,716 officers and men in navy units with 282 officers and 2,180 enlisted men Marine Corps units. These muster a further 2,107 aircraft, 15 dirigibles, and 215 balloons.

MILITARY: The armistice is signed at Compiègne, France, ending World War I. For their part in turning back the tide, the American Expeditionary Force (AEF) loses 130,174 dead (50,604 in combat and the rest by disease) and 203,460 wounded. This total seems almost trivial to the combined Allied/Central Powers tally of over 8 million dead. Financial expenditures total nearly \$42 billion, and American intervention decisively tipped the military balance in favor of the Allies. On the final day of the war, the American war machine musters 1,078,222 combat men in Europe.

MARINES: By the armistice, 32,000 marines had served in Europe; 2,549 died in action, 8,907 were wounded, and 25 were captured; a loss rate of nearly 30 percent.

November 14

AVIATION: Newly promoted brigadier general William “Billy” Mitchell becomes chief of the Air Service, Third Army, AEF.

November 17

AVIATION: At Naval Air Station, Hampton Roads, Virginia, a Curtiss H-16 flying boat equipped with a British style radio direction finder picked up signals from a radio station in Arlington, 150 miles away.

MILITARY: Eight infantry divisions of the Third Army advance toward the German border to begin their tour of occupation duties.

November 20

MILITARY: A final count proves that the Americans hold 44,934 German prisoners, which are promptly repatriated in return for 2,082 of their countrymen.

November 21

AVIATION: Major J. E. Booth and Lieutenant J. Spencer fly a De Havilland DH-4 bomber 700 miles nonstop from Mount Clemens, Michigan, to Mineola, New York, in only four hours.

NAVAL: As the German High Seas Fleet surrenders and parades by the assembled Allied navies, Vice Admiral William S. Sims and Rear Admiral Hugh Rodman observe them from his flagship, the battleship *Texas*.

November 22

AVIATION: At the Naval Aircraft Factory, Philadelphia, Pennsylvania, a 400-pound dummy torpedo is successfully dropped by a Curtiss F-5L for the first time.

November 27

AVIATION: At Rockaway Beach, New York, the new Curtiss NC-1 flying boat lifts off with 51 people onboard, a world record for persons carried in flight.

November 29

MILITARY: The 76th Division is the first American unit slated for transport back to the United States from France, followed by the 27th and 30th Divisions.

December 1

MILITARY: The Third Army under Major General Joseph T. Dickman begins military occupation duties in Germany, popularly known as the “Watch on the Rhine.” They are responsible for the region between Luxembourg and the Rhine River near Koblenz.

- The British transport *Mauretania* drops anchor in New York City Harbor, and disembarks 4,467 returning soldiers from the war.

December 4

AVIATION: A flight of four Curtiss JN-4 Jenny under Major Albert D. Smith lifts off from San Diego, California, to begin the first coast-to-coast flight by army pilots.

December 6

MILITARY: Demobilization and occupation duties highlight the need for additional Military Police (MP) companies, and ultimately 51 are organized and distributed about various bases in Europe.

December 8

MILITARY: Troops of the Third Army establish a bridgehead across the Rhine River in order to occupy the city of Koblenz. The American zone of occupation extends 35 kilometers on either side of the river and is 30 kilometers deep.

December 11

MARINES: Marine Corps strength reaches 2,462 officers and 72,639 enlisted men, its highest total to date.

December 12

AVIATION: Over Fort Tilden, New York, the dirigible C-1 lifts a Curtiss Army JN-4 trainer to an altitude of 2,500 feet and releases it. The aircraft simply flies away and lands safely, proving the practicality of carrying fighters on lighter-than-air vessels.

December 13

MILITARY: Upon further reflection, AEF headquarters elects to retain and deploy five more divisions for occupation duties in Germany and Luxembourg. The bulk of the army is nevertheless marching to the port of Brest for transportation back to the United States.

- President Woodrow Wilson steps ashore at Brest, France, to participate in peace negotiations, and he is greeted by the band of the 138th Field Artillery, while the entire regiment lines both sides of the street, cheering.

MARINES: The 4th Marine Brigade commences a period of occupation duty in Germany by holding a bridgehead east of the Rhine River at Koblenz.

December 22

AVIATION: Major Albert D. Smith coaxes his four Curtiss JN-4 Jenny into Jacksonville, Florida, successfully completing the first coast-to-coast flight from San Diego, California, by army pilots. He had departed the West Coast on December 4.

December 26

AVIATION: A B-type airship piloted by Ensign Thomas E. Mayham flies 690 miles round trip between Key West and Cape Sable, Florida, covering the distance in 40 hours and 26 minutes. This sets a new American record for lighter-than-air craft.

December 30

AVIATION: Over Pensacola, Florida, an H-16 flying boat piloted by Lieutenant Thomas C. Holden garners the navy's first win of a Curtiss Marine Trophy race by carrying 11 passengers for 670 statute miles.

1919

January

AVIATION: The new Aviation Section, Headquarters, Marine Corps, is assigned to Major Alfred Cunningham.

January 2

AVIATION: Major General Charles T. Menoher gains appointment as the director of the Army Air Service.

January 3

MILITARY: The city of Le Mans, France, is designated the American Embarkation Center for troops and equipment rotating back to the United States.

January 6

AVIATION: Four Army Curtiss JN-4H Jenny safely fly 4,000 miles in a cross-country flight, selecting air fields that will assist the forthcoming air mail service.

January 16

MILITARY: The Meritorious Service Medal is created by executive fiat as a non-combat award that ranks between the Legion of Merit and the Service Commendation Medal.

January 19

MILITARY: Army troops stationed at Shenhursk, northern Russia, repel a major attack by Bolshevik forces.

January 23

AVIATION: At Naval Air Station, Miami, Florida, an HS-2L flying boat flown by Ensign Fitzwilliam W. Dalrymple and Chief Machinist's Mate Frederick H. Harris and remains aloft for nine hours and 21 minutes through use of special fuel tanks.

January 24

AVIATION: At Issoudun, France, Lieutenant Temple M. Joyce wows the crowd by performing 30 consecutive loops without mishap.

February 3

AVIATION: The Fleet Air Detachment, Atlantic Fleet, passes to Captain George W. Steele. Presently, the battleship *Texas* operates a single Sopwith Camel, which is to be experimentally launched from one of its turrets.

February 4

NAVAL: The Navy Distinguished Service Medal and the Navy Cross, which rate second and third behind the Medal of Honor, are instituted by Congress for naval personnel.

February 8

AVIATION: In Miami, Florida, the new Squadron D is organized from the 1st Marine Aviation Force, the precursor to Marine Scout Bomber Squadron 231 (or VMSB-231).

February 12

MILITARY: A "Murmansk Contingent" of army railway troops is organized at the behest of President Woodrow Wilson for service in northern Russia.

NAVAL: In Annapolis, Maryland, Captain Archibald H. Scales gains appointment as the 25th superintendent of the U.S. Naval Academy.

February 21

AVIATION: The prototype Thomas Morse fighter (MB-3) makes its maiden flight and it is eventually accepted into production as the first American designed fighter aircraft; 200 will be constructed, being the largest order for military aircraft during the next 17 years.

February 22

AVIATION: At Miami, Florida, Squadron E, Marine Corps, is formed.

February 28

NAVAL: The destroyer *Osmond Ingram* is launched in honor of Gunner's Class Osmond K. Ingram, who became the first enlisted man killed after the destroyer *Cassin* was torpedoed in 1917.

March 7

AVIATION: At Naval Air Station, Hampton Roads, Virginia, a Curtiss N-9 piloted by Lieutenant Frank M. Johnson is successfully launched from a powered sea sled capable of reaching 50 knots. The concept stems from the need to launch an aircraft within range of its target and was originally developed to strike German U-boat pens.

March 8

AVIATION: Marine Corps Squadron D, consisting of six Curtiss JN-6 Jennys, deploys in the Dominican Republic to assist the 2nd Marine Brigade.

MARINES: Increasing banditry and violence in the Dominican Republic results in reinforcements in the form of Colonel James C. Breckinridge's 15th Marines, which boosts manpower levels of the 2nd Marine Brigade to 2,600 officers and men.

March 9

AVIATION: At Guantánamo Bay, Cuba, Lieutenant Commander E. O. McDonnell flies his Sopwith Camel from a platform fixed to a turret on the battleship *Texas*. This is the first such launching.

March 10

AVIATION: Brigadier General William "Billy" Mitchell replaces Major General W. L. Kenly as commander of military aeronautics within the director of Air Service.

March 12

COMMUNICATION: Lieutenant Harry Sadenwater demonstrates the viability of aerial radio broadcasts by conversing with the secretary of the navy while airborne in a navy flying boat, 65 miles from Washington, D.C.

March 15

MILITARY: The American Legion is formed at Cirque de Paris, France, as the nation's premier veterans' organization; its first meeting is attended by nearly 1,000 delegates.

MARINES: In San Diego, California, construction begins on a new Marine Corps base, the future Camp Pendleton.

March 16

MARINES: In Haiti, the Second Caco Revolt continues with unabated violence. Major General Alexander S. Williams, Chief of the Gendarmerie d'Haiti, asks for direct assistance from Brigadier General Albertus W. Catlin's 1st Marine Brigade at Guantánamo, Cuba.

March 21

MARINES: At Dufailly, Haiti, a large force of Caco rebels ambushes a five-man Gendarmerie patrol under Sergeant Nicholas B. Moskoff, mortally wounding him. The surviving patrol members manage to transport his body back to Mirebalais under fire.

March 25

MARINES: Four companies of the 7th Marines are rushed from Guantánamo Bay, Cuba, and sail for Haiti to bolster the Gendarmerie d'Haiti during an internecine revolt by Caco rebels.

March 28–29

MILITARY: At Genoa, Italy, men of the 332nd Infantry embark for reassignment back to the United States. It is the only American unit in the war to win an Italian battle steamer for its role at Vittorio Veneto.

March 31

AVIATION: Marine Corps Squadron E deploys at Port-au-Prince, Haiti, to augment the 1st Marine Brigade in its struggle with Caco rebels. They have six HS-2 flying boats and six JN-4 Jennys.

March 31–April 4

MILITARY: Bolshevik forces launch a heavy assault upon Allied defenses at Bolshie Ozerki, northern Russia, where men of the 339th Infantry and the British Yorkshire Regiment bloodily repulse them.

April 4

MARINES: At Hinche, Haiti, a marine patrol of 55 men attacks and routs an estimated 500 Caco rebels without loss.

April 17

MILITARY: At Archangel, northern Russia, Brigadier General Wilds P. Richardson arrives to take command of American Expeditionary Forces there and expedite their departure.

April 19

AVIATION: A DeHaviland DH-4B flown by Captain E. F. White and mechanic H. M. Schaefer fly nonstop from Chicago, Illinois, to New York City in six hours and 50 minutes—an American distance record.

April 26

AVIATION: At Naval Air Station, Hampton Roads, Virginia, a Curtis F-5L flying boat piloted by Lieutenant H. D. Grow completes a flight of 1,250 miles in 20 hours and 19 minutes. This remains an unofficial seaplane record until May 1925.

April 28

AVIATION: History is made at McCook Field, Ohio, when civilian Leslie L. Irvin jumps from a DH-9 at 1,500 feet wearing the experimental Model AA backpack parachute. Despite the fact that he fractured an ankle upon landing, the army orders 400 parachutes from Irvin's company.

May 1

MILITARY: Men of the 339th Infantry, preparing to hand their position over to Russian White forces, are suddenly assailed along the Vaga River, northern Russia, by superior Bolshevik forces. Once again the attacks are defeated with little loss to the Americans.

May 5

MARINES: In Washington, D.C., the new Navy Building on Constitution Avenue is the site of Marine Corps Headquarters (HQMC).

May 8

AVIATION: Seaplane Division One, consisting of three Curtiss NC flying boats (NC-1, NC-3, and NC-4) under Commander John H. Towers, lifts off from Air Station Rockaway, New York, and wings its way east to Portugal via Newfoundland and the Azores. En route two craft are delayed by mechanical failures.

May 14–15

AVIATION: Lieutenant Commander Emory W. Coil pilots airship C-5 on a 1,050-mile sojourn from Montauk Point, Long Island, New York, to St. Johns, Newfoundland, Canada, in 25 hours and 50 minutes.

May 17

AVIATION: The War Department drafts regulations making the national star a standard insignia on all American military aircraft.

May 19

AVIATION: Sergeant Ralph W. Botttriell safely demonstrates the "Type A" parachute by jumping from an aircraft over McCook Airfield, Ohio; he receives the Distinguished Flying Cross for his efforts.

May 20

AVIATION: Squadron C, Marine Corps, deploys at Quantico, Virginia, on active duty.

May 21

MILITARY: The Medal of Honor is belatedly given to Gunnery Sergeant Ernest A. Janson, 5th Marines, for his performance at Château-Thierry, where he single-handedly drove 12 German soldiers away from their machine gun nest at bayonet point.

May 27

AVIATION: A Curtiss NC flying boat piloted by Lieutenant Commander Albert C. Read reaches Lisbon, Portugal, after traversing the Atlantic via Newfoundland and the Azores—a voyage lasting 18 days. This signifies the first transatlantic crossing by large aircraft, and no mean feat considering the crudity of aviation technology.

May 28

NAVAL: Despite the onset of peace, the General Board of the Navy recommends that the great construction programs contained in the Naval Act of 1916 be completed.

May 30

MILITARY: The last American formation of the Army Expeditionary Force parades through Archangel, northern Russia, and conducts Memorial Day services at the city cemetery before departing Russian soil.

May 31

AVIATION: Lieutenant Commander A. C. Read touches down in English waters with his Curtiss NC flying boat. Read, his four crewmen, and squadron leader Commander John H. Towers all receive gold medals.

June 1

AVIATION: Major Henry H. Arnold, commanding Rockwell Field, California, begins the first fire patrol on the West Coast at the behest of the district forester in San Francisco.

June 12

AVIATION: Construction on the first hangars and airfields begins at Marine Corps Base, Quantico, Virginia.

MILITARY: General Douglas MacArthur, aged 39 years, becomes the youngest superintendent of the U.S. Military Academy, West Point, New York, with orders to “revitalize and revamp” his charge.

June 25

MILITARY: An American patrol from the 27th Infantry is attacked by Japanese forces near Sviyagino, Siberia, with one officer wounded.

- Company A, 31st Infantry, engages large Bolshevik forces at Romanovka, Siberia, losing 19 dead and 25 wounded—one of the costliest encounters of the occupation.

June 28

DIPLOMACY: In Paris, the Treaty of Versailles is signed, which officially ends World War I, but the document is never ratified by the U.S. Senate owing to provisions requiring membership in the new League of Nations.

June 30

MARINES: To date, strength of active Marine Corps personnel is 2,270 officers and 45,564 enlisted.

July 1

AVIATION: At Quantico, Virginia, the Marine Aeronautic Section is incorporated into Squadron C.

July 3

MILITARY: The Third Army is phased out once the new American Force in Germany (AFG) is created; Major General Hunter Liggett is ordered back to the United States.

- At Koblenz, Germany, Colonel Jonathan M. Wainwright organizes the Mounted Detachment for occupation service. It is subsequently known as the Provisional Cavalry Squadron.

July 7

MILITARY: Lieutenant Colonel Dwight D. Eisenhower accompanies a convoy of army trucks from Washington, D.C., to San Francisco, California, in a display of motorized mobility. Averaging 6 miles per hour, the column reaches its objective in nine weeks.

July 11

AVIATION: Congress passes the Naval Appropriations Act of 1919, which contains funding to convert the collier *Jupiter* into the navy's first aircraft carrier, the *Langley*. Two rigid airships and two merchant vessels, converted into seaplane tenders, are also acquired.

MARINES: Congress reduces authorized manpower levels to 27,400 officers and enlisted men, so Commandant George Barnett begins the process of demobilization.

July 21

MARINES: At Camp Pontanezan, France, personnel from the 4th and 5th Marine Brigades are amalgamated into the 15th Separate Battalion for additional occupation duty in Germany. The balance of the two brigades then boards ships for the United States.

July 23

AVIATION: At Meta de la Palma, Dominican Republic, the Marine Corps 1st Air Squadron undertakes its first attack on Caco rebels.

July 24–November 19

AVIATION: At Bolling Field, Washington, D.C., a twin-engine Martin MB-2 bomber flown by Lieutenant Colonel R. S. Hartz, Lieutenant F. E. Harmon, and their crew begins the first peripheral flight around the United States's borders. The journey takes 155 hours by air, and covers nearly 10,000 miles.

July 30

NAVAL: The submarine *G-2* sinks near New London, Connecticut, drowning three sailors.

July 30–August 1

MARINES: A detachment from the cruiser *New Orleans* goes ashore at Vladivostok, Russia, to protect American interests during a spate of political upheavals.

August 3

MARINES: The 4th Marine Brigade arrives back in the United States after a tour of duty in Europe.

August 5

MILITARY: Army troops, having endured a horrific Russian winter at Archangel, are withdrawn on ships and depart at the behest of Secretary of War Newton D. Baker; the Army Expeditionary Force suffered 400 casualties in various skirmishes with the Bolshevik Seventh Army.

August 8

MARINES: In New York City, the 4th Marine Brigade parades down Broadway along with elements of the Army 2nd Division.

August 9

AVIATION: The navy begins construction of its first rigid airship, the dirigible ZR-1 (*Shenandoah*), which is 682 feet in length and inflated by helium, a nonflammable gas much safer than the hydrogen employed by European machines. This vessel is to be constructed by the Naval Aircraft Factory, Philadelphia, Pennsylvania, and assembled at Lakehurst, New Jersey.

August 11

MARINES: The final 305 women performing clerical duty in the Marine Reserves during the world war are discharged.

August 12

MARINES: In Washington, D.C., President Woodrow Wilson observes the 4th Marine Brigade on its final parade; it is disbanded shortly thereafter.

September 1

AVIATION: At Aberdeen Proving Ground, Maryland, a DH-4B flown by Lieutenant Lester B. Sweely conducts the first experiment in dive-bombing by dropping a fuselage-mounted 300-pound bomb.

September 3

MILITARY: General John J. Pershing assumes the newly created rank of general of the armies of the United States with five stars—becoming the only officer in American military history entrusted with such rank on active duty. He holds it until his death on July 15, 1948.

September 11

MILITARY: In Boston, Massachusetts, Governor Calvin Coolidge orders the National Guard to patrol the city streets during a strike by local police.

NAVAL: Marines land in Honduras to help stop a serious uprising against deposed president Francisco Bertrand by followers of radical Rafael López Gutiérrez.

September 19

MILITARY: At Fort Riley, Kansas, the Mounted Service School is renamed the Cavalry School with Colonel George H. Cameron as commandant.

September 25

MILITARY: The Secretary of War's Office, concerned with enhancing the professionalism of military leadership, announces creation of new service schools to enhance the education of its future cadres.

September 26

AVIATION: Following the closing of aerial facilities in Miami, Florida, Marine Squadron A transfers its planes and personnel to Quantico, Virginia.

- At Arcadia, Florida, a flying drone known as the Kettering Bug makes 14 test launches and flights, one of which lasts 15 miles.

October 1

MARINES: To defend overseas naval facilities, the 2nd Advance Base Force is activated to serve as the West Coast Expeditionary Force.

October 2

MARINES: In Haiti, Colonel John H. Russell takes charge of the 1st Marine Brigade.

October 6

NAVAL: The submarine *Nautilus*, operating on the Hudson River, successfully transmits a radio message to its home base at New London, Connecticut, while submerged.

October 7

MARINES: At Port-au-Prince, Haiti, marines and gendarmes repel an early morning attack by Caco rebels under Charlemagne Peralte, a celebrated leader. The rebels sustain 30 deaths and defeat here marks a turning point in the rebellion.

October 8

AVIATION: A flight of 44 military aircraft depart New York for the West Coast on a transcontinental reliability and endurance test; only 15 machines are available for the return flight, of which 10 complete the trip. Lieutenant B. W. Maynard wins the Mackay Trophy for coming in first.

October 9

MILITARY: The Provision Brigade under Brigadier General William H. Sage is formed in Germany from the 5th and 50th Infantries for service in Poland; within a month the unit is ordered to remain part of AFG.

October 12–15

AVIATION: A De Havilland DH-4 bomber flown by Lieutenant Belvin Maynard departs Roosevelt Field, New York, and flies to San Francisco and back, covering 5,400 miles in the first transcontinental flight.

October 27

AVIATION: In Washington, D.C., Major General Charles T. Menoher, director of the Air Service, formally rejects a congressional proposal to establish an independent air force free of army and navy control.

October 30

AVIATION: At McCook Field, Dayton, Ohio, the first experiments with a reversible-pitch propeller, to slow an aircraft down while landing, are successfully conducted. This device will allow aircraft to land and brake on shorter runways.

October 31

MARINES: In Haiti, Caco leader Charlemagne Peralte is killed in camp by Sergeant Herman Hanneken and Corporal William R. Button, who put on black face, disguise themselves as rebels, and infiltrate their camp with a 16-man team. Both men win a Medal of Honor and the Haitian Medaille Militaire.

November 1

NAVAL: In Washington, D.C., Rear Admiral Robert E. Coontz gains appointment as the second chief of naval operations.

November 2

MARINES: Captain Herman H. Hanneken leads a detachment of Gendarmerie d'Haiti against a Caco stronghold at Fort Capois, effectively ending organized resistance in the northern part of the country.

November 16

INDIAN: Congress passes the Indian Veteran's Citizenship Bill, which proffers full citizenship rights to all Native Americans serving in or discharged honorably from the American military.

November 18

MILITARY: Major General Henry T. Allen, commanding officer of the AFG, disturbed by reports that German forces are assembling at various cities, orders the mounted squadron to be on alert status.

November 20

NAVAL: At the Mare Island Navy Shipyard, the battleship *California* becomes the first capital ship constructed on the West Coast.

December 1

AVIATION: At Headquarters Marine Corps in Washington, D.C., the Aviation Section is incorporated into the new Operations and Training Division.

December 17

MARINES: In light of recent Caco activity, the 8th Marine Regiment is reactivated under Lieutenant Colonel L. McCarty Little and assigned peacekeeping duties in Haiti.

December 23

NAVAL: In Philadelphia, Pennsylvania, the navy launches the *Relief*, its first vessel constructed from the keel up as a hospital ship. The new ship has a capacity of 500 beds and employs among the most modern medical facilities then available in the world.

MARINES: In Philadelphia, Pennsylvania, the honor of being the final Marine Corps unit sent home from World War I falls to the 15th Separate Battalion.

December 25

NAVAL: The navy organizes several gunboats into the Yangtze Patrol (YangPat) under Captain T. A. Kearney to protect American interests along that vital Chinese waterway.

December 31

MILITARY: At Brest, France, the American liner *George Washington* embarks, carrying the last 3,000 doughboys home.

1920**January**

MILITARY: The Army Nurse School is consolidated by drawing students and recent graduates together at Letterman General Hospital, San Francisco, and Walter Reed General Hospital, Washington, D.C.

January 1

MILITARY: The Provisional District of Great Britain closes down as American forces depart England. Shortly after Headquarters, U.S. Army, France, also shuts down and the handful of troops still present depart from Antwerp, Belgium, and head home.

MARINES: Colonel John H. Russell determines to intensify efforts by his 1st Marine Brigade to crush the Caco rebels in Haiti, and he issues orders to that effect.

January 15

MARINES: At Port-au-Prince, Haiti, several hundred Caco rebels under their leader Benoit Batrville stage a night attack with 300 men and penetrate the city; by dawn, marines and gendarmes kill or capture half the interlopers.

January 16–19

MILITARY: In Verhnudinsk, Russia, elements of the 27th Infantry are preparing for a 2,000-mile trek across the Gobi Desert, Mongolia, when orders arrive cancelling the expedition. All American forces are to evacuate the region. Several skirmishes occur with Red Army units; by this time the 27th acquires the nickname “Wolf-hounds” after the famous Siberian breed.

January 17

MILITARY: At Vladivostok, Russia, six companies of the 27th Infantry are shipped out to Manila, Philippines, as the American Expeditionary Force in Russia begins winding down.

NAVAL: Now that Prohibition is in effect, the Coast Guard assumes maritime duty to enforce provisions of the Volstead Act forbidding alcoholic products.

January 20

AVIATION: The Bureau of Steam Engineering receives a \$100,000 appropriation to develop and purchase a 200-horsepower radial air-cooled engine proposed by the Lawrence Aero Engine Corporation.

January 22

AVIATION: The Naval Aviation Program, which is designed to grant flight training to enlisted men, commences and lasts until 1947.

February 22

AVIATION: Lieutenant W. D. Coney makes the first solo transcontinental flight by flying his DH-4B from San Diego, California, to Jacksonville, Florida, in 22 hours, 27 minutes. This is also one of the earliest mail-service flights.

February 25

AVIATION: At Langley Field, Virginia, the first Air Service School is established.

March 18

NAVAL: The submarine *H-1* grounds itself on a shoal off Santa Margarita Island, California, killing three sailors. Six days later the vessel is lost during a salvage attempt.

March 27

AVIATION: At Hampton Roads, Virginia, a Curtiss F-5L flying boat completes the first successful test of a Sperry gyrostabilized auto pilot system.

April 1

MILITARY: The last remaining army units are withdrawn from Vladivostok, Russia, where the net effect of American involvement has been to limit Japanese expansion there.

April 4

MARINES: Sergeant Lawrence Muth, working with the Gendarmerie d'Haiti, is ambushed and killed by Cacos associated with Benoit Batrville on Morne Michel; he is the last Leatherneck to die in Haiti.

April 10

MARINES: Landing parties arrive in Guatemala City, Guatemala, to protect the American embassy during a period of civil strife.

May 1

AVIATION: The Boeing GA-1 triplane, the army's first armored aircraft, makes its debut. This twin-engined bomber is heavily armed with eight machine guns and a 37mm cannon, but it only flies at 105 miles per hour; it does not enter production.

- After examining a dozen German Fokker D-VII fighters received from the army, unique in their welded steel construction, the Bureau of Construction and Repair authorizes the acquisition of two sets of metal wings for the HS-3 flying boat. Prior to this, wood was exclusively used as a building material in American warplanes.

May 11

MARINES: In Philadelphia, Pennsylvania, the 16th Marine Regiment is organized for possible deployment to Haiti.

May 14–16

AVIATION: At Bolling Air Field, Washington, D.C., a crowd of 10,000 people attend the first Army Air Tournament, which features several captured German aircraft.

May 19

MARINES: At Petit Bois Peine, Haiti, a marine patrol under Captain Jesse L. Perkins surprises and storms the camp of Caco leader Benoit Batrville, killing him and ending the revolt.

May 25

MILITARY: In Duluth, Minnesota, the 34th Tank Company becomes the first National Guard unit to function as an armored unit.

June 4

AVIATION: In an important move, the new National Defense Act grants the Air Service permanent status on par with the infantry, cavalry, and artillery. The military rating of "airplane pilot" is also created with authorized flight pay of 50 percent above existing base pay.

MILITARY: The Army Reorganization Act is passed by Congress, which sets manpower limits for the army at 300,000. The standing establishment is formally divided into three distinct but interrelated components: the Regular Army, the

National Guard, and the Organized Reserve. The act confirms that, in wartime, the National Guard is a constituent part of the army.

- The infantry, artillery, and cavalry also receive their own chiefs while the Tank Corps is formally abolished. Henceforth, armored units fall under the preview of infantry and are tactically construed as support units.

June 11

AVIATION: At Langley Field, Virginia, Wind Tunnel 1—five feet in length—is successfully tested. The results convince the National Advisory Committee for Aeronautics (NACA) that a larger device is necessary to provide meaningful results.

June 28

AVIATION: NACA members encourage army and navy representatives to enroll air officers to the Massachusetts Institute of Technology (MIT) to study aeronautical science professionally; among the first assigned is James H. Doolittle, who eventually earns a doctorate.

- At Philadelphia, Pennsylvania, a flight of six F-5Ls commanded by Lieutenant Commander Bruce G. Leighton successfully completes a seven-month tour of the West Indies, during which by the aircraft logged 12,731 nautical miles, including 4,000 flown in conjunction with fleet maneuvers.

June 30

NAVAL: The new battleship *Tennessee* is commissioned.

July 1

MILITARY: In another sign of growing specialization, the Chemical Corps and Finance Corps are established for the army.

MARINES: In Washington, D.C., Major General John A. Lejeune is appointed the 13th commandant of the Marine Corps by Secretary of the Navy Josephus Daniels. A far-sighted individual, he strongly supports education within the Marine Corps, redesignates the Vocational Schools Detachment the Marine Corps Institute, and proffers correspondence courses to all ranks.

TECHNOLOGY: The Wright Aeronautical Company designs an engine, based upon existing Hispano-Suiza designs, that fires a 37mm cannon down the propeller shaft.

July 6

AVIATION: A Navy Curtiss F-5L seaplane makes the first flight assisted by a radio compass for navigation purposes, venturing from Hampton Roads, Virginia, to the battleship *Ohio*, then 94 miles out at sea, then back home, guided entirely by signals relayed from Norfolk.

July 12

NAVAL: Surface assets of the navy are reorganized into the Atlantic, Pacific, and Asiatic fleets. Moreover, type forces are now designated Battleship, Cruiser, Destroyer, Submarine, Mine, Air, and Train.

July 15–October 20

AVIATION: At Mitchel Field, New York, a flight of four DH-4Bs under Captain St. Clair Streett lifts off for Nome, Alaska, and back; the trip covers 9,000 miles and is successfully concluded.

July 17

NAVAL: The Navy Department adopts letter symbols as a means of identifying ship types such as “BB” for battleship and “DD” for destroyer. The same system is extended to aircraft with lighter-than-air machines receiving the designation “Z” and heavier than air as “V.” Concurrently, the letters F, O, S, P, T, and V are employed to designate fighter, observation, scouting, patrol, torpedo, and level bombing.

July 18

AVIATION: Off Hampton Roads, Virginia, navy bombers attack and sink the former German light cruiser *Frankfurt* in a major bombing experiment. The results do not go unnoticed by the army.

July 29

NAVAL: In light of major disturbances arising from the Greco-Turkish War, the cruiser *St. Louis* and six destroyers are sent to help evacuate American citizens living in the region.

August 20

MARINES: In Tungchow, China, a marine guard is installed at the American consulate.

September 1–2

NAVAL: The submarine S-5 leaks and sinks in 194 feet of water off the Delaware Capes, but filling the aft ballast tanks with air causes it to rise stern-first to the surface, and the crew escapes through a hole cut in the hull.

September 10

NAVAL: At Philadelphia, Pennsylvania, the cruiser *St. Louis* departs for Turkey to help assist and evacuate the thousands of refugees from the Russian civil war.

September 11

AVIATION: At Langley Field, Virginia, three aircraft fly under radio communication and receive directions while still in formation.

October 2

NAVAL: Near Hartford, Connecticut, Lieutenant Commander William M. Corry is thrown clear when his Curtiss JN-4 Jenny crashes and he wins the Medal of Honor, posthumously, for attempting to rescue Lieutenant Arthur C. Wagner from the flaming wreckage.

October 12

MARINES: In Santiago, Dominican Republic, marines belonging to the 4th Regiment assist in fighting severe fires.

October 14

AVIATION: The navy conducts aerial bombing tests against the old battleship *Indiana* anchored in Tangier Sound, Chesapeake Bay, to determine the accuracy of projectiles and how well vessels can withstand the destructive effect of near misses by heavy bombs.

October 20

AVIATION: A flight of four aircraft under Captain Claire Streett, who departed Mineola Field, New York, on the previous July 15, safely returns after a record

9,000-mile flight to Alaska and back. Streett receives the Distinguished Flying Cross for his effort.

October 30

AVIATION: Commandant Major General John A. Lejeune establishes an aviation organization of four Marine Corps squadrons, each containing two flights of four aircraft each.

November 1

AVIATION: Major Thomas D. Milling assumes command of the Field Officers School at Langley Field, Virginia, a precursor of the Air Corps Tactical School at Maxwell Field, Alabama. Its purpose is to create and teach new air doctrines and tactics for fast changing times.

November 25

AVIATION: At Mitchel Field, New York, Lieutenant Corliss C. Mosely, flying a Verville-Packard 600, wins the first Pulitzer Air Race at an average speed of 156.5 miles per hour.

December 1

AVIATION: At Quantico, Virginia, Marine Corps Squadrons A and C are reformed into the 3rd Air Squadron, a precursor of Marine Fighter Attack Squadron 131 (VMFA-131).

1921

January 1

AVIATION: In the Dominican Republic, Marine Corps Squadron D is disbanded and reorganized into the 1st Air Squadron.

January 10

AVIATION: At McCook Field, Dayton, Ohio, engineers test an experimental engine, boasting three banks of six cylinders, which produces 700 horsepower.

January 20

AVIATION: The secretary of the navy approves plans by the Bureau of Ordnance and Bureau of Engineering to further develop radio-controlled aircraft as potential weapons.

February 21–24

AVIATION: Flying solo, Lieutenant William D. Conley stages a transcontinental flight from Rockwell Field, California, to Jacksonville, Florida, in 22 hours, and 27 minutes of air time.

February 25

MILITARY: At Schofield Barracks, Hawaii, the Hawaiian Division is formed from various combat elements; this is the start of the future 24th Infantry Division.

February 26

NAVAL: The destroyer *Woolsey*, having collided with the freighter *Steel Inventor* off the Panamanian coast, sinks with a loss of 16 sailors.

March 5

MILITARY: In Washington, D.C., former rear admiral John W. Weeks is appointed the 48th secretary of war.

NAVAL: In Washington, D.C., Edwin Denby becomes the 42nd secretary of the navy.

March 7

AVIATION: Captain William A. Moffett replaces Captain Thomas T. Craven as the new director of naval aviation; this turns out to be a very significant appointment, for Moffett is extremely far-sighted.

March 15

AVIATION: In a significant technological advance, the Metallurgical Laboratory within the Naval Aircraft Factory reports that chromium-vanadium steel alloys of superior strength had successfully passed extensive testing and are ready for manufacture as aircraft fittings. This is the beginning of high-strength aircraft construction in the United States.

March 17

AVIATION: In Guam, Flight L, 4th Air Squadron, becomes the first Marine Corps air unit deployed to the Pacific.

March 23

AVIATION: At Chanute Field, Illinois, Lieutenant A. G. Hamilton successful parachutes from 23,700 feet.

March 25

NAVAL: The oceangoing tug *Conestoga* departs Mare Island, California, for Samoa, and her 56-man crew is never heard from again.

June 8

AVIATION: At McCook Field, Ohio, a specially modified DH-9 bomber flown by Lieutenant Harold R. Harris conducts the first experiments with a pressurized cabin.

MILITARY: In Manila, Philippines, the Philippine Division is assembled from various combat elements, including the famous Philippine Scouts.

July 1

MILITARY: In Washington, D.C., General John J. Pershing replaces Major General Peyton C. March as army chief of staff.

July 5

NAVAL: In Annapolis, Maryland, Rear Admiral Henry B. Wilson gains appointment as the 26th superintendent of the U.S. Naval Academy.

July 12

AVIATION: The Bureau of Aeronautics is founded by Congress to administer naval aviation; Rear Admiral William A. Moffett (regarded as the “Father of Naval Aviation”) is appointed its first chief.

July 21

AVIATION: Aerial avatar General William “Billy” Mitchell, Army Air Service, stages an effective display of air power by sinking the captured German battleship *Ostfriesland*, off Hampton Roads, Virginia, with his Martin MB-2 bombers. Mitchell proclaims—prematurely—that the eclipse of capital ships is at hand and the supremacy of air power beckons. The navy considers the results inconclusive.

July 21

NAVAL: The battleship *Maryland* is commissioned as the navy's newest capital ship; she is joined by two other vessels of her class.

July 23

MARINES: Lieutenant Colonel Earl H. (Pete) Ellis composes the seminal tract Operation Plan 712, "Advanced Base Operations in Micronesia," which forms the basis of Marine Corps amphibious warfare in World War II. First and foremost, it calls for the development of amphibious craft capable of carrying and delivering troops engaged in protracted island warfare. The concept is immediately endorsed by Commandant John A. Lejeune, pursuit of which will occupy the marines over the next two decades.

July 29

AVIATION: General William Mitchell, fresh from his "triumph" over the navy in Chesapeake Bay, leads a dozen Martin MB-2 bombers over New York City to demonstrate its complete vulnerability to air attack. He hopes to convince authorities that the navy can no longer defend the American coastline and that mission is best entrusted to the Air Service.

August

The Orenco D-1, the first indigenously designed American fighter craft, is jointly manufactured by the Ordnance Engineering Corporation and Curtiss. The D-1 achieves production status, but it is only manufactured in small quantities. The hunt for a better fighter craft continues.

August 1

AVIATION: A gyroscopic-stabilized, World War I-type high-level bombsight designed by Carl L. Norden is successfully tested by the Bureau of Ordnance; this is a precursor to the famous Norden bombsight of World War II.

MILITARY: At Camp Devens, Massachusetts, the Citizens Military Training Camp commences; graduates of the one-month program are eligible to apply for U.S. Army Reserve commissions.

August 3–4

AVIATION: At Troy, Ohio, a modified JN-6 Jenny flown by Lieutenant John A. Macready performs the first crop-dusting mission by spraying insecticide on caterpillars infesting local Catalpa trees.

August 10

AVIATION: The U.S. Navy Bureau of Aeronautics, which has been in existence since February 1920, is made public. Rear Admiral William A. Moffett is also revealed as its first chief. It is tasked with overseeing every phase of development, deployment, and repair of aircraft assigned to navy units.

- At Hampton Roads, Virginia, an Aeromarine 39B operated by Lieutenant Alfred M. Pride taxis onto a dummy carrier deck and is successfully snared by wires stretched in its path. This is the first practical application of carrier arresting gear.

NAVAL: The new battleship *California* is commissioned into the service with the Pacific Fleet as its flagship.

Lejeune, John A. (1867–1942)

Marine Corps general

John Archer Lejeune was born in Pointe Coupee Parish, Louisiana, the son of a former Confederate officer. In 1884 he gained admission to the U.S. Naval Academy, and he graduated four years later as a midshipman. He served on the ill-fated cruiser *Vandalia*, which was sunk in a typhoon off Samoa in March 1889. Not wishing to spend his entire career at sea, Lejeune tried transferring to the Marine Corps, but he was denied because of his high academic ratings. With an audaciousness that became his trademark, Lejeune took his fight to the secretary of the navy and, in February 1892, he received a lieutenant's commission in the Marine Corps. He spent the next 25 years performing routine duties at such distant locations as Cuba, Panama, and the Philippines. By 1903 he had advanced to major commanding the Atlantic Fleet's "Floating battalion," its first mobile strike force. He next rose to colonel commanding the Advance Base Force, and, in April 1914, he performed particularly useful service in the attack upon Veracruz, Mexico. In this capacity he directed the Marine's first aerial operations and also organized its first motorized unit. Back home he served as assistant to the commandant and was instrumental in drawing up contingency plans to expand the marines in the event of war. He advanced to brigadier general in August 1916 and, the following year, he assumed control of Quantico, Virginia.

When World War I commenced, Lejeune shipped to Europe commanding the 4th Marine Brigade, but he pleaded

in vain for General John J. Pershing to expand it into a division. Instead, he received command of the Army's Second (Indian Head) Division, becoming the first marine officer so honored. Throughout 1918, Lejeune distinguished himself in combat during the Saint-Mihiel offensive and the Battle of Mount Blanc Ridge, taking 3,300 prisoners and 121 cannon. He also performed well during the final Meuse-Argonne offensive, outpacing all other divisions in terms of miles advanced. By the time the war ended in November, Lejeune's soldiers had broken through the vaunted Hindenburg Line in several places and were among the first units to enter Germany. Lejeune, heavily decorated by the French government, fulfilled a stint of occupation duty before returning home and becoming Marine Corps commandant in 1920. He proved instrumental in establishing schools and raising academic standards in the Marine Corps, while also helping to pioneer the latest amphibious war techniques. During his tenure, aviation units also became a permanent fixture in the corps. Lejeune served no less than three terms as commandant, and he transformed the marines from a hemispheric colonial constabulary into a world-class expeditionary force. He concluded 45 years of active duty by resigning to serve as president of the prestigious Virginia Military Institute. Lejeune died in Baltimore on November 20, 1942, shortly after being elevated to lieutenant general on the retired list. Camp Lejeune, North Carolina, is named in his honor.

August 24

AVIATION: The danger inherent in lighter-than-air aircraft is underscored when the British-built U.S. Navy dirigible *R-38* crashes into the Humber River near Hull, England, killing 22 British and 16 American passengers. Among the latter is Commander Louis H. Maxfield, the prospective new commander.

September

MARINES: At Camp Perry, the Marine Corps marksman team wins all four National Match events for marksmanship (including rifle, pistol, and individual).

September 1

MILITARY: All military units within the Washington, D.C., area now fall under the purview of the newly created District of Washington.

September 13

AVIATION: A private report written by Brigadier General William “Billy” Mitchell for Chief of the Air Service major general Charles T. Menoher, unequivocally calling for an aviation branch within the Department of Nation Defense, is somehow leaked to the press.

September 16

MILITARY: The War Department issues Army Circular 244, which authorizes the wearing of distinctive regimental insignia designs.

September 18

AVIATION: At McCook Field, Dayton, Ohio, a Packard LePere fighter flown by Lieutenant J. A. Macready reaches a record altitude of 34,508 feet, winning the pilot a Mackay Trophy.

September 23

AVIATION: To underscore earlier successes, Air Service bombers attack and sink the old battleship *Alabama* in Chesapeake Bay with 2,000-pound bombs.

October 3

NAVAL: The cruiser *Olympia* sails for Le Havre, France, from Philadelphia, Pennsylvania, to retrieve the remains of the Unknown Soldier for eventual reburial in Arlington National Cemetery.

October 5

AVIATION: Command of the Air Service passes to Major General Mason M. Patrick from Major General Charles T. Menoher.

October 8

AVIATION: In Washington, D.C., a general order from the Navy Department establishes the Bureau of Aeronautics, whose many reports and opinions would be forwarded directly to the chief of naval operations.

October 18

AVIATION: At Mount Clemens, Michigan, Brigadier General William “Billy” Mitchell establishes a world speed record of 233 miles per hour flying a Curtiss R-6 racer.

October 26

AVIATION: At the Philadelphia Navy Yard, Pennsylvania, an N-9 seaplane piloted by Commander Holden C. Richardson is successfully launched from a compressed air, turntable catapult.

November 1

MARINES: To better impart a sense of tradition, Commandant major general John A. Lejeune orders that all marines be reminded of the Marine Corps's birthday. He also writes the words to an oath that all ranks repeat at ceremonies on this day at stations spanning the globe.

November 3

AVIATION: At Omaha, Nebraska, a Curtiss-Navy racer flown by civilian pilot Bert Acosta wins the Pulitzer Race with an average air speed of 176.7 miles per hour.

November 7

MARINES: A force of 53 officers and 2,200 marines are ordered by President Warren G. Harding to serve as U.S. Mail guards following a rash of mail robberies; they serve in this role until the following March.

November 9

NAVAL: The cruiser *Olympia* docks at Washington, D.C., carrying the remains of the Unknown Soldier. The vessel fires a salute as the coffin is taken ashore for internment at Arlington National Ceremony.

November 11

MILITARY: An unknown soldier from World War I is laid to rest at Arlington National Cemetery after lying in state in the Capitol Rotunda; hereafter the shrine becomes known as the Tomb of the Unknown Soldier.

Two Army Service Curtiss JN-4 Jennys (San Diego Aerospace Museum)

NAVAL: In Washington, D.C., the First International Conference on Limitation of Naval Armaments gathers with attendees from Belgium, China, France, Great Britain, Italy, the Netherlands, Portugal, and the United States. The idea was spawned by Senator William E. Borah, who feared that an unlimited arms race might ensue between the United States, Great Britain, and Japan.

November 12

AVIATION: At Long Beach, California, two JN-4 Jennys conduct the very first, albeit rather “low tech,” in-flight refueling when Lieutenant Wesley May crawls along the wing of one aircraft to another with a five-gallon can of gasoline strapped to his back, then dumps the contents into its gas tank.

November 14

MILITARY: The Army Road Commission begins coordinating all public works relating to the nation’s highways.

November 17

MILITARY: Due to budget shortfalls in the War Department, the 3rd Infantry (“The Old Guard”) is ordered to march from Camp Sheridan, Ohio, to Fort Snelling, Minnesota—a 950 mile trek. Surprisingly, the regiment covers an average of 30 miles per day, despite snow and ice, and successfully completes one of the military’s longest slogs.

November 19

NAVAL: At Newport News, Virginia, the battleship *West Virginia*, which possessed the heaviest defensive armor of any capital vessel of the day, is launched. This is also the last vessel of its class launched before provisions of the Washington Naval Treaty are in force.

December 1

AVIATION: At Norfolk, Virginia, the navy’s nonrigid C-7 become the first American airship inflated with nonflammable helium instead of the highly explosive hydrogen gas. It safely completes a short, round trip from Norfolk to Washington, D.C., under Lieutenant Commander Ralph F. Wood.

MARINES: In San Diego, California, the new Marine Corps Base formally opens and is occupied by the 5th Brigade.

December 22

MILITARY: In Harrisburg, Pennsylvania, the War Department grants federal recognition to the headquarters of the 28th Division. A total of 18 National Guard divisions will be created by the advent of World War II.

1922

January 16

AVIATION: In another significant move, the Bureau of Ordnance orders army-type seat pack parachutes to be distributed among Marine Corps aviation units currently deployed in Haiti, the Dominican Republic, and at Quantico, Virginia.

January 25

MILITARY: At Fort Hunt, Virginia, General John J. Pershing, army chief of staff, establishes the U.S. Army band under Captain Parry W. Lewis; it subsequently becomes known as “Pershing’s Own.”

MARINES: A detachment from the cruiser *Galveston* lands at Cortino, Nicaragua, to assist the legation guard during a period of political unrest.

February 1

MILITARY: The army begins publishing its own professional journal, *Military Review*.

February 6

NAVAL: In Washington, D.C., the Five Power Treaty (the United States, Great Britain, Japan, France, Italy) is signed, which establishes the warship ratio between nations, respectively, at 5:5:3:1.75:1.75 with limits on tonnage and number of all capital warships. A 10-year moratorium is imposed forbidding the construction of new warships greater than 10,000 tons in displacement and 8-inch guns, while capital vessels cannot exceed 35,000 tons and 16-inch guns. The United States and England are further required to halt all fortification building in the Pacific while Japan can counter its inferiority in tonnage by beefing up its homeland defenses. Significantly, this is the first time in history that the British have ever agreed to naval parity.

February 7

AVIATION: At the Aeronautical Engine Laboratory, Washington Navy Yard, D.C., the 200-horsepower Lawrence J-1 radial air-cooled engine successfully completes 50 hours of intensive testing. Soon radial engines will be exclusively employed by all navy aircraft and replace more vulnerable and complicated in-line engines.

February 11

MARINES: In Washington, D.C., President Warren Harding appoints Brigadier General John H. Russell the first U.S. high commissioner to Haiti, with authority over American diplomatic and military concerns; he remains in office until November 12, 1930.

February 21

AVIATION: The lighter-than-air balloon *Roma*, purchased from the Italian government, strikes a high-tension wire near Hampton Roads Army Air Base, Virginia, killing 34 of its 45-man crew.

March 20

NAVAL: At Norfolk, Virginia, the navy commissions the *Langley* (née *Jupiter*) a converted collier, as its first operational aircraft carrier under Commander Kenneth Whiting. Its ungainly appearance soon results in the nickname "Covered Wagon."

March 29

NAVAL: The Navy General Board issues its "United States Naval Policy," which mandates creation of naval forces "second to none" within recent treaty provisions.

April 22

AVIATION: The secretary of the navy officially assigns one spotter aircraft to all of its battleships and cruisers, and orders test to determine the feasibility that additional aircraft might be carried.

April 25

AVIATION: The ST-1 torpedo plane, designed and constructed by the Stout Engineering Laboratory, debuts as the navy's first, all-metal airplane. It was not adopted for service but still constitutes a milestone on the path to all-metal aircraft.

April 28

MARINES: A detachment from the cruiser *Albany* goes ashore at Beijing, China, to reinforce the legation guard during a period of civil war.

May 5

AVIATION: At Quantico, Virginia, the Marine Corps Air Facility is named in honor of Lieutenant Walter V. Brown, who died in a crash in June 1921.

MARINES: Several Marine Corps detachments are landed at Taku, China, by the Asiatic Fleet for duty in Beijing; the crisis proves to be short-lived and they are returned to their vessels.

May 24

AVIATION: Routine launching of airplanes by ships at sea commences today when the battleship *Maryland* dispatches a Vought VE-7 aloft with its turret-mounted compressed air catapult.

June 12

AVIATION: At McCook Field, Dayton, Ohio, a supercharged Martin MB-2 bomber flown by Captain A. W. Stevens reaches a record altitude of 24,000 feet for that type of aircraft.

June 16

AVIATION: At Bolling Field, D.C., Lieutenant Clayton L. Bissell commences a series of night flights to prove that nocturnal flying is as safe as daylight flights.

June 19

AVIATION: At Quantico, Virginia, Marine Corps air units begin maneuvering with the East Coast Expeditionary Force operating at Gettysburg, Pennsylvania.

June 29

AVIATION: At Mitchel Field, New York, inventor Lawrence Sperry test flights his radio-controlled "aerial torpedo" over flights of up to 90 miles while being guided by a mothership. The concept is ahead of its time yet neither the army nor navy expresses any interest.

June 30

MILITARY: In light of budget tightening, Congress establishes army manpower levels at 175,000 men; this results in the discharge of 600 officers and 100,000 soldiers.

July 1

MILITARY: Both Secretary of War John W. Weeks and Army Chief of Staff John J. Pershing protest recent congressional manpower cuts, feeling they place national security in jeopardy.

NAVAL: Under the recent Five Power Treaty, the United States is entitled to two aircraft carriers of 33,000 ton apiece. Congress authorizes the conversion of heavy cruisers *Lexington* and *Saratoga* into flattops. Both vessels will play a critical role in the opening months of World War II.

July 17

AVIATION: In Washington, D.C., the chief of naval operations instructs the various bureaus to send representatives to a board convened for the purpose of drawing up tactical doctrines governing spotting aircraft and fleet fire control.

August 1

MARINES: The 1st and 4th Regiments incorporate personnel and equipment from the disbanded 3rd and 15th Regiments.

August 3

AVIATION: Existing Marine Corps air elements at Quantico, Virginia, are redesignated the 1st Aviation Group, East Coast Expeditionary Force. Henceforth, squadrons begin receiving specific mission designations for fighting, scouting, or bombing.

August 17

AVIATION: The Marine Corps 1st Air Squadron is renamed Marine Observation Squadron 1 (VO-1M).

August 24

AVIATION: At Quantico, Virginia, the Marine Corps 3rd Air Squadron is renamed Marine Fighting Squadron 1 (VF-1M).

September

MILITARY: The 3rd Division ("Rock of the Marne") establishes its headquarters at Camp Lewis, Washington, where it remains for a decade.

September 4

AVIATION: Lifting off from Pablo Beach, Florida, Lieutenant James H. "Jimmy" Doolittle flies a modified DH-4B over 2,100 miles before landing at Rockwell Field, San Diego, California, 24 hours later. This is also the first transcontinental flight made in a single day.

September 14–23

AVIATION: The nonrigid airship C-2, piloted by Major H. A. Strauss, departs Langley Field, Virginia, and flies cross-country to Ross Field, California, the first such flight for this type of airship.

September 16

NAVAL: Following Turkish victory in the Greco-Turkish War, a three-destroyer force under Commander Halsey Powell assists in the evacuation of Greek refugees from Smyrna. A total of 262,578 people are rescued by American vessels and a variety of transports.

September 27

AVIATION: During war games off the Virginia Capes, a force of 18 PT torpedo planes score "hits" on the battleship *Arkansas* as it maneuvers at full speed. Of the 17 torpedoes unleashed, eight are judged as hits. This is the first mass torpedo launch made against ships under steam and clearly demonstrates that aerial torpedoes can be made to run straight.

TECHNOLOGY: At the Naval Aircraft Radio Laboratory, Anacostia, Washington, D.C., scientists Albert H. Taylor and Leo C. Young make the first recorded "radar observations."

October 5

AVIATION: At Rockwell Field, California, Lieutenants J. A. Macready and P. G. Kelly set an airborne endurance record of 35 hours, winning the Mackay Trophy.

October 8

AVIATION: At Detroit, Michigan, a TR-1 seaplane flown by Lieutenant Adolphus W. Gorton wins the Curtiss Marine Trophy Race with a speed of 112 miles per hour.

October 13

AVIATION: At Selfridge Field, Michigan, Lieutenant T. J. Koenig flies a LePere-Liberty airplane at the National Air Races, winning the Liberty Engine Builders Trophy with a speed of 129 miles per hour.

October 14

AVIATION: At Detroit, Michigan, this year's Pulitzer Race Trophy goes to Lieutenant Harold R. Brow, who flew a Curtiss R-6 racer with an average speed of 193 miles per hour.

October 14–November 29

AVIATION: A pair of DeHaviland DH-4Bs flown by Lieutenants Ben H. Wyatt and George T. Owen complete a transcontinental flight to and from San Diego, California, covering 7,000 miles in 90 hours of flight time.

October 17

AVIATION: At the York River, Virginia, Commander Virgil C. Griffith flies his Vought VE-7 off the carrier *Langley*; this is the first time an aircraft has officially been launched by a carrier in naval history.

October 18

AVIATION: At Selfridge Field, Michigan, Colonel William G. Mitchell establishes a new air speed record of 222.96 miles per hour in a Curtiss R-6 racer. This is the first aerial record certified outside of France.

October 20

AVIATION: At McCook Field, Dayton, Ohio, Lieutenant Harold R. Harris becomes the first aviator saved by a parachute when his Loening W-2A aircraft loses a wing in flight.

October 26

AVIATION: Off Cape Henry, Virginia, Lieutenant Commander Godfrey DeC. Chevalier successfully lands his Aeromarine 39B onboard the carrier *Langley* for the first time in naval history.

October 27

NAVAL: The first national celebration of what becomes known as Navy Day is sponsored by the Navy League of the United States. This is also the birthday of future president Franklin D. Roosevelt, a strong advocate of naval power.

November 2–3

AVIATION: A Fokker T-2 aircraft flown by Lieutenants John A. Macready and Oakley G. Kelly covers a record distance of 2,060 miles between San Diego,

California, and Benjamin Harrison, Indiana; engine problems stopped them 800 miles of their original destination at New York.

November 8

AVIATION: The Air Service Medical Research Laboratory and School for Flight Surgeons are combined into the new School of Aviation Medicine.

November 18

NAVAL: At the York River, Virginia, a PT aircraft flown by Commander Kenneth Whiting is successfully catapulted from the deck of the carrier *Langley* for the first time. This is another landmark development in navy history.

November 20–December 18

NAVAL: Victims of a severe earthquake in Chile receive emergency supplies from the cruisers *Denver* and *Cleveland*.

December 6

NAVAL: In a major reorganization, the Atlantic and Pacific fleets are combined into the United States Fleet under Admiral Hilary P. Jones; this is subdivided into the Scouting Fleet and the Battle Fleet.

December 16

NAVAL: Off Istanbul, Turkey, the destroyer *Bainbridge* rescues 482 people from the French transport *Vinh-Long* despite violent explosions onboard that sink it. Lieutenant Commander Walter A. Edwards wins the Medal of Honor for his efforts.

December 18

TECHNOLOGY: At McCook Field, Dayton, Ohio, the army's first rotorcraft, a de Bothezat helicopter, rises vertically and flies 300 feet off the ground; Major Thurmond H. Bane becomes the army's first helicopter pilot.

1923

January 5

AVIATION: At McCook Field, Ohio, personnel from the Army Air Service and Cornell University make the first recorded attempt at "cloud seeding."

January 9

AVIATION: In Washington, D.C., a War Department board under Major General William Lassiter advocates new legislation to expand the Army Air Service. Moreover, under a new organizational scheme, the new force would possess its own general headquarters and perform strategic missions without interference from surface forces.

January 24

MILITARY: At Fortress Ehrenbreitstein, Koblenz, Germany, Major General Henry T. Allen orders the U.S. flag lowered at ceremonies marking the end of American occupation duty. The Americans are replaced by French troops.

February 6

AVIATION: At Scott Field, Illinois, the army airship D-2 goes aloft and reaches an altitude of 1,000 feet for an hour.

- The Aeronautical Engine Laboratory is officially transferred from the Washington Navy Yard, D.C., to the Naval Aircraft Factory, Philadelphia, Pennsylvania, rendering the latter place the center of naval aeronautical development.

February 7

AVIATION: At Selfridge Field, Michigan, Lieutenant Russell A. Meredith lifts off with a physician on board and flies to Beaver Island to treat a critically ill man; Meredith receives the Distinguished Flying Cross for his actions.

February 12

AVIATION: The Bureau of Navigation decrees that two years of mandatory service in an operating unit following graduation from flight school are no longer necessary for prospective naval aviators.

February 14

MARINES: A landing detachment from the gunboat *Asheville* debarks at Matsu Island, China, to quell bandit attacks upon American citizens.

February 18–22

NAVAL: Fleet Problem I, the defense of the Panama Canal region, is undertaken by ships of the U.S. Fleet to evaluate the threat of possible air attacks. Hereafter, annual fleet exercises become the norm and aircraft figure prominently in them.

February 21

AVIATION: Deck handling tests with a trio of Aeromarine 39Bs on board the carrier *Langley* establish that a minimum of two minutes is required to prepare the deck after each landing. With experience, three aircraft can be landed and secured in only seven minutes.

March 1

AVIATION: The Air Service accepts the Goodyear TC-1 nonrigid airship, the largest such craft delivered to date.

March 5

AVIATION: At Selfridge Field, Michigan, a Boeing MB-3A fighter successfully jettisons an external auxiliary fuel tank, which also increases the aircraft's range to 400 miles.

March 23

MILITARY: In Washington, D.C., Congress creates the American Battle Monuments Commission, tasked with honoring American soldiers and sailors killed overseas. General John J. Pershing is appointed the first chairman, who serves until 1948.

March 27

AVIATION: Major General William Lassiter of the Lassiter Board declares that, to reach its fullest potential, the Air Service requires operational freedom at the strategic level to strike targets beyond the reach of land and naval forces. Given the entrenched resistance to airborne independence, he also notes it will probably require congressional action to acquire such a function.

March 29

AVIATION: Lieutenant R. L. Maitland establishes a new air speed record of 239.95 miles per hour in a Curtiss R-6 racer.

April 1

MILITARY: The United States begins expanding its military contacts in Asia with creation of the "U.S. Forces in China." This serves as the headquarters for all army troops assigned with protecting residential area of Tientsin and the railroad to Peking (Beijing).

April 15

AVIATION: Experiments conducted by the Naval Aircraft Factory result in a F-5L seaplane being guided by remote control at a distance of 10 miles from the transmitter. The report also concludes that takeoffs and landings by radio control are also possible.

April 16–17

AVIATION: During a practice flight, Lieutenants John A. Macready and Oakley G. Kelly reach world distance, payload, and endurance records of 2,516 miles in 36 hours and four minutes while carrying 10,800 pounds of supplies.

April 20

AVIATION: The first aerial refueling takes place, via a rubber hose extended through the air, over Rockwell Field, California.

April 26

NAVAL: In Washington, D.C., the General Board recommends the development of bases at Pearl Harbor, Hawaii, Guam, and the Philippines, to prepare for a possible war with Imperial Japan. They also seek a combat fleet capable of sustained operations over the vast Pacific reaches.

May 2–3

AVIATION: At Rockwell Field, San Diego, California, Army Air Service lieutenants John A. Macready and Oakley G. Kelly complete the first nonstop, transcontinental flight across the United States in a Fokker T-2; the mission originates at Roosevelt Field, New York, lasts 26 hours, 50 minutes, and traverses 2,500 miles. They are greeted by an estimated 100,000 spectators upon arrival.

May 3

MILITARY: The Chemical Warfare Service, eager to curry civilian favor, shows the utility of peacetime chemical use by demonstrating airplanes for use as crop dusters.

May 14

AVIATION: The army accepts the Curtiss PW-8 pursuit (fighter) aircraft for flight trials. This is the first in a long series of fighter craft manufactured by Curtiss; the "W" signifies a water-cooled engine.

May 26

AVIATION: A DH-4B bomber flown by Lieutenant H. G. Crocker fliers from Houston, Texas, to Hamilton, Ontario, Canada, in an early south-to-north transcontinental flight.

- To avoid duplication of effort and to better harmonize research efforts, the Navy Bureau of Aeronautics and the chief of the Air Service agree that it is best for both services, and the aviation industry, to work under identical aeronautical specifications wherever possible.

June 2

NAVAL: The Naval Research Laboratory is founded.

June 6–7

AVIATION: At San Diego, California, navy aviators set 15 speed, distance, duration, and altitude records for Class C seaplanes, including Douglas DTs and Curtiss F-5Ls.

June 11

NAVAL: At Norfolk Navy Yard, Virginia, Machinist Mate William R. Huber pulls a shipmate to safety following a boiler explosion on the destroyer *Bruce*, winning the Medal of Honor.

June 12

AVIATION: At San Diego, California, a Douglas DT torpedo plane flown by Lieutenant Mainrad A. Schur sets three world records for Class C seaplanes with a speed of 70.49 miles per hour, distance of 792.25 miles, and duration of 11 hours, 16 minutes.

June 13

AVIATION: At San Diego, California, a TS seaplane flown by Lieutenant Ralph A. Ofstie sets a world speed record for Class C seaplanes by hitting 121 miles per hour.

June 20

AVIATION: At McCook Field, Dayton, Ohio, the prototype Gallaudet CO-1 monoplane, the army's first all-metal aircraft, makes its maiden flight. The machine was designed and built by the Air Corps Engineering Division at the field but proves unsuccessful. Only three are constructed, then discarded.

June 27

AVIATION: At Rockwell Field, San Diego, two DH-4 bombers perform the first air-to-air transfer of fuel over a hose extended from one aircraft to the other. Lieutenants Lowell H. Smith and John P. Richter remain aloft in this manner over the next four days.

June 30

MARINES: In Washington, D.C., adroit maneuvering by Commandant John A. Lejeune forestalls congressional cuts in Marine Corps manpower to 13,000 officers and men; the force will stay at present levels of 1,141 officers and 18,533 men.

July 31

AVIATION: The policy of assigning experimental aircraft to fleet squadrons for operational testing is adopted by the Bureau of Aeronautics.

NAVAL: In Washington, D.C., Admiral Edward W. Eberle is appointed the third chief of naval operations.

August 11

MARINES: The Marine Corps recruitment depot, formerly at Mare Island, California, permanently transfers south to San Diego.

August 22

AVIATION: At McCook Field, Dayton, Ohio, the huge and experimental Barling XNBL-1 bomber makes its maiden flight. Gigantic for its age, the craft spanned

120 feet, was powered by six 400-horsepower Liberty engines, and flew at a top speed of 93 miles per hour. It is not accepted into service but does anticipate large strategic bombers that emerged a decade hence.

August 27–28

AVIATION: At Rockwell Field, California, a DH-4B bomber flown by Lieutenants John P. Richter and Lowell H. Smith sets new distance and endurance records by covering 3,293 miles in 37 hours and 15 minutes of flight.

September 1

NAVAL: In Yokohama, Japan, staggered by a destructive earthquake, Ensign Thomas J. Ryan wins the Medal of Honor for rescuing a woman trapped in a burning building.

September 4

AVIATION: At Lakehurst, New Jersey, the navy's first rigid airship, *Shenandoah*, performs its maiden flight with Captain Frank R. McCrary at the helm.

September 5

AVIATION: Off Cape Hatteras, North Carolina, General John J. Pershing is among observers watching army bombers attack and sink the old battleships *New Jersey* and *Virginia* in the latest bombardment tests.

NAVAL: In the wake of a devastating earthquake, ships of the U.S. Asiatic Fleet anchor off Yokohama, Japan, to lend assistance and humanitarian aid.

September 8

NAVAL: Disaster strikes when Destroyer Squadron 11, attempting to navigate the Santa Barbara Channel in a thick fog, runs aground on Point Pedernales (also known as the Devil's Jaw), Santa Barbara, California. All six vessels are wrecked and one, the *Young*, capsizes, killing 22 sailors.

September 13–December 14

AVIATION: At Langley Field, Virginia, a Martin MB-2 bomber flown by Lieutenants J. F. Whitley and H. D. Smith departs on a transcontinental tour that ends at Rockwell Field, California, covers 8,000 miles, and last three months without a major mishap.

September 18

AVIATION: A diminutive Sperry M-1 Messenger flown by Lieutenant Rex L. Stoner makes a successful "hook up" with an army D-3 airship.

October 6

AVIATION: At the Pulitzer Trophy flying competition in St. Louis, Missouri, Lieutenant Al Williams establishes a new speed record of 243.76 miles per hour.

October 10

AVIATION: The large rigid airship *Shenandoah* is commissioned into service by the navy; it is the first American dirigible to employ the inert gas helium for lift instead of the highly explosive hydrogen.

October 25

AVIATION: The gigantic Barling bomber sets a payload record by carrying 3,000 kilograms of cargo at 5,344 feet for a period of one hour and 19 minutes.

October 28

NAVAL: In Limón Bay, Panama, submarine *O-5* is struck by the steamer *Abangarez*; Torpedoman Second Class Henry Breault wins the Medal of Honor for refusing to abandon a man in the forward section and choosing instead to remain with him 31 hours until rescued.

November 4

AVIATION: Navy lieutenant Alford Williams sets a new air speed record of 266.59 miles per hour in a Navy-Curtiss racer.

November 5

AVIATION: At Hampton Roads, Virginia, a diminutive Martin MS-1 scout aircraft is stored, transported, and then reassembled and launched from the submarine *S-1*. The test demonstrates the operational feasibility of sub-stowed aircraft, but the practice is never formally adopted by the navy.

November 15

MARINES: A landing force is deployed at Tungsham, China, to protect American missionaries from ongoing civil strife.

November 16

AVIATION: In the interest of promoting safety, the Bureau of Aeronautics mandates that all aircraft attached to vessels of the fleet receive complete overhauls every six months.

December 3

AVIATION: The chief of naval operations approves a scheme to found a special service squadron for the purpose of developing long-range patrolling aircraft. The task falls upon VS-3 stationed at Anacostia, Washington, D.C.

December 6

NAVAL: Escalating civil war in China results in the dispatch of several destroyers of the U.S. Asiatic Fleet to Canton to protect foreign lives and property.

December 25

MARINES: At Quantico, Virginia, the 10th Regiment, accompanied by elements of the East Coast Expeditionary Force, departs on transports to serve with the fleet during Caribbean maneuvers.

1924

January 2

MARINES: The 5th Regiment and elements of the East Coast Expeditionary Force embark on transports for winter maneuvers in the Caribbean with the U.S. Fleet.

January 10

MARINES: At Culebra, Puerto Rico, the 10th Marines begin maneuvers testing the defense of an advanced naval and air base.

January 14–17

MARINES: “Seizing” the Panama Canal is the object of ongoing maneuvers by the 5th Regiment.

January 16

NAVAL: Off Veracruz, Mexico, the light cruiser *Tacoma* strikes the Blanquilla Reef and sinks, losing its captain and three sailors.

January 23

MARINES: A Moro uprising on Boca Grande Island, Philippines, results in a landing detachment from the gunboat *Sacramento* coming ashore to quell it.

January 31

MARINES: At Culebra, Puerto Rico, the 5th Marines stage mock attacks against the 10th Marines to test naval and air base defenses.

February 4

AVIATION: The Bureau of Aeronautics revives its paint scheme regulations by decreeing that all navy aircraft will be painted in naval gray, although aircraft deployed abroad can display bright yellow upper wings to increase visibility if forced to land.

February 20

MARINES: Ever media-conscious, the marines host several newspaper reporters during combined-arms amphibious maneuvers at Culebra, Puerto Rico; overall reaction by the press is highly favorable.

February 21

MILITARY: In recognition of the growing importance of technology to military affairs, the Army Industrial College is founded in Washington, D.C.

February 22

AVIATION: An XC-05A flown by Lieutenant John A. Macready reaches a record altitude of 38,704 feet.

February 27

AVIATION: At Kelly Field, Texas, Corporal C. E. Conrad successfully parachutes from a DH-4B bomber at 21,500 feet.

February 28–March 19

MARINES: The light cruiser *Denver* lands a marine detachment at Le Ceiba, Honduras, to protect American lives during a period of revolutionary distress.

March 3

MARINES: A landing detachment from the destroyer *Billingsley* goes ashore at Tela, Honduras, to protect American lives and property.

March 4

AVIATION: At North Bend, Nebraska, two DH-4 and two MB-2 bombers unload bombs on the Platte River to break up the surface ice and avert the potential for subsequent flooding.

MARINES: A detachment from the cruiser *Denver* lands at Puerto Cortez, Honduras, to protect American lives and property.

March 7

AVIATION: A DH-4B bomber flown by Lieutenants E. H. Barksdale and B. Jones makes a 575-mile flight between Mitchel Field, New York, and McCook Field, Ohio, relying only on cockpit instruments.

March 9

MARINES: A landing party from the cruiser *Denver* arrives at Le Ceiba, Honduras, to protect American lives and property.

March 17

MARINES: A detachment of 176 officers and men carve out a neutral zone between feuding factions at Tegucigalpa, Honduras.

March 19

NAVAL: In Washington, D.C., former chief justice of the California Supreme Court Curtiss D. Wilbur is sworn in as the 43rd secretary of the navy.

March 21

AVIATION: To enhance safety, a directive from the Bureau of Aeronautics requires all navy personnel to wear a parachute while flying on airplanes.

April 6

AVIATION: A group of four Douglas World Cruisers christened *Boston*, *Chicago*, *New Orleans*, and *Seattle* takes off from Seattle, Washington, on the first attempted round-the-world flight, a 26,350-mile mission. This is also the first transpacific flight and the first westbound crossing of the North Atlantic.

April 21

AVIATION: The Bureau of Aeronautics orders the Bureau of Steam Engineering to explore development of a small radio capable of being fitted into fighter aircraft, yet able to give and receive signals at a 20-mile range.

April 30

AVIATION: The Douglas World Cruiser named *Seattle* crashes into an Alaskan mountainside, although the crew survives and is rescued.

May 19

AVIATION: A LePere Liberty 400 flown by Lieutenant John A. Macready reaches a new altitude record of 35,329 feet.

MILITARY: A \$2 billion Army Bonus Bill is approved by Congress for veterans of World War I; annuities are to be paid for the next 20 years.

May 20

MILITARY: Future Yankee slugger George Herman (Babe) Ruth enlists in the New York National Guard to assist a recruiting drive.

June 7

MILITARY: The Army Chemical Warfare Service receives a \$25,000 grant from Congress to develop new techniques for combating a boll weevil infestation.

June 12

NAVAL: A turret explosion onboard the battleship *Mississippi* kills three officers and 44 enlisted men.

July

MILITARY: In the Philippines, members of the Philippine Scouts mutiny briefly over pay inequities compared to the regular army units they serve alongside.

July 12

MARINES: At Santiago, Dominican Republic, the new constitutional government is sworn in and Brigadier General Harry Lee steps down as military governor of the island.

July 22

MILITARY: General William “Billy” Mitchell, having concluded a tour of Asian military establishments, predicts a future war with Japan for supremacy in that region. He files a 325-page report to that effect and is scoffed at by superiors. In it, Mitchell believes that the enemy will strike Pearl Harbor, Hawaii, at 7:30 on a Sunday morning (he is only 25 minutes off) with carrier-launched aircraft.

August 3

AVIATION: The Douglas World Cruiser *Boston* drops into the North Sea after losing oil pressure and is destroyed by pounding waves; the crew survives and is rescued.

August 8–September 18

AVIATION: In Narragansett Bay, Rhode Island, the airship *Shenandoah* moors itself to a special mast fitted to the oiler *Patoka*, just prior to conducting extensive aerial exercises with the fleet. This is the first time a mooring mast is placed onboard a vessel to allow extended airship operations with the fleet.

- The Marine Corps 1st Aviation Group begins aerial maneuvers in concert with the East Coast Expeditionary Force at Antietam, Maryland.

August 11

AVIATION: Scout planes launched from the cruiser *Raleigh* reconnoiter the Greenland coast from Angmagssalik to Cape Farewell for possible emergency landing sites for army pilots completing the last leg of their circumnavigation flight, across the Atlantic via Iceland.

August 16

AVIATION: Marine Corps VO-1M arrives at Naval Air Station, North Island, San Diego, California, becoming the first marine squadron posted to the West Coast.

September 1

AVIATION: Unwilling to rely on the army for such an essential service, naval authorities open a parachute school at the Naval Air Station Lakehurst, New Jersey.

September 7

MARINES: Continuing revolutionary unrest prompts the cruiser *Rochester* to land its detachment at La Ceiba, Honduras, to protect American interests and lives.

September 9

MARINES: The detachment from the cruiser *Huron* lands and travels overland to Beijing, China, to reinforce the legation guard there.

September 10

MARINES: Landing detachments from the cruiser *Rochester* again go ashore at La Ceiba, Honduras, to help quell revolutionary violence.

September 13

MILITARY: General John J. Pershing, army chief of staff, concludes 42 years of distinguished service by retiring; he is succeeded by Major General John L. Hines.

September 15

AVIATION: A Curtiss N-9 seaplane flies for 40 minutes while under radio control at the Naval Proving Grounds, Dahlgren, Virginia. The aircraft subsequently sinks from damage after a hard landing, but the principle of radio-directed flight is growing increasingly practical.

September 18

MARINES: Final elements of the 2nd Provisional Marine Brigade board ships in Santo Domingo, Dominican Republic, and head home. This move formally ends the eight-year American protectorate there.

September 28

AVIATION: Two of the remaining Douglas World Cruisers, *Chicago* and *New Orleans*, complete the first round-the-world flight by touching down in Seattle, Washington. The craft covered 27,553 miles in only 175 days, which required 365 hours of flight time. Lieutenants Lowell Smith, Leslie Arnold, Erik Nelson, and John Harding all receive the Mackay Trophy.

October 6

MARINES: A detachment from the gunboat *Asheville* debarks at Shanghai, China, prior to marching to Tientsin to protect American interests. En route they are joined by contingents from several other navies.

October 7–25

AVIATION: The airship *Shenandoah* completes a round-trip mission from Lakehurst, New Jersey, to and from the West Coast, covering 9,317 miles, in 258 hours. This is the first such endurance run by an airship and is completely successful.

October 15

AVIATION: The dirigible airship ZR-3, constructed at Wilhelmshaven Germany, is flown 5,000 miles to Lakehurst, New Jersey, and taken into navy service as the *Los Angeles*. This is the first airship obtained as part of a reparations agreement.

October 16

AVIATION: Gunner William M. Coles is the first naval enlisted man to successfully employ a parachute after his JN collides with another aircraft over Coronado, California.

October 20

NAVAL: Disaster strikes onboard the light cruiser *Trenton* off Norfolk, Virginia, when a forward gun turret explodes. Two sailors posthumously win the Medal of Honor for refusing to flee and attempting to prevent the fire from reaching other magazines.

October 23

MARINES: Detachments from the cruiser *Huron* depart Shanghai, China, and march overland to Beijing, ending a two-month period of guarding American interests against revolutionary violence.

October 28

AVIATION: At Bolling Field, Washington, D.C., an Air Service airplane successfully seeds clouds with electrically charged sand for the first time.

November 11

AVIATION: In San Diego Harbor, California, Lieutenant Dixie Kiefer pilots the first airplane launched at night by a steam catapult; the device is mounted on a turret of the anchored battleship *California*, which trained its searchlights 1,000 yards ahead of the aircraft to guide it.

November 14

MEDICAL: In Washington, D.C., the chief of the Bureau of Aeronautics and the Bureau of Medicine and Surgery agree to qualifications for the title of Flight Surgeon. Hereafter, prospective candidates will have to complete a three-month course at the U.S. Army School of Aviation followed by a three-month stint with a Naval Aviation unit before obtaining their designation.

November 17

AVIATION: After two years in experimental status, the converted collier *Langley* joins the fleet as the first operational flagship of Aircraft Squadrons, Battle Fleet; it is also the navy's first bona fide aircraft carrier.

November 25

AVIATION: At Naval Air Station Anacostia, Washington, D.C., Mrs. Calvin Coolidge presides over ceremonies christening the rigid airship *Los Angeles*. This German-built machine was recently flown across the Atlantic Ocean without mishap.

December 13

AVIATION: At Philadelphia, Pennsylvania, the NM-1, an early all-metal airplane, is rolled out for testing by the Naval Aircraft Factory. It is intended for use by Marine Corps aviators during expeditionary forays.

December 14

AVIATION: At Bremerton, Washington, the battleship *Mississippi* successfully launches an Martin MO-1 aircraft using the new gunpowder catapult; the system is widely adopted by battleships and cruisers.

1925**January 15**

MARINES: Renewed civil strife in Shanghai necessitates a landing detachment from the gunboat *Sacramento*, who go ashore to protect the International Settlement there.

January 17

AVIATION: In Washington, D.C., Admiral Edward W. Eberle submits a report to the secretary of the navy from a special board he had overseen. Despite the usual overtures to the battleship, Eberle stresses the growing importance of naval aviation to the fleet. He also endorses the new carriers *Lexington* and *Saratoga*, implores that a new 23,000-ton carrier be acquired, and argues for a comprehensive aircraft production program to insure steady acquisition of the most modern designs.

January 18

AVIATION: At Bolling Field, Washington, D.C., the new Loening amphibian is publicly revealed after a year in secret development. This all-metal biplane can operate on either land or water and can carry three passengers for 700 miles.

January 22

AVIATION: Off San Diego, California, VF-2 becomes the first naval aviation squadron to operate and train as a carrier squadron by conducting takeoffs and landing on the *Langley*.

MARINES: The detachment at Shanghai, China, is augmented by an additional 140 marines from the Philippines.

February 4

AVIATION: An earlier regulation requiring all naval aircraft to undergo overhauls every six months proving impractical, it is dropped and such responsibilities are now entrusted to commanding officers.

February 17

NAVAL: All Washington Naval Treaty signatories declare that all requisite vessels have been scrapped in order to meet compliance.

February 23

NAVAL: In Annapolis, Maryland, Rear Admiral Louis M. Nulton gains appointment as the 27th superintendent of the U.S. Naval Academy.

March 2–11

AVIATION: In waters off Lower California, the carrier *Langley* participates in a Fleet Problem V with its airplanes performing scouting missions for the first time. Although sustained carrier operations are growing more practical, it is apparent that the navy needs more durable aircraft to withstand the stresses of launching and landing operations from a carrier deck.

March 4

NAVAL: The Naval Reserve Officer Corps Training (NROTC) program is created by Congress at George Washington University, D.C., and St. John's College, Annapolis, Maryland. It exists today in a greatly expanded form.

- Congress grants official recognition to the Navy Band, making it a permanent organization headed by a senior lieutenant. The band begins its first national tour by visiting 300 cities and villages.

March 13

AVIATION: In Washington, D.C., Rear Admiral William A. Moffett gains appointment for a second tour as chief of the Bureau of Aeronautics.

April 1

AVIATION: Off San Diego, California, the first nighttime landing by a navy aircraft is performed by Lieutenant Commander John D. Price of VF-1 when he perilously touches down on the deck of the carrier *Langley* at night. Nocturnal operations are considered so hazardous that they do not become routine until after World War II.

April 20

MARINES: As in the previous year, marines from the cruiser *Denver* are landed at La Ceiba, Honduras, to protect American interests.

April 27

MARINES: At Oahu, Hawaii, a force of 2,500 marines participate in war games against the army by staging an amphibious assault; the exercise highlights the glaring inadequacy of current landing craft when tackling a highly defended objective.

May 1–2

AVIATION: Over Philadelphia, Pennsylvania, a PN-9 flying boat constructed by the Naval Aircraft Factory sets a world endurance record for Class C seaplanes by remaining aloft for 28 hours, 35 minutes, 27 seconds. This is also one of the earliest naval aircraft to feature an all-metal hull.

May 5

AVIATION: The secretary of the navy orders certain departments within the U.S. Naval Academy, Annapolis, Maryland, to be reconfigured so as to promote aviation as a central part of the overall curriculum.

May 29

AVIATION: The paint scheme of all navy aircraft is again standardized. Hulls and floats are painted navy grey, wings, fuselages, and landing gear are painted aluminum, and the top surfaces of wings, stabilizers, and elevators are painted orange yellow.

June 5

MARINES: Detachments again go ashore at Shanghai, China, when street fighting breaks out between political factions.

June 9

MARINES: The detachment already ashore at Shanghai is augmented by marines conveyed there by the commercial vessel *Aberenda*; the garrison remains in place through August.

June 17

AVIATION: Lieutenant Commander Richard E. Byrd conducts the Naval Air Detail assigned to the Macmillan Expedition as it sails from Boston, Massachusetts. Byrd has three Loening OL amphibians carried onboard the destroyer *Peary*.

July 1

MARINES: Congressional legislation reactivates the Marine Corps Reserve by dividing it into two classes: Fleet Marine Corps Reserves consisting of company-sized units, and a Volunteer Marine Corps Reserve drawn from individuals seeking additional training.

August 1

AVIATION: The three Loening OL amphibians under Lieutenant Commander Richard E. Byrd arrive safely at Etah, Greenland, prior to beginning aerial exploration flights covering 30,000 square miles.

- The Air Service begins developing an inflight system to record an aircraft's speed and bearing; this is a precursor to the modern-day "black box."

MARINES: With tranquility restored, the 100-man marine legation guard departs Managua, Nicaragua, where it had resided since 1913.

September 1

AVIATION: A PN-9 flying boat under Commander John Rodgers departs San Francisco, California, in an attempt to reach Hawaii nonstop. Unfortunately, Rodgers runs out of fuel after flying 1,841 miles and settles down on the Pacific Ocean. He subsequently orders the canvass stripped from the upper wing to form a makeshift sail, which carries him to within 10 miles of the Hawaiian coast 10 days later. The mission fails in its goal but the distance covered, nonstop, remains a world record for Class C seaplanes over the next five years.

- At San Diego, California, Marine Fighting Squadron 3 (VF-3M) is activated; it is the precursor to Marine Fighter Attack Squadron 232 (VMFA-232).

September 3

AVIATION: A storm near Ava, Ohio, claims the navy airship *Shenandoah*, which crashes killing 14 crew members of 43 crewmen present, including Lieutenant Commander Zachary Lansdowne.

September 5

AVIATION: Colonel William “Billy” Mitchell, an outspoken proponent of military aviation, publicly accuses his commanders of “incompetency, criminal neglect, and almost treasonable administration of nation defense” in the recent crash of the navy airship *Shenandoah*. His breach of military etiquette results in his arrest and court-martial at the behest of President Calvin Coolidge.

September 12

AVIATION: In Washington, D.C., President Calvin Coolidge appoints Dwight W. Morrow as chairman of a new board tasked with advising the government on air policy matters.

September 25

AVIATION: Submarine S-51 collides with the vessel *City of Rome* off Block Island, Rhode Island, killing 33 of 36 crew members.

September 29

AVIATION: In Washington, D.C., Colonel William “Billy” Mitchell testifies before Congress that the nation needs an independent air force. He characterizes contemporary military attitudes respecting aviation as out of touch. He is court-martialed in consequence. The chief of naval operations mandates that all naval aviators receive training in landplane operations.

October 5

AVIATION: At San Diego, California, VJ-1B, the first Navy Utility Squadron, is formed under Lieutenant John F. Moloney.

October 12

AVIATION: At Mitchel Field, New York, a Curtiss R3C-1 racer flown by Lieutenant Cyrus Betts establishes two world speed records by flying at 249 miles per hour over 100-kilometer and 200-meter courses; he wins the Mackay Trophy.

October 14

MILITARY: In Washington, D.C., Dwight F. Davis is appointed the 49th secretary of war; he proves instrumental in expanding the army’s armored forces.

October 26

AVIATION: At Baltimore Harbor, Maryland, a Curtiss R3C-2 racer wins the Schneider Cup after hitting speeds of 230 miles per hour; he also shares the Mackay Trophy for his efforts.

October 27

AVIATION: The first use of oleo shock-absorbing landing gear is reported on NB-1, FB-1, UO-1, and SC-2 aircraft then under construction. Such devices make for smoother carrier landings.

October 28–December 17

AVIATION: In Washington, D.C., the court-martial of outspoken aerial advocate General William “Billy” Mitchell begins. He is charged with unofficer-like conduct in his relentless pursuit of American air power.

November 9

MARINES: Political unrest at Tientsin, China, necessitates a detachment from the Asiatic Fleet going ashore.

November 21

AVIATION: In another aerial first, Army lieutenant George Goddard takes the first successful night photographs from an airplane by dropping 50-pound magnesium flares over Rochester, New York, from a Martin bomber.

MILITARY: Major General John L. Hines retires as army chief of staff and is replaced by Lieutenant General Charles P. Summerall.

November 30

AVIATION: The president’s Aircraft Board, chaired by Dwight W. Morrow, in the wake of the *Shenandoah* disaster releases its final report. The document is far-reaching and calls for a reorganized—not independent—Air Service, better representation of aviation at higher command levels, and a five-year plan for increased development and procurement of military aircraft.

December 17

MILITARY: Colonel William “Billy” Mitchell is court-martialed and found guilty of insubordination; he receives a five-year suspension without pay and then resigns from the military to serve as a one-man spokesman on behalf of air power. He is sentenced to rank and pay suspension for five years, but he elects to retire and continue the fight for aviation as a civilian.

December 18

AVIATION: At Anacostia, Washington, D.C., flight trials between Consolidated, Curtiss, and Huff-Deland prototypes result in selection of the Consolidated NY trainer for Navy use. This venerable aircraft becomes a mainstay of training functions through the 1930s.

December 24

TECHNOLOGY: The Pratt and Whitney Company develops the first example of its famous Wasp radial engine, which relies on air, not fluid, for cooling.

December 30

MARINES: Escalating political violence forces marines to go ashore again at Shanghai, China, to protect American interests.

**Mitchell, William (1879–1936)***Aviator*

William “Billy” Mitchell was born in Nice, France, on December 29, 1879, and raised in Milwaukee, Wisconsin. He attended Racine College and Columbia University before dropping out in 1898 to join the army and fight during the Spanish-American War. Mitchell acquitted himself well in Cuba and, in 1901, he transferred to the Signal Corps, where he supervised the laying of 1,700 miles of telegraph wire in Alaska. He subsequently attended the Army Staff College and, in 1913, he became the youngest officer ever attached to the General Staff. However, the turning point in Mitchell’s career came in 1915 when he transferred back to the Signal Corps, joined the aviation section, and received his pilot’s license at the relative advanced age of 36. Mitchell found his calling and he spent the next 25 years, in one way or another, advocating the expansion of American air power. He was a military observer in Europe when World War I commenced in 1914 and, three years later, following America’s entry

into that conflict, he served as an effective air commander. In September 1918 Mitchell organized and orchestrated a mass aerial offensive against the Saint-Mihiel salient in concert with ground forces. The following month he repeated his success in the Meuse-Argonne offensive, rose to brigadier general, and was preparing for a large strategic bombardment campaign against Germany when the armistice was signed. Mitchell then completed a brief tour of occupation duty and returned to the United States, a highly decorated war veteran devoted to the primacy of military air power.

Back home, Mitchell was outspoken, and none too diplomatic, in his assertions that aircraft had rendered navies obsolete. To underscore that belief, on July 21, 1921, a force of his large Martin bombers attacked and sank the captured German battleship *Ostfriesland* off the Virginia Capes, and, in September, his planes also sent the obsolete warships *Alabama* and

1926**January 8**

AVIATION: At Scott Field, Illinois, Lieutenant Orvil Anderson takes the RS-1, the world’s largest semi-rigid airship, on its maiden flight. The airship is 282 feet in length and 70 feet in diameter, flies at 40 miles an hour, and requires a crew of eight.

January 14

NAVAL: In Sumatra, a group of scientists from the Naval Observatory are on hand to observe a solar eclipse. Lieutenant H. C. Keller also assembles 9,000 rock specimens for the Smithsonian Institution.

January 27

AVIATION: Brigadier General William “Billy” Mitchell tenders his resignation from the army, intending to champion American air power now as a civilian. Doing so costs him many retirement benefits commensurate with his rank.

Virginia to the bottom. Navy officials howled in protest and claimed that Mitchell had overstated his case, at which point General Mason M. Patrick demoted him back to colonel and dispatched him to a remote post in Texas. However, in September 1925, when the navy dirigible *Shenandoah* crashed in a storm, he publicly accused navy and War Department officials of criminal neglect and was court-martialed. Mitchell probably intended to use his trial to showcase his air power theories, but he was found guilty of insubordination and suspended from rank and pay for five years. Rather than submit to the sentence, he resigned his commission and continued touring the country to lecture about America's aerial weakness. He also published several popular books on the subject before dying suddenly in New York City on February 19, 1936. The destructive Japanese attack on Pearl Harbor, December 7, 1941, was one of Mitchell's many prophecies to come true, and, in 1946, Congress awarded him a posthumous Medal of Honor.

Billy Mitchell (U.S. Air Force)

January 29

AVIATION: At McCook Field, Ohio, a XCO-5A flown by Lieutenant John A. Macready sets an altitude record of 38,704 feet.

March 16

TECHNOLOGY: In a major accomplishment, Dr. Robert H. Goddard successfully launches his first liquid-fueled rocket near Auburn, Massachusetts. The flight lasts but 2.5 seconds, yet propels the missile to a height of 184 feet. Military implications for such new technology are still pending.

April 21

AVIATION: In light of the growing significance of aviation to naval operations, the secretary of the navy orders that all Annapolis graduates receive 25 hours of flight instruction during their first tour of sea duty. To that end, new training facilities are also established at Hampton Roads, Virginia, and San Diego, California.

May 7

MARINES: A detachment from the light cruiser *Cleveland* goes ashore at Bluefields, Nicaragua, to protect American lives and establish a neutral zone between warring Liberal and Conservative factions.

May 9

AVIATION: Lieutenant Commander Richard E. Byrd and civilian pilot Floyd Bennett successfully fly their Fokker F.VII-3m aircraft named *Josephine* from Spitzbergen, Norway, over the North Pole for the first time. The round trip covers 1,600 miles and takes 15½ hours. Both men receive the Medal of Honor but, in the early 21st century, their claim is hotly disputed.

May 10

MARINES: Detachments land again in Nicaragua to help suppress a revolt and protect American property; this time they are required to remain and fight guerrillas under General Augusto Cesar Sandino for 13 years.

June 6

AVIATION: Three Loening OL amphibian aircraft assigned to the tender *Gannet* embark from Seattle, Washington, to complete final phases of the Alaskan Aerial Survey. They are working in cooperation with the Department of the Interior.

June 16

AVIATION: In another aerial first, the Bureau of Aeronautics notes that crash barriers installed on the carrier *Langley* successfully prevented landing aircraft from crashing into parked aircraft on the flight deck.

June 21

MILITARY: At Fort Leavenworth, Kansas, 245 officers complete the prestigious Command and General Staff School, including Major Dwight D. Eisenhower.

June 24

AVIATION: Inspired by the Morrow Board, Congress votes to provide the navy sufficient funding to strengthen its aerial force to 1,000 aircraft over the next five years. Legislators also mandate that command of tactical air units and aviation stations be naval aviators.

MARINES: Commandant John A. Lejeune and members of Congress closely scrutinize Fleet Marine Corps Reserve Exercises, their first-ever two-week annual training session.

July 1

AVIATION: The secretary of the navy announces new regulations requiring that no less than 30 percent of all naval aviators on active duty be drawn from the enlisted ranks.

July 2

AVIATION: In recognition of the growing importance of military aviation, and recommendations of the Morrow Board, Congress founds the Army Air Corps (AAC) as a separate branch of the service; the new arm has an authorized strength of 16,650 men and 1,800 aircraft, along with a new assistant secretary of war for air. This is a major step in the development and ultimate founding of the U.S. Air Force.

- The Distinguished Flying Cross medal is established for all military individuals who distinguish themselves through some aerial activity.
- Major General Mason M. Patrick is appointed chief of the new Army Air Corps; Congress further mandates that no less than 20 percent of all military pilots must be drawn from enlisted ranks.

MILITARY: The Soldier's Medal is established by Congress for military personnel who distinguish themselves in noncombat action.

July 10

AVIATION: In consequence of the Morrow Board findings, Congress creates the post of assistant secretary of the navy for aeronautics; Edward P. Warner is the first officerholder.

July 16

AVIATION: In Washington, D.C., F. Trubee Davidson becomes the first assistant secretary of war for air.

July 28

AVIATION: On the Thames River, New London, Connecticut, a diminutive Cox-Klemin XS-2 scout seaplane is assembled on the deck of submarine *S-1*, flown by Lieutenant D. C. Allen, recovered, disassembled, then stored. Still, the notion of submarine-launched airplanes never gains traction in the navy.

August 27

MARINES: Renewed civil strife in Bluefields, Nicaragua, compels the cruiser *Galveston* to land 200 sailors and marines to restore order and separate the warring factions by establishing a neutral zone.

September 1

AVIATION: At Quantico, Virginia, the Marine Corps First Aviation Group is redesignated Aircraft Squadrons, East Coast Expeditionary Force.

October 10

MARINES: A landing detachment from the cruiser *Denver* arrives at Cortino, Nicaragua, to maintain peace during a hostile meeting between leaders of the Conservative and Liberal Parties. Fighting resumes between their respective supporters when a peace agreement fails to materialize.

October 20

MARINES: A recent spate of postal robberies results in marines again being assigned to guard U.S. mail facilities.

October 22

AVIATION: Off San Pedro, California, six Curtiss F6C-2 Hawks under Lieutenant Commander Frank D. Wagner stage mock dive-bombing attacks for the first time against battleships underway. Rear Admiral Joseph M. Reeves, air commander of Battle Fleet, considers the maneuver a resounding success and predicts dive bombing as a viable tactic for sinking even the largest vessels.

October 24

NAVAL: After a hurricane devastates the Isle of Pines in the Caribbean, light cruiser *Milwaukee* and destroyer *Goff* arrive with medical supplies and food to assist survivors.

November 1

AVIATION: At Ten Pound Island, Gloucester, Maine, the Coast Guard Air Service commences with the arrival of two Loening amphibian aircraft; another Loening is deployed at Cape May, New Jersey. They are outfitted with radios and machine guns in an attempt to circumvent smugglers.

November 12

MARINES: A landing detachment from the auxiliary ship *Gold Star* arrives at Chingwangtao, China, to protect American interests.

November 19

NAVAL: To counter the growing threat posed by aircraft to capital ships, the battleship *Maryland* tests the Mark XIX antiaircraft fire-control system, which incorporates a stabilized line of sight to assist in tracking approaching aircraft.

December 7

MEDICAL: In the world's first study in aerospace medicine, flight surgeon captain Charles T. Buckner flies a DH-4B to an altitude of 28,000 feet without an oxygen tank to study the effects of high altitude on human physiology.

December 13

AVIATION: Rear Admiral Joseph M. Reeves, head of Aircraft Squadrons, Battle Fleet, reports the results of a recent dive-bombing exercise held in conjunction with formal fleet gunnery competition. He notes that the Curtis F6Cs and Boeing FB-5s of VF-2 under Lieutenant Commander Frank D. Wagner scored 19 hits with 45 bombs released from 2,500 feet. In light of such results, the navy places increased emphasis on developing dive bombers.

December 21

AVIATION: At Kelly Field, San Antonio, Texas, five Loening AO-1A Amphibians lift off on the ambitious Pan-American Goodwill Tour of South and Central America, which will cover 25 nations and 20,000 miles.

December 22

MARINES: At Rio Grande, Nicaragua, marines establish a neutral zone between warring factions.

December 23

MARINES: Continuing civil strife induces the marines to take control and establish order at Puerto Cabezas, Nicaragua.

December 31

MILITARY: A new service coat sporting a notch-lapel collar replaces the older "Choker collar" design of World War I. However, the older outfit remains in use until stocks of the new design are manufactured and distributed.

1927**January 5**

NAVAL: Lieutenant Commander Richard E. Byrd is promoted to commander and receives a Medal of Honor for his historical flight over the North Pole; his civilian accomplice, Floyd Bennett, also receives a medal.

Byrd, Richard E. (1888–1957)

Explorer

Richard Evelyn Bird was born in Winchester, Virginia, on October 25, 1888, the scion of a distinguished Tidewater family and a descendent of William Byrd. After passing through the Virginia Military Academy in 1908 he attended the U.S. Naval Academy, from which he emerged a midshipman in 1912. Byrd, saddled by an old football injury, could not perform regular sea duty, so in 1917 he joined the fledgling naval aviation service and, during World War I, he commanded a squadron of patrol bombers based in Canada. Thereafter, his career became indelibly caught up in aviation and he became intrigued by the prospects of transoceanic flight. To that end he invented two important navigation devices, the aerial sextant and the wind drift indicator, and he also coached the navy pilots who successfully flew their NC flying boats across the Atlantic in 1919. Not to be outdone, in 1925 Byrd accompanied the D. B. McMillan expedition to the Arctic regions and, on May 9, 1926, he and pilot Floyd Bennet flew a three-engine Fokker transport named *Josephine Ford* across the North Pole for the first time. For this feat he became a national celebrity. He was honored by a Medal of Honor and promotion to lieutenant commander. In 1927 Byrd attempted to fly the Atlantic solo for the first time, but he halted on account of equipment failure and narrowly lost out to Charles Lindbergh, whom he had also instructed as a flier. In 1928–30 Byrd shifted his attention southward to Antarctica. Raising money for a private expedition there, on November 29, 1929, he and pilot Bernt Balchen took off

Richard E. Byrd (*Library of Congress*)

from their base, dubbed Little America, and flew over the South Pole for the first time. In 1934 Byrd, now an admiral, attempted a daring solitary stay in a weather-observation shack south of the main base and was nearly killed by carbon dioxide poisoning from a faulty heater.

Just before World War II Byrd served with the U.S. Antarctic Service and was tasked with conducting detailed surveys of the region. When hostilities commenced, he worked with the chief of naval operations staff, where his expertise on Arctic

(continues)

(continued)

conditions proved useful. He also did much to map transpacific air routes for use in the post war period. In 1946–47 Byrd was tapped to head a large, government-sponsored Antarctic expedition called Operation Highjump, which utilized, 41,000 men, 13 ships, 19 aircraft, and four helicopters. In this capacity Byrd became the only man to fly a plane over the South Pole twice. In

1957 he performed similar work commanding Operation Deepfreeze for the International Geophysical Year (IGY) and flew over the pole a third and final time. Illness necessitated returning to Boston, Massachusetts, to recuperate, and he died there on March 11, 1957. Byrd, in addition to being an officer and a scientist, also penned four popular books aimed at spreading public awareness of the polar frontiers and their value to the United States.

January 5–9

MARINES: A landing detachment from the light cruiser *Galveston* arrives back at Managua, Nicaragua, to reestablish the legation guard. These troops also occupy the port of Cortino to deny it to rebel forces.

January 10

MARINES: To consolidate public order, the 2nd Battalion, 5th Marines arrives from Cuba and deploys at Bluefields, Nicaragua, before moving on to Managua.

January 18

NAVAL: In Washington, D.C., the Naval Medical School initiates its first formal course on aviation medicine for flight surgeon training.

February 9

MARINES: Off the coast of Nicaragua, Rear Admiral Julian L. Latimer, commanding the Special Service Squadron, instructs marines from the cruisers *Galveston*, *Milwaukee*, and *Raleigh* to land and seize the strategic Cortino-Managua railway, thereby denying its use by rebels.

- A provisional battalion drawn from the Guam garrison deploys at Shanghai, China, in the face of violence between Nationalist Party factions.

February 19

MARINES: In light of continuing revolutionary violence, marines assume control and guard the railroad line between Cortino and Managua, Nicaragua.

February 21

MARINES: Detachments drawn from the light cruiser *Trenton*, and battleships *Arkansas*, *Florida*, and *Texas*, come ashore as additional railroad guards at Chinandega and León in western Nicaragua.

February 24

MARINES: The 4th Regiment deploys at Shanghai, China, to bolster the security of the International Settlement; they remain in place until 1941.

February 26

AVIATION: Six DH-4 bombers of Marine Observation Squadron 1 (VO-1M) deploy to Nicaragua to support ground elements in their struggle with the Sandinistas.

March 4

MARINES: Near Shanghai, China, an American commercial vessel is rescued from pirates by marines acting as a boarding party.

March 7

MARINES: At Cortino, Nicaragua, Headquarters, 2nd Brigade, and the 5th Regiment arrive to bolster the American troop presence on the ground.

March 9

AVIATION: The navy receives its first large transport, a Ford JR-1 trimotor, for testing at Naval Air Station Anacostia, Washington, D.C.

April 29

MILITARY: In New Orleans, Louisiana, army engineers dynamite a levee on the Mississippi River to divert floodwaters threatening the city.

May 2

AVIATION: At Bolling Airfield, Washington, D.C., President Calvin Coolidge awards eight army pilots the Distinguished Flying cross for a flight ranging from San Antonio, Texas, to Central and South America, and back. The so-called Goodwill Flight lasted 122 days and covered 20,000 miles. One of the five Loening AO-1A amphibians crashed, killing two airmen.

MARINES: At Shanghai, China, Brigadier General Smedley D. Butler, 3rd Brigade Headquarters, and the 6th Regiment deploy ashore to reinforce the 4th Regiment already present.

May 4

AVIATION: At Scott Field, Illinois, Captain H. C. Gray pilots an untethered balloon to 42,479 feet, an unofficial world record.

MARINES: The Peace of Tipitapa is arranged by former secretary of state Henry Stimson between Liberal and Conservative factions in Nicaragua. Forthcoming elections are to be supervised by American forces in the country and marines are also responsible for equipping and training a new Guardia Nacional. However, a small group of radicals under Augusto Sandino rejects the agreement and vows to keep on fighting.

May 12

MARINES: In an attempt to shore up the Nicaraguan government, Lieutenant Colonel Robert Y. Rhea becomes the first commander of the Guardia Nacional, which is staffed by marine officers and NCOs for training, combat, and administrative purposes.

May 16

MARINES: The Second Nicaraguan Campaign begins at La Paz Centro after it is raided by 300 Sandinista bandits, who are then driven off by marines with heavy losses; two Americans are killed in the fighting, including the commander, Captain Richard B. Buchanan.

May 19

MARINES: The 11th Regiment, backed by VO-4M aircraft, arrives at Cortino, Nicaragua, to help bolster security efforts.

May 20–21

AVIATION: Captain Charles A. Lindbergh, Missouri National Guard, takes his Ryan monoplane named *The Spirit of St. Louis* on a historic solo flight across the Atlantic Ocean from New York to Paris, electrifying the world in the process. His flight covered 3,648 miles in 33 hours and 39 minutes. He subsequently receives the Distinguished Flying Cross and a special Medal of Honor.

May 23

AVIATION: A major advance in the construction and maintenance of metal is announced by the Naval Aircraft Factory when it is revealed that corrosion of aluminum by salt water can be curbed by applying an anodic coating.

MARINES: A detachment of the 5th Marines marches north from Matagalpa, Nicaragua, against rebels under Augusto Sandino; the insurgents simply head north into the province of Nueva Segovia and launch a protracted guerrilla campaign from there.

May 24

AVIATION: Lieutenant James H. Doolittle performs the first outside loop in his Curtiss P-18 fighter.

May 27

AVIATION: In Washington, D.C., the chief of naval operations directs the commander in chief, Battle Fleet, to undertake extensive testing and evaluation of dive bombing as an offensive tactic. Subsequent maneuvers carried out by VF-5S leads to the development of specialized equipment and strategies to employ this tactic.

June 6

MARINES: Brigadier General Smedley D. Butler's brigade and the 6th Regiment depart Shanghai, China, and march to Tientsin after Nationalist troops arrive to take control.

June 11

NAVAL: The light cruiser *Memphis* docks at the Washington Navy Yard, having transported Charles Lindbergh and his aircraft, *The Spirit of St. Louis*, from France.

MARINES: In Washington, D.C., marines are on hand to control boisterous crowds cheering the arrival of aviator Charles A. Lindbergh.

June 28–29

AVIATION: A Fokker C-2 Trimotor named *Bird of Paradise*, flown by Lieutenants Lester J. Maitland and Albert F. Hegenberger, successfully covers the 2,407 miles between Oakland, California, and Wheeler Field, Oahu, Hawaii, in 25 hours and 50 minutes. They navigated by means of a direction beam at either end of the flight and both men receive the Mackay Trophy and the Distinguished Flying Cross.

June 30–August 4

NAVAL: In Geneva, Switzerland, delegations from the United States, Great Britain, and Japan fail to agree to limit cruiser construction and other warships not mentioned in the Five Power Treaty. No consensus is reached.

July 15–16

AVIATION: A force of 800 Sandinista rebels under Augusto Sandino attack Marine and Guardia Nacional barracks in Ocotal, the capital of Nueva Segovia Province, Nicaragua. They meet with stiff resistance from a 40-marine garrison under Captain Gilbert D. Hatfield, then are strafed and dive-bombed for the first time by DH-4s belonging to VO-7M under Major Ross E. Rowell, whose aircraft perform the first dive bombing attacks in aviation history. One marine is killed and four Guardias are wounded by the rebels, who lose upward of 300 men.

July 25

MARINES: A force of 50 mounted marines under Major Oliver Floyd trots in to San Fernando, Nicaragua, where they successfully surprise the headquarters of rebel leader Augusto Sandino; 11 rebels are killed and the rest flee into the jungle.

September 18–19

MARINES: A night attack by Augusto Sandino's rebels on Telpaneca, Nicaragua, is driven off by marines and Guardia Nacional troops under Captain Herbert S. Keimling. The Sandinistas draw off after suffering 50 casualties to the Guardia's two dead and one wounded.

October 9

AVIATION: A Marine Corps DH-4 crashes in Nueva Segovia Province, Nicaragua; both Lieutenant Earl A. Thomas and Sergeant Frank E. Dowdell are captured and executed by Sandinistas.

MARINES: Rebels ambush a marine patrol under Lieutenant George J. O'Shea near Sapotillal Ridge, Nicaragua, forcing them to withdraw without rescuing the downed pilots.

October 12

AVIATION: McCook Field, Ohio, closes and is replaced by Wright Field, east of Dayton, where aeronautical testing and development continues.

October 26–28

AVIATION: Marines and Guardia troops again engage Sandinista rebels along Sapotillal Ridge, Nicaragua, but the latter retreats into the jungle once aerial support arrives. The wreckage of the downed DH-4 is recovered.

November 4

AVIATION: Captain Hawthorne C. Gray, flying an army hydrogen balloon, breaks all altitude records by reaching 42,470 feet, but he dies from lack of oxygen and his record is therefore nullified.

November 14

NAVAL: In Washington, D.C., Rear Admiral Charles F. Hughes is appointed the fourth chief of naval operations. He is eminently qualified, having previously served as commander, Battle Fleet, and commander in chief, U.S. Fleet.

November 16

NAVAL: The navy commissions the 36,000-ton *Saratoga*, its first combat-capable aircraft carrier. This large vessel, which possesses a flight deck 900 feet long, had been converted from a heavy cruiser. It is far faster and more capable than the first carrier, the *Langley*, a converted collier.

November 23

AVIATION: Marine air units identify El Chipote, Nicaragua, as the main mountain encampment of Augusto Sandino's Sandinista rebel forces, then bomb it.

December 4

AVIATION: For the first time, a three-engine Fokker transport deploys to Nicaragua to haul food, ammunition, and supplies to isolated posts.

December 10

AVIATION: In Washington, D.C., Captain Charles A. Lindbergh, having visited the House of Representatives, is voted a Medal of Honor for his epic transatlantic crossing.

December 14

AVIATION: Major General James Fechet, who rose from the enlisted ranks to a command position, replaces Major General Mason Patrick as head of the Army Air Corps.

NAVAL: The carrier *Lexington*, another converted cruiser and the fourth vessel to carry that proud name, is commissioned.

December 17

NAVAL: Off Provincetown, Massachusetts, submarine *S-4* collides with the Coast Guard cutter *Paulding*, with a loss of all 39 crew members. All attempts at rescue fail, although Chief Gunner's Mate Thomas Eadie wins a Medal of Honor for rescuing a diver who became entangled in an air line.

December 19

MARINES: After marine aerial reconnaissance spots rebel leader Augusto Sandino's fortified rebel camp on a fortified mountaintop called El Chipote, near Sapotillal Ridge, Nicaragua, a column is dispatched from Telpaneca and Jingotega under Lieutenant Merton A. Richal and Captain Richard Livingston, respectively. The 175 marines involved are unexpectedly going up against a force of 1,000 well-armed guerrillas.

December 30

MARINES: Heavy fighting erupts in the jungles as marine and Guardia troops under Captain Richard Livingston are ambushed while advancing upon the main Sandinista encampment on El Chipote Mountain; Livingston and six of his troops are killed, 25 are wounded.

December 31

MARINES: A marine/Guardia patrol under Lieutenant Merton A. Richal is attacked by Sandinista rebels near Sapotillal Ridge, Nicaragua, and remains surrounded for two days until aircraft arrive to assist.

1928

January 6–8

AVIATION: A Vought O2U-1 Corsair flown by Lieutenant Christian L. Schilt makes 10 landings on a crudely fashioned airstrip near Quilahi, Nicaragua, to bring in supplies and airlift wounded marines to safety. Schilt completes the operation without brakes; he wins a Medal of Honor.

January 14

AVIATION: Marine aircraft from VO-7M under Major Ross E. Rowell bomb and strafe the main rebel encampment on El Chipote, Nicaragua.

January 15

MARINES: In Nicaragua, the 2nd Brigade is reinforced by the newly reactivated 11th Regiment.

January 19–26

MARINES: At El Chipote, Nicaragua, Sandinista rebels escape before being enveloped by four companies of marines and Guardias under Major Archibald Young, then melt back into the jungle.

January 22

MARINES: In Nicaragua, the sparsely inhabited eastern part of the country, comprising two-thirds of its area, is designated the Eastern Area by Marine Corps authorities.

January 27

AVIATION: The huge dirigible *Los Angeles* successfully lights upon the deck of the carrier *Saratoga*, remaining only long enough to transfer passengers and take on water and supplies.

January 28

AVIATION: Given the demonstrated utility of aircraft in bush warfare, six O2B-1s of VO-6M are dispatched to Nicaragua from Quantico, Virginia.

February 3

AVIATION: At Wright Field, Ohio, Lieutenant H. A. Sutton's work with testing spin characteristics of various aircraft to improve aviation safety garners him the Mackay Trophy.

February 15

AVIATION: In Washington, D.C., President Calvin Coolidge signs legislation authorizing construction of a new Army Air Corps training facility in San Antonio, Texas.

February 19

MARINES: The cruiser *Denver* lands a detachment under Major Merritt A. Edson at Puerto Cabezas, Nicaragua, to better secure the Eastern Area.

February 23

MILITARY: As per a new congressional law, General Charles P. Summerall, army chief of staff, becomes entitled to four-star rank.

February 27

AVIATION: Commander Theodore C. Ellyson, the first naval aviator, dies in Chesapeake Bay when his Loening OL amphibian crashes during a night flight; Lieutenant Commander Hugh Schmidt and Lieutenant Rogers Ranshousen are also killed.

February 27–28

MARINES: Sandinistas ambush a patrol of 35 men from the 11th Regiment and Guardias at Bromaderos, killing two marines. Afterward, 10 rebels are found dead on the field by the commander, Lieutenant Edward F. O'Day.

February 28

AVIATION: The navy contracts with the Consolidated Aircraft Corporation to construct its large XPY-1 prototype, which is the first large monoplane flying boat acquired by Naval Aviation.

March 1–9

AVIATION: A Loening OL amphibian flown by Lieutenants Burnie R. Dallas and Beckwith Havens makes the first transcontinental flight of an amphibious aircraft in 32 hours and 45 minutes.

May 12

AVIATION: Boeing PW-9 pursuit aircraft flown by Lieutenants R. W. Douglas and J. E. Parker set a distance record for fighter aircraft by flying from France Field, Panama Canal Zone, to Bolling Field, Washington, D.C.

May 13–14

MARINES: Guardia troops, backed by marines, skirmish along the Cua River, northeast of Santa Cruz, Nicaragua.

June 9

AVIATION: At Langley Field, Virginia, Lieutenant Earl Partridge wins the Army Air Corps aerial gunnery match for the third consecutive time.

June 12

NAVAL: Newly commissioned carrier *Lexington* makes a high-speed run from San Pedro, California, to Honolulu, Hawaii, in a record 72 hours and 34 minutes. This exercise demonstrates the concept of what becomes generally known as “fast carriers.”

June 15

AVIATION: An Air Corps blimp flown by Lieutenants Karl S. Axtater and Edward H. White completes the first aircraft-to-train mail transfer by delivering a satchel to the clerk of a moving train.

June 16

NAVAL: At Annapolis, Maryland, Rear Admiral Samuel S. Robinson gains appointment as the 28th superintendent of the U.S. Naval Academy.

TECHNOLOGY: At Wright Field, Ohio, a new type of supercharger that allows improved engine performance at altitudes of up to 30,000 feet is successfully tested. Prior to this all aircraft engines were susceptible to power loss at high altitude owing to the thinness of the air.

June 30

AVIATION: The navy contracts with the Martin Company to build and develop its XT5M-1 dive bomber prototype; this enters into production as the BM-1 and is the first navy dive bomber to carry a 1,000-pound bomb.

June 30–July 1

AVIATION: In Detroit, Michigan, the Gordon Bennet International Balloon Race is won by Captain W. E. Kepner and Lieutenant W. O. Eareckson. The distance covered is 460 miles.

July 26

MARINES: A boat expedition consisting of 46 marines under Major Merritt A. Edson begins rowing up the Coco River, Nicaragua, toward a major rebel base at Poteca.

August 7

MARINES: At Ililiquas, Nicaragua, a 49-man marine patrol under Major Merritt A. Edson ascends the Coco River in native dugouts and surprises rebel leader Augusto Sandino in his camp near Bocay; 10 Sandinistas die at a cost of two marines slain.

August 18

AVIATION: Randolph Field, San Antonio, Texas, is formally turned over to the army by city officials. It quickly establishes itself as a leading aviation school.

August 25

EXPLORING: Admiral Robert E. Byrd begins the first leg of his ambitious expedition to fly to the South Pole; this is the first instance that aircraft have been used to explore the Antarctic landmass.

August 27

DIPLOMACY: The United States, along with 62 other nations, signs the Kellogg-Briand Pact to outlaw warfare, but the treaty lacks enforcement provisions.

September 18

MILITARY: At Brooks, Field, Texas, 18 soldiers successfully jump from three Douglas transports and arrive safely on the ground by parachute. A large cache of equipment is also successfully dropped. Military observers begin seeing the viability of “vertical envelopment” with paratroopers.

October 10

AVIATION: At Wright Field, Ohio, Captains St. Claire Streett and A. W. Stevens climb to an altitude of 37,854 feet, which is a world’s record for aircraft with more than one person in flight.

November 1

AVIATION: Marine Corps VF-6M arrives back at San Diego, California, after a tour of duty in China skies, and it is reassigned to the West Coast Expeditionary Force.

November 4

MARINES: Landing detachments, backed by sailors, maintain order during elections in Nicaragua and prevent any interference by Sandinista rebels.

December 14

AVIATION: The carrier *Saratoga* is issued 14 radio telephone sets to be installed on fighter aircraft of VB-2B Squadron for service tests. These are the first radio sets installed in single-seat aircraft.

December 19

TECHNOLOGY: At Willow Grove, Pennsylvania, inventor Harold F. Pitcairn flies his autogyro, an early type of helicopter hybrid, for the first time.

1929**January 1**

AVIATION: Aircraft of Marine Corps VO-10M deploys back to its home base in San Diego, California.

January 1–7

AVIATION: At Los Angeles, California, a Fokker C2 Trimotor named *Question Mark*, flown by Army major Carl Spaatz, Captain Ira C. Eaker, and Lieutenants Elwood Quesada and Harry Halveson, establishes a world flight endurance record of 150 hours, 40 minutes. They are refuelled in-flight 37 times by a pair of specially rigged Douglas C-1 transports.

January 9–16

AVIATION: The Navy Department releases new regulations for navy and Marine Corps aviators requiring them to have meaningful experience in night flying. To meet this requirement, prospective candidate must have at least 10 hours of night flying and successfully execute 20 landings.

- A Fokker C-2 transport flown by Major Paul Beck becomes the first military aircraft ferried by the Army Air Corps when it flies 3,130 miles from Wright Field, Ohio, to France Field, Panama Canal Zone.

January 16

AVIATION: The chief of naval operations mandates that experience in night flying is required by all heavier-than-air naval aviators; this breaks down to 10 hours of night flying and 20 landings.

January 19

MARINES: At Tientsin, China, the so-called 3rd Brigade (brigade headquarters and the 6th Regiment) is disbanded and withdrawn. Only the 4th Regiment remains behind as a legation guard.

January 21

AVIATION: After the Mark XI Norden bombsight places several bombs within 25 feet of a target, the Naval Proving Ground recommends that it be accepted into production.

January 23–27

AVIATION: In Fleet Problem IX, the first annual exercise staged with aircraft carriers, Rear Admiral Joseph M. Reeves orders the *Saratoga* detached from the main force to stage a successful surprise “attack” upon the Panama Canal. This exercise clearly illustrates the offensive potential of carrier aviation and its ability to operate independently of the main fleet.

February 3

MARINES: In Nicaragua, a patrol headed by Lieutenant Herman Hanneken captures noted Sandinista general Manuel Jiron.

February 13

NAVAL: Despite renewed interest in outlawing war, Congress approves the Cruiser Act authorizing construction of 15 such vessels, along with an additional aircraft carrier—the *Ranger*—for the U.S. Navy. This is the first vessel built from the keel up as an aircraft carrier.

February 23

AVIATION: Fabrication of heated goggles, gloves, and oxygen bottles is announced by the laboratory at Wright Field, Ohio.

February 27

AVIATION: In Washington, D.C., Secretary of War Dwight Davis awards Orville and Wilbur Wright (posthumously) the Distinguished Flying Cross.

March 4

MILITARY: In Washington, D.C., Herbert Hoover is sworn in as the 31st president of the United States and commander in chief.

March 5

NAVAL: In Washington, D.C., Charles F. Adams is appointed the 44th secretary of the navy.

MARINES: Major General Wendell C. Neville is appointed the 14th Marine Corps commandant to replace retiring Major General John A. Lejeune.

March 6

MILITARY: In Washington, D.C., James W. Good gains appointment as the 51st secretary of war; he dies after only nine months in office.

March 13

AVIATION: In Washington, D.C., Rear Admiral William A. Moffett is appointed chief of the Bureau of Aeronautics for the third time.

April 3

MARINES: The withdrawal from Nicaragua continues as elements of the Marine Special Services Squadron ship home.

April 9

NAVAL: A Coast Guard vessel mistakenly sinks the Canadian vessel *I'm Alone* in the Gulf of Mexico after suspecting it is running rum; the Canadian government protests loudly.

April 14

AVIATION: Edward A. Link patents his “flight trainer” (flight control simulator), which, by the advent of World War II, is part of every pilot’s basic flight instruction. Over half a million American and Allied pilots pass through these devices en route to getting their wings.

May 8

AVIATION: The successful deployment of a T4M torpedo bomber equipped with brakes leads to the elimination of all fore-and-aft wire-arresting gear on carriers.

NAVAL: Lieutenant Charles B. Momsen develops the first device to allow submariners to safely escape from a sunken vessel in relatively deep water. The so-called Momsen Lung ingeniously contains a bag of soda lime, which removes carbon dioxide from exhaled air and replaces it with oxygen.

May 10

AVIATION: In Washington, D.C., the secretary of the navy awards Lieutenant Alford J. Williams a Distinguished Service Cross for his work with violent maneuvers and inverted flight while developing more accurate methods of flight testing.

June 4

AVIATION: Flying a Wright Apache, Lieutenant Apollo Soucek reaches 38,560 feet, a world record for Class C seaplanes.

June 11

AVIATION: In light of the increasing presence of radio equipment on airplanes, the Bureau of Standards establishes regulations for shielding aircraft engine ignition and reducing or eliminating radio interference.

August 20

AVIATION: At Lakehurst Naval Air Station, New Jersey, Lieutenant Adolphus W. Gorton successfully hooks his UO-1 to a trapeze lowered from the airship *Los Angeles*. This is the first experiment to check the feasibility of aircraft operating directly from dirigibles.

MARINES: The withdrawal from Nicaragua continues. By this date, roughly 2,000 marines remain in that country. The task of fighting any remaining Sandinista rebels now falls mainly upon the Guardia Nacional.

September 3

NAVAL: Owen T. Edgar, the last remaining survivor of the Mexican-American War, dies in Washington, D.C., at the age of 98.

September 24

AVIATION: Lieutenant James H. Doolittle makes aviation history by successfully completing the first “blind” airplane flight out of Mitchel Field, New York. He flies his Consolidated NY-2 biplane for hours in a canvas-covered canopy using only instruments and no radio. He was, however, accompanied by a check pilot in the rear cockpit who safely monitored the flight.

October 31

AVIATION: In Washington, D.C., Commandant major general Wendell C. Neville orders the Fleet Marine Corps Reserve merged with the Volunteer Reserves as a cost-cutting measure. Henceforth, all members receive no drill pay and bear any expenses associated with training on their own.

November 28–29

EXPLORING: A Ford Trimotor christened *Floyd Bennett*, piloted by Commander Richard E. Byrd, successfully flies over the South Pole, accompanied by Norwegian explorer Bernt Balchen and two crewmen. It returns to the base camp at “Little America” on McMurdo Sound following a trip of 19 hours.

Doolittle, Jimmy (1896–1993)

Army Air Forces general

James Harold Doolittle was born in Alameda, California, on December 14, 1896, the son of a carpenter. He was raised largely in Nome, Alaska, and entered the University of California, Berkeley, to study mine engineering, but he dropped out in 1917 to join the U.S. Army Signal Corps as a pilot. Doolittle won his wings and remained stateside during World War I, but throughout the decade of the 1920s he became closely identified with General William “Billy” Mitchell and the crusade for American air power. He proved himself a natural flier who possessed genuine aptitude for the newly emerging science of aeronautics. In 1922 Doolittle set his first aerial record by flying from Florida to California in under 24 hours, and three years later he graduated from the Massachusetts Institute of Technology with the first-ever doctorate given in aeronautical engineering. Thus prepared, Doolittle became the first American pilot to fly across the Andes in 1929 and further contributed to aviation by inventing such useful devices as the artificial horizon gauge. With this device he also successfully made the first blind takeoff, flight, and landing on September 24, 1929. In 1930 Doolittle resigned from the military to represent the aviation branch of the Shell Oil Company and applied his expertise to developing higher octant aviation fuels. Two years later he established another air speed record flying the dangerous Bee Gee racer before abandoning competition altogether to concentrate on aeronautical research. In 1940, shortly before American entry into World War II, he convinced General Henry

James H. “Jimmy” Doolittle (*National Archives and Records Administration*)

H. Arnold, head of the U.S. Army Air Corps, to return him to active duty, where he spent several months touring aircraft factories and clearing up production bottlenecks.

In the spring of 1942 Doolittle helped to conceive the plan to launch 16 B-25 land-based bombers from a carrier deck for the purposes of raiding Japan. General Arnold was so impressed with the scheme that he allowed Doolittle to lead the mission, which struck targets in and around Tokyo on April 18, 1942. He consequently won a Medal of Honor and a double promotion

(continues)

(continued)

to brigadier general before taking charge of American air forces in the Mediterranean. Doolittle acquitted himself well and, in January 1944, he arrived in London, England, to assume control of the mighty Eighth Air Force. He orchestrated a relentless daytime bombardment campaign of German industry. His most important decision in the struggle was releasing fighter escorts to go after the Luftwaffe, instead

of simply guarding the bombers. In April 1945 Doolittle transferred to the Pacific to undertake similar action against Japan, but the war ended before he arrived. In light of his sterling contributions, Doolittle became the youngest lieutenant general in U.S. Army history, aged only 49 years. After the war, he resumed working for Shell Oil and the space division of TRW until his death at Pebble Beach, California, on September 27, 1993. He was America's most accomplished airman.

December 5

AVIATION: In Antarctica, Captain Alton R. Parker, Marine Corps Reserve, becomes the first man to fly solo over the South Pole as part of the Byrd expedition.

December 31

AVIATION: At Quantico, Virginia, the only Marine Corps balloon squadron (ZKO-1M) is disbanded after all reliance on lighter-than-air craft is discontinued.

1930

January 8–29

AVIATION: At Selfridge Field, Michigan, a flight of Curtiss P-1C Hawks under Major Ralph Royce departs for Spokane, Washington, in midwinter to train under arctic flying conditions; Royce receives the Mackay Trophy for his efforts.

January 16

NAVAL: In Tacoma, Washington, the carrier *Lexington* provides power to the city for a brief period following the failure of its power plant; this is one of few vessels fitted with its own turboelectric power plant.

January 20

MILITARY: The War Department issues orders to all military bases to enforce the Volstead Act (Prohibition) and ban all alcoholic beverages on their premises.

January 29

AVIATION: At Naval Air Station Hampton Roads, Virginia, experiments begin with a new type of hydraulic arrester gear capable of absorbing the energy of aircraft landing on carrier decks.

January 31

AVIATION: Over Lakehurst, New Jersey, Lieutenant Ralph S. Barnaby drops his glider from the rigid dirigible *Los Angeles*, and he lands safely from an altitude of 3,000 feet.

February 14

AVIATION: At Naval Air Station, Anacostia, Washington, D.C., the Boeing Model 205 (XF5B-1), the first monoplane fighter craft expressly designed for carrier operations, arrives for testing. The takeoff, landing, and high-altitude characteristics are found wanting so development continues.

February 15

AVIATION: The Naval Aircraft Factory is authorized to begin designing an experimental retractable landing gear for aircraft, which would reduce drag and enhance overall performance.

March 21

AVIATION: The Martin XT5M-1 prototype dive bomber, designed to deliver a ship-killing 1,000-pound bomb, successfully passes its strength and performance tests.

April 12

AVIATION: At Mather Field, California, a flight of 19 Boeing P-19 fighters under Captain Hugh M. Elmendorf, 95th Pursuit Squadron, climb in formation to 30,000 feet, a new altitude record.

April 21

AVIATION: Colonel Charles A. Lindbergh, accompanied by wife Anne Morrow, flies a Lockheed Sirius from Glendale, California, to Roosevelt Field, New York, covering 2,530 miles in a record 14 hours and 45 minutes.

April 22

NAVAL: The London Naval Conference concludes with Great Britain, the United States, and Japan agreeing to limitations on cruiser tonnage at a ratio of 10:10:7, with additional restrictions on destroyers and submarines. The terms of the existing Washington Naval Treaty are also extended by another five years; it has the overall effect of further reducing American naval capabilities in the Pacific.

May 15

NAVAL: The submarine *Narwal*, the first of a class of highly successful, streamlined vessels, is commissioned at Portsmouth, New Hampshire. It displaces 2,730 tons, is 33 feet across at the beam, and measures 371 feet in length.

May 31

AVIATION: At Anacostia Naval Air Station, Washington, D.C., a Curtiss F6C-3 fighter flown by Captain Arthur H. Page, U.S.M.C., wins the final Curtiss Marine Trophy Race with a top speed of 164.08 miles per hour.

June 4

AVIATION: Over Anacostia Naval Air Station, Washington, D.C., Lieutenant Apollo Soucek reaches a new altitude of 43,166 feet in his Wright Apache seaplane.

June 19

AVIATION: In Nicaragua, Marine Corps aircraft under Captain B. F. Johnson deliver telling blows to a concentration of Sandinista guerrillas near Jinotega; among the wounded is Augusto Sandino himself.

June 20

AVIATION: Randolph Field, San Antonio, Texas, is inaugurated as the army's newest flight training center for primary and basic pilot instruction. As such it becomes the cradle for a generation of airmen who go on to fight and win World War II. It subsequently serves as headquarters of the Air Education and Training Command.

July 3

MILITARY: The Veterans Administration Act passes Congress, which consolidates all federal programs assisting military veterans into a single entity.

July 9

MARINES: In Washington, D.C., Brigadier General Ben H. Fuller becomes major general commandant to replace recently deceased Wendell C. Neville.

July 10

MARINES: Regulations are issued requiring all regiments to be formally known as "Marines" (e.g., 1st Marines).

July 20

MILITARY: In Washington, D.C., the Veterans Administration is created by an executive order that amalgamates existing federal agencies dealing with former servicemen. It operates as an independent agency within the federal government.

July 21

AVIATION: Captain Arthur H. Page touches down at Anacostia Naval Air Station, Washington, D.C., after flying a world record instruments-only flight of 1,000 miles from Omaha, Nebraska. Lieutenant Vernon M. Page accompanied him as a safety pilot.

September 17

NAVAL: In Washington, D.C., Admiral William V. Pratt becomes the fifth chief of naval operations.

November 5

TECHNOLOGY: The director of the Naval Research Laboratory reports that recent experiments with radio waves have detected the presence of an airplane overhead. This revelation helps spur developments pointing in the direction of radar.

November 6

AVIATION: In Washington, D.C., President Herbert Hoover hands Captain Edward V. Rickenbacker the Medal of Honor he was awarded in 1918, but never received because the paperwork became lost.

November 16

AVIATION: Chief of the Army Air Corps major general James E. Fechet releases his annual report, which pegs the strength of the corps at 12,032, including 1,226 officer and 378 cadets.

November 28

AVIATION: In a major reorganization, Chief of Naval Operations admiral William V. Pratt establishes naval aviation as an integral part of the fleet and under the direct command of the commander in chief, U.S. Fleet. Hereafter the role of aviation as an offensive tool at sea is stressed and its participation in coastal defense becomes a secondary concern.

December 12

MARINES: At Vencedora, Nicaragua, a Guardia patrol under Gunnery Sergeant William A. Lee repels an attack by more numerous Sandinista rebels.

December 30

AVIATION: At a special test facility in Roswell, New Mexico, Dr. Robert H. Goddard's fifth liquid-fuel rocket rises to 2,000 feet at a speed of 500 miles per hour.

December 31

MARINES: Outside Ocotal, Nicaragua, Sandinista rebels ambush a 10-man marine detachment repairing telephone lines, killing eight Americans. The action prompts President Herbert Hoover to withdraw all marines from Nicaragua within two years.

1931**January 8**

AVIATION: At the Naval Proving Grounds, Dahlgren, Virginia, testing with dive-bombing equipment highlights that new displacing gear, a trapeze-type invention that lowers a bomb beyond the propeller arc, greatly reduces the danger inherent in that type of tactic.

January 9

AVIATION: Army chief of staff Douglas MacArthur and Chief of Naval Operations William V. Pratt reach an agreement allowing the Army Air Corps to monopolize coastal defense while the navy is free to concentrate on carrier aviation and mobile air operations at sea.

January 22

AVIATION: The navy places an order for the experimental hybrid Pitcairn XOP-1 autogyro, a rotary-type aircraft and precursor to the helicopter. It is hoped this machine will be capable of patrol and observation missions.

February 15

AVIATION: The first nighttime deployment of aircraft unfolds when 19 planes venture from Selfridge Field, Michigan, navigate nocturnally, then land safely at Bolling Field, Washington, D.C.

February 21

MARINES: Of the 2nd Brigade deployed in Nicaragua by this date, the sole remnant is the 5th Marines.

February 24

AVIATION: After performing a decade of useful service, the marine squadron deployed on Guam comes home.

March 2

AVIATION: The navy contracts with the Hamilton Standard Propeller Corporation to develop variable pitch propellers for use on combat aircraft.

March 3

AVIATION: The navy decides to assign two officers from the postgraduate engineering group for advanced study at the California Institute of Technology (CalTech) in Pasadena, California.

March 31

MILITARY: In Managua, Nicaragua, army engineers conduct relief work in the wake of an extensive earthquake. With the city's water supply destroyed, they resort to demolition charges to bring down buildings in the path of raging fires, containing them.

NAVAL: In response to the Nicaraguan earthquake, the carrier *Lexington* and hospital ship *Relief* are dispatched to lend assistance. This is the start of carrier aircraft relief operations as five planes are dispatched carrying food and medical supplies to the survivors.

MARINES: In response to this natural disaster, marines and Guardia forces provide security and assistance to earthquake survivors in Managua.

April 1

NAVAL: The U.S. Fleet is reorganized into Battle, Scouting, Submarine, and Base Forces.

April 2

AVIATION: The navy accepts a design proposal (XFF-1) from the Grumman Aircraft Corporation, which incorporates retractable landing gear, an enclosed cockpit, and all-metal construction. This improved aerodynamic approach is expected to yield improvement in performance.

April 9

AVIATION: The navy contracts with the Glenn L. Martin Company to construct 12 BM-1 dive bombers, each capable of delivering a 1,000-pound bomb.

May 1

NAVAL: At Annapolis, Maryland, Rear Admiral Thomas C. Hart gains appointment as the 29th superintendent.

May 9

AVIATION: Production begins on the A-2 leather flying jacket, which becomes standard flying apparel for military pilots.

May 12

MARINES: With the exception of officers and NCOs serving in the Guardia Nacional, all marine personnel are withdrawn from Nicaragua by this date.

May 21–30

AVIATION: A massive aerial training exercise, involving 667 aircraft and 1,400 crew members, commences across the nation under the direction of Brigadier General Benjamin D. Foulois. Every manner of aerial operation, including pursuit, bombardment, and observation, are successfully conducted; Foulois subsequently receives the Mackay Trophy for competently directing these ambitious maneuvers.

May 27

AVIATION: At Langley Field, Virginia, army and NACA personnel commence using the nation's first full-scale wind tunnel for testing and evaluating full-sized aircraft.

July 15–31

AVIATION: Maxwell Field, Montgomery, Alabama, is the new site of the Air Corps Tactical School, which becomes a hotbed of new air power theories throughout the ensuing decade. Foremost among these is the notion of long-range, daylight strategic missions employing precision-bombing techniques—the backbone of American aerial strategy during World War II.

August 11

AVIATION: At Maxwell Field, Alabama, Major John Curry is appointed commander of the Air Corps Tactical School.

September 10

AVIATION: In light of the fact that a variable-pitch propeller installed on a Curtiss F6C-4 fighter resulted in a 20 percent reduction in takeoff run and a slight increase, Rear Admiral William A. Moffett expands and expedites testing of this useful technology.

September 18

DIPLOMACY: In the first major act of aggression since World War I, Japanese troops conquer the Chinese province of Manchuria, and they install a puppet regime under the name Manchukuo. The U.S. government responds by refusing to recognize the new regime.

September 23

AVIATION: The Pitcairn XOP-1 autogyro is tested at sea onboard the carrier *Langley* with Lieutenant Alfred M. Pride at the controls.

- The large navy airship *Akron*, which is specifically designed to carry onboard fighter aircraft, enters operational service.

September 26

NAVAL: At Newport News, Virginia, the keel of the new 14,500-ton *Ranger* is laid; this is the first American vessel designed as an aircraft carrier.

October 7

AVIATION: A new and highly accurate Mark XV bombsight developed by Carl J. Norden is tested by the navy for the first time. Bomb runs from 5,000 feet score a 50 percent hit rate against the aged armored cruiser *Pittsburgh*. Once adopted by the army and navy, these devices remain the most advanced of their kind through World War II.

- At Naval Air Station Lakehurst, New Jersey, testing begins on the K-1 airship, which features an all-metal car and a 320,000-cubic foot envelope. It is the largest nonrigid airship employed by the navy to date.

October 26

AVIATION: In Haiti, Colonel Thomas C. Turner, director of Marine Corps aviation, is fatally injured by a turning propeller.

October 27

AVIATION: At Naval Air Station Lakehurst, New Jersey, the large navy dirigible *Akron* (ZRS 4) is placed in commission and makes its first trial run under Lieutenant Commander Charles E. Rosendahl.

November 1

AVIATION: The aviation school at Randolph Field, Texas, enrolls its first class of 198 students from West Point, the enlisted ranks, and civilian candidates. Randolph is unique in being laid out in the shape of a hexagon, surrounded by aircraft hangars.

November 2

AVIATION: In a significant first, Marine Corps Squadrons VS-14M and VS-15M report for duty on board the carriers *Saratoga* and *Lexington*, respectively, and serve there three years. Thereafter, marine squadrons serve intermittently on carriers until 1941.

November 3

AVIATION: Over Lakehurst, New Jersey, the rigid dirigible *Akron* flies for 10 hours while carrying 207 people aloft, a record for the number of individuals lifted at one time.

December 9

AVIATION: The *Langley* cruises the frigid winter waters off the New England coast in order to test protective flight clothing and carrier deck gear in adverse conditions.

December 20

AVIATION: In Washington, D.C., Major General Benjamin D. Foulois gains appointment as commander of the Army Air Corps to replace outgoing Major General James E. Fechet.

1932

January 1–31

AVIATION: At March Field, California, bombers of the 11th Bombardment Squadron lift off to drop supplies and relief packages to snowbound Navajo and Hopi Indians at Winslow, Arizona; the squadron subsequently receives the Mackay Trophy for their humanitarian efforts.

January 9

AVIATION: The secretary of the navy informs the secretary of war of progress made in the field of radio detection (radar) at the Naval Research Laboratory and inquires if the army would be interested in conducting work of its own.

January 28

MARINES: During savage fighting between Japanese and Chinese forces in Shanghai, China, the 4th Marines provide a safety perimeter around the U.S. portion of the International Settlement.

February

MARINES: Joint army-navy exercises on Oahu, Hawaii, involve a battalion and regimental headquarters of marines.

February 1

MILITARY: In light of conflict between Japan and China, the 31st Infantry is sent to reinforce the 4th Marines in Shanghai, China, to help defend the International Settlement there.

February 3

MARINES: As fighting escalates between Chinese and Japanese forces, a landing detachment from the cruiser *Houston* disembarks at Shanghai, China, to reinforce the 4th Marines and protect the American enclave within the International Settlement.

February 5

MARINES: At Shanghai, China, the 4th Marines are bolstered by the arrival of the army's 31st Infantry.

February 22

MILITARY: The Purple Heart, based on George Washington's Badge of Military Merit, is designated by the army for soldiers who have received wounds in combat.

March 20

AVIATION: Boeing unveils its XP-936 fighter plane, the first all-metal monoplane aircraft in the Army Air Corps. It enters service as the P-26 Peashooter, and is

Tomb of the Unknown Soldier in Arlington Cemetery, Arlington, Virginia, May 1943 (*Library of Congress*)

the last army pursuit craft with an open cockpit, fixed landing gear, and external wing-wire bracing.

March 24

AVIATION: The Army Air Corps, advised of the high success rate of the Norden Mark XV bombsight in tests held the previous fall, requests 25 such devices for testing purposes.

April 9

MILITARY: At Arlington, Virginia, the Tomb of the Unknown Soldier opens to the public. This monument, carved from a single, 48-ton slab of marble, was designed by Thomas H. Jones and costs \$48,000.

May 2

AVIATION: Encouraged by results on land, the Bureau of Aeronautics instructs the carrier *Langley* to install and test hydraulic-type carrier arresting gear.

May 9

AVIATION: At Patterson, Ohio, Army captain Albert F. Hegenberger completes a 15-minute blind flight in a “hooded” Consolidated NY-2, while flying solo on instruments alone; he wins the Collier Trophy for his effort.

May 29

MILITARY: The first of 17,000 unemployed veterans, the so-called Bonus Army, begins trickling into Washington, D.C., demanding that they be allowed to cash in their World War I bonus certificates at face value.

June 1

AVIATION: In Washington, D.C., the post of assistant secretary of the navy for aeronautics is abolished with the resignation of David S. Ingalls, but it will be resurrected nine years hence.

June 13

MARINES: Once Japanese troops force the Chinese army into an orderly withdrawal from Shanghai, China, the state of emergency is declared over and marines on station are gradually withdrawn.

June 27

TECHNOLOGY: The Pitcairn OP-1 autogyro, an early helicopter hybrid, is test flown by marines in Nicaragua.

June 30

AVIATION: The dirigible *Los Angeles*, having served eight years and traveled more than 5,000 miles by air, is decommissioned at Lakehurst, New Jersey, for reasons of economy. It was the navy’s sole surviving rigid airship.

MARINES: Depression-era downsizing shrinks Marine Corps manpower levels to 1,196 officers and 15,365 enlisted men.

July

MILITARY: In light of fiscal pratfalls brought on by the Great Depression, Congress reduces the pay of officers and men by 10 percent.

July 28

AVIATION: Pioneer research at the Harvard University School for Public Health on the blackout effects of violent maneuvers on dive-bomber pilots underscores the need to develop anti-G (anti-blackout) equipment.

July 28–29

MILITARY: In Washington, D.C., the sojourn of the “Bonus Army” comes to a tragic end when a force of 2,000 troops from the 12th Infantry and 3rd Cavalry, backed by six tanks under Colonel George S. Patton, dislodge the remaining 2,000 protestors. Two police and two veterans die in the ensuing melee, at which point Army Chief of Staff major general Douglas MacArthur is called in with army troops and evicts the squatters.

August 9

MILITARY: In a move to consolidate training and organization, the War Department creates four field armies within the continental United States: the First Army (headquartered at Governor’s Island, New York), the Second Army (Chicago, Illinois), the Third (Fort Sam Houston, Texas), and the Fourth (Omaha, Nebraska).

September 21

AVIATION: At March Field, California, a Curtis Condor bomber carrying scientists from the California Institute of Technology measures the intensity of cosmic rays from high altitude.

September 26–30

MARINES: In La Pavona, Nicaragua, a Guardia patrol of 41 men under Captain Lewis B. Puller and Lieutenant William A. Lee repel a Sandinista ambush, killing two rebels. Over the next few days, they wage four actions and kill a total of 30 rebels for a loss of two dead and four wounded.

November 6

MARINES: In Nicaragua, marine and Guardia forces maintain order during free elections for a new president.

November 11

MILITARY: The Tomb of the Unknown Soldier is dedicated at Arlington National Cemetery.

December 15

MARINES: All marine personnel serving in the Nicaraguan Guardia Nacional are withdrawn from service in Managua prior to returning to the United States.

December 26

MARINES: Captain Lewis B. Puller, assisted by six marine volunteers, leads a Guardia patrol into combat between León and El Sauce, Nicaragua, killing 31 Sandinista rebels at a cost of three dead and three wounded.

1933**January 2**

MARINES: Final elements of the 2nd Brigade depart Cortino, Nicaragua, as the six-year intervention draws to a close; total deaths are 47 killed in action.

January 12

MARINES: The doctrinal pamphlet “Joint Overseas Expeditions” is issued by a Joint Army-Navy Board, which establishes several broad operational procedures and principles for future operations.

February 9

AVIATION: In Washington, D.C., President Herbert Hoover cancels all domestic air mail contracts and instructs the Army Air Corps to begin mail deliveries. Apparently, the chief executive is convinced of fraud or collusion among the 12 domestic air carriers flying 26 routes.

February 25

NAVAL: The *Ranger*, the first vessel specifically designed as an aircraft carrier, is christened by Mrs. Herbert Hoover and launched at Newport News, Virginia. It carries 140 aircraft and promises to herald a new chapter in naval warfare.

March 4

MILITARY: In Washington D.C., Franklin D. Roosevelt is sworn in as the 33rd president and commander in chief.

NAVAL: That same afternoon, Claude A. Swanson is appointed the 45th secretary of the navy.

March 31

MILITARY: In an attempt to alleviate mass unemployment, President Franklin D. Roosevelt creates the Civilian Conservation Corps, under which U.S. Army officers will direct 250,000 young men at road construction, prevention of soil erosion, flood control, and national park maintenance.

April 4

AVIATION: Disaster strikes as the giant airship *Akron* crashes into the Atlantic off Barnegat Light, New Jersey, during a storm, killing chief of the Bureau of Aeronautics, Admiral William A. Moffett, along with 72 crewmen. Ironically, Moffett had been one of the strongest proponents of airships.

April 7

MILITARY: Once Congress founds the Civilian Conservation Corps (CCC) to help offset the Great Depression, the training camps are entrusted to Army Reserve officers.

April 12

DIPLOMACY: In an attempt to shore up hemispheric relationships, President Franklin D. Roosevelt announces his "Good Neighbor Policy" towards Latin America, under which the role of the Marine Corps as a colonial police force ends.

June 13

AVIATION: The navy contracts with the Washington Institute of Technology to develop special radio equipment suitable for making blind landings on carrier decks.

June 15

MILITARY: The new National Defense Act further clarifies the role of militia in the United States; henceforth, they are simultaneously state forces and part of the federal National Guard. However, they remain under the purview of state governors until called into federal service by the president.

June 16

NAVAL: To jump-start the faltering economy, one provision of the newly passed National Industrial Recovery Act earmarks \$238 million for the construction of 33 new warships, including the new fleet carriers *Yorktown* and *Enterprise*, along with 290 new aircraft.

June 23

AVIATION: The rigid airship *Macon* is commissioned at Akron, Ohio, being the last such craft of its kind procured by the Navy. It possesses an onboard hangar with sufficient space for five fighter airplanes.

July 1

NAVAL: In Washington, D.C., Admiral William H. Standley is appointed the sixth chief of naval operations.

August 8

AVIATION: Widespread use of variable-pitch propellers begins when several Boeing F4B fighter on the carriers *Langley* and *Saratoga* are ordered to be fitted with the devices in time for upcoming exercises.

August 29

NAVAL: In Washington, D.C., Acting Secretary of the Navy Admiral W. H. Standley informs rocket pioneer Robert H. Goddard that adapting his rocket propulsion system to depth charges and antiaircraft projectiles appears impractical.

September 7–8

AVIATION: Lieutenant Commander Herman F. Halland of Patrol Squadron 5F conducts six Consolidated P2Y-1 flying boats on a nonstop flight from Norfolk, Virginia, to Coco Solo, Panama. The flight covered 2,059 miles in 25 hours and 19 minutes.

October 11

AVIATION: A board headed by Major General Hugh A. Drum strongly recommends creation of a General Headquarters Air Force (GHQ) of 1,000 aircraft to operate independently of all ground units. The report is approved by Secretary of War George H. Dern.

October 12

AVIATION: The large rigid airship *Macon* flies from Naval Air Station, Lakehurst, New Jersey, to Sunnyvale, California, covering 2,500 miles in 70 flying hours.

October 24

AVIATION: The Naval Aircraft Factory is authorized to design and manufacture a special abdominal belt to help combat blackouts during dive-bombing and other violent aerial maneuvers.

MILITARY: The Corps of Engineers begins construction of the Fort Peck Dam, Montana, then the largest, earth-filled hydroelectric dam in the world. It will not be completed until 1962 and requires the removal of 126 million cubic yards of dirt.

October 28

AVIATION: The navy contracts with the Consolidated Aircraft Company to produce the prototype XP3Y-1, which is accepted into service as the famous PBV Catalina flying boat.

November 14

MARINES: Acting Commandant major general John H. Russell temporarily suspends classes at officers' school and instructs students to apply themselves to develop rules and doctrines for future amphibious warfare.

November 17

AVIATION: The National Industrial Recovery Act, passed on June 16, 1933, allots \$7.5 million to the navy to procure new aircraft and equipment, thereby allow the Bureau of Aeronautics to maintain its 1,000-plane fleet, and equip them with the latest radio and navigation devices.

November 20

AVIATION: Lieutenant Commander Thomas G. W. Settle and Major Chester L. Fordney are the first Americans to take a balloon to a height of 61,237 feet after departing from Akron, Ohio.

November 27

AVIATION: History is made when the first production Martin B-10 bomber is accepted by the Army Air Corps. This streamlined, all-metal monoplane features retractable landing gear, an internal bomb bay, a power nose turret, and flies faster than contemporary fighters of the day.

December 8

MARINES: In Washington, D.C., Commandant major general Ben Fuller, in accordance with orders from the Navy Department, renames the Expeditionary Forces the Fleet Marine Force (FMF).

1934

January

MARINES: In Washington, D.C., the Joint Army-Navy Board releases an unpublished manual entitled "Joint Overseas Operations." This seminal document espouses the underlying concepts, doctrines, and procedures that make large-scale amphibious warfare possible during World War II, and marines leading exponents of such tactics.

- Landing detachments from the gunboat *Tulsa* arrive at Foochow, China, to protect the American consulate as rival Chinese factions battle in the streets. They remain in place until Nationalist Army elements arrive and take charge of security matters.

January 8

AVIATION: Aircraft Two, Fleet Marine Force, is the new designation for Aircraft Squadrons, West Coast Expeditionary Force.

January 10–11

AVIATION: Six Consolidated P2Y-1 flying boats under Lieutenant Commander Knefler McGinnis successfully fly from San Francisco, California, to Pearl Harbor, Hawaii, for the first time. The flight covers 2,399 miles in 24 hours and 35 minutes, setting a new world record for C Class seaplanes.

January 17–18

AVIATION: Aircraft One, Fleet Marine Force becomes the new designation for Aircraft Squadrons, East Coast Expeditionary Force.

MARINES: Fleet Marine Force Headquarters is relocated to Quantico, Virginia.

February 19

MILITARY: President Franklin D. Roosevelt directs the Army Air Corps to commence regularly scheduled airmail service along 26 selected routes. He does so because of perceived fraud connected with commercial airlines contracted to perform the task. The effort, while earnest, is plagued with accidents and fatalities.

February 22

MARINES: In Nicaragua, Guardia Nacional commander General Anastasio Somoza arrests and executes noted revolutionary Augusto Sandino, a determined adversary of marines occupying his country.

February 28

MARINES: In Washington, D.C., Brigadier General John Russell is appointed the 16th commandant of the Marine Corps following the mandatory retirement of Major General Ben Fuller.

March 1

MARINES: Following the resumption of diplomatic relations, an officer and six marines are assigned to the U.S. embassy in Moscow, Soviet Union, as guards.

March 10–19

AVIATION: Following a spate of accidents and nine deaths, the Army Air Corps temporarily suspends delivery of mail nationwide for want of proper night and bad-weather flying instrumentation. The effort then resumes with fewer routes and numbers of flights.

March 14

TECHNOLOGY: At the Naval Research Laboratory, Dr. A. Hoyt Taylor is authorized to begin research on a pulse radar device capable of emitting bursts of radio energy that echo back the distance to an oncoming target. Work in his Radio Division is abetted by such new technologies as cathode ray tubes, high-power transmitting tubes, and special receiving tubes.

March 27

NAVAL: The Vinson-Trammell Act is passed by Congress to bring the navy up to its prescribed strength in accordance with the Five Power Treaty. The force currently possesses only 65 percent of its assigned tonnage and construction is authorized to continue over the next eight years. A carrier of 15,000 tons is authorized and it eventually emerges as the *Wasp*.

May

MARINES: In Washington, D.C., Commandant Major General John Russell prevails upon Congress to allow forthcoming promotions in the corps to be based on selection, not simply on seniority.

June 1

AVIATION: The Army Air Corps is relieved of domestic air mail flight after commercial contracts had been renegotiated. Since February, army pilots flew over 13,000 hours in the air, flew over 1.5 million miles, and delivered 777,000 pounds of mail. However, the numerous accidents revealed shortcomings in both pilot training and equipment, and the remedial efforts adopted place the American air arm on a much sounder footing.

June 4

AVIATION: The 14,500-ton aircraft carrier *Ranger* is commissioned; this is the navy's first vessel designed from the onset as an aircraft carrier.

June 14

MARINES: Reversing earlier policies, the Marine Corps again pays for reserve training; it also substitutes battalions for regiments as its largest administrative units.

June 15

MILITARY: The National Guard Act is passed by Congress, which renders that formation part of the U.S. Army in time of war, or a declared national emergency.

June 18

AVIATION: The Boeing Company gambles on its future by spending company money to develop the Model 299, a large four-engine bomber that is accepted into service as the B-17 Flying Fortress.

NAVAL: In Annapolis, Maryland, Rear Admiral David F. Sellers gains appointment as the 30th superintendent of the U.S. Naval Academy.

June 30

AVIATION: The navy contract with Douglas Aircraft to construct the XTBD-1 prototype torpedo bomber, which enters into service as the Devastator. It is the first all-metal monoplane in naval service anywhere in the world.

July 10

AVIATION: In a stirring display of strategic air power, Lieutenant Colonel Henry "Hap" Arnold leads a flight of 10 Martin B-10 bombers from Langley Field, Virginia.

July 18

AVIATION: In Washington, D.C., a board headed by former secretary of war Newton D. Baker concurs with the 1933 report issued by the Drum Board that a centrally controlled, aerial strike force, free of surface influences, would enhance the Army Air Corps.

July 19

AVIATION: While at sea scouting for the cruiser *Houston* carrying President Franklin D. Roosevelt, the rigid airship *Macon* releases two Curtiss F9C-1 fighters from its onboard hanger; the two aircraft return onboard by latching onto a trapeze device that raises them back inside.

July 28

AVIATION: Army major W. E. Kepner and Captains A. W. Stevens and O. A. Anderson rise in the pressurized balloon *Explorer* to 60,613 feet (14 miles). However, when the air bag tears, they are forced to bail out from extremely high altitude and safely land in a Nebraska cornfield; all win the Distinguished Flying Cross for their actions.

August 15

MARINES: The final contingent of the 1st Marine Brigade departs from Haiti, where they have been deployed since 1915.

- The 1st Battalion, 6th Marines is constituted from personnel returning from Haiti, prior to being dispatched to San Diego, California, as part of the West Coast Fleet Marine Force.

August 20

AVIATION: At Bolling Field, Washington, D.C., Lieutenant Colonel Henry H. Arnold returns from Fairbanks, Alaska, with his Martin B-10 bombers, having covered 7,000 miles without major mishap. Arnold wins the Mackay Trophy for his efforts.

August 21

MARINES: The 20-year occupation of Haiti concludes when the final elements of the 1st Brigade sail from that island and return home, where they are disbanded.

September 1

MARINES: In a major reorganization, the Fleet Marine Force is divided between Quantico, Virginia, and San Diego, California, each with its own infantry, artillery, and aviation elements. The system of identifying individual companies by letters is discarded in favor of a numbering system.

September 7–8

AVIATION: When the cruise ship *SS Morro Castle* is distressed off Asbury Park, New Jersey, four state National Guard aircraft are dispatched to observe and report on its condition.

November 1

AVIATION: The Naval Aircraft Factory is instructed to begin manufacturing the flush-deck hydraulic catapult Type H, Mark I. This device, originally constructed to launch landplanes from carriers, is soon widely adopted on carriers.

November 15

AVIATION: Marine Corps VO-8M is reactivated by amalgamating planes and personnel of VS-14M and VS-15M.

November 18

AVIATION: The navy contracts with the Northrop Corporation to produce its XBT-1 prototype dive bomber; this machine is eventually acquired, refined, and manufactured as the SBD Dauntless by Douglas during World War II.

December 15

AVIATION: The secretary of the navy approves acquisition of the Curtiss X03C-1 biplane observation seaplane; it enters navy service as the SOC-1 Seagull.

1935**January 14**

AVIATION: In the latest cold weather test of men and equipment, several squadrons from the carrier *Ranger* make midwinter flights to Hartford, Connecticut, and Buffalo, New York.

January 19–March 13

MARINES: To better hone the new amphibious doctrine, ground and air elements participate in Fleet Marine Exercise (FLEX) 1 on Culeba and Vieques Island, Caribbean, the first annual fleet maneuvers.

**Arnold, Henry H. (1886–1950)***Army general*

Henry Harley Arnold was born in Gladwyn, Pennsylvania, on June 25, 1886, and he graduated from the U.S. Military Academy in 1907. Though assigned to the infantry, he joined the Aviation Section, Signal Corps, soon after and became one of the army's earliest pilots. An excellent aviator, Arnold established a new altitude record of 6,540 feet in June 1912, winning the first Mackay Trophy for outstanding flight of the year. He was sidelined by a near-fatal crash, however, and rejoined the infantry, serving several months in the Philippines. There he came to the attention of Lieutenant George C. Marshall, and the two became fast friends. Arnold resumed flying in 1916 as the army's youngest colonel, but he missed action in World War I due to training assignments. Over the next three decades, however, he always managed to place himself at the forefront of aviation developments with a number of record-breaking flights. The most important

of these came in 1936 when he conducted a flight of Martin B-10 bombers from Langley Field, Virginia, to Alaska and back. He consequently won his second Mackay Trophy and was appointed assistant chief of the new Air Corps. In 1938 Arnold became chief of the Army Air Corps following the death of Major General Oscar Westover in a plane crash. He was also cognizant of aviation developments in Nazi Germany, and, through the assistant of his friend Marshall, now army chief of staff, he quietly arranged a sixfold increase in military aircraft production.

On December 15, 1941, Arnold was promoted to lieutenant general and, over the next four years, he faced and surmounted daunting production, technological, and administrative challenges that saw the Army Air Force mushroom from 22,000 men and 3,400 aircraft, to 2.5 million personnel and 63,715 warplanes. Furthermore, he flew around the world to various Allied

February 1

MARINES: At San Diego, California, the 2nd Battalion, 10th Marines is restructured as an artillery unit.

February 9

AVIATION: The prototype XN3N-1, intended as a primary trainer, is ordered from the Naval Aircraft Factory. Known as the "Yellow Peril" on account of its bright yellow coloring, it serves as a training aircraft through World War II.

February 12

AVIATION: The giant Navy dirigible *Macon* crashes off Point Sur, California, killing two crew members. This accident ends further military interest in lighter-than-air ships.

March 1

AVIATION: At Langley Field, Virginia, the Army Air Corps activates its General Headquarters Air Force (GHQ), an independent strike force under Major General Frank M. Andrews, which reports directly to the army chief of staff. This

conferences to ensure that American air power be applied effectively. This entailed a long struggle with Great Britain's Royal Air Force, whose leaders felt that nighttime saturation of targets was the most productive means of destroying German industry. Using diplomacy, Arnold, in concert with Generals Ira C. Eaker and Carl A. Spaatz, convinced Allied leaders to maintain precision, daylight bombing raids in concert with RAF night attacks. In the Pacific, the vast distances required a new bomber, so Arnold pushed for development of the giant B-29 Superfortress to take the war to the enemy's homeland. The air war against Japan crested in August 1945 with the atomic bombings of Hiroshima and Nagasaki, which induced the Japanese government to surrender. For orchestrating a successful air strategy against the Axis, Arnold was promoted to five-star general of the army, being the only airman so honored. After the war he entered into semi-retirement until 1947, when he was appointed the first head of the newly independent U.S. Air Force through a special act

Henry Harley "Hap" Arnold (United States Air Force History Center)

of Congress. Arnold died in Sonoma, California, on January 15, 1950, a leading architect of American air power.

proves a seminal step toward the refinement of strategic air power and creation of an independent air force.

March 8

TECHNOLOGY: At Roswell, New Mexico, a liquid-fuelled rocket launched by Dr. Robert H. Goddard reaches an altitude of 1,000 feet at a speed of 700 miles per hour.

March 12

AVIATION: The navy requests that the Pitcairn Autogiro Company remove the wings from its XOP-1, converting it into the XOP-2. This is also the navy's first heavier-than-air aircraft without fixed wings.

March 21

MILITARY: Retired major general Adolphus W. Greely receives the second peacetime Medal of Honor of his long career in exploration and communications work.

March 22

AVIATION: The prototype Grumman XF3F-1 flies for the first time; nicknamed the “Flying Barrel” on account of its robust fuselage, it entered production as the F3F and served as the navy’s main biplane fighter until 1940.

March 28

AVIATION: At Roswell, New Mexico, a liquid-fueled, gyroscopically controlled rocket launched by Dr. Robert H. Goddard reaches 4,800 feet at speeds of 550 miles per hour.

April 1

AVIATION: In Los Angeles, California, the prototype North American NA-16 (AT-6 Texan/SNJ of World War II fame) makes its maiden flight and is quickly adopted as an advanced training aircraft.

April 15

AVIATION: Congress passes the Aviation Cadet Act to increase the number of qualified pilots available to the U.S. Navy and Marine Corps Reserve. Qualified candidates receive their wings and perform three years of active duty, at the conclusion of which they also receive a \$1,000 bonus and inactive reserve commissions.

- The Douglas TBD Devastator torpedo bomber enters production; it is the first American naval aircraft featuring hydraulically folding wings and sees active service through 1942.

April 29–June 12

MARINES: The West Coast Fleet Marine Force conducts Fleet Problem XVI, which involves maneuvers around, and landings upon, Midway Island in the Pacific.

May 1

AVIATION: The navy pilot training program is revived to include 300 hours of flight school and 465 hours of ground school to be covered in one year. For the first time, there is no functional difference between student naval aviators and student aviation pilots.

May 22

MILITARY: In Washington, D.C., President Franklin D. Roosevelt’s veto of the Greenback Bonus Bill is overridden by Congress; the legislation is intended to pay World War I veterans the balance of the 1924 bonuses.

May 25

MARINES: In a major doctrinal update, the chief of naval operations approves the manual created by the Marine Corps in 1934 for landing operations.

May 31

AVIATION: Hickham Field, Hawaii, becomes operational for army aircraft.

June 5

AVIATION: In recognition of the growing significance of air power, the Marine Corps Aviation Section becomes an independent office within Headquarters Marine Corps, and reports directly to the commandant. Previously, it functioned as part of the Division of Operations and Training.

June 12–July 10

NAVAL: Fleet Problem XVI, which includes 520 carrier aircraft, battleships and cruisers, unfolds across 5 million square miles of the Pacific. Among its many tasks is to weigh how efficiently the battle fleet could fend off an attack against Hawaii and the American West Coast.

July 1

AVIATION: At Quantico, Virginia, Marine Bombing Squadron 6 (VB-6M) is organized.

July 8

MARINES: The Platoon Leaders Class is adopted, whereby college students, after attending two six-week summer training courses, are commissioned lieutenants in the Marine Corps Reserve.

July 9

MARINES: The “Tentative Manual for Landing Operations,” the first formal doctrine for amphibious attacks upon defended coastlines, is published by the Marine Corps Schools.

July 28

AVIATION: In Seattle, Washington, the Boeing Company flies its Model 299 heavy bomber, the prototype of the famous B-17 Flying Fortress, for the first time. It acquired its nickname from inspired journalists.

July 30

AVIATION: At San Diego, California, Lieutenant Frank Akers, flying blind, safely lands his Berliner-Joyce OJ-2 observation craft on the flight deck of the carrier *Langley*. The technology has been jointly developed with Washington Institute of Technology. This is the first such landing ever attempted and wins Akers the Distinguished Flying Cross.

August 9

MARINES: Headquarters, Fleet Marine Forces, transfers from Quantico, Virginia, to San Diego, California, to be near the largest part of the navy’s fleet.

August 20

AVIATION: Boeing’s Model 299 (B-17) flies from Seattle, Washington, to Wright Field, Ohio, for flight testing; it covers the 2,100-mile trip at a speed of 232 miles per hour—faster than many fighters.

August 24

AVIATION: Between Langley Field, Virginia, and Floyd Bennett Field, New York, Major Frank M. Andrews sets three speed-with-payload seaplane records while flying a Martin B-12 bomber equipped with pontoons.

August 31

DIPLOMACY: Congress, warily observing the rise of Nazi Germany and Imperial Japan, and fearful of getting involved in another world war, passes the Neutrality Act, which expressly forbids the export of arms and ammunition to belligerent powers.

September 1

MARINES: At Quantico, Virginia, the 1st Marine Brigade reactivates to serve as headquarters of the East Coast Fleet Marine Force.

September 17

AVIATION: At Scott Field, Illinois, an army crew takes TC-14, the world's largest nonrigid airship in the world, on its maiden flight.

September 26

AVIATION: In an agreement reached between the secretaries of war and the navy, the army turns over Rockwell Field, San Diego, California, Luke Field, Ford Island, Hawaii, and Bolling Field, Anacostia, Washington, D.C., to the navy, while the latter hands over the base at Sunnyvale, California.

October 1

MILITARY: Major General Douglas MacArthur ends his five-year tenure as army chief of staff to become military adviser to President Manuel Quezon of the Philippines. Major Dwight D. Eisenhower serves as his chief of staff in Manila.

October 2

MILITARY: Major General Malin Craig is appointed the 14th army chief of staff to replace outgoing Douglas MacArthur.

October 5

AVIATION: At Naval Air Station Lakehurst, New Jersey, the Goodyear G-1, the first G-Class airship, is turned over to the navy for training purposes.

October 14–15

AVIATION: A Consolidated XP3Y-1 flying boat under Lieutenant Commander Knefler McGinnis sets a 3,443-mile record by flying nonstop from Cristobal Harbor, Panama, to Alameda, California. This is a new world record for Class C seaplanes.

October 30

AVIATION: At Wright Field, Ohio, the Boeing Model 299 bomber prototype crashes on takeoff after gust-locking mechanisms were not removed beforehand. However, the army remains interested in acquiring a fleet of such impressive heavy bombers.

November 11

AVIATION: The army-crewed balloon *Explorer 2* reaches an altitude of 72,395 feet, taking photographs, which, for the first time, show the Earth's distinctive curvature. The rise and descent takes eight hours and 14 minutes over Rapid City, South Dakota. Captains Orvil A. Anderson and Albert W. Stevens subsequently receive the Mackay Trophy and the Hubbard Gold Medal from the National Geographic Society.

November 15

AVIATION: The chief of the Bureau of Aeronautics announces a competition between the Brewster XF2A-1 and the Grumman XF4F-3 fighter designs, both being all-metal monoplane fighters with retractable landing gear. Curiously, the latter started out as a biplane configuration but was revived. They enter service as the Buffalo and Wildcat, respectively.

December 9

NAVAL: In London, England, the Japanese delegation walks out of the Second London Conference when Japan fails to gain naval parity with the United States. Italy subsequently drops out, and a renewed naval arms race, spurred on by Japan and Germany, begins in earnest.

December 12

AVIATION: An amphibian aircraft flown by Lieutenant Hugh F. McCaffery with a five-man crew flies from San Juan, Puerto Rico, to Miami, Florida, setting a 1,033 mile record for this type of aircraft.

December 17

AVIATION: History is made over Santa Monica, California, when the Douglas DC-3 prototype, soon the world's most numerous air transport aircraft, makes its maiden flight. It is adopted into military service as the C-47 and sees widespread service during World War II.

December 22

AVIATION: Brigadier General Oscar Westover replaces outgoing major general Benjamin D. Foulois as commander of the Army Air Corps; the latter's reputation never recovered from the disastrous air mail fiasco.

December 27

AVIATION: At Hilo, Hawaii, bombers from the 5th Composite Group use bombs to divert a lava flow running down the slopes of the Mauna Loa volcano.

1936***January 2–February 24***

MARINES: Fleet Marine Exercise 2 unfolds in the Caribbean for the next seven weeks.

January 9

MILITARY: The 30.-caliber M1 Garand rifle enters production; this is the world's first self-loading rifle and fires an eight-round clip; an estimated 5.5 million are constructed and issued.

February 19

AVIATION: William "Billy" Mitchell, America's leading air power proponent, dies in New York City and is buried in Milwaukee, Wisconsin.

March 18

AVIATION: At Naval Air Station, Pensacola, Florida, testing on the Naval Aircraft Factory XN3N-1 trainer aircraft successfully concludes.

March 25

DIPLOMACY: The new London Naval Agreement is concluded among the United States, Britain, and France. However, it is laden with so many contingency clauses as to make it ineffectual.

April 1

AVIATION: The Marine Corps Aviation Section receives divisional status at Headquarters Marine Corps, another sign of air power's growing significance.

April 28

TECHNOLOGY: At the Naval Research Laboratory, a test model of a pulsed radio wave detection device (radar) detected a moving aircraft at a range of 25 miles.

May 12

TECHNOLOGY: At Langley Field, Virginia, NACA and Army Air Corps technicians begin operating the world's largest high-speed wind tunnel, capable of simulating conditions of up to 500 miles per hour.

June 6

TECHNOLOGY: The Socony-Vacuum Oil Company of Paulsboro, New Jersey, begins manufacturing the first 100-octane gasoline, which boosts airplane motor performance and enables planes to fly higher, faster, and farther while carrying greater payloads.

June 7

AVIATION: The first-ever blind transcontinental flight is performed by Major Ira C. Eaker after he flies an airplane from New York to Los Angeles, California, relying solely upon instruments.

June 16

AVIATION: The Seversky Aircraft Company wins a contract to manufacture the Army Air Corp's first all-metal fighter with enclosed cockpits and retractable landing gear, the P-35.

June 29

AVIATION: A Douglas YOA5-2 flown by Major General Frank M. Andrews and Major John Whitney sets a world airline record by flying 1,430 miles between San Juan, Puerto Rico, and Langley Field, Virginia.

July 1

MARINES: At San Diego, California, the 2nd Brigade activates as headquarters of the West Coast Fleet Marine Force, HQ, FMF now operates a brigade on both coasts.

July 23

AVIATION: The navy contracts with Consolidated Aircraft to construct its large XPB2Y-1 four-engine flying boat; it eventually enters into service as the Coronado.

August 19

AVIATION: Off the Virginia Capes, bombs dropped by Martin T4M torpedo bombers sink the old submarine *R-8*, conclusive proof that extensive damage results from near misses.

September 18

NAVAL: Following the onset of the Spanish civil war, Rear Admiral Arthur P. Fairfield conducts a squadron to help evacuate American citizens trapped in Spain.

September 25

MILITARY: In Washington, D.C., Harry H. Woodring becomes the 34th secretary of war.

October 13

AVIATION: The rocket facility at Roswell, New Mexico, operated by Dr. Robert D. Goddard, is visited by Lieutenant John W. Sessums to gauge the potential of possible military applications. He reports that this technology might be useful in propelling gliders.

October 27

MILITARY: Command of the Vancouver Barracks, Washington, passes to newly promoted brigadier general George C. Marshall, formerly of General John J. Pershing's personal staff during World War I.

December 1

MARINES: In Washington, D.C., Brigadier General Thomas Holcomb becomes the 17th major general commandant to replace retiring major general John Russell.

December 9

AVIATION: The 3rd Attack Group, Army Air Corps, receives the prestigious Columbian Trophy for best flying safety record of the year.

1937**January 2**

NAVAL: In Washington, D.C., Admiral William D. Leahy gains appointment as the seventh chief of naval operations.

January 27

MARINES: Marine and army units participate in Fleet Marine Exercise 3 off San Clemente Island, California. This is also the first exercise in which brigades from both coasts are involved and Aircraft One also flies cross-country from Quantico, Virginia, to be present.

February 11

AVIATION: A flight of eight Martin B-10 bombers commanded by Major J. McDuffie flies from Langley Field, Virginia, to Airbrook Field, Panama, covering 4,000 miles without serious mishap. This is also the first time that large land aircraft have been permitted to fly over open water.

March 1

AVIATION: In a highly significant development for aerial warfare, Boeing delivers its first YB-17A Flying Fortress to the Army Air Corps at Langley Field, Virginia. This is the Army's first four-engine, high-speed, high-altitude aircraft, possessing sufficient range and bomb load to serve as a strategic bomber. Moreover, as a "flying battleship," it is expected to fly over enemy territory in daylight and defend itself with numerous gun turrets.

March 26

AVIATION: In a sign of growing sophistication, Dr. Robert H. Goddard launches a liquid-fuel rocket guided by moveable air vanes in contact with the rocket exhaust and connected to a gyrostabilizer in the nose; an altitude of 9,000 feet is achieved.

May 6–8

MARINES: Following the fiery demise of the German dirigible *Hindenberg* at Lakehurst, New Jersey, marine units lend rescue and security service at the crash site.

May 30

AVIATION: The navy contracts with the Martin Company to build its prototype XPMB-1 twin-engined flying boat. It enters into service as the PBM Mariner and sees distinguished service during World War II.

June 21–22

AVIATION: Patrol Squadron 3 under Lieutenant Robert W. Morse flies 12 PBV Catalinas from San Diego, California, to Coco Solo, Panama, covering 3,292 miles in 27 hours and 58 minutes.

June 30

AVIATION: Major General Oscar Westover, chief of the Army Air Corps, ends the army's balloon program for want of congressional funding; all remaining equipment is handed over to the navy.

July 1

AVIATION: Marine Corps squadrons adopt the new navy designations, with VMF, VMB, VMS, and VMJ denoting fighters, bombers, scouts, and utility aircraft, respectively.

MILITARY: The Signal Corps Weather Service transfers to the Army Air Corps.

July 2

AVIATION: President Franklin D. Roosevelt orders the navy to commit several capital ships to search for aviatrix Amelia Earhart, who is missing in the Southwest Pacific.

July 7

MILITARY: In an Asian prelude to World War II, Japan begins invading China.

July 20

AVIATION: In a sign of things to come, the General Headquarters (GHQ) Air Force receives its own uniform insignia, signaling its status as an independent air unit. Complete independence is still a decade off.

August 4

MARINES: In Washington, D.C., Congress officially charters the Marine Corps League, although it has existed on a private basis since 1923.

August 8

MARINES: In Beijing, China, the marine legation guard suddenly finds itself surrounded by Japanese forces after they drive Chinese troops from the city.

August 12–26

MARINES: In Shanghai, China, full-scale warfare erupts between Chinese and Japanese forces, forcing the 4th Marines to establish a security perimeter around the American portion of the International Settlement. They are shortly after reinforced by detachments from the cruiser *Augusta*, along with other detachments from the Philippines.

August 23

TECHNOLOGY: At Wright Field, Ohio, Captain George V. Holloman, flying a Fokker C-14B, performs the world's first completely automated landing by switching on an autopilot designed by Captain Carl J. Crane; both men receive the Mackay Trophy and Distinguished Flying Crosses.

September 19

MARINES: At Shanghai, China, 2nd Brigade Headquarters and the 6th Marines arrive to bolster the 4th Marines as fighting continues between Chinese and Japanese forces.

September 21

AVIATION: Gender barriers in aviation begin falling as aviatrix Jacqueline Cochran, flying a civilian version of the P-35 fighter, establishes a woman's high-speed record of 293 miles per hour.

MILITARY: In New York City, the American Legion turns out 150,000 veterans to march down Fifth Avenue in celebration of the 20th anniversary of World War I. The parade lasts 18 hours and is cheered on by an estimated 3.5 million spectators.

September 30

NAVAL: The new carrier *Yorktown* is placed in commission.

October 15

AVIATION: At Seattle, Washington, Boeing's gigantic XB-15 takes to the air for the first time with test pilot Eddie Allen at the controls; though impressive in terms of size, the XB-15 is grossly underpowered and only one is built.

December 3

AVIATION: Major Alexander P. de Seversky flies an aircraft of his own design from New York City to Havana, Cuba, setting a new record of five hours and three minutes.

December 12

NAVAL: On the Yangtze River, China, Japanese aircraft bomb and sink the clearly marked American gunboat *Panay* under Lieutenant Commander James J. Hughes, killing two crew members and wounding 43 others. The attack sparks an immediate crisis in Japanese-American relations.

December 14

DIPLOMACY: In light of the public outcry, the Japanese government apologizes for the sinking of the *Panay* and agrees to pay reparations. War is averted for the time being, but the Japanese refuse to moderate their mounting aggression in China.

December 17

AVIATION: The navy contracts with the Hall Aluminum Aircraft Company to obtain its prototype XPTBH-2, being the last twin float torpedo aircraft acquired for Naval Aviation.

December 23

AVIATION: At Coast Guard Station Cape May, New Jersey, a successful radio-controlled flight utilizing a JH-1 drone is completed; the takeoff employed a

land-based radio while inflight maneuvers were accomplished through an airborne TG-2 set.

1938

January 3

POLITICS: President Franklin D. Roosevelt stresses economic and social ills still plaguing America but, in light of current events worldwide, he also mentions the need for maintaining a strong national defense.

January 7

MILITARY: To update army uniforms, an order is issued that abolishes the use of spiral canvass leggings (puttees) in all services but the cavalry.

January 13–March 15

MARINES: Fleet Marine Exercise 4 unfolds at Culebra, Puerto Rico.

January 28

MILITARY: Congress receives President Franklin D. Roosevelt's recommendation that military appropriations be stepped up, particularly for the navy.

February 1

NAVAL: In Annapolis, Maryland, Rear Admiral Wilson Brown is appointed 31st superintendent of the U.S. Naval Academy.

February 2

NAVAL: When two Consolidated PBY *Catalinas* collide in the dark, Lieutenant Carlton B. Hutchins maintains control of the stricken aircraft long enough for four crew members to bail out; he win a posthumous Medal of Honor.

February 17

AVIATION: Lieutenant Colonel Robert D. Olds leads six Boeing B-17 bombers from Miami, Florida, to Buenos Aires, Argentina, to attend the inaugural of President Roberto Ortiz. What follows is a stunning display of strategic air power.

February 18

MARINES: Once the Japanese have dislodged all Chinese forces from the vicinity of Shanghai, China, fighting ceases and the 2nd Brigade headquarters and 6th Marines are withdrawn from the International Settlement.

February 27

AVIATION: A flight of six Boeing B-17 bombers under Lieutenant Colonel Robert D. Olds returns to Langley Field, Virginia, after completing a 10,000-mile round-trip flight to Buenos Aires, Argentina. The trip required 33 hours and 30 minutes of flying time and results in the Mackay trophy for all crew members involved. Moreover, their success heralds that the age of strategic bombing is at hand.

February 28

MARINES: At Tientsin, China, the army's 15th Infantry Regiment ceases to serve as the legation guard and is replaced by 200 Marines sent from the Beijing garrison.

April

NAVAL: During the course of Fleet Exercise XIX, the carrier *Saratoga* stages a mock surprise attack on naval facilities at Pearl Harbor, Hawaii.

April 6

AVIATION: At Wright Field, Ohio, testing begins on the new and seemingly revolutionary Bell XP-39, whose engine is tucked midway down the fuselage, behind the pilot's compartment, while a 37mm cannon is mounted down the fuselage centerline. It enters into production as the P-39 Airacobra.

April 21

AVIATION: At the Langley Memorial Aeronautical Laboratory, Virginia, full-scale wind tunnel testing commences for the first time on a Brewster XF2A-1 fighter. The modifications highlighted by testing promise to enhance the fighter's performance by 31 miles per hour in level flight.

May 1

AVIATION: The army stages a three-day maneuver along the eastern seaboard to determine whether airplanes can repel a seaborne attack. The exercise involves 220 aircraft and 3,000 men, and it is judged successful.

May 12

AVIATION: The Army Air Corps, to underscore its ability at coastal defenses, dispatches three B-17 bombers, which intercept the Italian liner *Rex* 700 miles at sea. Eager to protect its turf, the navy subsequently demands that army aircraft be limited to only 100 miles from the coast.

NAVAL: The new carrier *Enterprise* is commissioned; it will emerge from World War II as the navy's most decorated vessel.

May 17

NAVAL: In light of the global situation, the Naval Expansion Act of 1938 passes Congress and appropriates \$1 billion to construct capital ships, cruisers, aircraft carriers (including the *Essex*), and no less than 3,000 modern aircraft.

June 8

AVIATION: After two years of extensive testing under violent flying conditions, the navy determines that the antiblackout, or abdominal, belt is insufficient and it returns to developmental status.

June 23

MARINES: In Washington, D.C., legislation mandating that Marine Corps strength should be set at 20 percent of active-duty enlisted personnel is signed by President Franklin D. Roosevelt. Present manpower levels are authorized at 27,400 officers and men, although only two-thirds of that number are serving.

June 25

NAVAL: In light of global tensions, Congress authorizes construction of two battle-ships, one carrier, two light cruisers, and several smaller vessels.

MARINES: The new Naval Reserve Act reorganizes the Marine Corps Reserve into the Fleet Marine Reserve, the Organized Marine Corps Reserve, and the Volunteer Marine Corps Reserve.

July 1

AVIATION: The navy assigns a new command billet, that of commander, Carrier Air Group, while carrier squadrons are organized into groups designated by the carrier's name on which they serve.

August 3–12

AVIATION: A flight of three Boeing B-17 bombers under Major Vincent J. Meloy, 2nd Bombardment Group, departs Langley Field, Virginia, on a round-trip, goodwill flight to Bogotá, Colombia.

August 19

AVIATION: The new Douglas B-18 Bolo bomber (adapted from the DC-3 transport) performs a transcontinental flight from Hamilton Field, California, to Mitchel Field, New York, in 15 hours and 18 minutes.

August 23

AVIATION: The navy contracts with the Martin Company to acquire its XPBM-1 four-engine flying boat. It enters service as the JRM Mars transport, of which only six are built.

August 24

AVIATION: The navy tests its first radio-controlled target drone—the JH-1 from the deck of the carrier *Ranger*. Success here illustrates that such radio-controlled devices have practical application as training devices in the fleet.

September 12

TECHNOLOGY: At Cambridge, Massachusetts, technicians and scientists of the Massachusetts Institute of Technology (MIT) commences operations with a high-pressure wind tunnel capable of simulating conditions found at 35,000 feet.

September 14

AVIATION: The battleship *Utah* is subjected to a simulated dive-bomb attack by a radio-controlled N2C-2 target drone in what is the first demonstration of an air-to-ground missile.

September 21

AVIATION: At Burbank, California, a Douglas A-17AS staff aircraft crashes, killing Major General Oscar Westover and his mechanic. An accident inquiry attributes the incident to unpredictable, gusty winds coupled with intense heat currents rising off the ground.

September 29

AVIATION: Brigadier General Henry H. Arnold is promoted to major general and appointed chief of the Army Air Corps to replace the recently deceased major general Oscar Westover.

October 14

AVIATION: At Buffalo, New York, the new Curtiss XP-40 prototype begins flight testing; during World War II nearly 14,000 will be constructed for the United States and its Allies as the P-40 Warhawk.

October 15

AVIATION: The Navy Department issues new specifications for the color of its training aircraft; henceforth, all such planes will be finished in a bright

orange-yellow paint scheme. However, service aircraft will continue to display bare aluminum and orange yellow on upper-wing surfaces as they have since 1925.

October 26

AVIATION: At El Segundo, California, the Douglas Model 7B, better known as the A-20 Havoc, begins flight testing. During World War II it sees action in every theater and is the most-produced army surface attack aircraft.

November

TECHNOLOGY: An early form of radar is demonstrated to the secretary of war after extensive testing by the Coast Artillery.

November 14

AVIATION: In Washington, D.C., President Franklin D. Roosevelt suggests that the overall mission of the Army Air Corps operations be expanded and begins advocating for a 20,000-plane force. Funding is not practical at the moment, but Major General Henry H. Arnold equates this secret conference to the “Magna Carta” as far as American air power is concerned.

December 1

NAVAL: The newly issued Hepburn report outlines the needs for expanded naval bases overseas, the enlargement of 11 airbases in the United States, and it also recommends construction of 16 airbases overseas, including six in the Pacific (including Wake, Midway, and Guam).

December 9

TECHNOLOGY: The Naval Research Laboratory successfully tests a shipboard radar of its own design on the battleship *New York*; during World War II, American vessels outfitted with such new devices enjoy huge tactical advantages over their Japanese counterparts.

December 16

AVIATION: At Naval Air Station Lakehurst, New Jersey, the navy begins testing the nonrigid K-2 blimp for possible use as an antisubmarine weapon. During World War II, no less than 135 are acquired for this purpose.

1939

January

AVIATION: The General Board of the Navy defines the mission statement of marine aviation units as that of supporting Fleet Marine Force units in the field, with a secondary mission of replacing navy carrier-based aircraft if necessary.

January 3

MARINES: A board headed up by Admiral Arthur Hepburn informs Congress of the need for continued base construction and expansion in the Pacific, including Wake, Midway, Johnson, and Palmyra Atolls.

January 5

MILITARY: President Franklin D. Roosevelt’s annual budget of \$9 billion includes \$1.3 billion for military appropriations, the largest amount requested since World War I.

January 9

MILITARY: In a move of tactical significance, the army begins mass issuing of its famous semiautomatic M-1 Garand rifle. This weapon replaces the slower, bolt-action Springfield and can loose an 8-round clip in 20 seconds.

January 12

AVIATION: In a message to Congress, President Franklin D. Roosevelt requests that higher priority be placed on the development and acquisition of modern military aircraft.

January 13–March 19

MARINES: In the Caribbean, Fleet Exercise 5 incorporates marine and navy units in various tactical problems.

January 27

AVIATION: At March Field, California, the Lockheed XP-38 twin-engined fighter makes its impressive debut with Lieutenant Benjamin Kelsey at the controls.

February 10

AVIATION: In Los Angeles, California, the North American NA-40 (B-25 Mitchell) twin-engine bomber makes its initial flight; in World War II it becomes the most numerous medium bomber on the Allied side.

February 14

AVIATION: At Langley Field, Virginia, Major Caleb V. Hayne flies the giant Boeing XB-15 prototype bomber during a mercy flight to assist earthquake victims in Chile. He arrives with 3,000 pounds of badly needed medical supplies in 29 hours and 53 minutes, winning a Mackay Trophy. Though impressive, the XB-15 is regarded as too heavy and underpowered to serve as a strategic bomber and never enters production.

March 15

TECHNOLOGY: The Eureka Boat, conceived and constructed by Louisiana boat-builder Andrew Higgins, is successfully tested by marine units during Fleet Exercise 5. This is the prototype for thousands of amphibious landing craft constructed during World War II, and it is eventually fitted with a bow ramp to allow easy egress by the troops it conveys.

March 24

AVIATION: At Palm Springs, California, aviatrix Jacqueline Cochran sets a woman's altitude record of 30,052 feet while flying a Beechcraft.

April 1

MILITARY: Major General Joseph A. Green becomes chief of the Coastal Artillery; he is the last officer so appointed.

April 3

AVIATION: In Washington, D.C., the National Defense Act is signed into law by President Franklin D. Roosevelt, which gives the Army Air Corps \$300 million and authorizes its expansion to 48,000 personnel and 6,000 aircraft. In a nod to growing civil rights pressure, it also allows African Americans to receive flight training for the first time.

April 7

AVIATION: In light of the navy's success with the Consolidated PBY Catalina flying boat, the company is contracted to build an amphibian version with retractable landing gear. This variant enters service as the PBY-5A and sees widespread service during World War II.

April 18

AVIATION: Colonel Charles A. Lindbergh of the Missouri National Guard is recalled to duty by Major General Henry H. Arnold and tasked with evaluating and uncovering weaknesses in American air power.

April 21

MARINES: At Headquarters Marine Corps, the Division of Operations and Training is redesignated the Division of Plans and Policies.

May 1

AVIATION: Aircraft One, based at Quantico, Virginia, and Aircraft Two, stationed in San Diego, California, are renamed the 1st and 2nd Marine Aircraft Groups, respectively.

May 15

AVIATION: The navy contracts with Curtiss Aircraft to construct the prototype XSB2C-1 dive bomber, which enters into production during World War II as the Helldiver.

May 17–October 18

MARINES: Detachments from the gunboats *Asheville* and *Tulsa*, and destroyer *Whipple*, go ashore at Kulangsu, China, to protect American interests following recent Japanese landings there.

May 23

NAVAL: Off Portsmouth, New Hampshire, the submarine *Squalus* sinks in 240 feet of water during a practice dive; 33 of 59 surviving crew members are subsequently rescued by the new McCann Rescue Chamber. The submarine itself is also raised in a salvage effort directed by Rear Admiral Ernest J. King and rechristened the *Sailfish*.

June 1

AVIATION: Head of the Air Corps major general Henry H. Arnold, wishing to acquire as large a pool of trained pilots as possible, assigns civilian flying schools the task of accepting flying cadets as pupils.

June 11–13

NAVAL: Off the West Coast, the carrier *Saratoga* and fleet oiler *Kanawa* undertake refueling exercises while underway, proving the viability of replenishment at sea. This procedure proves invaluable during World War II in areas where bases are inaccessible.

July 1

MILITARY: In Washington, D.C., an executive order issued by President Franklin D. Roosevelt mandates that the Aeronautical Board, the Joint Board (eventually Joint Chiefs of Staff), the Joint Economy Board, and the Munitions Board will also begin operating under the direction of the commander in chief.

July 7

NAVAL: The U.S. Coast Guard assumes responsibilities of the Lighthouse Bureau.

July 13

AVIATION: The chief of naval operations authorizes creation of a Fleet Air Tactical Unit to provide research on the operational use of new aircraft entering the fleet.

July 15

AVIATION: The Army Air Corps acquires performance rights to the song “Wild Blue Yonder” by composer Robert Crawford. It subsequently becomes a theme of the U.S. Air Force.

July 30

AVIATION: The sole Boeing B-15, flown by Major Caleb V. Haynes and Captain W. D. Olds, reach 8,200 feet while carrying a 15.5 payload, breaking a new payload-to-altitude record.

August 1

NAVAL: In Washington, D.C., Admiral Harold R. Stark is installed as the eighth chief of naval operations.

August 2

TECHNOLOGY: Noted physicist Albert Einstein composes a letter to President Franklin D. Roosevelt concerning the possibility of constructing an atomic bomb, whose power would exceed all known weapons. Einstein also fears that the Germans have already launched a program to acquire one. This missive piques Roosevelt’s attention and the top-secret Manhattan Project is born.

August 4

AVIATION: Carriers *Yorktown* and *Enterprise* successfully launch SBC-3 and O3U-3 aircraft from hydraulic flush-deck catapults mounted in hangar decks directly below the flight deck.

August 8

MILITARY: At Plattsburgh, New York, the 7th Cavalry Brigade (Mechanized) under Brigadier General Adna R. Chaffee rolls into town after successfully completing an overland journey from Fort Knox, Kentucky.

August 24

MEDICAL: The acting secretary of the navy orders the assignment of a medical officer to the Bureau of Aeronautics in order to create an Aviation Medical Research Unit.

August 26

AVIATION: A B-17 flown from Miami, Florida, to the Panama Canal Zone by Major Stanley Umstead reaches its objective in only six hours and demonstrates America’s ability to reinforce that strategic point by air.

August 30

AVIATION: A twin-engined XJO-3 aircraft piloted by Lieutenant Commander Thurston B. Clark makes a series of 11 takeoffs and landings on the deck of the carrier *Lexington*, demonstrating the viability of multiengine aircraft at sea.

MILITARY: The 7th Cavalry Brigade (Mechanized) debuts at the World's Fair at Flushing Meadows, New York, where its tanks and other mobile equipment become an outstanding attraction.

September 1

MILITARY: World War II, the largest and bloodiest conflagration in human history, begins as German tanks blitzkrieg their way across Poland. The British and French governments promptly declare war on Germany two days later as the European continent is engulfed in another costly struggle.

- On this momentous day, President Franklin D. Roosevelt appoints Brigadier General George C. Marshall to replace outgoing general Malin Craig as the new army chief of staff. Marshall also jumps to four-star rank, the first individual so quickly promoted in army history. Marshall commands a force of only 174,000 men that are dispersed across 120 locations. War finds the United States woefully unprepared for conflict on a global scale.

September 5

NAVAL: Having issued a declaration of neutrality in the European conflict, President Franklin D. Roosevelt orders Chief of Naval Operations Admiral Harold R. Stark to commence a "Neutrality Patrol," stretching 300 miles off the eastern seaboard, to monitor all foreign vessels entering American waters.

September 8

MILITARY: In light of events in Europe, President Franklin D. Roosevelt declares a "limited national emergency" and informs army and navy commanders that training and preparedness are now top priorities.

NAVAL: President Franklin D. Roosevelt calls for an increase in navy manpower from 110,813 to 145,000 and recalls retired officers, enlisted men, and even nurses back to the colors.

MARINES: President Franklin D. Roosevelt authorizes an increase in Marine Corps manpower levels to 25,000 rank and file.

September 11–13

AVIATION: PBY Catalinas of VP-33 and VP51 are shifted to new bases in Panama and Puerto Rico to commence patrolling the Caribbean in search of hostile vessels.

September 14

AVIATION: The VS-300, designed and flown by Igor Sikorsky, becomes the first practical helicopter by reaching a height of three feet for 10 seconds.

September 15

AVIATION: At Burbank, California, aviatrix Jacqueline Cochran sets a new speed record for a 1,000-kilometer course while flying a Seversky AP-9 at speeds of 309.5 miles per hour.

September 16

MILITARY: Major General Walter Krueger devises the new "triangular" divisional structure, consisting of three infantry regiments assisted by requisite field artillery and support units. This streamlined organization is believed to enhance tactical flexibility.

**Marshall, George C. (1880–1959)***Army general*

George Catlett Marshall was born in Uniontown, Pennsylvania, on December 31, 1880, and he graduated from the Virginia Military Institute in 1901. Bent upon military service, he joined the U.S. Army as second lieutenant and performed useful service during the Philippine occupation. Marshall discharged his duties capably and, in 1908, he graduated from the General Staff School. During World War I he served as a staff officer attached to the First U.S. Army, where his abilities were readily manifested in the nickname “The Wizard.” His requests for a combat command were turned down but, in 1919, he joined the staff of General John J. Pershing, and, in 1927, he transferred abroad for service in China. Marshall next accepted command of the military school at Fort Benning, Georgia, in 1927, but, in 1933, he was appointed to serve as senior instructor in the Illinois National Guard. Marshall, though disappointed with this obscure assignment, duti-

fully oversaw his charge and, in 1939, President Franklin D. Roosevelt promoted him to army chief of staff over the heads of several more senior officers. Marshall became responsible for the recruitment, training, and deployment of millions of American soldiers during World War II, in addition to promulgating the “Germany first” strategy that eventually won the war. He also accompanied President Roosevelt to several high-level Allied strategy sessions at Casablanca, Teheran, and Yalta. Marshall very much wanted to command Operation Overlord, the Allied invasion of Normandy but, because his services were needed stateside, Roosevelt appointed General Dwight D. Eisenhower to lead the assault. Marshall was disappointed, but, in December 1944, he gained promotion to five-star general. He helped craft the strategy that resulted in the atomic bombings of Hiroshima and Nagasaki, which brought World War II to a speedy and victorious

September 21

AVIATION: VP-21 flies its 14 PBV Catalinas from Pearl Harbor, Hawaii, to the Philippines, where it serves as the first patrol unit with the Asiatic Fleet since 1932.

September 23

MILITARY: At Camp Holabird, Maryland, the American Bantam Car Company delivers its prototype, quarter-ton truck, soon known affectionately as the Jeep. Over 650,000 of these legendary vehicles are constructed over the next five years.

October 1

AVIATION: The navy, seeking to rapidly train its pool of pilots, orders the training syllabus revised and concentrated so that cadets may gain their wings in six months instead of 12. Ground school is also shortened from 33 weeks to 18.

conclusion. He resigned from the military in November 1945.

Soon after the war, President Harry S. Truman dispatched Marshall to China in an unsuccessful attempt to patch up differences between the Nationalists under Chiang Kai-shek and the Communists under Mao Zedong. In June 1947, Truman appointed him secretary of state, whereby Marshall conceived the vast European Recovery Program to assist the war-shattered nations of western Europe. The ensuing “Marshall Plan” helped stabilize political institutions there and thwarted a possible Communist takeover. For this effort he received the Nobel Peace Prize in 1953. He retired again from public service in January 1949, but, following the onset of the Korean War in June 1950, Marshall briefly served as secretary of defense. He concluded his long career in public service in 1951 and lived in seclusion until his death in Washington, D.C., on October 16, 1959. The quiet, austere Marshall, who never commanded troops in battle, is regarded as one of the leading architects of America’s rise to global prominence.

General George C. Marshall (Library of Congress)

MILITARY: In Washington, D.C., Fort Humphreys is rechristened the Army War College (subsequently renamed Fort Lesley J. McNair).

October 2

DIPLOMACY: In Panama, the Congress of American States declares a “neutral zone” reaching 300 miles from the South and Central American coastlines while the areas stretching from Maine to Trinidad is to be patrolled by navy vessels.

MILITARY: As the United States slowly retools for war, the 5th Division is reactivated at Fort McClellan, Alabama, and organized along the new “triangular” system at a strength of 15,000 men.

October 5

NAVAL: The carrier *Enterprise*, two heavy cruiser divisions, two destroyer squadrons, and auxiliary vessels—the Hawaiian Detachment—depart the West Coast for Pearl Harbor, Hawaii. This move is meant to deter Japanese aggression in the Pacific.

October 10

MARINES: The first of a new type of unit, the 3rd Defense Battalion, is created at Parris Island, South Carolina. Its primary purpose is to defend expeditionary bases against air and surface attacks, either from land or from sea.

October 14

AVIATION: The Naval Aircraft Factory is ordered to create radio control equipment for use in remote-controlled flight testing of aircraft so that violent maneuvers, such as dive and pullouts, can be accomplished without risking a pilot's life.

November 1

MILITARY: Army food, never exactly gourmet fare, is upgraded with the issuance of the new and infamous "C-Ration"—soon to be the staple of military diets.

MARINES: The new 1st Defense Battalion is formed at San Diego, California.

November 4

DIPLOMACY: The Neutrality Law is signed by President Franklin D. Roosevelt, which repeals the arms embargo and authorizes the sale of arms to various nations on a "cash-and-carry" basis, provided that they also provide the transportation. Furthermore, it forbids U.S. shipping from entering combat zones (including the British Isles), and also establishes a National Munitions Control Board.

December 1

NAVAL: The six vessels of Submarine Division 14 are posted with the Asiatic Station to bolster its defensive firepower in the event of war.

December 14–19

NAVAL: U.S. warships shadow the German passenger liner *Columbus* and several pursuing British destroyers, 450 miles off the American coast; when the German ship is scuttled to prevent capture, the heavy cruiser *Tuscaloosa* rescues 573 passengers and conveys them safely to New York.

December 16

AVIATION: At Langley Field, Virginia, Major General Delos C. Emmons replaces Major General Frank Andrews as chief of the General Headquarters Air Force (GHQ).

December 20

AVIATION: In order to meet demands of the Neutrality Patrol, the navy contracts with Consolidated Aircraft to acquire a further 200 PBV Catalina patrol planes; this is the largest order for naval aircraft since 1917.

MARINES: In Washington, D.C., Chief of Naval Operations Harold Stark orders a marine garrison sent to Midway Island in the Pacific.

December 29

AVIATION: In San Diego, California, the Consolidated XB-24 prototype flies for the first time; in World War II it is known as the Liberator and becomes the most numerous American warplane with over 18,000 constructed.

1940

January 2

NAVAL: In Washington, D.C., Charles Edison is installed as the 46th secretary of the navy.

January 3

MILITARY: In light of current events, President Franklin D. Roosevelt submits a budget of \$8.4 billion, of which \$1.8 billion is earmarked for military expenditures.

January 11

MARINES: Fleet Exercise 6 is held in the Caribbean and employs the 1st Marine Brigade and the 1st Marine Air Group.

January 15–22

NAVAL: At Monterey, California, a joint army and navy force rehearses amphibious landings to familiarize all hands with embarking and landing procedures. The American military establishes itself as a world leader in this form of warfare.

January 18

AVIATION: At Selfridge Field, Michigan, the 94th Pursuit Squadron, the lineal successor to Captain Eddie Rickenbacker's 94th Aero Squadron of World War I, wins the Luke Trophy Award for the highest gunnery average of the year.

January 23

AVIATION: In a pioneering test of troop airlifting, a force of 38 bombers from the 7th Bomber Group, based at Hamilton Field, California, loads a battalion of the 65th Coast Artillery and flies them safely to a point 500 miles distant.

February 1

MARINES: The new 4th Defense Battalion organizes at Parris Island, South Carolina.

February 15

AVIATION: In light of reports coming in from Europe, the commander in chief, U.S. Fleet, requests that the Bureaus of Aeronautics and Ordnance step up efforts to provide naval aircraft with better armor and self-sealing fuel tanks.

February 24

AVIATION: The Bureau of Aeronautics issues a contract to obtain television equipment, including a camera, transmitter, and receiver, that can be fitted to aircraft. It is hoped such devices will enable radio-controlled airplanes to serve as offensive weapons.

February 26

AVIATION: In light of the possibility of enemy air attack on the continental United States, the Air Defense Command is established by the army to coordinate defensive tactics and strategy. It is based at Mitchel Field, New York.

February 27

AVIATION: The navy issues a contract to the Vought Aircraft Company to develop its radical V-173 prototype featuring a near-circular wing. On paper it promises to

deliver level flight approaching 500 miles per hour with a very low takeoff speed; in light of its peculiar shape it becomes known as the “Flying Flapjack.”

February 29

AVIATION: In light of developments in Britain and Germany, the navy contracts with Professor H. O. Croft of the University of Iowa to investigate the potential of turbojet propulsion in naval aircraft.

March 1

MARINES: The new 2nd Defense Battalion is created at San Diego, California.

March 15

AVIATION: In Washington, D.C., Major General James E. Chaney is appointed commander of the new Air Defense Command.

March 22

AVIATION: The Naval Aircraft Factory, Washington, D.C., begins working on a radio system for its torpedo-carrying TG-2 flying drone. This is one of the first guided-missile systems.

March 25

AVIATION: The U.S. government liberalizes trade policies, thereby allowing American aircraft manufacturers to export modern military warplanes to non-Axis countries.

March 26

AVIATION: At St. Louis, Missouri, the Curtiss CW-20T prototype (later C-46 Commando) flies for the first time; it will perform yeoman work as a transport during World War II.

April 1

MILITARY: In Oslo, Norway, 31-year-old Captain Robert M. Losey, Army Air Corps attaché, becomes the first American officer casualty of World War II when he is killed in a German air raid.

MARINES: At San Diego, California, the 8th Marines is reactivated and is berthed with the 2nd Marine Brigade.

April 7–13

NAVAL: Off the Panama Canal Zone, the destroyer *J. Fred Talbott* makes a rendezvous with the Japanese freighter *Arimasa Maru* to provide medical assistance to an injured crew member.

April 15

AVIATION: In Washington, D.C., the War Department releases Field Manual 1–5, which calls for centralized control of air assets and their proper employment in wartime. This principle applies to both strategic bombing against industrial targets and low-level tactical support for ground units.

April 25

NAVAL: The new aircraft carrier *Wasp* is commissioned.

May 7

NAVAL: When President Franklin D. Roosevelt orders ships of the U.S. Fleet to remain at Pearl Harbor as a continuing show of strength to Japan, Admiral James

Richardson protests that Pearl Harbor's defensive facilities are woefully inadequate; the president removes him from command the following February.

May 13

AVIATION: On Long Island, New York, Igor Sikorsky demonstrates his VS-300 prototype, which is the world's first free-flying helicopter. Success convinces army officials to consider the military application of such new technology.

May 14

MARINES: Commandant Major General Thomas Holcomb, impressed by the use of German airborne operations in Europe, instructs his staff to study the possibility of employing parachute troops.

May 16

AVIATION: Having conferred closely with Major General Henry H. Arnold, President Franklin D. Roosevelt appeals to Congress for a \$1.18 billion defense appropriation, and an increase in military aircraft production to 50,000 per year.

NAVAL: The newest military defense appropriations request includes \$250 million for the navy and Marine Corps.

May 17

NAVAL: President Franklin D. Roosevelt declares that 35 mothballed World War I destroyers (flush-deck fourstackers) will be recommissioned.

May 23–25

AVIATION: Near Barksdale, Louisiana, more than 300 Army Air Corps aircraft participate in large-scale war games staged by the Third Army as it conducts ground operations.

May 27

AVIATION: The secretary of the navy directs that the forthcoming destroyers *Pringle*, *Stanly*, *Hutchins*, *Stevens*, *Halford*, and *Leutze* be fitted with catapults and plane-handing equipment.

May 28

AVIATION: Major General Henry H. Arnold confers with Dr. Robert H. Goddard as to the possible military application of his rockets. Nothing material comes of their discussion, but Dr. Theodor von Kármán is subsequently directed to pursue the possibility for developing rocket-powered assists for heavily laden bombers.

June

AVIATION: The Navy Department is authorized by Congress to acquire 10,000 new aircraft, of which 1,167 are earmarked for the Marine Corps. The latter will constitute four aircraft groups of 11 squadron apiece.

June 3

MILITARY: The War Department agrees to sell Great Britain outdated warships and other weapons totaling millions of dollars to replace those lost in the recent evacuation at Dunkirk, France.

- Closer to home, the 4th Division is reactivated at Fort Benning, Georgia.

June 5

MILITARY: In a major and surprising blow to the Western alliance, tank-led German forces easily overrun France and capture Paris. The U.S. Army, faced with the prospect of confronting these successful “blitzkrieg” tactics, finds itself woefully unprepared for the task.

June 11

NAVAL: The Naval Supply Act is passed by Congress, which provide \$1.5 billion for defense appropriations.

June 10

MILITARY: In light of the dire need for military preparedness, corps area commanders are instructed to commence civilian training camps similar to the “Plattsburgh Camps” of World War I. However, the entire program is terminated on July 24, 1940.

June 13

MILITARY: The Military Supply Act is passed by Congress, which sets aside \$1.8 billion for various defense projects.

June 14

MILITARY: Western military leaders are shocked when France, regarded by many as possessing the world’s best fighting establishment, is defeated by Nazi armies. To underscore the fact, German forces parade through Paris in triumph today.

NAVAL: President Franklin D. Roosevelt signs the Naval Expansion Act of 1940, which authorizes an 11 percent increase in naval strength. The measure, which originally included provisions for 4,500 new aircraft, was increased to 10,000 the following day.

June 17

NAVAL: At the urging of Chief of Naval Operations admiral Harold R. Stark, Congress passes a \$4 billion appropriations bill to increase naval strength by 70 percent and achieve a “two ocean navy.” This is intended to double the 1.2 million tons of the existing fleet and also add a further 15,000 naval aircraft.

June 20

NAVAL: In Washington, D.C., the Bureau of Construction and Repair merges with the Bureau of Engineering to form the new Bureau of Ships. The office of under-secretary of the navy is also created.

- The heavy cruisers *Quincy* and *Wichita* are dispatched to South America on a goodwill tour to counter German propaganda in the region.

June 25

AVIATION: In light of the world situation, the chief of naval operations forwards plans to expand existing flight training programs to include 300 new entrants per month.

NAVAL: The Naval Construction Corps merges into the navy line, whereby all members receive an “engineering duty only” classification.

June 27

AVIATION: The National Defense Research Council is founded by the National Defense Council to direct scientific projects with possible military applications.

July 1

AVIATION: The Northrop Aircraft Company introduces its radical N-1M Flying Wing, a twin-engined pusher type aircraft that completely lacks a fuselage.

MILITARY: In another sign of military buildup, the 8th Division is activated at Fort Jackson, South Carolina.

July 2

MILITARY: Congress passes the new Export Control Act to control the sale of military materiel abroad and President Franklin D. Roosevelt wastes no time applying it to Japan.

July 5

DIPLOMACY: In a significant move, President Franklin D. Roosevelt invokes the Export Control Act to prevent the transfer of chemicals, strategic minerals, or aircraft engines to Japan.

July 6

MILITARY: In Washington, D.C., Major General John F. Williams, chief of the National Guard Bureau, reports that he has 235,000 under his immediate command and ready for active duty if necessary.

July 7

MILITARY: The army continues to expand with the activation of the 7th Division at Fort Ord, California.

July 8

AVIATION: The Army Air Corps establishes additional training facilities at Randolph Field, Texas, Maxwell Field, Alabama, and Moffett Fields, California.

MARINES: Plans are drawn up for the 1st Marine Brigade to occupy the French colony of Martinique in the Caribbean to keep it out of German hands; the move never materializes.

July 10

MILITARY: In light of continuing German aggression in Europe—the aerial Battle of Britain commences this day—President Franklin D. Roosevelt requests an addition \$4.8 billion from Congress for national defense purposes. This translates into enough equipment for 1.2 million men, along with 15,000 airplanes.

- In Washington, D.C., Henry L. Stimson gains appointment as the 55th secretary of war.
- In a major reorganization, the Armored Force forms under its pioneering leader, Major General Adna R. Chaffee, Jr. This frees tank units from their traditional subordination to the infantry and redefines them as an independent, offensive arm. Presently, it consists of 242 officers, 7,015 enlisted men, and 393 light tanks—woefully inadequate by modern European standards.

July 11

NAVAL: In Washington, D.C., flamboyant Frank Knox of Chicago becomes the 47th secretary of the navy.

July 15

MILITARY: The first two American armored divisions are activated: the 1st (“Old Ironsides”) at Fort Knox, Kentucky, which is built around the existing 7th Cavalry Brigade (Mechanized), and the 2nd at Fort Benning, Georgia.

July 18

MILITARY: At Fort Benning, Georgia, the first experimental parachute test platoon is culled from 48 volunteers from the 29th Infantry.

July 19

AVIATION: The ceiling for new acquisitions of naval aircraft is raised again to 15,000.

July 20

AVIATION: The new Two Ocean Navy Act increases Marine Corps aviation to 1,500 aircraft.

NAVAL: In order to give the navy a two-ocean capacity, Congress appropriates an addition \$4 billion for naval construction purposes.

July 25

MILITARY: In another sign of growing preparedness, a General Headquarters is authorized at the Army War College. Headed by Major General Lesley J. McNair, its primary concern is training and combat readiness.

August 1

MILITARY: At Fort Bragg, North Carolina, the 9th Division is activated.

- At Hightstown, New Jersey, the experimental Safe Parachute Company, consisting of 48 men and two officers, begins training with a view toward greatly expanding that arm.

August 5

TECHNOLOGY: The chief of naval operations authorizes a free exchange of technical information with Great Britain's Tizzard Mission, named after Sir Henry Tizzard, from which the United States obtains the latest developments in fields such as radar. Hereafter, classified information is freely exchanged between the two future allies.

August 10

MARINES: Following the evacuation of all British forces from Shanghai, China, the marine detachment becomes the only Western forces still deployed in that region.

August 16

AVIATION: At Lowry Field, Colorado, the Army Air Corps opens its first bombardier training school; the initial cadre will remain at the school as instructors.

MILITARY: The Army Parachute Test Platoon, headed by Lieutenant William T. Ryder, makes its first successful test jump at Fort Benning, Georgia.

August 17

AVIATION: Pilot Officer William L. M. Fiske III is killed in an air battle over Sussex, England, while fighting with the Royal Air Force in the Battle of Britain.

August 18

MILITARY: In light of the grave situation in Europe, the United States and Canada establish a Joint Board of Defense.

August 19

AVIATION: The North American NA-62, a highly modified NA-40 prototype, is successfully flight tested and goes into production as the B-25 Mitchell.

August 22

AVIATION: At Baltimore, Maryland, the Martin Aircraft Company lays the keel for its enormous PB2M Mars flying boat, of which only six are constructed.

NAVAL: In Washington, D.C., James V. Forrestal is appointed the first undersecretary of the navy.

August 25

TECHNOLOGY: The navy contracts with the Department of Terrestrial Magnetism, Carnegie University, Pittsburgh, to develop new fusing technology for anti-aircraft weapons. This culminates in the radio VT proximity fuse that will prove so lethal to Japanese aircraft in the Pacific.

September 2

NAVAL: The United States agrees to exchange 50 aged destroyers in return for rights to construct air and sea facilities in Newfoundland, Bermuda, and the British West Indies with a 99-year lease. This marks the genesis of the Lend-Lease program, through which President Franklin D. Roosevelt draws the United States deeper into war as a de facto participant.

MARINES: The recent Lend-Lease program requires marines to occupy the British Caribbean islands of the Bahamas, Jamaica, Antigua, Saint Lucia, Trinidad, and the South American colony of British Guiana.

September 6

MILITARY: At Fort Benning, Georgia, Brigadier General George S. Patton assumes command of the newly created 2nd Armored Division ("Hell on Wheels").

NAVAL: The first shipment of eight destroyers is dispatched to Great Britain as part of the Lend-Lease program.

September 9

NAVAL: In Washington, D.C., President Franklin D. Roosevelt signs a supplemental defense appropriation bill, part of which awards the navy \$3 billion. This is the largest procurement bill in naval history and results in the construction of 210 vessels, including 12 carriers, and seven battleships.

September 16

AVIATION: In Washington, D.C., the War Department announces that the Civil Aeronautics Authority will assist the army in recruiting and training African-American aviation units.

MILITARY: The Selective Service and Training Act is signed into law by President Franklin D. Roosevelt, which requires all men between the ages of 21 and 35 to sign up for military training. A minimum of 900,000 men are to be called up annually, who will serve for one year. The army is further authorized to federalize 270,000 men of the National Guard and activate members of the Officer Reserve Corps. Significantly, this is the first peacetime draft in American history and it also mandates that all services enlist African Americans where possible.

- The first National Guard Divisions called to the colors for a year are the 30th (Tennessee, Georgia, North Carolina), 44th (New Jersey, New York), and 45th (Oklahoma, Arizona, Colorado, and New Mexico).

September 25

MILITARY: In a major intelligence coup, American crypto-analysis decodes Japan's highly classified Purple diplomatic code. This opens a window to unlocking some of the most sensitive messages generated by the Japanese government and at its highest levels.

September 26

DIPLOMACY: In an important diplomatic escalation, President Franklin D. Roosevelt orders a halt to the export of scrap metal to any country other than Great Britain; Japan is the principal target of this embargo and the order pushes it closer to war with the United States.

September 27

DIPLOMACY: Lines are being drawn across the globe as Germany, Italy, and Japan sign the Tripartite Pact, forming what becomes known as the "Axis" powers.

MILITARY: In Washington, D.C., President Franklin D. Roosevelt creates 84 new brigadier generals and promotes another 29 to major general, including Jacob L. Devers, Jonathan Wainwright, and Joseph W. Stilwell.

- In Washington, D.C., the War Department announces the closing of the "Citizens Military Training Camps" in favor of an officer candidate school program at colleges and universities.

September 29

MARINES: At Midway Island, Pacific Ocean, the first elements of the 3rd Defense Battalion arrive and begin taking up positions.

October

TECHNOLOGY: The prototype Roebling Alligator, an aluminum, tracked amphibious troop carrier, begins testing with the Marine Corps. This vehicle can both traverse in water and roll across land.

October 1–December 9

MARINES: Units of the East Coast Fleet Marine Force commence Landing Operation 2 in the Caribbean, after which the 1st Marine Brigade deploys to Guantánamo, Cuba.

October 2

MILITARY: At Fort Benning, Georgia, the 501st Parachute Battalion forms under Major William M. Miley. The men are trained to jump from Douglas B-18 Bolo bombers and C-33(DC-2) transports.

October 3

TECHNOLOGY: The chief of naval operations directs the naval attaché in London, England, to obtain examples of British radio echo (radar) equipment. This, in turn, will be evaluated for applications for aircraft interception (AI), surface vessel detection (ASV), and aircraft identification (IFF).

October 5

AVIATION: An airstrip is opened at Parris Island, South Carolina, for use by Marine Corps aviation.

MARINES: In Washington, D.C., Secretary of the Navy Frank Knox activates the Organized Reserve, which increases Marine Corps manpower by 236 officers and 5,009 enlisted men.

October 8

AVIATION: In Great Britain, the first Eagle Squadron is formed from American volunteers serving with the Royal Air Force.

October 9

AVIATION: The secretary of the navy, acting upon a recommendation by the General Board, authorizes plans to equip select submarines with facilities for carrying aviation gasoline. So equipped, they would be able to refuel patrol planes at sea.

October 12

AVIATION: In another first, army P-40 Warhawks and O-47 Owls take off from the carrier *Wasp* to see how well land aircraft operate at sea.

October 16

MILITARY: The first day of military registration results in 16.4 million young men signing up for potential military training and service. The army, meanwhile, is rushing to prepare adequate training facilities for the influx of new manpower.

- The second wave of National Guard mobilization begins when the 27th Division (New York), 37th Division (Ohio), and 32nd Division (Michigan and Wisconsin) are called to the colors. By this time the number of guardsmen on active duty exceeds 100,000.

October 25

AVIATION: In another “accident,” Japanese aircraft drop bombs within 300 yards of the American embassy in Shanghai, China, and the gunboat *Tutuila*. The Japanese government ascribes the matter to equipment malfunctions.

October 26

AVIATION: The North American A-36 Apache, precursor to the famous P-51 Mustang fighter, flies for the first time in Los Angeles, California, after being built to British specifications. It is so impressive that the Army Air Corps decides to adopt it as well.

MARINES: The first volunteer parachute units begin forming at Lakehurst, New Jersey.

October 29

MILITARY: In Washington, D.C., Secretary of War Henry Stimson initiates the military draft by drawing number 158.

November 1

AVIATION: The Hawaiian Air Force (later Seventh Air Force) is activated at Fort Shafter, Hawaii.

November 10

AVIATION: The United States commences ferrying military aircraft destined for use with Allied air forces across the Atlantic Ocean.

November 11

TECHNOLOGY: In Cambridge, Massachusetts, the Massachusetts Institute of Technology sponsors its first general meeting of the Radiation Laboratory, where many radar-related innovations originate.

November 15

AVIATION: The navy commissions the seaplane tender *Curtiss*, the first of two vessels in this class.

November 18

TECHNOLOGY: The acronym “radar” is officially adopted by the chief of naval operations; it stands for “Radio Detection and Ranging.” This proves to be one of the most important new technologies employed in World War II.

November 19

AVIATION: In something of a setback, the General Headquarters Air Force (GHQ) is taken from the chief of the Air Corps and assigned to the general commanding the field forces.

November 25

AVIATION: In Baltimore, Maryland, the Martin XB-26 makes its flying debut and quickly earns a reputation as a “hot” aircraft from its high performance.

MILITARY: The National Guard 31st Division (Alabama and Mississippi), and 36th Division (Texas) are activated, along with the 192nd Tank Battalion (Wisconsin, Illinois, Ohio, and Kentucky), which will to gain fame for its service at Bataan.

December 1

MARINES: In Washington, D.C., Major General Thomas Holcomb is appointed to his second term as commandant.

- The 5th Defense Battalion is created at Parris Island, South Carolina.

December 18

MARINES: The 7th Defense Battalion is created at San Diego, California.

AVIATION: The Army Air Corps begins establishing commands within its structure: Northeast Air District, Northwest Air District, Southeast Air District, and Southwest Air District.

December 23

AVIATION: By this date, 13 National Guard observation squadrons are on active duty within the Army Air Corps.

MILITARY: The 35th National Guard Division (Missouri, Kansas, Nebraska) reports for active duty at Camp Robinson, Arkansas.

December 27

MARINES: At San Diego, California, the 10th Marines are reconstituted as an artillery unit assigned to the 2nd Marine Brigade.

December 29

MILITARY: In one of his famous fireside chats, President Franklin D. Roosevelt declares the present state of world affairs “as serious as war,” and calls upon the

American public for continuing patriotism and sacrifice. “We must be the great arsenal of democracy,” he advises. By this time the U.S. Army has expanded from 172,000 men to 1.4 million. This breaks down into 500,000 regular army, 270,000 National Guardsmen, and 630,000 draftees.

December 30

AVIATION: The navy revises its aircraft camouflage scheme once again; henceforth, all navy planes are to be painted light gray except for patrol aircraft; these receive blue-gray top surfaces.

1941

January

AVIATION: Officials from the radio manufacturer RCA propose designing and developing a radio-controlled missile guided by a camera placed in the nose; the National Defense Research Committee, suitably impressed with the concept, agrees.

NAVAL: On the cusp of World War II, navy manpower reaches 383,150 officers and enlisted men.

MARINES: Pearl Harbor, Hawaii, becomes the new home for the 2nd Marine Aircraft Group.

January 1

MARINES: At Guantánamo, Cuba, the 7th Marines is reactivated to serve as part of the 1st Marine Brigade.

January 2

NAVAL: President Franklin D. Roosevelt announces a new naval construction program aimed at producing 200 275-ton cargo vessels, which gain a degree of immortality as “Liberty Ships.”

January 6

NAVAL: At Simonstown, South Africa, the heavy cruiser *Louisville* loads \$148 million in British gold and transports it safely to the United States.

January 8

MILITARY: President Franklin D. Roosevelt proffers his annual budget of \$17.4 billion, of which \$10.8 billion is allocated for national defense.

January 9

NAVAL: On Wake Island, the first contractor arrives to begin work on an air station.

January 11

AVIATION: Radio-controlled airplanes, electronically tethered to ground facilities or other aircraft, are successfully tested by the Army Air Corps.

January 27

MARINES: Final elements of the 3rd Defense Battalion are ordered to Midway Atoll; 1st Defense Battalion goes to Johnson and Palmyra, while the 6th Defense Battalion is deployed to Pearl Harbor, Hawaii.

January 27–March 29

MILITARY: Secret, high-level strategic discussion between American and British military staffs transpire in Washington, D.C., and the ABC-1 Plan is adopted. In the event of U.S. entry into World War II, the Allies intend to concentrate on defeating Germany first, and then will shift their resources to the Pacific to deal with Japan. The Joint Chiefs of Staff is another important outgrowth of these meetings.

February

AVIATION: Reconnaissance expert Major Robert W. Goddard begins working on special, high-luminosity flares for nighttime aerial photography. Cameras onboard the aircraft are tripped by a photoelectric cell, which sense the light.

February 1

NAVAL: In Washington, D.C., Rear Admiral Russell Wilson is appointed the 32nd superintendent of the U.S. Naval Academy.

- The old reorganization of Atlantic and Pacific Fleets is readopted under Admirals Ernest J. King and Husband E. Kimmel respectively. Command of the Asiatic Fleet passes to Admiral Thomas C. Hart.

MARINES: The 1st Marine Brigade is renamed the 1st Marine Division while the 2nd Marine Brigade becomes the 2nd Marine Division.

February 3

MARINES: At Oahu, Hawaii, a Marine Corps Air Station is created at Ewa Mooring Mast Field, a facility originally constructed for dirigibles, and serves as the home for the 2nd Marine Aircraft Group.

February 4

MILITARY: The United Service Organization (USO) is founded to attend to the social, educational, and entertainment needs of military personnel. In time it becomes famous for its network of clubs where Hollywood performers entertain the troops.

- At Fort Richardson, Alaska, the Alaska Defense Command is carved out from the Western Defense Command under Brigadier General Simon B. Buckner.

February 7

MILITARY: At Fort Shafter, Hawaii, newly promoted lieutenant general Walter C. Short becomes commander of the Hawaiian Department.

NAVAL: At Annapolis, Maryland, the present state of emergency permits the Naval Academy's class of 1941 to graduate four months early.

February 15

MARINES: New River, North Carolina, is the site of a new Marine Corps training facility, spacious enough to train an entire division.

March 1

MARINES: At Guantánamo Bay, Cuba, the 1st and 11th Marines are reactivated as part of the 1st Marine Division.

March 5

MILITARY: Following the call up of the 33rd Division (Illinois) at Camp Forrest, Tennessee, the army completes mobilization of the National Guard's 18 divisions.

March 11

AVIATION: The Lend-Lease program results in 43,000 aircraft ferried or flown to either Great Britain or the Soviet Union by 1945.

MILITARY: The Lend-Lease Act is signed into law by President Franklin D. Roosevelt, empowering the chief executive to send military hardware and munitions, on loan or credit, to nations deemed essential to national security. It is enacted chiefly to assist Great Britain without directly involving the United States in war, although the Soviet Union also proves a major benefactor. Once signed, Roosevelt authorizes the immediate transfer of materiel to the United Kingdom and Greece.

March 15

MARINES: The Fleet Marine Force is divided, with the 1st Marine Division assigned to the Atlantic Fleet and the 2nd Marine Division assigned to the Pacific Fleet.

March 17

AVIATION: In Washington, D.C., the chief of naval operations approves a NACA suggestion to found a special committee tasked with reviewing the status of jet propulsion and its possible applications to both flight and assisted takeoffs.

MILITARY: The national command structure consolidates further at San Francisco, California, following creation of the Western Defense Command under Lieutenant General John L. DeWitt, who also leads the Fourth Army.

March 22

AVIATION: In a nod to mounting civil rights pressure, the 99th Pursuit Squadron, comprised solely of African Americans, is organized at Chanute Field, Illinois, under Captain Harold R. Maddux.

MARINES: The 2nd Parachute Company, the first airborne unit in Marine Corps history, is attached to the 2nd Marine Division; it is gradually expended into the 2nd Parachute Battalion.

March 26

AVIATION: The Air Corps Technical Training Command is founded.

March 27

MILITARY: President Franklin D. Roosevelt submits a request for a \$7 billion appropriation under the Lend-Lease Act, with the bulk of materiel going to assist Great Britain. The program doles out some \$50 billion by 1946.

NAVAL: In Washington, D.C., representatives from the United States, Great Britain, and Canada conclude the ABC-1 Staff Agreement to frame strategic cooperation prior to American entrance into World War II. In the event of war, Germany, which is deemed the more dangerous adversary, is to be subdued first. It also establishes a combined Chiefs of Staff with officers from both countries, and it stipulates that the U.S. Atlantic Fleet will convoy ships to Britain in concert with the Royal Navy.

March 28

AVIATION: In Great Britain, the American Eagle Squadron, though under Royal Air Force control, begins organizing volunteers; it is later absorbed by the 4th Fighter Group.

TECHNOLOGY: After five months of testing the secret CXAM radar, the Commanding Officer of the carrier *Yorktown* reports that aircraft have been successfully tracked from distances of 100 miles out. Moreover, he recommends development of some kind of identification device for friendly aircraft along with onboard facilities for tracking and plotting radar targets.

April 8

MILITARY: In Rome, Italy, the Italian government expels Lieutenant Colonel Norman E. Fiske, who had written disparagingly of recent Italian defeats in Albania.

April 9

DIPLOMACY: The United States reaches an agreement with Denmark, which allows it to take control of Greenland to keep it out of German hands. The Americans also acquire the right to develop air bases and other military facilities.

Chennault, Claire L. (1893–1958)

Army Air Force general

Claire Lee Chennault was born in Commerce, Texas, on September 6, 1893, and raised in rural Louisiana. After working several years as a teacher, he joined the Army Reserve in August 1917, but he was unable to venture overseas during World War I. Consequently, he joined the Aviation Section, Signal Corps, and gained his wings in April 1920. Chennault proved himself to be a natural-born flier and held a number of important assignments over the next two decades. Foremost among these was as commanding officer, 19th Pursuit Squadron in Hawaii (1923–26), and as an instructor at the Air Corps Tactical School, Maxwell Field, Alabama. Chennault honed his interest in fighter tactics and, in 1935, he published an important book titled *The Role of Defensive Pursuit*. At the time, however, fighter advocacy flew in the face of prevailing Air Corps dogma, which centered upon strategic bombers, and Chennault found few converts. After deafness in one ear removed

him from flying status, he resigned from the army in April 1937 as a captain. However, Chennault's career took a dramatic turn that year when he was hired by Madame Chiang Kai-shek to serve as an aviation adviser to the Nationalist Chinese government. He spent the next four years closely studying the Japanese aerial capacities as they warred against China, finding them to be of world-class ability. He issued warnings to Washington, D.C., that were all ignored. In 1941 he convinced the American government to allow him to organize a group of mercenaries, called the American Volunteers Group (AVG), to fight the Japanese directly.

Chennault had no sooner completed his small fight group of three squadrons than they began winning battles against the heretofore invincible Japanese air force in the skies of China and Burma. They earned fame and were hailed as the "Flying Tigers," claiming over 100 Japanese aircraft for the loss of 12 pilots. Chennault's group dis-

NAVAL: The *North Carolina*, the first battleship constructed since 1923, is commissioned.

April 10

NAVAL: While rescuing survivors from a torpedoed Dutch freighter, the destroyer *Niblack* drops depth charges on what it believes is a sonar contact with a German U-boat; no damage results, but the incident highlights growing tensions in the Atlantic region. This is the first overt act of aggression by an American warship toward the Axis.

April 11

AVIATION: The Army Air Corps, fearful that all of Europe will be under Nazi domination before the United States can intervene, approaches Boeing and Consolidated for a new, long-range strategic bomber that can fly missions from the United States; this is the genesis of the Convair B-36 Peacemaker.

banded in July 1942 and entered American service as the China Air Task Force (CATF) with himself commanding as a brigadier general. He rose to major general in March 1943 as head of the newly created 14th Air Force, which continued hit-and-run aerial warfare against the more numerous enemy. By war's end, Chennault's force claimed no less than 2,600 enemy planes shot down and 1.2 million tons of shipping sunk. However, he entered into a long and difficult struggle with his commander, Major General Joseph W. Stilwell, over logistical priorities. Chennault did not help matters by constantly going over Stilwell's head and appealing to the president. When Stilwell was finally sacked at the insistence of Generalissimo Chiang Kai-shek, U.S. Army chief of staff George C. Marshall had Chennault replaced as well. Denied his third star, Chennault resigned from the army in August 1945 and remained in China as head of the Civil Air Transport (CAT), which he sold to the CIA in 1950. Chennault died in New Orleans, Louisiana, on July 27, 1958, one of history's finest aerial strategists.

Claire Chennault on the cover of *Life* magazine, October 8, 1942 (*Life*)

NAVAL: In light of increasing U-boat activity throughout the Atlantic Ocean, President Franklin D. Roosevelt orders U.S. Navy vessels to extend their patrol activities to longitude west 26 degrees. The Germans, however, simply choose to ignore it and continue attacking Allied shipping.

April 15

AVIATION: In Washington, D.C., President Franklin D. Roosevelt signs an executive order allowing reservists currently serving in the Army Air Corps to resign and join the American Volunteer Group (AVG) in China under Claire L. Chennault. This is the genesis of the famous “Flying Tigers,” which, technically speaking, are part of the Chinese air force.

April 18

AVIATION: Consolidated Aircraft Company invests \$50 million in a giant aircraft factory near Fort Worth, Texas; during the war, this facility constructs B-24 Liberators and B-32 Dominators.

MARINES: Admiral Husband E. Kimmel requests a marine defense battalion for Wake Island from the chief of naval operations.

April 20

TECHNOLOGY: At Vienna, Virginia, a 37mm pack howitzer successfully fires electronic components of the new VT radio-proximity fuse; the tests prove that batteries, tubes, and other components could survive firing from a gun.

April 21–27

MILITARY: U.S. military officials confer with their British and Dutch counterparts in Singapore and draw up a unified strategy to oppose Japan in the event it attacks in the Pacific.

April 26

AVIATION: The Naval Aircraft Factory reports that an O3U-6 aircraft outfitted with radio control devices was successfully tested in flight regimens far exceeding the safety margins of piloted flight. The information collected proves useful in high-speed flutter analysis.

May 1

MARINES: A new marine barracks at New River, North Carolina, is the site of the future Camp Lejeune.

May 2

AVIATION: At the Naval Aircraft Factory, Philadelphia, Pennsylvania, Project Roger is implemented to install and test airborne radar equipment in concert with the Massachusetts Institute of Technology and the Naval Research Laboratory.

May 3

MILITARY: In Washington, D.C., senior leadership slots are filled by Lieutenant Generals Walter Krueger (Third Army), Hugh A. Drum (First Army), Benjamin Lear (Second Army), and John L. DeWitt (Fourth Army). Of the four, only Krueger attended West Point.

May 6

AVIATION: The Republic XP-47 prototype makes its maiden flight; it enters service as the P-47 Thunderbolt and serves in every theater of World War II as a fighter and attack aircraft.

May 13–14

AVIATION: In an impressive maneuver, 21 Boeing B-17D bombers belonging to the 21st Bombardment Group arrive at Hickham Field, Oahu, Hawaii, after flying nonstop from Hamilton Field, California.

May 15

NAVAL: President Franklin D. Roosevelt orders all French-registered vessels in American ports taken into protective custody to prevent them from falling into German hands. The great luxury liner *Normandie* is among them, and it will subsequently serve as an Allied troop ship.

May 19

MILITARY: In London, United Kingdom, Major General James E. Chaney assumes responsibilities as Special Army Observer.

May 21

AVIATION: The Army Air Corps Ferrying Command (precursor to the Air Transport Command) is created. Recent technological advancements have given aircraft impressive cargo-carrying abilities in terms of payload and range.

- The Engineering Experiment Station, Annapolis, Maryland, is ordered by the Bureau of Aeronautics to investigate the potential of small, liquid fuel rockets to provide assisted takeoffs on large patrol planes. The system that emerges is mistakenly labeled JATO, for jet assisted takeoff.

NAVAL: The American merchant vessel *Robin Moore* is sunk by German submarines off the coast of Brazil, despite several American flags prominently displayed on both sides of its hull. This is the first American merchant vessel sunk in World War II.

TECHNOLOGY: The new bow-ramp version of the Higgins landing craft being built in Louisiana is deemed superior to more conventional craft constructed for the navy; this version is the forerunner of the Landing Craft Vehicle, LCVP.

May 26

AVIATION: A British Royal Air Force PBY Catalina flown by U.S. Navy ensign Leonard B. Smith—officially a neutral observer—spots the German battleship *Bismarck* circling 300 miles west of the French coast. The vessel is located and sunk the following day by the main British fleet. Lieutenant Commander Joseph H. Wellings is also present onboard the battleship *King George V* as an observer and witnesses the battle firsthand.

May 27

MILITARY: In light of the deteriorating global situation, most recently the German conquest of Greece and Yugoslavia, President Franklin D. Roosevelt declares the nation in an “unlimited national emergency.”

May 28

MARINES: At Quantico, Virginia, the 1st Parachute Battalion is formed.

May 29

AVIATION: To facilitate the transfer of military aircraft to Great Britain, the Air Corps Ferrying Command is established. The United States also signs an agreement with the British to assist training their pilots to operate these Lend-Lease program aircraft.

MARINES: The Joint Board seeks a landing force of 28,000 soldiers and marines to be commanded by Major General Holland M. Smith. The force is intended to occupy the Portuguese Azores but the plan never unfolds.

June 2

NAVAL: At Newport News, Virginia, the Long Island, the former merchant vessel *Mormacmail* is converted into the first escort carrier, the *Long Island*. These unglamorous craft prove essential in the Battle of the Atlantic and in ending the U-boat menace.

June 4

AVIATION: The grade of Flying Cadet is replaced by Army Air Corps authorities by the grade Aviation Cadet; qualified fliers become commissioned officers once they acquire their wings.

TECHNOLOGY: The Naval Aircraft Factory reports that television technology has progressed to the point where it is possible to transmit signals to an aircraft in flight and alter its course.

June 6

NAVAL: In Philadelphia, Pennsylvania, the minelaying vessel *Terror* is launched; it is the sole vessel designed for this purpose.

June 9

MILITARY: The army begins preparations for replacing the old, World War I-style “tin hat” with a more modern design. The new M-1 helmet is patterned after football helmets and carefully fitted to each individual’s head size.

- President Franklin D. Roosevelt orders army troops to take control of the North American Aviation Company as striking workers are hindering defense production.

June 12

NAVAL: President Franklin D. Roosevelt orders the U.S. Naval Reserve mobilized.

June 13

MARINES: Major General Holland M. Smith is appointed commander of the I Corps, which consists of the 1st Marine Division and the 1st Infantry Division; it is later renamed the Amphibious Force Atlantic Fleet and concentrates on training for amphibious operations.

June 16

AVIATION: The first Consolidated B-24 Liberator four-engine bomber is accepted into Army Air Corps service; it becomes the most widely produced American warplane in history with 18,000 units manufactured.

DIPLOMACY: In light of the invasion of Greece and Yugoslavia, President Franklin D. Roosevelt orders the German and Italian consulates shut down.

June 16–22

MARINES: The 1st Marine Brigade (Provisional) is assembled at Charleston, South Carolina, prior to being shipped off to Iceland. Marines are chosen because draftees and National Guardsmen, by law, cannot be dispatched overseas in peacetime.

June 20

AVIATION: To consolidate and better coordinate disparate air elements, the new Army Air Forces is created to supercede the old Army Air Corps. Major General Henry H. Arnold retains command and reports directly to the army chief of staff. Meanwhile, the General Headquarters Air Force (GHQ) is broken up and redistributed as the First, Second, Third, and Fourth Air Forces.

NAVAL: Off Portsmouth, New Hampshire, the submarine *O-9* sinks during submergence trials, and all 33 of its crewmen perish.

June 27

AVIATION: The gigantic, if underpowered, Douglas XB-19 bomber takes to the sky for the first time with Lieutenant Colonel Stanley Umstead at the controls. While impressive, it never enters into production.

June 28

AVIATION: In Washington, D.C., President Franklin D. Roosevelt signs Executive Order 8807, which creates the Office of Scientific Research and Development.

June 30

AVIATION: Northrop Aircraft Company receives a joint army-navy contract to develop a 2,500-horsepower turbine engine weighing less than 3,215 pounds. Subsequently christened the Turbodyne, it is the first such power plant to run in North America.

MARINES: On the cusp of World War II, Marine Corps manpower levels are 3,339 officers and 51,020 enlisted men.

July 1

AVIATION: A Consolidated B-24 Liberator flown by Colonel C. V. Hayne lifts off from Bolling Field, Washington, D.C., and flies to Scotland via Montreal and Newfoundland. This is the Army Air Force's first overseas transport flight.

- Aviatix Jacqueline Cochran is the first woman to ferry a twin-engined Lockheed Hudson bomber across the Atlantic to England.

MILITARY: It is announced that, within two months, four of the 10 Officer Candidate Schools will be open; once fully operational they are tasked with producing 10,000 new second lieutenants a year for every branch in the military.

- The U.S. Army has experienced an eight-fold growth in size recently and boasts 1.4 million members. The army is divided into four armies of nine corps and 29 divisions, and four armored divisions.

NAVAL: Admiral Ernest J. King, commanding the Atlantic Fleet, begins organizing 10 task forces for the purpose of convoying neutral merchant vessels between the United States and Iceland.

- The Navy Department organizes the American coastline into six "sea frontiers," each with assigned responsibilities for providing convoy escorts, patrols, and antisubmarine warfare as required.

July 3

MILITARY: Army Chief of Staff Marshall initiates the American Military Mission to China (AMMISCA) to directly supply Chinese armies through distribution of Lend-Lease program materiel. Major General John Magruder, an old China hand, is selected to lead the mission.

July 7

AVIATION: At Quantico, Virginia, the 1st Marine Aircraft Wing (MAW) forms once a headquarters squadron is attached to the existing 1st Marine Aircraft Group. Within weeks, it is redesignated Marine Aircraft Group 11 (MAG-11). This is also the first of five wings that will be organized during the war years.

MILITARY: Given the strategic significance of Greenland to Western Hemispheric defenses, the army begins planning “Blue West” to construct its first subpolar base. A preliminary force of 469 men under Colonel Benjamin F. Giles lands at Narsarssoq to begin organizing airfields and anti-aircraft defenses.

MARINES: Various detachments of the 1st Marine Brigade (Provisional) are landed at Reykjavik, Iceland, at the behest of the local government to protect that strategic island from German attack. The Americans agree beforehand to depart as soon as the fighting in Europe concludes.

July 10

AVIATION: A San Diego, California, the 2nd Marine Air Wing is formed when a headquarters squadron is attached to the existing 2nd Marine Aircraft Group. Within weeks it is redesignated Marine Aircraft Group 21 (MAG-21).

July 11

MILITARY: All regular army divisions are officially redesignated infantry divisions to better reflect their composition and purpose.

July 15

MARINES: A detachment is sent to London, England, to serve as the embassy guard.

July 16

AVIATION: At Langley Field, Virginia, wind tunnel tests begin on the A-1, a remote-controlled flying bomb.

July 19

AVIATION: Twelve African-American pilots arrive at the Tuskegee Institute, Alabama, for flight instruction. Captain Benjamin O. Davis, a West Point graduate, will command the Tuskegee airmen during the war.

- In China, Claire L. Chennault, currently serving as aviation adviser to Generalissimo Chiang Kai-shek, is called back into active duty with the Army Air Force. He is currently struggling to organize the American Volunteer Group (AVG) of American pilots in Chinese employ.

July 24–August 1

DIPLOMACY: Following Japanese occupation of French Indochina (Vietnam), President Franklin D. Roosevelt orders a complete oil embargo against Japan and also freezes all its assets in the United States. The Japanese, without available oil

of their own, are being forced to either capitulate to American demands or seize oil fields from nearby European colonies.

July 25

AVIATION: The 33rd Pursuit Squadron, consisting of 30 P-40 Warhawks and three trainers, sails on the carrier *Wasp* to Reykjavík, Iceland.

July 26

MILITARY: To bolster defenses in the Pacific, military contingents of the Philippine Commonwealth are nationalized by President Franklin D. Roosevelt and placed under U.S. jurisdiction. Concurrently, General Douglas MacArthur, a field marshal in the Philippine army, is recalled to active duty and appointed commander in chief of all U.S. forces in the Far East (USAFPE).

July 29

MILITARY: Douglas MacArthur resumes his army service as a three-star lieutenant general.

July 30

NAVAL: At Chungking, China, Japanese aircraft again drop bombs perilously close to the American gunboat *Tutuila*; their government dismisses the affair as an accident, and apologizes.

August 1

AVIATION: In an attempt to inhibit Japanese aggression in China, President Franklin D. Roosevelt halts the export of all aviation fuel products outside the Western Hemisphere, with the exception of Great Britain. This embargo severely crimps Japan's ability to wage war in China and hastens its decision to declare war on the Western Allies.

August 1–October 16

TECHNOLOGY: Initial airborne experiments with microwave radar transpire on an XJO-3 flown at Boston Airport. This device can detect surface vessels at a distance of 40 miles while aircraft can be spotted 3.5 miles away.

- In Washington, D.C., the Bureau of Aeronautics instructs the Naval Research Laboratory to pursue radar guidance equipment for armed assault drones. This marks the beginning of radar technology for guided missiles in the navy.

August 4–August 12

AVIATION: In Washington, D.C., the Air War Plans Division formulates and adopts the overarching aerial strategy of strategic bombardment (AWPD-1) intended for use against Germany and Japan. It is the product of discussions and planning between Lieutenant Colonels Harold L. George and Kenneth N. Walker, and Majors Haywood S. Hansell and Laurence S. Kuter. Daylight strategic bombing becomes one of the pillars of American military strategy against the Axis powers.

August 5

AVIATION: The Caribbean Air Force is organized in the Panama Canal Zone for the defense of that strategic region; it is subsequently renamed the Sixth Air Force.

MacArthur, Douglas (1880–1964)

Army general

Douglas MacArthur was born in Little Rock, Arkansas, on January 26, 1880, the son of General Arthur MacArthur. In 1903 he graduated first in his class at West Point and did surveying work in the Philippines and Asia before commanding the 42nd "Rainbow" Division in World War I as a temporary brigadier general. MacArthur distinguished himself in combat, was highly decorated, and, at war's end, he directed the U.S. occupation zone in Germany. Following a stint at West Point as superintendent (1919–22), he returned to the Philippines and, from 1930 to 1935, he also served as army chief of staff. However, MacArthur resigned from active duty in 1937 and joined the new Philippine army as its field marshal. He rejoined the U.S. Army in 1941 as a lieutenant general and was in the act of integrating the Philippine army into his own when Japanese forces suddenly attacked on December 8,

MacArthur observes Philippine operations with Vice Admiral Thomas Kinkaid, February 1944. (*National Archives and Records Administration*)

1941, driving the defenders back into the Bataan Peninsula. The Americans and Filipinos under his command resisted desperately

NAVAL: President Franklin D. Roosevelt secretly boards the heavy cruiser *Augusta* at Vineland Sound, Massachusetts, then heads north to Argentia, Newfoundland, for talks with British prime minister Winston Churchill.

August 6

AVIATION: Off Reykjavík, Iceland, Curtiss P-40s of the 33rd Pursuit Squadron fly off the deck of the carrier *Wasp* and land at their new base without serious mishap.

August 9–12

NAVAL: At Placentia Bay, Argentia, Newfoundland, President Franklin D. Roosevelt and British prime minister Winston Churchill meet aboard the cruiser *Augusta* and battleship *Prince of Wales*. The Atlantic Charter is signed, which outlines American intentions to assist Great Britain should it enter the war. These seminal leaders, both former naval officials, strike an immediate and abiding friendship that lasts through the war.

but their position was doomed from the start. MacArthur was subsequently ordered out of the Philippines in February 1942, vowing "I shall return," and he established his new headquarters in Australia. Over the next three years, he orchestrated a brilliant campaign of "island hopping" that forced the Japanese on the defensive, and, in October 1944, he fulfilled his promise to the Philippine people by landing on Luzon. American forces and Filipino guerrillas were victorious in July 1945 and, the following September, MacArthur steamed into Tokyo Bay on the battleship USS *Missouri* to accept the Japanese surrender.

MacArthur spent the next five years overseeing the occupation of Japan and he orchestrated the reconstruction of that nation into a demilitarized democracy. In June 1950, after Communist North Korean forces attacked across the 38th Parallel into South Korea, he became supreme commander of all United Nations forces in the region and prepared to counterattack. He

did so in September 1950 with a brilliant landing at Inchon, which cut North Korean supply lines and sent their forces scampering. MacArthur pursued the Communists northward and approached the Yalu River, despite threats from the People's Republic of China that they would not tolerate American forces on their Manchurian border. MacArthur ignored the warning and kept advancing until November 1950, when the Chinese launched a massive counterattack that sent UN forces reeling southward in retreat. An angry MacArthur then wanted to carry the air war against Chinese bases in Manchuria and he complained publicly when President Harry S. Truman told him to desist. On April 11, 1951, MacArthur was relieved of command and replaced by General Matthew Ridgway. He returned home to a thunderous reception. He then addressed Congress, promising to "just fade away," and retired from active service. MacArthur died in Washington, D.C., on April 5, 1964, one of history's greatest military strategists.

August 10–15

MILITARY: The Fourth Army under Major General John A. DeWitt begins conducting extensive war games in the Olympia Peninsula, Washington.

August 12

AVIATION: At Wright Field, Ohio, an Ercoupe civilian airplane piloted by Captain Homer Boushey, Jr., is the first plane to lift off using rocket-assisted takeoff units (RATO).

MILITARY: In Washington, D.C., a bill extending the service of army draftees to 18 months passes the House of Representatives by a single vote. To Japanese observers, this signals a national unwillingness of the United States to defend its interests abroad.

August 16

MARINES: On Tutuila, Samoa, the first man enlists in the 1st Samoan Battalion, Marine Corps Reserves; this force is meant to back up the 7th Defense Battalion already deployed there.

August 18

AVIATION: It is announced that Pan American Airlines is helping to ferry American warplanes to the Middle East by way of Brazil and West Africa. Hard-pressed British forces in the region need every aircraft they can get their hands on.

MILITARY: Congress passes the Selective Service Extension Act, which increases tours in the U.S. Army from one year to 18 months; after Pearl Harbor, the obligation is extended through the course of the war.

- Major General Charles H. Bonesteel gains appointment of “Indigo Force,” the main garrison force in Iceland, to relieve the Marines garrisoning the island.

MARINES: Cherry Point, North Carolina, becomes operational as a major Marine Corps airfield on the East Coast.

August 19

MARINES: In the distant Pacific, advanced elements of the 1st Defense Battalion deploy on Wake Island.

August 26

MILITARY: At Schofield Barracks, Hawaii, the Hawaiian Division is renamed the 24th Infantry Division.

August 27

AVIATION: Over Belgium, Pilot Officer William R. Dunn, flying with Hawker Hurricane Squadron 71, Royal Air Force, becomes the first American ace of World War II when he records his fifth and sixth kills.

August 28

AVIATION: A force of 35 Boeing B-17 bombers under Lieutenant Colonel Eugene L. Eubank, 19th Bombardment Group, begins the lengthy transfer from Hickham Field, Hawaii, to Clark Field, the Philippines, with scheduled refueling stops at Midway, Wake Island, and then Australia before reaching their destination.

August 31

MILITARY: In Washington, D.C., President Franklin D. Roosevelt orders the 10 divisions of the Philippine National Army mobilized, and he also directs General Douglas MacArthur to begin equipping them with stocks of U.S. weapons.

September

AVIATION: Rocket authority Dr. Robert H. Goddard begins working on development of a functioning rocket system to assist heavy aircraft during takeoff.

September 4

NAVAL: Southwest of Iceland, the destroyer *Greer* trades depth charges and torpedoes with *U-652*; no damage results but the incident highlights growing tensions in the Atlantic.

September 6

AVIATION: The new Boeing B-17E makes its maiden flight. This variant features a totally redesigned tail section that sports a tail gunner position, in addition to better armor and a higher tail fin for better stability.

September 11

MILITARY: In Washington, D.C., construction begins on the famous Pentagon building, soon to house the U.S. War Department. It is completed in 18 months at a cost of \$83 million—it remains the largest office building in the world.

NAVAL: In response to increasing U-boat attacks upon American shipping, President Franklin D. Roosevelt instructs all navy vessels and aircraft to “shoot on sight” any Axis vessels caught within the defensive zone declared on April 11.

September 12

AVIATION: Nine B-17Ds fly from Hawaii to the Philippines with scheduled stops at Midway, Wake Island, Port Moresby, New Guinea, and Darwin, Australia.

September 15–16

MILITARY: The 5th Division’s “Indigo Force” under Major General Charles H. Bonesteel begins arriving at Reykjavík, Iceland, and starts unloading heavy equipment in the face of severe, rainy weather.

September 15–20

MILITARY: In Louisiana, the Second Army of General Ben Lear is pitted against the Third Army of Lieutenant General Walter Krueger, in the largest single war game ever held in the United States. Over 350,000 troops (22 divisions) and four Air Corps wings participate.

September 16

NAVAL: The navy declares its intention to protect all Allied and neutral shipping in the Atlantic Ocean as far as Iceland, consistent with provisions of the ABC-1 Staff Agreement. Henceforth, American and Canadian warship will escort North Atlantic convoys to a “mid-ocean meeting point,” after which Royal Navy vessels will escort them to England.

September 17

AVIATION: In Louisiana, American paratroopers drop from the first time in a tactical military exercise. They are conveyed by a fleet of 13 civilian DC-3 transports contracted for that purpose.

NAVAL: A convoy carrying 20,000 Commonwealth troops departs Halifax, Nova Scotia, escorted by American warships under Rear Admiral A. B. Cook. This is the navy’s first escort mission of World War II.

September 20

MILITARY: At Nichols Field, Luzon, the Philippine Defense Air Force is created as a precursor to the Far East Air Force. The Philippine air force, however, consists of 210 largely obsolete aircraft.

September 26

MILITARY: At Manila, Philippines, the steamer SS *President Coolidge* drops anchor and unloads the 200th Coast Artillery and several tank companies from various National Guard units. The latter employs 54 new M-3 Stuart light tanks and several new half-track armored cars.

- The Corps of Military Police (“Cops in khaki”) is formed for the first time since 1918; by 1945 their strength peaks at 150 battalions, 200,000 men, and 9,250 officers.

September 27

MILITARY: At Fort Benning, Georgia, Major General Omar N. Bradley, commandant of the Infantry School, officiates at the first class of Officer Candidate School (OCS) graduates.

NAVAL: At Baltimore, Maryland, the *Patrick Henry*, the first of 2,742 “Liberty Ships” constructed in World War II, is launched. Slow and ungainly, they prove seaworthy and carry impressive amounts of supplies to ports around the world.

October 1

MILITARY: The army begins frantically culling sufficient transports to ship General Douglas MacArthur 500,000 tons of supplies and an additional 20,000 troops to the Philippines. Several are en route when word of the attack on Pearl Harbor is received.

October 2

DIPLOMACY: In consequence of President Franklin D. Roosevelt’s decision not to hold a diplomatic conference with Prince Fuminaro Konoye of Japan, General Hideki Tojo becomes the new prime minister. A fanatical, ultranationalist, Tojo is determined to go to war with Great Britain and the United States if they do not accommodate Japan’s demands.

October 9–16

AVIATION: A week-long test involving 40,000 civilian aircraft spotters scan the skies for “enemy” aircraft using searchlights and antiaircraft sighting systems.

October 10

MILITARY: At Schofield Barracks, Hawaii, the new 25th Infantry Division forms from elements of the 24th Infantry Division; in World War II it garners the nickname “Tropic Lightning.”

- In Chungking, China, Major General John Magruder arrives with his American military mission to the Nationalist government of Generalissimo Chiang Kai-shek. His initial report paints a gloomy picture on the status of Chiang’s forces.

October 13

AVIATION: The Bureau of Aeronautics again revises its regulations regarding paint schemes for naval aircraft; henceforth, all aircraft are to be painted in a two-tone scheme, dark blue on top surfaces and light gray on bottom ones.

October 14

NAVAL: At Boston, Massachusetts, the Coast Guard cutter *Bear* arrives with the first 20 German prisoners taken in World War II. They have been seized off Greenland on the freighter *Busko*, which was flying a Norwegian flag. Among those taken is a Gestapo agent.

October 17

NAVAL: In a major escalation of hostilities at sea, the German submarine *U-553* torpedoes the destroyer *Kearny* southwest of Iceland, killing 11 sailors and wounding 22. These are the earliest American casualties of World War II. Previously, the *Kearny* had dropped depth charges to discourage a possible attack upon convoy CS 48, which it was escorting.

October 20

NAVAL: Captain Marc A. Mitscher assumes command of the newly commissioned carrier *Hornet*.

October 23

MILITARY: The Philippine Department, a virtually independent agency, finds itself subordinated as a service command under the USAFFE; its commander, Major General George Grunert, is reassigned stateside.

October 30

AVIATION: A Consolidated B-24 Liberator flown by Major Alva L. Harvey begins a record-setting around-the-world flight by flying Ambassador Averill Harriman between London and Moscow; the mission takes 17 days and covers 24,000 miles.

NAVAL: German submarine *U-106* torpedoes the American tanker *Salinas* 700 miles off the Newfoundland coast and the destroyer *Bernadou* drops depth charges in retaliation.

October 31

NAVAL: The “undeclared war” at sea enters a new phase when German submarine *U-562* torpedoes and sinks the American destroyer *Reuben James* off the coast of Iceland, with a loss of 115 lives. This is the first American warship lost in World War II and President Franklin D. Roosevelt grants the navy permission to shoot at any submarines on sight.

November 1

NAVAL: In light of escalating violence at sea, President Franklin D. Roosevelt places the Coast Guard under operational command of the Navy Department until hostilities cease.

MARINES: At Camp Elliott, California, the 2nd Joint Training Force is created under the command of Major General Clayton B. Vogel.

November 2

MARINES: At Wake Island, the 1st Defense Battalion is set in place with a strength of 15 officers and 373 enlisted men.

November 3

MILITARY: At Nielsen Field, Philippines, Major General Lewis H. Brereton assumes command of the new Far East Air Force (FEAF), which includes 107 Curtiss P-40 fighters and 35 Boeing B-17 strategic bombers. This represents the largest single concentration of American air power outside North America.

November 5

NAVAL: The Japanese government issues Combined Fleet Ultrasecret Operations Order I, which places the attack on Pearl Harbor, Hawaii, in motion. Concurrently, the government is conducting diplomatic negotiations with the United States to avert war.

November 6

NAVAL: In the central Atlantic, the cruiser *Omaha* and destroyer *Somers* apprehend the German blockade-runner *Odenwald*, which had disguised itself as an American merchantman.

November 7

AVIATION: The GN-1, the first guided glide bomb developed by the Army Air Force, is tested.

November 10

MARINES: In light of deteriorating conditions abroad, the U.S. Asiatic Fleet receives permission to withdraw its gunboats and marine detachments from Chinese soil.

November 10–28

MILITARY: In the Carolinas, major war games continue as General Hugh Drum's First Army is pitted against the IV Corps and the I Armored Corps. Like the previous two maneuvers, this one is beset by equipment shortages of every description.

November 12

AVIATION: The GB-8, the army Air Force's first radio-controlled glide bomb, is tested as part of Project Aphrodite, in a quest for precision-guided weapons.

November 15

MILITARY: At Fort Lewis, Washington, the 1st Battalion, 87th Infantry is activated as the army's first unit designated to operate in mountainous terrain; it is a precursor to the famous 10th Mountain Division.

November 17

NAVAL: In Washington, D.C., Congress authorizes merchant vessels to arm themselves, usually with the assistance of a Coast Guard gun crew onboard.

November 20

DIPLOMACY: At a meeting with Japanese special envoy Saburo Kurusu, Secretary of State Cordell Hull rejects a final negotiating program that would have lifted all restraints against that nation in the Far East.

MILITARY: At Manila, the army of General Douglas MacArthur is reinforced by the 192nd Tank Battalion, a National Guard unit with companies from Illinois, Ohio, Wisconsin, and Kentucky. It joins the 194th Tank Battalion already there to form the new 1st Provisional Tank Group.

NAVAL: President Franklin D. Roosevelt signs an amendment to the Neutrality Act of 1939 to authorize merchant vessels to begin arming themselves and also to allow them to call at ports belonging to friendly belligerents.

November 26

DIPLOMACY: In Washington, D.C., Japanese ambassador Kichisaburo Nomura rejects an American counteroffer demanding that the Japanese immediately withdraw from China and Indochina.

NAVAL: On this fateful day, a Japanese armada consisting of six aircraft carriers, two battleships, three cruisers, nine destroyers, and various tankers and submarines, secretly depart the Kuriles Islands under Vice Admiral Chuichi Nagumo. They sail under orders to attack American naval installations at Pearl Harbor, Hawaii, unless a diplomatic agreement can be reached by December 5.

November 27

MILITARY: At Fort Meade, Maryland, the Tank Destroyer and Firing Center is activated based on lessons learned from the recent war games. When functional, it is placed directly under the control of the War Department.

NAVAL: Chief of Naval Operations admiral Harold R. Stark issues a “War Warning” to elements of the U.S. Fleet through the Atlantic and Pacific regions. This comes one day after Japanese task forces have set sail for Hawaii to attack military and naval installations at Pearl Harbor, Hawaii.

MARINES: The 4th Marines conclude their 14-year tour of duty in China and set sail for the Philippines.

November 28

NAVAL: Admiral William F. Halsey leads the carrier *Enterprise* from Pearl Harbor, Hawaii, to deliver Marine Corps F4F Wildcats to the garrison at Wake Island. At the time he issues his “War Order No. 1,” declaring that his vessel is operating under war conditions.

November 29

NAVAL: President Franklin D. Roosevelt instructs the commander in chief, Asiatic Fleet, to purchase three small vessels, raise the American flag on their masts, and station them in the West China Sea and the Gulf of Siam. If the Japanese attack them, it would be considered an act of war.

December 1

AVIATION: The Civil Air Patrol, whose primary function is to detect enemy submarines off shore with small liaison aircraft, is created by an executive order. It is empowered to recruit 17-year-old men not eligible for the draft.

MILITARY: At Manila, Philippines, General Douglas MacArthur incorporates 10 poorly trained and equipped divisions of the Philippine National Army into his regular Army command structure. The most important part, the Northern Luzon Force, is headed by Major General Jonathan Wainwright.

December 2

NAVAL: A Coast Guard armed guard gun detachment deploys aboard the merchant vessel *Dunboyne*; this is the first of 145,000 men to serve in the Coast Guard during the war years, and they help man 6,236 merchant ships.

December 4

AVIATION: A force of 12 Grumman F4F Wildcats belonging to Marine Fighter Squadron 211 (VMF-211) land at Wake Island after launching from the carrier *Enterprise*. Patrolling activity commences the following day.

December 5

MILITARY: General Lewis H. Brereton begins dispersing his 35 Boeing B-17 bombers by dispatching 16 of the giant aircraft to uncompleted facilities at Del Monte Field, Mindanao, Philippines.

NAVAL: At Pearl Harbor, Hawaii, the carrier *Lexington* raises anchor and sails for Midway Island to deliver a squadron of Marine Corps Vought SB2U Vindicators to the garrison. Within hours, their transit is rudely interrupted by disturbing news farther east.

December 7

AVIATION: Despite complete tactical surprise at Pearl Harbor, Hawaii, a pair of P-40s flown by Lieutenants Kenneth M. Taylor and George S. Welch, 47th Pursuit Squadron, depart Haleiwa Field and engage the attackers, shooting down two

Rescuing a survivor near the USS *West Virginia* during the Japanese attack on Pearl Harbor, December 7, 1941
(Naval Historical Foundation)

and four Japanese aircraft, respectively. Four other army pilots bag one airplane apiece. Army losses are nonetheless heavy at 96 aircraft destroyed, mostly on the ground, along with 193 killed.

- Upon learning of the Pearl Harbor attack, B-18s and P-36s of the Alaska Defense Command take off from their fields to avoid being taken by surprise on the ground.

NAVAL: Japanese carrier air forces score a stunning blow by launching 353 aircraft that attack and sink eight American battleships at Pearl Harbor, Hawaii, along with 11 other vessels. American losses are 2,403 soldiers, sailors, and civilians dead and a further 1,178 wounded. Admiral Isaac C. Kidd of the ill-fated battleship *Arizona* also becomes the first American flag officer killed in World War II when he goes down with his ship. Japanese losses are 29 aircraft and three midget submarines, totaling 100 men. “Remember Pearl Harbor” becomes a national mantra over the next three-and-a-half years. “Praise the Lord and Pass

the Ammunition,” coined by Chaplain Howell M. Forgy on the cruiser *Orleans* also emerges as a popular wartime song.

MARINES: Japanese destroyers bombard Midway Island, inflicting 14 casualties on the marine garrison.

TECHNOLOGY: One of many tragedies occurring today is the fact a new army radar set, perched on a mountaintop overlooking Pearl Harbor, clearly detected the oncoming Japanese aircraft before they arrived. The crew alerted superiors, but they were informed that, most likely, they were picking up a flight of B-17s flying in from the West Coast.

December 8

AVIATION: After radar spots incoming aircraft headed for Corregidor, several P-40 aircraft are scrambled for an intercept but no contact is made. Japanese aircraft surprise the 19th Bombardment Group at Clark and Iba Fields, Luzon, the Philippines, inflicting devastating losses rivaling those at Pearl Harbor. They also strike the P-40s after they had returned to various fields to refuel. Lieutenant Randall B. Keator manages to get aloft and shoot down the first enemy aircraft over the Philippines. No less than 17 B-17 heavy bombers and 55 P-40 fighters are destroyed and seven Japanese aircraft are downed in air-to-air combat.

- Japanese G3M medium bombers manage a surprise raid upon Wake Island, destroying seven Grumman F4F Wildcats belonging to Marine Fighter Squadron 211 on the ground.
- Fearing a Japanese amphibious assault on the West Coast, an army pursuit group is sent in from Michigan.
- At Buffalo, New York, the Bell XP-63 Kingcobra, a larger version of the P-39 Airacobra, flies for the first time.

MILITARY: Congress declares war on the Japanese empire. The discharge of all draftees is halted and National Guard units slated for state status are retained in federal control.

NAVAL: The outbreak of war forces six troop transports and nine cargo vessels, bound for the Philippines, to maintain radio silence and return to ports on the West Coast; two make it as far as Brisbane, Australia.

- Off Shanghai, China, the crew of the gunboat *Wake*, having failed to scuttle their vessel, capitulates to Japanese forces; this becomes the only navy vessel in this conflict to strike its colors.

POLITICS: In Washington, D.C., President Franklin D. Roosevelt declares that the attack on Pearl Harbor is “a day that will live in infamy” and asks Congress for a declaration of war against the Japanese empire. There is only one dissenting vote, from Congresswoman Jeanette Rankin of Montana.

December 9

AVIATION: Japanese G3M medium bombers again strike Wake Island, and Marine Corps F4F Wildcats of VMF-211 under Major Paul A. Putnam shoot one of the attackers down and damage others. Air raids will continue daily until the island falls on December 23.

- Japanese aircraft launch another heavy raid in the Philippines, striking at Nichols Air Field. By this time, American air power has been reduced to 17 B-17s, 55

P-40s, and three P-35s. Many of the four-engined bombers are utilized in flying reconnaissance missions.

NAVAL: The submarine *Swordfish* attacks a Japanese merchant vessel 150 miles west of Manila, Philippines, and claims to have sunk it; however, the loss is not borne out in postwar records.

December 10

AVIATION: First blood: the Japanese submarine *I-70* is sunk by an SBD Dauntless launched from the carrier *Enterprise* in Hawaiian waters; this is the first confirmed victory by a navy carrier aircraft. This particular submarine had been used to scout out military facilities in Hawaii prior to the Pearl Harbor attack.

- In the first American air raid of World War II, five Boeing B-17Ds attack Japanese warships and transports unloading men and supplies off Aparri, Luzon, Philippines. One freighter is sunk but a bomber flown by Captain Colin Kelly is shot down; Kelly wins the Distinguished Service Cross posthumously for remaining in his burning craft long enough for the crew to bail out. He is also credited with sinking the battleship *Haruna*, which is erroneous as that vessel was not deployed with the invasion. More likely he scored several near misses against the heavy cruiser *Ashigara*.

MILITARY: Following a series of devastating aerial assaults, Japanese army units begin landing at Aparri on northern Luzon in the Philippines.

NAVAL: A Japanese air raid on Cavite, Philippines, sinks one vessel and damages others; the navy's first air-to-air kill occurs when Chief Boatswain Earl D. Payne of Patrol Squadron 101 shoots from his PBY Catalina and flames an attacking A6M2 Zero.

MARINES: Guam is invaded by 6,000 Japanese troops, although the 153 Marines present resist fiercely until ordered by the navy governor to surrender. Guam is thus the first American possession lost in the war; marine losses total four dead and 12 wounded.

- The marine legation guards at Beijing and Tientsin, China, numbering 500 men, surrender to Japanese forces.

December 11

AVIATION: Nineteen-year-old Pilot Officer John Gillespie Magee dies in an aerial collision over Great Britain; he was the author of the famous poem "High Flight."

DIPLOMACY: Germany and Italy declare war on the United States, joining their Axis partner Japan. The self-appointed "Arsenal of Democracy" begins girding itself for a two-front war in Europe and the Pacific.

MILITARY: The Coastal Command is upgraded once the Western Defense Command becomes a theater of operations and nine antiaircraft regiments are deployed there from various parts of the country.

MARINES: In a heroic action, the 1st Defense Battalion under Major James P. Devereux routs a Japanese amphibious force at Wake Island, sinking two destroyers with accurate artillery fire and damaging several other warships. A few marines are wounded in return. This is also the only amphibious landing attempt of the war to be defeated.

December 12

AVIATION: Captain Jesus Villamor, flying an outdated Boeing P-26 Peashooter, manages to shoot down a Japanese bomber over the Philippines; this is the P-26's only known aerial victory.

- More than 100 Japanese fighters and bombers strike at Clark Field, Batangas, and Olongapo, Philippines; the Americans can muster only a single B-17, which attacks enemy transports unloading at Vigan without scoring hits.
- The Naval Air Transport Service is created by the chief of naval operations in order to quickly deliver critical parts, equipment, and specialist personnel to fleet forces and navy bases across the globe.

MILITARY: At Legaspi, Luzon, Philippines, Japanese force make successful landing on the east coast of the island, then drive north virtually unopposed. Men of the Southern Luzon Force under Brigadier General George M. Parker eventually oppose them.

December 13

AVIATION: Over northern Luzon, Lieutenant Boyd D. Wagner, 17th Pursuit Squadron, flames four Japanese Ki-27 Nate fighters.

December 14

AVIATION: PBY Catalinas of VP-10 depart Cavite, Philippines, and wend their way toward Australia via Balikpapan, Soerbaja, and Ambon in the Netherlands East Indies.

- In the Philippines, a force of B-17s is dispatched to bomb the Japanese beach-head at Legaspi; Lieutenant Hewitt T. Wheless wins a Distinguished Flying Cross for successfully making an emergency crash landing at Cagayan.

MILITARY: In Washington, D.C., Chief of Staff general George C. Marshall approves a plan to expand the army by 2 million men and 100 division over the next two years; by 1945 actual military manpower peaks at 8 million men and women arranged in 89 divisions.

- Fearful of a Japanese attack along the West Coast, the army moves a two-division Infantry Corps as a defensive measure.

December 15

MILITARY: Congress hastily passes the Third Supplemental Defense Appropriations Act, releasing an additional \$10 billion for total war.

NAVAL: The carrier *Saratoga*, three heavy cruisers, four destroyers, the oiler *Neches*, and the seaplane tender *Tangier* depart Pearl Harbor, Hawaii, under Rear Admiral Frank J. Fletcher. They are bound for Wake Island to rescue the heroic garrison.

December 16

AVIATION: Over Vigan, Luzon, Philippines, Lieutenant Boyd D. "Buzz" Wagner, 17th Pursuit Squadron, shoots down his fifth Japanese aircraft while flying a P-40 Warhawk, becoming America's first ace of World War II.

NAVAL: The submarine *Swordfish* torpedoes and sinks the Japanese transport *Atsutasan Maru*, the first recorded victory of a U.S. submarine in this war.

December 17

AVIATION: A force of 17 Marine Corps Vought SB2U-3 Vindicators, guided by a single PBY Catalina, flies 1,137 miles from Oahu, Hawaii, to Midway Island,

becoming the first warplanes to reinforce the garrison. At nine hours, 45 minutes' duration, this is also the longest flight over open water recorded to that time.

NAVAL: Command of the Pacific Fleet passes from Admiral Husband Kimmel, badly disgraced by the surprise at Pearl Harbor, to Admiral William S. Pye. Kimmel is ultimately court-martialed and found guilty of failing to take proper precautions against attack.

December 18

AVIATION: In China, a confrontation develops between Chinese peasants and Eriksen Shilling, a pilot with the American Volunteer Group ("Flying Tigers"), who had been shot down. Henceforth, all American personnel are issued so-called Blood chits, or hand-painted identification scarfs. This becomes a widespread practice that endures through the Vietnam conflict.

TECHNOLOGY: Reaction Motors, Inc., is the first American company specializing in the design and construction of liquid-fuel rocket motors for military and research aircraft.

December 19

NAVAL: In Annapolis, Maryland, the class of 1942 graduates six months early and passes into active service due to the national emergency.

December 19–20

MILITARY: Japanese landing parties at Vigan and Aparri link up and begin driving southward toward the Lingayen Gulf.

- Japanese forces begin landing at Davao, Mindanao, southern Philippines, meeting only light resistance from Philippine army units under Colonel Roger B. Hilsman.

December 20

AVIATION: Over Kunming, China, the American Volunteer Group (AVG), under Claire L. Chennault, soon to be renowned as the "Flying Tigers," flies its first combat mission and shoots down four Ki-48 light bombers at the cost of one P-40, which ran out of fuel and crashed.

MILITARY: The Draft Act is signed into law by President Franklin D. Roosevelt, whereby all males between the ages of 18 and 65 are required to register for military service, although only men from 20 to 44 are eligible for active military service.

MARINES: In the Philippines, the 4th Marines are placed under the control of General Douglas MacArthur for the rest of the campaign there.

December 22

AVIATION: Over Wake Island, the last two F4F Wildcats of VMF-211 under Major Paul P. Putnam are destroyed in an engagement with 39 Japanese carrier aircraft. The surviving airmen and ground crews pick up rifles and fight as infantry.

- A force of nine B-17s flies from Batchelor Field, Philippines, and strikes at Japanese shipping at Davao Bay.

MILITARY: In Washington, D.C., President Franklin D. Roosevelt and Prime Minister Winston Churchill conclude the so-called Arcadia Conference which commits both countries to the principle of "Germany first," the creation of a combined

Chiefs of Staff, and the appointment of a supreme commander in both the Atlantic and the Pacific theaters.

- General Douglas MacArthur receives his fourth star to become a full general as his forces fight a losing battle with seasoned Japanese troops, backed by sea and air power.
- The first American troops arrive at Brisbane, Australia, as part of Task Force South Pacific under Brigadier General Julian F. Barnes. They have been escorted from Hawaii by the cruiser *Pensacola*.

December 22–24

MILITARY: The Japanese 14th Army under General Masaharu Homma begins landing along the Lingayen Gulf while Major General Jonathan Wainwright tries desperately to stem their advance.

December 23

AVIATION: Four B-17s stagger aloft from Del Monte Field, Philippines, and bomb Japanese shipping in the Lingayen Gulf. A force of P-40s and P-35s also makes strafing attacks against Japanese troops coming ashore in San Miguel Bay.

MILITARY: After a gallant defense of 15 days, the detachment of 375 Marines defending the remote Pacific outpost of Wake Island succumbs to an overwhelming Japanese attack by 1,000 men of the Special Naval Landing Force. Nonetheless, several pocket of Japanese are wiped out before Commander Winfield S. Cunningham surrenders. The defense of Wake enters Marine Corps legend at a cost of 56 killed and 44 wounded; Japanese losses are significantly higher.

- In the Philippines, General Douglas MacArthur declares Manila an open city to prevent its destruction by advancing Japanese forces. All American and Philippine forces begin an immediate evacuation into the Bataan Peninsula.
- The I Philippine Corps under Major General Albert M. Jones retreats from the Bicol Peninsula, Philippines, in the face of a strong Japanese landing force.

December 24

AVIATION: With heavy bomber operations untenable, General Douglas MacArthur orders Major General Lewis H. Brereton to be evacuated to Australia by a navy PB4Y, while his surviving aircraft find a temporary haven in the Netherlands East Indies.

- As a force of three B-17s bombs airfields and shipping at Davao, Philippines, the headquarters, Far East Air Force, flies from Manila to Darwin, Australia, to set up shop.

MILITARY: At Binalonan, Philippines, men of the 26th Cavalry (Philippine Scouts) under Colonel Clinton S. Pierce make a mounted charge against Japanese forces to slow their inexorable advance. The regiment loses half its men and is forced to yield the village at dusk.

- A Japanese landing force comes ashore at Atimonan, east Luzon, Philippines, and begins a northwest drive toward Manila.
- A badly needed American supply convoy reaches Australia, but it cannot proceed northwest to the Philippines without an armed escort. As such

General Douglas MacArthur is not reinforced just as the Japanese onslaught is developing.

- In Manila, Philippines, the prewar plan WPO-3 is put into effect, whereby the Bataan Defense Force under Major General George M. Parker and his II Philippine Corps is activated.

MARINES: At Camp Elliott, California, the 2nd Marine Brigade activates with parts of the 8th Marines, the 10th Marines, and the 2nd Defense Battalion.

December 25

AVIATION: The garrison on Midway Island is reinforced by the arrival of 14 Brewster F2A Buffalo fighters launched from the carrier *Saratoga*.

December 25–31

MILITARY: As the Northern Luzon Force withdraws into the Bataan Peninsula, it establishes a number of defensive positions (“D” lines) to retard the Japanese advance long enough to allow the Southern Luzon Force to slip inside the peninsula before it is sealed off. The Americans are preparing to make their last stand.

December 26

MILITARY: As a precaution, the original Declaration of Independence is packed into a special bronze container and moved from Washington, D.C., to the safety of Fort Knox, Kentucky. It does not return to the Library of Congress until late 1944.

MARINES: In the Philippines, the 4th Marines area assigned to defend the fortress island of Corregidor in Manila Harbor.

December 29

AVIATION: Japanese medium bombers begin regular raids on the defenses of Corregidor Island, Philippines.

- General Lewis Brereton arrives at the new headquarters in Darwin, Australia, to assume command of remaining air elements in the Philippines.

December 30

AVIATION: The National Defense Research Committee is tasked by the Army Air Force with developing functional, radio-controlled trajectory bombs; this is the origin of the so-called smart bombs of the later 20th century.

NAVAL: The hard-edged but brilliant Admiral Ernest J. King is appointed commander in chief, U.S. Fleet.

December 31

MILITARY: Men of the 192nd Tank Battalion cover the American withdrawal across the Calumpit Bridge and into the Bataan Peninsula. Eight Japanese tanks are destroyed in the fighting as General Jonathan Wainwright prepares to demolish the bridge.

- In light of Japan’s seizure of Wake Island and Guam, the Army is tasked with securing Christmas and Canton Islands and establishing facilities on Bora Bora, Fiji, and New Caledonia for a new and secure transpacific route to Australia.

NAVAL: At Pearl Harbor, Hawaii, Admiral Chester W. Nimitz, a former submariner, is appointed commander in chief of the Pacific Fleet.

1942

January 1

MILITARY: By this date, the Army contains 29 infantry divisions, five armored divisions, and two cavalry divisions—36 divisions in all. Since last year, 600 howitzers, 1,461 medium tanks, and 504 antiaircraft guns have been added to the national arsenal.

- At Port Darwin, Australia, Lieutenant General George H. Brett is appointed to assume control of U.S. forces in Australia (USAFIA), primarily to serve as a support base for Americans fighting in the Philippines.

NAVAL: The post of commander in chief, U.S. Atlantic Fleet goes to Admiral Royal E. Ingersoll.

January 2

MILITARY: The Japanese military juggernaut surges on, capturing Manila and Cavite Naval Base in the Philippines. Meanwhile, General Douglas MacArthur completes the withdrawal American and Filipino forces into the Bataan Peninsula. He now fights on in the hope of being relieved.

January 3

AVIATION: To assist aircraft recognition, all army and navy planes will now receive a designated name in addition to a numerical and type designation. The practice is adopted from the British and includes such famous names as Mustang, Corsair, and Flying Fortress.

MILITARY: Leadership in the Southwest Pacific, which includes American, British, Dutch, and Australian forces, is incorporated into the new ABDA command under General Sir Archibald P. Wavell. Presently, the Allies hope to stop the Japanese onslaught at the “Malay Barrier,” the chain of islands from Malaya to the Netherlands East Indies, and they begin shifting resources there.

January 4

AVIATION: A handful of P-40s launches from makeshift airstrips at Bataan, Philippines, to try unsuccessfully to stem a large Japanese bomber raid against Corrigedor.

January 5

MILITARY: In light of increasing Japanese pressure, a new defensive line arises at the base of the Bataan Peninsula and garrisoned by understrength Philippine army divisions.

NAVAL: The submarine *Pollack* torpedoes a Japanese freighter just eight miles outside of Tokyo Bay; two more are hit over the next four days.

January 6

AVIATION: In Washington, D.C., President Franklin D. Roosevelt challenges the American aviation industry to manufacture 100,000 aircraft this year.

NAVAL: Japanese forces capture Manila and, with it, 11 Navy nurses who spend the next 37 months in captivity.

January 7

AVIATION: President Franklin D. Roosevelt approves plans to expand naval aviation to 27,500 aircraft.

King, Ernest J. (1878–1956)

Admiral

Ernest Joseph King was born in Lorain, Ohio, on November 23, 1878, and he graduated from the U.S. Naval Academy in 1901. He performed well as an officer over the next 15 years and spent World War I as an aide to Admiral Henry T. Mayo, commander of the Atlantic Fleet. By war's end, King had advanced to captain at the relatively young age of 39 and also received the Navy Cross. The ensuing two decades were a period of retrenchment for the navy, and King, frustrated by his inability to advance in the surface fleet, transferred to the submarine service in 1921. He served exceedingly well and, in 1926, he garnered distinction by his salvaging of the sunken *S-51* off Block Island, Rhode Island. However, feeling that aviation offered a brighter path, King received his wings in May 1927, at the advanced age of 48, and, within five years, he was commanding the carrier *Lexington*. He subsequently passed through the Naval

War College in 1933 and succeeded Admiral William A. Moffett as chief of the Bureau of Aeronautics. In 1939 his hopes were dashed when the coveted position of chief of naval operations went to Admiral William D. Leahy, but he did receive command of the Atlantic Fleet in 1941 with a rank of full admiral. In this office King orchestrated an undeclared war against German U-boats in the Atlantic, which brought him to the attention of President Franklin D. Roosevelt.

On December 30, 1941, President Roosevelt summoned King to the White House and appointed him commander in chief of all naval forces and on March 26, 1942 he also replaced Admiral Harold R. Stark as chief of naval operations. King was thus the first naval officer in American history to combine both titles and was entrusted with divining naval strategies for the European and Pacific theaters. Brash and irascible, King had to deal daily with

MILITARY: On the Bataan Peninsula, the Northern Luzon Force is redesignated I Philippine Corps (western sector) while the Bataan Defense Force becomes the II Philippine Corps (eastern sector). Total manpower is 47,500 troops, who are short on food and ammunition, and who are suffering from tropical diseases.

January 9

MILITARY: On Bataan, Japanese forces begin heavily probing the Abucay Line, which stretches from Manila Bay to Mount Natib. Demolitions are employed to slow down the determined enemy drive and the Japanese are gradually repulsed with considerable losses.

January 10

MILITARY: General Douglas MacArthur spurns the first Japanese surrender demand, which is dropped by an aircraft.

MARINES: At Parris Island, South Carolina, the Marine Glider Detachment is formed.

Army chief of staff George C. Marshall, and Army Air Force chief General Henry A. Arnold, and he presented his views on naval strategy forcefully. Ultimately, he conceded to the “Germany First” priority of the Allied High Command, but he insisted that limited tactical offensives be maintained in the Pacific lest the Japanese consolidate their gains and become impregnable. Such noted naval leaders as William F. Halsey, Raymond A. Spruance, and Marc A. Mitscher all served under his direct command, and King, a brilliant strategist, made very few mistakes. However, an ardent Anglophobe, he distrusted the Royal Navy and dragged his feet in creating a joint U.S.-British command for combating U-boats; this recalcitrance probably prolonged the war in Europe by several months and cost several hundred lives. Nonetheless, by 1945 the size of the navy had increased tenfold to 4 million men and 92,000 vessels of every description. In light of his performance, Congress elevated King to five-star admiral in 1944.

Fleet Admiral Ernest J. King (*Naval Historical Foundation*)

King spent several years as a senior adviser to the Navy Department before dying at Portsmouth, New Hampshire, on June 25, 1956, a major naval architect of victory in World War II.

January 11

MILITARY: At Surabaya, Java, the 2nd Battalion, 131st Field Artillery, Texas National Guard, comes ashore to bolster the mixed assortment of Dutch, British, and Australian troops already there.

NAVAL: Operation Drumbeat begins as five German U-boats begin operating off the American East Coast; they sink 26 ships over the next month.

- Japanese submarine *I-6* torpedoes the *Saratoga* as the latter, having delivered aircraft to Midway Island, returns to Pearl Harbor, Hawaii. The vessel returns to the West Coast for repairs, reducing American carrier strength to three.

January 12

MILITARY: Along the Abucay Line, Bataan, Lieutenant Alexander R. Nininger, 57th Infantry (Philippine Scouts) leads three counterattacks despite serious wounds and dies in hand-to-hand fighting; he posthumously wins the first Medal of Honor given to a soldier in this war.

NAVAL: In Washington, D.C., Congress votes to increase navy manpower levels to 500,000 men.

January 14

AVIATION: On Long Island New York, Igor Sikorsky's XR-4 helicopter successfully performs its maiden flight. Impressed by this promising technology, the Army Air Force issues a contract to obtain the first functional helicopters.

DIPLOMACY: In Washington, D.C., the Arcadia Conference ends with the Allies having reaffirmed their earlier "Germany first" priority agreed to at the ABC-1 Staff Meeting of March 27, 1941. They commit themselves to an invasion of North Africa later in the year while the United States will direct the war in the Pacific. Moreover, Australia is to be defended at all costs, along with the line of communications stretching between New Caledonia, Fiji, and American Samoa.

January 15

AVIATION: At Elmendorf Field, Alaska, the Alaskan Air Forces are activated; a month later they are renamed the Eleventh Air Force.

MILITARY: At Fort Myer, Virginia, the new Military Police School opens to standardize training and techniques for soldiers entering the Corps of Military Police.

- On Java, the American-British-Dutch-Australian (ABDA) command is activated under Major General Sir Archibald Wavell, now heading Allied forces in the Pacific Southwest.

NAVAL: Admiral Thomas C. Hart is appointed commander of naval forces operated by the ABDA.

MARINES: On American Samoa, Brigadier General Henry L. Larsen, 2nd Marine Brigade, gains appointment as the new military governor.

January 16

AVIATION: A Douglas TBD Devastator from the carrier *Enterprise*, flown by Aviation chief machinist's mate Harold F. Dixon, ditches in the Pacific after running out of fuel on a search mission. Dixon and two companions spend the next 34 days afloat and drift an estimated 1,200 miles before reaching Danger Island.

- From Canton Island and Suva in the Fijis, PBV Catalinas of PV-23 begin patrolling the waters between the Marshall and Gilbert Islands in order to protect the advance of Task Force 8, then bearing down on them. These are also the first combat patrols in the South Pacific area.

- The first significant deployment of aircraft from Hawaii occurs as six B-17s under Lieutenant Colonel Walter C. Sweeney fly to Palmyra Island en route to Canton Island.

MILITARY: After Japanese forces cross the Batalan River in an attempt to outflank the Abucay defense line, Lieutenant Edwin P. Ramsey, 26th Cavalry (Philippine Scouts) leads the final mounted charge of American military history. The Japanese are finally halted, but the surviving cavalry horses are destroyed and the men employed as infantry.

January 20

NAVAL: The destroyer *Edsall* under Lieutenant Joshua J. Dix assists three Australian corvettes in sinking the Japanese submarine *I-124* off Darwin, Australia.

- Submarine S-36 under Lieutenant John S. McKnight, Jr., patrolling poorly charted waters in the Makassar Strait, runs aground on a reef and has to be scuttled.

MARINES: In Washington, D.C., Congressional legislation elevates Major General Thomas Holcomb to lieutenant general, becoming the first marine officer to hold that rank.

January 22

AVIATION: A force of B-17s lifts off from Malang, Netherlands East Indies, and bombs Japanese shipping moving through the Makassar Strait; over the next week they manage to sink four transport vessels.

MILITARY: On Bataan, the Mauban-Abucay Line is ordered abandoned by General Douglas MacArthur and a new defensive position drawn up farther south behind the Pilar-Bagrac Road. Meanwhile, Japanese forces counterattack sharply to recapture ground lost on the 16th.

January 23–24

MILITARY: Japanese forces begin landing at Rabaul (New Britain) and Kavieng (New Ireland), positioning themselves to threaten New Guinea and possibly Australia itself. At Balikpapan, Borneo, a confrontation is shaping up between Japanese forces and Dutch defenders assisted by U.S. Army artillerymen.

NAVAL: On Bataan, Philippines, Commander Francis J. Bridger forms the Naval Battalion to assist in defending the peninsula.

MARINES: On American Samoa, the 2nd Marine Brigade arrives in force to bolster the 7th Defense Battalion already deployed there.

January 24

NAVAL: In the Gulf of Panama, submarine S-26 is accidentally rammed and sunk by the subchaser PC-460; only three men are rescued.

- The Battle of Makassar Straits, Borneo, unfolds as four flush-deck American destroyers of Destroyer Division 59 under Commander Paul H. Talbot raid the Japanese landing site at Balikpapan. In a wild, nighttime melee, the Americans sink three transports and a cargo ship, then escape undamaged. This is also the first surface action waged by the U.S. Navy during the war.

January 26

MILITARY: Seven weeks after the fact, the Pearl Harbor Commission releases its findings and implicates both Admiral Husband E. Kimmel and General Walter C. Short for dereliction of duty; both men are summarily dismissed from their positions without a court-martial.

- Company B, 133rd Infantry Regiment arrives in Belfast, Northern Ireland; these are the first American troops deployed in Europe since 1917. Curiously, they still wear their World War I helmets. These troops are to be commanded by Major General James E. Chaney, U.S. Forces in the British Isles.

January 27

MILITARY: At Charleston, South Carolina, Task Force Bobcat departs for the Society Islands in order to construct a U.S. base on Bora Bora. The troops involved are drawn from the Connecticut and Delaware National Guard.

NAVAL: The First Naval Construction Battalion sails from the United States for Bora Bora in the Pacific.

- West of Midway Atoll, the Japanese submarine *I-173* is torpedoed and sunk by the submarine *Gudgeon*, becoming the first enemy submersible sunk by its American counterpart. A total of 23 enemy submarines are sunk in this manner.

MARINES: At Mariveles, Bataan, marines culled from several artillery batteries help navy and army personnel halt a Japanese amphibious drive inland.

January 28

AVIATION: In Savannah, Georgia, Brigadier General Asa N. Duncan takes charge of the newly formed Eighth Air Force headquarters; by war's end this will be one of the largest aerial strike forces in history and senior partner in the Combined Bomber Offensive (CBO) with the Royal Air Force.

- Off Newfoundland, Canada, a Lockheed Hudson flown by Aviation Machinist's Mate Donald F. Mason drops a bomb on a surfaced U-boat. Mason then eloquently reports "Sighted sub, sank same," although the claim is not verified by postwar records.

January 29

AVIATION: At Suva, Fiji, men and aircraft of the 70th Pursuit Squadron help secure an aerial link between New Caledonia and Samoa. The unit subsequently operates from Guadalcanal.

TECHNOLOGY: At the Naval Proving Ground, Dahlgren, Virginia, a series of tests are held during which radio proximity fuses are fired out of five-inch naval guns. The results are satisfactory and production of the new shells begins immediately.

January 31

MILITARY: At San Francisco, California, a force of 2,000 infantry, artillery, and aviation elements sails on the transport *President Taylor*, bound for Christmas Island (Task Force Birch) and Canton Island (Task Force Holly) in the Pacific. There they are to establish advanced bases to help funnel in men and supplies that follow.

NAVAL: At Annapolis, Maryland, Rear Admiral John R. Beardall gains appointment as the 33rd superintendent of the U.S. Naval Academy.

February

AVIATION: Congress passes legislation posthumously promoting the late William "Billy" Mitchell to major general.

February 1

AVIATION: The U.S. Navy conducts its first hit-and-run offensive of the Pacific War with an aerial strike at Kwajalein, Marshall Islands, by the carrier *Enterprise* of Task Group 8 under Admiral William F. Halsey, which sinks a transport and damages nine other vessels; six aircraft are lost. Heavy cruisers *Northampton* and *Salt Lake City* add to the tumult by sinking a gunboat while the destroyer *Dunlap* claims a submarine chaser off Wotje. Simultaneously, aircraft from the carrier *Yorktown* of Task Group 17 damage a gunboat and other vessels in the Gilbert Islands.

- In the Philippines, a handful of P-40s from Bataan strafe and bomb Japanese landing barges attempting to come ashore at Quinauan Point; heavy casualties are inflicted but enemy forces are not deterred.
- At Parris Island, South Carolina, the airfield is designated a Marine Corps Air Station.

MILITARY: At Fort Benjamin Harrison, Indiana, the Army Chaplain School is founded to help train civilian preachers for military service.

February 3

NAVAL: At Corregidor, Philippines, the submarine *Trout* delivers food and ammunition, then takes on 20 tons of gold and silver from local banks and departs.

February 4

NAVAL: An Allied task force under Dutch admiral Karel W. F. M. Doorman is attacked in the Java Sea by land-based Japanese medium bombers and the American cruisers *Houston* and *Marblehead* are heavily damaged; the later is forced to return to the United States to effect repairs. The lack of effective air cover induces the squadron to withdraw.

February 5

AVIATION: At Hickham Field, Hawaii, the Hawaiian Air Force is superseded by the new Seventh Air Force under Major General Clarence L. Tinker. Nicknamed the “Pineapple Air Force,” its primary mission is to defend the islands from attack. The Far East and Caribbean Air Forces are likewise designated Fifth and Sixth Air Forces, respectively.

NAVAL: In Bethesda, Maryland, the National Naval Medical Center is founded.

February 6

MILITARY: In Washington, D.C., the United States and Great Britain establish a joint chiefs of staff to better coordinate what becomes a vast and highly complex war effort.

February 7

NAVAL: In Washington, D.C., President Franklin D. Roosevelt authorizes creation of the War Shipping Administration, under Rear Admiral Emory S. Land, to consolidate and coordinate the activity of all merchant vessels contributing to the war effort.

February 9

MILITARY: In Washington, D.C., the first formal meeting of the new Joint Chiefs of Staff (JCS), to coordinate strategies between the army and navy, convenes between General George C. Marshall, Lieutenant General Henry H. Arnold, and Admirals Harold R. Stark and Ernest R. King. JCS replaces the Army and Navy Joint Board, which was created in 1903.

NAVAL: The French luxury liner *Normandie*, being outfitted in New York as a troop transport, catches fire and burns at its dock.

February 10

AVIATION: At Midway Island, marine aircraft of VMF-221 attack a Japanese submarine that surfaces and fires several rounds from its deck gun.

MILITARY: Members of Task Force Birch debark at Christmas Island in the Central Pacific and begin setting up a base camp.

February 11

NAVAL: The Silent Service suffers its first loss when the Japanese destroyer *Yamakaze* sinks the submarine *Shark* east of Celebes, Netherlands East Indies.

February 12

AVIATION: At Patterson Field, Dayton, Ohio, the new Tenth Air Force is established with a view toward transferring it to the China-Burma-India (CBI) Theater.

MARINES: At Camp Elliott, California, the 9th Marines are activated and assigned to the 2nd Marine Division.

February 13

MILITARY: Task Force Holly arrives at Canton Island, although the vessel *President Taylor* grounds short of the pier and is abandoned. Once its men are ashore, they begin immediate construction of an airfield.

February 14

NAVAL: Dutch and British pressures force Admiral Thomas C. Hart to step down as commander of the Southwest Pacific. His replacement is Vice Admiral C. E. L. Helfrich, Royal Netherlands Navy.

February 15

AVIATION: Over England, Lieutenant Colonel Townsend Griffiss becomes the first Army Air Force airman to die in Europe when his transport is accidentally attacked by Polish pilots flying with the Royal Air Force.

MILITARY: Allied morale in the Pacific receives a severe jolt after Singapore, long hailed as the "Gibraltar of the East," surrenders to smaller Japanese forces under General Tomoyuki Yamashita. Over 64,000 Australian, British, and Indian troops pass into harsh captivity.

February 16

MARINES: At Quantico, Virginia, the 1st Marine Raider Battalion is created from the 1st Separate Battalion.

February 17

MILITARY: On Bora Bora, Society Islands, Task Force Bobcat arrives and begins constructing a vital air strip situated between the American West Coast and Australia.

NAVAL: Among the units arriving on Bora Bora is the 1st Naval Construction Battalion, the first unit of the fabled Seabees.

February 18

MARINES: The 4th Marines are relocated to Corregidor Island, Manila Bay, and are tasked with defending the beach area; their ranks are swelled by the addition of sailors lacking other assignments.

February 19

AVIATION: Japanese aircraft launched from the carriers *Akagi*, *Hiryu*, *Kaga*, and *Soryu* surprise American and Australian forces at Port Darwin, Australia, sinking

the destroyer *Peary*, which Pounders with a loss of 80 men, and two transports. A PBV Catalina flown by Lieutenant Thomas H. Moorer (a future chairman, JCS) is shot down and its crew is rescued by a transport that is subsequently also sunk.

NAVAL: Off Bali, Dutch East Indies, an Allied force under Rear Admiral Karel W. F. M. Doorman engages Japanese ships in the Battle of Badoeng Strait near Bali. Several vessels are damaged on either side, including the American destroyer *Stewart*, which is forced into drydock at Surabaya, Java.

MARINES: At Camp Elliott, California, the 2nd Marine Raider Battalion arises from the 2nd Separate Battalion.

- At Guantánamo Bay, Cuba, the new 9th Defense Battalion deploys to protect that installation.

February 20

AVIATION: In Washington, D.C., the War Production Board elevates aircraft construction with that of tanks and ships, and the allocation of resources is shifted accordingly.

- In England, Major General Ira C. Eaker and six officers arrive to assess the condition of future air bases to be acquired there.
- As the carriers *Lexington* and *Yorktown* steam toward Japanese-held Rabaul, intending to launch an air strike, they are spotted and attacked by a squadron of Mitsubishi G4M bombers. The carrier's combat air patrol consists of two Grumman F4F Wildcats under Lieutenant Edward H. ("Butch") O'Hare, which falls to one when his wingman's guns malfunction. O'Hare nonetheless tackles the oncoming armada, quickly shooting down four bombers and damaging two more; the attack dissipates and the carriers are saved from imminent destruction. For his quick action, O'Hare receives a Medal of Honor.

NAVAL: At Mariveles, Philippines, President Manuel Quezon and Vice President Sergio Osmena, along with their families, board the submarine *Swordfish* for a safe transit to nearby San Jose, Panay Island.

POLITICS: In Washington, D.C., President Franklin D. Roosevelt signs an executive order empowering the secretary of war to detain Americans of Japanese ancestry; a total of 112,00 citizens are relocated to camps until December 1944.

February 22

NAVAL: At Surabaya, Java, the damaged destroyer *Stewart* falls off its keel blocks while in drydock, necessitating its scuttling to avoid capture. However, invading Japanese forces raise the vessel and employ it as a patrol boat until its recapture at Kure, Japan, at the end of the war.

February 23

AVIATION: The Bureau of Aeronautics releases a new program for training naval aviators. Instead of the current seven months, new candidates will receive 11 months of training for one- and two-engined craft, and 12 and a half months for those with four engines. Classes are also divided up into primary, intermediate, and advanced training.

- In England, Major General Ira C. Eaker assumes command of VIII Bomber Command while his staff begins establishing a headquarters.

- At Townsville, Australia, six B-17s, which survived fighting in the Philippines, launch the first Fifth Air Force strike by bombing Japanese targets at Rabaul, New Britain.

NAVAL: Japanese submarine *I-17* surfaces at night off Santa Barbara, California, and shells the Ellwood oil refinery. The damage incurred is slight but adds to coastal war jitters.

February 24

AVIATION: At Bandoeng, Java, Major General Lewis H. Brereton is ordered to transfer his staff to India to command the still-forming Tenth Air Force there. His primary purpose is to organize an aerial ferry route over the towering Himalaya Mountains to support Major General Claire L. Chennault's new China Air Task Force (CATF) at Kunming.

- Japanese-held Wake Island is the object of a counterstrike by Task Force 16 under Vice Admiral William F. Halsey. Aircraft from the carrier *Enterprise* bomb and strafe the atoll while heavy cruisers *Northampton* and *Salt Lake City*, assisted by destroyers *Balch* and *Maury*, bombard land facilities. Two Japanese guardboats are sunk.

NAVAL: In the Philippines, submarine *Swordfish* evacuates Francis B. Sayre, U.S. high commissioner, from Manila Bay to Java and safety.

February 25

NAVAL: Defense of American ports is assigned to the U.S. Coast Guard which presently boasts a strength of 25,000 men. By 1944 it expands to include 175,000 regulars and reservists.

February 27–28

AVIATION: South of Tjilatjap, Java, Japanese land-based bombers strike an American convoy, damaging the seaplane tender *Langley* so heavily that it has to be scuttled. Its cargo of 32 Curtiss P-40 fighters intended for the 17th Pursuit Squadron is consequently lost.

NAVAL: American, British, and Dutch naval forces under Rear Admiral Karel W. F. M. Doorman go down to a crushing defeat in the Battle of the Java Sea at the hands of Rear Admiral Takeo Takagi. Doorman's force of five cruisers and 11 destroyers is badly cut up by superior Japanese gunnery and torpedoes, which sink two destroyers and the Dutch light cruisers *De Ruyter* (Doorman's flagship) and *Java*. One Japanese destroyer is damaged. With Doorman dead, the surviving vessels break and proceed to Australia.

February 28

NAVAL: Off the Delaware Capes, the destroyer *Jacob Jones* is torpedoed and sunk by a German submarine; most of the crew is lost.

- The Battle of Sunda Strait, Java, unfolds as the heavy cruiser *Houston* under Captain Albert H. Rooks and the Australian light cruiser *Perth* are attacked by a Japanese force under Admiral Takeo Kurita, consisting of three heavy cruisers and nine destroyers. Both Allied vessels are sunk after a stiff engagement along with two enemy transports; of *Houston's* 1,000 crew members, only 368 sailors survive and are captured. Captain Rooks receives a posthumous Medal of Honor.

March 1

AVIATION: A Lockheed Hudson bomber flown by Ensign William Tepuni of VP-82 bombs and sinks *U-656* in waters off Newfoundland, being the first victory over a German submarine in the war.

- Marine Air Groups 11, 12, 14, and 15 are organized at Camp Kearney, California; Marine Air Group-13 is set up at San Diego; Marine Air Group 22 organizes on Midway Island; Marine Air Groups 23 and 24 form up at Ewa Field, Hawaii.

NAVAL: In the waters off Java, the destroyer *Pope* is attacked by several Japanese vessels and sunk by aircraft launched from the carrier *Ryujo*. Lieutenant Richard N. Antrim, the vessel's executive officer, wins a Medal of Honor while in captivity.

- South of Christmas Island, the oiler *Pecos* is sunk by Japanese aircraft from the carriers *Akagi*, *Hiryu*, *Kaga*, and *Soryu*.

- Off Java, Japanese battleships *Hiei* and *Kirishima* fire 1,141 heavy shells in a futile attempt to sink the elusive destroyer *Edsall*, but it eventually succumbs to an air attack. Only five crew members survive; they are captured and subsequently executed.

March 2

MILITARY: In Washington, D.C., the army promulgates a new wartime structure of three divisions: Army Air Forces (AAF) under Major General Henry H. Arnold, Army Service Forces (ASF) under Lieutenant General Brereton B. Somervell, and Army Ground Forces under Lieutenant General Lesley J. McNair. Among their duties is to report directly to Army Chief of Staff major general George C. Marshall.

NAVAL: Off Surabaja, Netherlands East Indies, Japanese cruisers *Atago* and *Takao* engage and sink the destroyer *Pillsbury* as it attempts to flee to Australia.

March 3

NAVAL: The submarine *Perch*, having endured three days of Japanese depth-charge attacks, is severely damaged and scuttled off Surabaja, Netherlands East Indies; all 59 crewmen fall captive with six dying in captivity.

- South of Java, the Japanese destroyers *Arashi* and *Nowaki* attack and sink the gunboat *Asheville*; only one crewman is captured and he dies in captivity.

March 4

AVIATION: Douglas SBD Dauntless dive-bombers launched from the carrier *Enterprise* stage another hit-and-run attack by striking Japanese facilities on Marcus Island, 800 miles northwest of Wake Island.

MILITARY: At Chungking, China, newly promoted lieutenant general Joseph W. Stilwell assumes command of the China-Burma-India (CBI) theater, and he is warmly greeted by Generalissimo Chiang Kai-shek.

March 6

AVIATION: Captain Benjamin O. Davis, son of the army's first African-American general, is among the first aviation school class to graduate from the Tuskegee Institute, Alabama. Most subsequently fly Curtiss P-40s.

March 7

AVIATION: Off New London, Connecticut, the K-5 blimp carrying a radio sonobuoy successfully detects the submerged submarine *S-20* from a distance of five

miles away. Similarly equipped blimps will play a major role in the defeat of German U-boats.

March 8

MILITARY: Allied forces are unable to prevent Japanese forces from landing at Lae and Salamaua, on the northeast coast of New Guinea.

MARINES: The 1st Marine Brigade (Provisional), being relieved by army troops, sails from Iceland.

March 9

MILITARY: In Washington, D.C., the Antiaircraft Artillery Command is organized under the command of Major General Joseph Green. It serves as an element of the Army Ground Forces and has its principal school at Camp David, North Carolina. The War Department itself is reorganized into three autonomous branches: Army Air Forces, Army Ground Forces, and Service of Supply.

- At Surabaya, Java, the 2nd Battalion, 131st Field Artillery is forced to surrender to Japanese forces as the entire Netherlands East Indies is conquered. They are among the Allied prisoners forced to construct the bridge over the River Kwai.

March 10

AVIATION: Aircraft launched from the carriers *Enterprise* and *Yorktown* under Vice Admiral Wilson Brown attack Japanese shipping at Lae and Salamaua, New Guinea. Four small enemy vessels are sunk and 10 others damaged in this, the most successful American carrier raid to date. The Japanese react by dispatching their own carriers to support upcoming offensive operations in the southwestern Pacific.

MILITARY: At San Francisco, California, the 27th (New York) Infantry Division embarks for deployment in the Pacific theater; curiously, it is still arranged in the old "square" divisional structure until it can be reorganized in Hawaii.

MARINES: In Southern California, the government purchases 132,000 acres of land from the Santa Margarita Ranch, which becomes the future site of Camp Pendleton.

March 11

MILITARY: At Corregidor, Philippines, General Douglas A. MacArthur is ordered by President Franklin D. Roosevelt to depart with command staff and family to establish a new headquarters in Australia. He complies only with the greatest reluctance.

March 12

MILITARY: At Noumea, New Caledonia, Army Task Force 6814 under Major General Alexander M. Patch drops anchor and occupies this strategic island with 17,500 troops. Fortunately, the local French administration is anti-Vichy in tenor and welcomes them. The new Americal Division ultimately emerges from troops initially deployed here.

NAVAL: In Washington, D.C., President Franklin D. Roosevelt orders the offices of chief of naval operations and commander in chief, U.S. Fleet combined, intending to grant Admiral Ernest J. King unprecedented control over the navy.

March 13

MILITARY: At Front Royal, Virginia, Secretary of War Robert P. Patterson approves the use of dogs in war. The service becomes known as the Canine (K-9) Corps. During the war, 10,526 dogs are accepted into service, of which 2,290 are killed.

March 15

AVIATION: A Lockheed Hudson bomber of VP-82, escorting Convoy ON 74, attacks *U-503* in waters off Argentia, Newfoundland, sinking it.

- At Ewa Field, Hawaii, Marine Air Group 24 begins transferring men and equipment to Efate, New Hebrides, to help construct an airfield there.

March 17

MILITARY: General Douglas MacArthur departs the Philippines on navy PT boats to establish new headquarters in Australia as commander of the southwestern Pacific. Before leaving, he vows to the Filipino people, "I will return," then turns command over to Major General Jonathan M. Wainwright.

NAVAL: Lieutenant John D. Bulkeley safely transports General Douglas A. MacArthur and Rear Admiral Francis W. Rockwell 560 miles to Mindanao in a PT boat, winning a Medal of Honor.

- Vice Admiral Robert L. Ghormley assumes the new post of commander, Naval Force Europe.

March 18

MILITARY: Infantry and engineers from neighboring New Caledonia land on Efate, New Hebrides, and commence construction of an air strip.

March 19

NAVAL: Off the coast of Virginia, an accidental firing by the freighter *Liberator* strikes the bridge of the destroyer *Dickerson*, killing three men, including the latter's captain.

- At Negros, Philippines, President Manuel Quezon, his family and staff, board motor torpedo boat *PT-41*, which evacuates them to safety at Mindanao.

TECHNOLOGY: In Los Angeles, Dr. Theodor von Kármán and five scientists from the California Institute of Technology (Caltech) form the Aerojet Engineering Company to manufacture liquid- and solid-fuel rockets for military purposes.

March 20

NAVAL: The new battleship *South Dakota* is commissioned, unique among contemporaries in having a radar-directed firing system.

March 21

MARINES: At New River, North Carolina, the 3rd Marine Brigade is created from parts of the 7th and 11th Marines; it is slated to garrison western Samoa.

March 23

MILITARY: At various assembly points along the West Coast, army troops begin assembling the first of 112,000 citizens of Japanese ancestry for relocation to detention centers in the interior.

March 25

MILITARY: In Washington, D.C., the War Department announces that General Douglas MacArthur has been awarded the Medal of Honor for his defense of the

Philippines against great odds. Within days he is also appointed Allied supreme commander, Southwest Pacific.

MARINES: Its garrison duties in Iceland terminated, the 1st Marine Brigade (Provisional) arrives in New York and its headquarters is disbanded.

March 26

AVIATION: At Clover Field, Santa Monica, the prototype Douglas C-54 Skymaster performs its maiden flight; it subsequently becomes a workhorse for the Army Air Force.

- Over France, Major Cecil P. Lessing becomes the first pilot from the Eighth Air Force to fly a combat mission when he accompanies a British Spitfire Squadron on a coastal sweep.

NAVAL: In Washington, D.C., Admiral Ernest J. King replaces Admiral Harold R. Stark as the ninth chief of naval operations. Thanks to a recent executive order, King also holds down responsibilities as chief, U.S. Fleet, which has been combined into the CNO position.

- At Portland, Maine, Task Force 39, consisting of the carrier *Wasp*, battleship *Washington*, and heavy cruisers *Tuscaloosa* and *Wichita*, sail for Scapa Flow, Orkney Islands, to reinforce the British Home Fleet. Tragically, Rear Admiral John W. Wilcox, Jr., is suddenly washed overboard and lost and replaced by Rear Admiral Robert C. Giffen.

- In the Atlantic, the *Atik*, and American “Q-Ship” (heavily armed merchantman) engages the *U-123* and is sunk with a loss of all hands.

March 27

AVIATION: In Washington, D.C., the War Department and the Department of the Navy agree that the latter should assume control of all antisubmarine activity along both coastlines. Accordingly, the navy holds sway over all Army Air Force units involved with this vital activity.

March 28

MARINES: The island of Upolu, Western Samoa, is garrisoned by men of the 7th Defense Battalion.

March 29

MARINES: The 4th Defense Battalion, accompanied by VMF-212, deploys on Efate, New Hebrides.

April 2

AVIATION: At Tutuila, American Samoa, the initial elements of Marine Air Group 13 arrive and provide air defense for the island.

- Major General Lewis H. Brereton leads a force of three B-24 Liberators on the first strike by the new Tenth Air Force; the target is Japanese positions on Port Blair, Andaman Islands, in the Indian Ocean.

April 3

NAVAL: To avoid overt interservice rivalry, Admiral Chester W. Nimitz is appointed commander in chief, Pacific Ocean Area (CINCPOA), encompassing the North, Central, and South Pacific, while General Douglas A. MacArthur is designated commander, Southwest Pacific Area.

Nimitz, Chester W. (1885–1966)

Admiral

Chester William Nimitz was born in Fredericksburg, Texas, on February 24, 1885, a son of German immigrants. After being rejected by West Point, he gained admission to the U.S. Naval Academy and graduated in 1905. Two years later he received command of the derelict destroyer *Decatur*, which he accidentally ran aground in July 1908. A court-martial found him guilty of neglect but, instead of cashiering him, simply issued a severe reprimand. Over the next three decades, however, Nimitz proved himself to be a capable and far-sighted naval officer. He briefly served on submarines and, during World War I, assumed command of the oiler *Maumee* to help pioneer refueling techniques at sea. Afterward, he held a number of school and staff positions, advanced to captain in 1927, and commanded several divisions of cruisers and destroyers. In 1939 Nimitz reported to Washington, D.C., as chief of the Bureau of Navigation, where his quiet, affable manner and solid grasp of strategy brought him to the attention of Secretary of the Navy Frank Knox. In the wake of the Japanese attack on Pearl Harbor, Knox recommended him to President Franklin D. Roosevelt as commander in chief of the Pacific Fleet with the rank of full admiral. Nimitz was approved for the position, although his authority over military affairs was restricted to the Central Pacific. The Southwest Pacific remained the domain of General Douglas A. MacArthur, with whom Nimitz worked well. The admiral was also forced to deal with his abrasive superior, Admiral Ernest J. King, chief of naval operations, but the three men managed to

Admiral Chester Nimitz (*National Archives and Records Administration*)

work out their differences and harmonize their command relationships.

Nimitz initially faced the unenviable task of uprooting veteran Japanese forces from their Pacific strongholds. He did so by maintaining the initiative through carrier strikes in the Gilbert and Marshall Islands, then fighting the Japanese navy to a

(continues)

(continued)

draw at the Battle of the Coral Sea in May 1942. Aided by decoded Ultra intercepts, Nimitz was alerted that the Japanese next intended to strike at Midway Island, so he positioned carriers under Rear Admiral Frank J. Fletcher to ambush them en route. The result was a decisive victory. Over the next three years Nimitz helped orchestrate a steady advance through the Central Pacific with victories at Tarawa, Saipan, and Tinian. After the last vestiges of Japanese sea power vanished in the Battle of Leyte Gulf,

Nimitz and MacArthur persuaded Admiral King to bypass Formosa and attack the Philippines instead. In December 1944 he was promoted to five-star fleet admiral and helped organize the successful captures of Iwo Jima and Okinawa in the spring of 1945. Nimitz was present at surrender ceremonies in Tokyo Bay in September 1945 and signed the document for the United States. Shortly after, he succeeded King as chief of naval operations, and he retired in December 1947. Nimitz died in San Francisco, California, on February 20, 1966, a master of modern sea power.

April 4–9

AVIATION: In another sharp display of Japanese naval aviation prowess, a five-carrier task force under Vice Admiral Chuichi Nagumo raids the Indian Ocean, engages a British force under Admiral Sir James Somerville, and sinks the light carrier *Hermes* and cruisers *Dorsetshire* and *Cornwall*. The Japanese carriers in question are all veterans of the Pearl Harbor attack five months previous.

April 6

AVIATION: The first supply mission over the “Hump” (Himalayas) takes place when 10 DC-3s acquired from Pan American hoist 30,000 gallons of fuel from Calcutta, India, to Yunnan-yi, southern China. The move is done in anticipation of the arrival of 16 B-25s Mitchell bombers launched from the carrier *Hornet* against Tokyo.

NAVAL: In Manila Bay, Philippines, gunboats *Mindanao* and *Oahu* attack and claim to destroy four Japanese landing barges at night.

April 7–24

TECHNOLOGY: In California, a Douglas A-20 Havoc aircraft begins testing the safety and utility of liquid-propelled rockets (incorrectly designated as JATO, or, Jet Assisted Takeoffs).

April 8

MILITARY: At Bowman Field, Kentucky, the 5th Air Support Command is redesignated the Ninth Air Force.

NAVAL: At Corregidor, Philippines, the submarine *Seadragon* surfaces to take on and evacuate vital specialists such as radio communications intelligence officers before the island’s fall.

April 9

AVIATION: In Narragansett Bay, Rhode Island, the destroyer *Aaron Ward* is “attacked” by a TG-2 radio-controlled drone fitted with a television camera. The drone releases a torpedo, which deliberately passes 300 feet astern of its target.

MILITARY: Diseased and half-starved U.S. Army and Filipino units, the self-styled “Battling Bastards of Bataan,” conclude a valiant, three-month defense of the Bataan Peninsula by finally surrendering to superior Japanese forces. The 75,000 captives (12,000 Americans among them) are then harshly treated in what becomes known as the “Bataan Death March” during which over 5,200 Americans perish through abusive treatment. Meanwhile, troops under Major General Jonathan M. Wainwright on the island of Corregidor in Manila Bay gird themselves for a final Japanese onslaught. The sheer brutality of Japanese atrocities serves as a rallying point for the American public.

NAVAL: The surrender of Bataan results in the scuttling of the submarine tender *Canopus*, minesweeper *Bittern*, tug *Napa*, and drydock *Dewey*. All remaining small craft evacuate needed personnel to Corregidor in Manila Harbor.

- Off Cape Tanon, Cebu Island, Philippines, motor patrol boats *PT-34* and *PT-41* attack the Japanese light cruiser *Kuma* and torpedo boat *Kiji*, scoring several hits on the former, but defective torpedoes fail to explode. Floatplanes then attack and damage *PT-34*, and it is scuttled with a loss of two killed and three wounded.

April 9–11

MILITARY: At Seymour, Australia, the 41st Infantry Division arrives amidst cheering Aussies; they erect a training center 65 miles from Melbourne to accommodate the incoming 32nd Infantry Division; together both divisions constitute I Corps under Major General Robert L. Eichelberger.

April 10

NAVAL: The U.S. Pacific fleet is reorganized into the following commands and commanders: Carriers (Vice Admiral William F. Halsey, Jr.); cruisers (Rear Admiral Frank J. Fletcher); Destroyers (Rear Admiral Robert A. Theobald); Service Force (Vice Admiral Wilson Brown, Jr.); Amphibious Force (Vice Admiral Wilson Brown, Jr.); Submarine Force (Rear Admiral Thomas Withers); Patrol Wings (Rear Admiral John S. McCain).

April 12

AVIATION: Captain Edward “Eddie” Rickenbacker asks Lieutenant General Henry H. Arnold that his old, World War I “Hat in the Ring” squadron insignia be bestowed upon the new 94th Pursuit Squadron.

MARINES: On Corregidor, Manila Bay, unassigned navy sailors are gathered together into the 4th Battalion, 4th Marines.

American prisoners on the Bataan Death March (Library of Congress)

April 14

NAVAL: On the North Carolina coast, the destroyer *Roper* spies *U-85* on the surface, gives chase, drops depth charges, and sinks it; this is the first German vessel sunk off the eastern seaboard.

April 18

AVIATION: In a stunning move, 18 North American B-25 Mitchell medium bombers under Colonel James “Jimmy” Doolittle lift off from the deck of the carrier *Hornet* and strike at targets 800 miles distant in Tokyo, Yokosuka, Yokohama, Kobe, and Nagoya, Japan, before crash-landing in China (one is forced down in Siberia). Damage proves slight but the attack proves a psychological coup to the United States in staging a successful assault on an erstwhile invincible enemy. The Japanese navy loses considerable face for failing to adequately protect the home islands from attack; fighter units are also called home from battle zones to guard Japanese airspace.

- Marine Fighter Squadron 211 arrives on Palmyra Island after launching from the carrier *Lexington*.
- At Naval Air Station Quonset Point, Rhode Island, the navy establishes its first Night Fighter Development Unit to develop and test the requisite equipment for navy and marine aviators.

NAVAL: Task Force 16 under Vice Admiral William F. Halsey, Jr., takes the *Hornet* to within striking distance of Japan, where 16 B-25s under Colonel James H. Doolittle are launched against targets. The launch is made several hours earlier than planned when the force is spotted by a Japanese picket boat, which is then sunk.

- The remaining Royal Australian Air Force personnel are evacuated from Timor, Netherlands East Indies, by the submarine *Searaven*.

April 19

AVIATION: In Chesapeake Bay, the television-guided BG-1 drone operated by Utility Squadron VJ-5 scores a direct hit on a raft being towed at eight knots. It was guided by a control plane 11 miles away and operated by Lieutenant Moulton B. Taylor.

April 20

NAVAL: In the Mediterranean, the carrier *Wasp* under Captain J. W. Reeves, Jr., launches 47 Royal Air Force Spitfires from its deck to reinforce the Malta garrison. The island is under aerial siege by German and Italian air units and the new additions prove instrumental in bolstering its air defenses.

MARINES: At Camp Elliott, California, the Fleet Marine Force Training Center is founded to hone men in their individual combat skills.

April 24

MARINES: At Marine Corps Air Station, Parris Island, the Glider Detachment is expanded into Glider Group 71 (MLG-71).

April 25

MILITARY: Acting upon an executive order signed by President Franklin D. Roosevelt in January, army troops begin rounding up Japanese Americans for inter-

ment at various relocation camps scattered throughout the West. Ultimately, 110,000 people are incarcerated, despite the fact that many families have sons on active duty.

TECHNOLOGY: At Norfolk, Virginia, the 50-foot tank lighter designed by Andrew Higgins proves itself and is accepted into navy service as the Landing Craft Mechanized (LCM); it is the world's first vessel capable of getting armored vehicles from ship to shore during an amphibious operation.

April 28

NAVAL: Off Key West, Florida, the destroyer *Sturtevant* runs afoul of an American minefield of which it was unaware strikes a mine, then sinks with a loss of 15 men.

- At Scapa Flow, Orkney Islands, the battleship *Washington*, heavy cruisers *Wichita* and *Tuscaloosa*, and four American destroyers assist the Royal Navy in escorting convoy PQ 15 to Murmansk in the Soviet Union.

MARINES: On American Samoa, Major General Charles F. B. Price establishes the Headquarters Samoan Area Defense Force. He is later joined there by the 1st Raider battalion and 2nd Barrage Balloon Squadron.

April 29

MILITARY: In Washington, D.C., the first of 40,000 military personnel begins occupying office spaces in the new Pentagon Building. The building serves as the nerve center of the American war effort.

- Advancing Japanese forces capture Lashio, Burma, cutting the Burma Road off from southern China. This forces the Americans to supply the Flying Tigers by airlifts over the "Hump," or Himalaya Mountains.

April 30

MILITARY: The army signs contracts with General Motors to produce the first amphibious 2½-ton trucks (DUKW); 37,000 are constructed during the war.

NAVAL: Command of U.S. Naval Force Europe passes to Admiral Harold R. Stark.

May 1

NAVAL: Off the coast of Honshu, Japan, the submarine *Drum* torpedoes and sinks the 9,000-ton seaplane tender *Mizuho*.

MARINES: At Wallis Island, Samoa, the 8th Defense Battalion arrives as a garrison force.

May 2

AVIATION: At Bolling Field, Washington, D.C., Major General Carl "Tooey" Spaatz is assigned to command the Eighth Air Force currently assembling in England.

MILITARY: With the Burma front collapsing under the weight of a Japanese onslaught, Lieutenant General Joseph Stilwell, accompanied by 26 Americans, 13 British, and 16 Chinese, begins walking out of the jungle toward Allied territory in India.

May 3

MILITARY: As a new Japanese offensive expands in the Solomon Islands, the 3rd Kure Special Naval Landing Force seizes Tulagi and Gavutu.

NAVAL: At Corregidor, Manila Bay, the submarine *Spearfish* makes the final evacuation of that beleaguered post, bringing off nurses and specialist personnel.

May 4

AVIATION: The carrier *Yorktown* launches aircraft, which strike Japanese shipping off Tulagi in the Solomon Islands, sinking four transports and damaging four others.

May 5–6

MILITARY: Japanese forces launch an all-out nighttime offensive against the remaining American detachments on Corregidor, Manila Bay, the Philippines. Resistance is fierce until the Japanese land a handful of tanks on the island, at which point Major General Jonathan M. Wainwright feels he has no recourse but to surrender.

May 6

MILITARY: On heavily fortified Corregidor Island in Manila Bay, known to its defenders as “The Rock,” Major General Jonathan Wainwright, outnumbered and heavily outgunned, surrenders the remaining 3,500 American forces to Lieutenant General Masaharu Homma. This closes all organized resistance on the islands, although guerrilla warfare persists until the end of the war.

NAVAL: Rather than surrender, the crew of the minesweeper *Quail* scuttle their vessel, then sail off from Manila Bay in a motor launch; the 18 men reach Darwin, Australia, on June 6, 1942.

MARINES: At Corregidor, Manila Bay, Colonel Samuel L. Howard orders the regimental colors burned before surrendering his 4th Marines to the Japanese; total losses in the Philippines total 332 dead and 357 wounded, with a further 239 dying in captivity.

May 7–8

AVIATION: The United States and Japan wage a costly draw at the Battle of the Coral Sea, the first naval encounter in history during which the opposing fleets never sight each other. Moreover, for the first time, a Japanese invasion force intended for Port Moresby, New Guinea, has been blunted and turned back. Rear Admiral Frank J. Fletcher’s Task Force 17 loses the heavy carrier *Lexington*, the destroyer *Sims*, and oiler *Neosho*, while the carrier *Yorktown* sustains heavy damage. Vice Admiral Takeo Takagi loses light carrier *Shoho* and six smaller vessels while the large carriers *Shokaku* and *Zuikaku* are heavily damaged. On the *Neosho*, Chief Watertender Oscar V. Peterson posthumously wins the Medal of Honor for closing bulkhead stop valves, saving his shipmates.

May 8

MARINES: On American Samoa, the 3rd Marine Brigade deploys at Tutuila and assumes control of the 7th Defense Battalion.

May 9

AVIATION: In the Mediterranean, the carrier *Wasp* delivers a second cargo of Royal Air Force Spitfires to Malta. When informed of the deed, Prime Minister Winston Churchill quips, “Who said a *Wasp* couldn’t sting twice!”

May 10

AVIATION: Off the Gold Coast of Africa, the carrier *Ranger* launches 68 army Curtiss P-40s, which land at Accra.

May 12

AVIATION: At High Wycombe, England, the advanced echelon of the Eighth Air Force, numbering 39 officers and 348 enlisted men, deploys and makes preparations for forthcoming arrivals.

May 13

NAVAL: In Washington, D.C., the Bureau of Naval Personnel is the new name chosen for the Bureau of Navigation.

May 14

AVIATION: At High Wycombe, England, the 15th Bombardment Squadron (Light), flying Douglas A-20 Havocs, is one of the first American combat units to arrive.

MILITARY: In Washington, D.C., President Franklin D. Roosevelt signs the Women's Auxiliary Army Corps (WAAC) Act into law, to permit large numbers of women to contribute directly to the war effort.

May 15

AVIATION: At Alameda, California, Douglas R4Ds of VR-2 commence trans-oceanic flights to Hawaii, initiating the first air transport service in the Pacific Theater of Operations (PTO).

MILITARY: At Fort Benning, Georgia, the Parachute School commences training apart from other Infantry School endeavors.

- To speed up the transmission of letters sent to troops, the Army Postal Service originates the concept of "V-Mail," whereby correspondence is photographed on reels of film, sent to a processing station in the theater, then developed, cut, and delivered to the requisite party.

May 16

MILITARY: In Washington D.C., Oveta Culp Hobby, wife of former Texas governor William P. Hobby, is sworn in as the director of the Women's Army Auxiliary Corps.

May 17

AVIATION: At Wright Field, Ohio, Igor Sikorsky delivers the prototype XR-4 helicopter to army authorities for testing; it is quickly accepted into service as the R-4 Hoverfly.

May 18

AVIATION: In the Pacific, the Seventh Air Force begins receiving shipments of new B-17Es in anticipation of a Japanese attack against Midway Island.

May 20

AVIATION: At Cherry Point, North Carolina, Cunningham Field is commissioned and enlarged to where it can support a Marine Air Group.

- Rear Admiral John S. McCain is appointed commander air force, South Pacific, in anticipation of the Guadalcanal campaign.

MILITARY: True to form, Lieutenant General Joseph W. Stilwell and his small party walk out of the Burmese jungle and into the safety of the Allied line at Imphal, India. He concedes that the Allies have taken "a helluva beating."

May 21

NAVAL: Rear Admiral Robert A. Theobald is appointed commander of the new North Pacific Force, tasked with covering all operations in Alaskan waters.

**Stilwell, Joseph W. (1883–1946)***Army general*

Joseph Warren Stilwell was born in Palatka, Florida, on March 19, 1883, and raised in Yonkers, New York. Listless as a youth but displaying a facility for foreign languages, he passed through the U.S. Military Academy in 1904 as a second lieutenant of infantry and spent the next 13 years alternating between garrison duty in the Philippines and teaching assignments back at West Point. During World War I, Stilwell served as an intelligence officer in the IV Corps, winning a Distinguished Service Cross and promotion to colonel. In 1919 he volunteered to study Chinese at the University of California and the following year he served as an intelligence officer at Peking (Beijing). Here Stilwell developed a profound respect and affection for the Chinese people. After stints at the Infantry School, Fort Benning, and the Command and General Staff School, he returned to China for a second tour in 1926 and

came to the attention of Colonel George C. Marshall, who appointed him chief of staff to U.S. troops in China. In 1929 Stilwell returned to the Infantry School as a drillmaster, at which he excelled, but his acerbic disposition garnered him the nickname “Vinegar Joe.” He rose to brigadier general in July 1940 and so distinguished himself in the famous Louisiana war games of that year that he gained promotion to major general. He was regarded as one of the army’s most promising corps commanders.

After the United States entered World War II, Marshall, now army chief of staff, appointed Stilwell as head of all U.S. forces in the China-Burma-India (CBI) theater with a rank of lieutenant general. This placed him in one of the most remote theaters, at the end of a 10,000-mile long supply route, and at the bottom of military priorities. Nonetheless, Stilwell accompa-

May 23

MARINES: At New River, North Carolina, the Training Center, Fleet Marine Force, is founded and eventually hosts numerous schools and training programs.

May 25

NAVAL: Off Martinique, French West Indies, *U-156* fires a torpedo that strikes the destroyer *Blakeley*, killing six sailors and blowing off 60 feet of its bow. Fortunately, the destroyer survives, is repaired, and lives to fight again.

- Japanese and American flotillas begin maneuvering and converging upon Midway Island in the Pacific, setting the stage for a decisive naval showdown. Unknown to the Japanese, the Americans have cracked their military codes and are well-prepared to battle them.

MARINES: On Midway Island, C and D companies, 2nd Raider Battalion, arrive to bolster the garrison, along with a 37mm antiaircraft battery belonging to the 3rd Defense Battalion.

nied his men out of Burma on foot in the face of surging Japanese forces, then set about rebuilding his Chinese divisions to drive them back. This action brought him in direct conflict with Generalissimo Chiang Kai-shek, who wished to preserve his strength for a postwar confrontation with Chinese communists. Stilwell also enjoyed poor relations with General Claire L. Chennault of Flying Tigers fame, whom Stilwell regarded as a grandstander and a puppet of Chiang. However, Stilwell had a job to do and he did it well, given the slender resources available to him. By 1944 he had made excellent progress, driving the Japanese from northern Burma and reopening the Ledo Road into southern China. Chiang, however, was displeased by Stilwell's perceived insubordination and lack of respect. In the fall of 1944 Marshall reluctantly replaced him with General Daniel J. Sultan. Stilwell subsequently served on Okinawa under General Simon B. Buckner and succeeded to command when the latter

"Vinegar Joe" Stilwell (right) with Ranger expert Frank Merrill (*National Archives and Records Administration*)

was killed. Following a stint as governor of the Ryukyu Islands, Stilwell returned to the United States, and he died in San Francisco on October 12, 1946. A fine combat commander, his blunt, tactless disposition rendered him unsuited for the nuances of coalition warfare.

May 26

AVIATION: Over Hawthorne, California, the prototype Northrop XP-61 flies for the first time; this is the first American aircraft designed from the ground up as a night fighter and goes into service at the P-61 Black Widow.

MARINES: On Midway Island, final elements of the 3rd Defense Battalion, as well as 16 Douglas Dauntless dive bombers and seven Grumman F4F Wildcat fighters of Marine Air Group 22 arrives to strengthen defenses.

TECHNOLOGY: At Naval Air Station Anacostia, Washington D.C., a Brewster F2A-3 Buffalo, fitted with five British solid-fuel rocket motors, roars off the tarmac, experiencing a 49 percent reduction in takeoff roll. Success here demonstrates the viability of jet-assisted takeoffs.

May 27

MILITARY: On New Caledonia, Major General Alexander M. Patch organizes the new Americal Division from National Guard regiments hailing from Illinois,

Massachusetts, and North Dakota. This is also the only infantry division with a name instead of a numerical designation.

May 28

MILITARY: In light of anticipated military action in the Solomon Islands, troops and engineers from Efate occupy Espiritu Santo, New Hebrides, to construct badly needed airfields.

June 1

AVIATION: Marine Air Group 25 organizes at Camp Kearney, California.

NAVAL: The navy and Marine Corps reverse a decades-old policy by formally recruiting African Americans for the war effort. The Marines remain somewhat recalcitrant and outfit only a battalion of 900 men.

June 4–6

AVIATION: Nine Boeing B-17s from the Seventh Air Force participate in aerial bombardment of the Japanese fleet at Midway, although with indifferent results. A handful of Martin B-26 Marauders, rigged as torpedo planes, also fares badly. American naval forces under Rear Admiral Frank J. Fletcher prevail in the Battle of Midway, which is waged entirely with carrier aircraft and effectively halts Japanese expansion in the Pacific. Vice Admiral Chuichi Nagumo loses 17 ships, including the crack carriers *Kaga*, *Akagi*, *Hiryu*, and *Soryu*, 275 airplanes with scores of irreplaceable pilots, the heavy cruiser *Mikuma*, and 4,800 men. American losses amount to 300 casualties and two ships, the carrier *Yorktown* and the destroyer *Hammann*, sunk, along with 132 aircraft. The Japanese navy, moreover, never recovers from the loss of so many highly trained pilots. Midway proves a strategic turning point in the Pacific for hereafter the United States assumes the offensive and does not relinquish it until the war is won.

- A Marine Corps SBD Dauntless flown by Captain Richard E. Fleming (VMSB-241) dives directly onto the cruiser *Mikuma*, smashing a turret—he wins the Medal of Honor posthumously.
- A handful of new Grumman TBF Avenger torpedo bombers debut at Midway with Torpedo Squadron 8, although most are shot down. Nevertheless, they become the most important American torpedo bomber of the war.

June 6

AVIATION: The army begins acquiring light civilian aircraft to serve as reconnaissance and artillery spotters (Grasshoppers); most are based on the popular Piper Cub design.

- Major General Clarence L. Tinker becomes the first Army Air Force general killed in combat when his LB-30 fails to return from a mission over Wake Island.

June 7

MILITARY: A Japanese task force invades and occupies the Western Aleutians, Alaska, landing 1,800 men on the islands of Attu and Kiska. This operation is intended as a strategic diversion for the Midway campaign.

June 9

AVIATION: In Washington, D.C., newly promoted Brigadier General James H. Doolittle is awarded the Medal of Honor by President Franklin D. Roosevelt for his role in the recent raid on Tokyo, Japan.

The crew of the carrier USS *Yorktown* fights to save their ship. She was hit by three bombs from Japanese aircraft of the carrier *Hiryu*. On June 4, 1942, the *Yorktown* was abandoned and later sank. (*National Archives*)

- A B-26 Marauder carrying Lieutenant Colonel Lyndon B. Johnson—the future 36th president of the United States—experiences engine trouble over Lae, New Guinea, and is forced to turn back. He nonetheless wins a Silver Star for his participation.

June 10

TECHNOLOGY: At Naval Air Station Quonset Point, Rhode Island, Project Sail gets underway to develop the first magnetic airborne detectors (MAD) for anti-submarine aircraft. This device detects anomalies in the Earth's magnetic field, caused by large masses of submerged metal. Results prove encouraging and 200 sets are ordered for Army B-18 Bolo bombers.

June 11

AVIATION: A mixed force of B-24 Liberators and B-17 Flying Fortresses belonging to the Eleventh Air Force strike the Japanese-held island of Kiska, Aleutian Islands, for the first time.

MILITARY: The United States and the Soviet Union sign an extensive Lend-Lease agreement that mandates the shipment of American-built tanks, trucks, and air-

planes to Russia. It also stipulates the opening of a second front by the Western Allies.

June 12

AVIATION: At Fayid, Egypt, Lieutenant Colonel Harry A. Halveson leads a detachment of 13 Army Air Force B-24 Liberators on a secret air raid (HALPRO) against Axis oil installations at Ploesti, Romania. The raid inflicts little damage but is a harbinger of things to come.

June 13

MILITARY: William Donovan is appointed head of the new Office of Strategic Services (OSS), a precursor to the Central Intelligence Agency.

June 13–17

MILITARY: German submarines land eight agents on the coast of Long Island, who are promptly rounded up, subjected to trial by military tribunal, and executed as spies.

June 14

MILITARY: At Bridgeport, Connecticut, the General Electric factory begins construction of the M1 2.75-inch rocket launcher, famously known by its nickname, the bazooka.

MARINES: Advanced elements of the 1st Marine Division begin arriving in New Zealand.

June 15

MARINES: At Parris Island, South Carolina, the 11th Defense Battalion is organized.

TECHNOLOGY: At Naval Air Station Lakehurst, New Jersey, the K-2 airship outfitted with long range navigation equipment (LORAN) successfully passes its first test from a distance of 75 miles away. It homed in on the beacon and rode directly toward the middle of the hangar.

June 16

AVIATION: In recognition of their utility as antisubmarine craft, Congress authorizes the purchase of 200 lighter-than-air craft.

MILITARY: At Camp Hale, Colorado, the First Special Service Force is organized when U.S. and Canadian Light Infantry forces are merged into a single unit. In recognition of their special status, they are granted collar insignia in the form of crossed arrows instead of a crossed rifle; they gain infamy as the “Devil’s Brigade.”

MARINES: At New River, North Carolina, the 3rd Marines is reactivated.

June 17

MILITARY: The servicemen’s magazine *Yank* commences publication and is distributed among the troops; it remains in print until 1945. It soon becomes an iconic publication for GIs of this war.

June 18

AVIATION: In London, England, Major General Carl A. Spaatz takes charge of the still-forming Eighth Air Force; presently no less than 85 airfields are being enlarged to handle B-17 and B-24 bombers.

NAVAL: Bernard Robinson becomes the first African American commissioned an officer in the navy when he becomes an ensign in the U.S. Naval Reserve. Ulti-

mately, 150,000 blacks serve in the war, although the majority are not allowed to go to sea.

- Off Amchitka Island, Aleutians, the submarine S-27 runs aground while reconnoitering for Japanese activity and is scuttled; the crew is subsequently rescued by PBY Catalinas.

June 19–25

MILITARY: The Second Washington Conference takes place in Washington, D.C., between President Franklin D. Roosevelt and Prime Minister Winston Churchill. At this time Army Chief of Staff George C. Marshall pushed for an invasion of northern France instead of North Africa, but the British strongly oppose the concept and it is dropped. North Africa thus becomes the principal Allied objective for 1942.

- At Carrickfergus, Northern Ireland, Major William O. Darby begins organizing the 1st Ranger Battalion from volunteers before heading them off to the British Commando School in Scotland.

NAVAL: Vice Admiral Robert L. Ghormley is appointed commander of the new South Pacific Area and its South Pacific Force.

June 20

AVIATION: At Midway Island, Pacific theater, Major General Willis H. Hales is appointed commander of the Seventh Air Force to replace Major General Clarence L. Tinker.

June 21

AVIATION: In London, England, American and British representatives conclude the Arnold-Portal-Towers Agreement, committing the United States to a gradual buildup of air power in Europe under the code name Operation Bolero.

June 22

MILITARY: In Washington, D.C., the War Department assigns the handful of units present in Burma the grandiose title of “American Army Forces in China, Burma, and India.” This is the genesis of what is hoped will become a major American effort in Southeast Asia, which remains a major British theater.

NAVAL: A Japanese submarine shells Fort Stevens Military Reservation at the mouth of the Columbia River, Oregon; this represents the first attack on a continental American military installation since the War of 1812.

June 24

MILITARY: Major General James E. Chaney, commanding general of the European Theater of Operations (ETO), is replaced by Major General Dwight D. Eisenhower; while a West Point graduate, Eisenhower, unlike many contemporaries, did not see combat service in World War I.

- In order to funnel assistance to the Soviet Union, then grappling with a mammoth German invasion, the United States Military Iranian Mission is founded; it is subsequently renamed the Persian Gulf Service Command.

June 25

AVIATION: Major General Lewis Brereton, faced with a new crisis in the Middle East, is ordered from India with all available heavy bombers. Meanwhile, command of the embryonic Tenth Air Force reverts to Brigadier General Earl L. Naiden.

MILITARY: General Mark W. Clark arrives in England as chief of staff for U.S. ground forces and commander of II Corps.

June 26

DIPLOMACY: In an echo of World War I, the German government under Adolf Hitler announces a resumption of unrestricted submarine warfare off the American coast.

MARINES: In New Zealand, the 1st Marine Division is put on alert for an immediate transfer to the Guadalcanal-Tulagi region of the southern Solomon Islands. A Marine Corps legend is about to be written in blood.

June 28

MILITARY: The first American land assault in the South Pacific takes place as commandos raid the Japanese-held island of Salamuna, New Guinea.

June 29

AVIATION: Having inspected Igor Sikorsky's VS-300 helicopter, Lieutenant Commander Frank A. Erickson recommends that it be obtained for antisubmarine work in carrying out life-saving duties.

June 30

AVIATION: Off Bermuda, a Martin PBM Mariner of VP-74 attacks and sinks *U-158* with depth charges.

MARINES: At this stage of the war, Marine Corps manpower registers at 7,138 officers and 135,475 enlisted men.

July 1

AVIATION: At Polebrook, England, Boeing B-17s from the 97th Bombardment Group land after an uneventful Atlantic crossing; within a month the entire group has assembled here.

NAVAL: In an unforeseen tragedy, the submarine *Sturgeon* sinks the Japanese transport *Montevideo Maru* outside Manila Bay, unaware that it is transporting 1,050 Allied prisoners to Hainan Island, China.

July 2

MILITARY: In Washington, D.C., the Joint Chiefs of Staff instructs General Douglas MacArthur to prepare for an immediate offensive up around the New Britain–New Ireland–New Guinea Islands. The boundary of commands is also prescribed with the South Pacific going to the navy while the Southwest Pacific becomes Army responsibility.

July 3

TECHNOLOGY: At Goldlake, California, a PB-5A successfully fires a retro-rocket (backward firing) antisubmarine weapon for the first time. The device was designed at the California Institute of Technology and is issued to frontline units early in 1943.

July 4

AVIATION: Army Air Force pilots of the 15th Bombardment Squadron accompany Royal Air Force Boston bombers on their first raid over occupied Europe. The six crews man 12 Douglas A-20 Havocs while attacking German airfields in Holland; one American airman is lost and another become the first American taken pris-

oner in Europe. Captain Charles C. Kegelman, squadron commander, nurses his crippled Havoc back to England and receives the Distinguished Service Cross.

- In China, the American Volunteer Group (AVG), famously known as the “Flying Tigers,” is disbanded once the China Air Task Force (CATF) is activated under Major General Claire L. Chennault. Though nominally attributed with downing 299 Japanese aircraft, modern scholarship has reduced the Tiger’s tally to roughly 100; no mean feat considering excellent state of Japanese military aviation at the time.

July 6

AVIATION: M-8 4.5-inch air-to-ground rockets are test-fired for the first time by a Curtiss P-40 Warhawk.

July 7

AVIATION: Off Cherry Point, North Carolina, a Douglas B-18 Bolo of the 369th Bombardment Squadron successfully attacks and sinks a German U-boat, the first such victory by an AAF aircraft.

NAVY: A transport fleet under Rear Admiral Richmond K. Turner and Task Force 17 under Rear Admiral Frank J. Fletcher are earmarked for an upcoming offensive against the Solomon Islands. In light of the recent victory at Midway, the Americans are determined to seize the strategic offensive in the Pacific.

MARINES: The Joint Chiefs of Staff approves an offensive involving the 1st Marine Division under Major General Alexander A. Vandegrift, then en route across the Pacific. Their objective is to seize Tulagi, Gavutu, Tanambogo, and Guadalcanal in the Solomon Islands and interrupt Japanese airfield construction there.

July 10

AVIATION: The prototype Douglas XA-26 light bomber debuts over El Segundo, California, which goes into production as the A-26 Invader.

- In a major intelligence coup, a Consolidated PBY observes a nearly intact Mitsubishi A6M3 Zero fighter that has crashed in a bog on the Aleutian Islands; the craft is subsequently recovered and restored, revealing its secrets to Allied aircraft designers. One outcome of this information is Grumman’s formidable F6F Hellcat fighter.

MARINES: El Centro, California, is the site of the newest Marine Corps Air Station.

July 11

MARINES: In New Zealand, the last remaining elements of the 1st Marine Division arrive by ship.

July 13

NAVAL: Off Panama, *U-153* succumbs to a combined attack by army aircraft, the subchaser *PC 458*, and the destroyer *Landowne*.

July 14

MARINES: At New River, North Carolina, the 21st Marines are organized as an infantry regiment.

- Edenton, North Carolina, is the site of the new Marine Corps Glider Base.

July 15

NAVAL: Off North Carolina, the freighter *Unicoi* rams and damages the *U-576*, which is finished off by a Vought OS2U Kingfisher of VS-9.

MARINES: In the New Hebrides, the first echelon of the 4th Defense Battalion deploys on Espiritu Santo to bolster its defenses.

July 18

NAVAL: Rear Admiral Richmond K. Turner, a pugnacious fighter, assumes command of the new Amphibious Force, South Pacific.

July 20

MILITARY: At Fort Des Moines, Iowa, the first women candidates begin attending Officer Candidate School (OCS) in order to provide leadership for the still-forming Women's Army Auxiliary Corps (WAAC).

- The Legion of Merit medal is authorized and the first is posthumously awarded to Captain Ralph D. Praeger, who fought conspicuously in the Philippines.

NAVAL: In Washington, D.C., Admiral William D. Leahy is recalled to active duty to serve as President Franklin D. Roosevelt's Chief of Staff; he also serves as chairman of the Joint chiefs of staff and is a major player in the formulation of Allied strategy.

MARINES: At New River, North Carolina, the 23rd Marines is organized as an infantry regiment.

July 21

AVIATION: In England, General Dwight D. Eisenhower tasks the Eighth Air Force and the Royal Air Force with achieving air superiority over western Europe by April 1, 1943, to facilitate a cross-channel invasion there.

MILITARY: In an ominous development, a large Japanese force lands at Buna on the northern coast of New Guinea and begins pushing south across the Owen Stanley Mountains toward Port Moresby. If captured, Port Moresby could serve as a springboard for invading Australia.

MARINES: The United States begins girding for an amphibious counteroffensive by posting the 1st Base Depot on New Zealand for logistical support.

July 22

MILITARY: The government embarks on a policy of strict gasoline rationing; it is gradually extended to meat, sugar, and rubber tires.

- The army's existing corps areas are redesignated "Corps Service Commands" because these units are already serving as tactical commands.

July 22–25

AVIATION: At New Caledonia, Pacific theater, four B-17 squadrons belonging to the 11th Bombardment Group deploy from Hawaii; this is the first heavy bomber group in the region.

July 26

AVIATION: At Auckland, New Zealand, Major General Millard F. Harmon arrives to take charge of the newly created U.S. Army Forces in the South Pacific (USAFIPA); he moves quickly to transfer his headquarters to Noumea, New Guinea, as preparations for a Solomon Islands offensive develop.

July 30

NAVAL: President Franklin D. Roosevelt establishes the Women Accepted for Volunteer Emergency Service (WAVES), under Lieutenant Commander Mildred H. McAfee. By war's end, 86,291 women are serving their country.

- The submarine *Grunion* under Lieutenant Commander Mannert L. Abele makes its last radio transmission off the Aleutian Islands, then vanishes. On October 3, 2008, the wreck is discovered by a survey crew employing side scanning sonar; they had been hired by Abele's three sons.

July 31

MILITARY: In Washington, D.C., the Transportation Corps is established under Major General Charles P. Gross; by war's end, it employs 23,356 officers and 243,115 enlisted men. It also gains permanent stature in 1950.

August

AVIATION: F4F Wildcats belonging to Marine Observation Squadron 251 (VMO-251) are the first aircraft to land at the new airstrip on Espiritu Santo, New Hebrides.

August 1

MARINES: At San Diego, California, the 12th Defense Battalion begins organizing.

August 3

AVIATION: In Brisbane, Australia, Lieutenant General George H. Brett, commanding the Fifth Air Force, is recalled for reassignment.

August 4

NAVAL: Off Espiritu Santo, New Hebrides, the destroyer *Tucker* wanders into an unmarked minefield in the Second Channel, strikes a mine, and sinks with a loss of six men.

August 7

AVIATION: Captain Harl Pease, Jr., posthumously receives a Medal of Honor for leading B-17s of the 93rd Squadron, 19th Bomb Group, on a strike against Rabaul, New Britain, from which he did not return. Pease had earlier evacuated General Douglas MacArthur from Mindanao, Philippines, to Australia.

MILITARY: The 1st Infantry Division is the first unit of its kind to be deployed in England under Major General Terry de la Mesa Allen. He is seconded by Brigadier General Theodore Roosevelt, Jr., son of the late president.

NAVAL: Admiral Richmond K. Turner directs "Operation Watchtower," the amphibious invasion of Guadalcanal, Florida, Tulagi, Gavutu, and Tanambogo islands in the lower Solomon chain. For the time being they are supported by the guns and aircraft of Admiral Frank J. Fletcher's fleet.

MARINES: The 1st Marine Division under Major General Alexander A. Vandegrift storms ashore at Guadalcanal, Solomon Islands, in order to deny the Japanese an airstrip they are constructing there. Resistance is light and the position is quickly captured. Guadalcanal also heralds the first American offensive of the Pacific War and intense fighting continues until February 1943.

August 8

NAVAL: Off Guadalcanal, intense Japanese air strikes damage two destroyers and two transports, causing one to be scuttled.

August 9

NAVAL: The Battle of Savo Island erupts off Guadalcanal as Japanese heavy and light cruisers, screened by destroyers, under Vice Admiral Gunichi Mikawa slip unnoticed into Ironbottom Sound and attack an American-Australian force in a

swirling night action. American cruisers *Astoria*, *Quincy*, and *Vincennes* are all sunk, along with the Australian cruiser *Canberra*, which is scuttled. Fortunately for the Allies, Mikawa loses his nerve at the last moment and does not swoop down upon the helpless transports. The sheer magnitude of the Japanese victory impels American carriers and vessels to depart immediately, leaving the marines to fend for themselves.

- The destroyer *Jarvis*, heavily damaged during the Battle of Savo Island, is attacked by Japanese aircraft while steaming to Australia for repairs and sinks with all hands.

August 10

NAVAL: Of Kavieng, New Ireland, the Japanese light cruiser *Kako*, one of the victors of Savo Island, is torpedoed and sunk by the antiquated submarine *S-44*. This is the first major warship destroyed by an American submersible.

August 12

MARINES: Lieutenant Colonel Frank Goettge, an intelligence officer, leads a 25-man marine patrol down the Mantanikau River after receiving reports that some Japanese wish to surrender; the patrol is ambushed and only three men return safely to camp.

TECHNOLOGY: American technical prowess is clearly evident over Chesapeake Bay when the light cruiser *Cleveland*, armed with new radar-activated VT proximity fuses, shoots down three target drones in rapid succession. Once deployed, this ammunition gives American warships a decided advantage in fending off aerial attacks.

August 13

AVIATION: At Santa Barbara, California, a Marine Corps Air Station arises.

August 14

AVIATION: Off the coast of Iceland, a pair of P-40s flown by Lieutenants Joseph D. Shaffer and Elza E. Shahan share credit for downing a four-engined Fw-200 Kondor bomber; this is the first victory by the Army Air Force in the European Theater of Operations (ETO).

NAVAL: Near Rossel Island in the Pacific, the submarine *S-39* under Lieutenant Commander Francis E. Brown runs aground and has to be scuttled; the crew is rescued by an Australian vessel.

August 15

AVIATION: To better administer aerial assets, Marine Aircraft Wings, Pacific, is created at San Diego, California.

- On Guadalcanal, the navy aviation support unit CUB One deploys as the initial maintenance echelon for Marine Corps aircraft.

August 16

AVIATION: Airship L-8 of Blimp Squadron ZP-32 floats back into Dale City, California, after an extended cruise of the California coast, but its two-man crew is mysteriously missing.

MILITARY: At Camp Claiborne, Louisiana, the 101st Airborne Division ("Screaming Eagles") is activated under Major General William C. Lee.

August 17

AVIATION: A force of 17 Boeing B-17 bombers under Colonel Frank A. Armstrong, 97th Bomb Group, stages the first large air raid in Europe by hitting the marshaling yards at Rouen, France. It proves a deceptively easy mission for German resistance proves negligible and all aircraft return without damage. Sergeant Kent R. West also downs an Fw-190 German fighter, becoming the first Eighth Air Force gunner to score a kill.

MARINES: The large transport submarines *Nautilus* and *Argonaut* disgorge Lieutenant Colonel Evan F. Carlson's 2nd Raider Battalion of marines on Makin Island in the Gilberts. In a quick action, they eliminate the 83-man Japanese garrison and destroy their installations; the raiders withdraw by submarine on the following day. Marine losses are 18 killed, 16 wounded, and 12 missing; Major James Roosevelt, the president's son, is present during the affair. This victory has the net effect of convincing the Japanese to increase and fortify their island garrisons.

August 18

AVIATION: The captured Japanese airfield on Guadalcanal is finished by marines and christened Henderson Field after Major Lofton Henderson, a marine aviator who was killed at Midway; possession of this airfield becomes the locus of intense combat over the next five months.

MARINES: At New River, North Carolina, the 51st Defense Battalion is the first African-American marine unit organized and activated.

August 19

AVIATION: While Allied forces storm ashore at Dieppe, France, 22B-17s from the Eighth Air Force drop 30 tons of bombs on German airfields at Abbeville and Drucat as a diversion.

MILITARY: At Dieppe, France, 50 American commandos under Colonel Lucien K. Truscott, go ashore to assist British and Canadian troops during a major raid. They are the first Americans to fight in Europe since 1918.

MARINES: On Guadalcanal, Japanese forces holding the villages of Matanikau and Kokumbona are attacked and dislodged by men of the 5th Marines.

August 20

AVIATION: At Bolling Field, Washington, D.C., the new Twelfth Air Force is activated before relocating to North Africa and the Mediterranean. There they specialize in ground-support missions with light and medium attack bombers.

- In a bid to bolster air defenses on Guadalcanal, the escort carrier *Long Island* launches 19 F4F Wildcat fighters and 12 Douglas SBD Dauntless dive bombers, all belonging to Marine Air Wing 23 (MAW-23), which land directly on Henderson Field.

August 21

AVIATION: In England, General Carl A. Spaatz is assigned Air Officer ETOUSA to insure that theater air forces are adequately represented at all operational planning meetings.

- In the skies over Guadalcanal, Captain John L. Smith, VMF-223, shoots down the first Japanese Zero lost to an island-based fighter.

MARINES: In their first bid to capture Henderson Field, 900 veteran Japanese troops of the Ichiki force attack the 1st Marines along the Tenaru River, who promptly envelop both flanks, almost completely wiping them out.

August 22

AVIATION: Off the Panama Canal Zone, aircraft of the Sixth Air Force bomb and sink a German U-boat, the AAF's second kill of the year.

- Five Bell P-400s (export version of the P-39 Airacobra) belonging to the 67th Fighter Squadron, are the first Army Air Force aircraft to deploy at Henderson Field, Guadalcanal.

NAVAL: In a savage little skirmish off Guadalcanal, the Japanese destroyer *Kawakaze* torpedoes the American destroyer *Blue*, killing nine crewmen and wounding 21; the vessel is subsequently scuttled.

August 23

NAVAL: A convoy escorted by heavy cruiser *Tuscaloosa* and destroyers *Rodman* and *Emmons* helps convey two Royal Air Force squadrons to Murmansk, Russia.

August 24

AVIATION: Marine fighters of VMF-223 participate in their first big scuffle with Japanese air forces over Guadalcanal; 16 bomber and fighters are shot down at a cost of four marines. The first Marine Corps ace of the war is Captain Marion E. Carl, who claims three Zeroes this day. Aviation forces at Henderson also become known locally as the Cactus Air Force.

NAVAL: Off Guadalcanal, the Battle of the Eastern Solomons unfolds as a Japanese flotilla makes a determined effort to reinforce the garrison there. They are intercepted by the carriers *Saratoga* and *Enterprise* under Rear Admiral Frank J. Fletcher, whose bombers sink the carrier *Ryujo* and destroyer *Mutsuki*; the *Enterprise* is subsequently hit by planes from the large carriers *Shokaku* and *Zuikaku*. The "Big E" is forced back to Pearl Harbor for repairs.

MARINES: General Holland M. Smith, having turned over Amphibious Force Atlantic Fleet to army officials, begins forming the Amphibious Training Force, Fleet Marine Force.

August 25–September 5

MILITARY: At Milne Bay, eastern New Guinea, the Japanese manage to land 1,500 soldiers, but repeated air strikes and attacks by Australian infantry convince them to evacuate their beachhead.

August 27–28

MARINES: The 1st Battalion, 5th Marines goes ashore at Kokumbona, then wages an inconclusive two-day battle with Japanese forces dug in along the Matanikau River.

August 28

AVIATION: In the Caribbean, a PBY Catalina of VP-92 assists Canadian corvette HMCS *Oakville* in sinking the *U-94*.

- Navy and marine SBD Dauntless dive bombers launched from Henderson Field, Guadalcanal, attack and sink a Japanese convoy bearing reinforcements

for that island; the destroyer *Asagiri* is sunk while *Shirakumo* and *Yugiri* are damaged.

NAVAL: Off Florida Island in the Solomons, Japanese submarine *I-123* is sunk by depth charges hurled from the minelayer *Gamble*.

August 30

AVIATION: Over Henderson Field, Captain John Smith of VMF-223 bags four Zeroes in one day, temporarily rendering him the leading Marine Corps ace.

MILITARY: As marines continue digging in on Guadalcanal, the Japanese Kawaguchi Brigade lands for another trial of strength.

NAVAL: Off Kukum Point, Guadalcanal, Japanese bombers attack and sink the high speed transport *Colhoun*, killing 51 crew members.

August 31

MEDICAL: In Bethesda, Maryland, the National Naval Medical Center is dedicated as a world-class medical facility with 2,000 beds.

NAVAL: The carrier *Saratoga*, steaming 260 miles southeast of Guadalcanal, takes a single torpedo from Japanese submarine *I-26* and is forced back to Pearl Harbor for repairs. American carrier aviation is stretched dangerously thin.

- Off Atka Island, the Aleutians, Japanese submarine *RO-61* is sunk by the destroyer *Reid*, in concert with PBV Catalinas from VP 42 and 43.

September 1

AVIATION: Vice Admiral Aubrey W. Fitch becomes the first officer appointed commander air force, Pacific Fleet.

MILITARY: In preparation for a counterattack against Japanese troops occupying Kiska, Aleutian Islands, a force of 4,500 army troops storms ashore at Adak, 250 miles distant, to prepare it as an advanced air base.

NAVAL: The 6th Naval Construction Battalion lands at Lunga Point, Guadalcanal, being the first formation of its kind committed to combat operations.

MARINES: At San Diego, California, the 12th Marines are reorganized and reactivated as an artillery regiment.

September 3

AVIATION: At Brisbane, Australia, Major General George C. Kenney arrives to take command of the Fifth Air Force, also receiving promotion to lieutenant general.

- Marine Air Wing 25, having begun deploying from Hawaii to New Caledonia, is destined to serve as the nucleus of the new South Pacific Combat Air Transport Command (SCAT), which functions until spring 1945.
- On Guadalcanal, Brigadier General Roy S. Geiger and the staff of the 1st Marine Air Wing touch down on Henderson Field in an R4D (DC-3) transport; Geiger is there to assume control of the air war over the island.
- A North American B-25 bomber swoops in low over Hanoi, dropping bombs on a Japanese aerodrome and inflicting considerable damage. This is the first American air raid over that city.

September 4

MARINES: Near Guadalcanal, Savo Island is gleaned for Japanese by two companies of the 1st Raider Battalion, but none are encountered.

Tending to a wounded soldier on Guadalcanal, a province of the Solomon Islands (*Library of Congress*)

September 5

AVIATION: In London, Major General Carl A. Spaatz successfully argues to Lieutenant General Dwight D. Eisenhower that Eighth Air Force operations over Europe should support Operation Torch in North Africa.

NAVAL: Off Lunga Point, Guadalcanal, the high-speed transports *Gregory* and *Little* are sunk by the Japanese destroyer *Yudachi*; ironically, the latter is assisted by a flare mistakenly dropped by a patrolling PBY Catalina.

September 6

AVIATION: Over Meaulte, France, Eighth Bomber Command suffers its first combat losses when two Boeing B-17s are shot down.

September 8

MARINES: On Guadalcanal, the combined 1st Raider Battalion and 1st Parachute Battalion conduct an amphibious raid against Tasimboko, mauling rear elements of the newly arrived Kawaguchi Force.

September 9

AVIATION: In Washington, D.C., General Henry H. Arnold reveals AWPD-42, the blue print for aerial warfare against the Axis, to General Marshall. It is approved by President Franklin D. Roosevelt within two months and is scheduled to be launched in 1943.

- A Yokosuka E14Y-1 floatplane, having been launched by the Japanese submarine *I-15*, drops bombs on a forest near Brookings, Oregon, starting a fire. This is the only air raid upon the continental United States in the war.

September 10–14

NAVAL: German U-boats enjoy considerable success hunting Allied merchant vessels in the North Atlantic and sink no less than 12 ships from Convoy ON-127, en route from North America to Great Britain. As in World War I, the U-boat scourge threatens to strangle the British Isles into submission.

September 11

NAVAL: In the South China Sea, Pharmacist's Mate First Class Wheeler B. Lipes successfully performs an appendectomy on Seaman First Class Darrell D. Rector while the submarine *Seadragon* is still submerged.

September 12

AVIATION: At Bushey Hall, England, the 4th Fighter Group is activated to provide long-range escorts for bombers of the Eighth Air Force. It is composed mainly of fighters pilots who saw prior service in the Royal Air Force's Eagle Squadrons.

September 12–13

MARINES: The Battle of Bloody Ridge, south of Henderson Field, unfolds as the 1st Raider Battalion and 1st Parachute Battalion repel repeated nighttime attacks by Major General Seikin Kawaguchi's 3,500-man brigade, who go into combat screaming "Marine, you die!" In the course of battle they are reinforced by the 2nd Battalion, 5th Marines, before the Japanese draw off with heavy losses.

September 13

MILITARY: Australian troops fend off a fierce Japanese offensive across the Stanley Mountains and finally halt the drive against Port Moresby only 30 miles from their objective.

September 14

AVIATION: A force of B-24 Liberators launches from Adak, Aleutians, to bomb Japanese positions on Kiska, 250 miles distant. Air raids continue through November until the onset of bad weather grounds all operations.

MARINES: Tutuila, Samoa, is bolstered by the arrival of the 3rd Marines.

September 15–16

NAVAL: Task Force 18, escorting a supply convoy to Guadalcanal, is set up by Japanese submarine *I-19*, whose torpedo spread strikes the battleship *North Carolina*, the destroyer *O'Brien*, and the carrier *Wasp*. Captain Forrest P. Sherman, a future chief of naval operations, scuttles the *Wasp* once fire spreads to the ammunition stocks; the vessel loses 193 killed and 366 wounded out of a total of 2,247 crewmen.

September 15–29

AVIATION: History is made at Amberly Field, Brisbane, Australia, when the 32nd Infantry Division is airlifted to New Guinea. Both military and civilian transports are utilized. The move is made to assist hard-pressed Australian land forces being pushed back toward Port Moresby by a Japanese offensive. All told, it is a stunning display of modern air power's tactical flexibility by Lieutenant General George C. Kenney.

September 16

MARINES: At Camp Elliott, California, the 3rd Marine Division is activated while the 3rd Parachute Battalion is also organized in Southern California.

September 17

MILITARY: Brigadier General Leslie R. Groves, an engineering officer, gains appointment as director of the top-secret “Manhattan Project,” tasked with building the world’s first atomic bomb.

September 18

MARINES: At Guadalcanal, the 7th Marines come ashore and rejoin the 1st Marine Division while the worn-out 1st Parachute Battalion ships out for a refit.

September 19

MARINES: At Fort Worth, Texas, a glider training base is established at Marine Corps Air Station, Eagle Mountain Lake.

September 20

MARINES: On American Samoa, the 3rd Raider Battalion begins organizing.

September 21

AVIATION: In Renton, Washington, Boeing’s giant XB-29 prototype flies for the first time, and it immediately goes into production as the famous B-29 Superfortress. This is the most technologically advanced bomber in the world and features such novel advances as powered gun turrets and a pressurized fuselage for operations at high altitude. By war’s end 2,132 B-29s have been delivered and serve in 21 bomb groups.

September 23

AVIATION: In England, Brigadier General James H. Doolittle assumes control of the Twelfth Air Force.

September 23–27

MARINES: On Guadalcanal, the Second Battle of Matanikau erupts after the 1st Battalion, 7th Marines makes an amphibious landing behind enemy line and finds itself trapped there; a fighting withdrawal is successfully organized by Lieutenant Colonel Lewis B. “Chesty” Puller.

September 24

AVIATION: At Mojave, California, a new Marine Air Station is organized.

MILITARY: At Rockhampton, Australia, Major General Robert L. Eichelberger initiates the first Army command post in the Pacific Theater of Operations (PTO). He receives promotion to lieutenant general in charge of I Corps, consisting of the 32nd and 41st Infantry Divisions.

September 25

AVIATION: Japanese forces on Kiska, Aleutian Islands, are attacked by aircraft belong to the Eleventh Air Force and Royal Canadian Air Force.

MARINES: At Guantánamo Bay, Cuba, the 13th Defense Battalion is created.

September 27

NAVAL: In the South Atlantic, the armed merchantman *Stephen Hopkins* and German auxiliary cruiser *Stier* trade cannon shots, sinking each other. Lieutenant

Kenneth W. Willet, commanding the Armed Guard detachment, wins the Navy Cross posthumously.

September 29

AVIATION: In England, veteran volunteers of the America Eagle Squadron transfer to the new 4th Fighter Group to stiffen its cadre.

October 1

MARINES: In San Diego, California, General Holland M. Smith assumes command of headquarters, Amphibious Corps, Pacific Fleet. The I Marine Amphibious Corps is also organized under Major General Clayton B. Vogel.

October 2

AVIATION: At Wright Field, Ohio, Major J. G. Kearby enters an altitude chamber simulating 60,200 feet to check a new pressure suit.

- The Bell XP-59, America's first jet fighter, flies for the first time at Muroc Army Base, California, with chief test pilot Robert Stanley at the controls. The next day Colonel Lawrence C. Craigie goes aloft, becoming the first military officer to pilot a jet aircraft.

October 3

MILITARY: General Douglas A. MacArthur awards the Silver Star to war correspondent Verne Haugland, after he bailed out of an army aircraft over New Guinea and marched 43 days through dense jungle to return to American lines; he is the first civilian so honored.

October 5

AVIATION: Off Iceland, *U-582* is sent to the bottom by a PBY Catalina belonging to VP-73.

- Dive bombers from the carrier *Hornet* strike at Japanese vessels anchored at Bougainville in the Solomons, damaging two destroyers and seaplane carriers.
- Over Indispensable Straits, Solomon Island, a PBY Catalina depth charges and sinks Japanese submarine *I-22*; the aircraft in question belongs to the Commander Aircraft South Pacific.

October 7–9

MARINES: The Third Battle of the Matanikau erupts on Guadalcanal as all three battalion of the 7th Marines cross the river and destroy a Japanese blocking force while the 5th Marine and the 1st Raider Battalions wipe out an enemy company near the river's mouth.

October 7–24

MILITARY: The army commences its first offensive action in the Pacific theater as men of the 2nd Battalion, 126th Infantry, depart Port Moresby and begin hiking across the Owen Stanley Mountains of New Guinea.

October 11

MILITARY: The 29th (Blue and Gray) Division, a National Guard formation recruited in Virginia, Maryland, and the District of Columbia, arrives in England under Major General Leonard T. Gerow.

NAVAL: Off Guadalcanal, the Battle of Cape Esperance rages once a large Japanese force under Rear Admiral Aritomo Goto engages Task Force 64 under Admiral

Norman Scott. A confused battle in the dark ensues during which Goto dies and loses the heavy cruiser *Furutake* and destroyer *Fubuki*. Several American vessels are also heavily damaged and one, the destroyer *Duncan*, ends up scuttled.

October 12

AVIATION: At daylight, navy and marine dive bombers from Henderson Field, Guadalcanal, wade into the survivors of the Battle of Cape Esperance, sinking the destroyer *Natsugumo* and forcing the destroyer *Murakumo* to be scuttled.

October 13

AVIATION: Henderson Field, Guadalcanal, is shelled by two Japanese battleships after dark, during which half the Cactus Force and most stocks of aviation gasoline are destroyed.

MILITARY: On Guadalcanal, the 164th Infantry (Americal Division) under Colonel Brant E. Moore arrives to assist hard-pressed Marine Corps units near Henderson Field. Meanwhile, the depleted 1st Raider Battalion departs for a refit on New Caledonia.

October 14

AVIATION: Henderson Field, Guadalcanal, is subject to further naval bombardment by two Japanese cruisers.

October 15

AVIATION: Japanese aircraft launched from the carrier *Zuikaku* attack an American supply convoy near Guadalcanal, sinking the destroyer *Meredith* off San Cristobal Island, Solomons.

October 16

AVIATION: Over Henderson Field, Guadalcanal, a Japanese air raid is concluding just as Lieutenant Colonel Harold W. Bauer arrives from Efate with his VMF-212; he immediately pitches into the attackers, downing four Aichi D3A dive bombers, and wins the Medal of Honor. Thereafter, Marine Air Group 23 replaces Marine Air Wing 14 for logistical and administrative matters.

- Dive bombers launched from the carrier *Hornet* strike a Japanese supply convoy off San Cristobal Island, Solomons, claiming three cargo vessels.

NAVAL: In an operational first, the submarine *Thresher* lays mines at the entrance of Bangkok Harbor, Thailand.

October 18

NAVAL: Admiral Chester W. Nimitz, who seeks a more aggressive naval commander in the Solomons campaign, relieves Vice Admiral Robert L. Ghormley as commander South Pacific Area and South Pacific Force, and replaces him with Vice Admiral William F. "Bull" Halsey, Jr.; this is one of the Pacific war's most fateful decisions.

October 19

MILITARY: At Schofield Barracks, Hawaii, the 25th Infantry Division under Major General J. Lawton Collins is alerted for a pending transfer to Guadalcanal Island via New Caledonia.

NAVAL: The destroyer *O'Brien*, which had been damaged on September 15, sinks off Samoa while sailing home for repairs.

**Halsey, William F. (1882–1959)***Admiral*

William Frederick Halsey was born in Elizabeth, New Jersey, on October 30, 1882, the son of a navy captain. Like his father, Halsey attended the U.S. Naval Academy, graduated in 1904 a midshipman, and accompanied the Great White Fleet that toured the world in 1907–09. During World War I he commanded several destroyers and received the Navy Cross for good behavior. For the next two decades Halsey capably held down routine administrative and diplomatic positions. It was not until 1935 that he attended the naval flight school in Pensacola, Florida, and won his wings at the age of 52—ancient by pilot standards. Halsey subsequently transferred to the carrier service by taking the helm of the USS *Saratoga* and, by 1940, he was commanding Carrier Division two, consisting of the *Enterprise* and *Yorktown*, which he sailed to Hawaii. He had just finished delivering warplanes to remote Wake Island on December 7, 1941, and was headed back to Pearl Harbor when Japanese aerial forces struck with devastating results. The Americans lost eight battleships and several smaller warships, leaving Halsey's carriers the sole remaining strike force in the Pacific for months to come. Undaunted, he led the first American raids of the war by launching air strikes against Japanese installations in the Gilbert and Marshall Islands, and also Wake Island, in the early months of 1942. The following April he conducted one of aviation's most daunting actions by transporting 16 U.S. Army Air Force B-25 land-based bombers under Colonel James H. Doolittle by car-

rier on a one-way raid against Tokyo. Little material damage was inflicted, but the raid proved a major embarrassment to the Japanese and a badly need boost to morale at home.

Halsey missed the decisive carrier clashes at Coral Sea and Midway in the summer of 1942 owing to an acute skin rash, but, that fall, he assumed command of American naval forces in the South Pacific. He unhesitatingly tackled superior Japanese forces at Santa Cruz and Guadalcanal, decisively defeating them on November 12–15. An equally brilliant offensive up the Solomon Island chain followed, which resulted in the major Japanese garrisons at Truk and Rabaul being bypassed and isolated by air power. In October 1944, Halsey took charge of the Third Fleet and assisted the return of the army of General Douglas MacArthur to the Philippines. En route, he crushed the remains of Japanese sea power at the Battle of Leyte Gulf, although he was criticized for leaving the landing areas vulnerable to attack while chasing down the enemy. Halsey weathered further controversy by electing to sail his fleet through two destructive typhoons in December 1944 and June 1945, which severely damaged the American fleet. In September 1945 the Japanese delegation signed surrender terms onboard his flagship, the battleship USS *Missouri*. Halsey came home after the war and retired in April 1947. He died on Fisher's Island, New York, on October 16, 1959, one of America's most colorful and aggressive naval commanders.

A North American B-25C Mitchell. This medium bomber provided excellent service during World War II and was the most widely exported U.S. bomber. (*San Diego Aerospace Museum*)

October 20

NAVAL: Off San Cristobal, Solomon Islands, Japanese submarine *I-176* slams a torpedo into the heavy cruiser *Chester*, killing 11 and wounding 12; the ship hauls off to Espiritu Santo to make repairs.

October 21

AVIATION: B-24 Liberators of the Indian Air Task Force (IATF) strike north of the Yangtze and Yellow Rivers for the first time by dropping ordnance on the Lin-his coal mine facilities near Kuyeh, China.

October 22

AVIATION: The Westinghouse Electric Company begins construction of the first American jet engine, the X-19A, an axial-flow design. A working example emerges in five months.

- The Twelfth Air Force relocates its headquarters from London, England, to North Africa to participate in Operation Torch.

MILITARY: An American deputation led by Major General Mark W. Clark debarks from a submarine off the coast of Algeria, and paddles ashore to confer with French officials. The Allies will be invading the region soon and want assurances from the French that they will not resist.

October 23

AVIATION: B-25 Mitchell bombers provide close support to Field Marshal Bernard Montgomery's Eighth Army during his famous El Alamein offensive, which drives the Germans under Field Marshal Erwin Rommel from Egypt.

- Over Henderson Field, Guadalcanal, Captain Joseph M. Foss of VMF-121 downs four Zeroes in a single encounter.

MARINES: In Southern California, the 4th Marine Raider Battalion is organized.

October 23–26

MARINES: On Guadalcanal, the Battle of Henderson Field rages as the Japanese Sendai Division under Lieutenant General Harukichi Hyautake attacks 7th Marine positions south of the airstrip; the army's 164th Infantry arrives to reinforce them and a second attack the following night is also bloodily repulsed.

October 25

AVIATION: Around Guadalcanal, the Americans and Japanese swap air raids with the former, damaging the light cruiser *Yura* so badly that it is scuttled, while the latter sinks the tug *Seminole* and patrol vessel YP 284.

October 26–27

NAVAL: Japanese naval forces counterattack in the Battle of the Santa Cruz Islands, when a task force under Vice Admiral Chuichi Nagumo tangles with American forces under Rear Admiral Thomas C. Kinkaid. Carriers *Zuiho* and *Shokaku* are damaged, as are heavy cruiser *Chikuma* and destroyer *Terusuki*. However, Japanese aviators ravage the carrier *Hornet* so badly that it is scuttled and also damage the carrier *Enterprise* along with other warships. The submarine *I-122* also manages to sink the destroyer *Porter*. Nagumo wins a tactical victory but, because much of the U.S. Navy remains off Guadalcanal, this is a strategic American victory.

October 28

MARINES: At Nouméa, New Caledonia, the I Marine Amphibious Corps (I MAC) arrives to perform administrative functions for rear echelons of the South Pacific region.

October 29

AVIATION: Off San Cristobal, Solomon Island, Japanese submarine *I-172* is sunk by a PBV Catalina from VP-11.

November 1–3

MARINES: On Guadalcanal, the 5th Marines drive across the Matanikau River, and they eliminate Japanese defenders in the vicinity of Point Cruz. The 2nd Marine and 1st Battalion, 164th Infantry subsequently push beyond Point Cruz and secure a new defensive line.

November 2

MARINES: Defenders on Guadalcanal are bolstered by the arrival of army and Marine Corps 155mm cannon.

November 3–9

MARINES: On Guadalcanal, the 2nd Battalion 7th Marines stages an amphibious assault on Koli Point, east of the American line, while the 1st Battalion, 7th

Marines and 164th Infantry push outward, trapping Japanese forces between two fires and killing most of them.

November 4

MILITARY: American forces on Guadalcanal are reinforced by the 147th (Ohio) Infantry, which makes an amphibious landing at Lunga, then presses inland, backed by an artillery battery loaned by the Americal Division.

NAVAL: East of Iceland, the freighter *John H. B. Latrobe* is attacked by a German He-115 aircraft, but it skillfully evades all seven torpedoes dropped against it. Three of the vessels armed guard are hurt in strafing attacks.

MARINES: On Guadalcanal, marines keep up the pressure on Japanese forces when two companies of the 2nd Raider Battalion land at Aola Bay and are quickly reinforced by army and Seabee units.

November 5

AVIATION: Off Iceland, German submarine *U-408* is detected and sunk by a PBY Catalina of VP-84.

NAVAL: French general Henri-Honoré Giraud is evacuated from Vichy France by the British submarine *Seraph*, then under temporary command of U.S. Navy captain Jerauld Wright.

November 6

MILITARY: With a new offensive pending, General Douglas MacArthur begins advancing his headquarters to Port Moresby, New Guinea, to personally direct affairs.

MARINES: At Aola Bay, Guadalcanal, men of the 2nd Raider Battalion begin hunting down Japanese defenders that escaped the earlier encirclement at Koli Point.

November 7

MARINES: In Washington, D.C., Commandant Thomas Holcomb authorizes creation of the Marine Corps Women's Reserve; actual recruitment begins the following spring.

November 8

AVIATION: Supermarine Spitfires flown by the Army Air Force's 31st Fighter Group are launched from navy carriers south of Oran, Algeria, in support of landing operations there. They engage and shoot down three French fighters, which had attacked transport planes.

MILITARY: Operation Torch unfolds as Allied forces under Major General Dwight D. Eisenhower land 400,000 men on the coast of North Africa against light Vichy French resistance. The Eastern Task Force under Major General Charles Ryder has the honor of going ashore first.

- The 2nd Battalion, 509th Parachute Infantry, carried aloft by the 60th Troop Carrier Squadron, commits the first American airborne assault of the war by capturing an airfield near Oran, Algeria. The resistance they encounter from Vichy French units leads the Allies to break off diplomatic relations with that regime.

NAVAL: The naval component of Operation Torch is commanded by British admiral Sir Andrew B. Cunningham, seconded by U.S. Navy admiral H. Kent Hewitt. At Casablanca, Morocco, the battleship *Massachusetts* helps prevent the French

fleet from disrupting the landing there, and it damages the French battleship *Jean Bart* in a stand-up fight. Dive bombers from the carrier *Ranger* also sink the light cruiser *Primaguet* and four destroyers.

November 9

AVIATION: A number of Army Air Force Piper L-4 “Grasshoppers” (observation planes) are launched from carrier decks to assist ground operations.

November 10

AVIATION: Over 100 Curtiss P-40 fighters belonging to the 33rd Fighter Group are launched from the carriers *Chenango* and *Archer*, and they proceed to land at Port Lyautey, Morocco.

MILITARY: Operation Torch continues as the Center Task Force under Major General Lloyd Fredendall lands at Oran, Algeria.

November 11

MILITARY: Operation Torch concludes after the Western Task Force under Major General George S. Patton lands at Port Lyautey, Safi, and Casablanca, Morocco.

MARINES: Near Point Cruz, Guadalcanal, men of the 2nd and 8th Marines, and the 164th Infantry, fall back across the Mantanikau River in anticipation of a major Japanese counterattack. The 2nd Raider Battalion also skirmishes with enemy troops at Asamama.

November 12

AVIATION: In Egypt, the Ninth Air Force under Major General Lewis H. Brereton is created to replace the U.S. Middle East Air Force. Their initial task is to provide close air support to British troops advancing west out of Egypt.

- Over Henderson Field, Guadalcanal, Captain Joseph J. Foss bags a further three Japanese planes, making him the first American ace of the war to reach 20 kills.
- Lockheed P-38s of the 339th Fighter Squadron arrive at Henderson Field to support the defense of Guadalcanal.

MILITARY: Congress lowers the draft age of eligible males from 20 to 18, with deferments only to those needing to finish high school. College deferments are banned.

- The second major unit of the Americal Division arrives at Guadalcanal in the form of the 182nd Infantry under Colonel Daniel W. Hogan. By December the entire division will be operating on the island as fresh troops from the homeland replace those on New Caledonia.

NAVAL: The struggle for Guadalcanal reaches critical mass as transports under Admiral Richmond K. Turner unload men and supplies just as a huge Japanese convoy, laden with 11,000 reinforcements, enters the northern chain, or “Slot,” escorted by two battleships, a cruiser, and 11 destroyers. The Japanese are mounting a major effort to deliver the 38th Division to the beleaguered garrison on Guadalcanal. They are to be conveyed by Rear Admiral Raizo Tanaka’s destroyer division, known to Americans as the “Tokyo Express.” However, Admiral Hiroaki Abe’s raiding force of two battleships, one light cruiser, and 14 destroyers is sent on ahead to soften up the defenses of Henderson Field.

November 13

AVIATION: In waters north of American Samoa, a Vought OS2U Kingfisher rescues Captain Eddie Rickenbacker, Colonel Hans C. Anderson, and Private John F. Bartek from a raft; their aircraft had ditched in the Pacific 21 days earlier.

MILITARY: In Bristol, England, the V Corps headquarters arrives from Ireland and sets up new quarters at Clifton College. Their principal task for the time being is establishing training camps for the incoming 5th and 29th Divisions.

- In the Solomon Islands, Japanese forces begin building a new airstrip at Munda Point, New Georgia, which is much closer to the actual fighting at Guadalcanal than their current base at Rabaul, New Britain.

NAVAL: The first phase of the Battle of Guadalcanal begins as Rear Admiral Daniel J. Callaghan's force of two heavy cruisers, three light cruisers, and eight destroyers engages Vice Admiral Hiroaki Abe's force of two battleships, one cruiser, and 14 destroyers off Lunga Point. In a brief and bloody nighttime action, the light cruiser *Atlanta* and four destroyers are lost outright while the light cruiser *Juneau* is torpedoed by *I-26* and sinks in 20 seconds with only 10 survivors. Admiral Callaghan and Rear Admiral Norman Scott are both killed in action, the latter by friendly fire, as are all five Sullivan brothers, who perish on the *Juneau*. On the Japanese side, the battleship *Hiei* is scuttled and eventually sunk by aircraft from Henderson Field, along with the destroyers *Akatsuki* and *Yudachi*. Another determined thrust against Guadalcanal has been turned aside.

November 14

AVIATION: Navy and marine dive bombers based at Henderson Field, Guadalcanal, fall upon the "Tokyo Express" of Rear Admiral Raizo Tanaka, sinking the heavy cruiser *Kinugasa* and seven transports and freighters carrying the 38th Division. Only 2,000 men of the original 10,000 make landfall.

November 15

AVIATION: A Republic P-47 flown by Lieutenants Harold Comstock and Roger Dyer reaches 725 miles per hour—past the speed of sound—in an experimental dive.

NAVAL: In the wee hours off Guadalcanal, Rear Admiral Willis A. Lee of Task Force 64 brings up radar-equipped battleships *Washington* and *South Dakota*, and four destroyers to engage Vice Admiral Nobutake Kondo's battleship *Kirishima*, four cruisers, and nine destroyers. In the torpedo and gunfire melee that follows, the Americans lose three destroyers while the Japanese lose one battleship and one destroyer. Unable to maintain such attrition, the Japanese never again mount a resupply effort on this scale. This action decides the fate of their remaining troops on Guadalcanal.

November 16

AVIATION: At Cherry Point, North Carolina, VMF (N)-531 becomes the first marine night fighter squadron.

- B-17 bombers of the 97th Bomb Group, having launched the first combat strike of the Army Air Force in Europe, repeat that distinction by launching the first AAF bombing raid in North Africa by hitting German airfields at Bizerte, Tunisia.

- Twelfth Air Force C-47 transports drop British paratroopers near Souk el Arba, Tunisia.

NAVAL: Off Morocco, German submarine *U-173* is sunk by a concerted attack by destroyers *Woolsey*, *Swanson*, and *Quick*; this is the first such victory by American naval forces in the Mediterranean.

November 16–19

MILITARY: At Natunga, New Guinea, the 126th and 128th Infantries (32nd Division) have a rough go surmounting difficult terrain and stubborn Japanese defenders. They request emergency resupply by Army Air Force transports, but General Douglas MacArthur orders them to press on “regardless of cost.” This drive toward Buna is assisted by Australian troops.

November 18

MILITARY: The Selective Service Act is modified to include males at the age of 18 for military service. Within a year the burgeoning American military establishment will number 10 million men.

November 20

MILITARY: Army engineers finish the Alaska Military (Alcan) Highway, stretching 1,523 miles from Dawson Creek, Alberta (Canada), to Soldier’s Summit, Alaska.

November 23

NAVAL: The Semper Paratus Always Ready (SPARS) service becomes the women’s branch of the U.S. Coast Guard.

November 24

AVIATION: A force of nine B-24 Liberators fly from Gaya, India, for 2,760 miles, and they drop bombs on Bangkok, Thailand, for the first time.

November 30

NAVAL: The Battle of Tassafaronga rages off Guadalcanal, when the Japanese “Tokyo Express” of eight destroyers under Rear Admiral Raizo Tanaka engages Task Force 67 under Rear Admiral Carleton H. Wright in their path. Japanese “long lance” torpedoes badly damage the heavy cruisers *Pensacola*, *Northampton*, *New Orleans*, and *Minneapolis*. Within hours the *Northampton* and the Japanese destroyer *Takanami* both sink. This encounter also establishes “Tenacious” Tanaka as one of Japan’s finest destroyer leaders.

MARINES: On Guadalcanal, the 2nd Raider Battalion attacks and destroys a Japanese force near Mount Austen.

December 1

AVIATION: In London, England, Major General Ira C. Eaker is appointed head of the Eighth Air Force to replace Major General Carl A. Spaatz, who is transferring to North Africa as air aide to General Dwight D. Eisenhower.

December 1–14

MILITARY: Despite intense jungle combat, General Douglas MacArthur sacks the commander of the 32nd Division and instructs Lieutenant General Robert Eichelberger to “take Buna or not come back alive.”

December 2

TECHNOLOGY: A critical step toward developing an atomic bomb occurs when scientists at the University of Chicago achieve the world's first nuclear chain reaction by splitting atoms of the uranium isotope U-235.

December 4

AVIATION: Ninth Air Force B-24 Liberators strike at military and transportation targets at Naples, Italy, for the first time.

December 5

AVIATION: Major General Carl A. Spaatz is appointed deputy commander in chief for air, Allied Forces in Northwest Africa.

MARINES: After President Franklin D. Roosevelt orders a halt to voluntary enlistments, the Marine Corps maintains liaisons at draft boards for draftees who wish to serve.

December 8

AVIATION: A study released by VIII Bomber Command concludes that no current weapon in the American arsenal is capable of knocking out heavily reinforced German U-boat pens on the French coast. However, several projects, such as unmanned remote-controlled bombs, are under development for that express purpose.

December 8–9

NAVAL: Off Guadalcanal, eight motor torpedo boats turn back eight Japanese destroyers laden with troops; the following evening Japanese submarine *I-3* is sunk by *PT-59*.

December 9

MILITARY: On Guadalcanal, the 1st Marine Division under General Vandegrift is withdrawn from combat and sent to Australia to refit, so command of the island passes to Major General Alexander M. Patch and his Americal Division, who proceed with mop-up operations.

December 11

NAVAL: Off Guadalcanal, five motor torpedo boats engage a Japanese convoy escorted by the “Tokyo Express,” sinking the destroyer *Terusuki* and losing *PT-44*.

December 12

NAVAL: In light of unsustainable attrition in major warships, Japanese naval officials recommend that Guadalcanal be abandoned to the Americans.

December 15

AVIATION: The all-black PBY Catalina-equipped VP-12 begins operating off Henderson Field on Guadalcanal. They become known as the “Black Cat Squadron” and their planes are rigged to drop torpedoes in night attack missions throughout the Solomons.

December 15–31

MILITARY: The army conducts its first offensive operation on Guadalcanal by attacking Mount Austen to better secure Henderson field. The 132nd Infantry succeeds in securing the base of the mountain after several days of intense jungle warfare.

December 17

AVIATION: The word goes out from the Western Defense Command to construct airfields on Amchitka Island, Aleutians, once the island has been secured by ground forces.

- At Munda Point, New Georgia, Japanese forces complete a new airstrip much closer to Guadalcanal.

MILITARY: Due to the recent evacuation of the 1st Marines from Guadalcanal, the decision is made to ship the 25th Infantry Division under Major General J. Lawton Collins directly to that island.

December 18

NAVAL: Off northern New Guinea, the submarine *Albacore* torpedoes and sinks the Japanese light cruiser *Tenryu*.

December 20

MARINES: The marine barracks at New River, North Carolina, is renamed Camp Lejeune.

December 22–23

AVIATION: Having landed and refueled at Midway, B-24 Liberators of the Seventh Air Force stage their first air raid by attacking Japanese installations on Wake Island.

December 23

MILITARY: In Washington, D.C., the War Department concurs with a proposed seizure of Amchitka Island to construct airfields, and the assignment is handed off to the 7th Infantry Division, then training at Fort Ord, California, under the overall command of Major General Charles H. Corlett.

December 24

AVIATION: Army Air Force P-39 Airacobras assist navy and Marine Corps dive bombers to attack Japanese installations on Munda, New Georgia, destroying 24 aircraft without loss.

MILITARY: In Washington, D.C., President Franklin D. Roosevelt announces that General Dwight D. Eisenhower has been selected to lead the cross-channel invasion to liberate western Europe as supreme allied commander, Allied Expeditionary Force.

- At Buna, New Guinea, elements of L Company, 127th Infantry, 32nd Division, have the honor of finally breaking through Japanese defenses; Sergeant Kenneth E. Gruennert, shot while heroically charging enemy pillboxes, wins the Medal of Honor.

December 27

AVIATION: In the Pacific, Lieutenant Richard I. Bong flames two Japanese aircraft in his twin-engine P-38 Lightning; 38 more follow for a total of 40, making him America's top-scoring ace of World War II.

December 29

AVIATION: The Army Air Force and private airline companies in the United States jointly receive the Collier Trophy for their war efforts.

- At Efate, New Hebrides, elements of Marine Air Group 12 start arriving and will complete their deployment by January.

December 31

MILITARY: In Tokyo, Japan, Imperial General Headquarters concedes that the situation on Guadalcanal is hopeless and instructs the navy to evacuate all remaining army troops there.

NAVAL: The new carrier *Essex* is commissioned; it is the progenitor of an entire class of 10 fast aircraft carriers that see extensive service in the Pacific war.

MILITARY: At Buna, New Guinea, elements of the 32nd Infantry Division ("Urbana Force") begin encircling the defenders of that position in a mopping up operation. The 41st Infantry Division also begins arriving in strength from Port Moresby to assist.

1943

JANUARY: The army begins calling for Japanese-American volunteers to form an all-Nisei combat outfit, the 100th Battalion—a precursor of the famous 442nd Regimental Combat Team. The response in Hawaii is overwhelmingly positive seeing that forced relocation has not occurred here.

January 1

AVIATION: Several new Marine Base Defense Air Groups are organized in California and Cherry Point, North Carolina.

January 2–3

MILITARY: The 32nd Infantry Division, which bore the blame for earlier failures to seize Buna, New Guinea, storms that village and a stretch of the northern coastline. Japanese resistance is fanatical but crumbles in the face of tank support.

- On Guadalcanal, Solomon Islands, Major General Alexander M. Patch assumes command of the new XIV Corps, which consists of his old Americal Division, the 25th Infantry Division, the 147th Infantry Regiment, and the 2nd Marine Division.

January 3

AVIATION: A force of 68 VII Bomber Command aircraft strike U-boat pens at Saint-Nazaire, France, losing seven B-17s, a further 47 damaged, and 70 aircrew missing. Damage inflicted upon the enemy is mixed; the results and casualties are a foretaste of things to come over Germany proper.

January 4

MILITARY: The 25th Infantry Division, newly arrived on Guadalcanal, relieves the 132nd Infantry and is ordered to seize Mount Austen.

MARINES: On Guadalcanal, advanced headquarter echelons of the 2nd Marine Division and the 6th Marines begin arriving.

January 5

AVIATION: In northwestern Africa, the Allied Air Force under Major General Carl A. Spaatz is officially activated by General Dwight D. Eisenhower.

- Brigadier General Kenneth N. Walker, head of V Bomber Command and an architect of AWPD-1, dies while leading an air raid over Rabaul, New Britain; he is awarded the Medal of Honor posthumously.

MILITARY: At Oujda, Morocco, Major General Mark W. Clark is installed as the first commander of the Fifth Army. His primary field units consist of the I Armored Corps of Major General George S. Patton, and VI Corps under Major General Ernest J. Dawley.

NAVAL: Task Force 67 under Admiral Walden L. Ainsworth moves into range to bombard Japanese positions at Munda, New Georgia, in the Solomon Islands; an aerial counterattack is swiftly dispensed with and to light cruiser *Helena* goes the honor of splashing the first enemy dive bomber with new VT proximity fuse ammunition.

January 6

NAVAL: A PBY Catalina belonging to VP-83 attacks and sinks German submarine *U-164* off the coast of Brazil.

January 10

MILITARY: President Franklin D. Roosevelt advances a budget request for \$70 billion with the bulk of it slated for military expenditures.

NAVAL: The large troop-carrying submarine *Argonaut* attacks a Japanese convoy off New Britain, but it is attacked in turn by destroyers and sunk with a loss of 105 sailors.

January 9

AVIATION: In Burbank, California, the prototype Lockheed C-69, a militarized Constellation transport craft, makes its maiden flight.

January 11

AVIATION: President Franklin D. Roosevelt becomes the first sitting president to regularly fly while in office.

MILITARY: President Franklin D. Roosevelt submits a budget request of \$108 billion of which \$100 billion is slated for national defense purposes.

- Amchitka Island, Aleutians, is occupied by General Lloyd E. Jones and a 2,000-man combat team; he encounters no armed opposition, and work begins immediately on an airstrip for fighter aircraft.

NAVAL: Off Cape Esperance, Guadalcanal, 11 motor torpedo boats attack a Japanese convoy of eight destroyers; one enemy vessel is damaged and *PT-112* is sunk.

MARINES: The 2nd Parachute battalion deploys on New Caledonia.

January 13

AVIATION: Off the Brazilian coast, *U-507* is sunk by a PBY Catalina belonging to VP-83.

- On Espiritu Santo and New Caledonia, newly promoted major general Nathan F. Twining takes command of the Thirteenth Air Force ("The Jungle Air Force") with instructions to bomb all Japanese targets within the Southwest Pacific theater.

MILITARY: The Army's 25th Infantry Division, acting in concert with the 2nd Marine Division, spends the next four days eliminating any remaining pockets of Japanese west of the American perimeter.

January 14–23

AVIATION: During the Allied conference held at Casablanca, French Morocco, Major General Ira C. Eaker persuades Prime Minister Winston Churchill to accept

the Army Air Force's strategy of precision bombing during daylight hours. Daylight bombing is designed to augment nighttime saturation attacks by the Royal Air Force and constitutes a major part of the Combined Bomber Offensive.

NAVAL: At Casablanca, French Morocco, President Franklin D. Roosevelt and Prime Minister Winston Churchill finalize plans to invade Sicily while directing greater resources to the China-Burma-India theater and continuing offensives through the South and Southwest Pacific. Moreover, the Allies are committed to a policy of "unconditional surrender" toward all Axis powers.

January 14–February 7

NAVAL: The submarine *Wahoo* under Commander Dudley W. Morton begins an aggressive and highly successful cruise in northern New Guinea waters. Off Wewak, he sinks a Japanese destroyer with a dangerous "down the throat" (bow) torpedo shot, then tackles a convoy of vessels and sends another three transports to the bottom. For his actions, "Mush" Morton wins the Navy Cross and the Distinguished Service Cross.

January 15

AVIATION: Captain Joseph J. Foss downs three additional Japanese aircraft over Guadalcanal, raising his tally to 26 and tying Captain Eddie Rickenbacker's score during World War I.

MILITARY: In Arlington, Virginia, the new, five-sided Pentagon complex opens for business 16 months ahead of schedule. At a cost of \$83 million, it covers 583 acres, consolidates offices that were spread among 17 other buildings and, with over 40,000 people working inside, remains the largest office complex in the world.

MARINES: Anne A. Lentz becomes the first marine reservist and is commissioned a captain to design uniforms for the Women's Reserve Program.

January 20

NAVAL: At the Mare Island Navy Yard, San Francisco, California, the *Brennan* becomes the first of a new class of warships—destroyer escorts—to be launched. Small, fast, and heavily armed, they are easier to mass produce than regular destroyers, yet prove the bane of German U-boats and Japanese submarines.

January 20–February 8

AVIATION: Marine Air Group 24 begins deploying at Ewa Field, Hawaii.

MARINES: On Guadalcanal, the Composite Army Marine (CAM) Division is formed from the 6th Marines, the 2nd Marine Division, and various army elements. This formation continues driving westward toward Tassafaronga, as mopping up operations continue.

January 22

MILITARY: The Papuan campaign ends today after U.S. and Australian troops wipe out the last remaining pockets of Japanese resistance at Buna, New Guinea. Coming two weeks before the guns fall silent on Guadalcanal, Papua is the first Allied land victory over Japan.

January 24

NAVAL: Task Force 67 begins shipboard bombardment of Japanese fuel and supply depots on Kolombangara in the Solomon Islands; they are joined by air strikes launched from Henderson Field, Guadalcanal.

Eaker, Ira C. (1896–1987)

Army general

Ira Clarence Eaker was born in Field Creek, Texas, on April 13, 1896, and he studied to be a teacher. However, in 1917 he joined the army and a year later served as a pilot in the Aviation Section, Signal Corps. Over the next 22 years Eaker flew and performed his tasks well, usually in concert with Carl A. Spaatz and Henry H. Arnold, two officers who greatly influenced his later career. In 1926 he was one of several pilots chosen to fly an extended goodwill mission throughout Latin America, and he received the Distinguished Flying Cross. During January 1–7 he joined Spaatz and Elwood Quesada on a seven-day nonstop endurance flight over Los Angeles that required 41 inflight refuelings. Eaker then completed several tours with the Air Corps Tactical School in 1936 and the Command and General Staff School in 1937. He also as Army Chief of Staff general Douglas A. MacArthur's personal pilot. In 1940 Eaker was selected to visit England and study the Royal Air Force in combat and, the following year, he received command of the 20th Pursuit Group at Hamilton Field, California. When the United States entered World War II, Eaker gained temporary promotion to brigadier general and accompanied Spaatz to England to organize and deploy the VIII Bomber Command—progenitor of the mighty Eighth Air Force. A strong advocate of strategic bombing, he personally led the first American B-17 raid in Europe on August 17, 1942, in striking rail yards at Rouen, France. Despite the danger, Eaker always insisted that officers must lead their men into combat.

Ira Eaker (United States Air Force History Center)

In the late fall of 1942, Spaatz transferred to the Mediterranean, and Eaker replaced him as commander of the Eighth Air Force. At that time the RAF leadership was not overly impressed with the results of American daylight bombing and advocated switching to night attacks. In January 1943, during the Casablanca Conference, Eaker personally convinced Prime Minister Winston Churchill to continue the practice of

(continues)

(continued)

precision daylight bombing in concert with nighttime raids performed by the British. This around-the-clock assault on German industrial facilities became a permanent fixture of Allied strategy and a major factor in the ultimate victory. In June 1943 Eaker transferred to the Mediterranean and was replaced by General James H. Doolittle. Eaker helped pioneer the practice of using strategic bombers to assist tactical formations in Italy, and, in June 1944, he also led

the first shuttle mission to the Soviet Union and back. In April 1945 Eaker was recalled to Washington, D.C., to serve as deputy commanding general of the Army Air Force and its new chief of staff. He retired in 1947, and he developed a close association with the airplane manufacturing industry. In 1979 Congress awarded him a special gold medal in recognition of his 40 years of distinguished service to the nation. Eaker died at Andrews Air Force Base on August 6, 1987, an accomplished pioneer of modern aerial warfare.

January 25

MILITARY: At Fort Sam Houston, Texas, the Sixth Army is activated under Lieutenant General Walter Krueger, formerly Third Army, which constitutes the major army command in the Southwest Pacific.

January 27

AVIATION: The American daylight strategic bombing campaign against German industry accelerates when 55 B-17s and B-24s of the 1st and 2nd Bombardment Wings, Eighth Air Force, strike German port facilities at Wilhelmshaven and Emden, Germany. This constitutes the first American daylight raid against the enemy homeland; three bombers are lost and 22 fighters are claimed to have been shot down.

- Major General Nathan Twining, head of the Thirteenth Air Force, crashes in the Pacific Ocean with 13 members of his staff and survives the next four days in a raft until being rescued on February 1.

MILITARY: In Algiers, North Africa, the Women's Army Auxiliary Corps (WAAC) unit, the 149th Post Headquarters Company, deploys for service overseas. These are the first American women to serve overseas in a military capacity.

January 29

MARINES: At Headquarters Marine Corps in Washington, D.C., Ruth C. Streeter becomes director of the Marine Corps Women's Reserve with a rank of major.

January 29–30

NAVAL: Off Rennell Island, Solomons, land-based Japanese aircraft strike at American ships belonging to Task Force 18 under Rear Admiral Robert C. Giffen, crippling the heavy cruiser *Chicago* and sinking it the following day. Enemy aircraft unveiled a new tactic during this attack, namely, using flares to light up the water around intended targets.

January 31

AVIATION: Over Guadalcanal, Lieutenant Jefferson J. DeBlanc (VMF-112) flames five Japanese Zeroes in one day for a total of eight kills; he subsequently wins the Medal of Honor.

February 1–2

NAVAL: Off Guadalcanal, Japanese dive bombers attack and sink the destroyer *DeHaven* with several direct hits. Meanwhile, mines laid by minelayers *Montgomery*, *Preble*, and *Tracy* sink the destroyer *Makigumo* between Savo Island and Cape Esperance.

February 1–8

NAVAL: The “Tokyo Express” under Rear Admiral Raizo Tanaka successfully evacuates 11,000 Japanese troops from Guadalcanal. The Americans assumed such activity was connected with adding reinforcements on the island.

February 3

MILITARY: After the transport SS *Dorchester* is torpedoed by a German U-boat, the four army chaplains onboard, George L. Fox (Methodist), Alexander D. Goode (Jewish), John P. Washington (Catholic), and Clark V. Poling (Dutch Reformed) give their life belts to soldiers and go down with the ship.

February 4

AVIATION: Lieutenant General Frank Andrews is appointed commander, European Theater of Operations (ETO) while Lieutenant General Dwight D. Eisenhower becomes commander, North African Theater of Operations (NATO).

February 7

NAVAL: The submarine *Growler* angles to attack the Japanese store ship *Haya-saki* of Rabaul when the latter turns and charges it. Commander Howard Gilmore is forced to ram the enemy vessel instead, whose gunners rake his conning tower, mortally wounding him. He nonetheless orders the *Growler* to abandon him and dive to safety; a Medal of Honor is awarded him posthumously.

February 9

MILITARY: Elements of the Americal and 25th Infantry Divisions link up at Tenaru Village, Guadalcanal, signaling the end of fighting on the island. Beforehand, Japanese forces stage a brilliantly conducted evacuation, rescuing their last remaining 11,000 troops. This concludes America’s first offensive victory in the Pacific, which continues unabated until war’s end.

MARINES: The island of Guadalcanal, an important part of Marine Corps legacy, is declared secure. A total of 1,504 marines were killed in action and 2,916 wounded. Japanese losses are 14,000 dead or missing, 9,000 wounded, and 1,000 captured. Guadalcanal remains enshrined as a seminal part of Marine Corps legacy and mythology.

February 11

NAVAL: In the Coral Sea, the destroyer *Fletcher*, working in concert with a Curtiss Seagull floatplane launched from the light cruiser *Helena*, sinks Japanese submarine *I-18*.

February 12

NAVAL: At Brisbane, Australia, the submarine *Grampus* departs on its sixth war cruise and is never heard from again.

MARINES: The Marine Corps Women's Reserve organizes women from 20 to 30 years of age to work of as clerks, stenographers, parachute riggers, and laundry workers. However, none are eligible to serve outside the United States.

February 13

MARINES: The first women are allowed to enlist in the Marine Corps for the duration of the conflict.

February 14

NAVAL: Off New Britain, the submarine *Amberjack* radios that it is under attack by two enemy destroyers, then vanishes; it is assumed the craft was probably sunk by the Japanese torpedo boat *Hiyo* and submarine chaser *Ch-18*.

February 14–25

MILITARY: The inexperienced Army I Corps, defending Kasserine Pass, Tunisia, is attacked by the veteran Afrika Korps under Marshal Erwin Rommel and driven back. Nearly half of the lumbering M3 Grant tanks deployed by the 1st Armored Division are destroyed by their more nimble German counterparts. The newer, gasoline-powered M4 Sherman tanks also earn the gruesome nick-

Women in military service: Shown here is the first contingent of 253 female marines who reported for duty at U.S. Marine headquarters, 1943. (Library of Congress)

name of “Ronson lighters” for their disturbing tendency to explode and burn when hit.

February 15

AVIATION: In England, Major General Ira C. Eaker is chosen to head up the Eighth Air Force bombing campaign while Major General Carl A. Spaatz relocates to the Mediterranean to direct Northwest African Air Forces during Operation Torch.

- Land-based aircraft operating in the southern Solomon Islands fall under a new command, Aircraft Solomons (AirSols). This force is both multiservice and multinational in nature.

February 17

AVIATION: Air Chief Marshal Sir Arthur Tedder assumes command of the new Mediterranean Air Command, which includes both the Northwest African Air Forces, Middle East Air Command, and Royal Air Force Malta Command.

February 18

AVIATION: Boeing’s giant XB-29 prototype bomber crashes, killing celebrated test pilot Edmund T. “Eddie” Allen.

- At Bowman Field, Kentucky, the first class of flight nurses graduates from the Army’s School of Air Evacuation.

February 21

AVIATION: The 93rd Bombardment Group, having flown 43 missions from North Africa, including the famous Ploesti raid, is reassigned to the Eighth Air Force in England.

NAVAL: The campaign for the Central Solomons commences as aircraft from the carrier *Saratoga* support amphibious landings in the Russell Islands, 30 miles north of Guadalcanal.

MARINES: On Pavuvu Island in the Russells, the 3rd Raider Battalion lands without encountering any opposition.

February 22

NAVAL: The battleship *Iowa*, the first vessel of the new class of warship, is commissioned. Heavily armed and armored, with gun-directing radar, they are also the first vessels of that tonnage to do 33 knots to keep up with fast carrier groups.

February 26

AVIATION: In England, Major General James H. Doolittle takes charge of XII Bomber Command.

MILITARY: U.S. Army forces, having sorted themselves out, counterattack and retake Kasserine Pass in Tunisia.

February 28

MILITARY: American engineers begin working on the ambitious Ledo road to connect India and Burma to southern China.

March 1

AVIATION: At Cherry Point, North Carolina, VMB-413 becomes the Marine Corps’s first medium bomber squadron, equipped with North American PBJs (B-25s).

- At Camp Elliott, California, Marine Corps Air Base Kearney Mesa is founded next door.
- Newly promoted Lieutenant General Carl A. Spaatz takes charge of the 12th Air Force in Algeria, North Africa.

March 1–20

NAVAL: In the Atlantic, German wolfpacks score their biggest success ever by sinking 85 Allied vessels at a cost of only six submarines.

March 2–4

AVIATION: In a demonstration of aerial firepower, Fifth Air Force and Australian fighters and medium bombers attack and savage Rear Admiral Masatomi Kimura's 16-ship Japanese convoy in the Bismark Sea, sinking eight transports four destroyers crammed with troops, as well as downing 25 aircraft. The loss of 3,500 men and 40,000 tons of shipping is a major blow to enemy plans for reinforcing Lae, New Guinea. This attack employed low-level "skip bombing" techniques for the first time and constitutes one of Lieutenant General George C. Kenny's greatest aerial victories.

March 5

MILITARY: In Tunisia, Command of the badly battered II Corps passes from Major General Lloyd R. Fredendall to Major General George S. Patton, Jr.

Coast Guardsmen on the deck of the U.S. Coast Guard cutter *Spencer* watch the explosion of depth charges against a German submarine trying to penetrate a convoy, April 17, 1943. (National Archives)

NAVAL: In the Atlantic, the auxiliary escort carrier *Bogue* serves as the nucleus for a new concept, the hunter-killer group, which is destined to enjoy great success protecting Allied convoys from German U-boats.

March 6

NAVAL: Off Kolombangara, a force of three light cruisers and three destroyers under Rear Admiral A. Stanton Merrill bombard Japanese positions at Vila, sinking the destroyers *Mionegumo* and *Murasame*.

March 8

AVIATION: Off Trinidad in the Caribbean, German submarine *U-156* is sunk by a PBY Catalina belonging to VP-53.

MARINES: The first African-American enlistees are assembled into the 1st Marine Depot Company, which is tasked with loading and unloading supplies during amphibious assaults.

March 10

AVIATION: At Kunming, China, the China Air Task Force (CATF) is disbanded in favor of the new Fourteenth Air Force under Major General Claire L. Chennault. His roster includes an entire wing of Chinese pilots.

NAVAL: In the South Atlantic, the light cruiser *Savannah* and the destroyer *Eberle* accost the German blockade-runner *Karin*, boarding it. When scuttling charges explode, killing seven Americans and wounding two, the *Eberle* rescues the *Karin*'s 72 survivors.

March 11

NAVAL: In the Pacific, the submarine *Triton* radios that it has sunk a Japanese cargo vessel, then it is never heard from again.

March 12

AVIATION: At Henderson Field, Guadalcanal, VMF-124 deploys the first Vought F4U Corsair fighters into combat units; these large, gull-winged fighters are a distinct improvement over the earlier Grumman F4F.

NAVAL: West of the Azores, the destroyer *Champlin* engages German submarine *U-130* as it is stalking a convoy, charges it, drops depth charges, and finally sinks it.

March 13

MARINES: In Massachusetts, the first women officer candidates are accepted at Mount Holyoke College.

March 14

AVIATION: In the Pacific, Marine Air Group 21 arrives at Banika Island.

March 15

NAVAL: In Washington, D.C., a new system of numbering fleets is adopted by Admiral Ernest J. King, with the Atlantic being assigned even numbers and the Pacific odd numbers.

MARINES: The four Marine Raider Battalions are to be jointly administered as the 1st Raider Regiment, now that all are present in the Pacific.

March 17

AVIATION: In southern California, Marine Corps Air Station, El Toro, is formally activated for operations.

MILITARY: The aggressive and hard-hitting major general George S. Patton counterattacks at El Guettar, Tunisia, with the II Corps, defeating part of the vaunted Panzerarmee Afrika (formerly Afrika Korps) for the first time.

March 18

AVIATION: Over Vegesack, Germany, Lieutenant Jack W. Mathis, lead bombardier of the 359th Bomb Squadron, is mortally wounded by flak during his bomb run, yet performs his task and dies at his post; he receives the Eighth Air Force's first Medal of Honor.

March 19

AVIATION: In Washington, D.C., Lieutenant General Henry H. Arnold, chief of the Army Air Force, becomes the first airman promoted to the rank of full (four-star) general.

March 20

AVIATION: Off Bougainville, Marine Torpedo Bomber Squadron 143 performs the first mine-laying mission of the South Pacific campaign.

March 21

MARINES: Scouts culled from the Raider battalions are landed at Segi Plantation, New Guinea, to look for landing places for a forthcoming invasion.

March 23

NAVAL: Off Formosa (Taiwan), the submarine *Kingfisher* experiences an intense Japanese depth-charge attack to the extent that the captain orders all its secret codes destroyed; bubbles from that vessel's main piping system convince the enemy that their target is destroyed, and *Kingfisher* silently escapes.

March 24

MARINES: In New York City, the first women recruits for the Marines Women's Reserve assemble for training at Hunter College.

March 25

NAVAL: In the Yellow Sea, the submarine *Wahoo*, under celebrated Lieutenant Commander D. W. "Mush" Morton, attacks and sinks four Japanese transports in a single day.

March 26

AVIATION: Army Nurse lieutenant Elsie S. Ott becomes the first woman to receive the Air Medal for escorting five patients 10,000 miles from India to the Walter Reed Hospital in the United States.

NAVAL: Task Group 16.6 under Rear Admiral Charles H. McMorris engages a larger Japanese force under Vice Admiral Boshiro Hosogaya off the Kormandorski Islands (Aleutians), and prevents them from reinforcing the garrison on Kiska. Several vessels are damaged on either side, including heavy cruisers *Nachi* and *Salt Lake City*.

MARINES: At Camp Pendleton, California, the 24th Marines are organized as an infantry regiment.

April 1

AVIATION: Naval Air Station Patuxent River, Maryland, is founded, home of the future Naval Test Pilot School.

- At Cherry Point, North Carolina, Marine Air Group 51 becomes the first night fighter group in the Corps.
- On Guadalcanal, Carney Field becomes operational as a bomber field, which proves essential in subsequent campaigns in the Solomons.
- At Guadalcanal, Japanese naval and aerial units commence their Operation I offensive, which lasts through April 16. They hope to slow down the anticipated American offensive in the Solomons.

MARINES: On New Caledonia in the Pacific, the 1st Parachute Regiment is created from the existing parachute battalions; a fourth battalion is currently organizing in Southern California.

April 2

MEDICAL: The Army Air Force School of Aviation Medicine opens and operates four altitude decompression chambers.

April 4

AVIATION: Over Paris, France, Eighth Air Force bombers strike the Renault armaments factory, inflicting heavy damage. German fighters manage to shoot down four American aircraft.

April 5

NAVAL: Off Russell Islands, the Solomons, the destroyer *O'Bannon* detects Japanese submarine *RO-34* operating on the surface and sinks it.

April 5–22

AVIATION: Allied air units in North Africa commence Operation Flax, designed to interdict Axis supply and troop reinforcements in the Mediterranean; they also claim to shoot down 60 enemy airplanes.

April 7

AVIATION: A skillful raid by Japanese dive bombers off Guadalcanal sinks the destroyer *Aaron Ward* and the oiler *Kanawha*, which is beached and scuttled the following day.

- Lieutenant James E. Swett of VMF-221 flames seven Japanese dive bombers before being shot down himself and rescued; he subsequently receives a Medal of Honor.

NAVAL: Off Honshu, the submarine *Pickrel* sinks a Japanese transport before all contact is lost.

April 8

AVIATION: In England, the 4th Fighter Group, Eighth Fighter Command, is bolstered by the arrival of the 56th and 78th Fighter Groups.

April 9

NAVAL: In Washington, D.C., the rank of commodore is reintroduced by the Navy Department.

April 11

TECHNOLOGY: The California Rocket Society tests the first hybrid-powered rocket, which is fueled by a carbon rod and liquid oxygen.

April 12

AVIATION: The War Department releases details about the highly secret Norden bombsight, which is designed to remain on target despite aircraft movements.

April 14

NAVAL: Fleet Radio Unit, Pacific Fleet, intercepts and deciphers a Japanese naval communiqué announcing that Admiral Isoroku Yamamoto will be visiting Bougainville on an inspection tour, with details on the exact date and escort force. Admiral Chester Nimitz, commander in chief Pacific Fleet, assigns the highest priority to bringing him down.

April 15

AVIATION: Off Brazil, the Italian submarine *Archimede* is sunk by a PBY Catalina flown by VP-83.

NAVAL: Commander Milton E. Miles is appointed the American liaison to Chinese general Tai Li in the new Sino-American Cooperative Organization; its purpose is to instruct Chinese operatives in guerrilla warfare, intelligence gathering, weather reporting, and other clandestine activities.

**Bradley, Omar N. (1893–1981)**

Army general

Omar Nelson Bradley was born in Clark, Missouri, on February 12, 1893, the son of poor farmers. He attended the U.S. Military Academy to spare his parents the burden of paying for his college education, graduated in 1915, and served several years with the artillery. Bradley then taught at South Dakota State College and West Point before attending the Army Infantry School in 1925, the Command and General Staff College in 1929, and the Army War College in 1934. That year he resumed teaching activities at the military academy for the next four years before transferring to Washington, D.C., as part of the General Staff in 1938. Bradley rose to brigadier general in February 1941 and took charge of the Infantry School until 1942, when he gained promotion to major general in charge of the 82nd Infantry Division. The following spring he found himself attached to the staff of General Dwight D. Eisenhower in time

for Operation Torch, the invasion of North Africa. Shortly afterward, he gained control of II Corps under General George S. Patton. Bradley served well as a combat officer and fought with distinction in the closing phases of the Tunisian campaign. He subsequently participated in the invasion of Sicily under Patton, helped to mop up Axis resistance over the next five weeks, and was promoted again to lieutenant general as of July 1943. After Patton was suddenly sidelined by his much-publicized slapping of a private soldier, Bradley was tapped to succeed him as head of the new First U.S. Army in England, then training to spearhead the invasion of Europe.

On June 6, 1944, Bradley's troops carried out Operation Overlord, the campaign to establish Allied beachheads at Normandy, France. He next orchestrated Operation Cobra, the American breakout from Saint-Lô, which sent the Germans reeling back to

April 16

MILITARY: Command of the II Corps passes to Major General Omar N. Bradley.

April 17

AVIATION: Over Bremen, Germany, the Eighth Air Force launches its first 100-plane air raid; German fighters and antiaircraft artillery shoot down 15 bombers with a total loss of 150 men. The cry goes out to add additional fighter groups as bomber escorts.

April 18

AVIATION: Off Tunisia, American P-40 fighters slaughter a force of German transport aircraft as they try desperately to airlift supplies to Panzer Armee Afrika; no less than 51 aircraft are bagged in the space of half an hour.

their own borders and liberated Paris. Bradley assumed command of the 12th Army Group, 1.3 million men strong and the largest single body of soldiers to serve under an American commander. With them, Bradley drove slowly but inexorably through the Nazi Siegfried Line, capturing 335,000 Germans in the Ruhr pocket, and establishing the first contact with Soviet forces along the Elbe River in April 1945. After the war, he served a stint as head of the Bureau of Veteran's Affairs before rising to army chief of staff in 1948, and the following year he capped his career in being appointed the first head of the new Joint Chiefs of Staff. As such, he rose to five-star general of the army in September 1950 and, as President Harry S. Truman's top military adviser, opposed General Douglas MacArthur's suggested expansion of the Korean War into neighboring Manchuria. Bradley concluded 43 years of distinguished service in retiring on August 15, 1953, and he spent the remainder of his life in high-profile business positions, while also proffering military advice. The low-key,

General Omar N. Bradley (*Library of Congress*)

nondescript Bradley, nicknamed the "GI General" by his soldiers, died in New York City on April 8, 1981.

- Over Kahili, Buin (Solomon Islands), a force of 16 P-38 Lightnings under Major John W. Mitchell expertly intercept and shoot down a Japanese bomber, killing Admiral Isoroku Yamamoto, commander in chief, Combined Fleet. The Americans were tipped off as to his impending arrival by cracking Japanese radio codes and flew from Henderson Field, Guadalcanal, to kill him. Both Lieutenant Rex T. Barber and Captain Thomas G. Lanphier receive credit for the kill.

April 22

NAVAL: Off the Malaysian coast, the submarine *Grenadier* is crippled by Japanese aircraft and scuttled; the crew is taken prisoner and harshly treated, but they survive the war.

April 26

MILITARY: The II Corps under Major General Omar N. Bradley continues driving hard across the desert toward Gabes, Tunisia, while preparing for a final offensive against dug-in German defenders. He has with him the 1st Infantry Division, 9th Infantry Division, the 34th Infantry Division, and the 1st Armored Division on line while the 3rd Infantry Division sits in reserve.

April 27

AVIATION: Off Nova Scotia, a PV-1 Ventura patrol bomber belonging to VB-125 attacks and sinks German submarine *U-174* as it was stalking convoy SC 128.

April 29

AVIATION: The Civil Air Patrol (CAP) transfers to the jurisdiction of the War Department. It is responsible for operating 4,700 light aircraft, 4,000 vehicles, and a 17,000 radio station communications network.

May

NAVAL: This month witnesses a turning point in the Battle of the Atlantic. Convoy ONS 5, consisting of 43 merchantmen and nine escorts, bound from England to Halifax, Nova Scotia, is attacked by 51 German U-boats. Six U-boats are sunk for a loss of 13 cargo ships, an attrition rate that the Germans cannot sustain.

May 1

AVIATION: On a mission over Saint-Nazaire, France, Staff Sergeant Maynard H. Smith, 423rd Bomb Squadron, bravely administers to a wounded airman, mans waist guns, and fights flames as the rest of the crew bails out of his stricken craft; he is the first enlisted AAF man to win the Medal of Honor.

MARINES: At Camp Lejeune, California, the 25th Marines are organized as an infantry regiment.

May 3

AVIATION: Lieutenant General Frank M. Andrews, commanding the European Theater of Operations (ETO), is killed in Iceland when his plane crashes into a mountainside.

May 3–4

MILITARY: In Tunisia, the II Corps under Major General Omar N. Bradley drives German defenders from their positions to the last row of hills protecting Bizerte and Tunis. Bizerte falls to the Americans on the 4th while British forces, approaching from the east, continue hammering the German position.

May 4

AVIATION: Over Antwerp, Belgium, a group of 65 Eighth Air Force bombers attacks Ford and General Motors factories while a smaller force launches a diversionary raid against the French coast. Consequently, the main strike force encounters little opposition.

May 6

AVIATION: Off Long Island Sound, New York, a Sikorsky XR-4 Hoverfly flown by Captain H. Franklin Gregory completes the first helicopter landing on a ship when he safely touches down on the deck of the merchant tanker *Bunker Hill*.

May 7

MILITARY: Army forces roll into Bizerte, Tunisia, while British troops seize the capital of Tunis. The ring is fast closing around German forces.

May 8

AVIATION: In the Mediterranean, the Italian island of Pantelleria is subject to heavy aerial attacks by Ninth Air Force B-26s, B-25s, and P-40s, assisted by Royal Air Force Wellington bombers.

NAVAL: American mines and air strikes sink the Japanese destroyers *Kuroshio*, *Kagero*, and *Oyashio* in the Solomon Islands.

May 11–13

AVIATION: At Attu, the Aleutians, warplanes launched from the auxiliary carrier *Nassau* perform the first close air support mission to assist ground forces, the first time this tactic is utilized in support of an amphibious operation.

NAVAL: The forthcoming invasion of Attu in the Aleutians is supported by the warship of Task Forces 16 and 51 under Rear Admiral Thomas C. Kinkaid. The destroyers *Edwards* and *Farragut*, working in tandem, sink Japanese submarine *I-31*.

May 11–31

MILITARY: The 7th Infantry Division under Major General A. E. Brown stages an amphibious assault on the Aleutian island of Attu, which falls only after savage resistance by a small but determined Japanese garrison of 2,500 men. American losses total 600 dead and 1,200 wounded.

May 13

AVIATION: In the Solomons, Lieutenant Kenneth A. Walsh of VMF-124 shoots down three Japanese Zeroes for a total of six; he is also the first ace flying the F4U Corsair.

MILITARY: Field Marshal Jurgen von Arnim, commanding 250,000 men, surrenders the Fifth Panzer Army to Allied forces in Tunisia. This Axis disaster is as major a defeat as that of Stalingrad four months earlier; American losses are 18,500 men.

May 14

AVIATION: The VIII Bomber Command marks another aerial milestone when the first 200-bomber raid is launched against four targets on the European mainland. Submarine yards and naval facilities are the primary targets.

NAVAL: In the Vitaiz Strait, New Guinea, motor patrol boats *PT-150* and *PT-152* detect and sink Japanese submarine *RO-182*.

May 15

AVIATION: Off Cuba, German submarine *U-176* succumbs to an attack by Vought OS2U Kingfisher floatplane aircraft belonging to VS-62.

May 15–25

NAVAL: In Washington, D.C., President Franklin D. Roosevelt and Prime Minister Winston Churchill conclude the so-called Trident Conference, which reaffirms the “Germany first” policy, sets the timetables for a cross-channel invasion of Europe, and makes plans for a major offensive across the Central Pacific.

May 16

NAVAL: Off the Madeira Islands, German submarine *U-182* is sunk by the destroyer *MacKenzie*.

May 17

AVIATION: The B-17 Flying Fortress named *Memphis Belle* completes 25 combat missions over Europe under Captain Robert Morgan; the crew is allowed to return home to tour the United States and sell war bonds.

- In an ominous development, 10 B-26 Marauders of the 322nd Bomb Group are shot down over Europe by German defenses; only one bomber returns to base.

NAVAL: In the South Atlantic, German submarine *U-128* is damaged by bombs from a PBM Mariner from VP-74, then finished off by gunfire from the destroyers *Moffett* and *Jouett*.

May 18–25

AVIATION: The Combined Chiefs of Staff approves plans for the Combined Bomber Offensive (CBO), which calls for around-the-clock attacks on German industrial centers by the Army Air Force and the Royal Air Force. The destruction of German fighter factories is the highest priority, followed by submarine bases, ball-bearing plants, and oil production refineries.

MILITARY: In Washington, D.C., the Trident Conference takes place between President Franklin D. Roosevelt and Prime Minister Winston Churchill. U.S. Army Chief of Staff general George C. Marshall presses the British for a cross-channel invasion of France, while the British insist on an invasion of Italy. A compromise is reached. The Americans will invade Italy in 1943 while the British will assist in an invasion of France in 1944.

May 19

AVIATION: The Marine glider program is disbanded stateside without seeing action.

- Additional mine drops around Bougainville result in the loss of two TBF Avenger bombers to antiaircraft fire.

May 20

NAVAL: To better coordinate the antisubmarine campaign in the Atlantic, Headquarters, Tenth Fleet is organized in Washington, D.C., under Admiral Ernest J. King, the chief of naval operations.

May 22

AVIATION: In the Atlantic, Grumman TBF Avengers flying off the escort carrier *Bogue* sink *U-569* and damage *U-305*. The submarines had been stalking Convoy ON 184.

May 23

NAVAL: The second *Iowa*-class battleship, the *New Jersey*, is commissioned.

May 24

NAVAL: Admiral Karl Doenitz, head of the German navy, orders his U-boats out of the Atlantic to end prohibitive losses. This withdrawal ends the wolfpack threat to Atlantic supply convoys to England.

May 25

AVIATION: Off Iceland, a PBY Catalina of VP-84 attacks and sinks German submarine *U-467*.

May 26

NAVAL: A party is landed on Basilan Island, Philippines, by the submarine *Trout*, to organize a coastwatcher network and assist Filipino guerrillas.

May 27

NAVAL: The submarine *Runner* puts to sea at Midway Island on its third war patrol and is never heard from again.

June 1

MARINES: At Camp Lejeune, North Carolina, the 14th Marines are organized as an artillery regiment.

June 2

AVIATION: The first combat mission flown by the African-American 99th Fighter Squadron out of Fardjouna, Tunisia, is lead by Lieutenants William B. Campbell and Charles B. Hall.

NAVAL: Submarine chaser *PC-565*, operating off the Virginia Capes, engages in a lengthy battle with German submarine *U-521*, which it sinks with depth charges and 20mm cannon fire.

June 5

AVIATION: Off the Canary Islands, Grumman TBF Avengers of VC-9 attack and sink German submarine *U-217*.

June 9

NAVAL: At Annapolis, Maryland, the class of 1943, U.S. Naval Academy, graduates a year early due to the ongoing national emergency.

June 10

AVIATION: The Combined Operational Planning Committee is formed to coordinate daylight bombing of German targets by the Eighth Air Force and nighttime raids mounted by the Royal Air Force Bomber Command. Together, their efforts constitute the Combined Bomber Offensive (CBO), whose around-the-clock attacks are intended to destroy both German industry and morale.

NAVAL: After the tanker *Esso Gettysburg* is torpedoed at sea by the *U-66*, Ensign John S. Arnold of the Armed Guard detachment mans machine guns and fires at the submarine, winning a Navy Cross; only 15 of 72 crewmen survive the attack.

- Off Shemya Island, Aleutians, submarine chaser *PC-487* drops depths charges on Japanese submarine *I-24*, forcing it to surface, then sinks the enemy vessel by ramming it.

June 11

MILITARY: Following a month of continual bombing and strafing, the Italian island of Pantelleria, located midway between Tunisia and Sicily, surrenders and is occupied by the British 1st Division. This marks the first time that a military objective capitulated solely on the basis of air power.

June 12

AVIATION: Off Key West, Florida, submarine *R-12* sinks during a training exercise, killing all 42 crewmen.

- A TBF Avenger from the escort carrier *Bogue* drops depth charges on German submarine *U-118* off the Canary Islands, sinking it.

June 13

AVIATION: A raid on Kiel, Germany, by a force of 60 Eighth Air Force bombers underscores the need for fighter escort when 26 aircraft are shot down by enemy fighters.

MILITARY: In Washington, D.C., General William “Wild Bill” Donovan officiates at opening ceremonies for the Office of Strategic Services (OSS), which will ultimately employ 13,000 agents for clandestine operations.

NAVAL: Off Kiska, Aleutian Islands, the destroyer *Frazier*, having spotted a periscope, rolls depth charges overboard and sinks Japanese submarine *I-9*.

MARINES: On New Georgia, Central Solomon Islands, crack reconnaissance squads go ashore to ascertain landing sites for an upcoming invasion.

June 15

AVIATION: At Marietta, Georgia, the 58th Bombardment Wing becomes the first Army Air Force outfit equipped with Boeing B-29 Superfortresses.

MARINES: At Camp Lejeune, North Carolina, the 20th Marines are organized as an engineer/pioneer outfit.

June 16

AVIATION: During a photographic mission to Buka, Solomon Islands, a B-17 flown by Captain Jay Zeamer, Jr., is attacked by an estimated 20 Japanese Zeroes. Despite severe wounds, Zeamer stays at his controls while his gunners shoot down at least five fighters. Lieutenant Joseph R. Sarnoski, who volunteered to serve as a bombardier, ignores severe wounds and mans his position, dying there. Both men receive the Medal of Honor.

June 20

AVIATION: Off Iceland, a PBY Catalina belonging to VP-84 attacks and sinks German submarine *U-420* with a new Mark 24 homing torpedo, this being its first employment in battle.

June 21

MILITARY: In Yuma, Arizona, Lieutenant Edith Greenwood becomes the first nurse to win the Soldier’s Medal for rescuing patients during a hospital fire.

MARINES: At Segi Point, New Georgia, the 4th Raider Battalion, assisted by two army companies, comes ashore to protect a coastwatcher.

June 21–August 25

MILITARY: In the Solomons, men of the 43rd and 37th Infantry Divisions (XIV Corps) land at Segi Point, New Georgia Island, and a difficult struggle ensues in

harsh jungle terrain. Major General John H. Hester is ultimately relieved for lack of progress.

June 22

AVIATION: A force of 182 Eighth Air Force bombers strikes industrial targets in the Ruhr Valley for the first time, especially chemical works and synthetic rubber plants at Huls. Meanwhile, Ford and General Motors plants at Antwerp are struck by ancillary raids.

MILITARY: In Moscow, Soviet Union, Ambassador William H. Standley presents army and navy decorations to Russian soldiers and sailors who have distinguished themselves in combat. This is the first time that American medals have been given to foreigners.

NAVAL: Near Kiska, the Aleutians, the destroyer *Monaghan* attacks and runs the Japanese submarine *I-7* aground; two years earlier, on December 7, 1941, this same vessel attacked and sank a Japanese midget submarine at Pearl Harbor.

June 23

NAVAL: In the Pacific, cargo ships *Aludra* and *Deimos* are attacked and sunk by Japanese submarine *RO-103* as they made their run toward Guadalcanal.

June 24

AVIATION: Over Ephrata, Washington, Lieutenant Colonel William R. Lovelace, AAF Aeromedical Laboratory, makes a record parachute jump from 40,200 feet.

June 25

MILITARY: The new "Ten-One" ration is announced by the Quartermaster Corps, so named for providing for 10 men for one day, or one man for 10 days.

June 26

AVIATION: The army takes over barrage balloon operations in the Pacific while marine balloon squadrons begin arming themselves with 90mm antiaircraft weapons.

June 27

MARINES: On New Georgia, Solomon Islands, the 4th Raider battalion marches overland from Segi Point to Viru Harbor in support of an amphibious landing there.

June 29

AVIATION: General Douglas MacArthur puts Operation Cartwheel, the aerial reduction of Rabaul, New Britain, into effect. American aircraft bomb and strafe the harbor and airfields to keep Japanese reinforcements from reaching Bougainville and New Georgia Island.

June 30

AVIATION: Oscar Holmes, a pilot in civilian life, is the first African-American ensign to be designated a naval aviator.

Recruiting poster for the Women's Army Corps (1943) (Library of Congress)

- A swarming air battle erupts over New Georgia, Solomon Islands, during which 13 air force pilots shoot down 101 Japanese aircraft; of that toll the marines claim 58 kills, with four Zeroes credited to Lieutenant Wilbur J. Jones, VMF-213.

NAVAL: Operation Toenail unfolds as Rear Admiral Richmond K. Turner directs amphibious landings of Task Force 31 on New Georgia, Solomon Islands. Army troops and the 4th Marine Raider Battalion confront a 5,000-man Japanese garrison under General Noboru Sasaki. Turner's flagship, the attack transport *McCawley*, receives a torpedo hit.

- Off northern New Guinea, Admiral Daniel E. Barbey guides Task Force 76 as it lands army troops on Woodlark and Kiriwina Islands.

MARINES: Two companies of the 4th Raider Battalion slip silently ashore at Vangunu, Solomon Islands, in advance of the Army 103rd Infantry Regiment; the ensuing mop up of Japanese forces continues for three days.

July 1

AVIATION: In light of heavy bomber losses over Europe, General Henry H. Arnold receives a memo suggesting that at least one fighter group is needed to escort every two bomber groups.

MILITARY: In Washington, D.C., President Franklin D. Roosevelt signs legislation that removes restrictions on the employment of women overseas and extends to them the same benefits and protections enjoyed by men.

- A bill disbanding the Women's Army Auxiliary Corps (WAAC) and authorizing the Women's Army Corps (WAC) as part of the regular army establishment is signed into law. All members now enjoy full military status and are assigned to over 300 different types of jobs.

NAVY: The V-12 program is established by the Navy Department for training enlisted marines and sailors at selected universities for officers' commissions.

MARINES: At Viru Harbor, New Georgia, the 4th Raider Battalion defeats a stubborn force of Japanese defenders.

July 2

AVIATION: By this time, all eight Marine Corps fighter squadrons in the Pacific have switched over from Grumman F4Fs Wildcats to Vought F4U Corsairs.

MARINES: On New Georgia, the 9th Defense Battalion assists the army's 43rd Infantry Division as it slogs its way toward Munda airfield in the face of fanatical resistance.

July 4

AVIATION: A C-47 Skytrain completes the first transatlantic flight to Great Britain from North America; a Waco CG A-4 glider is safely towed 3,500 miles from Britain to Russia with medical supplies and other necessities.

July 5

NAVAL: The destroyer *Strong* is sunk with a loss of 46 lives during an engagement between Japanese and American forces in Kula Gulf, between New Georgia and Kolombangara.

MARINES: At Rice Anchorage, New Georgia, 1st Raider Regiment Headquarters and the 1st Raider Battalion land, assisted by two army battalions. With the beach area secure, they immediately move upon Enogai Inlet.

July 6

AVIATION: A PB4Y-1 Privateer flown by Lieutenant Commander Bruce A. Van Voorhis (VB-102) makes a daring, low-level raid upon Japanese installations on Greenwich Island, and is shot down. Voorhis receives the Medal of Honor posthumously.

NAVAL: The Battle of Kula Gulf unfolds near New Georgia, Solomon Islands, when Task Group 36.1 under Rear Admiral Walden L. Ainsworth fights a night battle with a group of sharp-shooting Japanese destroyers of the “Tokyo Express” under Rear Admiral Teruo Akiyama. The light cruiser *Helena* is sunk while the Japanese lose two destroyers with three more damaged. This marks the fourth failed attempt to resupply the garrison on Kolombangara. Many of the *Helena*’s 900 survivors manage to swim to Vella Lavella, where they are assisted by natives and later rescued on July 16.

July 7

AVIATION: The Army Air Force Training Command is established and assumes responsibilities formerly accorded the Technical Training and Flying Training Commands.

July 8

AVIATION: To reduce casualties from enemy flak, Colonel Malcolm G. Grow, a medical surgeon with the Eighth Air Force, invents an armored vest and steel helmet for aircrews. He receives the Legion of Merit for saving hundreds of lives.

July 9

AVIATION: Off the mouth of the Amazon River, Brazil, a PBY Catalina from VP-94 attacks and sinks German submarine *U-590*.

NAVAL: As ships for Operation Husky assemble off Sicily, a smoke pot on *LST-375* accidentally ignites. Ensign John J. Parke heroically picks up the burning pot and hurls it overboard to prevent the invasion fleet from alerting the enemy, sustaining fatal burns in the process. He receives a posthumous Medal of Honor.

MARINES: On New Georgia, the 1st Raider Battalion attacks Japanese defenders at Enogai, completely clearing them out two days later.

July 10

AVIATION: In Southern California, Marine Corps Air Station El Centro is activated.

MILITARY: Lieutenant General George S. Patton, having been relieved of command from the II Corps, is appointed head of the new Seventh Army. The new formation is activated at sea en route to the invasion of Sicily.

MARINES: The 4th Raider battalion companies at Viru Harbor, Georgia Island, and Vangunu begin returning to Guadalcanal.

July 10–August 17

AVIATION: In the skies over Sicily, hundreds of Douglas C-47s convey the 82nd Airborne Division in the first large-scale airborne assault of World War II. Several transports are shot down by U.S. Navy vessels, which, not being informed of their mission, mistake them for German bombers.

MILITARY: American and British forces under General Dwight D. Eisenhower commence Operation Husky, a concerted drive on the Axis enclave of Sicily. Eight American and British divisions, totaling 470,000 men, are landed to confront 300,000 Italian and 50,000 German troops under General Alfredo Guzzoni. Once in Allied hands, the island serves as a springboard for the ensuing invasion of the Italian Peninsula.

NAVAL: Off Sicily, British admiral of the fleet Sir Andrew B. Cunningham directs amphibious landings connected with Operation Husky. The Western Naval Task Force under Vice Admiral H. Kent Hewitt conveys the Seventh Army of Lieutenant General George S. Patton, while the Eastern Naval Task Force under British vice admiral Sir Bertram H. Ramsay lands the Eighth Army under Field Marshall Bernard Montgomery. The naval forces include 1,400 vessels of various sorts and cover a landing zone stretching 100 miles. This is the largest amphibious landing in military history.

TECHNOLOGY: The amphibious truck DUKW (“Duck”) successfully debuts in Operation Husky, along with the Landing Ship Tank (LST) and Landing Craft Infantry (LCI). The Americans are fast becoming amphibious warfare experts.

July 10

AVIATION: Off Gela, Sicily, German dive bombers attack and sink the destroyer *Maddox* with heavy loss of life.

July 11

NAVAL: Off Sicily, Axis air attacks continue against vessels of Operation Husky, damaging several landing craft and smaller ships. Nonetheless, American light cruisers *Boise* and *Savannah* press close to shore in support of Allied forces, destroying 13 German tanks belonging to the elite Hermann Goering Panzer Division at Gela.

July 12

NAVAL: Off Kolombaranga, Solomon Islands, the destroyer *Taylor* attacks and sinks Japanese submarine *RO-107*.

July 13

AVIATION: Off the Azores, a TBF Avenger bomber launched from the auxiliary aircraft carrier *Core* bombs and sinks German submarine *U-487*.

MILITARY: In Washington, D.C., Brigadier General William “Wild Bill” Donovan, a heavily decorated World War I veteran, is appointed head of the new Office of Strategic Services (OSS), lineal predecessor of the Central Intelligence Agency (CIA). It is tasked with gathering intelligence and conducting sabotage behind enemy lines.

NAVAL: In the Solomon Islands, the Battle of Kolombaranga unfolds as Rear Admiral Walden L. Ainsworth directs three light cruisers and 10 destroyers against Admiral Shunji Izaki’s one light cruiser and five destroyers. Izaki is killed and his flagship *Jintsu* sinks, along with destroyer *Yukakaze*, but Japanese torpedoes badly damage Ainsworth’s three light cruisers while destroyer *Gwin* has to be scuttled. Other Japanese destroyers, serving as troop transports, manage to land reinforcements for the garrison at Kolombangara.

**Donovan, William J. (1883–1959)***Intelligence officer*

William Joseph Donovan was born in Buffalo, New York, on January 1, 1883, and he received a law degree from Columbia University in 1907. He commenced his military career in 1916 by joining Troop One, 1st Cavalry, New York National Guard, and he commanded a company during General John J. Pershing's expedition against Pancho Villa. Donovan had risen to major by the time America entered World War I, and he served with the famous "Fighting 69th" Regiment, which subsequently became the 165th U.S. Infantry. As part of the 27th Infantry Division, he distinguished himself in several operations including Meuse-Argonne, Landres, and St. Georges throughout the summer and fall of 1918. Donovan was wounded three times in the course of action and gained promotion to colonel. He also received the Medal of Honor, the Distinguished Service Medal, and the Distinguished Service Cross for heroism, the first officer to hold all three awards. A score of additional foreign medals made Donovan the most decorated American soldier of World War I. After the war Donovan practiced law and entered politics and, throughout the late 1930s, he was dispatched as a military observer to Europe and Africa by President Franklin D. Roosevelt. His experience overseas convinced him of America's need for a far-ranging intelligence-gathering service, and, in July 1941, Roosevelt appointed him chief of the new Coordinator of Information. American entry into World War II six months later underscored the cogency

of Donovan's arguments and, on June 13, 1942, he became director of the new Office of Strategic Services (OSS) with the rank of brigadier general. He personally recruited thousands of linguists and scholars and molded them into one of the most effective intelligence-gathering organizations in history. His staff were responsible for organizing and supplying resistance movements throughout occupied Europe and Asia, which was accomplished with great success. Over the next three years, OSS operatives provided valuable military information that proved essential to Allied planning, and Donovan was on hand to observe landings at Sicily, Normandy, and Burma. In light of his excellent work he gained promotion to major general in 1943, but two years later he failed to persuade President Harry S. Truman not to disband the OSS. As troubles with the Soviet Union mounted in the early cold war era, he proved instrumental in lobbying for a new, peacetime espionage agency, the Central Intelligence Agency, which was created in 1947. Donovan himself left the intelligence service soon thereafter to pursue law. In 1953 President Dwight D. Eisenhower appointed him ambassador to Thailand. To the end of his life he argued forcefully for a global intelligence effort to counter Soviet espionage and propaganda. Donovan received the National Security Medal in 1957. He died in Washington, D.C., on February 8, 1959, one of the most accomplished spy masters in history. He is regarded as the father of American intelligence services.

July 14

AVIATION: South of the Azores Islands, TBF Avenger bombers from Composite Squadron (VC) 29 are launched from the auxiliary carrier *Santee* and sink the German submarine *U-160*.

MARINES: On New Georgia, light tanks of the 9th Defense Battalion come ashore at Lainana Beach and begin spearheading the drive against Munda Airfield.

July 15

AVIATION: West of the Canary Islands, a PBY Catalina belonging to VP-92 attacks and sinks the German submarine *U-135*.

- South of the Azores, a TBF Avenger bomber flown from the auxiliary carrier *Santee* attacks and sinks the German submarine *U-509*.
- South of Haiti, a Martin PBM Mariner belonging to VP-32 attacks and sinks the German submarine *U-159*.

MILITARY: In Somerset, England, Major General Leonard T. Gerow takes charge of the newly formed V Corps, then part of the First Army.

July 16

AVIATION: In the Atlantic, TBF Avenger bombers from the auxiliary carrier *Core* attack and sink German submarine *U-67*.

July 17–18

AVIATION: Over Bougainville, Solomon Islands, 192 aircraft from the army, navy, Marine Corps, and Royal New Zealand Air Force attack various targets on or near the island, sinking one Japanese destroyer. Marine fighter pilots claim 41 of 52 Japanese aircraft shot down.

MARINES: Near Munda Airfield, New Georgia, a Japanese nighttime counterattack against the American-held beachhead is defeated by elements of the 9th Defense Battalion.

July 18

AVIATION: In the Florida Straits, Blimp K-74 is shot down by deck gunners of German submarine *U-134*; it is the only craft of its kind lost during the war.

MARINES: To help the drive against Bairoko Harbor, New Georgia, the 1st and 4th Raider Battalions begin concentrating their men at Enogai.

July 19

AVIATION: Off the mouth of the Amazon River, a Martin PBM Mariner of VP-74 attacks and sinks German submarine *U-513*.

- A force of 500 American heavy bombers flying from Benghazi, Libya, strikes German and Italian targets in and around the city of Rome. Although special care is taken not to damage sites of cultural or religious significance, 200 people are killed and the raid underscores the preponderance of Allied air power in the theater.

July 20

AVIATION: Off Choiseul, northern Solomons, marine aircraft attack and sink the Japanese destroyers *Yugure* and *Kiyonami*.

NAVAL: After this date the submarine *Runner* fails to report and is presumed lost in action.

MARINES: On New Georgia, the 1st Raider Battalion, assisted by the army's 3rd Battalion, 148th Infantry, attacks dug-in Japanese defenders at Bairoko Harbor; the Americans pull back with heavy losses the following day.

July 21

AVIATION: Off the mouth of the Amazon River, a PBY Catalina belonging to VP-94 attacks and sinks German submarine *U-662*.

- Over Castelvetro, Italy, Lieutenant Charles B. Hall, 99th Fighter Squadron, becomes the first African-American pilot to score an aerial victory by downing a German Fw-190 fighter.

July 22

AVIATION: British intelligence reports that the Combined Bomber Offensive is slowing grinding down the vaunted German Luftwaffe, forcing it to deploy half its resources to defending the homeland.

- In Bougainville Strait, Solomon Islands, Navy dive bombers attack and sink the Japanese seaplane tender *Nisshin*.

MILITARY: Army troops fight their way into Palermo, Sicily, on the western end of the island, cutting off an estimated 50,000 Italian troops. However, more mobile Germans manage to escape to the northeast near the straits of Messina, and they make a determined stand.

MARINES: On Vella Lavella, Solomon Islands, a squad of army, navy, and marine officers comes ashore at Barakoma and reconnoiter for a proposed landing area.

A U.S. armored column rolls through the streets of Palermo, Sicily, on July 22, 1943. (National Archives)

July 23

AVIATION: VP-63 becomes the first navy patrol squadron to be stationed in Great Britain. Its mission to patrol the Bay of Biscay against German U-boats.

- South of the Azores, TBF Avengers launched from the carrier *Bogue* attack and sink German submarine *U-527*.
- Off Brazil, Consolidated PB4Y-1 Privateers from VB-107 attack and sink German submarine *U-598*.

MILITARY: The Seventh Army under Lieutenant General George S. Patton captures its primary objective of Palermo, Sicily, and then maneuvers eastward to take Messina.

NAVAL: South of the Azores, the destroyer *George E. Badger* attacks and sinks the German submarine *U-613*.

July 24

AVIATION: A force of 167 Eighth Air Force bombers strikes aluminum and magnesium plants in Horoya, Norway, employing “splasher beacons” for the first time to form up in poor weather conditions.

July 24–August 3

AVIATION: The German port city of Hamburg is the first target of Operation Gomorrah, part of the Combined Bomber Offensive, as 750 British aircraft attack at night, followed by 200 American Eighth Air Force bombers during the day. The U-boat installations at Kiel are also struck and the ensuing firestorm is estimated to have killed 40,000 people. German defense is tenacious and knocks down 19 American aircraft.

July 25

DIPLOMACY: King Victor Emmanuel III forces Italian dictator Benito Mussolini to resign after 21 years in power. He is replaced by Marshal Badoglio. The Italian government begins immediately to explore reaching a political accommodation with the Allies.

July 25–August 7

MILITARY: On New Georgia Island, the Solomons, men of the 37th and 45th Infantry Divisions (XIV Corps) overcome jungle terrain and Japanese tenacity as they inch toward Munda Airfield.

MARINES: The drive against Munda Airfield is assisted by light tanks of the 9th and 10th Defense Battalions.

July 26

AVIATION: Off Haiti, a PBM Mariner attacks and sinks German submarine *U-359*.

- A force of eight B-24 Liberators from the Seventh Air Force attack Japanese installations on Wake Island. They also claim eight intercepting Zeroes are shot down.

July 28

AVIATION: The Eighth Air Force stages its deepest penetration of German airspace to date by striking at aircraft factories and assembly plants in Kassel and Oschersleben. The force of 300 loses 22 bombers; for the first time, German

fighters attack the bomber stream with unguided rockets. An escort of P-47 Thunderbolts was provided which could not accompany the bombers to the targets but did manage to shoot down nine aircraft for a loss of one.

- Over France, Flight Officer John C. Morgan's B-17 is attacked by fighters that critically wound the pilot; he manages to command the aircraft for the rest of the mission and back, winning a Medal of Honor.

NAVAL: At Kiska, Aleutian Islands, a Japanese task force under Vice Admiral Shiro Kawase steals inland under the noses of nearby American forces and evacuates the 5,183-man garrison there.

July 29

AVIATION: The Ninth Air Force dispatches 200 P-40 Warhawks on a mission to bomb and strafe targets at Messina, Sicily; this is the largest single sortie of the entire campaign to date.

July 30

AVIATION: While flying top cover for convoy TJ 2 off Brazil, a Lockheed PV-1 Ventura of VB-127 attacks and sinks German submarine *U-591*.

- In the Atlantic, TBF Avenger bombers launched from the escort carrier *Santee* attack and sink German submarine *U-43*.

NAVAL: Off the Tunisian coast, German submarine *U-375* is sunk by submarine chaser *PC-624*.

July 31

AVIATION: Off Rio de Janeiro, Brazil, A PBM Mariner attacks and sinks German submarine *U-199*.

August 1

AVIATION: A force of 177 B-24 Liberator heavy bombers from five bomb groups, Ninth Air Force, carried out Operation Tidalwave by striking the strategic oil fields of Ploesti, 50 miles north of Bucharest, Romania. The attack, badly mishandled, inflicts considerable damage while the assault sustains a loss of 54 aircraft and 532 airmen. Five Medals of Honor are awarded for heroism and sacrifice. A force of 230 P-40 Warhawks are again sent to Messina, Sicily, to bomb and strafe multiple targets there.

- Over New Georgia, navy and marine aircraft supply close air support to units encountering fierce Japanese resistance near Munda Airfield.

August 2

AVIATION: The Allied invasion of Italy commences when American aircraft begin bombing positions in and around Naples.

NAVAL: While patrolling at night off Kolombangara, *PT-109* is rammed by Japanese destroyer *Amagiri* and sunk. Lieutenant John F. Kennedy (the future 35th president of the United States) manages to shepherd his 11 survivors to the nearest island, where they are finally rescued on August 7. Kennedy receives the Navy and Marine Corps Medal.

August 3

AVIATION: North of Dutch Guiana, a PBM Mariner belonging to VP-205 attacks and sinks German submarine *U-572*.

These three female pilots leaving their ship at the four engine school at Lockbourne are members of a group of WASPs who have been trained to ferry the B-17 Flying Fortresses. (U.S. Air Force)

NAVAL: Off Tunisia, the destroyer *Buck* attacks and sinks the Italian submarine *Argento*.

August 4–5

MARINES: On New Georgia, Solomon Islands, the final drive against Munda Airfield is spearheaded by light tanks of the 9th and 10th Defense Battalion; by this time all Japanese resistance crumbles.

August 5

AVIATION: The Women's Flying Training Detachment merges with the Woman's Auxiliary Ferrying Squadron to form the new Women's Air Force Service Pilots (WASP) under noted aviatrix Jacqueline Cochran. Meanwhile, Nancy Harkness Love becomes an executive within the Ferrying Division of Air Transport Command. Both retain civilian status and are never considered members of the military establishment.

NAVAL: Off Cape Henry, New Jersey, the gunboat *Plymouth* is torpedoed and sunk by German submarine *U-566*.

August 6

NAVAL: Off Vella Lavella, a wild nighttime melee between seven American destroyers under Commander Frederick Moosbrugger and four Japanese destroyers results in the sinking of the *Arashi*, *Hagikaze*, and *Kawakaze*. Another attempt to deliver supplies and reinforcements to the island garrison has failed. This is also the navy's first unequivocal victory in a night action.

MARINES: In the Solomon Islands, the 9th Defense Battalion begins transferring its assets from Rendova Island to newly acquired Munda Airfield, New Georgia.

August 7

AVIATION: The Army Air Force Redistribution Center is established to process and reassign returnees arriving from overseas.

- In the North Atlantic, a PB4Y-1 Privateer from VB-105 attacks and sinks German submarine *U-84*.

August 7–9

AVIATION: West of the Azores Islands, TBF Avengers flying from the escort carrier *Card* attack and sink German submarines *U-117* and *U-664*.

August 11

MILITARY: In Quebec, Canada, President Franklin D. Roosevelt and Prime Minister Winston Churchill meet to discuss the progress of current military operations around the globe and begin setting future courses of action.

NAVAL: In the South Atlantic, German submarine *U-604* is scuttled after incessant air attacks by U.S. Navy patrol aircraft.

August 13

AVIATION: For the first time in the war, bombers of the Northwest African Strategic Air Force lift off from bases in Italy and strike targets in southern Germany.

NAVAL: In light of unsustainable attrition in terms of aircraft and destroyers, Japanese Imperial Headquarters suspends any further attempts to reinforce the Solomon Islands.

August 13–19

MARINES: On New Georgia, Marines of the 9th Defense Battalion employ 155mm cannon to help finish off Japanese defenders on Baanga Island.

August 14

AVIATION: The 2nd Marine Air Wing and Marine Air Group 14 shift their headquarters to Munda Airfield, New Georgia.

August 15

AVIATION: Marine fighters flying from Munda Airfield, New Georgia, provide air cover for amphibious operations on nearby Vella Lavella, shooting down 17 Japanese aircraft.

MILITARY: A force of 34,000 Americans and Canadians under Major General Charles H. Corlett recapture Kiska in the Aleutian Islands, which the Japanese stealthily evacuated on July 28. Among the units participating is the First Special Service Force under Colonel Robert T. Frederick, subsequently known as the “Devil’s Brigade.”

- At Vella Lavella, Solomon Islands, the 25th Division (“Tropic Lightning”) of Brigadier General Robert B. McClure lands Regimental Combat Team 35 and establishes a beachhead. They are gradually assisted by men of the 4th Defense Battalion, Marine Corps.

NAVAL: At Kiska, naval forces under Vice Admiral Thomas C. Kinkaid conduct major amphibious operations, discovering that the Japanese have stealthily abandoned the entire Aleutians chain.

- Task Force 34 under Rear Admiral Theodore S. Wilkinson conducts amphibious landings at Vella Lavella, Solomon Islands. Among the units posted there is the 58th Naval Construction Battalion (Seabees). This is part of an overall strategy to “leap frog” over Japanese strongpoints in the Pacific to neutralize strongly garrisoned Kolombangara.

August 16

AVIATION: In the Southwest Pacific, P-38 Lightnings and P-47 Thunderbolts sweep down on Japanese targets at various locations, claiming 12 enemy aircraft downed. The action marks the debut of P-47s in the Pacific.

MARINES: At Camp Pendleton, California, the 4th Marine Division is activated from the 23rd, 24th and 25th Marines, 14th Marines (artillery), and 20th Marines (Pioneers).

August 17

AVIATION: On the one-year anniversary of the Eighth Air Force’s first air raid, a force of 315 B-17 Flying Fortresses stage their first attack on the ball-bearing plants in Schweinfurt, Germany, and the Messerschmitt aircraft factory at Regensburg. This is the deepest American penetration of German airspace to date and 724 tons of bombs are dropped, but the bomber streams lose 20 percent of their number—60 B-17s—to ferocious German resistance. No further raids are mounted until September 6.

- A raid by 200 American aircraft flying off a secret airstrip 60 miles west of Lae, New Guinea, completely surprises Japanese air units in the Lae-Salamaua region, decimating the units as a fighting force.

MILITARY: Allied mop-up operations on Sicily end with the capture of Messina by Lieutenant General George S. Patton’s Seventh Army; the entire campaign costs the British and Americans 25,000 casualties to an Axis tally of 167,000 killed, wounded, and captured. However, no less than 39,500 Germans and 62,000 Italians escape across the straits to mainland Italy.

August 17–24

NAVAL: In Quebec, Canada, President Franklin D. Roosevelt, Prime Minister Winston Churchill, and the Joint Chiefs of Staff conduct the so-called Quadrant Conference, which resolves to concentrate on defeating Italy, working closely with the Soviet Union, and launching additional offensives in the Pacific theater. May 1, 1944 becomes the assigned date for the impending cross-channel invasion of France.

August 18

AVIATION: Over Wewak, New Guinea, a strike force of 70 Allied bombers, escorted by 100 fighters, sweeps over Japanese airfields, destroying aircraft, many on the ground and another 30 in the air. During the attack, a B-25 flown by Major Ralph Cheli, Fifth Air Force, is severely damaged but he elects to continue flying the mission, then crashes into the sea. He is captured but does not survive the war, winning a Medal of Honor posthumously.

August 19

AVIATION: At Ewa Field, Hawaii, the 4th Marine Base Defense Aircraft Wing ships outs for the Central Pacific.

- Off Australia, a Vought OS2U Kingfisher from VS-57 assists the New Zealand corvette *Tui* in sinking the Japanese submarine *1-17*.

August 20

AVIATION: Major General George C. Stratemeyer is appointed head of Army Air Force, China-Burma-India (CBI), with headquarters in New Dehli.

August 21

AVIATION: In Alaska, a final tally of Eleventh Air Force records reveals that 69 enemy aircraft have been shot down, 21 ships sunk, and 29 damaged, and 29 aircraft lost since June 3, 1942.

August 25

AVIATION: In England, Eighth Air Force planners commence work on Operation Starkey, designed to prevent Germany from redeploying its air assets to the Russian front and, instead, keeping them tangled up in a war of attrition over the homeland.

NAVAL: Off San Cristobal, Solomon Islands, the destroyer *Patterson* attacks and sinks the Japanese submarine *RO-35*.

MARINES: At Camp Elliott, California, the new V Amphibious Corps under Major General Holland M. Smith is forged from the Amphibious Corps, Pacific Fleet. Training functions are handed off to the Troop Training Unit, Pacific Fleet.

August 27

AVIATION: Over Watten, Germany, 180 Eighth Air Force bombers unload their ordnance on V-1 and V-2 rocket-launching sites for the first time.

- At Carney Field, Guadalcanal, radar-equipped SB-24 "Snooper" bombers, capable of attacking targets in all kinds of weather, begin operations.

NAVAL: In the Atlantic, TBF Avenger bombers from the escort carrier *Card* attack and sink the German submarine *U-847*.

MARINES: In the Ellice Islands, the 2nd Marine Airdrome Battalion, accompanied by Seabee units, occupies Nukufetau Atoll to construct an airfield in anticipation of an offensive against the Gilbert Islands.

August 28

AVIATION: Over Bougainville, Lieutenant Alvin J. Jensen is credited with damaging or destroying 24 Japanese aircraft at Kahili Airfield.

MARINES: New Georgia, Solomon Islands, is declared secure; the 1st Raider battalion returns to Guadalcanal. Marines losses total 221 killed and 415 wounded.

- Nanomea Island is occupied by the 7th Defense Battalion. Seabee units begin constructing an airfield to support an offensive against the Gilbert Islands.

August 30

AVIATION: Over Rabaul, New Britain, Lieutenant Ken Walsh flames four Zeroes for a total of 20 air-to-air victories. He survives crashing in the water due to damage and subsequently wins the Medal of Honor.

August 31

AVIATION: Task Force 15 under Rear Admiral Charles A. Pownall launches the first wave of air strikes against Japanese installations on Marcus Island, 800

miles northwest of Wake. This action also signals the debut of new Essex and Independence carriers, along with the new Grumman F6F Hellcat fighter, nemesis of the A6M Zero.

September 1

AVIATION: To date, U.S. warplane production totals 123,000 aircraft and 350,000 aircraft engines; in a war of protracted attrition, these are levels of production that the Axis powers cannot compete with.

- In the Southwest Pacific, B-24 and B-25 bombers of the Fifth Air Force unload 201 tons of bombs over Alexishafen-Mandang, its heaviest single mission tally to date.
- Complete responsibility for airborne warfare against German submarines in the Atlantic Ocean region is delegated to the U.S. Navy.

MILITARY: Former officers of the WAAC are sworn into the new Women's Army Corps (WAC) while 50,000 members of the former also elect to join.

NAVAL: The *Ashland* becomes the first landing ship dock (LSD) committed to combat operations when it participates in landings on Baker Island, Central Pacific.

September 2

AVIATION: In Southern California, Marine Corps Air Base Kearny Mesa is renamed Marine Corps Air Depot Miramar.

September 3

DIPLOMACY: In Rome, Marshal Pietro Badoglio signs a secret armistice with the Allies and pledges to cease all resistance as of September 8.

NAVAL: Near Espiritu Santo, the destroyer *Ellet* attacks and sinks Japanese submarine *I-25*.

September 4

MILITARY: In Oran, North Africa, the 100th Infantry Battalion, comprised most of Nisei (second-generation Japanese Americans) arrives as part of the 34th (Red Bull) Infantry Division before shipping out to Italy.

NAVAL: At Lae, New Guinea, the 9th Australian Division and its equipment are landed by ships of Task Force 76 under Rear Admiral Daniel E. Barbey. The Japanese respond with a sharp air raid, which damages the destroyer *Conyngham* and two tank-carrying vessels. On *LST-473*, Seaman First Class Johnny D. Hutchins is wounded by a bomb blast, yet he bravely mans the pilot house and steers his ship clear of an oncoming torpedo, winning a posthumous Medal of Honor.

September 5

AVIATION: The Ninth Air Force, having flown 1,060 missions, dropped 36 million pounds of bombs, shot down 666 Axis aircraft, and sunk 109 enemy ships, concludes its Mediterranean mission and begins transferring aerial assets back to England.

- On northern New Guinea, the Fifth Air Force deploys 82 C-47 transports to drop paratroopers who seize Nadzab airfield west of Lae, which is soon employed against the Japanese. Shortly afterward, the Australian 7th Division is flown in by transports.

September 6

AVIATION: Over Stuttgart, Germany, the Eighth Air Force conducts its first 400-bomber mission; poor weather fouls up bombing results and 45 bombers are lost to fighters and flak.

September 8

AVIATION: After the Italian armistice is announced the Italian navy sorties out to surrender to the Allies. A vengeful Luftwaffe attacks the vessels, sinking the battleship *Roma*.

September 9

AVIATION: Operation Starkey commences with a 300-bomber raid near Paris, France, but the Luftwaffe fails to mount serious opposition.

- The Twelfth Air Force commences Operations Avalanche and Slapstick in support of the invasion of Italy, which are continued for the rest of the year.

NAVAL: In the South China Sea, a Japanese transport vessel rams and sinks the submarine *Grayling*.

September 9–16

MILITARY: Operation Avalanche unfolds as the Fifth Army under Lieutenant General Mark W. Clark, eager to maintain the strategic initiative, splashes ashore at Salerno on the Italian mainland. The main force, VI Corps under Major General John P. Lucas, is tasked with seizing Salerno itself while Field Marshal Bernard Montgomery's British X Corps lands farther south at Taranto. The Germans resist tenaciously and a tank-mounted counterattack almost reaches the beachhead. At length the Germans are repulsed by naval gunfire and they withdraw under the skilled leadership of Field Marshall Albert Kesselring.

NAVAL: Task Force 80 under Vice Admiral H. Kent Hewitt lands General Mark W. Clark's Fifth Army ashore at Salerno, Italy. Strong German counterattacks threaten the beachhead, and the fleet responds with close support fire that destroys several panzers.

September 11

AVIATION: On Banika, Central Pacific, VMF (N)-531 begins flying the Marine Corps first night combat missions.

NAVAL: Off Salerno, Italy, German motor torpedo boats sink the destroyer *Rowan*, killing 202 of 273 men on board, while Luftwaffe Do-17 bombers unleash rocket-propelled bombs that badly damage the light cruiser *Savannah*.

September 13

AVIATION: At March Field, California, glider expert Richard Dupont is killed in a training accident; he was previously a special assistant to General Henry H. Arnold.

- Over Salerno, Italy, more than 80 C-47s belonging to the 52nd Troop Carrier Wing drop 1,200 men of the 82nd Airborne Division directly onto the combat zone; the operation, though perilous, is completely successful.

September 15

AVIATION: East of San Cristobal, Solomon Islands, a PBY Catalina of VP-23, acting in concert with the destroyer *Saufley*, attacks and sinks Japanese submarine *RO-101*.

Clark, Mark W. (1896–1984)

Army general

Mark Wayne Clark was born in Sacketts Harbor, New York, on May 1, 1896, and he graduated from the U.S. Military Academy in 1917. He shipped to France in World War I to serve as an infantry officer, was wounded during the Aisne-Marne offensive, but recovered in time to distinguish himself in the Saint-Mihiel and Meuse-Argonne campaigns. Clark came home in 1919 and, over the next two decades, he served in a variety of staff and command positions. He passed through the Army War College in 1940 as a lieutenant colonel and joined the general Staff in Washington, D.C., where he came to the attention of U.S. Army chief of staff George C. Marshall. Impressed with his competence and martial demeanor, Marshall placed him on a fast track to high-level staff positions. After the United States entered World War II, Clark rose to major general and distinguished himself by landing in Vichy-occupied North Africa to secretly confer with French officials. Consequently,

French resistance during Operation Torch was minimal, and Clark became the youngest lieutenant general in army history. He also received command of the new Fifth Army, a coalition force of American, British, and Canadian forces, and he spearheaded the drive to capture Sicily in the summer of 1943. Clark next led his men onto the mainland at Salerno, Italy, where German defenses were fierce and managed to thwart the Allies until October 1, 1943. At one point Clark was forced to command a unit on the beachhead to thwart a German tank attack.

Clark managed to liberate Naples but he faced a daunting task of battering his way up the mountainous Italian Peninsula, skillfully defended by crack German troops. After failing to break through the Gustav Line, he ordered the ancient monastery at Monte Cassino bombed to deny its use to the Germans, engendering much controversy. In January 1944 he also launched a failed attempt to flank German defenses at

MILITARY: The Japanese garrison at Lae, New Guinea, faced with envelopment by American and Australian forces, evacuates by sea.

MARINES: Command of the I Marine Amphibious Corps goes to Major General Charles D. Barrett.

- In New Zealand, the 2nd Marine Division is assigned to the V Amphibious Corps under Major General Holland M. Smith in anticipation of attacking Tarawa Atoll.

September 16

AVIATION: Over southern Bougainville, Major Gregory “Pappy” Boyington, a former Flying Tiger now commanding VMF-214, flames five Zeroes in his F4U Corsair.

MARINES: In the Central Pacific, light tanks of the 9th, 10th, and 11th Defense Battalions assist army troops to crush Japanese opposition on Arundel Island; the struggle lasts five more days.

Anzio, which ended in another costly stalemate. It was not until June 4, 1944, after suffering heavy casualties, that the Fifth Army could liberate Rome. Clark did so by deliberately disobeying orders from his superior, British general Harold Alexander, which severely strained relations between the Allies. More costly failures against the new German Gothic Line ensued, but, in December 1944, Clark was promoted to command the 15th Army Group while the Fifth Army reverted to General Lucian K. Truscott. After the war, Clark served as high commissioner to the Austrian government, and, in 1952, he succeeded General Matthew Ridgway as supreme commander in Korea. He managed to secure a cease-fire and general prisoner exchange in May 1953, but he was unhappy with the lack of victory. Clark then concluded 36 years of service by retiring. He served several years as head of the Citadel in Charleston, South Carolina. He died in Washington, D.C., on April 17, 1984, a talented but undistinguished combat commander. Given the

Lieutenant General Mark Clark on the USS Ancon during the Sicily Campaign (*National Archives and Records Administration*)

difficulties of the Italian campaign, it is unlikely another general could have done better.

September 18

AVIATION: A combined force of Army B-24 Liberators and carrier-based aircraft from Task Force 15 under Rear Admiral Charles A. Pownall begin joint air strikes on Tarawa Atoll, Gilbert Islands.

MILITARY: The Italian government surrenders to the Allies and those forces not under direct German control switch sides.

September 19

AVIATION: Marine Air Group 23 deploys at Ewa Field, Hawaii.

MILITARY: The Mediterranean island of Sardinia falls to Allied forces while French and Italians on nearby Corsica also revolt against German occupation.

September 20

AVIATION: Over Bougainville, a P-38 flown by Lieutenant Henry Meigs II, 6th Night Fighter Squadron, flames two Japanese aircraft in only two minutes.

MARINES: The new 4th Marine Division is assigned to the V Amphibious Corps under Major General Holland M. Smith.

September 22

AVIATION: In an attempt to lessen heavy losses, Eighth Air Force B-17s fly a nighttime mission alongside Royal Air Force bombers; in the end, the Army Air Force determines to stick to daylight, precision bombing.

- After flying its final mission from North Africa, B-24s of the IX Bomber Command transfer to the Twelfth Air Force in Italy.

NAVAL: At Finschhafen, New Guinea, the 20th Australian Brigade are landed at Huon Bay under the direction of Rear Admiral Daniel E. Barbey of Task Force 76. They are strongly resisted by members of the Japanese Special Naval Landing Force.

- Marine and navy officers, assisted by New Zealand Scouts, reconnoiter around Choiseul Island, northern Solomons, for possible landing zones.

September 23

MILITARY: American and British forces driving north from Salerno bog down in rough terrain and tough German resistance. However, Naples and Foggia are soon in Allied hands.

NAVAL: On the northeast coast of Bougainville, the submarine *Gato* surfaces and lands a navy-marine scouting party, while another party, carried by the submarine *Guardfish*, debarks at Empress Augusta Bay. The latter finds the area lightly defended and suitable for airfield construction.

September 24

NAVAL: In the Gulf of Salerno, Italy, the minesweeper *Skill* is struck by torpedoes fired by German submarine *U-593*, sinking in 20 minutes with 32 survivors from a total complement of 103 men.

MARINES: A scouting party drawn from the 1st Marine Division puts ashore on western New Britain to reconnoiter; they return on October 6.

September 25

NAVAL: The submarine *Pompano* radios about sinking a transport off the Japanese coast, then disappears.

MARINES: At Vella Lavella, Solomon Islands, the advance echelon of I Marine Amphibious Corps begins arriving.

September 27

AVIATION: Off Brazil, a PBM Mariner of VP-74 attacks and sinks German submarine *U-161*.

- In England, two significant firsts: the first mission is flown with bombers guided by a pathfinder aircraft outfitted with British-developed H2S direction-finding radar, enabling accurate bombing through heavy overcast. Equally significant, P-47 Thunderbolts equipped with droppable belly tanks provide fighter escorts for bombers flying to Emden and back, a distance of 600 miles.

September 28

NAVAL: In the Sulu Sea off Panay Island, the submarine *Cisco* is sunk by Japanese action.

September 28–October 2

AVIATION: The 503rd Parachute Infantry drops over Lae, New Guinea, in concert with an offensive by the Australian 9th Division.

MILITARY: In the Solomons, Japanese forces evacuate Kolombangara to avoid being encircled by American forces on New Georgia and Vella Lavella.

September 29

MILITARY: On HMS *Nelson* off the coast of Malta, General Dwight D. Eisenhower and Marshal Badoglio conclude Italy's formal surrender agreement.

October 1

AVIATION: Eighth Air Force intelligence reports that, despite a terrific pounding, German fighter production has actually increased thanks to moving production facilities underground; air resistance over the homeland remains strong as ever.

MILITARY: The American Fifth Army under Lieutenant General Mark W. Clark enters the city of Naples, Italy, although vindictive German forces damage many cultural institutions before retreating to punish the Italians for surrendering. The first unit to arrive is the 82nd Airborne Division. Within days American forces have advanced north to the Volturno River.

October 2

AVIATION: The Aerojet XCAL-200, the nation's first rocket-powered airplane, is successfully tested.

October 3

AVIATION: At the Lewis Flight Propulsion Laboratory, NACA technicians oversee the first successful test of a turbojet afterburner.

NAVAL: Off Finschhafen, New Guinea, the destroyer *Henley* is torpedoed and sunk by Japanese submarine *RO-108* with a loss of 17 lives.

October 4

AVIATION: Off the Norwegian coast, fighters, dive bombers, and torpedo bombers launched from the carrier *Ranger* under Rear Admiral Olaf M. Hustvedt attack German shipping, sinking four transports and steamers. This is the sole American action in northern Europe.

- North of the Azores Islands, TBF Avengers launched from the escort carrier *Card* spy four German U-boats conducting supply operations at sea and attack, sinking German submarines *U-460* and *U-422*.
- Southwest of Iceland, a Lockheed PV-1 Ventura attacks and sinks German submarine *U-279*.

October 5–6

AVIATION: Major General James H. Doolittle temporarily replaces Lieutenant General Carl A. Spaatz as commander of the Twelfth Air Force.

- Wake Island in the Pacific is the object of a carrier raid launched by Task Force 14 under Rear Admiral Alfred E. Montgomery, whose cruisers also shell Japanese positions.

October 6

AVIATION: On American Samoa, Marine Air Group 31 commences operations.

NAVAL: The Battle of Vella Lavella commences as destroyers *O'Bannon*, *Chevalier*, and *Selfridge* engage a large Japanese convoy under Rear Admiral Matsuji Ijuin, which is carrying troopships to that island. The destroyer *Yugumo* is sunk outright while *Chevalier* is badly hit and scuttled. The Japanese garrison is successfully evacuated after this, the final naval engagement in the central Solomon Islands.

October 7

AVIATION: Aircraft of the 422nd Bombardment Squadron, Eighth Air Force, complete their first nighttime drop of propaganda leaflets over Paris, France.

NAVAL: In the northern Pacific off the Kamchatka Peninsula, the destroyer *S-44* is attacked and sunk by the destroyer *Ishigaki*.

October 8

AVIATION: Over Bremen and Vegesack, Germany, a stream of 350 Eighth Air Force bombers strikes industrial targets and U-boat pens, losing 30 aircraft in return. This is also the first mission to employ electronic jamming equipment against German radar.

MARINES: After Major General Barrett dies in an accident, he is replaced by Major General Alexander Vandegrift.

October 9

NAVAL: In the Gulf of Salerno, Italy, German submarine *U-616* torpedoes the destroyer *Buck*, which sinks four minutes with a loss of 166 lives.

October 10

AVIATION: An Army Air Force aircraft drone flies for the first time using a closed circuit television screen to monitor feedback.

October 11

AVIATION: Over Wewak, New Guinea, Colonel Neal Kearby leads a flight of four P-47 Thunderbolts on a reconnaissance mission, whereupon he single-handedly shoots down six Japanese aircraft. Kearby receives a Medal of Honor for his efforts.

October 12

AVIATION: A force of 350 Allied fighters and bombers drawn from the Fifth Air Force and the Royal Australian Air Force launch a massive air strike against Japanese shipping and installations at Rabaul, New Britain; three vessels and 50 aircraft are claimed to be sunk or destroyed.

October 12–15

MILITARY: Men of the Fifth Army slog into the Liri Valley, Volturno River region, across a 40-mile front and in the face of stiff German resistance.

October 13

AVIATION: In Sunninghill Park, England, Major General Lewis H. Brereton assembles his staff and begins putting his Ninth Air Force into operational readiness for a new mission into western Europe.

- North of the Azores Islands, a TBF Avenger launched from the escort carrier *Card* attacks and sinks German submarine *U-402*.
- Off the Algerian coast, the destroyer *Bristol* is torpedoed and sunk by German submarine *U-371* with a loss of 52 lives.

October 14

AVIATION: A force of 230 Eighth Air Force B-17s makes a second bombing raid against German ball-bearing plants in Schweinfurt, losing 60 aircraft to German fighters, which launch unguided rockets into the massed bomber streams. A further 138 aircraft are badly damaged. In the face of such losses, the Americans cancel any deep penetrations of German airspace without fighter escort.

October 15

AVIATION: In England, Headquarters, U.S. Army Air Forces, United Kingdom, is established as a liaison between the Eighth Air Force already there and the Ninth Air Force, under Major General Lewis H. Brereton, now arriving from the Mediterranean. The latter is employed as a tactical strike arm.

October 16

AVIATION: General Henry H. Arnold recommends that the Fifteenth Air Force be established in Italy, where better weather conditions will allow it to bomb German targets during the usually harsh winter. In this manner it will supplement the Combined Bomber Offensive already in play from England.

October 17

NAVAL: Off Honshu, Japan, the submarine *Tarpon* sinks the German surface raider *Michel*.

October 19–30

DIPLOMACY: The Moscow Conference unfolds as Secretary of State Cordell Hull, British foreign secretary Sir Anthony Eden, and Soviet foreign secretary Vyacheslav Molotov confer over Allied strategy. The Western leaders assure Molotov that the Allies will land in France no later than May 1944, while the Soviets hint that they might enter the war against Japan. Postwar considerations are also discussed, and the powers agree to establish a European Advisory Commission once hostilities cease.

October 20

AVIATION: North of the Azores Islands, TBF Avengers launched from the escort carrier *Core* attack and sink German submarine *U-378*.

- On Efate, New Hebrides, the 2nd Marine Air Wing begins operating as a training command.

MARINES: At Camp Pendleton, California, the 1st Joint Assault Signal Company forms; its purpose is to coordinate air and fleet supporting fire during amphibious operations.

October 21

NAVAL: Tragedy strikes in the Atlantic as the tanker *Bulkoid* collides with the destroyer *Murphy*, slicing its bow off. The latter is towed back to port and repaired in time to participate in the Normandy landings.

October 24

NAVAL: In the Atlantic, the submarine *Dorado* is reported overdue and assumed lost at sea.

October 25

AVIATION: Over Rabaul, New Britain, a force of 60 B-24s from the Fifth Air Force strike Japanese airfields, destroying 50 aircraft on the ground and in the air.

October 26–November 4

MILITARY: The Fifth Army's VI Corps crosses the Volturno River, beats down German opposition, and reaches the entrance to the Liri Valley, Italy.

October 27

MILITARY: In Washington, D.C., the War Department creates two special medals for the hard-slogging infantry: the Combat Infantry Badge (CIB) and the Expert Infantry Badge (EIB).

- In the Pacific, American forces seize Mono and Stirling in the Treasury Islands for the purpose of staging the invasion of Bougainville.

October 28

MARINES: On Choiseul Island, the 2nd Parachute Battalion under Lieutenant Colonel Victor H. Krulak debarks from destroyers and makes an unopposed landing; this is actually a diversion from the main thrust against Bougainville.

October 30

MARINES: On Choiseul Island, men of the 2nd Parachute Battalion destroy a staging point for Japanese barges.

October 31

AVIATION: North of the Azores, TBF Avengers of the escort carrier *Card* attack and sink German submarine *U-584*, then on its 10th war patrol.

- Over Vella, LaVella, a radar-equipped Marine Corps F4U flown by Lieutenant H. D. McNeil destroys a Japanese G4M bomber flying a nighttime intruder mission.

November

AVIATION: In light of impressive German advances, General Henry H. Arnold advises greater effort on guided missile programs. Dr. Theodor von Kármán, Arnold's principal scientific adviser, draws up extensive plans to acquire such long-range weapons.

November 1

AVIATION: At Tunis, Tunisia, General James H. Doolittle accepts command of the new Fifteenth Air Force and prepares to relocate his men and heavy bombers to Italy for attacks against Germany proper.

MILITARY: The XIV Corps (37th and 43rd Infantry Divisions) continue mop up operations in the Solomon Islands by attacking Bougainville on the northern part of the chain. Though outnumbered, the sizable Japanese garrison resists gamely and even launches a major counterattack, August 7–8.

NAVAL: The aged destroyer *Borie* under Lieutenant Commander Charles H. Hutchins engages German submarine *U-405* in a desperate night engagement 700 miles north of the Azores. *Borie* manages to ram its adversary, which surrenders then gradually sinks from bow damage.

- Task Force 31 under Rear Admiral Theodore S. Wilkinson lands soldiers and Marines at Empress Augusta Bay, Bougainville, in the northern Solomons.
- Task Force 39 under Rear Admiral Aaron S. Merrill dispatches destroyers and cruisers to shell Japanese positions on Shortland Island, assisted by aircraft launched by carriers *Saratoga* and *Princeton*.

MARINES: The 3rd Marine Division under Major General Allen H. Turnage goes ashore at Cape Torokina, Empress Augusta Bay, on the western coast of Bougainville. Japanese defenses there are overwhelmed and a secure beachhead is quickly established. Success here will place the main Japanese garrison on Rabaul at the mercy of American tactical air power.

November 2

AVIATION: The Fifteenth Air Force under Major General James H. Doolittle flies its first combat mission by launching 74 B-17s and 38 B-24s against industrial targets in Wiener-Neustadt, Austria. They also enjoy the luxury of a P-38 fighter escort en route.

- General Douglas MacArthur orders a preemptive air strike against Japanese forces gathering at Rabaul, New Britain, to forestall any possible offensives against Empress Augusta Bay. The Fifth Air Force complies with B-25 Mitchells and P-38 Lightnings, which send 94,000 tons of shipping to the bottom; American losses are 21 aircraft. During the attack Major Raymond H. Wilkins's B-25 is badly damaged by anti-aircraft fire, but he manages to complete his bomb run before crashing into the sea; he wins a posthumous Medal of Honor.

NAVAL: The Battle of Empress Augusta Bay unfolds when Rear Admiral Aaron S. Merrill's Task Force 39 (four light cruisers and eight destroyers) encounters a larger Japanese squadron under Rear Admiral Sentaro Omori, commanding two cruisers, two light cruisers, and six destroyers. Omori intends to disrupt American landing operations at Bougainville. The light cruiser *Sendai* and destroyer *Hatsukaze* are sunk in a swirling battle while four American vessels sustain damages. This is also the first battle in which Captain Arleigh A. ("31 Knot") Burke distinguishes himself.

- South of Honshu, Japan, a Japanese convoy is ravaged by submarines *Seahorse*, *Halibut*, and *Trigger*, losing five transports.

MARINES: On Choiseul Island, the 2nd Parachute Battalion attacks Japanese installations on Guppy Island just off the coast. They are assisted by several motor torpedo boats, including one commanded by Lieutenant John F. Kennedy, a future president.

November 3

AVIATION: A force of 530 Eighth Air Force B-17s and B-24s, guided by nine pathfinders employing H2X search radar, strike the German port of Wilhelmshaven. The bomber stream enjoys a complete fighter escort of P-38 Lightnings for the first time.

November 4

MARINES: On Choiseul, the 2nd Parachute Battalion makes an amphibious departure without enemy interference.

November 5

NAVAL: Southwest of Ascension Island, Navy PB4Y Privateers of VB-107 and Army Air Force B-25 Mitchells of the 1st Composite Squadron attack and sink German submarine *U-848*.

- In the Pacific, Rear Admiral Frederick C. Sherman launches Task Force 38 aircraft on a surprise strike against Japanese installations on Rabaul, New Britain.

Nine vessels belonging to Admiral Mineichi Koga's are reported damaged, including the heavy cruisers *Atago*, *Chikuma*, *Maya*, *Mogami*, and *Takao*; 10 American aircraft are lost from a strike force of 97. This attack also eliminates any possibility of Japanese action against the landing sites on Bougainville.

November 5–15

MILITARY: In southern Italy, the Fifth Army's impressive progress grinds to a halt after it encounters the German Winter Line near Migano Gap. Resistance proves so stiff at Mount la Difensa that the VI Corps is ordered to pull back in the face of harsh weather. The First Special Service Force under Colonel Robert T. Frederick is called up to assist the II Corps to reduce several German strongpoints.

November 6

NAVAL: An Allied convoy off Cape Bougaroun, Algeria, is bombed and torpedoed by German aircraft, which sink the destroyer *Beatty* and the transport *Santa Elena*.

MARINES: On Cape Torokina, final elements of the 3rd Marine Division come ashore as reinforcements.

November 6–7

AVIATION: B-24s belonging to the Tenth Air Force in India commence night bombing operations along the Rangoon River, Burma.

November 7

MARINES: On Bougainville, Japanese reinforcements landing west of the American perimeter along the Koromokina River are repelled by the 3rd and 9th Marines.

November 7–10

MARINES: On Bougainville, men of the 2nd and 3rd Raider Battalions attack down the Piva Trail, which is the only avenue out of their jungle-infested perimeter; gradually, the 9th Marines are drawn into the struggle.

November 9

AVIATION: On Bougainville, Major General Roy S. Geiger assumes command of the I Amphibious Corps and the ensuing campaign there.

NAVAL: The submarine *Wahoo* under celebrated Captain Dudley W. ("Mush") Morton disappears on its fifth war patrol, apparently the victim of a Japanese antisubmarine aircraft. Previously, it had sunk a further four Japanese transports in the Sea of Japan.

November 10

AVIATION: In the Bay of Biscay, navy PB4Y-1 Privateers join Royal Air Force aircraft in sinking German submarine *U-966*.

- On Bougainville, marine dive bombers lend close air support during the final drive against Piva.

November 11

AVIATION: Bombers and fighters of the Fifth and Thirteenth Air Forces strike Japanese airfield on Rabaul, New Britain, in concert with navy forces.

- Task Group 50.3 under Rear Admiral Alfred E. Montgomery joins Task Force 28 under Rear Admiral Frederick C. Sherman in a joint air strike against Japanese shipping at Rabaul, New Britain. This attack is the first combat mission by

new Curtiss SB2C Helldivers, which help sink one destroyer and four minor warships.

November 12

NAVAL: President Franklin D. Roosevelt boards the new battleship *Iowa*, which conveys him to Cairo, Egypt, and Teheran, Iran, where he meets with Prime Minister Winston Churchill and Soviet premier Joseph Stalin.

November 13

AVIATION: Bremen, Germany, experiences attack by an American fighter escort that has flown the farthest of the war thus far, as P-38 Lightnings accompany 115 Eighth Air Force bombers to their target and back; seven of the fighters fall to stiff Luftwaffe resistance.

- The Fifth Air force launches 57 B-24s and 62 B-25s against airfields at Alexishafen and Madang, New Guinea, while other aircraft strike targets at Gasmata, Kaukenau, and Timoeke. This is one of the largest American raids in the region to date.
- American carrier aircrafts begin a series of air raids against Japanese installations in the Gilberts and Marshall Islands in preparation for the navy's drive across the Central Pacific.

November 13–14

AVIATION: A fighter belonging to VMF (N)-531 makes the first marine nighttime kill of the war by downing a Japanese G4M bomber.

MARINES: On Bougainville, the 2nd Battalion, 21st Marines wipes out a Japanese detachment and now controls an important trail on the eastern flank of the American perimeter.

November 14

AVIATION: In the Bay of Biscay, a PB4Y-1 Privateer attacks and sinks German submarine *U-508*.

- A force of 90 B-25 Mitchells belonging to the Twelfth Air Force makes their first ever penetration of Bulgarian air space by hitting targets in Sofia.

NAVAL: In the Atlantic, the destroyer *William D. Porter* accidentally launches a live torpedo at the battleship *Iowa*, then carrying President Franklin D. Roosevelt, but quick maneuvering by the latter averts a disaster.

November 16

MILITARY: Responding to feedback from the troops, a new, improved boot is adopted to replace field shoes and canvas leggings.

NAVAL: South of Truk, Caroline Islands, Japanese submarine *I-176* torpedoes and sinks the submarine *Corvina*. This is one of few instances in which an American submersible is destroyed by its Japanese opposite.

November 17

AVIATION: Japanese aircraft strike an American convoy off Bougainville, Solomon Islands, sinking the high-speed destroyer transport *McKean* with torpedoes; 116 men belonging to the 21st Marines are also lost.

November 18

AVIATION: Marine Air Group 21 departs the Russell Islands and redeploys on Efate.

November 19

NAVAL: North of Truk, the destroyer *Yamagumo* attacks and sinks the American submarine *Sculpin* whose captain, John P. Cromwell, elects to go down with his ship rather than face capture and interrogation that might reveal details about the upcoming offensive in the Gilbert Islands; he wins a posthumous Medal of Honor.

MARINES: On Bougainville, the 2nd and 3rd Battalions, 3rd Marines, wage a desperate struggle for control of the Piva Forks. They storm a heavily defended ridge despite intense Japanese opposition.

November 20

AVIATION: On Broadway, the play *Winged Victory*, written by Moss Hart, opens and features a cast of 300, mostly military service members. It subsequently becomes a feature film.

- At Salina, Kansas, XX Bomber Command is activated under Major General Kenneth B. Wolfe, being equipped solely with new Boeing B-29 Superfortresses.

November 20–23

MILITARY: Men from the 27th Infantry Division perform the army's first amphibious assault in the Pacific by landing on Makin in the Gilbert Islands, overcoming dug-in, fanatical resistance.

NAVAL: Task Force 54 under Rear Admiral Kelly R. Turner launches Operation Galvanic, the amphibious invasion of Tarawa Atoll in the Gilbert Islands; the carrier *Independence* and destroyer *Ringgold* both receive damage in the fighting. The islets of Betio, Makin, and Apamama are also struck.

MARINES: The 2nd Marine Division (2nd and 8th Marines) of V Amphibious Corps under Major General Holland M. Smith attack Betio Island, Tarawa Atoll (Gilbert Islands), 105 miles from Makin. Things immediately go awry when amphibious tractors become hung up on a reef during low tide, forcing the marines to wade in under heavy fire. The garrison on Betio consists of 4,836 naval personnel, including 2,619 men of Special Naval Landing Force, the whole under Rear Admiral Keiji Shibasaki. Most marines are astounded to learn that the bulk of Japanese defenders, deeply dug in, survived several days of intense bombardment that preceded the landings.

November 21

MARINES: On Betio, Tarawa Atoll, manage to split Japanese defenses while the 1st Battalion, 6th Marines comes ashore as reinforcements. The 2nd Battalion storms nearby Bairiki Island to seize it as an artillery base.

November 21–25

MARINES: On Bougainville, the Battle of Piva Forks concludes as the 3rd Marines and 9th Marines, and 2nd Raider Battalion expand their perimeter and take the adjoining high ground.

November 22

NAVAL: Off the Gilbert Islands, destroyers *Frazier* and *Meade* depth charge Japanese submarine *I-35* to the surface, whereupon the *Frazier* rams and sinks it.

MARINES: On Betio, Tarawa Atoll, the 2nd Marine Division clears out most Japanese defenders, finally crushing a nighttime counterattack that evening.

November 22–26

AVIATION: At the Sextant Conference, Cairo, Egypt, President Franklin D. Roosevelt and Generalissimo Chiang Kai-shek discuss the possibility of using new B-29 bombers to attack Japanese from Chinese bases. The plan, once adopted, is called Operation Twilight. However, Prime Minister Winston Churchill's calls for enlarging military commitments in the Mediterranean are rejected. However, the two agree on formation of an independent Korea and the return of all territories seized by Japan since 1914.

November 23

MARINES: Betio, Tarawa Atoll, is declared secure by the 2nd Marine Division; total casualties are 1,085 killed and 2,233 wounded. Only 146 "Japanese" are taken alive, the bulk being Korean laborers. Among the lessons learned are the need for more intensive ship bombardments, better communications and air support, and greater use of amphibious tractors.

- On Bougainville, the 1st Parachute Battalion deploys at Cape Torokina.

November 24

NAVAL: Off the Gilbert Islands, the escort carrier *Liscombe Bay*, flagship of Task Group 52.3, is attacked and sunk by Japanese submarine *I-175*; among the dead is Rear Admiral Henry M. Mullinix, head of Carrier Division 24, along with 644 of his men.

MARINES: On Tarawa Atoll, the 2nd and 8th Marines sail for Hawaii to rest and refit.

November 25

AVIATION: In the South Atlantic, a PB4Y-1 Privateer of VB-107 attacks and sinks German submarine *U-849*.

NAVAL: Off Cape St. George, New Ireland, Captain Arleigh Burke's Destroyer Squadron 23 ("The Little Beavers") engages a similar force of Japanese destroyers under Captain Kiyoto Kagawa at night; in a smart reverse, Burke sinks three enemy vessels without taking a single hit. He is fast becoming renowned as America's leading destroyer tactician.

- North of the Gilbert Islands, Central Pacific, the destroyer *Radford* attacks and sinks Japanese submarine *I-19*.

November 26

AVIATION: Bremen, Germany, is the target of 440 Eighth Air Force bombers, which encounter poor weather and lose 29 aircraft to German defenses.

November 28–December 1

DIPLOMACY: At the Teheran Conference, Iran, President Franklin D. Roosevelt, Prime Minister Winston Churchill, and Soviet premier Josef Stalin agree to Operation Overlord, an invasion of northern France, and Operation Anvil, the invasion of southern France; Stalin again agrees to enter the war against Japan after Germany surrenders.

November 28–29

NAVAL: Northwest of the Mariana Islands, Central Pacific, submarines *Pargo* and *Snook* attack a Japanese convoy, sinking three vessels.

Joseph Stalin first met his fellow Allied leaders, Franklin Roosevelt and Winston Churchill, at the Teheran Conference, November–December 1943. (*National Archives and Records Administration*)

November 29

AVIATION: A force of 25 B-25 Mitchells from the Twelfth Air Force strikes targets in Sarajevo, Yugoslavia, for the first time.

NAVAL: At Cape Torokina, Bougainville, destroyers *Fullam*, *Lardner*, and *Lansdowne* rush close to shore and give direct fire support to the 1st Marine Parachute Battalion as it is successfully evacuated.

- The destroyer *Perkins* is accidentally rammed by the Australian transport *Duntroon* off eastern New Guinea and sinks.

MARINES: At Koiari, Bougainville, the 1st Parachute Battalion and Company M, 3rd Raider Battalion, make an amphibious landing 10 miles east of the American perimeter; however, strong Japanese defenses prompt them to withdraw.

November 30

AVIATION: Six Marine SBD Dauntless dive bombers land at Betio airstrip on Tarawa Atoll.

MARINES: On Abaiang and Makakei, Gilbert Islands, scouts from the 2nd Tank Battalion begin searching for Japanese defenders, finding only five.

December 1

MARINES: On Maiana Atoll, Gilbert Islands, the 2nd Tank battalion lands and scouts to seek out the enemy.

TECHNOLOGY: At Cherry Point, North Carolina, the first early warning squadron (AWS-5) also employs the first lightweight search radars developed anywhere.

December 2

AVIATION: German aircraft stage a successful attack against Allied shipping off Bari, Italy, sinking 19 transport vessels. Three weeks pass before the port is serviceable again.

MILITARY: At Bari, Italy, a German air raid triggers chemicals stored on the vessel *John Harvey*, resulting in hundreds of burn casualties; the mustard vapor was on hand to retaliate against the Germans if they resorted to chemical warfare first.

NAVAL: The submarine *Capelin* is declared missing after failing to report in from the Makassar Strait.

December 2–8

MILITARY: Mount La Difensa, a looming German-held position blocking the advance on Rome, falls after intense fighting by the 36th Infantry Division, assisted by the First Special Service Force of Colonel Robert T. Frederick. Subsequent advances along the slopes of Mount Marrone are also slow and costly.

December 3

AVIATION: Operation Pointblank, designed to drain the Luftwaffe prior to the cross-channel invasion of France, begins receiving top priority.

MARINES: At Cape Torokina, Bougainville, the 1st Marine Parachute Regiment headquarters, the weapons company, and its 3rd Battalion deploy.

December 3–7

DIPLOMACY: The second Cairo Conference is held between President Franklin D. Roosevelt and Prime Minister Winston Churchill, following their recent meeting at Teheran. An invasion of southern France, Operation Anvil, is agreed to while a proposed amphibious landing in Burma, Operation Buccaneer, is cancelled.

December 4

NAVAL: In the Marshall Islands, Central Pacific, Rear Admiral Charles A. Pownall orders Task Force 58 aircraft to strike Japanese shipping at Kwajalein and Wotje, sinking four vessels and damaging seven others.

- Off Honshu, Japan, the Japanese escort carrier *Chuyo* is torpedoed and sunk by the submarine *Sailfish*, unaware that it carries survivors of the submarine *Sculpin*, lost the previous November.

December 5

AVIATION: On this momentous day, a force of North American P-51 Mustangs from the 354th Fighter Squadron, Ninth Air Force, each carrying drop tanks under their wings, escorts Eighth Air Force bombers to northern Germany and back, a total of 490 miles. This is the P-51's first escort mission of the war and proves essential for crushing the Luftwaffe in its own airspace.

MILITARY: At the second Cairo, Egypt, Conference, President Franklin D. Roosevelt and Prime Minister Winston Churchill finalize plans respecting global operations, a renewed offensive in the Central Pacific, and a unified central command for Mediterranean operations. Roosevelt also informs Churchill of his choice to have Lieutenant General Dwight D. Eisenhower command Operation Overlord—the invasion of France.

**Frederick, Robert T. (1907–1970)***Army general*

Robert Tryon Frederick was born in San Francisco, California, on March 14, 1907, and he joined the National Guard at the age of 13. He gained admission to the U.S. Military Academy and graduated in 1928 as a second lieutenant in the Coast Artillery Corps. Over the next eight years, Frederick served in a routine spate of assignments in California, Virginia, and Panama, and, in 1939, he was one of a handful of officers selected to attend the General Staff School at Fort Leavenworth, Kansas. In August 1941 he transferred to the War Plans Division of the War Department general staff as a lieutenant colonel. It was while serving here that he learned of Prime Minister Winston Churchill's proposal for a special service brigade drawn from the United States and Canada to be known as the North American Force. Frederick enthusiastically embraced the idea, and he was chosen to fly to Ottawa and London to make arrangements. The Canadian government, in particular, was so impressed by his forceful presentation that they agreed to the scheme—provided he lead it. Consequently, Frederick was advanced to brigadier general in June 1942 and appointed commander of the First Special Service Force, then recruiting at Fort William Henry Harrison in Montana.

Frederick's command consisted of an elite force drawn from some of the finest Canadian and the roughest American forces available. All received special training in hand-to-hand combat, infiltration and in amphibious and parachute training,

and their elite status was confirmed by a uniform that included a red beret and distinctive cross-arrow insignia. Following a brief deployment at Attu, Alaska, against the Japanese, Frederick reported to the Fifth Army under General Mark W. Clark in Italy. In December 1943, his men fought exceptionally well at Monte La Difensa, a German position that had defied an entire division for an entire month. They stormed it in less than 12 hours. In January 1944, the First Special Service Brigade landed at Anzio and guarded the right flank of the Allied beachhead with such tenacity in night attacks that the Germans dubbed them the "Black Devils." On June 4, 1944, Frederick personally directed operations that led to the capture of the Margharita Bridge over the Tiber River, and his men were among the first Allied troops to enter Rome. In August 1944 Frederick left the "Devil's Brigade" to command the First Airborne Task Force during the invasion of southern France, and he subsequently headed up the 45th "Thunderbolt" Division in the drive toward Germany. At 37 years of age, he was the youngest divisional commanders in the army, a distinction he shared with General James M. Gavin. After the war, Frederick returned to Fort Ord, California, where he commanded the Sixth Training Division until 1952, when his eight wounds forced him to retire from active service. He died in Palo Alto, California, on November 29, 1970. Winston Churchill hailed him as "the greatest fighting general of all time."

December 8

AVIATION: Lieutenant General Carl A. Spaatz is appointed overall commander of American air operations during Operation Overlord by AAF chief of staff General Henry H. Arnold.

December 8–11

MILITARY: Army Rangers and the 36th Infantry Division attack up the slopes of Mount Sammucro toward their objective, San Pietro village. The effort stalls in the face of insurmountable German resistance and is called off.

December 9–10

MARINES: On Bougainville, the 1st Parachute Regiment and the 3rd Battalion attack and seize a heavily defended spur east of the Bougainville perimeter, which is dubbed Hellzapoppin Ridge.

December 10

AVIATION: On Bougainville, F4U Corsairs of VMF-216 are the first aircraft to deploy on newly finished Cape Torokina Airfield; it serves mostly as a refueling base and staging area for other airfields closer to the front.

MILITARY: In Teheran, Iran, the Persian Gulf Service Command is renamed the Persian Gulf Command and is transferred to army forces stationed in the Middle East. Its priority project is completion of a modern two-lane highway from Khorramshahr to Andimesk, Russia, to facilitate the transfer of war materials.

December 11–18

MARINES: After eight days of bitter combat, the 21st Marines storm Hellzapoppin Ridge, Bougainville, assisted by close air support from Marine Corps dive bombers.

December 13

AVIATION: The German cities of Bremen, Hamburg, and Kiel are targeted by 649 B-17s and B-24s of the Eighth Air Force, the first time an American bomber stream has exceeded 600 aircraft.

NAVAL: West of the Canary Islands, American destroyers and aircraft from the escort carrier *Bogue* attack and sink German submarine *U-172*; destroyer *Osmond Ingram* suffers damage dueling with the submarine's deck gun.

- Off Algiers, the destroyer *Wainwright* and British corvette *Calpe* attack and sink German submarine *U-593*.

December 15

MILITARY: At Casablanca, French Morocco, the 88th Infantry Division, comprised almost entirely of draftees, arrives in theater for advanced training under Major General John L. Sloan.

NAVAL: At Arawe, New Britain, Task Force 76 lands army troops under the direction of Rear Admiral Daniel E. Barbey. This is undertaken to secure safe passage through the Vitaz and Dampier Straits between New Guinea and New Britain.

MARINES: On New Britain, amphibian tractors of the 1st Marine Division transport the Army's 112th Cavalry Regiment to the Arawe Peninsula on the southern coast. The Army's XIV Corps also relieves the I Marine Amphibious Corps for the remainder of the campaign.

December 15–17

MILITARY: At Ceppagna, Italy, the 36th Infantry Division, having been reinforced by the 504th Parachute Infantry and a battalion of tanks, storms back into San Pietro, finally taking it in heavy fighting.

December 17

AVIATION: In Washington, D.C., aeronautical pioneer Orville Wright presents General Henry H. Arnold with the 1942 Collier Awards for his leadership of the Army Air Force.

- F4U Corsairs of VMF-214, led by Major Gregory Boyington, makes a fighter sweep over Japanese-held Rabaul, New Britain, encountering little aerial opposition.

December 18

AVIATION: In Washington, D.C., General Henry H. Arnold finalizes his command list for 1944: General Ira C. Eaker in charge of the Mediterranean Theater of Operations (MTO); General Cannon, Twelfth Air Force; General Nathan Twining, Fifteenth Air Force; General Carl A. Spaatz, U.S. Strategic Air Forces; General James H. Doolittle, Eighth Air Force, and General Lewis H. Brereton, Ninth Air Force.

December 20

AVIATION: Bremen, Germany, is the object of another massive raid by Eighth Air Force bombers, 27 of which are shot down by German fighters. Escorting P-51s and P-38s also take a toll on the defenders, who fire unguided rockets at the bomber stream. This is the first American mission to jettison strips of metal foil to confuse enemy radar. Tech Sergeant Forrest L. Vosler also wins a Medal of Honor for ignoring serious injuries and assisting wounded crewmen on his aircraft.

- Southwest of the Azores Islands, TBF Avengers launched from the escort carrier *Bogue* attack and sink German submarine *U-850* following a stiff surface engagement.

December 21–22

MARINES: On New Britain, Marine scouts are landed on Tauali to reconnoiter possible landing zones.

December 22–23

MARINES: On Bougainville, Hill 600A finally falls to the 21st Marines, which is the last major encounter on the island by the 3rd Marine Division.

December 23

AVIATION: Major Gregory Boyington leads another fighter sweep over Rabaul, New Britain, flaming another four Zeroes for a total of 24. The Americans shoot down a total of 30 aircraft at a cost of three.

- Marine Corps SDB Dauntless dive bombers fly from Tarawa to strike at Japanese shipping at Jaluit Atoll.

December 24

AVIATION: The Eighth Air Force commits its largest bomber raid to date by dispatching 670 B-17s and B-24s against German V-1 launching sites at Pas-de-Calais, France. No aircraft are lost and, by this date, the Americans possess 26 bomber groups in the ETO.

- In the Southwest Pacific, a force of 190 B-24s, B-25s, and A-20s belonging to the Fifth Air Force strikes Japanese targets at Cape Gloucester, New Britain.

MILITARY: President Franklin D. Roosevelt takes to the airwaves again in his end-of-the-year message to the American nation, and he declares that General Dwight D. Eisenhower will command the upcoming invasion of western Europe, whenever that momentous event transpires. This comes as a surprise and a disappointment to Chief of Staff general George C. Marshall, who secretly coveted the position, but his contributions as an organizer remain crucial to the Allied war effort.

NAVAL: In the North Atlantic, German *U-645* torpedoes and sinks the destroyer *Leary*, then it is sunk in turn by the destroyer *Schenk*.

December 25

AVIATION: On Tarawa, the 4th Marine Base Defense Wing arrives and deploys.

MILITARY: The Americal Division lands at Bougainville, Solomon Island, and relieves the 3rd Marine Division.

December 26

AVIATION: By now Fifth Air Force bombers have obliterated their targets on Cape Gloucester, New Britain, while escorting P-40s, P-38s, and P-47s claim 60 aerial victories. Hereafter, “Gloucesterizing” enters the military vernacular to imply the total destruction of a target.

MILITARY: On Finschhafen, New Guinea, Lieutenant General Walter Krueger moves Sixth Army headquarters out of Brisbane, Australia, to be closer to the front line. Cape Cretin is also the site of Headquarters Alamo Force, which trains selected soldiers for dangerous reconnaissance and raiding activities, the famous Alamo Scouts.

NAVAL: Rear Admiral Daniel E. Barbey directs Task Force 76 in amphibious operations off Cape Gloucester, New Britain, landing the 1st Marine Division under Major General William H. Rupertus. Supporting gunfire is provided by Task Force 74 under Rear Admiral Victor A. C. Crutchley.

- Off Cape Gloucester, Japanese dive bombers attack and sink the destroyer *Brownson*.

MARINES: Cape Gloucester, New Britain, is the target of an amphibious landing by the 1st and 7th Marines; the heaviest fighting occurs that night during a Japanese counterattack.

December 27

MILITARY: To forestall a possible strike, army troops are ordered to take over control of all domestic railroad operations. Lieutenant General Brehon Somervell is placed in charge of the operation, and he also personally castigates the leadership of three hold-out unions—at which point the strike is called off.

MARINES: On Bougainville, the 9th Marines and 3rd Parachute Battalion sail for Guadalcanal and are replaced by the Army’s 164th Infantry Regiment.

December 28

AVIATION: In the Bay of Biscay, a PB4Y-1 Privateer of VB-105 attacks and sinks a German destroyer and two motor patrol boats in concert with two British light cruisers.

MARINES: On Cape Gloucester, New Britain, the 3rd Battalion, 1st Marines uproots a series of Japanese bunkers dubbed Hell's Point and close upon the enemy airfields.

December 29

NAVAL: Off Palau, Central Pacific, the submarine *Silversides* attacks a Japanese convoy, sinking three transports and damaging a fourth.

MARINES: At Cape Gloucester, New Britain, the 5th Marines are landed as reinforcements while the 2nd Battalion, 1st Marines beats back a savage night attack at Tauali.

December 30

MILITARY: At Fort Benning, Georgia, the 555th Parachute Infantry Company, the first-ever African-American airborne unit, is activated.

MARINES: In Washington, D.C. Commandant Major General Thomas Holcomb terminates Marine parachute and raider programs; these elite soldiers are simply absorbed into existing units.

- On Cape Gloucester, New Britain, the 1st and 5th Marines overrun organized enemy resistance and capture the Japanese airfields.

December 31

AVIATION: The Eighth Air Force launches a 500-plane raid against targets along the coast of France, losing 25 bombers. A landmark is also reached when the tonnage of bombs dropped finally exceeds that unloosed by the Royal Air Force Bomber Command.

MARINES: In Washington, D.C., Major General Thomas Holcomb retires as a four-star lieutenant general while Major General Alexander A. Vandegrift, the victor of Guadalcanal, is appointed the 18th Commandant of the Marine Corps to succeed him.

1944

January 1

AVIATION: In Pasadena, California, the California Institute of Technology (CalTech) begins researching a practical, long-range missile under the designation Project ORDCIT.

- Over Saidor, New Guinea, the Fifth Air Force commits over 120 B-24s, B-25s, and A-20s against Japanese troop and supply concentrations in preparation for the coming Allied invasion there.
- During a raid in Burma by B-25s and P-38s of the Tenth Air Force on a bridge spanning the Mu River, a bomber flown by Major Robert A. Erdlin pulls up sharply to avoid hitting a ground obstacle, then releases his bombs. Two spans of the bridge are hit and collapse, giving rise to the "Burma Bridge Busters."

MARINES: On Bougainville, Solomon Islands, marines on the perimeter are gradually relieved by army troops.

January 2

AVIATION: Oil and power plant facilities in Yenangyaung, Burma, are struck by medium and heavy bombers belonging to the Tenth Air Force.

A group of Marines, most likely from the 2nd Marine Raider Regiment, pause in January 1944 after nearly 60 days of combat on Bougainville Island. (National Archives)

MILITARY: At Saidor, New Guinea, the 126th Infantry, 32nd (Red Arrow) Infantry Division, makes a surprise landing and quickly captures a port and an airfield. This move cuts off a 12,000-man Japanese garrison at Sio, 75 miles to the east.

NAVY: In the Atlantic, a PB2Y-1 Privateer of VB-107 spies German blockade runner *Weserland* off Ascension Island and radios the information to the destroyer *Somers*; *Weserland* sinks after receiving a single salvo.

- Rear Admiral Daniel E. Barbey directs Task Force 76 in landing army troops at Saidor, New Guinea.

MARINES: On Cape Gloucester, New Britain, the 7th Marine and 3rd Battalion, 5th Marines, charge across Suicide Creek to enlarge their beach perimeter; this evening they rebuff a counterattack on Target Hill.

- On Vella Lavella, the 2nd Parachute Battalion departs for Guadalcanal to join the 1st Parachute Regiment already there.

January 3

AVIATION: The first helicopter rescue mission takes place when a U.S. Coast Guard Sikorsky R-4 Hoverfly carries blood plasma to injured navy seamen offshore.

- In a major scuffle over Rabaul, Major Gregory Boyington flames three Japanese aircraft before being shot down himself and captured. At the time his score stood at 28, making him the leading Marine Corps ace.

NAVAL: In the Ambrose Channel, New York, the destroyer *Turner* experiences an internal explosion and sinks with a loss of 100 lives.

January 4

NAVAL: Off the Brazilian coast, the German blockade-runner *Rio Grande* is accosted by the light cruiser *Omaha* and destroyer *Jonett* and promptly scuttles itself to avoid capture. The following day the pair also destroy the blockade-runner *Burgenland*.

January 4–5

AVIATION: Various German ports are struck by 500 heavy bombers of the Eighth Air Force.

- Operation Carpetbagger begins in western Europe as Lieutenant Colonel Clifford Helfin flies the first supply mission aimed at bolstering the French underground. The missions originate from Tempsford, England.

January 6

AVIATION: In England, Lieutenant General Carl A. Spaatz becomes commander, U.S. Strategic Air Forces in Europe (USSAFE), who also receives operational control of the Fifteenth Air Force. Lieutenant General James H. Doolittle also becomes head of the Eighth Air Force in England while Lieutenant Ira C. Eaker transfers south to direct Mediterranean Allied Air Forces.

MILITARY: In Burma, former cavalry officer Brigadier General Frank D. Merrill takes charge of the 3,000-man 5307th Composite Units, better known as “Merrill’s Marauders.” They are especially trained for deep penetration and operations behind enemy lines.

January 6–11

MARINES: In a stiff fight, the 7th Marines and 3rd Battalion, 5th Marines attack and seize Aogiri Ridge, Cape Gloucester, New Britain.

January 7

AVIATION: Command of the Thirteenth Air Force passes to Lieutenant General Hubert R. Harmon.

January 7–9

AVIATION: Japanese airfields on Rabaul are repeatedly struck by marine and navy aircraft launched from Bougainville.

January 8

AVIATION: At Muroc Air Force Base, California, the Lockheed XP-80, christened *Lulu Belle*, flies for the first time; it is destined to become the F-80 Shooting Star, America’s first jet-powered fighter plane and the first to exceed 500 miles per hour in level flight. However, it is developed too late for service in the war.

MILITARY: In Italy, intense fighting erupts along the Rapido River as Task Force B, 36th Infantry Division, outflanks Hill 1109 and forces the defenders to fall back to Mount Trocchio, which guards the entrance to the Liri Valley leading to Rome. Heavy casualties ensue.

January 10

AVIATION: P-39 Airacobras attack and strafe Japanese-occupied villages and barges in New Britain, while Fifth Air Force heavy and medium bombers work over Mandang, Alexishafen, and Bogadjim.

- Waves of B-24s are dispatched by the Thirteenth Air Force against air fields and supply depots at Lakunai and Vunakanau. This is the beginning of a protracted night bombardment campaign.

Spaatz, Carl A. (1891–1974)

Army Air Force general

Carl Andrew Spaatz was born in Boyertown, Pennsylvania, a descendent of German immigrants. He passed through the U.S. Military Academy in 1914 at the bottom of his class and was commissioned an infantry second lieutenant. Spaatz performed routine duty until June 1916, when he switched to aviation and became one of the army's earliest pilots. During World War I Spaatz was sent to France and he sought out a combat command, but he was retained as an instructor at Isoudon: two of his most successful students were Frank Luke and Eddie Rickenbacker. However, while on leave, he managed to join a British unit against orders, shoot down two German planes, and crash land after running out of fuel. Spaatz received a Distinguished Service Cross and a severe reprimand in consequence. Back home, he remained a major over the next 15 years, principally because of his outspoken advocacy of American air power. On January 1–7, 1929, he joined Ira C. Eaker and Elwood Quesada in setting a nonstop endurance record over Los Angeles that covered 11,000 miles and required 41 inflight refuelings; all three received the Distinguished Flying Cross. In 1935 Spaatz was selected to attend the Command and General Staff School at Fort Leavenworth, Kansas, and, in 1940, he arrived in England to observe the Battle of Britain firsthand. What he witnessed convinced him of America's dangerous inferiority in terms of air power.

When the United States entered World War II, Spaatz was serving as chief of staff

in the new Army Air Force. He returned to England as commander of all U.S. air power in Europe and, in concert with Eaker, helped hammer out an agreement with the Royal Air Force for daytime/night-time raids against German industry. In November 1942 he transferred to the staff of General Dwight D. Eisenhower as air officer and headed up the Allied Northwest African Air Forces as a temporary lieutenant general. Spaatz returned to England in January 1944 as head of the Strategic Air Force in Europe and, in concert with General James H. Doolittle, advanced the strategy of freeing fight escorts from protecting American bombers and allowing them to concentrate on destroying the Luftwaffe. His single most important wartime decision, however, was in ordering a shift from bombing German industry to gutting their oil and transportation network. The change had the net effect of grinding the German war machine to a complete halt. He attended Germany's surrender ceremonies in April 1945. Spaatz then ventured to the Pacific to help orchestrate the atomic bombing of Japan. He became the only senior American officer to attend surrender ceremonies in both Europe and Asia. A full general as of March 1945, he was also the last commanding officer of the Army Air Force following General Henry H. Arnold's retirement. Spaatz died in Washington, D.C., on July 14, 1974, a major aerial architect of victory in World War II.

MARINES: At Camp Pendleton, California, the new 5th Marine Division takes form as the 26th and 27th Marines are formed as infantry, with the 13th Marines organized as artillery.

January 10–11

NAVAL: North of Okinawa, the submarine *Seawolf* harasses a Japanese convoy, sinking three cargo vessels.

January 11

AVIATION: German industrial targets in Halberstadt, Brunswick, and Oschersleben are targeted by 600 Eighth Air Force bombers, losing 60 of their number to fierce fighter opposition. This is also the first mission to employ radar-equipped B-24 bombers as pathfinder aircraft to strike targets through overcast.

- Over Halberstadt, Germany, a P-51 Mustang flown by Major James H. Howard shoots down four German fighters while single-handedly engaging a formation of 30 aircraft. He is the only Mustang pilot to receive the Medal of Honor.
- Two TBF Avengers launched from the escort carrier *Block Island* fire rockets for the first time against a surfaced German U-boat.
- A Fifteenth Air Force bombing mission over Piraeus, Greece, goes awry when six aircraft are lost to midair collisions in poor weather.

MARINES: At Arawe, New Britain, army units are reinforced by the arrival of the 1st Tank Battalion.

January 12

MARINES: On Bougainville, the 2nd Raider Battalion departs and heads for Guadalcanal.

January 13

AVIATION: A force of 200 B-26 Marauders strikes German rocket sites in northern France and reports being shot at by antiaircraft missiles.

- At New Delhi, India, command of the XX Bomber Command passes to Lieutenant General Kenneth B. Wolfe. He is tasked with orchestrating the initial moves of Operation Matterhorn whereby B-29 Superfortresses will begin striking at Japan from bases on the Asian mainland.

January 13–14

AVIATION: Thirteenth Air Force B-24s launch another nocturnal air raid against airfields at Vunakanau and Malaguna. Army and navy aircraft also strike at Japanese targets near Buna and Wakuni, New Guinea.

MARINES: On Cape Gloucester, New Britain, the 7th Marines overcome determined resistance on Hill 660, which finishes out the American perimeter.

January 14

AVIATION: Over Pas-de-Calais, France, a force of 500 Eighth Air Force bombers strike at 20 V-weapon launch sites.

- In Italy, Twelfth Air Force bombers assist Fifth Army operations near Monte Trocchio.

January 15

AVIATION: Command of Mediterranean Allied Air Forces formally passes to Lieutenant General Ira C. Eaker.

MILITARY: The Fifth Army under Lieutenant General Mark Clark captures strategic Monte Trocchio after a protracted and bloody battle with skilled German defenders. This concludes operations against the so-called Winter Line, which cost the Allies 15,864 casualties.

NAVAL: In light of the forthcoming Central Pacific campaign, Service Squadron 10 is formed in Hawaii under Captain Worrall R. Carter to facilitate mobile logistical operations.

January 16

MILITARY: General Dwight D. Eisenhower establishes his new headquarters in London, England, as supreme commander of the forthcoming Allied Expeditionary Force. A cross-channel invasion of continental Europe (Overlord) is in the offing and 2 million tons of war materiel and 50,000 vehicles of various types and sizes are en route to Britain by June.

NAVY: In the Atlantic, A TBF Avenger launched from the escort carrier *Guadalcanal* attacks and sinks German submarine *U-544*.

MARINES: The 3rd Marine Division concludes the Bougainville Campaign by boarding ship and sailing back to Guadalcanal; losses stand at 732 killed and 1,249 wounded.

- On New Britain, tanks of the 1st Battalion lead an Army drive against Japanese forces encroaching upon the Arawe perimeter.

January 18

AVIATION: Over Rabaul, Lieutenant Robert M. Hanson of VM-215 flames five Japanese aircraft on a single sweep.

- The Fifth Air Force dispatches B-24s to bomb Japanese targets at Laha and Hansa Bay, New Guinea. Meanwhile, Madang and Bogadjim are hit by 70 B-25s while P-38 fighters conduct a sweep over Wewak; three Lightnings are lost.

MARINES: On Guadalcanal, the 1st and 2nd Parachute Battalions embark and sail for San Diego, California.

January 20–22

MILITARY: Near San Angelo, Italy, the 36th Infantry Division, II Corps, secures a small lodgement across the Rapido River but proceeds no farther in the face of determined German resistance.

January 21

AVIATION: German V-weapon sites across northern France are struck by more than 500 bombers of the Eighth and Ninth Air Forces; 19 targets are spared assault due to low overcast.

MARINES: At Camp Pendleton, California, the 5th Marine Division is formally activated for service in the Pacific.

January 22

AVIATION: Over Anzio, Italy, aircraft of the Twelfth and Fifteenth Air Forces conduct over 1,200 close air support and air superiority missions during the landing phase of Operation Shingle.

- Heavy bombers belonging to the Thirteenth Air Force strike the airfields at Lakunai again, inflicting considerable damage. They are escorted by a force of more than 90 fighters.

MILITARY: Allied forces unleash Operation Shingle, an attempt to outflank German defenses along the Rapido River with a surprise landing at Anzio and Nettuno, Italy, 30 miles west of Rome. The initial wave of VI Corps (one American and one British division) under Major General John P. Lucas pushes inland but fails to secure the high ground overlooking the beach. The Allies land 36,000 men but German defenders quickly recover from their surprise, dig in, and begin fighting back. A costly impasse ensues over the next five months.

NAVAL: Off Anzio, allied troops are carried ashore by naval forces commanded by Admiral Frank K. Lowry's Task Force 81, in spite of heavy German air attacks and mines.

- Off San Cristobal, Solomon Islands, Japanese submarine *RO-27* torpedoes and sinks the oiler *Cache* before being sunk in turn by the destroyer *Buchanan*.

MARINE: In western New Britain, the 1st Marine Division begins patrolling the interior of the island.

January 24

AVIATION: In a shuttle mission from Betio to Funafuti, a flight of 23 F4U Corsairs from VMF-422 encounters bad weather, losing 22 aircraft and six pilots over the 700-mile route.

MARINES: On Guadalcanal, the 1st and 2nd Raider Regiments are combined into a single unit.

January 24–February 11

MILITARY: Intense fighting breaks out along the Rapido River line as the II Corps's 34th Infantry Division fails to cross in the face of stout resistance. Meanwhile, the Red Bull Division begins probing German defenses below Monte Cassino, taking heavy casualties.

- At Anzio, Italy, American counterattacks fail to recapture lost ground until the arrival of the 1st Armored Division ("Old Ironsides") under Major General Vern E. Prichard. They manage to blunt German counterattacks and hold their ground skillfully over the next five months.

January 27

AVIATION: Fighter craft belonging to the Twelfth and Fifteenth Air Forces conduct several sweeps over Rome and Florence, shooting down several dozen German aircraft.

January 28

AVIATION: Over Bonnières, France, a force of Eighth Air Force B-24 Liberators strikes at German V-weapon launching sites with the new Gee-H blinding bombing radar system.

NAVAL: German submarine *U-271* is attacked off the Shannon River estuary, Ireland, by a PB4Y-1 Privateer of VB-103 and sunk.

MARINE: At Camp Lejeune, North Carolina, the 16th Marines is activated as an engineer regiment and destined to join the 5th Marine Division.

January 29

AVIATION: Around Frankfurt, Germany, a force of 763 Eighth Air Force bombers strikes at numerous industrial targets with 1,900 tons of bombs. German fighters manage to shoot down 30 of the giant craft; ominously for them, this is the first American attack employing more than 700 aircraft.

- Japanese positions in the Gilbert Islands, Kwajalein, and Mille are struck by Seventh Air Force B-24s, which are then followed up by strafing attacks by P-39s. This “softening up” continues over the next few days until the Allied invasion is launched.

NAVAL: In the Central Pacific, Task Force 58 under Rear Admiral Marc A. Mitscher begins preliminary air raids against the Marshall Islands (Kwajalein, Wotje, Eniwetok, and Toarua) to prepare them for an impending assault.

January 29–30

MILITARY: Near Anzio beachhead, Italy, the 1st and 3rd Ranger Battalions advance to the town of Cisterna to achieve a break out, but instead they are ambushed by the waiting Hermann Goering Panzer Division; they withdraw after sustaining severe losses.

January 29–February 28

AVIATION: Naval aircraft based on Midway begin a systematic bombardment campaign against Wake Island to neutralize the airfield there prior to the invasion of the Marshall Islands.

January 30

AVIATION: A force of 700 Eighth Air Force bombers, guided by early bomb-guiding radar, strikes at targets around Brunswick and Hanover, Germany; fighters defense claims 20 American bombers.

- In Italy, the 451st Bomb Group (B-24s) joins the Fifteenth Air Force as its ninth bomb group.
- Over Rabaul, Lieutenant Robert M. Hanson of VMF-215 shoots down a further four planes before being shot down and killed himself. His total score is 25 Japanese aircraft—20 of them over the past 13 days—a feat that wins him a posthumous Medal of Honor.

MARINES: The 1st Parachute Regiment headquarters and the 3rd Parachute Battalion depart Guadalcanal and sail for San Diego, California.

- On New Britain Lieutenant Colonel Lewis “Chesty” Puller assumes command of the Gilnit Group, drawn from all three regiments of the 1st Marine Division and assigned to mop up remaining pockets of resistance on western portions of the island.
- By month's end, Air Solomons (AirSols) command has launched 873 bomber and 1,850 fighter sorties. They lose 65 aircraft while claiming 503 Japanese planes.

January 31–February 22

MILITARY: In the Central Pacific, Operation Flintlock unfolds as men of the 7th Infantry Division under Major General C. H. Corlett land at Kwajalein Atoll, a key crossroads in the Marshall Islands.

NAVAL: In the Marshall Islands, amphibious forces directed by Vice Admiral Raymond A. Spruance of the Fifth Fleet deposit army and marines on Kwajalein and neighboring atolls.

MARINES: In the Pacific, Operation Flintlock continues as the 4th Marine Division under Major General Harry Schmidt storm ashore on Roi and Namur in the Marshall Islands. The latter is defended by 3,690 Japanese naval troops, of whom only 91 are taken captive. When the campaign ends in three days, this will become the first territory lost by the Japanese, which they held before the war.

- The Reconnaissance Company, V Amphibious Corps, deploys on Majuro Atoll, Marshall Islands, in anticipation of a full-scale landing upon Kwajalein.

February

AVIATION: The Army Ordnance Division and the Army Air Force begin joint development of a guided, supersonic surface-to-air missile to shoot down hostile aircraft.

- The AAF deploys its first VB-1/2 AZON (“azimuth only”) radio-controlled bombs in Europe. These primitive “smart weapons” are dropped from bombers and guided through a radio-equipped bombsight.

February 1

AVIATION: Command of IX Air Support Command reverts to Major General Elwood Quesada; this formation includes several fighter and reconnaissance units.

- Fighter aircraft belonging to the Seventh Air Force deploy on newly captured airfields in the Gilbert Islands prior to beginning attacks on the Japanese-held Marianas.

NAVAL: At Pearl Harbor, Hawaii, Vice Admiral Richmond K. Turner becomes commander of Amphibious Forces, Pacific Fleet.

MARINES: The 1st Raider Regiment receives the new designation of 4th Marines to replace the unit lost at the surrender of Corregidor in April 1942.

- In the Marshall Islands, the men of the 23rd Marines deploy and capture Roi while the 24th Marines overrun most of Namur by evening.

Men of the 7th Infantry Division use a flamethrower on Japanese positions on Kwajalein Island, February 4, 1944. (*National Archives*)

February 2

NAVAL: In the Marshall Islands, Japanese submarine *RO-39* is sunk by the destroyer *Walker*.

MARINES: On Namur, Marshall Islands, the 24th Marines conduct mop up operations against surviving Japanese pockets. Losses in the Kwajalein/Majuro operation are 387 dead and 631 injured. Hard-charging Major General Holland M. Smith considers this one of the best conducted amphibious campaigns of the entire war.

February 3

AVIATION: In England, the newly arrived 358th Fighter Group joins the 354th Fighter Group to fly escort missions.

- Five P-51 Mustangs under Colonel Philip Cochran fly the first air-commando mission in the China-Burma-India (CBI) theater.
- Japanese airfields on Wewak are struck by fighters and bombers belonging to the Fifth Air Force; an estimated 80 enemy aircraft are destroyed.

NAVAL: Navy warships shell the Kurile Islands of northern Japan—the first attack on the enemy home islands since the Doolittle Raid of April 1942.

February 4

MILITARY: Kwajalein, Marshall Islands, is declared secured by the 7th Infantry Division.

February 5

NAVAL: North of Jaluit, Marshall Islands, the destroyer *Charrette* detects and sinks Japanese submarine *I-21*.

MARINES: In New Britain, the 5th Marines employs landing craft to begin subduing the north coast of that island.

- In light of the rapid fall of Kwajalein, V Amphibious Corps headquarters moves up the invasion of nearby Eniwetok Atoll by a month. The unit responsible, Tactical Group I, is centered on the 22nd Marines.

February 6

AVIATION: West of Ascension Island, Atlantic, a PB4Y-1 Privateer belonging to VB-107 attacks and sinks German submarine *U-177*.

MILITARY: Intense fighting erupts at Anzio and Casino on the Italian Peninsula as the Allies gradually force back tenacious German defenders well-situated in mountainous terrain.

February 7

AVIATION: At Roi, Marshall Islands, the 4th Marine Base Defense Air Wing deploys its ground units.

February 8

AVIATION: The 454th Bomb Group (B-24) joins the Fifteenth Air Force in Italy, bringing the total of bomb groups present to 15.

MARINES: The 4th Marine Division begins packing and embarking from Kwajalein Atoll, although the 25th Marines are detained temporarily as a garrison force.

- At Camp Pendleton, California, the 5th Marine Division receives its final component, the 28th Marines.

February 9

AVIATION: Fifth Army operations around Cassino, Italy, receives intense close air support missions by the Twelfth Air Force.

MILITARY: In Washington, D.C., President Franklin D. Roosevelt authorizes the new Bronze Medal for heroic action against the enemy not involving aerial action.

February 11

MILITARY: In England, the preinvasion forces are bolstered by the arrival of the 5th and 6th Armored Divisions; nearly 1 million American troops are now training all over the United Kingdom.

February 12

MILITARY: General Dwight D. Eisenhower is formally appointed Supreme Allied Commander, Allied Expeditionary Force, in preparation for Operation Overlord. The invasion of Europe is anticipated for May.

MARINES: On Roi, Marshall Islands, an ammunition dump is ignited by a Japanese air raid, killing 26 Marines and wounding 130.

February 13

AVIATION: In Washington, D.C., the Combined Bomber Offensive (CBO) is altered by the chief of staff to concentrate on German lines of communication and the destruction of the Luftwaffe. This switch is undertaken in light of successful German attempts to disperse industrial targets and new tactical priorities for the upcoming Operation Overlord.

February 15

NAVAL: Task Force 31 under Rear Admiral Theodore S. Wilkinson lands the 3rd New Zealand Division on the Green Islands, 55 miles east of New Ireland. Its conquest adds another airfield to encircle and cut off the Japanese strong point at Rabaul.

February 15–18

AVIATION: German positions in and around the ancient abbey at Monte Cassino, Italy, are struck by a force of 254 B-17, B-25, and B-26 bombers belonging to the Twelfth Air Force. However, three days of constant bombing do little to dislodge the defenders and, by allowing them to occupy the wreckage, actually strengthens their position.

- Off Kavieng, New Ireland, a PBV Catalina flown by Lieutenant Nathan G. Gordon lands repeatedly under heavy fire, rescuing 15 airmen; he wins the Medal of Honor.
- On Roi, Marshall Islands, aircraft from Marine Air Group 1 begin deploying, including seven F4Us from night fighting VMF (N)-532.

MILITARY: At Anzio, Italy, Major General John P. Lucas reorganizes the VI Corps in anticipation of a major German counterattack. Farther south, the II Corps again fails to cross the Rapido River south of Monte Cassino, at which point Major General Mark W. Clark orders the historic abbey destroyed to deny its use to the enemy.

February 16

NAVAL: Northwest of Kwajalein, Marshall Islands, Japanese submarine *RO-40* is attacked and sunk by the destroyer *Phelps* and the minesweeper *Sage*.

February 16–19

MILITARY: As feared, German forces launch a well-coordinated counterattack at Anzio, forcing the Allies to divert air power from the Cassino struggle farther south to support the 3rd and 45th Infantry Divisions and the British 56th Division. The panzers come close to threatening the beachhead, but they are finally driven back.

February 17–18

NAVAL: Japanese naval installations on Truk, Caroline Islands, are heavily raided by aircraft launched from Task Force 58 under Admiral Raymond Spruance. The light cruiser *Naha* sinks, along with three destroyers, while 265 enemy aircraft are destroyed. Task Group 50.9, centered upon the battleships *Iowa* and *New Jersey*, also engage and sink the light cruiser *Katori* and another destroyer. However, Japanese pilots manage to launch a counterattack of their own, putting a torpedo into the carrier *Intrepid*.

- Northwest of the Marshall Islands, Japanese submarine *I-11* is attacked and sunk by the destroyer *Nicholas*.

MARINES: The Reconnaissance Company and 4th Tank Battalion of V Amphibious Corps deploy on three islands off the coast of Eniwetok Atoll, Marshall Islands.

February 18

AVIATION: The 8th Reconnaissance Wing is activated at Cheddington, England, to provide enhanced photographic capability in advance of Operation Overlord. Command of the unit goes to Colonel Elliott Roosevelt, the president's son.

MILITARY: A pressing need for more infantrymen induces the War Department to cull 110,000 students enrolled in the Army Specialized Training Program (ASTP); of this total 80,000 are headed to the infantry while 30,000 end up in medicine, dentistry, or engineering. A further 30,000 individuals are allowed to remain in the ASTP program.

MARINES: Engebi Island, Eniwetok Atoll, is attacked and overrun by the 22nd Marines.

February 18–19

AVIATION: In response to serious German counterattacks against the Allied beachhead at Anzio, Italy, Twelfth Air Force A-20 light bombers, A-36 dive bombers, and P-40 fighters bore in to provide effective close-support bombing that help drives them back.

February 18–23

MILITARY: Operation Catchpole unfolds, marines and the 106th Regimental Combat Team, 27th Infantry Division, land on Eniwetok Atoll, Engebi, and Parry Islands, 360 miles northwest of Kwajalein. It is secured four days later.

NAVAL: Marine landings on Eniwetok, Marshall Islands, are entrusted to Task Group 51.11 under Rear Admiral Harry W. Hill.

February 19

AVIATION: Over Rabaul, a 139-aircraft raid hits Japanese airfields and installations, claiming 23 enemy planes shot down. After this battle, all remaining Japanese aircraft are withdrawn.

- In Burma, the Tenth Air Force launches 60 A-36s, P-51s, and B-25s against Japanese fuel depots, rail cars, and river traffic.
- In China, B-24s, B-25s, and P-40s belonging to the Fourteenth Air Force begin conducting sweeps between Formosa (Taiwan) and Indochina. These raids are launched to seek out targets of opportunity and three ships are sunk along with numerous bridges and trains wrecked.

NAVAL: In the South China Sea, the submarine *Jack* tackles a Japanese convoy of six tankers, sinking four.

MARINES: On Eniwetok, Marshall Islands, the 3rd Battalion, 22nd Marines goes ashore to assist two battalions of the Army's 106th Infantry.

February 20

MARINES: On Eniwetok, Marshall Islands, the 3rd Battalion, 22nd Marines assist the 106th Infantry Regiment to mop up hold-out pockets of resistance.

February 20–26

AVIATION: Heavy bombers and escort fighters of the Eighth and Fifteenth Air Forces commence “Big Week,” a maximum effort to strike German aviation industrial centers and cripple the Luftwaffe’s ability to resist. This is also the first time that the Americans are able to get 1,000 bombers airborne. The American loss rates hold at 6 percent while, which, while heavy, is acceptable. In contrast, the Luftwaffe is hard-pressed to reconstitute its strength and gradually weakens.

- Lieutenant William R. Lawley, severely wounded by the same blast that killed his co-pilot, gingerly nurses his damaged B-17 back to England after learning two of his crew are unable to bail out; he wins the Medal of Honor.
- Lieutenant Walter E. Truemper, navigator, takes control of his damaged B-17 after his pilot and co-pilot are killed and wounded. Though desperately injured himself, he refuses to bail out and flies back to England only to die in a crash while landing; he wins a Medal of Honor. Sergeant Archibald Mathies, Truemper’s gunner, dies with him and becomes one of four enlisted air men to receive a Medal of Honor.

February 21

AVIATION: The Eighth Air Forces launches 764 B-17s and B-24s against aircraft factories near Brunswick and Diepholz, although results are unclear due to over-cast weather.

- Bombers belonging to the Air Solomons Command (AirSols) sink two Japanese freighters attempting to evacuate ground crews from Eniwetok Atoll, Marshall Islands.

February 22

AVIATION: The Eighth and Fifteenth Air Forces put up 101 B-17s against Halbertstadt, Germany, while 154 bombers hit aircraft production facilities near Regensburg; German fighters manage to shoot down 50 American aircraft.

- Task Force 58 launches the first carrier raids against the Marianas Islands by striking Japanese installations on Guam, Saipan, Tinian, and Rota; three vessels are claimed sunk and a fourth damaged.

MARINES: Parry Island quickly falls to the 22nd Marines, completing the conquest of Eniwetok Atoll, Marshall Islands. Marine losses are 254 dead and 555 wounded.

February 23

AVIATION: Although poor weather grounds most Eighth Air Force operations, the Fifteenth Air Force manages to launch a B-24 attack against industrial targets in Steyr, Germany; escorting fighters claim 30 German fighters downed.

- Carrier aircraft from Task Groups 58.2 and 58.3 under Rear Admiral Marc A. Mitscher begin preliminary attacks on Japanese positions on Guam, Rota, Saipan, and Tinian to soften them up for an upcoming invasion of the Marianas.

MILITARY: Big changes are under way at Anzio, Italy, when Major General John P. Lucas is relieved of command and replaced by the highly aggressive major general Lucian K. Truscott, 3rd Infantry Division.

February 24

AVIATION: Following the onset of good weather, Eighth Air Force launches a maximum effort by hurling 231 bombers at Schweinfurt, 238 at Gotha, and 236 at Rostow. Fifteenth Air Force B-17s also strike Steyr again, losing 19 aircraft.

- In the Straits of Gibraltar, PBV Catalinas of VP-63 employ the latest Magnetic Anomaly Detection (MAD) equipment to attack German submarine *U-761* for the first time; the target is damaged and scuttled.

MARINES: On New Britain, the 5th Marines battle to capture the Iboki Plantation along the north-central coast.

February 25

AVIATION: Aviation-related targets in Regensburg, Augsburg, Fürth, Stuttgart, Zara Harbor, and Fiume are attacked in an attempt to lure Luftwaffe fighters up against their powerful fighter escorts. Losses are heavy on both sides.

MARINES: Garrison duties on Eniwetok Atoll, Marshall Islands, fall upon the 10th Defense Battalion.

February 26

AVIATION: Bad weather grounds operations on the final day of “Big Week,” but hereafter the Luftwaffe begins a precipitous decline toward irrelevance. American losses are steep but Lieutenant General James H. Doolittle’s gamble pays huge dividends by D-day.

MARINES: In the Marshall Islands, the 25th Marines are relieved by the 22nd Marines while aircraft of VMSB-331 deploy on neighboring Majuro Atoll.

February 27

NAVAL: The submarine *Grayback* is apparently sunk in the East China Sea by a Japanese aircraft.

February 28

AVIATION: The Fifth Air Force commits B-24 bombers to soften up Japanese airfields in Nubia, Awar, and Hansa Bay in preparation for Allied landings.

- Japanese positions on Rabaul, New Britain, are struck by waves of B-25s and P-38s at low altitude, then by B-24s at high altitude. Some of the attacks involve glide bombs.

February 28–March 3

MILITARY: German activity continues at Anzio, Italy, as several heavy counter-attacks are launched at the beachhead. The defenders, however, cling to their positions and persevere.

- At Caserta, Italy, senior Allied commanders begin formulating plans for a final drive to liberate Rome. At Mount Castellone, the decimated 36th Infantry Division is replaced in line by the newly arrived 88th Infantry Division.

February 29

AVIATION: Japanese air bases at Alexishafen, New Guinea, are struck by Fifth Air Force bombers. This is part of an overarching strategy to support Allied landings in the Admiralty Islands while also helping to isolate Rabaul.

MILITARY: In the Central Pacific, the 1st Cavalry Division and the 112th Cavalry regimental combat team land on the Admiralty Islands, and they quickly eliminate the Japanese defenders encountered.

NAVAL: On Los Negros, Admiralty Islands, three high-speed transports belonging to Rear Admirals William M. Fechteler's Task Group 76.1 land army troops ashore and the objective is secured by April 3.

- Off the Marianas Islands, the submarine *Trout* sinks one Japanese transport before being sunk by escorting naval craft.

MARINES: The elite 1st Parachute Regiment and various subordinate battalions are disbanded and their personnel are absorbed into the 5th Marine Division.

March

AVIATION: The Office of War Information reports that, to date, the Soviet Union has received more than 7,800 aircraft under the Lend-Lease program.

- The Bell XP-59 undergoes high altitude testing at the hands of the NACA Lewis Laboratory to enhance the development of turbojet technology.

March 1

AVIATION: At Shemya, Alaska, the XI Strategic Air Force becomes operational to patrol and defend the Aleutian Islands.

- Aircraft of Marine Air Group 22 begin deploying on Engebi Island, Marshall Islands.
- The Fifth Air Force contributes more than 100 B-24 bombers in raids against Los Negros and Lorengau, Admiralty Islands. Other aircraft go in and soften up Japanese positions at Wewak, New Guinea.

March 1–2

NAVAL: In the North Atlantic, destroyer escort *Bronstein* attacks and sinks German submarine *U-603*; the following day, joined by destroyer escorts *Thomas* and *Bostwick*, it also claims submarine *U-709*.

March 2

AVIATION: The 459th Bomb Group joins the Fifteenth Air Force in Italy, while 300 heavy bombers, escorted by 150 fighters, support army operations at Anzio.

MILITARY: Lieutenant General Alexander M. Patch, commanding the Seventh Army, is appointed to lead Operation Anvil, the Allied invasion of southern France. It is planned to occur in tandem with Operation Overlord, the cross-channel invasion of northern France.

March 3

AVIATION: Operation Forager commences as Seventh Air Force bombers and fighters attack Japanese positions in the Caroline Islands. The ultimate goal is to seize land bases capable of sustaining B-29 operations against the Japanese mainland.

MILITARY: At Ponte Rotto, Anzio, a final German counterattack is rebuffed by the 3rd Infantry Division; the VI Corps under Major General Lucian K. Truscott begins preparing for a counteroffensive of its own.

March 4

AVIATION: Berlin, Germany, suffers its first raid by aircraft of the VIII Bomber Command as 238 B-17s bore in, only to be turned back by poor weather and a deceptive “recall” message given by German intelligence. Only 31 B-17s belonging to the 95th Bombardment Group actually reach the target and release bombs from 28,000 feet. Previously, Lieutenant General James H. Doolittle sought permission to lead the raid in person, but Lieutenant General Carl A. Spaatz refused.

MARINES: On Kwajalein, Marshall Islands, aircraft of the 4th Marine Base Defense Force begin launching air strikes against Japanese targets on Wotje, Jaluit, and nearby atolls in the eastern Marshall Islands.

March 5

AVIATION: To stymie a Japanese offensive in Burma, Colonel Philip G. Cochran’s air commando unit flies British “Chindits” under Brigadier General Orde C. Wingate deep behind enemy lines in gliders.

MILITARY: Over Indaw, Burma, Colonel Philip G. Cochran accompanies a parachute drop by U.S. Army engineers who land and assist British forces already on the ground.

March 6

AVIATION: The Eighth Air Force returns to Berlin, Germany, with a vengeance as 658 heavy bombers unload 1,600 tons of bombs on the city. German fighters and flak units down 69 aircraft, the highest toll lost of any single mission to date. The losses are sustained despite the fact the bombers are escorted by P-51 Mustangs over Berlin for the first time, who claim 170 German craft.

NAVAL: The submarine *Scorpion*, last reported in the East China Sea, is declared overdue and assumed lost, probably to a minefield.

March 6–9

MARINES: On New Britain, the 5th Marines storm ashore on the Willaumez Peninsula. They clear out all Japanese resistance over the next three days.

March 8

AVIATION: The Eighth Air Force unleashes 460 heavy bombers against industrial targets at Erkner; Wildau and Berlin are also struck by an additional 75 bombers. The Americans lose 36 aircraft this day.

March 9

AVIATION: Berlin, Brunswick, Hannover, and Nienburg, Germany, are struck by 450 bombers belonging to the Eighth Air Force.

NAVAL: In the North Atlantic, the tables are turned when German submarine *U-255* torpedoes the destroyer escort *Leopold*, which sinks with only 28 survivors out of 199 crewmen.

March 11

AVIATION: Several B-24 bombers operated by the Seventh Air Force take off from air fields on Kwajalein, Marshall Islands, and strike at Japanese installations on Wake Island.

- In India, Operation Thursday commences as Army Air Force transports begin airlifting 9,000 personnel and 1,400 mules to a point 200 miles behind Japanese lines in Burma.

March 12

MARINES: In Washington, D.C., the Joint Chiefs of Staff decide to remove the 1st Marine Division from General Douglas A. MacArthur's Southwest Pacific Area and reassign it to the Commander in Chief, Pacific (CINCPAC).

March 13

AVIATION: In the North Atlantic, a TBF Avenger launched from the escort carrier *Bogue* joins a British patrol bomber and several U.S. and Canadian vessels in attacking and sinking German submarine *U-575*.

NAVAL: Off Yokosuka, Japan, the light cruiser *Tatsuta* and cargo ship *Kokuyo Maru* are sunk by the submarine *Sand Lance*. Vengeful destroyers drop 105 depth charges over the next 18 hours in retaliation, but the submersible escapes.

March 15

AVIATION: In light of heavy losses to the still-formidable Luftwaffe, P-51 Mustangs are detached from escort duty and directed to go after German fighters on the ground and in the air.

- Seventh Air Force B-24s lift off from bases on Kwajalein, Marshall Islands, and strike at Truk Atoll for the first time.
- Lieutenant General Hubert F. Harmon is appointed commander, Air, Solomons.

MILITARY: Following a controversial decision to bomb the ancient monastery at Monte Cassino, Italy, with 1,200 tons of bombs and an intensive artillery barrage, men of the Fifth Army surge forward in another failed attempt to break through the German "Gustav" Line, centered on the town. Heavy fighting and severe losses ensue, so the offensive gradually grounds to a halt. The Allies regroup and prepare to try again.

NAVAL: Admiral William F. Halsey orders the seizure of Emirau Island northwest of Rabaul; once taken, it would complete the isolation of the 100,000-strong Japanese garrison there. The 4th Marines draw the assignment.

March 16

AVIATION: A conference held at the National Advisory Committee for Aeronautics (NACA) releases a study calling for a jet-propelled research aircraft capable of transonic speeds; in 1947 it emerges as the Bell X-1.

- In the Straits of Gibraltar, a PBY Catalina of VP-63 employs MAD detection equipment to find submerged German submarine *U-392*, which is then sunk by the British corvette *Affleck*.

March 17

AVIATION: West of the Cape Verde Islands, TBF Avengers launched from the escort carrier *Block Island* join the destroyer *Corry* and destroyer escort Bronstein in sinking German submarine *U-801*.

March 18

AVIATION: Across Germany, 679 bombers of the Eighth Air Force strike at industrial targets while under heavy escort. The Luftwaffe rises to the occasion, shooting down 43 bombers and 13 fighters but incurring heavy losses of its own. Constant attrition is slowly driving the Germans from the skies.

March 19–May 11

AVIATION: In the Mediterranean, Lieutenant General Ira C. Eaker commences Operation Strangle, a seven-week campaign designed to interdict and neutralize German supplies, railways, train yards, and ports across Italy. By the time the operation ceases, Allied aircraft have flown over 50,000 sorties and unloaded 26,000 tons of bombs.

- In the Atlantic, southwest of Dakar, Africa, a TBF Avenger launched from the escort carrier *Block Island* attacks and sinks German submarine *U-1059*.

March 20

AVIATION: Over Normandy, aircraft belonging to the 67th Reconnaissance Group complete 83 missions and take 9,500 photographs to gather intelligence prior to D-day.

- As marines land on Emirau Island, Admiralties, their approach is covered by radar-equipped SB-24s.

NAVAL: As warships of Task Force 37 under Rear Admiral Robert M. Griffin bombard Kavieng, New Ireland, Task Group 31.2 under Commodore Lawrence F. Reifsnider lands the 4th Marine Division on Emirau Island in the Bismarck Archipelago.

MARINES: The island of Emirau falls to the 4th Marines with armed opposition; once airfields are operational, the Japanese bastion of Rabaul will be completely isolated for the remainder of the war.

- Major General Holland M. Smith, serving as commander, V Amphibious Corps (2nd and 4th Marine Divisions), begins drawing up plans to attack Saipan and Tinian in the Marianas Islands. The 3rd Marine Division and 1st Provisional Marine Brigade are also assigned to seize the formerly American-held island of Guam.

March 21

MARINES: Ailinglapalap, southern Marshalls, is seized by the 3rd Battalion, 22nd Marines, after a minor struggle.

March 22

AVIATION: Near Naples, Italy, aircraft belonging to the Twelfth Air Force are damaged or destroyed when Mount Vesuvius erupts.

MARINES: At Pearl Harbor, Hawaii, the 1st Provisional Marine Brigade headquarters (4th and 22nd Marines) is activated in preparation for operations against Guam.

March 23

MARINES: In the Marshall Islands, Ebon Atoll falls to an attack by the 3rd Battalion, 22nd Marines.

March 25

AVIATION: The Brenner Pass between Italy and Austria is completely interdicted by bombers and fighters of the Fifteenth Air Force, severely slowing the flow of supplies to German units. At this time the Americans employ their radio-guided VB-1 Azon bomb, which is a lineal predecessor to modern “smart bombs.”

NAVAL: In Pacific waters south of Wotje, Japanese submarine *I-32* is cornered and sunk by the destroyer escort *Manlove* and destroyer escort *PC-1135*.

March 26

AVIATION: Pas-de-Calais and Cherbourg, France, are struck by 500 B-17s and B-24s belonging to the Eighth Air Force in an attempt to cripple V-weapon launching sites. Meanwhile, 338 B-26s strike motor torpedo boat pens at IJmuiden, the Netherlands.

NAVAL: North of the Palaus Islands, the submarine *Tullibee* is accidentally sunk by one of its own torpedoes when it malfunctions, circles, and then strikes the vessel.

March 27

AVIATION: A force of 700 heavy bombers belonging to the Eighth Air Force strike multiple airfields and aircraft works across France.

March 28

AVIATION: In England, the 801st Bombardment Group (Heavy) is activated by the Eighth Air Force to conduct special missions throughout the ETO.

MARINES: On Bikini Atoll, Marshall Islands, the tiny islet falls to a company of the 2nd Battalion, 22nd Marines.

March 28–April 2

AVIATION: The Fifteenth Air Force launches a series of heavy air raids in support of ongoing Operation Strangle when 400 B-17s and B-24s attack rail yards around Verona and Cesano. They are escorted by P-40s and P-38s and lose no aircraft; this is also the Fifteenth’s first 1,000-ton raid. This raid is followed by attacks upon Turin, Milan, and Bolzano, where six bomber are shot down. Finally, 530 bombers hit ball-bearing factories at Steyer, Germany, losing 19 aircraft.

March 29

AVIATION: In Burma, the success of British Chindits in rear area operations against Japanese units results in creation of the 1st Air Commando Group under Lieutenant Colonel Philip G. Cochran.

- Several B-24s from the Thirteenth Air Force commit the first daylight raid against Truk Atoll; two bombers are lost.

MARINES: In Washington, D.C., Admiral Ernest J. King directs Major General Holland M. Smith to assume all administrative and logistical control over Fleet Marine Force units deployed in the Central Pacific. This is the origins of FMF Pacific Headquarters.

March 30

AVIATION: Hollandia, New Guinea, is struck by an assortment of fighters and bombers belonging to the Fifth Air Force. A variety of fuel dumps, troop concentrations, and airfields are targeted from Wewak to Mandang.

March 30–April 1

AVIATION: As Task Force 58 launches intense bombing raids on Palau, Yap, Ulithi, and Woleai, TBF Avengers sow mines around Palau Harbor for the first time in broad daylight.

March 31

MILITARY: General Douglas A. MacArthur requests that he retain jurisdiction over the 1st Marine Division for three more months.

April 1

AVIATION: At Cherry Point, North Carolina, the 9th Marine Air Wing is founded to train and equip aviation units prior to their theater deployment.

- At Chakulia, India, the first operational Boeing B-29 Superfortress lands under the command of Colonel Leonard F. Harman.

April 3

AVIATION: A new operational leave policy is adopted by IX Bomber Command; henceforth, crews receive one week's leave between their 25th and 30th missions. Between their 40th and 50th missions, they are entitled to take off an additional two week respite.

April 3–4

AVIATION: For the first time, industrial targets in Budapest, Hungary, are targeted by 450 Fifteenth Air Force bombers, while a 300-bomber raid is launched the following day. Ten B-24s are lost along with a score of German fighters.

April 4

AVIATION: The new Twentieth Air Force is secretly activated in Washington, D.C., which is destined to employ giant B-29 Superfortress bombers against the Japanese mainland from China and India. The force is so significant that it is initially controlled by the Joint Chiefs of Staff.

April 5

AVIATION: The refineries and marshaling yards at Ploesti, Romania, are struck by the Fifteenth Air Force; 13 bombers succumb to enemy fighters and flak.

MILITARY: In Liverpool, England, the all-draftee 88th Infantry Division arrives as part of the forthcoming invasion force.

April 6

MARINES: Headquarters, V Amphibious Corps, establishes a Marine Administrative Command to provide logistic and other services to the Fleet Marine Force in the Pacific.

April 7

NAVAL: In Atlantic waters, German submarine *U-856* is rammed by the destroyer *Champlin* and subsequently sunk, Captain John J. Shaffer, however, dies of shrapnel wounds received in the battle.

- Off the South Pacific island of New Hanover, the Japanese submarine *I-2* is attacked by the destroyer *Saufley* and sunk.

April 8

AVIATION: In a massive operation, the Eighth Air Force launches 13 combat wings in three distinct waves. Brunswick, Germany, is the hardest hit, being the object of 192 B-17s; 34 bombers are shot down.

- The Ninth Air Force commits more than 163 B-26s and 101 P-47s in a major tactical raid against German-manned positions at Hasselt, Belgium.

April 9

AVIATION: A force of 399 B-17s and B-24s belonging to the Eighth Air Force strikes targets across Germany and Poland, losing 32 aircraft to still-doughty German defenses.

MILITARY: At Schofield Barracks, Hawaii, the XXIV Corps under Major General John R. Hodge is activated and controls the 7th, 27th, 77th, and 96th Infantry Divisions.

- At Nhpum Ga, Burma, the 2nd Battalion, Merrill's Marauders, which has withstood a 10-day siege by superior Japanese forces, is rescued by the arrival of the 1st and 3rd Battalions. American losses are 59 dead and 314 wounded, with a further 379 soldiers incapacitated by illness.

NAVAL: Off Madeira Island, TBF Avengers launched from the escort carrier *Guadalcanal* assist destroyer escorts *Pillsbury*, *Pope*, *Flaherty*, and *Chatelain* in sinking German submarine *U-515*. A day later, the same aircraft sink submarine *U-68*.

April 11

AVIATION: The Eighth Air Force launches 800 B-17s and B-24s against fighter production factories and airfields in Germany; 64 bombers are shot down, the second highest loss in a single day during the war. Lieutenant Edward S. Mitchell, ignoring his own wounds, manages to fly his damaged B-17 to safety once his bombardier's parachute is damaged; he wins the Medal of Honor.

- A force of 300 B-26s, A-20s, and P-47s from the Ninth Air Force are committed against targets in northern France.

MARINES: The 4th Marines on Emirau are relieved by army troops and begin shifting back to Guadalcanal.

April 12

MARINES: Major General Holland M. Smith divides his staff into two parts to advise him as he serves as V Amphibious Corps commander and Expeditionary Troops commander.

April 13

AVIATION: Lieutenant General Dwight D. Eisenhower receives authority to direct all American aerial operations relative to Operation Overlord, especially the Eighth and Ninth Air Forces.

- A force of 530 bombers belonging to the Fifteenth Air Force hit, numerous targets in Hungary and southern Germany, claiming the destruction of 120 enemy aircraft.

April 14

MARINES: Off the Marshall Islands, F4U Corsairs of VMF (N)-532 make their first nocturnal kill.

April 15

NAVAL: The new battleship *Wisconsin* is commissioned; this is the third member of the formidable *Iowa* class.

MARINES: IMAC receives the new designation III Amphibious Corps.

April 16

AVIATION: Hollandia, New Guinea, is again hit by the Fifth Air Force, which dispatches 170 A-20s, P-38s, P-40s, and B-25s on bombing missions. However, the onset of poor weather during the return flight leads to the loss of 37 aircraft.

April 17

AVIATION: In South China, bases operated by the 308th Bombardment Group are threatened by a Japanese land offensive; this is the only American heavy bomber outfit in China, and it is specially outfitted for tracking enemy shipping in the South China Sea.

NAVAL: In the North Atlantic, German submarine *U-986* is attacked by the mine-sweeper *Swift* and submarine chaser *PC-619* and sunk.

April 18

MILITARY: In the Po Valley, Italy, the 10th Mountain Division, Fifth Army, reaches Lavino Creek, taking 3,000 German prisoners.

April 19

AVIATION: In the Indian Ocean, air crews from the carrier *Saratoga* assist the newly arrived British carrier *HMS Illustrious* in attacking Japanese installations and shipping at Sabang, Netherlands East Indies.

April 20

NAVAL: Off Algeria, German torpedo aircraft strike the destroyer *Lansdale* as it escorts convoy UGS 38, and it sinks with a loss of 47 crewmen.

- Off the Marianas Islands, Japanese submarine *RO-45* is attacked and sunk by the submarine *Seahorse*.

April 21

NAVAL: West of the Marianas Islands, the submarine *Stingray* collides with an underwater pinnacle, then sinks.

April 22

AVIATION: The Fifth Air Force provide close air support to Allied invading forces at Wewak and Hansa Bay, New Guinea.

MILITARY: American and Australian forces mount a sudden and major amphibious invasion of Hollandia, New Guinea, catching Japanese defenders completely off guard. Two divisions of Lieutenant General Robert L. Eichelberger's I Corps come ashore, placing themselves 300 miles behind Japanese front lines and cutting off the garrison at Wewak, 90 miles to the east.

NAVAL: Task Force 77 under Rear Admiral Daniel E. Barbey delivers two army divisions at Tanahmerah and Humboldt Bay, Netherlands New Guinea. The

endeavor is covered by aircraft launched by Task Force 58 under Rear Admiral Marc A. Mitscher.

MARINES: Company A, 1st Tank Battalion, lands at Tanahmerah Bay, Netherlands New Guinea, in support of army troops fighting there after General Douglas A. MacArthur orders a mop up of the Hollandia region.

April 24

AVIATION: Lieutenant General Kenneth B. Wolfe, commanding the Twentieth Air Force, pilots one of the first two B-29s to cross over the “Hump” (Himalayas) and touch down at Kwanghan, China.

MARINES: At Cape Gloucester, New Britain, the 1st Marines embark and sail for a new berth at Pavuvu, Russell Islands.

April 25

AVIATION: Guam is the target of Seventh Air Force B-24 Liberators; which are operating from Eniwetok for the first time; this is the first raid by land-based bombers.

- In Burma, a Sikorsky YR-2 Hoverfly flown by Lieutenant Carter Harman, 1st Commando Group, executes the first helicopter rescue mission by extracting four downed airmen from the jungle.

April 26

NAVAL: Off Slapton Sands, England, German E-boats torpedo several Allied troop transports rehearsing “Exercise Tiger” for the Normandy Invasion, killing 750 soldiers and sailors. This embarrassing disaster remained classified from public scrutiny for many years.

- Off the Canary Islands, German submarine *U-488* is attacked by destroyer escorts *Frost*, *Huse*, *Barber*, and *Snowden* and sunk.
- Off the Aleutian Islands, the destroyer escort *Gilmore* pursues a sonar contact, which turns out to be Japanese submarine *I-180*, and sinks it with repeated depth charges.

April 27

AVIATION: At Corvallis, Oregon, Marine Air Group 35 deploys at the new Marine Corps Air Facility there.

NAVAL: Off the Caroline Islands, the Japanese light cruiser *Yubari* is torpedoed and sunk by the submarine *Bluegill*.

April 28

NAVAL: In Washington, D.C., James V. Forrestal is sworn in as secretary of the navy following the untimely death of Frank Knox.

MARINES: On New Britain, the 40th Infantry Division assumes responsibility for the island while the 1st Marine Division prepares to ship out.

April 29–May 1

AVIATION: Vice Admiral Marc A. Mitscher of Task Force 58 directs a new series of air strikes against Truk in the Caroline Islands. Meanwhile, battleships and cruisers under Admirals Jesse B. Oldendorf and Willis A. Lee, Jr., bombard Japanese shore installations on Satawan Island and Ponape.

- A TBF Avenger launched from the light carrier *Monterey* joins destroyers *MacDonough* and *Stephen Potter* in attacking and sinking Japanese submarine *I-174*.

April 30

POLITICS: General Douglas MacArthur, long touted as a potential Republican presidential candidate, publicly declares he is not running for public office.

May 1

AVIATION: In China, Operation Matterhorn moves a step closer to reality with the opening of the first B-29 base at Chengtu, China.

May 4

NAVAL: In the Luzon Straits, Philippines, the submarines *Bang*, *Parche*, and *Tinosa* ravage a Japanese convoy, sinking five cargo ships.

MARINES: On New Britain, final elements of the 1st Marine Division embark and sail to Pavuvu, having sustained 275 dead and 948 injured on the island. In return, they are replaced by the 12th Defense Battalion.

May 5

AVIATION: The Fifteenth Air Force, now enlarged to include 20 heavy bombardment groups, launches 640 bombers against the oil refineries at Ploesti, Romania.

MARINES: The force incorporates the new "F" Chart organization, which entails increasing rifle squads from 12 to 13 men, introduction of the four-man fire team, elimination of the amphibian tractor battalion and heavy weapons companies in each battalion, and disbandment of engineer regiments.

May 6

NAVAL: West of the Cape Verde Islands, the destroyer escort *Buckley* and German submarine *U-66* have a go at it whereby both vessels are rammed and a close quarter battle ensues, which only ends after the submarine sinks.

May 7

AVIATION: The Eighth Air Force breaks its own record when it dispatches over 900 bombers against industrial targets in Münster and Osnabrück, Germany.

May 8

AVIATION: The 3rd Marine Aviation Wing deploys to Hawaii while Marine Air Group 23 departs for Midway.

MILITARY: Lieutenant General Dwight D. Eisenhower declares that June 5, roughly a month hence, is D-day for Operation Overlord.

May 9

AVIATION: The Eighth Air Force begins a concerted bombing campaign against German airfields in France and Belgium to keep them inoperable during the buildup to D-day.

May 10

AVIATION: In China, Project Chengtu concludes as 400,000 laborers finish work on five heavy bomber and six fighter bases. B-29 air raids against the Japanese mainland are to commence shortly.

May 11

AVIATION: Operation Strangle concludes in Italy, having delivered 26,000 bombs against German lines of communication and supply since March 19.

May 11–16

MILITARY: Near the Gulf of Gaeta, Italy, the II Corps's 88th and 85th Infantry Divisions kick off the latest drive against the German Gustav Line and good progress is finally made while pressing through the Formia corridor.

May 12

AVIATION: The Eighth Air Force dispatches 800 bombers against oil production facilities in Merseberg, Chemnitz, and Brux, Germany; the Luftwaffe manages to bring down 46 American aircraft.

- The Ninth Air Force begins Operation Eagle as a dress rehearsal for airborne operations over Normandy.
- The Fifteenth Air Force, having reached its authorized strength of 21 bombardment groups, launches 730 bombers against German headquarters at Mass d'Albe and Monte Soratte, Italy. This is its largest raid to date.

May 13

NAVAL: Southwest of the Azores, Japanese submarine *RO-501* is sunk by the destroyer escort *Francis M. Robinson* as it is returning from a voyage to Germany.

May 13–14

AVIATION: The Twelfth Air Force commits light bombers and fighter bombers to assist the Fifth Army as it assaults the German Gustav Line, northern Italy. They are joined by 700 heavy bombers from the Fifteenth Air Force, which conduct interdiction missions against German supply lines.

May 15

NAVAL: Off Tangiers, PBY Catalinas of VP-63 assist British warships in tracking and sinking German submarine *U-731*.

May 16

NAVAL: North of the Solomon Islands, Japanese submarine *I-176* is attacked and sunk by the destroyers *Franks*, *Harrad*, and *Johnston*.

May 17

AVIATION: As Task Force 77 under Rear Admiral William M. Fechteler lands army troops at Wakedep-Toem, New Guinea, aircraft from the carrier *Saratoga* and British carrier *Illustrious* strike out against Japanese installations at Surabaya, Java, Netherlands East Indies.

MILITARY: In north Burma, Merrill's Marauders attack and seize an important air field at Myitkyina, but prove unable to overcome stubborn Japanese resistance defending the nearby town.

NAVY: Off Algeria, eight American destroyers, aided by a British bomber, corner and attack German submarine *U-616*, which is subsequently scuttled.

- An Allied task force under Admiral Sir James F. Somerville launches air strikes against Japanese shipping and shore installations at Surabaya, Java.

May 17–18

AVIATION: The Fifth Air Force dispatches more than 100 B-24s against Japanese targets at Wewak, New Guinea, as Allied forces come ashore unopposed at Arare and Sarimi.

May 17–27

MILITARY: The 41st Infantry Division, Sixth Army, is ordered by Major General Walter Kruger to storm the Japanese-held islands of Wakde (Netherlands New Guinea) and Biak, to construct vital airfields there for future operations.

NAVAL: The Seventh Amphibious Force under Rear Admiral William M. Fechteler lands the 163rd Infantry Regiment on the island of Wakde, which places Allied forces 120 mile west of Hollandia on the northern New Guinea coast.

May 18–19

MILITARY: After intense combat, the German defenders of Monte Cassino, Italy, withdraw northward and abandon their vaunted “Gustav” Line, which is stormed by a hard-charging Polish division. During the fighting the centuries-old monastery, dating back to the 5th century, A.D., has been completely gutted.

- The beachhead at Anzio is reinforced by the 36th Infantry Division as the Allies prepare to break out of their perimeter.

May 19

AVIATION: German aerial opposition north of Rome disappears once the Fifteenth Air Force pushes attacks into that region.

MILITARY: The advance of the II Corps north of Mount Romano, Italy, is expedited by an airborne drop by the 509th Parachute Infantry Battalion.

NAVAL: Off the Algerian coast, German submarine *U-960* is sunk by destroyers *Niblack* and *Ludlow*, assisted by British aircraft.

- Off New Ireland, the destroyer escort *England* under Lieutenant Commander Walton B. Pendleton begins its impressive victory streak by sinking Japanese submarine *I-16*, the first of six vessels claimed in 12 days. No other warship approaches this record.

May 19–20

AVIATION: Carrier aircraft launched from Task Force 58.6 under Rear Admiral A. E. Montgomery attack Japanese installations on Marcus Island, northwest of Wake.

May 21

MARINES: In a horrible accident, a tank landing ship laden (LST) with explosives ignites at Pearl Harbor, Hawaii, destroying five adjacent LSTs and killing 200 marines of the 2nd and 4th Marine Divisions.

May 22

MILITARY: At Bristol, England, the U.S. Eighth Army under Lieutenant General William H. Simpson is renamed the Ninth Army by General Dwight D. Eisenhower to avoid any confusion with England’s famous Eighth Army.

May 23

AVIATION: Waters off the southern end of Bougainville are mined by navy and marine aircraft flying in from Cape Torokina.

MILITARY: After many months of stalemate, the VI Corps launches a concerted effort to break out of the Anzio beachhead, only 30 miles from Rome. German resistance proves fierce but is unable to stop their momentum and the VI and II Corps begin linking up south of the city.

May 25

AVIATION: The Twelfth Air Force harries retreating German forces as they withdraw from Anzio, Italy, and cover the Fifth Army as it breaks out from the beachhead.

MILITARY: The VI Corps under Major General Lucian K. Truscott finally breaks through German defenses and begins the drive toward Rome. In five months of static warfare, 5,000 Allied troops have died, 17,000 have been wounded, and 6,800 have been captured.

MARINES: The 16th Marines are disbanded as part of a general reorganization of the Marine Corps.

May 27

AVIATION: The Eighth, Ninth, and Fifteenth Air Forces put up 2,000 warplanes in European airspace, striking targets across France, Germany, and Italy; 24 heavy bombers are lost.

- At Nanchang, China, P-40 fighters from the Fourteenth Air Force fire air-to-ground rockets at Japanese troop positions.
- Japanese positions on Biak Island are worked over by B-25s and B-24s operated by the Fifth Air Force. Other medium bombers provide close air support for Allied forces at Wewak, New Guinea.

MILITARY: The 41st Infantry Division under Major General H. H. Fuller lands on Biak Island, 150 miles west of Wakde, New Guinea. There they engage an 11,000-man Japanese garrison.

NAVAL: In the Schouten Islands, New Guinea, Rear Admiral William M. Fechteler directs Task Force 77 during amphibious landings on Biak.

May 29

AVIATION: A test A-20 aircraft is used for target practice by gunners firing .50-caliber machine guns loaded with “frangible bullets,” which shatter after hitting an aerial target, leaving only a small mark for scoring purposes.

MILITARY: On Biak Island, New Guinea, the first tank battle of the Southwest Pacific rages as American medium tanks encounter and destroy eight Japanese light tanks.

NAVAL: Off the Azores Islands, the escort carrier *Block Island* is torpedoed and sunk by German submarine *U-549* after its screen of escort destroyers was penetrated; this is the only carrier lost during the Battle of the Atlantic. The German vessel is subsequently tracked and sunk by the destroyer escorts *Ahrens* and *Eugene E. Elmore*.

May 30

MILITARY: Forces involved in Operation Overlord begin loading their equipment and personnel onto landing craft and transports for the upcoming cross-channel invasion.

May 31

AVIATION: The VB-7 (vertical bomb) is tested for the first time; it employs radio-controlled fins for guidance to targets.

NAVAL: Off Matsuwa in the Kurile Islands, a Japanese convoy is attacked in tandem by submarines *Barb* and *Herring*, losing all five of its ships.

June 1

MILITARY: Allied forces break free of the Anzio beachhead and begin their final drive on Rome.

NAVAL: The submarine *Herring* sinks the Japanese freighter *Hiburi Maru* off the Kuriles, only to be sunk in turn by shore batteries.

June 2

AVIATION: The Eighth and Ninth Air Forces contribute 1,000 bombers and fighters for around-the-clock air strikes against airfields and communication facilities across northern France, especially the Pas-de-Calais region, to deceive German intelligence; eight bombers are lost to light resistance.

- The Twelfth Air Force continues launching heavy air raids north of Rome to support the Allied drive.
- In a novel move, Lieutenant General Ira C. Eaker leads Operation Frantic, the first shuttle bombing run from Italy to targets at Debreczen, Hungary, and then land at Poltava and nearby airfields in the Soviet Union. The strike force consists of 130 B-17s and 70 P-51 fighter escorts.

June 3

AVIATION: Marine Corps transport squadrons have their designations altered from VMJ to VMR.

June 4

AVIATION: Lieutenant General Dwight D. Eisenhower halts Operation Overlord for 24 hours in the face of severe weather, although 500 tactical air strikes continue. The storm also provides a convenient cover for the amphibious operation.

This famous photo by Robert Capa illustrates the confusion and shock of combat. Here soldiers cluster around German landing obstacles at Normandy, June 6, 1944. (National Archives)

- The Twelfth and Fifteenth Air Forces continue supporting Allied ground troops as they advance toward the German Gustav Line, although preparations are being made to contribute to Operation Anvil/Dragoon, the invasion of southern France.

NAVAL: Off the African coast, ships and aircraft of Task Group 22.3 corner German submarine *U-505*, seizing it intact once it surfaces. This is the first enemy vessel captured at sea by the U.S. Navy since 1815. Lieutenant Albert L. David leads a boarding party from the destroyer escort *Pillsbury*, which disregards the danger of scuttling charges and secures *U-505*. It is eventually towed to Trinidad. David subsequently wins a Medal of Honor. The submarine is on permanent display at the Chicago Museum of Science and Industry.

June 4–5

MILITARY: German troops hastily abandon Rome to advancing Allied forces and the “Eternal City” finally passes into their hands. It is quickly occupied by the American Fifth and British Eighth armies; the first unit to reach the city is the 88th Reconnaissance Troop, 88th Infantry Division, which occupies the Piazza Venezia that evening.

June 5

AVIATION: As part of the wind up to Operation Overlord, 629 heavy bombers from the Eighth Air Force attack coastal forces along northern France; six are lost to German flak. Lieutenant Colonel Leon R. Vance, Jr., badly wounded by a direct hit on his B-24, manages to fly his craft long enough to allow his stricken plane to ditch in the English Channel; he wins the Medal of Honor.

- In a major escalation of the air war in Asia, a force of 75 B-29s of XX Bomber Command strike Japanese rail targets in Bangkok, Thailand. Five of the new bombers are lost to mechanical problems while several abort for the same reason.

MARINES: In Washington, D.C., Admiral Ernest J. King appoints Major General Holland M. Smith commander of marine ground forces in the Pacific. To this end, the Fleet Marine Force Pacific (FMFPAC) headquarters is founded.

June 5–6

AVIATION: Operation Overlord kicks off at midnight when more than 1,400 C-47s and other transports belonging to the Ninth Air Force begin dropping three full divisions of American and British airborne troops behind German lines throughout northern France. Army Air Force and Royal Air Force tactical aircraft also fly 15,000 sorties in support of the amphibious operation over the next 24 hours. Heavy bombers of the Eighth Air Force, now up to its assigned strength of 40 bomber groups, drop an additional 3,600 tons of ordnance on German supply and communications centers farther back from the beaches. Moreover, 1,800 fighter sorties are flown over the beaches in support of the landings; 36 aircraft fall to enemy flak.

June 6

AVIATION: During D-day, the Eighth, Ninth, and Royal Air Forces conduct over 15,000 interdiction, close air, and airlift sorties in support of landing operations.

**Eisenhower, Dwight D. (1890–1969)***Army general, president*

Dwight David Eisenhower was born in Denison, Texas, on October 14, 1890, the son of Mennonite pacifist parents. They were upset when he was accepted into the U.S. Military Academy in 1911 and graduated four years later a second lieutenant. Eisenhower remained stateside during World War I and commanded a tank school, where he

garnered a reputation for efficiency and cordiality. Over the next three decades Eisenhower rose steadily through the ranks and, in December 1941, he gained appointment as aide to U.S. Army chief of staff George C. Marshall. After the United States entered World War II, Marshall, a good judge of *(continues)*

In this photo, taken in England a few hours before their jump into France, General Dwight D. Eisenhower urges men of the U.S. 101st Airborne Division to “Full Victory—nothing else.”
(Library of Congress)

(continued)

soldiers, promoted Eisenhower over the heads of 300 senior leaders and appointed him commander in chief of Allied forces in Europe. He methodically led American and British forces to victory in North Africa and Sicily before orchestrating the decisive cross-channel invasion of France on June 6, 1944. He then led the forces on an inexorable advance to the Rhine River, repelled a massive German counterattack in the Battle of the Bulge that winter, and helped secure the German surrender by May 1945. Eisenhower, who never received high marks as a combat commander, proved himself one of the finest coalition leaders in military history by dint of tact, a willingness to listen to others, and a steely determination to gamble when necessary and succeed. He returned home a national hero in 1946 and was actively courted by both parties as a presidential contender, but “Ike” displayed no interest in politics. He spent the next several years as president of Columbia University and, after 1950, as chief of the new NATO military alliance.

In 1952 Eisenhower ran for president as a Republican and he handily defeated Dem-

ocrat Adlai Stevenson. He then drew a hard line against Communist expansionism with his policy of armed “containment,” but he refused to commit American forces to Southeast Asia to assist the French. His sagacity paid dividends in 1956 when he again defeated Stevenson for the White House and oversaw one of the most prosperous periods in American history. Major societal changes included the complete desegregation of the American school system following the landmark case of *Brown v. the Board of Education*, and, in 1957, he committed federal troops to enforce a court order to desegregate schools. He also supported creation of a new Civil Rights Commission for African Americans and oversaw establishment of the new Department of Health, Education, and Welfare. His administration hit a major bump in May 1960 after the Soviets shot down a U-2 spy plane piloted by Gary Francis Powers. He also cut off all trade and diplomatic ties with Communist dictator Fidel Castro in Cuba. “Ike” left office in January 1961, but, before leaving, he warned his fellow citizens about the dangers of embracing a “military-industrial complex.” Eisenhower died on his farm in Gettysburg, Pennsylvania, on March 28, 1969.

MILITARY: Operation Overlord commences under the cover of a heavy storm and successfully establishes five American, British, and Canadian divisions on beachheads at Normandy, France, landing a total of 66,000 troops in a matter of hours. Previously, a massive drop by American and British paratroopers disrupts German rear area security. The two American fronts are Omaha Beach (V Corps) and Utah Beach (VII Corps). General Dwight D. Eisenhower has at his disposal 4,000 ships, 3,000 aircraft, and ultimately 4 million troops and sailors. The defeat of Nazi Germany is now only a matter of time.

- Brigadier General Theodore Roosevelt, Jr., son of the former president, comes ashore on D-day as the only general officer on the beach. He fights all day directing the 4th Infantry Division, winning a Medal of Honor.

NAVAL: The American Western Task Force under Rear Admiral Alan G. Kirk bears a direct role in the army's success during Operation Overlord, in transporting troops ashore, providing close support fire from destroyers off shore, and maintaining an endless stream of transport vessels to keep the troops ashore fighting. The destroyer *Corry* strikes a mine and sinks, the first of 165 small craft lost over the next three weeks.

June 7

AVIATION: At Freeman Field, Indiana, the Army Air Force initiates its helicopter training program under Colonel E. T. Rundquist.

- Today the Eighth and Ninth Air Forces fly 2,000 sorties in support of the five beachheads established during Operation Overlord.
- In Italy, the Fifteenth Air Force reaches its peak strength as its 21st heavy bomber group is activated; across Europe, American aircraft are flying thousands of sorties daily in the cause of victory.

NAVAL: Off Reauville, France, the troopship *Susan B. Anthony* strikes a mine; everyone escapes but much valuable equipment belonging to the 90th Infantry Division is lost.

- Given the lack of proper docking facilities in Normandy, France, the navy begins anchoring its vessels on floating artificial harbors made from concrete caissons.

June 8

AVIATION: Lieutenant General Carl A. Spaatz declares that Axis oil production and storage facilities are the number one target of American air power in Europe.

MILITARY: Allied forces at Normandy, France, begin consolidating their beachhead once British and American forces establish contact at Bayeaux. Then VII Corps under Major General Lawton J. Collins begins pressing toward the port of Cherbourg while the V Corps under Major General Leonard Gerow moves inland from Omaha Beach. German resistance remains tenacious and costly to the Allies.

NAVAL: Off Normandy Beachhead, mines damage the destroyer escorts *Glennon*, *Meredith*, and *Rich*, sinking the latter by blowing off 50-feet of its stern; losses are 27 dead, 73 wounded, and 62 missing.

- A Japanese convoy carrying reinforcements for that garrison at Biak, New Guinea, is intercepted by Task Force 75 and forced to withdraw. This consists of the Australian cruiser HMAS *Australia*, light cruisers *Boise* and *Phoenix*, and 14 destroyers, all under Rear Admiral V. A. C. Crutchley.

June 9

AVIATION: Three days into Operation Overlord, the first Allied air units begin operating from airfields in northern France.

NAVAL: Off Normandy Beachhead, the destroyer *Meredith* sinks two days after striking a mine.

- The submarine *Harder*, prowling the waters off Tawi Tawi, Philippines, sinks three Japanese destroyers, survives a protracted, depth-charge attack, and rescues coastwatchers from the island of Borneo; Commander Samuel D. Healy wins a Medal of Honor.

June 10

MILITARY: At Civitavecchia, Italy, the all-Nisei 442nd Regimental Combat Team joins the 34th (“Red Bull”) Division and is soon expanded by absorbing the 100th Infantry Battalion, a veteran of the Salerno campaign.

- The VI Corps under Major General Lucian K. Truscott is pulled out of Italy and readied for the invasion of southern France. Its positions are occupied by the IV Corps Major General Willis D. Crittenberger and the II Corps of Major General Geoffrey Keyes.

NAVAL: Off Normandy, the destroyer *Glennon*, damaged by a mine two days earlier, is sunk by a German shore battery.

- Northeast of Kaving, New Ireland, Japanese submarine *RO-111* is sunk by the destroyer *Taylor*.

- Northeast of Kwajalein, Japanese submarine *RO-42* is sunk by destroyer escort *Bangust*.

June 11

AVIATION: At Poltava, Soviet Union, B-17s and P-51s complete Operation *Frantic* in bombing oil and refinery targets in eastern Europe and landing at bases in Italy.

NAVAL: The *Missouri*, last of the four-ship *Iowa*-class battleships, is commissioned. It is also the last American battleship accepted into naval service.

June 11–12

NAVAL: At Normandy, France, battleships put down supporting fire to assist the 101st Airborne Division in its seizure of Carentan.

June 11–14

NAVAL: Aviation: Task Force 58 unleashes its F6F Hellcat fighters on a protracted sweep of enemy airfields in the Marianas Islands. Japanese air power in the region is eviscerated and 19 ships are sunk.

June 12

AVIATION: General Henry H. Arnold accompanies the Joint Chiefs of Staff as they cross the English Channel to northern France and inspect the beachheads.

- Special Task Force Air Group I arrives in the Russells Islands, being the first guided missile unit deployed to the Pacific.

June 13

AVIATION: In a portent of things to come, the Germans launch the first of their V-1, or “vengeance weapons,” from sites in France and Belgium against Great Britain; one of the pilotless flying bombs strikes Swanscombe, Kent. General Henry H. Arnold drives to the impact site to personally inspect the damage inflicted.

NAVAL: East of Saipan, Marianas Islands, Japanese submarine *RO-36* is attacked and sunk by the destroyer *Melvin*.

June 13–15

NAVAL: Task Group 58.7 under Rear Vice Admiral Willis A. Lee begins an intense shelling of Saipan and Tinian in the Marianas. They are joined in due course by additional battleships and cruisers of Task Groups 52.17 and 52.18 under Rear Admirals Jesse B. Oldendorf and Walden L. Ainsworth.

- Off Honshu, Japan, the submarine *Golet* is sunk, presumably by Japanese aircraft.

June 15

AVIATION: In the South Atlantic, TBF Avengers launched from the escort carrier *Solomons* detect, attack, and sink German submarine *U-860*.

- At Brisbane, Australia, General George E. Kenny becomes commander of the new Far East Air Force (FEAF), which incorporates the Fifth and Thirteenth Air Forces.
- A force of 68 Boeing B-29 *Superfortresses* under Brigadier General LaVerne G. Saunders of XX Bomber Command flies 1,500 miles from bases at Chengtu, China, to bomb steel factories at Yawata, Kyushu, Japan. This is the first major air raid against the Japanese mainland since the famous Doolittle Raid of April 1942. However, bombing results are poor owing to the jet stream at high altitude.
- Carrier aviation launched from Task Force 58 strikes at Iwo Jima, Bonin Islands, to forestall any Japanese aerial counterattacks.
- Major General Ralph J. Mitchell is appointed head of the Aircraft, Northern Solomons to replace AirSols.

MILITARY: At Fort McClellan, Alabama, the Infantry Replacement Training Center accepts its 200,000th soldier to receive basic training.

- On Saipan, Marianas Islands, the 27th Infantry Division under Major General Ralph C. Smith remains in reserve as marines of the V Amphibious Corps go ashore to face a very stiff fight.

NAVAL: Vice Admiral Richmond K. Turner directs Task Force 58 during Operation Forager, the amphibious landings on Saipan and Tinian in the Marianas Islands. They are covered by the guns and aircraft of Admiral Raymond A. Sprunace's Fifth Fleet.

MARINES: The 2nd and 4th Marines are landed on Saipan, meet with ferocious, well-organized Japanese resistance, and incur almost 2,000 casualties before a beachhead is secured this evening. The garrison consists of 29,662 army and naval infantry under Lieutenant General Yoshitsugu Saito and Admiral Chuichi Nagumo, who led the attack on Pearl Harbor.

June 16

NAVAL: Off Tinian, Marshall Islands, Japanese submarine *RO-114* is attacked and sunk by destroyers *Melvin* and *Wadleigh*.

- Near Eniwetok, destroyer escort *Burden R. Hastings* corners and sinks Japanese submarine *RO-44*.
- Forthcoming landings on Guam are cancelled by Vice Admiral Raymond A. Sprunace once intelligence is received that the main Japanese fleet has sortied in strength from the Philippines.

MARINES: On Saipan, the 2nd and 4th Marines are unable to overcome determined Japanese defenders, so General Holland M. Smith orders the 27th Infantry Division up from reserves and into combat.

June 16–17

MILITARY: On Saipan, Marianas Islands, advanced echelons of the XXIV Corps Artillery and the 27th Infantry Division land and wade into the struggle just as

marines on the beachhead perimeter contend with a fierce Japanese counterattack involving 500 soldiers and 44 medium tanks. The attackers relent after losing 31 tanks and 300 men.

June 17

AVIATION: Off Truk, Caroline Islands, a PB4Y-1 Privateer from VB-109 detects and sinks Japanese submarine *RO-117*.

MARINES: In the third day of intense combat, the 4th Marine Division entrusts its left flank to the Army's 165th Infantry Regiment.

June 17–18

MILITARY: At Barneville-sur-mer, France, the 9th Infantry Division under Major General Manton S. Eddy battles through the night to break into the Cotentin Peninsula, cutting off German defenders. Other units also begin pressing out of the beachhead area with the XIV Corps advancing inland as far as Villiers-Fossard.

June 18

MARINES: Bolstered by all eight regiments of the 27th Infantry Division, the 4th Marine Division claws its way across Saipan to Magicienne Bay, cutting Japanese positions in half.

June 18–22

NAVAL: An intense storm in the English Channel destroys the artificial harbor built by Allied forces at Omaha Beach. Fortunately, more than a quarter-million soldiers and all their supplies have been moved ashore beforehand.

June 19

AVIATION: Off Guam, TBF Avengers launched from the escort carrier *Suwanee* detect and sink Japanese submarine *I-184*.

June 19–20

AVIATION: The Battle of the Philippine Sea erupts as Japanese aircraft launched by Vice Admiral Jisaburo Ozawa attack the Fifth Fleet under Vice Admiral Marc A. Mitscher's Task Force 58 in the Marianas Islands. They are vigorously repelled by an effective combat air patrol, which shoots down 326 of the attackers, mostly inexperienced pilots, at a cost of 30 Americans. Commander David Campbell of the carrier *Essex* also downs seven aircraft in one day, making him a leading contender to become the navy's top-scoring ace. Available Japanese naval aviation is decimated and reduced to only 35 surviving aircraft. On the following day Mitscher replies with a counterstrike at the distant enemy fleet, which sinks the carrier *Hiyo* and two oilers and heavily damages three other carriers, a battleship, and four other ships. When the American warplanes return that evening, low on fuel, Mitscher takes the daring and risky move to turn on the carrier lights to help them land. In light of the lopsided tally achieved, this engagement comes to be known as the "Great Marianas Turkey Shoot."

MILITARY: On Saipan, an army artillery battery begins shelling Japanese positions on nearby Tinian.

NAVAL: As the skies above the Philippine Sea are filled with pitching aircraft, the submarines *Albacore* and *Cavalla* manage to penetrate Japanese defenses and sink the carriers *Taiho* and *Shokaku*, respectively.

MARINES: On Saipan, the 2nd and 4th Marines readjust their lines in driving north while the 27th Infantry Division drives south toward Nafutan Point.

June 19–23

MILITARY: On Saipan, Marianas Islands, the 27th Infantry Division is tasked with securing Nafutan Point on the southern coast while marines work over defenses in the north. The soldiers subsequently move up to attack Japanese positions along Purple Heart Ridge and Death Valley.

June 21

AVIATION: The Eighth Air Force mounts its first 900-bomber raid against Berlin, escorted by 900 fighters. Additional aircraft attack rocket launching sites at Siracourt, France.

- Operation Frantic continues as 144 bombers belonging to the Eighth Air Force bomb targets in eastern Europe and land at bases in the Soviet Union. This evening, German bombers raid Poltava, destroying or damaging nearly all 73 B-17s parked there.

MILITARY: At Schofield Barracks, Hawaii, Lieutenant General Simon B. Buckner is appointed commander of the new Tenth Army.

NAVAL: North of Saipan, Marianas Islands, the Japanese submarine *I-185* is detected and sunk by the destroyer *Newcomb* and minesweeper *Chandler*.

MARINES: On Bougainville, the 3rd Defense Battalion is withdrawn, leaving military affairs on that island entirely in the hands of army units.

June 22

AVIATION: As the fighting still rages on Saipan, the AAF 19th Fighter Squadron deploys on Aslito Airfield.

MILITARY: The Serviceman's Adjustment Act, better known as the GI Bill of Rights, is signed by President Franklin D. Roosevelt. This landmark legislation provides veterans with assistance in education, housing, and other needs that might otherwise be beyond their grasp. Over the next decade, the advantages offered by the act makes possible the dramatic expansion of the middle class and national prosperity.

MARINES: On Saipan, the 2nd and 4th Marine Divisions press north until they encounter new Japanese defenses. As fighting rages, the army's 27th Infantry Division is held in reserve.

June 23

AVIATION: The Fifteenth Air Force launches 400 bombers and 300 fighter escorts against oil refineries at Ploesti, Romania; resistance is fierce and costs the Americans 100 aircraft. Lieutenant David R. Kingsley, who refuses to bail out when ordered and instead assists the crewmen to escape—even giving his parachute to the tail gunner—dies when his B-17 crashes, but he wins a Medal of Honor.

MILITARY: On Saipan, the 27th Infantry Division assumes control of the center of the corps zone while the 2nd and 4th Marine Divisions continue bumping up against fierce resistance.

June 23–26

MILITARY: At Cherbourg, France, all three regiments of the 9th infantry Division, VII Corps, begin threading through German defenses. However, progress by the 4th and 79th Infantry Divisions stalls in the face of stubborn resistance.

June 24

AVIATION: On Saipan, P-47 fighter bombers belonging to the Seventh Air Force are launched to provide close air support to army and marine units fighting on Saipan and Tinian.

NAVAL: Southwest of the Azores Islands, TBM Avengers, launched from the escort carrier *Bogue*, detect and sink Japanese submarine *I-52*.

- In the Koshiki Straits, Japan, a Japanese convoy is ravaged by the submarine *Tang*, which sinks three freighters and a tanker.

MARINES: Tough fighting continues on Saipan and Major General Holland M. Smith, angered by the lack of progress, summarily relieves U.S. Army major general Ralph C. Smith as commander of the 27th Infantry Division, replacing him with Major General Sanderford Jarman. The move nearly causes a breakdown in command relations between the two services.

June 25

AVIATION: At Kurubai Cape, Aleutians, two B-24s operated by the Eleventh Air Force bomb a suspected Japanese air field.

NAVAL: Off Cherbourg, France, Task Force 129 duels with German land batteries that strike the battleship *Texas* and four destroyers; the port is captured the following day.

MARINES: On Saipan, the 4th Marines crush organized resistance in the Kagman Peninsula while the 2nd Marine Division captures Mount Tapotchau, a key point in the Japanese defensive line.

June 26

AVIATION: The night skies over Saipan are patrolled by Northrop P-61 Black Widows while P-47 Thunderbolts attack Japanese positions during the day.

MARINES: On Saipan, a force of 500 Japanese infiltrate American lines and launch a desperate nighttime attack against Aslito field. They are defeated by a Marine regiment held in reserve.

June 27

AVIATION: Brigadier General Arthur W. Vanaman becomes the first army general captured in Europe when his bomber is brought down on a raid over Germany; he spends the rest of the war at Stalag Luft III southeast of Berlin.

MILITARY: The French port of Cherbourg falls to army troops after hard fighting. Once rebuilt, it serves as a major entrepôt for the ongoing campaign.

June 30

MARINES: At this juncture of the war, Marine Corps strength stands at 32,788 officers and 442,816 men.

July 2

AVIATION: Southeast of the Azores Islands, a TBM Avenger launched from the escort carrier *Wake Island* detects and sinks German submarine *U-543*.

- Fighters and bomber belonging to FEAF strike at Japanese positions near Kamiri on Noemfoor Island to soften it for an amphibious attack.

NAVAL: On Noemfoor Island, 50 miles west of Biak, New Guinea, Rear Admiral William M. Fechteler directs Task Force 77 in landing the 168th Infantry as part

of the ongoing “leapfrogging” campaign there. The island is captured at a cost of 409 casualties.

July 3

AVIATION: In Europe, the Northrop P-61 Black Widow, the sole American aircraft designed as a night fighter, begins flying nocturnal missions.

MILITARY: American efforts to break through the Normandy beachhead are thwarted by strong German defenses entrenched in dense hedgerows. Nonetheless, the 79th Infantry Division, the 82nd Airborne Division, and the 90th Infantry Division concentrate efforts on the Cotentin Peninsula despite a driving rain.

NAVAL: Off Madeira in the Atlantic, German submarine *U-154* is detected and sunk by destroyer escorts *Frost* and *Inch*.

MARINES: On Saipan, the 2nd Marine Division captures the key town of Garapan, smoothing out its front lines; the Japanese begin retreating from their main defenses.

July 4

AVIATION: American carrier aircraft from the Fifth Fleet strike Japanese installations in the Volcano and Bonin Islands; 10 vessels are claimed sunk.

NAVAL: Off Saipan, Marianas Islands, Japanese submarine *I-10* is attacked and sunk by the destroyer *David W. Taylor* and destroyer escort *Riddle*.

- Off Oahu, Hawaii, submarine *S-28* sinks during a training exercise with a loss of all hands.

July 5

AVIATION: At Harper Dry Lake, California, the rocket-powered Northrop MX-324 flies for the first time. Originally designed as a glider, it sports an Aerojet XCAL-200 rocket motor and is unofficially known as the “Rocket Ram.”

NAVAL: Off Nova Scotia, Canada, German minelaying submarine *U-233* is detected and depth-charged by destroyers *Thomas* and *Baker*, forcing it to the surface, where it is rammed and sunk by *Thomas*.

July 6

AVIATION: A Japanese G4M bomber is flamed at night by a P-61 Black Widow flown by Lieutenant Francis Eaton, Lieutenant James Ketchum, and Sergeant Gary Anderson. This is the first confirmed kill for the P-61.

- In China, the Fourteenth Air Force launches a myriad of P-40s, P-51s, and B-25s against Japanese targets alongside the Yangtze River; ground support missions for Chinese forces are also flown at various locations.

MARINES: The Army 77th Infantry Division is attached to the III Amphibious Corps by Major General Holland M. Smith for the upcoming Guam operation.

July 7

AVIATION: The campaign against petroleum, oil, and lubricant (POL) targets intensifies as the Eighth, Twelfth, and Fifteenth Air Forces stage 3,000 sorties against them; German defenses shoot down 60 aircraft.

MARINES: On Saipan, 3,000 Japanese defenders launch a final banzai attack at dawn against American positions. The Army’s 105th Regiment is nearly overrun, but soldiers and marines drive the attackers back after suffering more than 1,000 casualties.

July 8

AVIATION: For the first time, a C-47 flown by Lieutenant Colonel Clifford Heflin touches down in occupied France to rescue down Allied airmen.

NAVAL: German V-1 missiles explode near the tank landing ships *LST-312* and *LST-384* at Deptford, England, becoming the first vessels damaged by such weapons.

MARINES: On Saipan, the 2nd Marine Division positions itself to the left of the corps front.

July 8–19

NAVAL: Naval vessels commence the longest and most protracted bombardment of the war by striking Japanese installations on Guam. A task force under Rear Admiral R. L. Connolly dumps 15,500 16-inch battleship rounds and 16,214 5-inch cruiser shells on the dug-in defenders.

July 9

AVIATION: Ploesti, Romania, is the target of Fifteenth Air Force bombers employing Pathfinder devices for the first time; escorting P-38 and P-51 fighters claim 14 German aircraft. Lieutenant Donald D. Puckett flies his damaged B-24 long enough to allow most of his crew to bail out; he dies when it crashes, winning a Medal of Honor.

- A wrecked Fiesler Fi. 103 (V-1) is delivered to Wright Field, Ohio, for technical inspection. Slightly over two weeks later, a working copy of its pulse-jet engine is replicated by Ford Motor Company engineers. Copies of the V-1 enter the American arsenal as JB-1 Loons.

MILITARY: The difficult campaign to secure Biak Island, New Guinea, finally ends after drawing in the 34th and 24th Infantry Divisions to assist the 41st Infantry Division initially sent in.

NAVAL: Admiral Chuichi Nagumo, who orchestrated the successful attack on Pearl Harbor, commits suicide on Saipan rather than surrender.

MARINES: On Saipan, the 4th Marine Division stamps out remaining Japanese defenses at Marpi Point, and organized resistance collapses.

July 10

MARINES: On Eniwetok, the U.S. army 405th Regimental Combat Team becomes part of the 1st Provisional Marine Brigade.

- The V Amphibious Corps unleashes its Reconnaissance Battalion and Underwater Demolition Teams (UDT) against Japanese defenses along the Tinian landing beaches.

July 11

AVIATION: Seventh Air Force P-47s take off from Saipan to strike Japanese positions in the Marianas Islands, especially Tinian and Pagan, in anticipation of forthcoming amphibious landings there.

July 11–16

AVIATION: The Eighth Air Force commits over 1,000 bombers and 800 escort fighters in a series of repeated strikes against rail yards and aircraft engine factories in Munich, Germany.

- The Fifteenth Air Force begins attacking ground targets in southern France in support of Operation Anvil/Dragoon.

July 12

MARINES: In the Marianas Islands, marines and army troops capture the strategic island of Saipan after sustaining 3,426 dead and over 13,000 wounded. However, Japanese losses top 27,000 with only 1,780 taken captive. Moreover, the Americans can now operate land-based B-29 bombers much closer to the Japanese mainland.

- Major General Holland M. Smith is appointed commander of the Fleet Marine Force Pacific (FMFPAC) while Major General Harry Schmidt succeeds him to head up the V Amphibious Corps.

July 12–17

AVIATION: Off Luzon, Philippines, submarines assigned to Task Group 17.16 attack a Japanese convoy, sinking nine vessels.

July 13

MARINES: Off Saipan, the 3rd Battalion, 6th Marines lands on Maniagassa Island, clearing out the defenders and ending another costly campaign. Marine casualties are 3,152 dead and 8,575 wounded.

July 13–14

MILITARY: An ingenious hedgerow cutter is demonstrated for General Omar N. Bradley in Normandy, France, by the 102nd Cavalry Reconnaissance Squadron. The order then goes out to mass produce them for medium and light tanks in time for Operation Cobra, a massive, planned breakout. The 4th Armored Division lands and deploys in support.

July 14

NAVAL: Off Tinian, Marianas Islands, Japanese submarine *I-6* is detected and sunk by destroyer escort *William C. Miller* and high-speed transport *Gimer*.

July 15–18

MILITARY: The First Army fights its way out of the Normandy hedgerows with the 29th and 35th Infantry Divisions, captures Hill 122, and comes within a mile of St. Lô, which finally falls on the 18th. The Army now prepares for Operation Cobra, the long-awaited breakout from the landing zone.

July 17

AVIATION: Over Coutances, France, P-38 Lightning fighters drop napalm (jellied gasoline) on German fuel depots for the first time. It proves to be a frightening and highly destructive weapon.

NAVAL: At Port Chicago, California, ammunition onboard the merchant vessel *E. A. Bryant* explodes while at dockside, killing 320 workers. Because the bulk of these casualties are African-American munitions loaders, the survivors refuse to return to work and 258 are brought before court-martials. After the war, all of them are granted honorable discharges.

July 17–20

NAVAL: Along the beaches of Guam, Marianas Islands, underwater demolition teams (UDT) remove or neutralize 940 obstacles prior to the amphibious landing there.

Mitscher, Marc A. (1887–1947)

Admiral

Marc Andrew Mitscher was born in Hillsboro, Wisconsin, on January 26, 1887, raised in Oklahoma, and appointed to the U.S. Naval Academy in 1906. He graduated four years later and served on a succession of capital ships. However, his career changed direction in 1915 when he volunteered for flight training at Pensacola, Florida, and won his wings in June 1916. Mitscher spent World War I commanding a number of naval air stations on Long Island and Florida, but, in July 1919, he was selected to pilot one of three giant Curtiss NC flying boats to England in a major transatlantic hop. By 1922 his expertise in aviation resulted in a transfer to the Bureau of Aeronautics, and, that fall, he led a team of navy pilots in the International Air Races in Detroit, Michigan. In May 1926 he served aboard the experimental carrier *Langley* and helped pioneer operational techniques. The following year he became executive officer on the new carrier *Saratoga*, and he landed the first aircraft to touch down on its flight deck. In October 1941, Mitscher was promoted to captain of the newly commissioned carrier *Hornet*.

The advent of World War II saw the soft-spoken Mitscher become one of the leading exponents of carrier warfare. In April 1942 he commanded the *Hornet* when it conveyed Colonel James H. Doolittle on his one-way raid against Tokyo, Japan. Two months later, his carriers contributed to the brilliant victory at Midway. In July 1942 he was promoted to rear

admiral and assumed command of navy and army aviation units during the Guadalcanal campaign, in which his units sank 17 ships and shot down 470 aircraft, including a bomber carrying Admiral Isoroku Yamamoto, head of the Japanese Combined Fleet. In January 1944, Mitscher assumed control of the Fast Carrier Task Force, which was called Task Force 58 or 38 depending on whether it was headed by Admiral William F. Halsey or Raymond A. Spruance. His forces raised havoc among the Japanese-held islands in the Central Pacific, and, in June 1944, they decisively defeated Japanese naval aviation in the "Marianas Turkey Shoot." Faced with the imminent loss of pilots untrained for night carrier landings, Mitscher disregarded possible submarine threats and ordered all deck lights turned on. Through this very bold but humane expedient, many weary fighter pilots were guided to safety and lived to fight another day. In October 1944, Mitscher's carriers were again instrumental in destroying the remnants of Japanese sea power at Leyte Gulf, and he saw intense action off Iwo Jima and Okinawa in the spring of 1945. One of his last triumphs was sinking the giant Japanese battleship *Yamato* as it sortied against the American beachheads. After the war Mitscher served as deputy chief of operations in the Navy Department and, in March 1946, advanced to full admiral in charge of the Eighth Fleet. He died at Norfolk, Virginia, on February 3, 1947, a quiet, unassuming, but effective naval commander.

July 18

AVIATION: Over southern Germany, a P-51 Mustang flown by Lieutenant C. D. “Lucky” Lester, an African American flying with the 100th Fighter Squadron, 332nd Fighter Group, downs three German fighters while escorting heavy bombers.

MILITARY: Premier Hideki Tojo, disgraced by the recent fall of Saipan, resigns from office and a new government forms.

July 18–20

MILITARY: Near Pisa, Italy, the Fifth Army’s VI Corps storms into Leghorn with elements of the 34th, 88th, and 91st Infantry Divisions and begins approaching the formidable German Gothic Line.

July 19

AVIATION: A force of 1,100 bombers from the Eighth and Fifteenth Air Forces strike Munich and other industrial targets in Germany, escorted by nearly 1,000 fighters.

- Scores of B-24s from FEAF strike Japanese targets on Yap, Ngulu, and Sorol Islands while fighter bombers provide close support to Allied troops in the Sarmi-Sawar sector of New Guinea.

NAVAL: Off Tinian, Marianas Islands, Japanese submarine *RO-48* is detected and sunk by the destroyer escort *Wyman*.

- In the South China Sea, the submarine *Flasher* torpedoes and sinks the Japanese light cruiser *Oi*.

July 21–24

NAVAL: Operation Stevedore, the invasion of Guam, is directed by Rear Admiral Richard L. Conolly of Task Force 53, which lands troops under an umbrella of close support naval gunfire.

MARINES: The III Amphibious Corps under Major General Roy S. Geiger begins landing the 3rd Marine Division and 1st Provisional Marine Brigade on Guam; they encounter fierce Japanese opposition from 19,000 troops under Lieutenant General Takeshi Takashima. Two beachheads are secured in stiff fighting and a sharp counterattack is thrown back that night.

July 22

AVIATION: Operation Frantic continues as P-38s and P-51s, flying from Italy, attack airfields near Ploesti, Romania, and fly on to bases in southern Russia.

MILITARY: At Colombières, France, Lieutenant General Omar N. Bradley assumes command of the Twelfth Army Group and places his initial command post in an apple orchard. His force includes the First Army under Lieutenant General Courtney H. Hodges and the Third Army under Lieutenant General George S. Patton, recently restored to command after a one-year hiatus.

MARINES: On Guam, the 9th Defense Battalion lands in support of other forces.

July 23

MARINES: Off the coast of Guam, Cabras Island is seized by the 3rd Marine Division.

July 24

AVIATION: On Tinian P-47s belonging to the Seventh Air Force drop napalm bombs on heavy jungle vegetation to deny Japanese defenders tactical cover.

MILITARY: On Guam, Marianas Islands, the 77th Infantry Division is initially in reserve as the marines of the III Amphibious Corps move inland. On the 24th it is sent ashore to help overcome stiff resistance and relieves the 1st Provisional Marine Brigade.

NAVAL: The amphibious operation on Tinian, Marianas Islands, is directed by Rear Admiral Harry W. Hill, who lands marines and other troops on the beach. The island is stoutly defended by 9,162 Japanese troops under Vice Admiral Kakuji Kakuta and Colonel Keisha Ogata.

MARINES: The northwest coast of Tinian is assaulted by Major General Harry Schmidt as his 4th Marine Division hits the beaches while the 2nd Marine Division feints farther south. The beachhead is attacked tonight by a Japanese counterattack but holds.

July 25

AVIATION: A force of 1,495 heavy bombers of the Eighth Air Force commences Operation Cobra by sweeping over German positions around St. Lô, France, carpet bombing defensive positions, and creating paths for American ground forces to pour through. The Panzer Lehr Division, an elite tank training unit, is nearly annihilated by American air power, whose bombs leave the surrounding landscape as cratered as the moon's surface.

MILITARY: The Third Army under General George S. Patton initiates "Operation Cobra," a breakout from the Normandy beachhead at St. Lô, assisted by waves of heavy bombers attacking German formations in their path. However, Lieutenant General Lesley J. McNair, ground forces commander, is killed when American bombers undershoot their target, along with 102 other soldiers. He is the highest ranking officer killed by "friendly fire." Nonetheless, the V, VII, and VIII Corps pour into the breach and begin routing the dazed German defenders.

MARINES: On Tinian, the 2nd Marine Division storms ashore and positions itself along the eastern flank of the corps zone. Farther inland, Ushi Air Field falls to the 8th Marines.

- On Guam, the 1st Provisional Marine Brigade, meanwhile, seals off the Orote Peninsula; to the north, the 3rd Marine Division suffers a strong counterattack in the evening but repels it.

July 25–28

AVIATION: Carrier-based aircraft from the carriers of Admiral Marc A. Mitscher's Task Force 58 strike Japanese installations in the Caroline Islands, including Yap, Ulithi, Fais, Ngulu, Sorol, and Palau.

July 26

MILITARY: In Burma, Brigadier General Thomas S. Arms is appointed commander of the 5332nd Brigade (Provisional), which includes Merrill's Marauders and the 124th Cavalry Regiment. Several Chinese units are also attached and administered.

NAVAL: President Franklin D. Roosevelt arrives at Pearl Harbor, Hawaii, on board the cruiser *Baltimore* for a four-day conference with senior military leaders, including Admiral Chester W. Nimitz and General Douglas A. MacArthur. One of the biggest issues they discuss is whether to continue the Central Pacific offensive onto Taiwan or the Philippines. There are logical reasons for either, but MacArthur forcefully presses the view that there is a moral imperative for liberating the Philippines first.

- Off Palawan Island, Philippines, the submarine *Robalo* disappears, most likely from striking an enemy mine.

MARINES: On Guam, the 1st Provisional Marine Brigade begins the reduction of the Orote Peninsula.

- On Tinian, Mount Lasso falls to a combined assault by the 2nd and 4th Marines.

July 27

MILITARY: After an intense fight, the airfield at Myitkyina, Burma, falls to the exhausted remnants of Merrill's Marauders, but the 209th and 236th Engineer Battalions are rushed forward to stave off determined Japanese counterattacks.

July 27–29

MILITARY: President Franklin D. Roosevelt, in making his only trip to the Pacific at Honolulu, Hawaii, begins to confer with General Douglas MacArthur and Admiral Chester Nimitz. MacArthur prevails upon the president to liberate the Philippine Islands, although they are not strategically essential to the war effort. Roosevelt also reviews the 27th Infantry Division and visits soldiers and marines recently wounded at Saipan.

July 28

NAVAL: East of Tinian, Marianas Islands, Japanese submarine *I-55* is detected and sunk by destroyers *Wyman* and *Reynolds*.

MARINES: On Guam, the old marines barrack on the Orote Peninsula falls to the 22nd Marines as the 3rd Marine Division and 77th infantry Division link up and join perimeters.

July 29

AVIATION: The Showa steelworks at Anshan, China, is struck by B-29s of XX Bomber Command. One bomber is lost to enemy action while another, badly damaged, is forced to land at Vladivostok, Soviet Union. This aircraft serves as the model for the Tupolev Tu-2 BULL, the first Soviet strategic bomber.

July 30

AVIATION: Task Force Typhoon, a surprise amphibious landing at Mar, New Guinea, unfolds under the protective cover of a FEAF umbrella, which also provides a diversion by striking Japanese installations at Wewak.

July 30–31

NAVAL: Rear Admiral William M. Fechteler directs Task Force 77 as it lands the 6th Army Division under Major General Franklin C. Sibert on Cape Sansapour and Cape Opmari, New Guinea. They come ashore unopposed, bringing the New Guinea campaign to a victorious conclusion.

**Patton, George S. (1885–1945)***Army general*

George Smith Patton was born in San Gabriel, California, on November 11, 1885, the grandson of a Confederate war veteran. Dyslexic and sickly as a child, Patton was tutored at home, overcame his disabilities, and, in 1903, gained admission to the Virginia Military Institute. The following year he transferred to the U.S. Military Academy, from which he graduated in 1909. Patton was assigned to the cavalry, and, in 1916, he campaigned with distinction on the staff of General John J. Pershing during the hunt for Pancho Villa. The following year he accompanied Pershing to Europe and fought in World War I while commanding the army's first tank brigade at Saint-Mihiel and Meuse-Argonne. Patton was severely wounded but received the Distinguished Service Cross and the Distinguished Service Medal, along with promotion to colonel. He spent the next two decades in Virginia commanding cavalry units until, in 1940, he assumed control of

the 2nd Armored Division at Fort Benning, Georgia, as a major general. Patton distinguished himself as a leader of fast-moving armored columns throughout the famous Louisiana war games of 1941. Afterward, he was assigned to take charge of the newly formed 1st Armor Corps, which he trained vigorously in the California desert. Once the United States entered World War II, Patton took his tanks to North Africa under General Dwight D. Eisenhower, where, on March 23, 1943, he successfully ambushed the crack German 10th Panzer Division at El Guettar, Tunisia. Success led to his appointment as commander of the Seventh Army, which spearheaded the invasion of Sicily with great success. However, Patton's career was nearly sidelined after he slapped a soldier for alleged cowardice and he was replaced by General Omar N. Bradley.

It was not until August 1944 that Patton was allowed to lead troops in the

July 30–August 9

MILITARY: At Sansapor, New Guinea, the 6th Infantry Division under Major General Franklin C. Sibert makes a successful descent upon the northern coast. Meanwhile, the 32nd Infantry Division encounters heavy resistance during its advance to Aitape, and the region cannot be declared secure for another week.

July 31

NAVAL: South of Formosa (Taiwan), a Japanese convoy is ravaged by a submarine group commanded by Commander Lewis S. Parks, who sinks four ships and damages three more. During the attack, the *Parche*, under Commander Lawson P. Ramage, makes a daring surface attack at dawn, which illuminates the convoy and then remains on the surface to draw fire from the other subs. Ramage wins the Medal of Honor.

MARINES: On Tinian, Japanese resistance stiffens as the 2nd and 4th Marine Divisions work their way up the escarpment and establish a toehold.

field again. As commander of the new Third Army, he smashed through German defenses at Avranches, advanced east at a lightning clip, and surrounded fleeing enemy forces at the Falaise Gap. His hard-charging tanks reached as far the Meuse River when they ran out of fuel. Eisenhower subsequently allotted men and equipment to British field marshal Bernard Montgomery for an ill-fated drive through the Netherlands, and the Third Army was compelled to launch only a minor offensive near Metz. In December 1944, the Germans struck back violently in the Ardennes, Belgium, and Patton completed one of the war's most brilliant maneuvers by rotating his line of advance by 90 degrees, hitting the Germans in the flank, and relieving the defenders of Bastogne. He charged through German defenses along the Rhine and advanced far into Austria and Czechoslovakia when he was ordered to halt on May 2, 1945. Patton subsequently served as military governor of Bavaria, when he publicly criticized the program of denazification, and was again

George S. Patton, Jr., strikes a pose as conqueror of Sicily, August 1943. (*Virginia Military Institute Archives*)

relieved of command. He died of injuries received in a car accident on December 21, 1945.

- On Guam, the settlement of Agana falls to an assault by the 3rd Marine Division just as the 77th Infantry Division reaches the coastline, splitting island defenses in two.

August 1

AVIATION: At Fort Shafter, Hawaii, Lieutenant General Millard F. Harmon, becomes commander of the new Army Air Forces, Pacific Oceans Areas.

- In an attempt to better consolidate and coordinate all logistical and tactical operations in the theater, General Millard F. Harmon gains appointment as commander of the Army Air Force Pacific Ocean (AAFPOA).
- On Saipan, P-47s and P-61s continue their day and nighttime patrolling actions over Guam, Rota, and Pagan, in support of Allied ground forces fighting there.

MILITARY: In France, the Twelfth Army Group is activated under Lieutenant General Omar S. Bradley.

- Lieutenant General Courtney H. Hodges is promoted to command the First Army, and its component V and VII Corps, until the end of hostilities.
 - On Bastia, Corsica, command of the Sixth Army Group passes to General Jacob L. Devers, with orders to provide overall command to the Seventh Army under Lieutenant General Alexander M. Patch and the French First Army under General Jean de Lattre de Tassigny. The impending invasion of southern France is delayed due to a shortage of landing craft, however.
 - At Fort Shafter, Hawaii, Lieutenant General Robert C. Richardson gains appointment as commander of U.S. Army Force, Pacific Ocean Areas, which encompasses all units in the Central and South Pacific regions.
- MARINES:** On Tinian, the 2nd and 4th Marines finish mopping up Japanese resistance along the southern coast, and the island is secured. American losses are 368 killed and 1,921 wounded. Major General Holland M. Smith pronounces this campaign one of the best executed amphibious operations of the war.
- On Guam, the 1st Provisional Marine Brigade sweeps through southern portions of the island while the 3rd Marine Division and 77th Infantry Division clear out the northern portions.

August 2

NAVAL: East of Newfoundland, Canada, the destroyer escort *Fiske* is torpedoed and sunk by German submarine *U-804* with a loss of 30 lives.

August 3

MILITARY: At Myitkyina, Burma, Chinese infantry units arrive and finally secure the area from Japanese counterattacks.

NAVAL: In Washington, D.C., the Navy Department establishes the Office of the General Counsel.

August 4

AVIATION: Several worn-down and pilotless B-17s and B-24s participate in the first Operation Aphrodite mission over Pas-de-Calais, France; the aircraft are packed with several tons of explosives by a crew of two, who bail out over the English Channel, whereupon a pacing aircraft guides the planes along via radio control to their target. Considering the dangers such missions pose to the crew, they are abandoned shortly after.

- As the battle rages on Guam, VMF (N)-534 is the first squadron of Marine Air Group 21 to deploy there.

MILITARY: American commanders in Italy modify the plan to assault the fearsome German Gothic Line by reinforcing the Fifth Army with the British XIII Corps, the whole of which will make diversionary move against Florence and Bologna. The main thrust north is to be delivered by the II Corps, with additional diversionary maneuvers by the IV Corps in the area of Pontedera-Cascina.

- On Guam, the 77th Infantry Division captures Mount Barrigada from stubborn Japanese defenders.

August 4–5

NAVAL: Off the Bonin Islands, Task Group 58.1 under Rear Admiral Joseph J. Clark attack a Japanese convoy with gunfire and carrier aircraft, sinking eight vessels. The following day Clark is joined by Task Group 58.3 under Rear Admiral Alfred E. Montgomery, and the two launch air strikes against the Bonin Islands.

August 4–6

AVIATION: A force of 1,250 heavy bombers is launched by the Eighth Air Force against multiple targets in Germany and northern France, and the raids are repeated over the next two days.

- The Fifteenth Air Force launches another mission under Operation Frantic by dispatching 70 P-38s and P-51s to targets in eastern Europe. This attack is made in response to a request by the Soviet high command.

August 5

MILITARY: At Myitkyina, Burma, the 475th Infantry Regiment organizes as a special, long-range penetration unit and is assigned to the 5332nd Brigade (Provisional), the future Mars Task Force, and reports to the Northern Combat Area Command (NCAC).

MARINES: On Guam, Japanese defenses centered upon the town of Finegayan fall to the 3rd Marine Division.

August 6

AVIATION: During an escort mission over Brandenburg, Germany, a P-51 Mustang flown by Major George E. Preddy tangles with intercepting German fighters, downing six in only five minutes. Before his death by flak in December 1944, he is the highest-scoring Mustang ace with 25 victories.

MILITARY: On Guam, Marianas Islands, Colonel Douglas C. McNair, 77th Infantry Division, is killed in action; his father, General Lesley J. McNair, was killed at Normandy 12 days earlier.

MARINES: On Tinian, the 2nd and 4th Marine Divisions embark for Saipan and Hawaii, respectively, while the 8th Marines continue mopping up operations.

August 7

MARINES: On Guam, the III Amphibious Corps begins its final drive to eliminate Japanese resistance on northern parts of the island.

NAVAL: Off Kyushu, the submarine *Croaker* torpedoes and sinks the Japanese light cruiser *Nagara*.

August 8

AVIATION: In England, command of the Ninth Air Force is assumed by Lieutenant General Hoyt S. Vandenberg.

- A major air raid by the Fourteenth Air Force strikes Japanese communication and storage facilities at Hengsham, Hamoy, and Swatow, China.

MILITARY: In the strategic port of Brest, France, the outnumbered German garrison refuses all calls to surrender, so Lieutenant General George S. Patton orders up the 6th Armored Division to prepare for an all-out assault. Heavy fighting also erupts near St. Malo as the 83rd Infantry Division moves on Dinard, but better progress is made at Le Mans, which is overrun by the XV Corps and the 2nd French Armored Division.

- In France, the Combined Airborne Headquarters is established under Lieutenant General Lewis H. Brereton; it is subsequently retitled the First Allied Airborne Army.
- On Guam, Marianas Islands, the 77th Division eliminates the final Japanese defenders on Mount Santa Rosa.

August 9

AVIATION: Over the Seine River, France, a B-26 Marauder flown by Captain Darrell R. Lindsey is struck and set aflame by flak; Lindsey continues flying his crippled bomber until the crew bails out, then dies in the ensuing crash; he posthumously receives a Medal of Honor.

August 10

AVIATION: Even before Guam, Tinian, and Saipan are declared secure, construction crews begin repairing and enlarging airfields for mounting B-29 operations against the Japanese homeland.

- The Seventh Air Force commits the first B-24 operations against Japanese positions on Iwo Jima, Bonin Islands, preparing them for an amphibious invasion six months hence.

MARINES: On Guam, the last handful of 17,000 Japanese defenders and tanks are eliminated by the 3rd Marine Division and the island is declared secure. American casualties are 1,568 dead and 6,933 wounded.

August 10–11

AVIATION: B-29s of XX Bomber Command flying from Chengtu, China, strike industrial targets in Nagasaki, Japan. Another force staging from China Bay, Ceylon (Sri Lanka) hits oils refineries at Palembang, Sumatra, Indonesia, 3,900 miles away—this is the longest mission flown by B-29s in the war.

August 10–14

AVIATION: The Twelfth Air Force launches hundreds of B-25s, B-26s, and P-47s in strikes along the French and Italian coasts west of Genoa. Soon after, the Fifteenth Air Force unleashes heavy bombers to soften up targets for the intended invasion of southern France.

August 12

MARINES: Major General Roy Geiger and the III Amphibious Corps headquarters depart Guam and head for Guadalcanal to begin operational planning for the conquest of the Palaus.

August 13

AVIATION: At Le Havre, France, German U-boat pens are struck by two GB-4 radio-controlled, television-guided glide bombs as part of Project Aphrodite.

NAVAL: In the Balabac Strait, British North Borneo, the submarine *Flier* is lost after striking a mine and sinking; eight of the crew survive.

MARINES: Marine units in the Marianas Islands, not specifically assigned as garrisons, are assigned to the V Amphibious Command.

August 14

AVIATION: The Seventh Air Force is reorganized into a hard-hitting tactical force whose aircraft, on this day, manage to strike Japanese targets along a vast Pacific arc, including Iwo Jima, Pagan, Rota, Ponape, and the Wotje Islands.

- Hundreds of heavy and medium bombers belonging to the Twelfth and Fifteenth Air Forces pound German positions in the Toulon-Nice-Genoa area as

part of Operation Anvil/Dragoon. They are escorted by 200 fighters, although resistance is almost nonexistent.

August 15

MILITARY: Operation Dragoon (nee Anvil) unfolds as three divisions of the Seventh Army under Lieutenant General Alexander M. Patch splash ashore on the Riviera in southern France and push up the Rhone River valley. The attack is spearheaded by VI Corps under General Lucian K. Truscott, who easily overcomes light German resistance.

NAVAL: The Western Naval Task Force commander, Vice Admiral H. Kent Hewitt, directs amphibious operations during Operation Dragoon, the attack upon southern France.

MARINES: On Guam, the Island Command headquarters is assumed by Major General Henry L. Larson.

August 16

AVIATION: A flight of B-17 bombers over Merseberg, Germany, is attacked by Me-163 Komet rocket-propelled fighters for the first time. Though spectacularly fast at 590 miles per hour, they prove ineffective against heavily armed bombers.

- In India, following the defeat of a determined and bloody Japanese offensive, the Tenth Air Force commits fighters and bombers to targets in northern Burma.

August 18

AVIATION: Waves of B-26 and A-20 bombers, flying from bases in northern France, strike at enemy fuel and ammunition dumps, covered by more than 1,000 fighter escorts. The German army is beginning to crack and retreat under the weight of such incessant aerial onslaughts.

NAVAL: Off Luzon, Philippines, a Japanese convoy is attacked by the submarines *Rasher* and *Redfish*, which sink four vessels and damage two more.

- In the San Bernadino Strait, the submarine *Hardhead* torpedoes and sinks the Japanese light cruiser *Natori*.

MARINES: In Londonderry, Northern Ireland, the Marine Barracks closes down and the garrison is withdrawn back home. However, 80 marines are retained to guard the Naval Radio Station.

August 20

AVIATION: The Seventh Air Force launches Saipan-based B-24s against Yap while Marshall Islands-based aircraft continue bombing Truk.

NAVAL: In the North Atlantic, TBM Avengers launched from the escort carrier *Bogue* attack and sink German submarine *U-1229*.

August 21

MILITARY: Rapidly moving American and Canadian army columns close the Falaise-Argentan Gap, while waves of British fighter bombers attack fleeing German units with air-to-ground rockets; 50,000 Germans are captured, although most of their tanks and heavy equipment escape. With fighting around Normandy completed, the French 2nd Armored Division is tasked with liberating Paris, assisted by the 4th Infantry Division.

Truscott, Lucian K. (1895–1965)

Army general

Lucian King Truscott was born in Chatfield, Texas, on January 9, 1895, and raised in Oklahoma. He trained as a schoolteacher in 1911 but, following American entry into World War I, he joined the army as a lieutenant of cavalry. Truscott remained stateside during the war years and, over the next two decades, acquitted himself well in several command positions. These included stints at the Cavalry School (1926) and the Command and General Staff College (1936), whereupon he rose to temporary colonel in December 1941. Truscott, who exhibited a booming voice and martial qualities, came to the attention of Army Chief of Staff general George C. Marshall, who arranged his promotion to temporary brigadier general as of May 1942 and dispatched him to England as part of the Allied Combined Staff under Lord Louis Mountbatten. When the United States became embroiled in World War II, the country was woefully unprepared, and Truscott developed a fascination for the famous British commandos. He argued that the American army needed a group of elite light infantry, which he dubbed rangers after Rogers' Rangers of French and Indian War fame. The War Department agreed and, in concert with Major William O. Darby, Truscott began recruiting and training his elite formation. On August 19, 1942, these troops became the first American troops to see combat at Dieppe, France, when Truscott and Darby led a company ashore in concert with Canadian forces. The attack failed disastrously, but lessons learned from it spared thousands of lives as the war progressed.

In November 1942, Truscott's men distinguished themselves in the capture of Lyautey, Morocco, and General Dwight D. Eisenhower rewarded him with command of the famous 3rd Division and promotion to major general. These men were subject to Truscott's fierce and personal brand of discipline and,

- The famous "Red Ball Express" is organized by the Transportation Corps to provide front-line units with the necessary food and ammunition to continue fighting for protracted periods. The unit, which is 75 percent manned by African-American soldiers, employs over 6,000 trucks and other vehicles. By November 13, 1944, the vehicles will have carried 1.5 million ton-miles.

MARINES: On Guam, the 1st Provisional Marine Brigade ships out for Guadalcanal.

August 21–24

NAVAL: The submarine *Harder* under Commander Samuel D. Dealey, a highly decorated officer, sinks several Japanese vessels off the Philippines before succumbing to a coastal defense vessel. Previously, he had claimed a total of 16 Japanese warships and transports; he wins a posthumous Medal of Honor.

August 22

MARINES: Units of the 3rd Marine Division continue with mopping up operations on Guam—the last Japanese holdout does not turn himself in until 1960.

in the Sicilian campaign that summer, they outpaced all other divisions in terms of ground covered. Truscott distinguished himself in hard fighting as Salerno and Anzio, Italy, and, in the later action, he counterattacked German defenders and made possible the occupation of Rome on June 4, 1944. The following month he transferred with the VI Corps to participate in Operation Anvil/Dragon, the invasion of southern France. Truscott handled his forces adeptly and mauled the German 17th Army, taking 23,000 prisoners in two weeks. He transferred back to Italy as a lieutenant general to replace General Mark W. Clark as head of the Fifth Army, and he staged the final battles that pierced the German Gothic Line. After the war Truscott succeeded General George S. Patton as governor of Bavaria and returned to the United States in 1946. He retired that fall and served several years as U.S. commissioner to West Germany while penning a famous memoir, *Command Decisions*, in 1954. That same year Congress elevated him

Lucian K. Truscott (Library of Congress)

to full general. He died in Washington, D.C., on September 17, 1965. Truscott remains the only officer of World War II to rise from command of a regiment to that of an entire field army.

August 23

AVIATION: In Burma, the Tenth Air Force commits 43 P-47 fighter bombers to provide close air support during a British advance. Troop concentrations, batteries, and headquarter buildings are all ravaged.

August 24

AVIATION: A B-29 piloted by General Edmund "Rosie" O'Donnell, 73rd Bomb Wing Headquarters, lands in the Marianas Islands, being the first unit of the Twentieth Air Force to deploy there.

August 25–26

DIPLOMACY: In a nod to French sensibilities, forces under General Philippe Leclerc liberate the capital of Paris and are allowed to parade one day ahead of the Americans, who did most of the fighting at Normandy. The German garrison commander, General von Choltitz, defies Adolf Hitler's orders to burn the city, and he surrenders without a fight.

August 27

MILITARY: General Dwight D. Eisenhower and his staff arrive in Paris, France, and observe a parade by the 28th (Keystone) Division, which promptly marches to the frontlines.

August 28

AVIATION: Over Germany, P-47 Major Joseph Myers and Lieutenant Manford O. Croy, Jr., team up to become the first American fighter pilots to shoot down a Messerschmitt Me-262 jet fighter. This is the first operational jet fighter, packing a top speed of 540 miles per hour, and a formidable bomber destroyer.

- Brigadier General Haywood Hansell takes charge of XXI Bomber Command while Brigadier General Laurence Norstad is appointed chief of staff of the Twentieth Air Force.

MILITARY: German forces surrender at Toulon and Marseille, southern France, while the American army continues surging up the Rhône River valley toward the city of Lyon.

August 29

AVIATION: In a significant move, Major General Curtis E. LeMay becomes commander of the XX Bomber Command.

MARINES: In Marseille, France, marine detachments from the cruisers *Augusta* and *Philadelphia* come ashore to oversee the disarming and processing of German prisoners.

August 30

MILITARY: Along the French Riviera, the 1st Airborne Task Force under Major General Robert T. Frederick seizes the picturesque city of Nice as the main force of the Eleventh Army continues its drive up the Rhône River valley to Lyon. Lieutenant General Alexander M. Patch seeks to link up with American forces driving east from the Normandy beachhead.

August 31

MILITARY: Armored columns belonging to the Third Army under Lieutenant General George S. Patton surge across the Meuse River in pursuit of retreating German forces; the attack stalls, however, when Patton outruns his own lines of supply.

MARINES: In Washington, D.C. Commandant Major General Vandenberg orders that the Fleet Marine Force, Pacific (FMFPAC) will incorporate Headquarters Troops, III and V Amphibious Corps, FMF Supply Service and requisite supporting elements.

- The 4th Marine Division adopts a new table of organization, leading to the disbanding of the 20th Marines.

August 31–September 2

AVIATION: Carrier aircraft from Task Force 38.4 under Read Admiral Ralph E. Davison launches air strikes against Iwo Jima and Chi Chi Jima south of the Japanese mainland. A TBF Avenger flown by Lieutenant George H. W. Bush, the future 41st president of the United States, is shot down and rescued by the submarine *Finback*.

September 1

MILITARY: General Dwight D. Eisenhower transfers his headquarters to France. A talented coalition leader and, mindful of touchy British pride, he allows Field Marshal Bernard Montgomery to play a significant role in Operation Market Garden in the Netherlands.

September 1–5

MILITARY: In northern Italy, General Mark W. Clark orders the Fifth Army to advance against the Gothic Line from the Serchio River to Pisa, and four days later the walled city of Lucca is liberated.

September 2

MILITARY: Elements of the XIX and VII Corps begin pouring into Belgium in a drive toward Tournai. Meanwhile, the 3rd Armor Division approaches Mons, France, while the 9th Infantry Division hovers on the outskirts of Charleroi.

- In southern France, Major General Lucian K. Truscott receives his third star and is ordered back to Italy to command the Fifth Army following Lieutenant General Mark W. Clark's departure. Command of Truscott's VI Corps reverts to Major General Edward H. Brooks.

September 4

AVIATION: In the China-Burma-India (CBI) theater, Brigadier General William H. Tunner is appointed commander of Air Transport Command and orchestrates the conveyance of thousands of gallons of gasoline and bombs over the "Hump" (Himalayas).

MILITARY: At Hollandia, New Guinea, the Eighth Army is formed under Lieutenant General Robert L. Eichelberger to better administer distant units belonging to General Walter Krueger's Sixth Army. Meanwhile, command of I Corps reverts to Major General Innis P. Swift while the X Corps is directed by Major General Franklin A. Sibert.

September 5

MILITARY: In northern France, the Ninth Army becomes operational and is tasked with isolating the besieged cities of Brest, Lorient, and Saint-Nazaire to protect the Twelfth Army's flank along the Loire River.

- In Paris, France, the U.S. Army newspaper *Stars & Stripes* resumes publishing again after a 25-year hiatus—the last issue came at the very end of World War I.

September 6–8

AVIATION: Vice Admiral Marc A. Mitscher directs Task Force 38 during air strikes against the Palaus and western Caroline Islands. In the course of these operations the carrier *Independence* becomes the first American carrier specifically outfitted for nighttime operations.

September 7

MILITARY: North of Florence, Italy, the II Corps positions itself for an attack on the German Gothic Line, which is suddenly cancelled after enemy troops fall back.

MARINES: On Guadalcanal, the 1st Provisional Marine Brigade is disbanded and the 4th and 22nd Marines transfer to the 6th Marine Division.

**Eichelberger, Robert L. (1886–1961)***Army general*

Robert Lawrence Eichelberger was born in Urbana, Indiana, on March 9, 1886, and he attended Ohio State University for two years before transferring to the U.S. Military Academy. He graduated in 1909 as a second lieutenant of infantry and performed several tours of duty along the Mexican border. In 1918 he was dispatched with the American Expeditionary Force to Siberia to maintain order and suppress Bolshevik activity. Here Eichelberger encountered Japanese troops for the first time and was favorably impressed with their discipline and prowess. Eichelberger subsequently performed several tours in the Philippines and China before attending the Army Command and General Staff College in 1926 and the Army War College in 1930. After four years as adjutant of the academic board at West Point, he came to the attention of General Douglas A. MacArthur, then army chief of staff, who appointed him colonel of the 37th Infantry. His final prewar rank was that of brigadier general while acting as superintendent of the military academy. Following American entrance into World War II, Eichelberger quickly established himself as the army's leading authority on amphibious warfare, and he personally trained the 77th Division as its major general. In June 1942 he assumed command of the I Corps, then slated for the invasion of North Africa, but, as General MacArthur was preparing his long-awaited offensive in New Guinea, Eichelberger transferred to Australia as his lieutenant general.

A noted tactical troubleshooter, Eichelberger's first objective was the seizure of Buna, New Guinea, which lay in a jungle-infested region guarded by fanatical Japanese defenders. His problems were magnified by the inexperienced American forces deployed there, who lacked any exposure to jungle warfare. Eichelberger set about retraining his forces, improving supplies and logistics, and cooperating closely with the Australians. The I Corps made its final push in December 1942. Buna was seized the following January, which marked the first land victory over Japan by the Americans. Throughout the remainder of the year his troops made repeated landings along the northern coast of New Guinea and wiped out isolated enemy garrisons. In July 1944 MacArthur appointed him commander of the Eighth Army prior to the massive invasion of the Philippines. Another grueling fight ensued that ended with the liberation of Manila in January 1945. Eichelberger then turned his attention to the southern island of Mindanao, which he conquered after performing no less than 54 landings. His mission was finished by June 1945, and Eichelberger was slated to play a major role in Operation Coronet, the invasion of Japan, when the war ended in September. He spent several months disarming Japanese forces in the Philippines and retired from the army in December 1948. Eichelberger died in Asheville, North Carolina, on September 26, 1961, America's superlative combat commander of the Pacific War.

September 8

AVIATION: In a major technological breakthrough, with ominous applications for future warfare, the Germans launch their first V-2 rockets. Suburbs in Paris and London are struck, and heavy damage ensues. The Allies possess no comparable technology with which to defend themselves.

- In a change of pace, Ninth Air Force bombers drop leaflets—not bombs—over France and Belgium while scores of transports drop supplies and pick up wounded troops as a large aerial supply line to the front deploys in force.

September 9–10

AVIATION: Japanese-held ports and airfields on Mindanao, Philippines, are struck by carrier planes launched from Task Force 38, sinking 17 vessels.

- XX Bomber Command B-29s strike the Showa Steel Works at Anshan, China. In retaliation, Japanese bombers attack Chengtu airfields, damaging several aircraft.

September 10

AVIATION: At Hagerstown, Maryland, the prototype Fairchild XC-82 cargo plane, which employs twin booms, flies for the first time. After the war it enters service as the “Flying Boxcar.”

- The Eighth Air Force commits over 1,000 bombers against industrial targets in south central Germany.
- As forces of Operations Overlord and Anvil/Dragoon link up in central France, they are serviced by 800 transports belonging to the Ninth Air Force.
- In the China-Burma-India (CBI) theater, Air Transport Command missions begin averaging 300 flights per day to China bases and back.

September 10–12

MILITARY: In northern Italy, the 34th and 91st Infantry Divisions kick off their long-anticipated attack on the German Gothic Line. The British XIII Corps also contributes three divisions in support. Despite a good start, progress stalls as the Americans run headlong into stout enemy defenses. Fighting continues until April 1945.

September 10–16

AVIATION: Carrier aircraft launched from Admiral Marc A. Mitscher’s Task Force 38 begin bombing in the Palaus, the Visayas, and on Mindanao, Philippines, to soften them up for an impending invasion.

September 11

MILITARY: A patrol belonging to the 5th Armored Division, V Corps, briefly enters Germany between Trier and Aachen and advances five miles, but the main defenses will not be breached for several months.

September 11–16

DIPLOMACY: In Quebec, Canada, President Franklin D. Roosevelt, Prime Minister Winston Churchill, and the Combined Chiefs of Staff confer at the Second Quebec Conference; discussions center around the role of the Royal Navy in the war against Japan and the impending invasion of the Philippines. Admiral

Ernest J. King, an ardent Anglophobe, ardently opposes British participation in the Pacific war, but he is overruled by Roosevelt. A decision is also reached, at the behest of Admiral Chester W. Nimitz and General Douglas A. MacArthur, to move the invasion date of Leyte, Philippines, up from December 20 to October 20.

September 12

AVIATION: The Luftwaffe, though badly wounded, remains a deadly adversary as witnessed today when they hurl 400 fighters against a stream of 800 Eighth Air Force bombers, shooting down 45 aircraft along with 12 P-51s.

September 12–13

AVIATION: Task Force 58 begins launching carrier strikes against Japanese airfields and shipping around Visayas, Philippines, sinking 38 vessels. A day later the same aircraft attack Cebu, Negros, and Legaspi.

September 12–16

MILITARY: The V Corps dispatches the 5th Armored Division, and 4th and 28th Infantry Divisions toward Schnee Eifel, Germany, attacking along a 30-mile front. Resistance stiffens as the terrain is found to militate against the employment of armor and the drive sputters out.

September 12–October 27

MILITARY: In northern Italy, the Fifth Army incurs heavy losses as it begins attacking the Gothic Line around Bologna. The line will not be penetrated until the spring of 1945.

September 13

MILITARY: In the vicinity of Roetgen, western Germany, the 3rd Armored Division of Major General Maurice Rose advances into the heavily forested area called the Monschau corridor, backed by the 9th Infantry Division. A bloody and protracted struggle known as the Battle of Huertgen Forest begins to unfold over the next four weeks.

NAVAL: A strong Atlantic storm manages to sink the destroyer *Warrington* under Commander Frank Quarles.

- Off Anguar, Palau Islands, the minesweeper *Perry* strikes a mine and sinks.

September 14

AVIATION: “Hurricane Hunters” Colonel Floyd B. Wood, Major Harry Wexler, and Lieutenant Frank Reckord intentionally fly their Douglas A-20 Havoc into a hurricane to gather meteorological data.

September 15

MILITARY: In Washington, D.C., the Joint Chiefs of Staff, acting upon information provided by Admiral Chester A. Nimitz and General Douglas A. MacArthur, order the upcoming invasion of Mindanao, Philippines, canceled in favor of a landing at Leyte by mid-October.

- As marines of the III Amphibious Corps land at Peleliu, Palau Islands, the 81st Infantry Division under Major General P. J. Muller remains offshore in reserve.

NAVAL: Vice Admiral Theodore S. Wilkinson directs the Third Amphibious Force as it lands the 1st Marine Division, III Amphibious Corps, on Peleliu, Palau Islands.

Marines of the 1st Marine Division occupy fighting positions on Peleliu Island, September 15, 1944. (National Archives)

- Task Force 77 under Rear Admiral Daniel E. Barbey lands the 41st Infantry Division on Morotai, midway between New Guinea and the Philippines, with a view toward using it as a springboard for the invasion of Leyte.

MARINES: Operation Stalemate II unfolds as the 1st Marine Division under Major General W. H. Rupertus hits the beaches on Peleliu, Palau Islands, in the face of determined resistance by a 10,700-man Japanese garrison under Colonel Kunio Nakagawa. The fighting becomes particularly savage once the marines leave their beachhead and encounter a series of cave complexes along Umurbrogol Ridge.

September 16

MILITARY: At Myitkyina, Burma, the famed 5307th Composite Group, “Merrill’s Marauders,” is formally disbanded.

NAVAL: At Wasile Bay, Halmahera Island, East Indonesia, *PT-489* and *PT-363* under Lieutenant Arthur M. Preston endure almost three hours maneuvering through Japanese minefields and escaping shelling from shore batteries as they gingerly maneuver to rescue a downed pilot, Ensign Harold A. Thompson. Preston consequently receives a Medal of Honor.

- Southeast of Hong Kong, a Japanese convoy is attacked by the submarine *Barb*, which sinks the 20,000-ton escort carrier *Unyo* and the tanker *Azusa* with the same spread of torpedoes.
- Off Yokosuka, Japan, Japanese submarine *I-364* is sunk by the submarine *Sea Devil*.

MARINES: On Peleliu, stiff fighting continues as the 7th Marines isolate a southern promontory, the 5th Marines advance inland to seize the airfield, and the 1st Marines turn left to assail Japanese defenses situated along coral ridges.

September 17

MILITARY: On Anguar, Palaus Islands, the 81st Infantry Division splashes ashore and joins a very tough fight against dug-in defenders.

NAVAL: Rear Admiral William H. P. Blandy directs Task Group 32.2 as it lands army troops on Anguar, Palau Islands, for the purpose of constructing an airfield to support operations in the Philippines.

MARINES: On Peleliu, Palaus Islands, the 7th Marines continue attacking the southern promontory while the 1st Marines begin pushing north into rough terrain, ably defended.

September 17–27

AVIATION: Operation Market Garden commences as 1,500 Allied transports and 500 gliders haul the First Allied Airborne Army to the Netherlands and drops them near Arnhem to seize the Rhine River bridges. German defenders manage to down 16 B-24s and 21 fighters.

MILITARY: At the behest of Field Marshal Bernard Montgomery, the American 82nd and 101st Airborne Divisions, along with the famous British “Red Devil” parachutists, drop deep behind German lines during Operation Market Garden, Netherlands. The paratroopers fight valiantly but prove unable to surmount strong German defenses and all Allied forces near Arnhem are obliged to withdraw after sustaining heavy losses.

September 18

MARINES: On Peleliu, the southern promontory falls to the 7th Marines after severe fighting.

September 19

MARINES: On Peleliu, the 5th Marines hasten to complete their capture of the eastern flatlands while the 1st Marines carry the fight into the coral ridges. Japanese resistance is costly and fanatical.

September 20

AVIATION: At Farmingdale, New York, the Republic Aircraft Company rolls out its 10,000th P-47 Thunderbolt fighter-bomber. Another 5,000 machines are produced over the next 10 months.

- The 1st Marine Aviation Wing is tapped to provide seven dive-bomber squadrons to the upcoming Philippine campaign.

September 21

AVIATION: To relieve pressing fuel shortages experienced by ground units, the Eighth Air Force begins delivering gasoline to bases in France. Within a week, 200 of the spacious B-24 Liberators are acting as flying fuel pumps.

- Japanese shipping and airfields around Subic Bay and Manila, Philippines, are struck by carrier aircraft launched by Task Force 38 under Vice Admiral Marc A. Mitscher; a total of 28 vessels are claimed to have been sunk.

MILITARY: The 81st Infantry Division completes its conquest of Angaur off the southern coast of Peleliu, save for isolated strongpoints on the northwest corner that hold out until October 23.

MARINES: On Peleliu, the heavily depleted 1st Marines are replaced by the 7th Marines, who press inland against the coral ridges.

September 22

AVIATION: Task Force 38 under Vice Admiral Marc A. Mitscher launches carrier raids Japanese shipping off Cebu and San Fernando, Luzon, Philippines, sinking nine vessels.

September 23

AVIATION: The Thirteenth Air Force relocates its base of operations to Noemfoor Island, New Guinea.

MILITARY: The 321st Regimental Combat Team, 81st Infantry Division, transfers from Angaur to Peleliu, where it replaces the 1st Marines on the frontlines.

NAVAL: Ulithi, Caroline Islands, is occupied by army troops transported there by Rear Admiral William H. Blandy's Task Group 32.2, and it is intended to become a forward supply base for the Pacific Fleet.

- At Pearl Harbor, Hawaii, the battleship *West Virginia* is fully repaired from damage received on December 7, 1941, and returns to service.

September 24

AVIATION: Vice Admiral's Mac A. Mitscher's Task Force 58 launches carrier raids against Japanese shipping off the Visayan islands, Philippines, sinking 15 vessels.

- Over Kurabu Cape, Aleutians, B-24s of the Eleventh Air Force are attacked by Japanese fighters, whereupon one damaged Liberator lands in Soviet territory.

MILITARY: On Peleliu, the 321st Regimental Combat Team begins pressing along the west coast while the 7th Marines attack the coral ridges from the south and west.

September 25

NAVAL: Off Le Havre, France, the minelayer *Miantonomah* strikes a mine and sinks with the loss of 58 men.

MARINES: On Peleliu, the 5th Marines continue driving along the west coast as the Army's 321st Regimental Combat Team attacks stubborn Japanese defenses along the coral ridges.

September 27

AVIATION: Special Air Task Force 1 debuts over Bougainville, Solomon Islands, when a modified TBM Avenger launches radio-controlled TDR-1 drones toward a target, in this instance a beached freighter that had been converted into an anti-aircraft battery.

September 28

AVIATION: In China, the Fourteenth Air Force dispatches 100 camera-equipped fighters over targets in southeastern China and Indochina (Southeast Asia).

MARINES: Ngesebus Island, off the coast of Peleliu, faces an amphibious landing by the 3rd Battalion, 5th Marines.

September 29

AVIATION: In the South Atlantic, PB4Y-1 Privateers of VP-107 attack and sink German submarine *U-863*.

NAVAL: At a high-level strategy meeting in San Francisco, California, Admirals Chester W. Nimitz and Forrest P. Sherman convince Chief of Naval Operations admiral Ernest J. King of the impracticality of invading Formosa (Taiwan), principally because the army cannot muster sufficient troops to garrison that large island. The American high command now focuses its attention on Luzon, Iwo Jima, and Okinawa.

MARINES: On Peleliu, the 5th Marines silence the few remaining Japanese defenders on the northern end of the island. Meanwhile, the 7th Marines tackle the formidable Umurbrogol Pocket along the central ridges where the enemy is dug in and fights to the death.

September 30

NAVAL: West of the Cape Verde Islands, German submarine *U-1063* is detected and sunk by the destroyer escort *Fessenden*.

October 1

AVIATION: In Italy, the Fifteenth Air Force activates the 5th Photo Group, thereby finally reaching its full, wartime strength of 21 heavy bomber groups, seven fighter groups, and one reconnaissance group.

MILITARY: Off Peleliu, the 322nd Regimental Combat Team corners Japanese resistance on Angaur Island to a few isolated pockets, which are reduced by fire-power rather than infantry assaults.

NAVAL: In Washington, D.C., Vice Admiral Richard S. Edwards gains appointment as the first deputy commander in chief, U.S. Fleet and deputy chief of naval operations.

October 2

AVIATION: Beginning today and continuing over the next 30 days, the Eighth Air Force launches 1,000-bomber raids against German targets over two- to three-day intervals. Airfields, oil production facilities, and aircraft factories remain priority targets.

MARINES: The badly chewed-up 1st Marines are evacuated from Peleliu and shipped to Pavuvu to rest and refit.

October 3

MILITARY: In Washington, D.C., the Joint Chiefs of Staff cancel any impending moves against Formosa (Taiwan), authorize General Douglas A. MacArthur to invade Luzon, the Philippines, and direct Admiral Chester W. Nimitz to invade Iwo Jima and Okinawa.

NAVAL: Off Morotai, Netherlands East Indies, Japanese submarine *RO-41* torpedoes and sinks the destroyer escort *Shelton*. The destroyer escort *Richard M. Rowell* counterattacks immediately and accidentally sinks the American submarine *Seawolf*, which was operating in the area.

- Off Angaur, Palau Islands, the Japanese submarine *I-177* is detected and sunk by the destroyer escort *Samuel S. Miles*.

MARINES: On Peleliu, the 7th Marines reduce Japanese positions in the Umurbrogol Pocket by storming Walt's Ridge and Boyd Ridge.

October 4

MILITARY: The Ninth Army, having secured its objectives in France, redeploys in Luxembourg-Belgium between Bollendorf and St. Vith. Its arrival allows the

First and Third Armies to begin concentrating for offensive operations along a narrower front.

October 5

MILITARY: Major General Raymond S. McLain, a former bank executive, becomes the first National Guard officer to command a corps in combat when he assumes control of the Third Army's XIX Corps.

MARINES: On Peleliu, the 7th Marines are relieved by the 5th Marines as they struggle for the Umurbrogol Pocket.

October 5–9

MILITARY: The VII Corps, First Army, launches an attack on the city of Schmidt, which commands the region between the Roer River and the Schwammenauel Dam. Movement through the Huertgen Forest is hampered by poor weather and effective German defenses and, in the end, armored forces are dispatched to allow the 9th Infantry Division to extricate itself.

October 10

AVIATION: Okinawa, Japan, is the object of a major air strike by Admiral Marc A. Mitscher's Task Force 38, which claims to have sunk 30 vessels of varying tonnage. Similar raids are also staged against Formosa (Taiwan), the Pescadores, and Luzon, Philippines.

MARINES: On Peleliu, Old Baldy, a prominent position of the Umurbrogol Pocket, is captured by the 5th Marines.

October 11

MARINES: Major General Holland M. Smith is appointed commander of all operational marine forces within the Fleet Marine Force, Pacific and answers directly to the Commander in Chief/Chief of Naval Operations Ernest J. King.

October 12

AVIATION: Operation Pancake unfolds over Bologna, Italy, as the Twelfth Air Force unleashes 700 heavy bombers escorted by 160 fighters. Targets sought are ammunition and fuel dumps, repair facilities, and munition factories.

- On Saipan, Brigadier General Haywood Hansell personally lands the first XX Bomber Command B-29 bomber to reach that island. Elements of the 73rd Bomb Wing also arrive throughout the day.

MARINES: Offensive operations cease on Peleliu, but the struggle for control of the Umurbrogol continues; command of units on the island passes to Brigadier General Harold D. Campbell.

October 12–15

AVIATION: Carrier aircraft from Task Force 38 sweep over airfields and other Japanese installations on the island of Formosa (Taiwan), sinking 17 vessel of various sizes. However, Japanese aerial units mount a sharp counterattack that torpedoes several American warships, including the carrier *Franklin Hancock*. The light cruiser *Houston* is so severely damaged that it has to be towed to safety.

October 13

MARINES: Headquarters, V Amphibious Corps, relocates from the Marianas Islands to Hawaii, where planning for the Iwo Jima operation commences in earnest.

October 14

AVIATION: From Chengtu, China, the Twentieth Air Force launches 100 B-29s on a strike against an aircraft factory at Okayama, Formosa (Taiwan). The raid coincides with American actions on Leyte, Philippines.

October 15

AVIATION: In an important move, Aslito airfield, Saipan, has been repaired and enlarged for operations by B-29 Superfortresses. From here the Japanese homeland will be within striking distance.

MILITARY: On Peleliu, the 321st Regimental Combat Team relieves the 5th Marines along the Umurbrogol Pocket, now reduced by fighting to an area 400 yards by 500 yards.

October 17

AVIATION: Over Cologne, Germany, a roused Luftwaffe shoots down 52 bombers and 15 fighters, several by futuristic Me-262s; four of the jets are downed in turn.

MILITARY: Suluan and Dinagat islands in Leyte Gulf, Philippines, are stormed by the 6th Ranger Battalion. Marine Corps major general Ralph Mitchell accompanies the force as an observer. The defenders are wiped out but success here alerts the main garrison on Luzon that an attack is pending.

NAVAL: Contact is lost today with the submarine *Escolar*, most likely because it struck a mine.

- Admiral Soemu Toyoda, commander in chief of the Japanese Combined Fleet, is alerted of the American naval presence in Leyte Gulf, Philippines, and puts in motion Operation SHO-1 ("Victory") to oppose the Americans.

October 18–19

AVIATION: Carrier aircraft of Task Force 38 strike Japanese targets in and around Manila Bay, Philippines, sinking 12 vessels. Facilities on Cebu are likewise struck, accounting for another dozen ships.

October 19

MILITARY: In China, Lieutenant General Joseph Stilwell, who maintained contentious relations with Chinese generalissimo Chiang Kai-shek, is formally relieved and replaced by Major General Daniel Sultan.

NAVAL: The Seventh Fleet under Vice Admiral Thomas C. Kinkaid unleashes its battleships and cruisers as they bombard landing beaches on Luzon, Philippines.

October 19

MILITARY: At Aachen, Germany, the first capital of the Holy Roman Empire, the First Army's VII Corps encircles German defenders with the 1st and 28th Infantry Divisions while the 3rd Armored Division isolates the city by cutting off the Aachen-Laurensburg highway. Enemy resistance in the region is beginning to give way to superior Allied numbers and firepower.

October 20

MILITARY: The army lands on the east coast of Leyte, Philippines, at which point General Douglas A. MacArthur makes a radio broadcast to the Filipinos, "People of the Philippines, I have returned!" The initial assault is spearheaded by the 6th

Ranger Battalion, followed by units of the Sixth Army under General Walter P. Krueger. More than 132,000 troops of the X Corps (1st Cavalry Division, 24th Infantry Division) and XXIV Corps (7th and 96th Infantry Divisions) are conveyed ashore by 700 naval vessels.

- The 322nd Infantry eliminates the remaining pockets of resistance on Angaur. Meanwhile, the 81st Infantry Division relieves the III Amphibious Corps and the 1st Marine Division, which return to Guadalcanal and Pavuvu, respectively.

NAVAL: Admiral Thomas C. Kinkaid directs the Seventh Fleet as it lands four army divisions on Leyte, Philippines, assisted by battleships and carriers of the Third Fleet. Severe Japanese counterattacks damage the escort carrier *Sangamon* and light cruiser *Honolulu* while shore batteries sink a tank landing ship.

October 21

AVIATION: At Santa Barbara, California, Marine Carrier Groups are established to help establish the first marine squadrons for routine carrier operations.

MARINES: A battalion of 155mm howitzers goes ashore at Leyte, Philippines, in support of army troops.

- A small force of B-24s belonging to the Seventh Air Force fly from Guam for the first time and unload their bombs on Yap Island.

MILITARY: The VII Corps, First Army, storms into the ancient city of Aachen, Germany, the former capital of Charlemagne's Holy Roman Empire; Colonel Thomas Lancer, 1st Infantry Division, is appointed military governor.

October 23

NAVAL: The Battle of Leyte Gulf commences once the submarine *Darter* detects the Japanese First Striking Force steaming for Leyte, Philippines, under Vice Admiral Takeo Kurita. *Darter*, joined by the *Dace*, then torpedoes and sinks the heavy cruiser *Atago*, Kurita's flagship, and the heavy cruiser *Maya*. A third heavy cruiser, *Takao*, is heavily damaged and is forced to withdraw.

October 24

AVIATION: In Leyte Gulf, Philippines, carrier aircraft from Task Force 38 ravage Admiral Takeo Kurita's surface fleet as it slips through the Sibuyan Sea. The giant battleship *Musashi* is singled out and sinks after being hit by 19 torpedoes and 17 bombs; two additional battleships, two heavy cruisers, and three destroyers are severely damaged. Kurita is forced to turn his surviving vessels around.

- In the skies above Leyte Gulf, Commander David Campbell of the carrier *Essex*, accompanied only by his wingman, attacks a formation of 60 Japanese aircraft. The pair knock down 15 aircraft, breaking up their attack; Campbell claims nine, winning a Medal of Honor, and reigns as the navy's top ace with 34 kills.

- Japanese land-based aircraft strike back, sinking the light carrier *Princeton*, which explodes with such force that it damages several nearby escorting vessels, killing 229 men and wounding 426. *Princeton* is subsequently scuttled, becoming the only *Essex*-class carrier lost in World War II.

- The first use of suicide aircraft (kamikaze) by the Japanese off Leyte is recorded when several slam into the freighters *Augustus Thomas* and *David Dudley Field*.

- Once Task Force 38 recovers and refuels its aircraft, they are sent winging toward another Japanese force approaching through the Sulu Sea under Vice Admiral Shoji Nishimura; two battleships are damaged and a destroyer is sunk. **NAVAL:** The submarine *Darter* is lost when it runs aground on Bombay Shoal, Palawan Passage, Philippines, and is scuttled; its crew is rescued by the submarine *Dace* to prevent capture.
- East of Surigao Strait, Philippines, Japanese submarine *I-54* is sunk by the destroyer escort *Richard M. Rowell*.
- In the Formosa Strait, the submarine *Tang* under Commander Richard O'Kane attacks a Japanese convoy and sinks two freighters before being sunk by a malfunctioning torpedoes that circles back and strikes the submarine. Only nine crewmen survive, including O'Kane, who wins the Medal of Honor.

October 25

NAVAL: The Battle of Surigao Strait, Philippines, unfolds as Task Group 77.2 under Rear Admiral Jesse B. Oldendorf, assisted by Task Group 77.3 and 29 motor torpedo boats, tackles Vice Admiral Shoji Nishimura's surface fleet. The initial volley of torpedoes sinks the battleship *Fuso* and three other warships while damaging the battleship *Yamashiro* and three other vessels. American battleships, including several Pearl Harbor survivors, then move into range and sink all the remaining Japanese warships, save for a single destroyer.

- In a controversial move, Admiral William F. Halsey moves the bulk of his fleet north to intercept a Japanese surface force under Vice Admiral Jisaburo Ozawa, with which he sinks four carriers. However, Halsey's dash leaves the northern approach to Leyte guarded by escort carriers and destroyers. Meanwhile, Admiral Takeo Kurita's Center Force reverses course and heads toward the San Bernadino Straits. A handful of destroyers and escort carriers belonging to Task Forces 2 and 3 under Rear Admiral Clifton F. Sprague are all that stand between Kurita and the American landing zones. In a stiff, standup engagement, these ships sacrifice themselves in a desperate attempt to turn the Japanese back. The escort carrier *Gambier Bay* and three destroyers (*Hoel*, *Johnston*, and *Samuel B. Roberts*) are lost before aircraft from Task Force 38 arrive to pummel the Japanese fleet, heavily damaging several battleships and sinking heavy cruisers *Chikuma*, *Chokai*, and *Suzuya*. Staggered by his own losses, Kurita reverses course once again and steams back out of the San Bernadino Straits. Commander Ernest E. Evans, who launched the destroyer *Johnston* on a suicidal charge to delay the oncoming Japanese, goes down with his ship, posthumously winning a Medal of Honor.

MARINES: On Tinian, the 8th Marines ship out for Saipan but the 1st Battalion remains behind to complete mopping up operations.

October 26

AVIATION: Carrier aircraft launched from Admiral William F. Halsey's Third Fleet attack fleeing remnants of the Japanese fleet near Leyte Gulf, Philippines, sinking an additional five vessels for a total loss of four carriers, three battleships, eight cruisers, nine destroyers, and a submarine. For all intents and purposes, Japanese sea power ceases to exist.

- Additional surface and air actions initiated by the Americans sink the Japanese destroyers *Hayashimo* and *Nowaki* in Leyte Gulf, Philippines.

- Japanese kamikaze pilots score one of their earliest successes by striking and sinking the escort carrier *St. Lo* in Leyte Gulf, the Philippines.
- Rear Admiral Thomas L. Sprague's Taffy 2 force launches air strikes in the Visayan Sea that sink the light cruiser *Kinu* and the destroyer *Uranami*.
- Fourteenth Air Force B-24s and B-25s strike at Japanese shipping and rail yards off the Luichow Peninsula and Hsuechang. During the raid, the Liberator flown by Major Horace S. Carswell is crippled by antiaircraft fire, yet he refuses to abandon his burning craft until his crew has bailed out. He dies once the bomber crashes into a mountainside, winning a posthumous Medal of Honor.

October 27

AVIATION: At Tacloban, Philippines, P-38 Lightnings are the first American fighters to operate from the islands since 1942. Major Richard Bong, the highest-scoring American ace of World War II, is among them and chalks up several aerial kills.

- A carrier strike off Negros Island, Philippines, sinks the Japanese light cruiser *Abukuma*.

October 28

AVIATION: A small force of B-29s belonging to XXI Bomber Command flies its first mission from the Marianas when it strikes submarine pens on Dublin Island; the aircraft flown by Brigadier General Haywood Hansell aborts due to mechanical difficulties.

NAVAL: Off the Philippines, TBF Avengers launched from the escort carrier *Belleau Wood* assist the destroyers *Helm* and *Gridely* in sinking Japanese submarine *I-46*.

- Off Leyte, Philippines, the destroyer escort *Eversole* is torpedoed and sunk by Japanese submarine *I-45*, which is sunk in turn by the destroyer escort *Whitehurst*.

October 29–30

AVIATION: Japanese land-based kamikaze aircraft attack Task Force 38 savagely, damaging the carriers *Intrepid*, *Franklin*, and *Belleau Wood*.

October 30

MARINES: On Peleliu, final elements of the 5th and 7th Marines embark for Pavuvu. Total casualties are 1,336 dead and 5,450 wounded.

October 31

MILITARY: At Camp Landis, 12 miles north of Myitkyina, Burma, Mars Task Force assembles under Brigadier General John P. Willey. They are preparing to push northward to the Burma Road.

November 1

AVIATION: The new Jet Propulsion Laboratory (JPL) is created at the California Institute of Technology, Pasadena, which serves as the locus of American rocket research.

- Off Leyte, Philippines, the destroyer *Abner Read* is struck by kamikaze aircraft and sunk, while conventional bombs damage five other destroyers.

- An F-13 (reconnaissance B-29) becomes the first American warplane to fly over Tokyo, Japan, since the Doolittle raid of April 18, 1942.

November 1–3

MILITARY: Around Schmidt, Germany, the V Corps launches a second all-out attack to capture that important objective. A regiment belonging to the 28th Infantry Division manages to cross the Kall River and take the city, which is located on the main German supply route through the Lammersdorf corridor.

November 2

AVIATION: A huge air battle erupts over the synthetic fuel plant at Merseberg/Leuna, Germany, as 1,100 heavy bombers of the Eighth Air Force fight their way through determined German resistance; 40 bombers and 28 fighters are lost, although 150 German aircraft are also claimed. Navigator lieutenant Robert E. Femoyer, although severely wounded by flak, refuses a morphine injection so that he could complete his bomb run and dies from loss of blood; he receives a posthumous Medal of Honor.

MILITARY: After tenacious fighting by Japanese defenders, the Sixth Army under General Walter Krueger has occupied several landing areas on Leyte, Philippines, and braces itself for a counterattack.

November 3

AVIATION: The Japanese begin launching thousands of Fu-go balloon bombs, which rise into the jet stream for a speedy transit to the United States. Several hundred reach their target and explode, in one instance killing several school children on a picnic.

MILITARY: Along the Serchio River, Italy, the predominately African-American 92nd Infantry Division under Major General Edward M. Almond undertakes its first combat operations.

November 4

AVIATION: In Italy, the Twelfth Air Force commits 300 medium bombers to interdict German lines of communication in the Brenner Pass and along the Po Valley. Four P-47s also strafe a hotel in Milan where Hitler is supposed to be lodged.

- At Santa Barbara, California, Marine Corps carrier air groups (MCVG) are designated to operate from escort carriers, and each consists of one fighter squadron and one torpedo bomber.

November 5

AVIATION: The Fifteenth Air Force launches 500 B-17s and B-24s, escorted by 350 fighters, against the Florisdorf oil refinery in Vienna, Austria. This turns out to be the Fifteenth's largest single operation directed against a single target.

- A force of 24 B-29s from the Twentieth Air Force lifts off from the Marianas to strike Japanese targets on Iwo Jima, Bonin Islands. Another 53 Superfortresses depart Calcutta, India, and strike the King George VI Graving Dock in Singapore, severely damaging it.

November 5–6

AVIATION: Aircraft from Task Group 38.1 under Vice Admiral John S. McCain launches air strikes against Japanese airfields on Luzon, Philippines, sinking four ships, including the heavy cruiser *Nachi*.

November 6–December 24

AVIATION: The Seventh Air Force dispatches its B-24s on mining operations throughout the Bonin Islands to prepare that region for an amphibious invasion in the spring.

November 7

AVIATION: Ever forward thinking, General Henry H. Arnold asks Professor Theodor von Kármán to investigate future trends in aviation technology and their implication for national defense. His report is ultimately issued as *Towards New Horizons*.

- Marine Air Groups 24 and 32 are placed under operational control of the Fifth Air Force for the anticipated Philippines campaign.

NAVAL: Off Hokkaido, Japan, the submarine *Albacore* strikes a mine and sinks with all hands.

November 8

AVIATION: The XXI Bomber Command dispatches 17 B-29s on a strike against Iwo Jima; one Superfortress is lost after it is damaged by phosphorous bombs dropped by Japanese aircraft into its formation.

NAVAL: Off Mindoro, Philippines, the submarine *Growler* is attacked by Japanese surface vessels and sunk.

November 9

AVIATION: The Eighth Air Force commits 1,100 heavy bombers in support of Third Army maneuvers near Metz and Thionville, France, and Saarbrücken, Germany; German resistance is fierce and 40 aircraft are lost. A B-17 flown by Lieutenant Donald J. Gort is severely damaged by flak over Saarbrücken, yet he refuses to bail out to save several wounded crewmen by crash landing in friendly territory; the plane explodes on contact, killing all onboard; Gort receives a posthumous Medal of Honor. Another B-17 with co-pilot Lieutenant William E. Metzger is crippled over Saarbrücken; he attempts to crash land to save his gravely injured pilot and radio operator, but all die upon impact; Metzger is awarded a Medal of Honor.

MILITARY: The Third Army under Lieutenant General George S. Patton commences an all-out drive to cross the Moselle River, France, and capture the strategic city of Metz.

November 10

AVIATION: The Fifth Air Force unleashes 26 B-25 medium bombs upon Japanese shipping in Ormoc Bay, Philippines; three vessels are sunk.

NAVAL: In the Java Sea, the submarine *Flounder*, armed with classified naval intelligence, intercepts and sinks German submarine *U-537*.

- At Manus, Admiralty Islands, the ammunition vessel *Mount Hood* is lost when 3,000 tons of explosives accidentally ignite. The ensuing explosion also damages 36 nearby vessels.

November 11

AVIATION: A Japanese convoy entering Ormoc Bay, Philippines, is attacked and roughly handled by carrier planes launched by Task Force 58. The destroyers *Hamanami*, *Naganami*, *Shimakaze*, and *Wakatsuki* are sunk.

November 12

AVIATION: To maximize performance, new regulations establish the combat tour of fighter pilots at 270 flight hours.

NAVAL: South of Yap, Caroline Islands, Japanese submarine *I-37* is detected and sunk by the destroyer *Nicholas*.

November 13

AVIATION: An air strike by aircraft carriers belonging to the Third Fleet against Japanese shipping in Manila Bay, Philippines, sinks the light cruisers *Kiso* and destroyers *Akebono*, *Akishimo*, *Hatsuharu*, and *Okinami*.

NAVAL: In mid-Pacific waters between Hawaii and California, Japanese submarine *I-12* is attacked and sunk by the frigate *Rockford* and the minesweeper *Ardent*.

November 13–14

AVIATION: Aircraft launched from Task Force 38 strike at Japanese shipping in Manila Bay, Philippines, sinking 25 vessels.

November 15

AVIATION: The large Boeing XC-97 cargo plane, developed from the B-29 Superfortress, makes its maiden flight. It enters production in the postwar period as the Stratofreighter.

- The Army Ordnance department initiates Project Hermes to begin developing an American ballistic missile in concert with the General Electric Company. German V-2 rockets will also be closely examined when captured.

MILITARY: Having consolidated recent gains on New Guinea, New Britain, and the Admiralties, the Eighth Army begins expanding operations by landing the 31st (Dixie) Infantry Division on Mapia and Asia Islands.

November 16

AVIATION: As the First and Ninth Armies commence a new offensive in eastern France, 4,000 bombers and fighters drop 10,000 tons of bombs in support.

MILITARY: The VII Corps, First Army, reaches Schevenhuetten, marking the farthest penetration of Germany by an American combat unit to date. From here the 104th and 4th Infantry Divisions are ordered to seize Cologne and the Roer River.

November 17

NAVAL: The destroyer escort Lawrence C. Taylor, assisted by TBM Avengers from the escort carrier *Anzio*, detects and sinks Japanese submarine *I-41* in the Philippine Sea.

- In the Yellow Sea, the submarine *Spadefish* torpedoes and sinks the 21,000-ton Japanese escort carrier *Shinyo*.

November 17–18

NAVAL: In the East China Sea, a Japanese convoy is set upon by American submarines, losing five vessels.

November 19

NAVAL: West of the Palau Islands, Japanese submarine *I-37* is sunk by destroyer escorts *Conklin* and *McCoy*.

November 21

AVIATION: The Eighth Air Force launches another 1,000-plane raid at oil refineries in Merseberg/Leuna, Germany, losing 35 aircraft. Four days later 900 bombers return in poor weather, guided by Pathfinders, and hit the same targets; many aircraft become lost in the overcast and make emergency landings in France.

NAVAL: Off Formosa (Taiwan), the Japanese battleship *Kongo* and destroyer *Urakaze* are torpedoed and sunk by the submarine *Sealion*. *Kongo* is the first battleship ever claimed by an American submersible.

November 21–27

MILITARY: The V Corps makes another concerted effort to clear the Huertgen Forest of Germans. Braving mud, rain, and fog, the 5th Armored Division and 8th Infantry Division surge ahead against fierce resistance, making modest gains. Huertgen village itself finally falls to the 121st Infantry Regimental Combat Team (RCT).

November 22

MILITARY: The strategic city of Metz, France, fall to the Third Army under Lieutenant General George S. Patton. American casualties total 29,000 although 37,000 Germans are taken captive.

- As fighting on Leyte, Philippines, move farther inland, the 32nd Infantry Division encounters stout resistance, while the 11th Airborne Division also has a rough going. Japanese counterattacks force work crews away from building airfields to manning the trenches.

November 24

MILITARY: A force of 88 B-29 heavy bombers under General Haywood S. Hansell of XXI Bomber Command, operating from Guam, Saipan, and Tinian, strike aircraft factories in Tokyo, Japan, for the first time since April 18, 1942. One B-29 is lost after it is rammed by a fighter and another ditches after running out of fuel.

November 25

AVIATION: During a big aerial exchange, aircraft launched from Task Force 38 strike at Japanese shipping at Luzon, Philippines, sinking eight vessels, including the heavy cruisers *Kumano* and *Yasojima*. Meanwhile, land-based kamikaze aircraft hit back, damaging the carriers *Essex*, *Intrepid*, and *Hancock*.

November 27

MILITARY: On Peleliu, the 81st Infantry Division declares the island secure; American losses are 1,460 dead and 7,711 wounded. Virtually the entire 10,000-man Japanese garrison has been wiped out.

November 27–29

AVIATION: Continuing attacks by Japanese kamikaze aircraft damage another six vessels belonging to Task Force 38.

November 28

NAVAL: In Leyte, Gulf, Philippines, Japanese submarine *I-46* is detected and sunk by destroyers *Saufley*, *Waller*, *Renshaw*, and *Pringle*.

November 29

NAVAL: In Tokyo Bay, the huge, 64,000-ton carrier *Shinano*, originally designed as a battleship, is torpedoed and sunk by the submarine *Archerfish*. This is the biggest single sinking, in terms of tonnage, of the entire war.

November 29–December 5

MILITARY: The Combat Command Reserve, 5th Armored Division, pitches into the struggle for Huertgen Forrest to assist the 121st Infantry and 1st Battalion, 13th Infantry, whose combined losses total 1,200. The 8th Infantry and 2nd Ranger Battalion are also ordered into the fight, and the units gradually grind their way to the banks of the Roer River in the face of strong German counterattacks.

November 30

AVIATION: Synthetic oil plants in Bohlen, Zeitz, Meresburg/Leuna, and Lutzkendorf, Germany, are struck by 1,200 heavy bombers from the Eighth Air Force, escorted by no less than 19 fighter groups. German flak and fighters are relentless and 41 bombers are lost.

- The 1st Marine Air Wing contributes four F4U Corsair squadrons to the Fifth Air Force for use during the upcoming Philippine campaign.

December 1–16

AVIATION: At Camp Irwin, California, technicians from the Jet Propulsion Laboratory (JPL) fire two dozen Private A rockets developed over the past 11 months by Project ORDCIT.

December 2

MARINES: In Hawaii, the first Women's Reservists allowed to operate outside the United States report for duty.

December 2–3

NAVAL: In Ormoc Bay, Leyte, Philippines, Destroyer Division 120 slips inside for a night action against Japanese forces; the American *Cooper* sinks with a loss of 191 lives as does the Japanese destroyer *Kuwa*.

December 3

AVIATION: On Tacloban, Leyte, night fighters of VFM (N)-541 arrive to help thwart Japanese nocturnal bombers; army fighters already present are too slow to intercept them.

- In light of the increased threat of Japanese kamikaze attacks, marine fighter squadron are allowed on carriers to bolster their defenses.

December 4

MILITARY: In France, the nominally hard-charging Third Army under Lieutenant General George S. Patton successfully pushes across the Saar River, then stalls before heavily fortified sections of the Siegfried Line.

December 5

AVIATION: A force of 500 heavy bombers belonging to the Eighth Air Force struggles with 300 German fighters over Berlin and Münster; dozens of aircraft are lost on both sides.

December 5–21

MILITARY: The 77th Infantry Division makes an unopposed descent at Deposito, Leyte, and commences the drive on Ormoc, which falls on the 10th. Meanwhile, the 38th Infantry Division and 11th Airborne Division claw their way toward Buri airfield; when elements of the X and XXIV Corps link up, the Americans are in full control of the Ormoc Valley.

December 6

MILITARY: The costly Huertgen Forrest campaign finally concludes after the 82nd Infantry Division relieves the badly shot up 4th Infantry Division. The four-month struggle involved the five infantry divisions, one armored division, each which suffered an average loss of 5,000 men apiece.

December 6–7

NAVAL: In Philippine waters, a Japanese convoy is ravaged by American submarines, which sink four ships and force another to be grounded.

December 7

NAVAL: While landing the 77th Infantry Division at Ormoc Bay, Leyte, Philippines, Task Force 78.3 under Rear Admiral Arthur D. Struble is attacked by kamikazes; destroyers *Lamson* and *Mahan* are so heavily damaged in this raid that they are scuttled.

December 7–12

AVIATION: Fighters and bombers belonging to Marine Air Group 12 attack Japanese troop convoys attempting to reinforce Leyte, Philippines, sinking 10 vessels.

December 8

AVIATION: Lieutenant General George Kenny, Far East Air Force, recommends Major Ira I. Bong for the Medal of Honor after he shoots down eight Japanese aircraft on a series of sweeps over Balikpapan, Borneo.

- In light of ongoing Japanese aerial raids against the Marianas Islands, which destroy 11 B-29s and damage 43, the Twentieth Air Force launches 60 of the giant bombers against airfields on Iwo Jima to stop them.

December 11

AVIATION: F4U Corsairs of Marine Air Group 12 shoot down 19 Japanese aircraft attacking American warships in the Philippines.

NAVAL: The destroyer *Reid* is struck by kamikazes while resupplying at Ormoc Bay, Leyte, Philippines, and sunk.

December 12

AVIATION: Fighters of VMF (N)-541 break a major Japanese night attack in the Philippines, shooting down 11 enemy aircraft.

December 13

AVIATION: The Twentieth Air Force launches another large B-29 raid against the Mitsubishi aircraft engine factory in Nagoya, Japan, inflicting considerable damage.

MARINES: Off Mindoro, Philippines, the cruiser *Nashville* is struck by a kamikaze, killing 28 men of the marine detachment.

December 14

AVIATION: To facilitate the upcoming invasion, Japanese airfields and installations on Luzon and the Masbate islands are struck by fighters and bombers of Marine Air Group 12.

MILITARY: At Palawan, Philippines, Japanese troops guarding the Puerto Princesa Prison round up 150 American prisoners from Bataan and Corregidor, herd them into covered trenches, douse them with gasoline, and then set them afire. Eleven survivors related the facts of one of the most horrific atrocities by Japanese soldiers in the war.

December 14–21

MILITARY: Congress bestows on George C. Marshall, Douglas MacArthur, Dwight D. Eisenhower, and Henry H. Arnold the newly created rank of general of the army (or five star).

December 15

AVIATION: The Noorduyn C-64 Norseman carrying Major Glenn Miller, director of the Army Air Forces Band, disappears on a flight over the Bay of Biscay.

- Fighters belonging to Marine Air Group 12 and VMF (N)-541 execute combat air patrols over Mindoro during landings by the Sixth Army.
- The 24th and 77th Infantry Divisions begin landing on Mindoro Island, Philippines; no resistance is encountered.

NAVAL: In Washington, D.C., the new five-star rank is conferred upon Admirals William D. Leahy, chairman of the Joint Chiefs of Staff, Admiral Ernest J. King, chief of naval operations, and Chester W. Nimitz, commander in chief, Pacific Fleet.

- As Task Force 78.3 under Rear Admiral Arthur D. Struble lands army troops at Mindoro, Philippines, they are set upon by Japanese kamikaze aircraft, which cripple the escort carrier *Marcus Island*, sink two tank landing craft, and also damage two destroyers.

December 16

MILITARY: German forces under General Gerd von Rundstedt unleash a surprise attack on American forces in the Ardennes region of Belgium, the so-called Battle of the Bulge. Their momentum proves unstoppable at first and the 28th Infantry Division and 14th Cavalry Group are badly battered, while the green 106th Division is completely overrun. Stiffer resistance is offered by the veteran 4th Infantry Division and 9th Armored Division, which are also pushed back, but in good order. German progress, however, slows as American defenses solidify in the increasingly rougher terrain.

NAVAL: Tragedy ensues in Subic Bay, Philippines, when carrier aircraft launched from Task Force 38 attack and sink the Japanese freighter *Oryoku Maru*, unaware that 1,600 Americans prisoners are in its holds.

December 17

AVIATION: At Wendover Field, Utah, the 509th Composite Group forms under Colonel Paul W. Tibbets, Jr.; this is a highly classified unit responsible for dropping the atomic bomb once it is developed.

- Poor weather grounds most American bombers, but more than 1,000 fighters belonging to the Ninth Air Force sortie to provide close air support to hard-pressed army units in the Ardennes, Belgium. All aircraft are then grounded the following day and remain inoperative until the 23rd.
- Major Ira I. Bong shoots down his 40th Japanese airplane over Mindoro, Philippines, making him America's top-scoring ace of World War II. Lieutenant General George Kenny immediately grounds him and arranges his transfer back to the United States.

December 18

AVIATION: The docks of Hankow, China, are the object of the first firebombing raid conducted by XX Bomber Command B-29s, assisted by 200 aircraft belonging to the Fourteenth Air Force.

NAVAL: East of the Philippines, the Third Fleet under Admiral William F. Halsey is badly battered by a typhoon that he elected to sail through and not around. The destroyers *Hull*, *Monaghan*, and *Spence* capsize and sink with a loss of 765 men while 21 other vessels are also damaged.

December 18–19

MILITARY: As German panzer columns knife through the Ardennes, the 101st Airborne Division under Brigadier General Anthony McAuliffe, backed by elements of the 9th and 10th Armored Divisions, establishes a defensive perimeter at the crucial road junction of Bastogne. All attempts to rescue the 28th and 106th Divisions are abandoned in the face of the German onslaught, however.

December 19

NAVAL: Southeast of Shanghai, China, the Japanese carrier *Unryu* is sunk by the submarine *Redfish*, but the ensuing depth-charge attack by its escorts damages the sub, forcing it to return home.

December 20

MILITARY: As German forces continue pouring through the Ardennes region, their progress is slowed by U.S. Army engineers who destroy bridges, fell trees, and create scores of roadblocks.

- At Metz, France, Lieutenant General George S. Patton begins marshaling his Third Army for a rapid strike northward against the German southern flank. He has at his disposal the 4th Armored Division and the 26th and 80th Infantry Divisions. He skillfully realigns them by turning 90 degrees.

December 21

AVIATION: In Washington, D.C., General Henry H. Arnold is elevated to five-star general of the army; he is the first and only aviator so decorated.

NAVAL: The submarine *Scamp* is declared overdue and presumed missing in action as of November 11; its last known position was south of Tokyo Bay.

December 22

MILITARY: The strategic road junction of Bastogne is completely encircled by German armored and infantry units but is bravely defended by Brigadier General Anthony McAuliffe and his 101st Airborne Division. When pressed to surrender, he responds to a German deputation by telling them "Nuts!"

December 23

AVIATION: Bad weather lifts sufficiently over the Ardennes region of Belgium, allowing waves of Ninth Air Force bombers and fighter bombers to strike German tank and infantry formations in the closing phases of the Battle of the Bulge; the Americans lose 31 bombers but claim to have shot down scores of German aircraft.

December 24

AVIATION: The Eighth Air Force launches 2,000 heavy bombers, escorted by no less than 13 fighter groups, at select targets across Europe. The Germans can muster only 200 fighters and lose approximately 50 in swirling aerial actions. A B-17 piloted by Brigadier General Frederick W. Castle is crippled by German fighters but he flies on, allowing his crew to bail out, and he receives a Medal of Honor.

- Fighter bombers and medium bombers of the Ninth Air Force brave poor weather to fly thousands of sorties in support of the Army's III, VIII, and XII Corps along the southern fringes of the Ardennes. They continue until the 4th Armored Division breaks the siege of Bastogne.

NAVAL: Off Cherbourg, France, the Belgian troopship SS *Leopoldville* is torpedoed and sunk by German submarine *U-486*. Men of the 262nd and 264th Infantry Regiments are forced into the freezing water, where 500 of them drown.

December 25

MILITARY: On Leyte-Samar Island, Philippines, the Eighth Army relieves the battle-worn Sixth Army as the latter prepares for a final show down with Japanese forces on Luzon. However, the mopping up of holdouts and stragglers continues over the next six months.

December 26

AVIATION: A P-38 fighter sweep over Mabalacat Aerodrome, Luzon, Philippines, encounters numerous Japanese fighters. Major Thomas B. McGuire, the army's second-highest scoring ace, shoots down four fighters while defending a crippled bomber, raising his tally to 38—second only to Major Ira I. Bong.

MILITARY: The 37th Tank Battalion under Colonel Creighton Abrams relieves the siege of Bastogne by breaking through from the south. Lieutenant General George S. Patton's Third Army is not far behind them and the Americans prepare to counterattack across the line in Belgium.

- In light of the tremendous attrition sustained by infantry units in the Ardennes, they are advised to accept reinforcements without regard to color or race. African-American soldiers, usually reserved for rear area or supply duties, can now volunteer for service in the frontlines.

NAVAL: As American troops are landed at Mindoro, Philippines, they are set upon by a Japanese surface force under Rear Admiral Masanori. His heavy cruiser, light cruiser, and destroyers manage to bombard the beachhead despite heavy attacks from American warplanes, losing one destroyer in the process.

- The submarine *Swordfish* is lost at sea with all hands during its 13th war patrol.

December 28

AVIATION: At Ulithi Atoll, VMF-124 and 213 deploy on the *Essex*, becoming the first marine aircraft to operate from carriers in World War II.

MILITARY: In the Saar region of Germany, Army Group G launches a mini counteroffensive against Lieutenant General Alexander M. Patch's Seventh Army, which is forced to yield some territory along the Rhine River.

December 28–30

AVIATION: A determined Japanese kamikaze attack upon American shipping at Mindoro, Philippines, sinks three freighters and damages the destroyers *Pringle* and *Gansevoort*. The *LST-750* is so heavily damaged that it must be scuttled.

December 29

MILITARY: The onset of bitterly cold winter weather forces the Fifth Army to postpone its planned offensive against the Gustav Line north of Bologna.

December 30

MILITARY: Army forces begin pressing forward through the Ardennes region of Belgium, effectively erasing the “bulge” in the lines caused by the recent German offensive there.

December 31

AVIATION: In a sign that the air war is moving ever closer to the Japanese mainland, Brigadier General Haywood Hansell relocates his XXI Bomber Command headquarters from Saipan to Guam.

MILITARY: Private Eddie Slovik, a member of the 28th Infantry Division, becomes the only American soldier executed for desertion in World War II and the first to face a firing squad since the Civil War.

- On Leyte, Philippines, the 77th Infantry Division weathers serious Japanese counterattacks as it begins relieving the 1st Cavalry Division on the frontlines.

1945**January 1**

AVIATION: The Luftwaffe launches Operation Bodenplatte, a surprise attack on Allied forward air bases in Belgium, the Netherlands, and France. They manage to destroy around 120 aircraft on the ground by lose 460 to Allied fighters—and to German antiaircraft guns, which assumed they were enemy formations.

MILITARY: The 66th Infantry Division, still reeling from the loss of the troop transport *Leopoldville*, lands at Saint-Nazaire, France, and replaces the 94th Infantry Division; the latter is quickly shunted off to the Saar-Moselle Triangle near the German border.

NAVAL: At this date in the war, U.S. Navy personnel amounts to 3.4 million.

January 2

AVIATION: In China, troop carriers attached to the Tenth Air Force fly 546 sorties to resupply troops on the frontline; amazingly, this becomes the daily operational average for the rest of the year.

- In the Philippines, Far East Air Force P-38s and A-20s strike Japanese targets around San Fernando Harbor while B-24s pound Clark Field and B-25s blast enemy airfields near Batangas.

January 3

AVIATION: Aircraft launched from Task Force 38 under Rear Admiral John McCain strike Japanese shipping off Formosa (Taiwan), sinking 10 vessels. This is the beginning of a protracted carrier raid throughout the western Pacific and South China Sea.

- Marine fighters operating from the carrier *Essex* fly their first mission off Okinawa and claim a Japanese aircraft shot down.

MILITARY: In an attempt to eliminate the recent German salient in the Ardennes, the American First and Third Armies are ordered to meet at Houffalize prior to sweeping into enemy-held territory.

January 3–8

NAVAL: Kamikazes attack Task Group 77.2 under Vice Admiral Jesse B. Oldendorf in the Lingayen Gulf, Philippines, striking the escort carrier *Ommaney Bay* so hard that it is scuttled. Battleships *California* and *New Mexico*, heavy cruiser *Louisville*, and light cruiser *Columbia* also sustain damage. Commander George F. Davis of the destroyer *Walke* is severely burned after receiving five kamikaze strikes, but he refuses to abandon his post and wins a posthumous Medal of Honor.

January 4–8

MILITARY: In Burma, the Mars Task Force departs Myitkyina on a two-day excursion across the Shweli River to their assembly area at Mong Wi.

January 5

AVIATION: Operation Grubworm, the complete aerial transfer of two Chinese infantry divisions, their headquarters, and attached units, concludes today. It took 1,300 transport sorties to relocate the force from Burma to the frontlines in China, but it was accomplished with the loss of only three aircraft.

NAVAL: In the Bonin Islands, Cruiser Division 5 under Rear Admiral Allan E. Smith bombards Japanese shore installations on Iwo Jima, Haha Jima, and Chichi Jima.

- A cruiser force directed by Rear Admiral J. L. McRea bombards Japanese installations on Paramushiro, Kurile Islands.

January 6–9

AVIATION: Marine Air Group 12 launches repeated air attacks to destroy a key bridge on Luzon, Philippines.

NAVAL: The first installment of WAVES are deployed in Hawaii, the only post outside the continental United States where women are permanently stationed.

January 7

AVIATION: The Far East Air Force, in concert with the Third Fleet, contributes 130 light and medium bombers to attack Japanese airfields in northern Luzon, Philippines. This proves to be one of the largest joint missions in the Southwest Pacific campaign.

NAVAL: Task Group 77.2 under Vice Admiral Jesse B. Oldendorf bombards Japanese shore installations along the Lingayen Gulf prior to landing troops ashore.

January 8

AVIATION: Task Force 77 under Admiral Thomas C. Kinkaid, which follows fast on the heels of Admiral Oldendorf into the Lingayen Gulf, is likewise struck by kamikazes, which hit and damage the escort carriers *Kadashan Bay* and *Kitkun Bay*. The damage incurred by the fleet induces Task Force 38 carriers to shift their air strikes against Japanese airfields in the Philippines and curtail further attacks.

MILITARY: At Fernes de Suippes, France, the new Fifteenth Army headquarters becomes operational but an actual combat mission has yet to be assigned.

NAVAL: American submarines assigned to Task Group 17.21 attack a Japanese convoy off the coast of Formosa (Taiwan), sinking three vessels and damaging three more.

January 8–16

MILITARY: In Burma, the Mars Task Force traverses rugged, mountainous jungle terrain beyond Mong Wi, and positions itself to attack Japanese troops blocking the Burma Road between Hsenwi and Wanting.

January 9

AVIATION: The Far East Air Force provides close air support at various points throughout the Philippines, especially the Lingayen Gulf.

- Over Iwo Jima, B-24s equipped with H2X bombing equipment attack Japanese airfields near Suribachi Bay. This marks the debut of such technology.

MILITARY: The Sixth Army of Lieutenant General Walter Krueger commences Operation Mike 1 as he lands 68,000 men of the 6th, 37th, 40th, and 43rd Infantry Divisions on the Lingayen Gulf, Luzon, 100 miles north of Manila; resistance by the 250,000 Japanese defenders under Lieutenant General Tomoyuki Yamashita is light at first and no indication of what follows.

NAVAL: Rear Admiral Thomas C. Kinkaid directs Task Force 77 by landing army troops at Lingayen Bay and supporting them with air strikes and naval gunfire. The Japanese counter with kamikaze attacks, several of which strike the new battleship *Missouri*.

- As American forces land at Lingayen Gulf, Philippines, they are attacked by Japanese naval kamikazes employing small, high-speed boats; one transport vessel is sunk.

January 10

AVIATION: The Thirteenth Air Force begins a gradual shift of bases from New Guinea to Leyte, Philippines, as part of the American offensive there.

- Marine Air Groups 24 and 32 become operational at Lingayen, Philippines, and begin flying close support sorties for nearby army troops.

January 11

AVIATION: Over Luzon, Philippines, a reconnaissance version P-51 Mustang (F-6D) flown by Captain William A. Shomo engages Japanese aircraft and shoots down seven while his wingman bags three; because reconnaissance pilots rarely engage in combat, he wins the Medal of Honor.

During one of the coldest winters on record in Europe, men of the 347th Infantry Regiment, 87th Infantry Division, get some hot food near La Roche, Belgium, January 13, 1945. (National Archives)

January 12

AVIATION: Vice Admiral John S. McCain orders Task Force 38 to launch carrier strikes against Japanese installations in French Indochina (Vietnam), and 31 vessels are sunk. The attacks include some of the first marine air units to be stationed onboard the carrier *Essex*. Task Force 38 next shifts its sights to targets off Hong Kong and along the Chinese coast.

NAVAL: The submarine *Swordfish* is lost today after reconnoitering the waters off Okinawa.

January 12–22

MILITARY: The Ledo Road, Burma, is the route of a U.S./Chinese convoy that links to the Burma Road and finally rolls into Kunming, China; the long-blocked supply line from India to China is reopened.

January 13

MILITARY: In the Ardennes, Belgium, the 87th Infantry Division, Third Army, contacts advanced echelons of the British army along the Ourthe River. The battlefield is gradually restored and the “Bulge,” from which the battle derives its name, is ironed out. Fighting since December 16, 1944, to date has cost the army 19,000 killed and 15,000 captured.

NAVAL: Northeast of Truk, Caroline Islands, Japanese submarine *I-362* is detected and sunk by the destroyer escort *Fleming*.

January 15

MILITARY: At Le Havre, France, Major General Leonard T. Gerow departs the V Corps and assumes command of the new Fifteenth Army. Its first task is to relieve and refit the 12th Army Group after severe fighting in the Ardennes, Belgium.

- At Compiègne, France, 2,800 African-American volunteers are assigned to the 47th Reinforcement Battalion, 5th Reinforcement Regiment under Colonel Alexander George. By March 1, 4,562 blacks have been integrated into frontline units, an unthinkable prospect prior to the Battle of the Bulge.

January 16

NAVAL: Off the Azores Islands, German submarine *U-248* is attacked and sunk by destroyer escorts *Otter*, *Hubbard*, *Hayter*, and *Varian*.

MILITARY: In Belgium, the First and Third Armies link up at Houffalize, signaling the end of the “Battle of the Bulge.” German losses through this period are estimated at 250,000.

January 17

AVIATION: The XX Bomber Command unleashes 91 B-29 heavy bombers over targets in Shinchiku, Formosa (Taiwan). This is the last such raid mounted from bases at Chengtu, China, and, by March, the force has transferred to the Marianas Islands, much closer to Japan. The 58th Bomb Wing, meanwhile, remains active in India and provides tactical help to British forces in Burma with an occasional raid against Singapore and the East Indies.

January 17–18

MILITARY: In a major shift, the First Army of General Courtney H. Hodges is removed from British control (Field Marshal Bernard Montgomery) and placed back under General Omar N. Bradley, 12th Army Group.

- In Burma, the Mars Task Force clears Japanese defenders out of Namhkam village, only three miles from their objective, the Burma Road. On the following day, the Americans scale Loi-kang Ridge, overlooking the road.

January 20

AVIATION: On Guam, Major General Curtis E. LeMay arrives to take command of the XXI Bomber Command from Brigadier General Haywood S. Hansell. LeMay is expected to take charge of a largely unsatisfactory strategic bombing campaign against Japan. Meanwhile, Brigadier General Roger M. Ramey also takes control of the XX Bomber Command.

- In the South China Sea, Marine Lieutenant William McGee, operating from the carrier *Essex*, downs three Japanese aircraft.

MILITARY: In Washington, D.C., President Franklin D. Roosevelt signs a list promoting 103 officers to brigadier general—including his son, Colonel Elliott Roosevelt.

- Near Drusenheim, France, the VI Corps (Seventh Army) withdraws to a new defensive line in the face of a sustained German counterattack. The moves come too late to save the 157th Infantry Division and the 45th Infantry Division, which are surrounded and partly captured.

January 21

MILITARY: At Le Havre, France, the new 65th Infantry Division under Major General Stanley E. Reinhart arrives to commence precombat training. Since the previous September, it has been preceded by 22 infantry divisions and six armored divisions.

- Near Hpa-pen, Burma, the Mars Task Force secures the west side of the Burma Road and then maneuvers with Chinese troops to seize nearby hills overlooking this vital transportation route.

January 21–22

NAVAL: After Task Force 38 under Vice Admiral John S. McCain hits Japanese targets on Formosa (Taiwan), sinking 23 vessels, they are struck in return by kamikazes, which damage the carriers *Ticonderoga* and *Hancock* along with the destroyer *Maddox*. The light carrier *Langley* also receives damage from a bomb.

January 22

AVIATION: Fifth Air Force B-24s and P-38s mount their first air raid against Japanese targets on Formosa (Taiwan), while other aircraft continue supporting ground operations on Luzon, Philippines.

MILITARY: Near Guemar, Germany, the 1st French Army, supported by the 3rd Infantry Division and 5th Armored Division, begins an offensive to eliminate the so-called Colmar Pocket. Heavy fighting ensues as the defenders give ground slowly.

January 23

NAVAL: President Franklin D. Roosevelt goes onboard the heavy cruiser *Quincy*; he is slated to meet with prime Minister Winston Churchill and Soviet premier Joseph Stalin at Yalta (Crimea) in the Soviet Union.

- Off Yap, Caroline Islands, Japanese submarine *I-48* is detected and sunk by destroyer escorts *Conklin*, *Corbesier*, and *Raby*.

January 24

AVIATION: An armed Japanese Fugo balloon is shot down over Attu, Alaska, by fighters of the Eleventh Air Force.

- Iwo Jima, Bonin Islands, is the object of a bombing campaign by B-24s from the Seventh Air Force and B-29s from the Twentieth Air Force.
- B-24s attached to the Far East Air Force commence a three-week bombing campaign against Japanese positions on Corregidor, Philippines.

January 25

AVIATION: As fighting rages around them, the aircraft of Marine Air Groups 24 and 32 at Mangalan Airfield, Luzon, Philippines, are built up to seven squadron and redesignated Marine Air Groups Dagupan.

NAVAL: A task force commanded by Rear Admiral Oscar C. Badger, which includes the battleship *Indiana*, bombards Japanese shore positions on Iwo Jima, Bonin Islands.

January 25–26

AVIATION: The XX Bomber Command launches 70 B-29 heavy bombers, which sow mines in Singapore Harbor, Cam Ranh Bay, Pakchan River, and Phan Rang Bay. This is the largest single mining operation of the entire war.

January 26

MILITARY: On Luzon, Philippines, elements of the XIV Corps, Sixth Army, cross the Pampanga River, storm into Calumpit, and liberate the former Clark Field. Other troops begin encircling Japanese defenders at Bamban and Cabantuan.

NAVAL: Admiral William F. Halsey is relieved of command by Admiral Raymond A. Spruance, and his command is changed from Third Fleet to Fifth Fleet.

January 27

AVIATION: The Twentieth Air Force completes a difficult transfer from Chengtu, China, to bases in India prior to a final move to the Marianas Islands in March.

- The XXI Bomber Command launches 130 B-29 heavy bombers from bases in the Marianas Islands, which strike targets in Tokyo, Japan; five of the giant craft are lost to fighters while a further four ditch or crash land due to mechanical failures.

MILITARY: At Mabilao, Lingayen Gulf, Philippines, the 1st Cavalry Division, the 112th Cavalry Regimental Combat Team, and the 32nd Infantry Division come ashore to reinforce the Sixth Army.

January 28

AVIATION: Despite the fact that the Burma Road is reopened, transport aircraft in the China-Burma-India theater (CBI) continue averaging 500 sorties every day over the Hump (Himalayas). The recent departure of B-29s based at Chengtu, China, allows more supplies to be available to the Tenth and Fourteenth Air Forces.

- On Luzon, Philippines, the Army XIV Corps recaptures Clark Field, which had been the most important air base before the war.

MILITARY: In an attempt to hasten the end of the war, the First and Third Armies leave the Ardennes sector on a concerted drive toward the formidable German West Wall. The Bois de St. Vith sector in Belgium falls to columns of the 7th Armored Division.

January 29

MILITARY: In central Burma, Lieutenant General Dan Sultan commences a major offensive against Japanese forces, culminating with the capture of Rangoon that May.

NAVAL: At Guadalcanal, the cargo ship *Serpens* and its cargo of depth charges accidentally explodes, killing 255 men onboard; only two sailors survive.

January 29–31

MILITARY: Major General C. P. Hall's XI Corps is landed at San Antonio at the neck of the Bataan Peninsula, Luzon, Philippines. They encounter no resistance.

NAVAL: Task Groups 78.3 and 78.2 under Rear Admirals Arthur D. Struble and William M. Fechteler, respectively, outflank Japanese defenders on Luzon by landing army troops at Subic and Manila Bay.

January 31

AVIATION: With the return of clear weather, the Fifteenth Air Force puts over 760 B-17s and B-24s over the oil refineries at Moosbierbaum and marshaling yards at Gratz. The city is struck again by 300 bombers on the following day.

Spruance, Raymond A. (1886–1969)

Admiral

Raymond Ames Spruance was born in Baltimore, Maryland, on July 3, 1886, and raised in Indianapolis, Indiana. He passed through the U.S. Naval Academy in 1906 and saw service as part of President Theodore Roosevelt's Great White Fleet as it cruised around the world. Despite a tendency toward sea sickness, Spruance decided to make the navy his career and, by World War I, he was commanding the destroyer *Aaron Ward* as part of the Atlantic Fleet. He also excelled at electrical engineering, and he served with the Bureau of Engineering in 1921–24 before returning to the fleet with a staff assignment. After graduating from the Naval War College in 1927, he served at the Office of Naval Intelligence, rose to commander, and took charge of the battleship *Mississippi* from 1929 to 1931. Spruance rose to captain in 1932 and served an unusual three terms as president of the U.S. Naval War College, where he learned the fundamentals of

Admiral Raymond A. Spruance, April 1944
(*Naval Historical Foundation*)

MILITARY: The XIV Corps under Major General Oscar W. Griswold commences a final drive on Manila, the Philippines. Despite fierce resistance throughout Luzon, the 37th Infantry Division and the 1st Cavalry Division begin a parallel race to be first to enter the city.

- The 11th Airborne Division under Major General J. M. Swing makes an amphibious landing at Nasugbu, Philippines, against light opposition and in concert with the final drive against Manila.

NAVAL: Amphibious Group 8 under Rear Admiral William M. Fechteler lands the 11th Airborne Division at Nasugbu, south of Manila Bay, Philippines.

February 1

AVIATION: The Eighth Air Force hurls 1,000 heavy bombers at Berlin against stiff but steadily eroding German defenses.

- On Luzon, Philippines, dive bombers from Marine Air Group 14 assist the army's 1st Cavalry Division as it advances upon Manila.

naval strategy and operational planning. He was promoted to rear admiral in 1938, and his first flag command was the 10th Naval District on Puerto Rico. Three years later, he transferred his flag to Cruiser Division Five and Pearl Harbor, Hawaii. He was on maneuvers under Admiral William F. Halsey when Japan attacked Pearl Harbor on December 7, 1941, plunging the nation into World War II.

Throughout the spring of 1942, Spruance worked closely with Halsey during repeated carrier raids against Japanese shipping and installations in the Gilbert and Marshall Islands. Once Halsey was sidelined by a skin rash, Spruance succeeded him as commander of Task Force 16, and he assisted Admiral Frank J. Fletcher to win the crushing victory at Midway in June 1942. Spruance then served a stint as deputy commander under Admiral Chester W. Nimitz in Hawaii before assuming command of the mighty Fifth Fleet. With this force, Spruance helped blaze a trail of victory across the Central Pacific with successful landings on

Tarawa, Makin, Eniwetok, and Kwajalein. In June 1944, as American force attacked the strategic islands of Saipan and Tinian, Spruance parried a major Japanese thrust against his forces during the so-called Marianas Turkey Shoot, claiming 426 enemy aircraft. He rose to admiral in February 1944 and, he assisted General Holland M. Smith in the conquest of Iwo Jima in February 1945. From March to May of that year he orchestrated the Battle of Okinawa in the face of determined kamikaze attacks. Spruance was planning the invasion of Kyushu when the war ended in August 1945. Two months later he briefly replaced Nimitz as commander in chief, Pacific Theater of Operations, and he returned home to once again head the Naval War College. Spruance was under consideration to serve as chief of naval operations when he retired from active duty in 1948 and served as ambassador to the Philippines. He died in Pebble Beach, California, on September 13, 1969, and the new *Spruance*-class destroyers were named in his honor.

NAVAL: Southwest of Manila, Philippines, Japanese submarine *RO-115* is sunk by destroyers *Jenkins*, *O'Bannon*, and *Bell*, assisted by destroyer escort *Moore*.

February 2

MILITARY: In Burma, the 124th Cavalry Regiment, Mars Task Force, seizes Hpa-pen heights to secure steady passage along the Burma Road. Lieutenant Jack L. Knight, ignoring his wounds, attacks a series of Japanese pillboxes until he is killed; Knight wins a posthumous Medal of Honor.

February 3

AVIATION: In the largest air raid of the war to date, the Eighth Air Force launches 1,200 B-17s and B-24s against targets in Berlin and Magdeberg. They are escorted by more than 900 fighters, most of which accompany them to Berlin and back.

- From bases in the Marshall Islands, B-29s of XXI Bomber Command attack industrial targets in Kobe, Japan, dropping 159 tons of bombs and 13.6 tons of incendiaries; 1,039 buildings and structures are destroyed.
- To improve aerial defenses against kamikaze attacks, marine fighter squadrons VMF-216 and 217 are hauled onboard the carrier *Wasp* while VMF-511 is assigned to the escort carrier *Block Island*.

MILITARY: Brutal fighting erupts on the outskirts of Manila, Philippines, between the 1st Cavalry Division and 37th Infantry Division and 18,000 men of Japanese Special Naval Detachment Force under Rear Admiral Sanji Iwabuchi, who commit terrible atrocities against civilians. Many are killed after savage house-to-house fighting. Meanwhile, the 511th Parachute Infantry jumps into the Tagaytay Ridge region and establishes contacts with the 188th Glider Infantry.

February 3–8

MILITARY: Loi-kang, Burma, is cleared of Japanese defenders by the 475th Infantry, removing the final obstacle to traffic along the Burma Road. This action ends the tactical purpose of the Mars Task Force, which retraces its steps back to Mong Wi.

February 4

AVIATION: The Twentieth Air Force launches 100 B-29 heavy bombers against targets in Kobe and Natsusaka; nearly 100 fighters rise to oppose them, but only one B-29 is lost while 35 are damaged.

MILITARY: In Manila, Philippines, the 37th Infantry Division batters its way across the Quezon Bridge to reach the infamous Bilibid prison, where it rescues 3,700 malnourished prisoners.

- A supply convoy commanded by Brigadier General Lewis A. Pick rolls into Kunming, China, having traveled the entire Burma Road from Ledo, India. Generalissimo Chiang Kai-shek subsequently renames this engineering marvel the “Stilwell Road” to honor General Joseph Stilwell, the CBI commander.

NAVAL: In the South China Sea, Japanese aircraft sink the submarine *Barbel*.

February 4–11

MILITARY: The Argonaut Conference unfolds at Yalta, the Crimea, as President Franklin D. Roosevelt, Prime Minister Winston Churchill, and Premier Joseph Stalin confer on military strategy for the final time. The postwar division of Europe figures prominently in discussions and the Soviets obtain the eastern portions of Poland and \$20 billion in reparations from Germany. Stalin also agrees to enter the Pacific war that August in exchange for obtaining the Japanese half of Sakhalin Peninsula.

February 4–24

MILITARY: After a bruising battle of several weeks, American forces batter their way into Manila, capital of the Philippines, while surviving Japanese take to the hills.

February 5

AVIATION: In Italy, the Twelfth Air Force puts up 270 medium bombers to strike at German targets in the Po Valley region; an additional 730 heavy bombers strike oil refineries at Regensburg, Germany. Both operations are ably escorted by far ranging P-38 and P-51 fighters.

- Japanese positions on Corregidor, Philippines, are struck by a force of 60 B-24s from the Far East Air Force while B-25s provide close air support for ground troops.

MILITARY: After heavy fighting, the XXI Corps under Major General Frank W. Milburn cuts the Colmar Pocket in half and a protracted mop-up operation ensues.

February 7

AVIATION: In San Diego, California, the Consolidated Vultee XP-81 prototype takes to the air for the first time. This futuristic craft employs a turboprop engine in the nose and a turbo jet in the tail but it does not progress beyond the experimental stage.

NAVAL: Off Luzon, Philippines, Japanese submarine *RO-55* is detected and sunk by the destroyer escort *Thomason*.

February 9

MILITARY: Attempts to cross the Roer River into Germany proper stall after German engineers deliberately open release valves to the Schwammenauel and Urfttalspeere reservoirs; the ensuing pool of 111 million cubic meters of water constitutes a formidable barrier to American advances.

- Outside Chalampe, France, American operations on the Alsatian Plain conclude as the 1st French Army closes in upon the Colmar Pocket, where the German 19th Army is captured or eliminated.

February 9–12

NAVAL: Off the Philippine coast, the submarine *Batfish* under Commander John K. Fyfe sinks no less than three Japanese submarines, *RO-115*, *RO-112*, and *RO-113* in four days, a navy record.

February 10

AVIATION: The Nakajima aircraft factory at Ota, Japan, is the target of 84 B-29 heavy bombers from the XXI Bomber Command; in the absence of fighter escorts, the defenders shoot down 12 of the giant bombers.

- Task Force 58 departs Ulithi, having onboard no less than 144 Marine Corps F4Us as part of its overall fighter strength.

February 13

AVIATION: The historic German city of Dresden is singled out for punishment by the Royal Air Force, which area bombs it at night, followed by 1,300 American bombers during the next day.

- A force of two dozen B-29s attacks Japanese antiaircraft batteries on Iwo Jima, Bonin Islands, while other aircraft fly reconnaissance missions for the U.S. Navy. The island is also struck by tactical aircraft belonging to the Seventh Air Force, softening it up for the impending invasion.

MILITARY: On Luzon, Philippines, the 38th and 6th Infantry Divisions begin clearing out Japanese defenders from the Bataan Peninsula. Artillery troops attached to the XI Corps also begin bombarding Corregidor Island in Manila Bay.

NAVAL: Minesweepers attached to Task Group 77.3 under Rear Admiral R. S. Berkey begin clearing the waters of Manila Bay.

February 14

AVIATION: The German city of Dresden, having suffered from a destructive nighttime raid by the Royal Air Force, is struck again by waves of American bombers. The ensuing firestorm flattens 1,600 square acres and kills an estimated 100,000 people—more than the destruction of Hiroshima and Nagasaki combined.

MILITARY: At Hickham Field, Oahu, Hawaii, 54 army nurses who had been captured in the Philippines in 1942 are flown in by C-54 aircraft and personally greeted by Lieutenant General Robert C. Richardson.

NAVAL: Japanese batteries on Corregidor shell and sink the minesweeper *YMS-48* and damage the destroyers *Hopewell* and *Fletcher*. On the latter, Watertender First Class Elmer C. Bigelow rushes into a magazine and extinguishes a fire before the powder charges ignite. He subsequently dies of smoke inhalation, winning a posthumous Medal of Honor.

February 15

MILITARY: The number of German prisoners of war in U.S. Army hands is 172,879, including 7,598 officers.

- The 151st Regimental Combat team under Major General W. C. Chase wades ashore at Mariveles, Philippines, and pushed northward to link with American forces heading south.

NAVAL: Rear Admiral Arthur D. Struble directs Task Group 78.3 in landing army troops at Mariveles Harbor, Bataan, and Luzon in the Philippines.

February 16

AVIATION: Task Force 58 under Admiral Marc A. Mitscher launches strikes against targets in Tokyo, Japan, the first time that the capital has been raided by carrier aircraft. Marine fighter aircraft are among those participating, which claim to destroy 21 enemy aircraft in the air and 60 more on the ground.

- A large force of C-47 transports drop 2,000 parachutists on Corregidor, Manila Bay, Philippines, while tactical aircraft of the Far East Air Force strike targets in and around that island in support of the invasion there.

- In China, transports of the Tenth Air Force break their own sortie record by reaching 600 today, a pace they will maintain until war's end. Ultimately, the Air Transport Command delivers 700,000 tons of supplies at a cost of 910 aircrew.

NAVAL: Rear Admiral William H. Blandy orders his battleships and cruisers to bombard Japanese shore positions on Iwo Jima, three days before the invasion commences.

February 16–27

MILITARY: Corregidor, Manila Harbor, is assaulted by two battalions of the 503rd Parachute Infantry while the 3rd Battalion, 34th Infantry, attacks from the sea. After a stiff fight against 5,200 dug-in defenders, "The Rock" is once again in American hands at a cost of 225 killed and 405 wounded.

February 17

MILITARY: Regimental combat teams from the 6th and 38th Infantry Divisions seize Bagac on Bataan, Philippines, completing the conquest of that strategic peninsula.

NAVAL: Underwater Demolition Teams (UDT) scour the beaches of Iwo Jima, Ryukyu Islands, looking for possible obstructions. Japanese artillery sinks a gunboat offshore and badly damages LCI (G)-449. Lieutenant Rufus G. Herring, commanding the latter and badly wounded, refuses to leave his post until all the UDT teams are recovered; he wins a Medal of Honor.

February 18

MILITARY: In the Sarasiccia-Campana region of Italy, soldiers of the 86th Infantry, 10th Mountain Division scale a steep cliff in the darkness and then attack and

overwhelm German defenders guarding Monte Belvedere; over the next day the balance of the division moves into position to attack Belvedere-Gorgolescu.

February 19

AVIATION: Task Force 58 launches waves of navy and marine fighters and dive bombers in close support missions against Japanese positions on Iwo Jima, Bonin Islands.

- Japanese ships in Manila Harbor, Philippines, are attacked by Marine fighters and bombers launched from Mangalan airfield, Luzon.
- In an attempt to draw Japanese reinforcements away from Iwo Jima, the Twentieth Air Force launches 150 B-29 heavy bombers to strike at targets in and around Tokyo, Japan; enemy fighters shoot down six bombers.

MARINES: In one of the hardest fought battles of World War II, Operation Detachment unfolds as the 4th and 5th Marine Divisions of Lieutenant General Holland M. Smith's V Amphibious Corps storm the beaches at Iwo Jima. They are opposed by a Japanese garrison of 21,000 men under Lieutenant General Tadamichi Kuribayashi, who forsook beach defenses to concentrate on fortified strong points in the interior. By day's end, the 28th Marines have sealed off the approaches to Mount Suribachi while the 23rd and 27th Marines have edged close to Airfield No. 1. The Japanese garrison resists ferociously with machine guns, artillery, and rockets, all of which inflict 2,400 casualties on the marines.

This iconic photo by Joe Rosenthal captures the spirit and determination of the marines who took Iwo Jima. It is one of the unforgettable moments of World War II. (National Archives)

February 20

AVIATION: Secretary of War Henry Stimson authorizes construction of a rocket testing area at White Sands, New Mexico, having been warned that the Soviets would probably win a race to build long-range ballistic missiles.

MARINES: Overcoming savage resistance, the 28th Marines begin scaling Mount Suribachi, Okinawa, to deny its use to the Japanese as an observation post. Simultaneously, the 4th and 5th Marine Divisions press inland and capture Airfield No. 1.

February 21

NAVAL: Massed kamikazes attack the American fleet off Iwo Jima, sinking the escort carrier *Bismark Sea* with a loss of 218 crewmen. The carrier *Saratoga* sustains five hits, which heavily damages that vessel and effectively ends its combat career. The light carrier *Langley* is also struck by a bomb.

MARINES: Heavy fighting and casualties on Iwo Jima, Bonin Islands, results in the 21st Marines of the 3rd Marine Division going ashore to reinforce the struggling 4th Marine Division.

February 22

AVIATION: Operation Clarion unfolds as fighters and bombers of the Eighth, Ninth, Twelfth, and Fifteenth Air Forces begin a systematic destruction of German transportation networks. Collectively, they unleash over 9,000 aircraft to hit targets in occupied Europe over the next 24 hours. On the following day additional fighter sorties are launched to cover the Rhine River crossings.

MILITARY: At La Serra, Italy, the 10th Mountain Division attacks and drives German defenders from the slopes of Monte Belvedere; they then regroup and prepare to drive on Monte Torracchia, which falls on the 24th.

MARINES: On Iwo Jima, Bonin Islands, sufficient progress has been made to allow the 8th Field Depot to go ashore and begin coordinating the flow of supplies to the frontlines.

February 23

AVIATION: Off Cebu Island, Philippines, F4U Corsairs belonging to VMF-115 attack and sink a Japanese miniature suicide submarine (*kaiten*). Squadrons belonging to Marine Air Group 32 begin transferring their assets from Mangalan Air Field, Luzon, to Zamboanga, Mindanao, to participate in fighting farther south.

MILITARY: At Los Baños, Luzon, Philippines, Lieutenant Colonel Henry A. Burgess leads the 511th Parachute Infantry on a daring raid to rescue American captives in a Japanese prisoner-of-war camp. The Japanese were planning to execute the prisoners.

MARINES: A small American flag is raised atop Mount Suribachi, Iwo Jima, by the 28th Marines, 5th Marine Division. Later that day a larger flag is substituted and the photo taken by Associated Press photographer Joe Rosenthal becomes one of the iconic images of World War II and a successful tool for the seventh War Bond Drive. In the words of Secretary of the Navy James V. Forrestal, "The raising of that flag means a Marine Corps for the next 500 years."

February 23–March 5

MILITARY: The Ninth Army commences Operation Grenade, with the goal to place American forces across the Roer River and up to the Rhine. Elements of the

XIII, XIX, and XVI Corps launch highly coordinated attacks that gradually drive the German defenders back. With the Rhine River within its grasp, the Ninth Army dispatches scouts to find suitable crossing zones.

February 24

AVIATION: A force of 105 B-29 heavy bombers are launched by XX Bomber Command against the Empire Dock area, Singapore. The aircraft are carrying incendiary weapons and the resulting firestorm burns 40 percent of all warehousing.

MILITARY: Manila, capital of the Philippines, falls to a combined assault by the 37th Infantry Division and the 11th Airborne Division after intense house-to-house fighting. An estimated 12,000 Japanese lay dead among the rubble.

MARINES: On Iwo Jima, Bonin Islands, the remainder of the 3rd Marine Division under Major General Graves B. Erskine goes ashore as reinforcements.

February 25

AVIATION: The Bell XP-83 turbojet fighter, essentially a scaled-up version of the earlier P-59 Airacomet, makes its initial flight.

- The Pentagon hatches Project Paperclip, which is designed to recruit German rocket scientists after the war.
- Task Force 58 launches carrier strikes against targets in the Japanese homeland until the onset of bad weather cancels all flying operations.
- From the Marianas Islands, the XXI Bomber Command throws three complete bomb groups of B-29s against targets in the Tokyo area. This is the largest raid mounted by the XXI to date and the first employing incendiaries at high altitude.
- In Burma, B-25s of the Tenth Air Force provide close air support to British and Chinese forces advancing toward the Chinese border.

MARINES: On Iwo Jima, Bonin Islands, with the 3rd Marine Division holding the center, the 4th Marine Division covering the right flank, and the 5th Marines holding the left, the V Amphibious Corps begins grinding its way through the main Japanese defenses.

February 26

AVIATION: As the battle rages around them on Iwo Jima, two observation planes from VMO-4 begin artillery spotting missions from captured Airfield No. 1.

- A B-24 Liberator carrying Lieutenant General Millard F. "Mif" Harmon disappears while flying between Hawaii and Kwajalein; no wreckage is ever sighted.

NAVAL: Off Iwo Jima, TBM Avengers launched from the escort carrier *Anzio* attack and sink Japanese submarines *I-368* and *RO-43*. South of that embattled island, *I-370* is also detected by destroyer escort *Finnegan* and sunk.

February 27

AVIATION: A Navy PB4Y-1 Privateer of VPB-112 assists Royal Navy ships in the English Channel sinking German submarine *U-327*.

- The last remaining B-29 wing in India begins deploying to the Marianas Islands; the movement continues until June 6.

MARINES: On Iwo Jima, Bonin Islands, Airfield No. 2 falls to the 9th Marines, who also capture several key terrain features nearby.

February 28

AVIATION: In Washington, D.C., General Henry H. Arnold reveals the existence of the Lockheed P-80 Shooting Star, which soon becomes the first American jet fighter to reach operational status.

MILITARY: The Island of Puerto Princesa, southern Philippines, falls to the Palawan Task Force (186th Regimental Combat Team) under Brigadier General Harold H. Haney, while American troops and Filipino guerrillas begin overrunning Samar.

NAVAL: Task Groups 78.2 and 74.2 under Rear Admirals William M. Fechteler and Ralph S. Riggs, respectively, land army troops on Puerto Princesa, Palawan Island, in the southern Philippines.

- On Okinawa, Japanese soldiers lob nine hand grenades into a shell hole occupied by Pharmacists Mate First Class John H. Willis and a wounded marine. Willis throws out eight grenades and is killed by the ninth, winning a posthumous Medal of Honor.

MARINES: On the northern plateau of Iwo Jima, Motoyama village, overlooking Airfield No. 3, is captured by the 21st Marines.

March 1

AVIATION: Transport planes of VMR-952 begin air dropping supplies on Iwo Jima. They are shortly after joined by two additional squadrons.

MILITARY: At Compiègne, France, the first African-American graduates of the combat volunteer program are organized into 37 platoons and divided up between the 6th and 12th Army Groups. These are the first minorities to be integrated into all-white infantry companies and serve alongside them.

- The VII Corps, First Army, crosses the Erft River and begins a contested advance on Cologne, Germany. Farther south, the XX Corps, Third Army, seizes the important city of Trier, ending a struggle that commenced on January 29. A combined French-American force is also constituted to guard the French-Italian-Swiss region of the Alps.

NAVAL: At Orlando, Florida, the Naval Research Laboratory Underwater Sound Reference Division (USRD) commences operations.

- Vice Admiral Marc A. Mitscher leads Task Force 58 on carrier raids against Japanese airfields on Okinawa, Ryukyu Islands, sinking 15 small vessels.

March 2

NAVAL: Task Group 78.3 under Rear Admiral Arthur D. Struble lands troops and provides close support fire for army troops going ashore on Corregidor.

- Rear Admiral F. E. M. Whiting directs a mixed force of cruisers and destroyers culled from Task Group 58 as it bombards Japanese shore positions on Okino Daito in the Ryukyu Islands.

MARINES: On Iwo Jima, strategic Hill 362-A falls to the 28th Marines; Hill 382, the highest point on the northern section of the island, is captured by the 24th Marines.

March 3

NAVAL: On Iwo Jima, Pharmacist's Mate Third Class Jack Williams ignores serious wounds to treat several injured marines and is shot while returning to American

lines for aid; he wins a posthumous Medal of Honor. Meanwhile, Pharmacist Mate Second Class George E. Whalen also ignores his own wounds to treat wounded marines on the frontline, in one instance crawling 50 yards under fire to render assistance; he wins a Medal of Honor.

MARINES: On Iwo Jima, Airfield No. 3 falls to the 3rd Marine Division, which then advances upon Hills 357 and 362B.

March 4

AVIATION: The first damaged B-29 Superfortress makes an emergency landing on the airfield at Iwo Jima, Bonin Islands, while marines continue battling for control of the island. Before the war ends, thousands of American lives are saved by the airfield.

March 5

MARINES: General Holland M. Smith orders the 3rd Marines, his Expeditionary Troops reserve force, back to Guam, despite cries ashore for additional reinforcements.

March 6

AVIATION: Army fighter squadrons begin landing on Iwo Jima, whose presence gradually prompts the removal of escort carriers offshore.

- On Iwo Jima, Bonin Islands, P-51 Mustangs and P-61 Black Widows of the Seventh Air Force arrive to begin fighter escort service for B-29 formations.

NAVAL: On Iwo Jima, navy nurse Ensign Jane Kendeigh arrives by plane as the battle rages; she is the first navy nurse to serve in an active combat zone.

MARINES: On Iwo Jima, Bonin Islands, the entire V Amphibious Corps resumes advancing under a tremendous barrage by artillery, the fleet, and air support; Japanese defenders prove tenacious and progress is measured in yards along with heavy casualties.

March 7

MILITARY: The 9th Armored Division, III Corps, storms across the Rhine River on the intact bridge at Remagen, then proceeds to drive the remaining German defenders deeper into the Ruhr region. They are also the first foreign army to invade Germany proper since the days of Napoleon Bonaparte.

March 8

AVIATION: While the struggle for Iwo Jima rages with unfettered fury, transport aircraft belonging to VMR-253, 353, and 952 begin utilizing captured airstrips to deliver ammunition and medical supplies.

MILITARY: Lieutenant General Jacob L. Devers, commanding the Sixth Army Group, gains his fourth star to full general.

NAVAL: Phyllis Daley becomes the first African-American woman commissioned ensign in the Navy Nurse Corps.

MARINES: On Iwo Jima, Bonin Islands, the Japanese launch the first nighttime counterattack, which is roundly repulsed by the 4th Marine Division.

March 8–12

MILITARY: In Trier, Germany, the XII Corps, Third Army, presses northward and clears the north bank of the Moselle River with the 5th and 10th Armored Divisions while other elements drive east toward the Rhine.

March 9

AVIATION: Lieutenant General Curtis E. LeMay of XXI Bomber Command, having stripped his B-29s of armament and outfitting them with 2,000 tons of incendiaries, launches a devastating “fire raid” against Tokyo, Japan. Nearly 16 square miles, one-fourth of the city, is destroyed and 84,000 casualties inflicted—more than the number sustained at Hiroshima and Nagasaki. Japanese defenses down 14 of the giant bombers.

March 10

AVIATION: As the Eighth Army lands on Zamboanga, Mindanao, Philippines, their drive is assisted by close air support provided by Marine Air Group 12.

MILITARY: To cap off its successful drive to the Rhine River, Headquarters, Ninth Army, transfers from Maastricht, Holland, to Munchen-Gladbach, Germany.

- In the southern Philippines, the 41st Infantry Division under Major General Jens Doe, Eighth Army, drives out Japanese defenders on the Zamboanga Peninsula and then begin moving against Mindanao City.

NAVAL: Rear Admiral Forrest B. Royal directs Task Force 78.1 as it lands army troops on Mindanao, Philippines, despite accurate Japanese artillery from the shore.

- Off Okinawa, the submarine *Kete* sinks three Japanese cargo ships before all communication is lost; its fate is never ascertained.

MARINES: On Iwo Jima, Bonin Islands, the “Amphitheater-Turkey Knob” salient falls to a determined attack by the 4th Marines while the 3rd Marine Division begins mopping up the interior zone. Good progress is finally being made.

March 11

AVIATION: A force of 1,000 heavy bombers strikes the town of Essen, Germany, dropping a record total of 4,378 tons of bombs.

- A Navy PB4Y-1 Privateer of VPB-103 detects and sinks German submarine *U-681* off the Isles of Scilly.

- At Ulithi, Caroline Islands, a Japanese land-based bomber smashes into the carrier *Randolph*, killing 25 sailors and wounding 106. The raid originated in Japan as a one-way, long-range mission.

- The Twentieth Air Force unleashes 285 B-29 heavy bombers against industrial targets in Nagoya, Japan, dropping incendiaries at low altitude at night with devastating effect.

NAVAL: In a major operation, several hundred navy landing craft are hauled overland from Atlantic ports to the Rhine River in preparation for a major crossing at Bad Neuenahr. They are to be commanded by Commander William J. Whiteside.

MARINES: On Iwo Jima, Bonin Islands, the hard-charging 3rd and 4th Marine Divisions grind their way across to the coast as organized Japanese resistance begins collapsing.

March 12

MILITARY: Lieutenant General Omar N. Bradley, commanding the 12th Army Group, receives his fourth star to become a full general.

MARINES: On Iwo Jima, the 9th Marines begin reducing Cushman's Pocket, the final significant concentration of Japanese resistance, the struggle for which entails several days of hard fighting.

March 13

AVIATION: In central Burma, P-47s and P-38s of the Tenth Air Force continue providing close air support to the Chinese 50th Division as it drives along the Namtu River.

- The Twentieth Air Force launches 274 B-29 heavy bombers against Osaka; incendiaries destroy eight square miles in the city center.

March 14

AVIATION: The Fifteenth and Twelfth Air Forces dispatch heavy bombers to Hungary and Yugoslavia to assist the advancing Red Army, while P-38s and P-51s attack targets in Austria.

MILITARY: On Luzon, Philippines, the 6th Infantry Division attacks the Japanese "Shimbu" Line, whereupon Major General Edwin D. Patrick is killed in action. He is the first of two such ranking leaders in fall in World War II.

- Task Force 58 departs Ulithi Atoll, bolstered by the new carrier *Franklin*; a total of six Marine F4U squadrons are also present in the fleet.

MARINES: On Iwo Jima, V Amphibious Corps headquarters sponsors an official flag-raising ceremony and the famous flag raised over Mount Suribachi is lowered.

March 15

AVIATION: On San Roque airfield, Zamboanga, Mindanao, several elements of Marine Air Group 12 begin close support operations to assist army troops.

MILITARY: The Third Army under Lieutenant General George S. Patton and the Seventh Army under Lieutenant General Alexander M. Patch begin maneuvering to jointly attack the triangular Saar-Palatine region, bounded by the Rhine, Moselle, and Lauter-Sarre Rivers on three sides.

NAVAL: In the Boston Navy Yard, Massachusetts, the submarine *Lancetfish* accidentally sinks owing to the faulty operation of its torpedo doors. On Iwo Jima, Pharmacist's Mate Second Class Francis J. March is wounded while tending to wounded marines and twice carries injured men 200 yards to safety while under fire. Ignoring his own wounds, he draws a pistol and fires at nearby enemy troops to draw fire away from the marines; he wins the Medal of Honor. The British Pacific Fleet under Vice Admiral Sir H. Bernard Rawlings commences operations off Okinawa as Task Force 113. It counts among its vessels the battleships *King George V* and *Howe*, and the carriers *Indefatigable*, *Indomitable*, *Illustrious*, and *Victorious*.

March 16

AVIATION: A force of 300 B-29 heavy bombers belonging to XXI Bomber Command firebombs industrial targets in Kobe, Japan. This is the largest raid mounted by the Twentieth Air Force and, in this instance, the 2,300 tons of ordnance delivered burns one-fifth of the city.

MARINES: With the conquest of Cushman's Pocket, the 9th Marines wipe out the last organized resistance on Iwo Jima, Bonin Islands. Simultaneously, the 4th

Marine Division completely overruns its zone on the eastern coast and the island is declared secure.

March 17

MILITARY: In Washington, D.C., the War Department awards the Presidential Unit Citation to the 101st (“Screaming Eagles”) Airborne Division for its crucial defense of Bastogne in the Battle of the Bulge. This is the first time that an entire division has received such distinction.

- Major General James A. Van Fleet is appointed commander of the III Corps, Third Army; as late as D-day, hard-charging Van Fleet was a colonel.
- General Dwight D. Eisenhower arrives at Lunéville, France, to confer with Lieutenant General George S. Patton (Third Army) and General Jacob L. Devers (Sixth Army). They meet to discuss boundaries between the two armies as the drive to the Rhine continues.
- At Remagen, Germany, the Ludendorf Bridge collapses from damage inflicted by enemy action; army engineers quickly throw across several pontoon bridges to keep units on the east bank of the Rhine supplied. Near Wesel, Germany, engineers work feverishly to complete a 1,752-foot long bridge.
- On Iwo Jima, Bonin Islands, the 147th Infantry relieves marines during intense cave-to-cave fighting at the north end of the island.

MARINES: On Kitano Point, Iwo Jima, the sector known as “Death Valley” is sealed off by the 26th Marines, and the Japanese commander is preparing his last stand in a gorge nearby.

March 18

AVIATION: In Los Angeles, the prototype Douglas AD Skyraider takes to the sky for the first time; this versatile aircraft is the navy’s first single-seat, carrier-based dive bomber, which can also carry a wide array of rockets and torpedoes for other missions. It sees distinguished service throughout the postwar period.

- The Eighth Air Force launches 1,250 heavy bombers and 670 fighters against Berlin’s transportation network, dropping 3,000 tons in the process. This is also the largest daylight air raid of the entire war.
- The XXI Bomber Command hurls 300 B-29 heavy bombers against industrial targets in Nagoya, Japan. Once again the giant bombers come in the darkness at low altitude and the ensuing devastation is great.

NAVAL: Off Nova Scotia, Canada, German submarine *U-866* is detected and sunk by destroyer escorts *Mosley*, *Pride*, and *Lowe*.

- Vice Admiral Marc A. Mitscher directs Task Force 58 as it raids airfields and other targets on the Japanese mainland. The attackers claim 102 Japanese airplanes shot down, including 14 claimed by marine pilots, and 275 destroyed on the ground. Several large battleships, including the mighty *Yamato*, are also struck by bombs. However, kamikazes strike back at the fleet, damaging the carriers *Intrepid*, *Enterprise*, *Hornet*, and *Wasp*.
- Task Force 78.3 under Rear Admiral Arthur D. Struble lands the 40th Infantry Division of Major General Rapp Brush on Panay Island, Philippines, and they capture the city of Ilo-Ilo the following day.

March 18–21

AVIATION: Carrier aircraft launched from Vice Admiral Marc A. Mitscher's Task Force 58 strike Japanese ports and installations on the home island of Kyushu.

MILITARY: The XII Corps, Third Army, consisting of two armored divisions and four infantry divisions, crashes through German defenses in and around the Palatine. That done, the 4th Armored Division and 90th Infantry Division begin pressing toward Mainz and Worms while, farther south, the Seventh Army begins probing the heavily defended Siegfried Line.

March 19

NAVAL: Only 90 miles from the Japanese mainland, a solitary bomber aircraft slips past the combat air patrols of Task Group 58.2, bores in on the carrier *Franklin*, and strikes it. A blazing inferno results and Lieutenant Donald A. Gary bravely risks his life rescuing sailors trapped below decks, assisted by Commander Joseph T. O'Callaghan, the Catholic chaplain. Both men receive the Medal of Honor; all told 772 are killed and 265 wounded out of a total complement of 3,450 crewmen.

MARINES: The 4th Marine Division embarks at Iwo Jima and sails for Hawaii to rest and refit.

- On the carrier *Franklin*, 65 marines from two F4U Corsair squadrons are killed by a solitary bomb strike.

March 20

MILITARY: On Iwo Jima, the 147th Infantry lands as part of the garrison and is operationally attached to the 3rd Marine Division.

March 21

AVIATION: A P-63 Kingcobra shoots down a Japanese Fu-go balloon that had drifted over Reno, Nevada.

- While escorting bombers over Rutland, Germany, a P-51 Mustang flown by Lieutenant John Kirk spies a German Me-262 jet fighter as it dives through a B-17 formation. Kirk kicks his wing over and pursues, disabling his adversary and making him bail out.

MARINES: In Washington, D.C., Commandant Archie Vandegrift gains his fourth star, becoming the first Marine Corps officer to reach full general's status.

March 22–23

MILITARY: At Oppenheim, Germany, the 5th Infantry Division, XII Corps, Third Army, forces its way past stubborn German defenses and crosses the Rhine River. The unit used rafts and boats to cross at night and was on the opposite bank before the defenders could react.

- The XII and XV Corps, Seventh Army, begin probing German defenses for a place to cross the Rhine near Bitch.

March 23

AVIATION: Vice Admiral Marc A. Mitscher directs Task Force 58 to launch air strikes against Japanese airfields and position on Okinawa, Ryukyu Islands.

NAVAL: Landing craft operated by Task Unit 122.5.1 help ferry men of General George S. Patton's Third Army across the Rhine River under heavy fire.

- In the Philippine Sea, Japanese submarine *I-371* is rammed on the surface by destroyer *Haggard* and sunk.

March 24

AVIATION: Operation Plunder-Varsity unfolds as 1,000 heavy bombers from the Eighth and Ninth Air Forces strike at rail yards, flak positions, and communications systems across Germany in support of the Rhine River crossings.

- To facilitate the Allied crossing of the Rhine River, 2,000 transports drop two airborne divisions under Major General Matthew Ridgway near Wesel, Germany, at a cost of 50 aircraft and 11 gliders destroyed.
 - A force of 150 heavy bombers from the Fifteenth Air Force attacks Berlin, Germany, from bases in northern Italy for the first time.
 - On Zamboanga, Mindanao, Philippines, Marine Air Group 32 is brought up to four-squadron strength and begins close support operations with the Eighth Army.
- MILITARY:** Near Wesel, Germany, Operation Varsity commences as the 17th Airborne Division and the 6th British Airborne Division drop and land gliders northwest of the Rhine River to secure bridgeheads.

March 25

MILITARY: The Saar Palatine region is reduced by the Third and Seventh Armies, completely destroying the German First and Seventh Armies (Army Group G) and taking 81,692 captives. This action clears the Rhine River as far south as Speyer and the VI Corps also completes driving enemy units out of northern Alsace.

NAVAL: Task Force 54 under Rear Admiral Morton L. Deyo begins bombarding Japanese positions on Okinawa, Ryukyu Islands.

MARINES: On Iwo Jima, the 5th Marine Division completes mop-up operations in the section known as “Death Valley,” at which point organized Japanese resistance ceases.

March 26

AVIATION: Marine Air Group 14 contributes ground support to army troops landing on Cebu, southern Philippines.

MILITARY: Japanese forces on Iwo Jima launch a desperate nighttime counterattack, leaving four soldiers dead and 89 wounded before being rebuffed. The army also assumes administrative control of the island following the departure of the V Amphibious Corps.

- In the Philippines, Major General William H. Arnold directs the Americal Division ashore at Cebu Island, Philippines, encountering sharp resistance from a 14,500-man Japanese garrison under Major General Takeo Manjome and Rear Admiral Kaku Harada.

NAVAL: Off Okinawa, Ryukyu Islands, Task Force 54 under Rear Admiral Morton L. Deyo begins the pre-invasion bombardment against shore installations. The battleship *Nevada* and light cruiser *Biloxi* are damaged by Japanese kamikazes, along with several other vessels. The destroyer *Halligan* strikes a mine and sinks with heavy loss of life.

- The 77th Infantry Division under Major General W. H. Arnold is landed on Kerama Retto, Ryukyu Islands, by Task Group 51.1 under Rear Admiral Ingolf N. Kiland.

- Task Group 78.2 under Captain Albert T. Sprague lands forces on Talisay Point, Cebu, Philippines.

March 26–27

MILITARY: Aware that Allied prisoners are held at Oflag XIII B near Schweinfurt, Germany, the 4th Armored Division launches a small armored task force commanded by Captain Abraham Baum to liberate them. However, the mission miscarries badly and most of the attackers are captured in fierce fighting. Lieutenant General George S. Patton, who ordered them into action, is roundly criticized.

MARINES: On the islets of Keise Shima, Okinawa, the Fleet Marine Force Reconnaissance Battalion lands, and, finding no Japanese troops present, rapidly departs.

March 27

MILITARY: A battalion belonging to the 151st Regimental Combat Team lands at Caballo Island, Manila Bay, and wipes out the Japanese garrison there.

NAVAL: The submarine *Trigger* is declared overdue and missing in action on its 12th Pacific war patrol.

MARINES: The 3rd and 4th Marines leave Iwo Jima, Bonin Islands, having suffered 5,981 killed and 19,920 wounded in a conflict that is the stuff of Marine Corps' legend. Of the 21,000 Japanese defenders, only 216 are taken alive—General Tadamichi Kuribayashi commits suicide rather than be captured.

March 27–28

AVIATION: A force of 100 B-29 heavy bombers fly from the Marianas on their first mine-laying mission in the Shimonoseki Strait between Honshu and Kyushu. Simultaneously, another 150 B-29s strike Japanese targets on Okinawa, Ryukyu Islands.

March 28

MILITARY: The Fifteenth Army is ordered to both blockade bypassed German garrisons at Lorient and Saint-Nazaire, France, as well as govern the Rhineland region of Germany. It presently consists of the XXII and XXIII Corps under Major General Leonard T. Gerow.

- North of Idstein, Germany, the 4th Armored Division (Third Army) makes contact with the 9th Armored Division (Seventh Army), then continues pushing eastward.
- General Dwight D. Eisenhower orders the axis of the Allied thrust into Germany to be directed south at Leipzig, while Berlin is left as a Soviet objective. This also switches the greatest burden from Field Marshal Bernard Montgomery's 21st Army Group to the 12th Army Group under Lieutenant General Omar N. Bradley.

March 29

AVIATION: XX Bomber Command launches its final mission from India when 24 B-29s attack oil fields on Bukum Field, Singapore, at night.

- Fighters and dive bombers from Marine Air Group 14 lend close air support to the 40th Infantry Division as it lands on Negros Island, Philippines.

MILITARY: Near Okinawa, elements of the 77th Infantry Division occupy the remaining islets of the Kerama Retto Group while the Fleet Marine Force Reconnaissance Force begins scouting islands between Kerama Retto and Keise Shima.

- The 185th Regimental Combat Team under Major General Rapp Brush lands on Negros Island, Philippines, and drives the defending Japanese into the mountainous interior.

NAVAL: Task Force 59 under Vice Admiral Marc A. Mitscher launches air strikes against Japanese targets in Kagoshima Bay, Kyushu; 12 vessels are sunk.

March 30

AVIATION: A German fighter pilot defects to the Allies, facilitating the first close-up look at the revolutionary Messerschmitt Me-262 jet fighter.

MILITARY: Near Paderborn, Major General Maurice Rose, 3rd Armored Division, and his command column are attacked by German tanks; he becomes only the second divisional leader killed in combat. The town is subsequently taken by the reformed 106th Infantry Division, which was nearly destroyed during the Battle of the Bulge.

March 31

AVIATION: A force of 137 B-29 heavy bombers strikes industrial targets at Omura and Tachiahari, Japan, as a diversion for the upcoming invasion of Okinawa.

NAVAL: Off Okinawa, Japanese submarine *I-8* is detected and sunk by the destroyers *Morrison* and *Stockton*.

- In the same vicinity, a kamikaze strikes Admiral Raymond A. Spruance's flagship, the heavy cruiser *Indianapolis*, forcing him to transfer his flag to the battleship *New Mexico*.

April

AVIATION: At the Aberdeen Proving Ground, Maryland, a supersonic wind tunnel commences testing the concept of swept-back wings for the first time.

April 1

MILITARY: Near Lippstadt, Germany, pincers of the First and Ninth Armies continue folding around the Ruhr region, trapping additional German units. Meanwhile, the 5th Armored Division begins a drive toward Weser while the 17th Airborne Division advances on Münster.

- This Easter Sunday signals the start of Operation Iceberg, the struggle for the Japanese stronghold of Okinawa, while under constant bombardment by kamikaze aircraft. Fighting begins when the Tenth Army of Lieutenant General Simon B. Buckner lands 65,000 men at Higashi Beach unopposed, then moves inland. Present are the Army XXIV Corps under Major General John Hodge, and III Amphibious Corps under Major General Roy S. Geiger, for a total strength of 165,000 men. They gradually encounter fierce resistance from a Japanese garrison of 115,000 army troops and naval infantry under Lieutenant General Mitsuru Ushijima and Rear Admiral Minoru Ota.

NAVAL: Off Okinawa, kamikaze aircraft strike the battleship *West Virginia* and two attack transports, damaging all.

- At Legaspi, Luzon, Philippines, Task Group 78.4 under Captain Homer F. McGee lands army troops ashore.

- In the Formosan Straits, the submarine *Queenfish*, operating in foggy weather, accidentally sinks the Japanese ship *Awa Maru* during a radar-directed torpedo attack in poor visibility. The vessel, bedecked with visible red crosses, was on a humanitarian mission to deliver supplies to Allied prisoners in Malaysia. Lieutenant Commander Charles E. Loughlin is court-martialed, found guilty, and receives a letter of reprimand.

MARINES: On Okinawa, Ryukyu Islands, the III Amphibious Corps lands the 1st, 2nd and 6th Marine Division amid light resistance. The Japanese commander is determined to lure the attackers inland to face his prepared positions, rather than meet them on the beachhead. On the first day, Yontan Airfield falls to the 4th Marines.

April 1–13

AVIATION: At Fort Bliss, Texas, JPL technicians fire off 17 Private F Rockets along the Hueco Range.

April 2

AVIATION: The Twentieth Air Force unleashes a large force of B-29 heavy bombers, which mine waters around Kure and Hiroshima harbors, and also bomb the Nakajima aircraft factory near Tokyo.

- On newly liberated Yontan Airfield, Okinawa, the first Marine Corps observation craft carry out artillery-spotting missions.

MILITARY: On Okinawa, Ryukyu Islands, the Army's XXIV Corps cuts the island in two by fighting its way to the eastern coast.

April 3

AVIATION: Marine F4U Corsairs launched from the carrier *Bunker Hill* shoot down 11 Japanese airplanes attempting to attack the U.S. fleet off Okinawa, Ryukyu Islands.

MILITARY: General Douglas A. MacArthur and Admiral Chester Nimitz are ordered by the Joint Chiefs of Staff to begin planning for an amphibious attack on the Japanese mainland. At this juncture, the Americans can muster 1.5 million soldiers, 6,000 ships, and 35,000 aircraft in the Pacific Theater of Operations (PTO).

MARINES: On Okinawa, Ryukyu Islands, the Katchin Peninsula is sealed off by the 1st Marine Division.

April 4

AVIATION: In Burma, a YR-4 helicopter of the Air Jungle Rescue Detachment retrieves a PT-19 pilot who had crashed in the jungle.

MILITARY: In Merkers, Germany, the 90th Infantry Division, XII Corps, discovers a mountain of wealth in an underground cave; the inventory reveals a haul of 4,500 25-pound gold bars, millions of Reichsmarks, and art treasures looted from museums and private collections across Europe.

- The Army XXIV Corps (7th, 27th, 77th, and 96th Infantry Divisions) under Major General John Hodge moves southward on Okinawa, encountering several thick belts of entrenched Japanese defenders.
- On Iwo Jima, Bonin Islands, the 147th Infantry assumes control of ground defenses once the 9th Marines begin embarking.

MARINES: On Okinawa, Ryukyu Islands, Japanese resistance in the Katchin Peninsula is crushed by the 1st Marine Division as the 6th Marine Division begins driving northward.

April 4–11

AVIATION: During this period, the Eighth Air Force unleashes 1,000 heavy bombers at industrial, transportation, and communication targets across Germany. German Me-262 jets shoot down 10 B-17s but they lose 20 of their number to a myriad of fighter escorts.

April 5

MILITARY: In Italy, the 92nd Infantry Division, Fifth Army, commits a diversionary attack along the Ligurian coast, meeting stiff resistance. Nearby, the 442nd Regimental Combat Team seizes Monte Fragolito and Monte Carchio before pressing on to Monte Belvedere.

- On Okinawa, Ryukyu Islands, the XXIV Corps encounters stout resistance as it butts up against the so-called Shuri Line. This provides a foretaste of fighting to come.

NAVAL: Off Okinawa, Ryukyu Islands, Japanese submarine *RO-41* is detected and sunk by the destroyer *Hudson*.

MARINES: On Okinawa, the 1st Marine Division consolidates its gains as the 6th Marine Division continues sweeping northward against light opposition. Meanwhile, the Fleet Marine Force Reconnaissance Battalion encounters stiff resistance on nearby Tsugen Shima and withdraws.

April 6

AVIATION: The Japanese under Admiral Soemu Toyoda unleash Operation Ten-Go, a massive, 700-airplane assault on the American fleet off Okinawa, with half of their air strength functioning as kamikazes. Two freighters, *LST-347*, and destroyers *Bush* and *Colhoun* are either sunk or scuttled. Twenty-six other vessels are damaged in this, the first of nine such raids. Marine fighters account for at least 22 of the Japanese aircraft shot down.

April 7

AVIATION: With Iwo Jima in American hands, the Twentieth Air Force is able to dispatch 91 P-51 Mustangs as fighter escorts on a raid by 280 B-29s against the Japanese mainland. The fighters claim to shoot down 21 opposing aircraft.

- Advanced elements of Marine Air Group 31 land at Okinawa and begin providing direct tactical support to ground units.
- U.S. Army air force P-51 Mustangs commence flying escorts missions for B-29 air raids over Japan.
- Kamikaze aircraft damage an additional six vessels, including the carrier *Hancock* and the battleship *Maryland*, deployed off Okinawa.
- The huge Japanese battleship *Yamato*, escorted by the light cruiser *Yahagi* and eight destroyers, sorties on a one-way mission against the American fleet off Okinawa. They are intercepted en route by 386 carrier aircraft launched by Vice Admiral Marc A. Mitscher's Task Force 58, which send all but four destroyers to the bottom of the East China Sea. Admiral Seiichi Ito chooses to go down with his flagship. This is also the final sortie by the Imperial Japanese Navy, and it costs the Americans 10 aircraft and 12 airmen.

NAVAL: The submarines *Gabilan* and *Charr* jointly sink the Japanese light cruiser *Isuzu* off Bima Bay, Netherlands East Indies.

MARINES: The Fleet Marine Force Reconnaissance Battalion reconnoiters islands along the east coast of Okinawa and finds no enemy forces deployed there.

April 8

NAVAL: The submarine *Snook* rendezvouses with the submarine *Tigrone*, then is never heard from again.

MARINES: Following a stiff engagement, the Motobu Peninsula, Okinawa, is sealed off by the 6th Marine Division.

April 9

MILITARY: Covered by marine fighters and dive bombers, army troops are successfully landed on Jolo Island, Philippines.

NAVAL: Off Okinawa, Japanese submarine *RO-56* is detected and sunk by the destroyers *Mertz* and *Monssen*.

MARINES: On Okinawa, Ryukyu Islands, the Motobu Peninsula is probed by patrols from the 22nd and 29th Marines. The 11th Marines, meanwhile, begin shifting south to aid the Army's XXIV Corps.

April 10

AVIATION: Over Berlin, Germany, a force of 50 German Me-262 jet fighters shoot down 10 American bombers; this is the largest single loss to enemy jets during the war. Bomber gunners and fighter escorts claim to have downed 20 German jets.

MILITARY: Troops of the Third Army are horrified by what they behold after occupying the Ohrdruf death camp, the first of several such camps liberated by American forces.

- In Manila, Philippines, General Douglas A. MacArthur oversees creation of the U.S. Army Forces in the Pacific (AFPAC) to orchestrate final phases of the Philippine campaign and begin planning for the forthcoming invasion of Japan. MacArthur is installed as commander while Lieutenant General William D. Styer becomes commanding general of U.S. Army troops in the western Pacific (WESPAC).

April 11

AVIATION: Kamikaze attacks continue against the U.S. fleet off Okinawa. Another six vessels, including the battleship *Missouri* and the carrier *Enterprise*, are damaged. Conventional bombs also strike the carrier *Essex*, three destroyers, and several landing craft.

MILITARY: Advanced elements of the 2nd Armored Division reach the Elbe River, only 80 miles west of Berlin, and begin looking for Soviet troops in the region.

- The 164th Infantry transfer from Cebu Island, Philippines, to neighboring Bohol, which they finally subdue on April 20.

MARINES: On Okinawa, Ryukyu Islands, the 2nd Marine Division embarks and sails for Saipan.

April 12

AVIATION: On a B-29 mission over Koriyama, Japan, Staff Sergeant Henry T. Erwin picks up a phosphorous smoke flare that had backfired into his aircraft and tosses it out the navigator's window. He suffers severe third-degree burns but survives and wins a Medal of Honor.

- Off Okinawa, another 380 Japanese aircraft are hurled against the U.S. fleet, including the first rocket-powered Baka suicide bombs, one of which strikes and sinks the destroyer *Mannert L. Abele*. The landing craft *LCS (L)-33* is also sunk while another 18 vessels are heavily damaged. Task Force 58 fighters claim to have shot down 298 of the attackers.

- Marine F4U Corsairs attached to Task Force 58 intercept and shoot down 51 kamikazes off Okinawa.

MILITARY: President Franklin D. Roosevelt dies at Warm Springs, Georgia, whereupon Harry S. Truman, a former Missouri National Guard artillerist, is sworn in as the new commander in chief.

- General Dwight D. Eisenhower is so shocked by the Ohrdurf concentration camp that he orders all U.S. troops in the vicinity to visit and see for themselves.

- Troops of the Americal Division eliminate most Japanese defenders on the island of Cebu, Philippines, having sustained 410 killed and 1,700 wounded.

MARINES: On Okinawa, Ryukyu Islands, the 9th Marines embark and sail for Saipan.

April 13

AVIATION: Over the Aleutian Islands, Alaska, P-38s and P-40s belonging to the Eleventh Air Force intercept and shoot down nine explosive Fu-go balloons.

- A night raid, 330 B-29 heavy bombers belonging to the Twentieth Air Force, strike industrial targets around Tokyo, Japan.

MARINES: On Okinawa, Ryukyu Islands, elements of the 6th Marines reach the northernmost sectors of the island as the Fleet Marine Force Reconnaissance Battalion invades Minna Shima off the northwest coast.

April 14

MILITARY: In the Po Valley, Italy, the Fifth Army begins a long-delayed offensive once the weather partly clears. The 10th Mountain Division advances down the valley while the 1st Armored Division moves along Highway 64 toward Vergato.

NAVAL: In the Yellow Sea, the submarine *Tirante* under Lieutenant Commander George L. Street III tackles a large Japanese convoy while surfaced and sinks three vessels; Street wins the Medal of Honor.

MARINES: On Okinawa, Japanese forces defending Mount Yae Take on the Motobu Peninsula are eliminated by the 4th and 29th Marines.

April 15

AVIATION: As an experiment, 850 bombers from the Eighth Air Force drop napalm weapons on German fortifications and other targets. However, these prove ineffective when delivered from high altitude and the experiment is discontinued.

- The Fifteenth Air Force dispatches 830 B-17s and B-24s against German supply and communication targets in northern Italy, amply escorted by P-38 fighters. The 1,412 sorties flown and the tons of bombs dropped in this 24-hour period are a record for the Fifteenth.

- The Japanese cities of Tokyo and Kawasaki, Japan, are struck by 300 B-29 heavy bombers.

NAVAL: West of the Azores Islands, German submarine *U-1235* is detected and sunk by the destroyer escorts *Frost* and *Stanton*. A day later the duo also sink submarine *U-880* in the same area.

- Off Okinawa, a one-sided struggle ensues as the destroyer *Laffey* is singled out by 22 separate kamikaze attacks; six attackers are shot down and another six strike the *Laffey*, which loses 109 men but survives the onslaught and is towed to safety.

April 16

AVIATION: A force of P-51 Mustangs flying from Iwo Jima attacks ground targets on the Japanese mainland. Navigation for the raid is provided by a solitary B-29 heavy bomber.

MILITARY: Congress votes to extend the Lend-Lease program for another year. President Harry S. Truman also assures the legislature that he will terminate the ongoing program as quickly as possible.

NAVAL: Off Okinawa, kamikaze craft strike and sink the destroyer *Pringle* with a loss of 62 men, while the battleship *Missouri* and the carrier *Intrepid* are badly damaged.

MARINES: On Okinawa, Mount Yae Take is successfully stormed by the 4th Marines and resistance along the Mobotu Peninsula begins subsiding.

April 16–21

MILITARY: As fighting rages on Iwo Jima, Ryukyu Islands, the 77th Infantry Division under Major General A. D. Bruce is transported to take the small island of Ie Shima. Five days of intense fighting are required to overcome small but fanatical resistance.

NAVAL: Task Force 53 under Rear Admiral L. F. Reifsnider conveys army troops to the island of Ie Shima on the west coast of Okinawa.

April 17–May 11

AVIATION: In support of the Okinawa operation, the XXI Bomber Command directs its B-29 heavy bombers against enemy airfields on Kyushu and Shikoku, Japan, which are used as staging areas for deadly kamikaze attacks.

MILITARY: Lieutenant General Alexander M. Patch orders the XV Corps (3rd and 45th Infantry Divisions), Seventh Army, to attack and capture Nuremberg. Meanwhile, VI Corps drives southward to the Swiss border to cut off any escape routes from the Black Forest region.

- The X Corps, Tenth Army, under Major General Franklin C. Sibert is landed on Mindanao in the southern Philippines; a stiff fight ensues and the elimination of 41,000 defenders is not completed until June 30.

NAVAL: Task Group 78.2 under Rear Admiral A. G. Noble lands army troops on the west coast of Mindanao, Philippines.

April 18

AVIATION: Transport aircraft belonging to VMR-252 arrive on Okinawa with their first shipment of vital supplies.

MILITARY: Ernie Pyle, America's beloved war correspondent, dies of wounds received in battle on Ie Shima. He had been recording the lives and deaths of common soldiers since the North African and Italian campaigns.

Smith, Holland M. (1882–1967)

Marine Corps general

Holland McTyeire Smith was born in Seale, Alabama, on April 20, 1882, and he studied law at the University of Alabama. He practiced for two years, but, in March 1905, he quit to obtain a lieutenant's commission in the Marine Corps. Over the next 12 years Smith fulfilled a number of routine assignments in a variety of locations and he rose to captain in 1917. That year, he arrived in France commanding a machine gun company as part of the 4th Marine Brigade, and he became the first marine officer selected to attend the Army General College Staff at Langres. Smith particularly distinguished himself in combat at Saint-Mihiel, Oise, and Meuse-Argonne, winning promotion to major and a Croix de Guerre. Smith performed a brief stint of occupation duty in Germany and returned home in 1919. He graduated from the Naval War College two years later and became the first marine appointed to the Joint Army-Navy Planning Board. Smith rose to brigadier general in

1937 and assumed control of the Divisions of Operations and Training. In 1939 he also served as assistant to Commandant Thomas Holcomb and proved instrumental in developing specialized landing craft and amphibious tractors. He successfully tried out the equipment with the 1st Marine Brigade in 1940, and the following year Smith rose to major general commanding the 1st Marine Division, as part of Amphibious Force, Atlantic Fleet, under Admiral Richmond K. Turner. In light of his fierce temper, he also acquired the nickname "Howlin' Mad Smith."

For two years during World War II, Smith concentrated his efforts on training troops and fine-tuning his amphibious tactics. In June 1943 he assumed command of the V Amphibious Corps, consisting of the 2nd and 4th Marine Divisions, and he blazed a trail of glory across the Central Pacific. In November 1943 he fought the bloody Battle of Tarawa, in which

NAVAL: Off Okinawa, Ryukyu Islands, a TBM Avenger launched from the light carrier *Bataan* assist four destroyers in sinking Japanese submarine *I-56*.

- Only 440 yards off the beach at Wake Island, Japanese submarine *RO-46* is torpedoed and sunk by the submarine *Sea Owl*.

April 19

MILITARY: The First Army's V Corps (2nd and 69th Infantry Divisions) push eastward, capturing the city of Leipzig, while the 1st Infantry Division (VII Corps) advances through the Hartz Mountains to contact friendly units beyond.

- On Okinawa, the XXIV Corps advances across the island with its three divisions lined up abreast.

NAVAL: Off Nova Scotia, Canada, the German submarine *U-548* is detected and sunk by the destroyer escorts *Buckley* and *Reuben James*.

the marines lost 3,000 men in only three days, which forced him to prolong naval bombardments and increase the ratio of amphibious tractors during an assault. The ensuing conquest of Kwajalein, Eniwetok, Tinian, and Guam were all textbook examples of proper amphibious warfare. However, on Saipan, Smith was angered by the lack of progress by army troops under Major General Ralph K. Smith, and he relieved him of command. This move sparked a bitter fight that threatened to jeopardize future army-navy cooperation, but, in August 1944, Smith was nevertheless elevated to lieutenant general. He personally stormed ashore at Iwo Jima in February 1945, securing one of the greatest and hardest-fought victories by the Marine Corps. After the war Smith returned to the United States to head the Marine Training and Replacement Command, and he retired a full general in June 1946. He then published a controversial memoir entitled *Coral and Brass*, in which he excoriated many contemporaries for disagreeing with him over tactics in the Pacific. Smith

Holland M. "Howlin' Mad" Smith (United States Marine Corps)

died in San Diego, California, on January 12, 1967, hailed as the father of modern amphibious warfare.

April 20

MARINES: On Okinawa, Ryukyu Islands, the entire Motobu Peninsula is subdued by the 6th Marine Division.

April 21–26

AVIATION: A-20s and B-26s from the Twelfth Air Force maul retreating German units throughout the Po Valley, dropping bridge spans and destroying 1,000 vehicles.

April 22

AVIATION: On Okinawa, Ryukyu Islands, Marine F4U Corsairs intercept a large body of incoming kamikazes, knocking 33 of them down.

- On Jolo Island, Philippines, Marine Air Group 32 fighters and dive bombers provide close air support to the army's 41st Infantry Division.

NAVAL: Off the Azores Islands, German submarine *U-518* is detected and sunk by destroyer escorts *Neal A. Scott* and *Carter*.

April 23

AVIATION: Off Balikpapan, Borneo, PB4Y-1 Privateers of PB-109 launch radio-controlled ASM-N2 “Bat” missiles against Japanese shipping—missing badly. This also marks the debut of World War II’s only guided missile system, and a precursor of today’s “smart missiles.”

NAVAL: In the Java Sea, German submarine *U-138* is torpedoed and sunk by the submarine *Besugo*.

April 24

MILITARY: The XXIV Corps under General Simon B. Buckner advances past the Machinato Line on Okinawa, whereby Japanese forces fall back to their next line of prepared positions.

NAVAL: East of Newfoundland, Canada, the destroyer escort *Frederick C. Davis* is sunk by German submarine *U-546*, which is then tracked and sunk in turn by seven other destroyer escorts.

MARINES: On Okinawa, the 1st Marine Division is posted as the Tenth Army Reserve; this evening the Japanese withdraw to the second formation of the Shuri Line.

April 24–25

AVIATION: A P-47 flown by Lieutenant Raymond L. Knight accounts for 14 German aircraft downed during strafing attacks at numerous aerodromes. However, when Knight’s own aircraft is damaged by flak on the second day of attacks, he refuses to break off or abandon his wingman until he crashes into a mountain-side, killing him. He wins a posthumous Medal of Honor.

April 25

AVIATION: Eighth Air Force B-17s and B-24s hit armament works at Pilsen-Skoda, Czechoslovakia, and Traunstein, Germany; this is the last time they take on industrial targets.

- Off Brest, France, a PB4Y-1 Privateer of VPB-103 sights and sinks German submarine *U-326*.

MILITARY: In Germany, the First Army is halted and ordered to begin transferring to the Pacific Theater of Operations (PTO).

- At Torgau, Germany, patrols of the 69th Infantry Division make contact with the Soviet 59th Guards Division along the Elbe River.
- In northern Italy, an attack by the 92nd Infantry Division, Fifth Army, captures Aulla in the Ligurian sector, completing the conquest of the Gothic Line.

April 26

MILITARY: Task Force Darby passes through Verona, Italy, and presses on to Lake Gardia to cut off German escape routes. A stiff fight ensues and Colonel William O. Darby, a noted Ranger leader, is killed by a mortar fragment. Meanwhile, the 85th Infantry Division forces a bridgehead on the Adige River as the 1st Armored Division storms toward Lake Como.

- On Okinawa, the XXIV Corps commits its three divisions on a direct assault against the second formation of Shuri Line defenses.

- The 164th Infantry Regiment is transported to the southwest side of Negros Island, Philippines, to assist the 40th Infantry Division already there; the island is declared secure as of June 12.

NAVAL: Task Unit 78.3.3 under Commander W. V. Deutermann conveys army troops to the Philippine island of Negros.

April 27

AVIATION: In the first step toward demobilization, the authorized strength of bomber groups is reduced from 68 to 48 planes, while fighter groups shrink from 96 to 75 machines.

- Off Okinawa, a fourth massed raid by kamikazes sinks the transport *Canada Victory* and also damages three destroyers and the hospital ship *Comfort*.

April 28

MILITARY: In northern Italy, the cities of Alessandria, Brescia, and Vicenza fall to troops of the Fifth Army. The soldiers learn that Italian dictator Benito Mussolini has been executed by partisans near Lake Como.

April 28–30

AVIATION: Off Okinawa, Ryukyu Islands, repeated kamikaze attacks damage an additional 15 warships.

April 29

AVIATION: Off Okinawa, a TBM Avenger launched from the escort carrier *Tulagi* sights and sinks Japanese submarine *I-44*.

MILITARY: Soldiers of the 42nd and 45th Infantry Divisions, Third Army, occupy the infamous death camp at Dachau, Germany, and liberate 30,000 starving captives.

- From Caserta, Italy, the 1st Armored Division draws nearer to Milan, while the 91st Infantry Division, acting in concert with the South African 6th Armored Division, storms across the Brenta River and advances upon Treviso. The German commander of Army Group Southwest also declares his intention to surrender unconditionally as of May 2.

April 30

MILITARY: At Eilenburg, Germany, General Courtney H. Hodges meets the commander of the Soviet 5th Guard Army along the banks of the Mulde River. The First Army then makes preparations to remove itself from the theater and deploy to the Pacific. Adolf Hitler commits suicide in his bunker and is succeeded by Grand Admiral Karl Doenitz of the German navy.

- In northern Italy, the 92nd Division advances unopposed upon Turin and links up with French mountain troops on the border while the 10th Mountain Division silences enemy resistance around Lake Garda. To the west, 85th and 91st Infantry Divisions, IV Corps, take Treviso, north of Venice, while Milan falls to the 1st Armored Division.

NAVAL: Off the Virginia Capes, German submarine *U-879* is detected and sunk by the destroyer escorts *Thomas*, *Bostwick*, *Coffman*, and *Natchez*.

- Off Brest, France, German submarine *U-1107* is sighted and sunk by a PBV Catalina belonging to VP-63.

**Darby, William O. (1911–1945)***Army officer*

William Orlando Darby was born in Fort Smith, Arkansas, on February 18, 1911, and, in 1933, he graduated from the U.S. Military Academy as a second lieutenant of artillery. He performed routine service over the next seven years, rising to captain in September 1940. Shortly following American entry into World War II, Darby came to the attention of Colonel Lucian K. Truscott, who was recruiting volunteers for his new ranger program. These troops were envisioned as elite, soldiers deployed in small units and using hit-and-run tactics, not unlike the rangers led by Major Robert Rogers of French and Indian war fame. Darby enthusiastically embraced the project, advanced to major, and accompanied Truscott to northern Ireland to train with the famous British commandos. Darby had his baptism of fire during the ill-fated British-Canadian landing at Dieppe, France, in August 1942, and he rose to lieutenant colonel commanding the 1st Ranger Battalion. He led the battalion into action at Gafsa-El Guettar, Tunisia, on March 21, 1942, completely routing the German defenders. Consequently, his force was expanded into a brigade and spearheaded General George S. Patton's drive against Gela, Sicily, in July 1943. The Germans counterattacked sharply with tanks and, at one point, Darby found himself manning a 37mm cannon in the front ranks. He knocked out several German vehicles at close range and a Distinguished Service Cross with Oak Clusters was conferred to him. Two months later, Darby's rangers deployed at Salerno, Italy, where they seized important objectives prior to

the main landing. The German reaction was swift, however, and Darby found his rangers deployed for several weeks as conventional infantry, during which they sustained heavy losses.

On January 22, 1944, Darby's men went ashore at Anzio in an attempt to break the stalemate in Italy. General John P. Lucas instead chose to consolidate his beachhead, which allowed German forces to solidify their defenses and hem the Allies in. Six days later, Darby's First and Third Battalions were sent ahead to seize the important road junction at Cisterna, while he remained in reserve with the 4th Battalion. Unfortunately, the Germans had been anticipating such a move and they ambushed the lightly armed rangers with tanks of the Hermann Göring Panzer Division. Darby's rangers lost two-thirds of their men and the survivors were distributed among General Robert T. Frederick's First Special Service Force. Bereft of a command, Darby shipped back to Washington, D.C., in April 1944 as a staff officer. Longing to be in combat, he returned to Europe on routine duty and managed to wrangle a position as executive officer in the 10th Mountain Division during the final days of the war in Italy. On April 30, 1945, he was killed by shell fragments just one week short of Germany's capitulation. In recognition of his role in advancing ranger tactics, Darby received a posthumous promotion to brigadier general, the only American soldier so honored. Since World War II, ranger-type formations have become a staple of the U.S. Army doctrine.

MARINES: On Okinawa, Ryukyu Islands, the 27th Infantry Division is replaced on line by the 1st Marine Division; simultaneously, the 96th Infantry Division is replaced by the 77th Infantry Division.

May 1

AVIATION: On their final bombing foray of the war, B-17s of the Fifteenth Air Force ignore poor flying conditions and strike marshaling yards at Salzburg, Austria.

- In Chungking, China, Lieutenant General George E. Stratemeyer assumes command of the Tenth and Fourteenth Air Forces. He directs his medium bombers and fighter to interdict Japanese ground units as they withdraw from southern China.

MILITARY: The Fifth Army under Lieutenant General Lucian K. Truscott fans out across northern Italy by clearing German troops in the Piave and Brenta Valleys in preparation for a final drive up the Brenner Pass and into Austria.

NAVAL: On Tarakan Island, Borneo, Rear Admiral Forrest B. Royal of Task Group 78.1 lands Australian troops while covered by the guns of Rear Admiral Russell S. Berkey's Task Force 74.3.

MARINES: On Okinawa, the 1st Marine Division and 5th Marine Division complete the conquest of the northern end of the island, then align themselves on either flank of the Army XXIV Corps to attack the Shuri Line.

May 1–7

AVIATION: Operation Chowhound unfolds as Allied bombers deliver 8,000 tons of food to starving civilians in the Netherlands. An agreement had been previously reached with the Germans to proceed without interference.

NAVAL: Task Group 78.1 under Rear Admiral F. B. Royal transports the 26th Brigade, 9th Australian Division to Tarakan, a small island off the coast of Borneo. The conquest is completed by June 14.

May 2

AVIATION: Several German missile engineers, including Wernher von Braun, turn themselves over to the Americans near the Austrian border. Many of them are secretly transferred to Fort Bliss, Texas, as part of an effort to transfer V-2 technology to the United States. This is essential because the Red Army has occupied the German rocket test grounds at Peenemunde. During the war, the Germans fired off an estimated 20,000 V weapons, including 2,700 V-2 weapons against England and western Europe.

MILITARY: The Germans surrender in Italy, ending 604 days of nonstop fighting for the Fifth Army since the attack on Salerno in 1943.

NAVAL: During intense ground fighting on Okinawa, Hospital Apprentice Second Class Robert E. Bush is administering aid to a wounded Marine when he is attacked by Japanese soldiers. Grabbing his carbine, Bush shoots down six of his attackers, losing an eye in the process, but he refuses to be evacuated until the wounded Marine is tended to; he wins a Medal of Honor.

MARINES: On Okinawa, the 1st Marine Division begins butting up against the second tier of Japanese Shuri Line defenses.

May 3

AVIATION: After Rangoon, Burma, is recaptured by Allied forces, the Tenth Air Force is ordered to disengage and concentrate its assets at Piardoba, India. Only

a single P-38 squadron remains behind to patrol and protect the Burma Road into southern China.

- Off Okinawa, Ryukyu Islands, Marine F4U Corsairs intercept a large force of Kamikazes approaching at sunset, shooting down 60 airplanes.

MILITARY: At Augsburg, Germany, elements of the Seventh Army (103rd Infantry Division, 411th Regimental Combat Team) begin driving down the Brenner Pass in order to establish direct contact with soldiers of the Fifth Army, then pressing northward. Concurrently, the XV Corps advances toward Salzburg while the XXI Corps crosses the Austrian border into Bavaria and approaches Hitler's secluded hideout at Berchtesgaden.

NAVAL: Off Okinawa, kamikaze attackers sink the destroyer *Little* and the medium landing ship *LSM-195*; four other vessels suffer damage.

- In the Gulf of Siam, the submarine *Legarto* is sunk by the minelayer *Hatsutaka* after attacking a Japanese convoy.

May 4

MILITARY: In central Germany, the XIII Corps (Seventh Army) under major General Alvan C. Gillem, Jr., links up with the Soviet III Cavalry Corps. However, the 5th and 90th Infantry Divisions, Third Army, march into Soviet-designated areas of Czechoslovakia toward Prague, evoking a sharp protest.

- At Vipiteno, Italy, the 411th Regimental Combat Team moves through the Brenner Pass and makes contact with advanced elements of the 88th Infantry Division near the Austrian border.

- On Okinawa, Ryukyu Islands, the 27th Infantry Division replaces the 6th Marine Division, which heads south to the major battle area.

NAVAL: Off Okinawa, continuous kamikaze raids sink the destroyers *Luce* and *Morrison* with a loss of 300 men, while an additional 12 vessels are damaged.

May 5

AVIATION: A Japanese Fu-go bomb explodes near Lake View, Oregon, killing a woman and five children. They are the only wartime casualties suffered on U.S. soil during the war.

MARINES: On Okinawa, the 1st Marine Division reaches the northern banks of the Asa River, its first objective. Meanwhile, the Tenth Army directs the III Amphibious Corps to assume gradual control of the right half of the Shuri frontlines.

May 6

NAVAL: Off Block Island, Rhode Island, German submarine *U-853* is detected and sunk by the destroyer escort *Atherton* and the frigate *Moberley*.

- In the North Atlantic, German submarine *U-881* is detected and sunk by the destroyer escort *Farquhar*; this is the last German vessel destroyed by American forces before the war ends in Europe.

MARINES: On Okinawa, the 1st Marine Division begins reducing the Awacha Pocket in heavy fighting.

May 7–8

MILITARY: German field marshal Alfred Jodl formally surrenders at Reims, France, effective May 9; General Dwight D. Eisenhower accepts on behalf of the Allied powers. American casualties sustained from landing in France to entering

Germany total 114,000. Victory in Europe is proclaimed by President Harry S. Truman. May 8 passes into history as V-E Day.

MARINES: Base Post-War Plan No. 1 is approved by Admiral Ernest J. King, which mandates a Fleet Marine Force for the Pacific region; this consists of a division and an aircraft wing in California, plus a brigade and an aircraft group in the western Pacific.

May 8

AVIATION: All combat missions halt over Europe, although the Twelfth Air Force continues flying evacuation and supply missions.

MILITARY: The day before World War II in Europe ceases, General Dwight D. Eisenhower commands 60 American divisions, assisted by 13 British, five Canadian, 10 French, and one Polish. Some American formations are slated for immediate transfer to the Pacific Theater of Operations for fighting against Japan.

MARINES: On Okinawa, Ryukyu Islands, the 6th Marine Division aligns itself on the Asa River, positioning itself between the 1st Marine Division and the western coastline.

May 9

MILITARY: All combat operations in the European Theater of Operations cease and the Allied occupation of Central Europe begins.

NAVAL: Off Okinawa, the destroyer escort *Oberrender* is struck by several kamikazes and sunk.

MARINES: On Okinawa, Ryukyu Islands, a foot bridge is constructed over the Asa River by the 6th Engineer Battalion; the Japanese destroy it by morning but not before four companies of the 22nd Marines cross over.

May 10

AVIATION: The potential for heavy casualties incurred by Japanese rocket-powered Oka suicide planes induces the Naval Aircraft Modification Unit to take Jet Assisted Take Off (JATO) units and modify them into Little Joe ship-to-air weapons.

- In England, Lieutenant General James H. Doolittle is relieved of command the Eighth Air Force and reassigned to Army Air Force Headquarters in Washington, D.C.; he is replaced by Major General William E. Kepner.

- A force of B-24s from the Eleventh Air Force successfully raids Japanese shipping at Kataoka naval base, Japan. Over Okinawa, a Marine F4U Corsair flown by Lieutenant Robert R. Klingman encounters a Japanese reconnaissance aircraft, and he cuts away the enemy's tail with his propeller once his guns jam.

- VMF (N)-533 is the first night fighting squadron to arrive on Okinawa after flying in from Eniwetok Atoll.

MARINES: On Okinawa, Ryukyu Islands, the Awacha Dam falls to the 5th Marines in heavy fighting.

May 11

NAVAL: Off Okinawa, the flagship and carrier *Bunker Hill* is struck by a bomb-laden kamikaze and suffers severe damage, but it manages to stay afloat and limps back to the United States. The ship loses 373 sailors killed and 264 wounded. Admiral Marc A. Mitscher is forced to transfer his flag to the carrier *Enterprise*.

Deck-level view of the kamikaze strike on the aircraft carrier USS *Bunker Hill*
(National Archives and Records Administration)

MARINES: On Okinawa, Ryukyu Islands, remaining Japanese resistance in the Awacha Pocket is eliminated by the 5th Marines

- As fighting rages on Okinawa, Pharmacists Mate Second Class William D. Halyburton throws himself on a wounded marine, shielding him with his body and suffering mortal wounds; he receives a posthumous Medal of Honor.

May 12

MARINES: On Okinawa, Ryukyu Islands, Japanese troops resist on a ridge dubbed the Sugar Loaf, the western anchor of their Shuri Line. The 22nd Marines attack, making little progress.

May 13–14

AVIATION: Admiral Marc A. Mitscher directs the carriers of Task Group 58.1 under Rear Admiral J. J. Clark and Task Group 58.3 under Rear Admiral Forrest P. Sherman to strike Japanese airfields on Kyushu and Shikoku, Japan, where many kamikaze attacks originate.

May 14

AVIATION: The Twentieth Air Force launches 472 B-29 heavy bombers—four complete bomb groups (58th, 73rd, 313th, and 314th)—against targets in north Nagoya; 11 aircraft are lost.

- Off Okinawa, a determined kamikaze strikes the carrier *Enterprise*, seriously damaging Vice Admiral Marc A. Mitscher's newest flagship.

MILITARY: President Harry S. Truman appoints General Omar N. Bradley as chief of the Veterans Administration. In a quiet but professional manner, he completely turns around the reputation of the agency, much to the relief of millions of veterans who rely on it.

May 16

AVIATION: On Luzon, Philippines, a force of 100 P-38s from the Far East Air Force makes the largest napalm attack of the entire war by striking Japanese targets in the Ipo Dam area.

- Over Okinawa, Lieutenant Robert Wellwood, VMF (N)-533, bags three Japanese aircraft at night.

NAVAL: In the Malacca Straits, the Japanese heavy cruiser *Haguro* is sunk by five British destroyers; this is also the final surface action of World War II.

MARINES: On Okinawa, after six days of bloody combat, the Sugar Loaf falls to an attack by the 29th Marines.

May 17

AVIATION: A force of 478 B-29 heavy bombers strikes southern Nagoya, Japan, in the pre-dawn darkness.

May 18

AVIATION: At North Field, Tinian, the super-secret 509th Composite Group lands its specially equipped B-29s and begins flying training missions relative to delivering the atomic bomb.

NAVAL: The destroyer *Longshaw* runs aground at Naha, Okinawa, and is shelled by Japanese artillery batteries; 86 men are killed when the forward magazines explode.

May 19

AVIATION: Hamamatsu, Japan, is struck by 272 B-29 heavy bombers belonging to the Twentieth Air Force.

MARINES: On Okinawa, the 4th and 22nd Marines tackle the Horse Shoe, another formidable strongpoint just beyond the newly conquered Sugar Loaf.

May 21

AVIATION: Advanced elements of Marine Air Group 22 begin landing on Ie Shima, Ryukyu Islands, to support the Tenth Army on Okinawa.

MILITARY: At Le Havre, France, Headquarters, First Army, begins processing units for their transfer to the Pacific, specifically, the forthcoming invasion of Japan.

- On Okinawa, advances by the 96th Infantry Division and the 6th Marine Division force Japanese defenders to begin abandoning the Shuri Line; they skillfully extricate themselves and occupy final defensive positions along the Yaeju Dake Escarpment.

May 22-24

MILITARY: On Okinawa, inclement weather slows down American offensive operations against the Japanese Shuri Line and both sides stop to consolidate

their positions. The Army 7th Infantry Division subsequently pushes into the Yonabaru Valley while Marines advance to capture the capital of Naha.

May 23–24

AVIATION: The Twentieth Air Force dispatches 562 B-29 heavy bombers against industrial targets on the west side of Tokyo Harbor; this is the largest single B-29 raid of the war and 17 bombers are lost.

May 24

AVIATION: Six Japanese transports carrying commandos attempt to land on Yontan Airfield, Okinawa, to disrupt operations; five are shot down, but the survivors land and destroy eight aircraft before being killed.

- Over Okinawa, Lieutenant Albert F. Dellamano, VMF (N)-533, flames three Japanese intruders at night.

May 25

AVIATION: With victory in sight, the wartime production of American military aircraft is slashed by 30 percent.

- Tokyo, Japan, is raided again by a force of 464 B-29 heavy bombers belonging to the Twentieth Air Force and 26 aircraft go down; this is the largest single loss suffered by B-29s during the war. Meanwhile, the VII Fighter Command on Iwo Jima is assigned to the Twentieth Air Force.
- Over Okinawa, Marine F4U Corsairs shoot down 39 Japanese kamikazes from a total force of 75 attacking the U.S. fleet.

MILITARY: In Washington, D.C., the initial plan for the invasion of Japan is completed and reviewed by the Joint Chiefs of Staff. It consists of Operation Olympic, the invasion of Kyushu on November 1, followed by Operation Coronet, the reduction of the main island of Honshu, on March 1, 1946. Bloody fighting and heavy casualties on both sides are anticipated.

NAVAL: Off Okinawa, kamikazes attack and sink the high-speed transport *Bates* and the medium landing ship *LSM-135*; a further seven vessels sustain heavy damage.

May 26

MILITARY: In Manila, Philippines, Lieutenant General Courtney Hodges arrives with the headquarters section of the First Army. He begins planning for a major role in Operation Coronet, the invasion of Honshu, the following spring.

MARINES: On Okinawa, Japanese troops reposition themselves along their third and final line of defense along the Kiyamu Peninsula. This is despite a terrific pounding by American artillery, air strikes, and naval gunfire.

May 27

NAVAL: Off Okinawa, Admiral William F. Halsey succeeds Vice Raymond Spruance as commander of the Fifth Fleet and it is subsequently redesignated the Third Fleet. Vice Admiral John S. McCain also replaces Rear Admiral Marc A. Mitscher as commander of Task Force 38.

MARINES: On Okinawa, the capital Naha falls to an attack by the 6th Marine Division.

May 28

AVIATION: Above Okinawa, waves of kamikazes are intercepted by navy and marine fighters; the latter claims 32 of 49 Japanese aircraft downed.

NAVAL: Off Okinawa, Ryukyu Islands, the destroyer *Drexler* is struck by several kamikazes; the vessel explodes, rolls over, and sinks with a loss of 168 dead and 52 injured.

May 29

AVIATION: The Twentieth Air Force resumes firebombing attacks by dispatching 454 B-29 heavy bombers against targets in Yokohama, Japan. The mission is escorted by 190 P-51s from VII Fighter Command on Iwo Jima. Stiff resistance claims seven bomber and three fighters.

MARINES: In Washington, D.C., President Harry S. Truman authorizes an increase in Marine Corps manpower to 503,000.

- On Okinawa, Ryukyu Islands, the 5th Marines storm Shuri Ridge and take Shuri Castle against light opposition.

May 30

NAVAL: Off Okinawa, Ryukyu Islands, a TBM Avenger launched from the escort carrier *Anzio* detects and sinks Japanese submarine *I-361*.

May 31

MARINES: On Okinawa, Japanese defenders in the Wana Draw are eliminated by the 1st Marine Division.

June 1

AVIATION: Osaka, Japan, is the target of 458 B-29 heavy bombers of the Twentieth Air Force, of which 10 are shot down. The escort of 148 fighters is disrupted by heavy turbulence and only a handful accompany the bombers.

NAVAL: The escort carrier *Gilbert Islands* and its marine squadron anchor off Okinawa and join the fleet.

June 2

AVIATION: Task Group 38.4 under Rear Admiral Arthur W. Radford unleashes large-scale carrier aircraft raids against Japanese airfields on Kyushu.

MILITARY: Command of the Seventh Army passes to Major General Wade H. Haislip after Lieutenant General Alexander M. Patch is ordered back to the United States.

MARINES: On Okinawa, Ryukyu Islands, the 8th Marines take the northern point at Iheya Shima and install an early warning radar there.

June 3

AVIATION: The ninth Japanese kamikaze raid off Okinawa is only marginally productive, damaging only two minesweepers and a landing craft.

MARINES: The small island of Aguni Shima, west of Okinawa, is occupied by the 8th Marines, who erect an early warning radar there.

June 4

MARINES: On Okinawa, Ryukyu Islands, the Oroku Peninsula on the southwest part of the island is the object of an amphibious assault by the 6th Marine Division.

June 5

AVIATION: The Twentieth Air Force launches 473 B-29 heavy bombers loaded with incendiaries against targets in Kobe, Japan, and four square miles of the city are reduced to ashes; 11 bombers are shot down.

MILITARY: The United States, Great Britain, France, and the Soviet Union divide Central Europe into postwar occupation zones. The city of Berlin, deep within the Soviet zone, is also divided among the victors.

NAVAL: Off Okinawa, the Third Fleet under Admiral William F. Halsey is again badly battered by a typhoon, which causes heavy damage to four battleships, eight carriers, seven cruisers, and numerous smaller vessels. Halsey and his subordinate, Vice Admiral John S. McCain, are subsequently found negligent in not taking adequate precautions to avoid the storm.

June 6

NAVAL: At Annapolis, Maryland, the U.S. Naval Academy, class of 1946, graduates one year early to assist the war effort.

MARINES: On the Oroku Peninsula, Okinawa, Naha Airfield falls to the 4th Marines.

June 7

AVIATION: B-29s of the Twentieth Air Force strike targets in Osaka, Japan; this is also the first mission to utilize radar bombing technology and 55,000 buildings are destroyed. Meanwhile, the Shimonoseki Strait is mined by other B-29s.

- On Samar, Philippines, Marine Air Group 14 begins transferring its assets to Okinawa.

June 8

AVIATION: Task Group 38.4 under Rear Admiral Arthur W. Radford launches carrier air raids against Kanoya Airfield on Kyushu, Japan.

NAVAL: On Okinawa, Hospital Apprentice First Class Fred F. Lester aids a wounded marine on the battlefield and is critically wounded himself. Refusing medical aid, he tends the wounded marine until he dies, winning a posthumous Medal of Honor.

- Off the northern coast of Java, the British submarine *Trenchant* torpedoes and sinks the Japanese heavy cruiser *Ashigara*.
- The fast carrier *Bennington* is relieved off Okinawa, having been in continuous combat since February 16; the vessel takes the two remaining ship-borne marine squadrons home with it.

June 9

AVIATION: Armament factories in Akashi, Nagoya, and Narao, Japan, are struck by 100 B-29 heavy bombers.

- Soviet antiaircraft gunners shoot down an American B-25 bomber belonging to the Eleventh Air Force after it strays over the Kamchatka Peninsula; another is forced down in Petropavlovsk.

MILITARY: The Japan government releases a statement declaring its intention to fight to the death rather than accept unconditional surrender. Such recalcitrance sets in motion a chain of events that results in using atomic weapons against Hiroshima and Nagasaki.

June 9–20

NAVAL: Commander Earl T. Hydeman is ordered to commit his nine-submarine wolfpack, dubbed “Hydeman’s Hellcats,” against Japanese vessels in the Sea of Japan. Over the next three weeks they claim 54,578 tons of shipping at the cost

of one submarine, the *Bonefish*, lost in action. This proves one of the most successful patrols of the war.

June 10

MILITARY: On Okinawa, Lieutenant General Simon B. Buckner offers surrender terms to Lieutenant General Ushijima Mitsuru, who fails to respond.

NAVAL: Off Brunei Bay, Borneo, Task Group 78.1 under Admiral Forrest P. Royal lands part of the 9th Australian Division of Major General W. T. Wooten. They are covered by the guns of Rear Admiral Russell S. Berkey's Task Group 74.3.

- Off Okinawa, Ryukyu Islands, the destroyer *William D. Porter* is badly damaged by a kamikaze and its crew is rescued by the landing craft *LCS (L)-122* before it sinks.

June 11

AVIATION: On Tinian, specially modified B-29 aircraft (Silverplate) belonging to the Top Secret 509th Composite Group begin arriving at Tinian. These have had new propellers fitted, gun turrets removed, and special radio and monitoring equipment installed.

NAVAL: Off Okinawa, landing craft *LCS (L)-122* is struck by a kamikaze and the commanding officer, Lieutenant Richard M. McCool, is severely wounded, but he refuses to quit his post and helps free men trapped in a burning compartment. He wins the Medal of Honor.

MARINES: On Okinawa, Japanese troops along the Kunishi Ridge defy an advance by the 1st Marine Division; these defense serve as the western anchor of their final defensive line along the Kiyamu Peninsula. This evening a surprise attack by the 7th Marines captures part of the crest, but the Japanese hold out for several more days.

June 13–14

MARINES: On Okinawa, Japanese defenders on the Oroku Peninsula are eliminated by the 6th Marine Division while the 1st Marine Division storm Kunishi Ridge in a daring night assault. Despite the collapse of their final line of defense, Japanese resistance is as fierce as ever.

June 14

AVIATION: In Washington, D.C., the Joint Chiefs of Staff are instructed to draw up contingency plans for the occupation of Japan should the war end suddenly.

June 14–15

MILITARY: At Braunschweig, Germany, the Ninth Army under Lieutenant General William H. Simpson turns over all garrison functions to the Seventh Army as it prepares to redeploy to the Pacific theater.

June 15

AVIATION: Osaka, Japan, is hit by 44 B-29 heavy bombers, who conduct the final firebombing of the war against a large city.

MILITARY: The Supreme Headquarters of the Allied Expeditionary Forces (SHAEF) declares that the Third Army (General George S. Patton) and the Seventh Army (General Wade S. Haislip) are designated occupation armies for captured territory under American jurisdiction.

MARINES: On Okinawa, the 8th Marines are landed and attached to the 1st Marine Division.

June 16

NAVAL: At Patuxent River, Maryland, the Naval Air Test Center is founded.

- Off Okinawa, Ryukyu Islands, the destroyer *Twiggs* is sunk by a Japanese aerial torpedo, becoming the 12th destroyer lost in this campaign. All 22 of its officers are either killed or wounded in this action.

MARINES: On Okinawa, the remaining Japanese defenders on Kunishi Ridge are eliminated by the 1st Marine Division.

June 17

MILITARY: In severe fighting, the XXIV Corps storms the high ground along the Yaeju Dake–Yuza Dake Escarpment.

June 17–18

AVIATION: The Twentieth Air Force switches its targeting priorities by sending 450 B-29 heavy bombers loaded with incendiaries against smaller Japanese cities such as Omuta, Hamamatsu, Yokkaichi, and Kagoshima. Other aircraft sow the waters off Kobe and Shimonoseki with mines.

- Seventh Air Force P-47 and P-61 fighters begin day and night intruder missions over Kyushu and the Ryukyu Islands.

June 18

MILITARY: As the Battle of Okinawa rages, Lieutenant General Simon B. Buckner is killed when his observation post is struck by a Japanese shell; he is the most senior army officer to fall in the Pacific.

MARINES: The 2nd Battalion, 5th Marines is supported by tanks as it stamps out the few remaining Japanese defenders along Kunishi Ridge.

June 19

AVIATION: At Wright Field, Ohio, Dr. Frank L. Wattendorf of the Army Air Force Scientific Advisory Group suggests that an aeronautical research center be constructed near a cheap source of electricity. In 1950 it emerges as the Arnold Engineering Center, Tullahoma, Tennessee.

MARINES: On Okinawa, Major General Roy S. Geiger is promoted to lieutenant general and ordered to take charge of the Tenth Army; he is also the first marine to command a field army.

June 19–20

AVIATION: The Twentieth Air Force dispatches B-29 heavy bombers against Toyohashi, Fukuoka, and Shizuoka while mining operations continue around the mainland.

June 21

AVIATION: A final Japanese kamikaze attack against the U.S. fleet off Okinawa succeeds in sinking a landing ship and damaging four other vessels.

MILITARY: Fanatical military resistance finally ends on Okinawa after the Tenth Army suffers 7,613 killed and 31,807 wounded, almost equally divided between army troops and marines. Japanese losses amount to 107,500 killed and 7,400 captured.

NAVAL: Although fighting on Okinawa has subsided, this day kamikaze attacks sink another U.S. vessel and damage four others. The 89-day campaign has cost

36 ships sunk and 243 damaged, along with over 4,900 sailors killed and 4,824 wounded, making this the most costly campaign in navy history.

MARINES: On Okinawa, Ryukyu Islands, the 1st Marine Division storms atop Hill 81 while the 6th Marine Division sweeps into the southernmost parts of that embattled island. Organized Japanese resistance collapses at this juncture and Lieutenant General Roy S. Geiger declares Okinawa secure; mopping up operations, however, continue for several more weeks. The final tally for the conquest of Okinawa is: 3,443 killed and 16,017 wounded. Nearly the entire Japanese garrison of 100,000 is wiped out and their commander, General Mitsuru Ushijima, commits ritual suicide rather than be captured.

June 22

AVIATION: Heavy bombers attached to the Far East Air Force strike Japanese positions at Balikpapan, Borneo, in anticipation of an Allied landing there.

- The naval arsenal at Kure, Japan, is the object of 300 B-29s from the Twentieth Air Force.

June 23–27

MILITARY: Near Aparri, Luzon, Philippines, the 511th Airborne Infantry drops behind Japanese lines to cooperate with Filipino guerrilla units and pushes forward to link up with the 37th Infantry Division four days later.

June 26

AVIATION: The Twentieth Air Force dispatches 450 B-29 heavy bombers against industrial targets in the city of Tsu, Japan.

June 27

NAVAL: East of Saipan, a PV-1 Ventura from VPB-142 detects and sinks Japanese submarine *I-16*.

June 28–29

AVIATION: A force of 487 B-29 heavy bombers strikes targets in Okayama, Sasebo, Moji, and Nobeoka, Japan, with incendiary bombs.

June 30

AVIATION: On Tinian, Marianas Islands, planes and crews of the 509th Composite Group begin training missions with flight profiles mimicking those of an atomic bomb strike. These entail dropping 10,000-pound practice bombs affectionately called pumpkins.

MILITARY: Since 1940 to date, American industry has cranked out 17.4 million firearms, 315,000 artillery weapons, 86,388 tanks, and 297,000 aircraft. The “Arsenal of Democracy” proved a decisive factor in Allied victory.

- Mindanao, southern Philippines, is secured by the 24th Infantry Division, although the X Corps will conduct mopping up operations for several months.

MARINES: At this juncture of the war, Marine Corps strengths registers at 37,067 officers and 437,613 enlisted men.

July 1

AVIATION: The Twentieth Air Force unleashes 530 B-29 heavy bombers loaded with incendiaries against industrial targets in Ube, Kure, Shomonoseki, and Kumamoto, Japan. The aerial mining campaign also continues in Japanese waters.

- Fighters and bombers of the Far East Air Force supply close air support to Australian units as the landing at Balikpapan, Borneo, unfolds.

MILITARY: In Washington, D.C., command of Army Ground Forces passes to General Jacob L. Devers.

- The campaign on Luzon is declared over and the Sixth Army turns over all garrison responsibilities to the Eighth Army and prepares to ship out as part of Operation Olympic, the invasion of Kyushu, planned for the fall.

NAVAL: At Balikpapan, Borneo, Task Group 78.2 under Rear Admiral Albert G. Noble lands the 7th Australian Division of Major General E. J. Milford ashore. This constitutes the center of Japanese oil production in the occupied Netherlands East Indies.

- Task Force 38 under Vice Admiral John S. McCain departs Leyte Gulf to begin protracted operations in Japanese home waters.

MARINES: On Okinawa, the 8th Marines embarks to rejoin the 2nd Marine Division on Saipan.

July 2

NAVAL: Off Kaiyho Island, Kuriles, the submarine *Barb* surfaces and bombards shore installations in the first American use of marine-launched, surface-to-surface missiles.

July 3

AVIATION: The Fifth Air Force commits its first fighter sweeps over the Japanese mainland.

- The Twentieth Air Force dispatches 560 B-29 heavy bombers loaded with incendiaries against industrial targets in Kochi, Himeji, Takamatsu, and Tokushima, Japan.

July 4

MARINES: On Okinawa, the 6th Marine Division embarks and sails for Guam.

July 5

MILITARY: After 10 months of intense fighting and the loss of 12,000 soldiers, General Douglas MacArthur completes his reconquest of the Philippines. The Japanese sacrificed an estimated 400,000 soldiers to hold it.

July 6

AVIATION: The Twentieth Air Force launches 517 B-29 heavy bombers to firebomb industrial targets in Chiba, Akashi, Shimizu, and Kofu, Japan.

July 7

NAVAL: President Harry S. Truman boards the heavy cruiser *Augusta* on the first leg of his voyage to Potsdam, Germany, to meet with Prime Minister Winston Churchill and Soviet premier Joseph Stalin.

July 9

AVIATION: The cities of Sendai, Sakai, Gifu, and Wakayama are firebombed by Twentieth Air Force B-29s, with an additional 60 aircraft hitting the oil refinery at Yokkachi.

July 10

NAVAL: Vice Admiral John S. McCain directs Task Force 38 in launching carrier strikes against Japanese airfields in Tokyo. Resistance is light as the Japanese are husbanding their aerial strength for a defense of the homeland.

July 12

AVIATION: A force of 453 B-29 heavy bombers is launched by the Twentieth Air Force to firebomb Utsonomiya, Ichinomiya, Tsuruga, and Uwajima while a further 53 aircraft strike petroleum centers at Kawasaki.

July 13

AVIATION: In New Mexico, the White Sands Proving Grounds officially opens as the center of rocket research and development.

MARINES: On Okinawa, Ryukyu Islands, many units of III Amphibious Corps embark on ships for redeployment to Guam. Only the 1st Marine Division, corps artillery, and the 1st Armored Amphibian Battalion remain behind and are rehabilitated in camps on the Motobu Peninsula.

July 14

AVIATION: The Seventh Air Force is formally accepted as part of Far East Air Forces (FEAF). The entire force relocates to Okinawa within the next two weeks.

MILITARY: Supreme Headquarters Allied Expeditionary Forces (SHAEF) is disbanded and General Dwight D. Eisenhower, no longer “Allied commander,” issues a final message of thanks to his men. He serves as commanding general, United States Forces in Europe (USFET) and military governor for the next few months.

NAVAL: Task Unit 34.81 under Rear Admiral John F. Shafrorth begins the first shore bombardment of the Japanese homeland by shelling the Japan Iron Company at Kamaishi on Honshu. The battleships *Indiana*, *Massachusetts*, and *South Dakota*, and the heavy cruisers *Chicago* and *Quincy* are closely engaged and the plant is wiped out.

July 14–15

AVIATION: Task Force 38 under Vice Admiral John S. McCain launches carrier strikes against Japanese shipping in and around northern Honshu and Hokkaido. This area had been located beyond B-29 range and sustains heavy damage after 1,391 sorties.

NAVAL: Task Unit 38.8.2 under Rear Admiral Oscar P. Badger conducts the first ship bombardment of Muroran, Hokkaido, knocking out the Nihon Steel Company. The large and modern battleships *Iowa*, *Missouri*, and *Wisconsin* are all involved in this action. A ring of steel is slowly closing around the Japanese homeland.

July 15

MARINES: On Guam, the III Amphibious Corps is ordered detached from the Tenth Army and placed under the command of Fleet Marine Force, Pacific.

July 16

AVIATION: At Harmon Field, Guam, Major General Curtis LeMay is appointed commander of the Twentieth Air Force; prior to this it had been controlled by the Joint Chiefs of Staff and General of the Army Henry H. Arnold. At this time General Carl A. Spaatz also assumes control of the U.S. Army Strategic Air Force in the Pacific.

- The Twentieth Air Force directs 466 B-29 heavy bombers against Numazu, Oita, Kuwana, and Hiratsuka, Japan.

TECHNOLOGY: A seminal moment in human history unfolds as American scientists explode the “Gadget,” the first atomic bomb, near Alamogordo, New Mexico, under the direction of physicist J. Robert Oppenheimer. The total yield is an impressive 19 kilotons (19,000 tons of TNT) and the ensuing mushroom cloud reaches 35,000 feet in altitude. However, Klaus Fuchs, a leading scientist on the project, is actually a Soviet spy, who promptly relays the requisite technical data to the Russians; the Soviet A-bomb will emerge in 1949.

NAVAL: A TBM Avenger launched from the escort carrier *Anzio* assists the destroyer escort Lawrence C. Taylor in sinking the *I-13* off Yokohama, Japan.

July 17–18

AVIATION: Task Force 38 under Rear Admiral John S. McCain launches carrier air strikes against Japanese targets around Tokyo Bay and Yokosuka Naval Base.

NAVAL: Task Unit 34.8.2 under Rear Admiral Oscar C. Badger, once reinforced by the battleships *Alabama* and *North Carolina*, bombards industrial targets at Hitachi, Japan, only 80 miles north of Tokyo.

July 17–August 2

MILITARY: At Potsdam, Germany, President Harry S. Truman attends the vitally important Big Three Conference on the fate of postwar Europe. A familiar face, Prime Minister Winston Churchill, is conspicuously missing, having been defeated in an election by Clement Attlee. During the proceedings, Truman is alerted of the successful atomic bomb test in New Mexico; Soviet premier Joseph Stalin, who has an extensive spy network at Los Alamos, is also kept abreast of developments.

July 19–20

AVIATION: A force of 420 B-29 heavy bombers from the Twentieth Air Force strikes oil facilities at Amagasaki, Japan, along with the cities of Fukui, Hitachi, Choshi, and Okazaki.

July 20

AVIATION: At North Field, Tinian, B-29s of the super-secret 509th Composite Group begin conducting military operations to gain experience over target areas in Japan for the forthcoming drop of the atomic bomb.

July 23

MILITARY: On Okinawa, Lieutenant General Joseph W. Stilwell arrives to take command of the Tenth Army for the future invasion of Japan.

July 24

AVIATION: A force of 570 B-29 heavy bombers from the Twentieth Air Force strikes at industrial targets at Hondo, Nagoya, and Takarazuka. Osaka, Tsu, and Kawana are likewise hit.

NAVAL: Task Force 38 under Rear Admiral John S. McCain launches carrier strikes against naval bases at Kure and Kobe, Japan, damaging 16 vessels and sinking the hybrid battleship-carrier *Hyuga*, the battleships *Haruna* and *Ise*, and heavy cruisers *Tone* and *Aoba*. This is one of the heaviest and most destructive carrier raids of the entire war.

- Off Luzon, Philippines, Japanese *kaitens* (suicide submarines) released by Japanese submarine *I-153* strike the destroyer *Underhill*, which sinks with a loss of 112 lives.

July 25

MILITARY: The U.S. military government in Germany summarily bans military training for Germans, and also outlaws Nazi salutes, uniforms, and music.

- The United States, Great Britain, and China issued the Potsdam Declaration, demanding Japan's unconditional surrender. Japanese militarists controlling the government scoff at the notion despite veiled hints at "utter destruction" through the newly developed atomic bomb.

July 26

NAVAL: The cruiser *Indianapolis* docks at Tinian, Marianas Islands, and delivers the components for the atomic bomb nicknamed "Fat Boy."

July 27

AVIATION: A force of 350 B-29 heavy bombers from the Twentieth Air Force strikes targets at Matsuyama, Tokuyama, and Omuta, Japan.

July 28

AVIATION: A North American B-25 Mitchell bomber accidentally crashes into the 79th floor of the Empire State Building, New York City, during a foggy morning; 19 people are killed and 29 injured.

- The Twentieth Air Force unleashes 471 B-29 heavy bombers against Tsu, Aomori, Ichinomiyu, Ujiyamada, Ogaki, and Uwajima, Japan. The oil refineries at Shimotsu are also singled out by a force of 76 additional bombers.
- Off Okinawa, Ryukyu Islands, the destroyer *Callaghan* is struck by kamikazes and sinks with a loss of 120 crewmen; this is the 13th and last vessel lost to suicide aircraft.

July 29

AVIATION: Far East Air Forces aircraft from Okinawa and Ie Shima are unleashed on a number of targets on the Japanese mainland; Douglas A-26 Invaders debut by raiding a naval base and engine works in Nagasaki.

- On Okinawa, newly arrived VMB-612 conduct their first missions against enemy shipping off Kyushu, Japan.

NAVAL: Task Force 38 under Rear Admiral John S. McCain launches air strikes against Maizuru Naval Base on Honshu, sinking three small vessels and 12 merchant ships.

July 30

NAVAL: At Singapore, the Japanese heavy cruiser *Takao* is sunk by the British midget submarines XE-1 and XE-3. The vessel was undergoing repairs sustained during an earlier American air attack.

July 30–August 2

NAVAL: The heavy cruiser *Indianapolis*, having just delivered the atomic bomb to Tinian, Marianas Islands, is torpedoed by Japanese submarine *I-58* under Lieutenant Commander Mochitsura Hashimoto. The ship sinks before distress signals can be transmitted and 800 survivors spend the next several days in

shark-infested waters. Only 316 men are rescued by seaplanes and Captain Charles B. McVay III is court-martialed for failing to zig-zag as a precaution against enemy submarines.

July 31

MILITARY: In Germany, the 12th Army Group (First, Third, and Seventh Armies) under General Omar N. Bradley is disbanded and command of American ground troops passes to United States Forces, European Theater (USFTF).

August 1

AVIATION: At Harmon Field, Guam, Lieutenant General Nathan F. Twining becomes commanding officer of the Twentieth Air Force.

- The Twentieth Air Force dispatches a record 825 B-29 bombers from bases in the Marianas, which unload a record 6,520 tons of bombs on various targets on the Japanese homeland. This is the largest single B-29 sortie of the war but, to lessen losses, the raids are conducted at night.
- The escort carrier *Cape Gloucester* conveys several Marine Corps squadrons from Okinawa to the East China Sea, where they cover minesweeping operations and strike targets near Shanghai, China.

MILITARY: Lieutenant General Joseph W. Stilwell receives his fourth star to become a full general; he is the 17th officer to acquire such distinction during World War II.

August 2

AVIATION: In Washington, D.C., President Harry S. Truman signs the top-secret operational orders to drop an atomic device on the city of Hiroshima, southern Honshu, Japan. This is also the headquarters of Japanese units defending the large island of Kyushu.

- Major General Nathan F. Twining is appointed commander of the Twentieth Air Force while Major General Curtis E. LeMay serves as chief of staff with U.S. Strategic Air Forces, Pacific.

August 3

AVIATION: On Okinawa, VII Fighter Command launches 100 P-51 Mustangs on a major raid over Tokyo, Japan, especially hitting airfields and railways.

August 5

AVIATION: The Far East Air Force commences a widespread bombing campaign from Luzon, Philippines, to Kyushu, Japan, involving 330 aircraft.

August 5–6

AVIATION: As 470 Twentieth Air Force B-29 heavy bombers strike targets in Saga, Mae Bashi, Imabarri, and Nishinomiya-Mikage, a further 100 aircraft are detailed to strike the coke processing plant in Ube.

- On Okinawa, the VII Fighter Command is transferred to the Twentieth Air Force for the duration of the war.

August 6

AVIATION: In Burbank, California, Major Richard I. Bong, America's "Ace of Aces," is killed when his Lockheed P-80 Shooting Star flames out on takeoff and he is forced to eject at low altitude.

- Over Hiroshima, southern Honshu, the “Little Boy” weapon, packing 20 kilotons (20,000 tons) of explosives is delivered by Colonel Paul W. Tibbets, 508th Composite Group, whose B-29, christened *Enola Gay*, completes the difficult mission flawlessly. An estimated 70,000 people perish and the devastation shocks the Japanese public, but militarists controlling the government refuse to capitulate.
- On Iwo Jima, the Twentieth Air Force commits 100 P-51 Mustangs to strike targets in and around Tokyo, Japan.

NAVAL: During the *Enola Gay* mission, the Little Boy weapon is armed in flight by navy captain William S. Parsons. The submarine *Bullhead* is lost in action near the Lombok Strait, apparently due to a Japanese aircraft.

August 7

AVIATION: As Twentieth Air Force B-29s strike industrial targets in Kyushu, they are escorted by new, long-range P-47N fighters.

August 8

AVIATION: The combined wrath of Far East Air Forces and the Twentieth Air Force are unleashed against targets this Kyushu, Japan, while a further 60 B-29s hit targets this evening in Tokyo and Fukuyama.

MILITARY: As per a prior agreement with the United States, Soviet premier Joseph Stalin unleashes the Red Army against Japanese forces in Manchuria, routing them.

August 9

AVIATION: Marine PBJ (B-25) bombers belonging to VMB-413, 423, and 443, conduct their final air attacks against Japanese positions on Rabaul.

- In an attempt to force a Japanese surrender and spare that nation, and the United States, the prospects of a horrifically costly invasion, President Harry S. Truman orders a second atomic bomb dropped on Kokura. However, due to cloud cover the B-29 bomber *Bock's Car* under Major Charles W. Sweeney delivers the “Fat Boy” weapon against Nagasaki, which kills 20,000 people and devastates the city. Unlike the previous mission, Sweeney is plagued by overcast weather and a faulty fuel pump that forces him to make an emergency landing on Okinawa.

- A force of 95 B-29 heavy bombers is dispatched by the Twentieth Air Force to strike the Nippon Oil Refinery near Amagasaki, Japan. During this mission the Superfortresses are carrying 20,648 pounds of bombs and incendiaries apiece.

- Task Force 38 under Admiral John S. McCain unleashes carrier air strikes against airfields on northern Honshu, Japan, destroying a estimated 251 aircraft.

NAVAL: On *Bock's Car*, the Fat Man weapon is armed by U.S. Navy commander Frederick W. Ashworth.

August 10

AVIATION: In China, the legendary major general Claire L. Chennault is replaced by Major General Charles B. Stone as commander of the Fourteenth Air Force.

MILITARY: The Japanese government, reeling from two atomic bomb strikes, sends peace feelers to the Allies on the condition that the emperor be allowed to remain on the throne. After due consideration, the request is granted and the surrender terms are forwarded to General Douglas A. MacArthur.

MARINES: In light of Japan's surrender, the 6th Marine Division is ordered to provide regimental combat teams for the Third Fleet in the event occupation duties are required.

August 11

MARINES: Task Force Able, consisting of an infantry regiment, an amphibian tractor company, and a medical company, is drawn up for possible occupation duties in Japan.

August 12

NAVAL: At Buckner Bay, Okinawa, the battleship and Pearl Harbor survivor *Pennsylvania* is struck by a Japanese aerial torpedo; this is the last major American warship damaged in World War II.

MARINE: Separation centers are organized at Great Lakes, Illinois, and Bainbridge, Maryland, to hasten the demobilization of returning personnel.

August 13

AVIATION: Six B-24s belonging to the Eleventh Air Force make their final bomb runs of the war by striking targets at Kashiwabara, Japan, by radar.

- Task Force 38 under Rear Admiral John S. McCain launches carrier air strikes against Japanese airfields on the Kanto Plain, destroying an additional 254 aircraft. A further 18 warplanes are shot down by the American combat air patrol.

August 14–15

AVIATION: The Twentieth Air force mounts its largest sortie ever—754 bombers and 169 fighters—on a final wave of bombing raids against the Japanese mainland. Tonight 160 B-29s make the final incendiary raid of the war by attacking Kumagaya and Isezaki. A smaller sortie from the Marianas to Tsuchizakiminato covers 3,650 miles round-trip—the longest such mission of the entire war.

August 15

AVIATION: Task Force 38 under Rear Admiral John S. McCain launches the last air strike of the war, although news of the Japanese surrender forces the second wave to return to the fleet.

MILITARY: Japan surrenders unconditionally to the Allies. Emperor Hirohito, in an unprecedented move, goes on the airwaves for the first time to announce Japan's capitulation. The actual surrender date is September 2. General Douglas A. MacArthur is also informed that he has been named supreme commander of the Allied powers for the surrender and ensuing occupation.

NAVAL: Southeast of Shanghai, China, Japanese submarine *I-373* is torpedoed and sunk by submarine *Spikefish*.

MARINES: In order to execute an orderly demobilization process, the commandant and the undersecretary of the navy devise a point system based on deployment time overseas, combat awards, and young children to determine which men are separated from active duty first.

August 16

NAVAL: In Annapolis, Maryland, Vice Admiral Aubrey W. Fitch gains appointment as the 34th superintendent of the U.S. Naval Academy.

August 17

DIPLOMACY: The Korean Peninsula, currently occupied by Soviet forces, is divided along the 48th parallel into American southern and Russian northern halves.

August 18

AVIATION: Over Tokyo, Japan, a pair of Consolidated B-32 Dominators commit the final American reconnaissance of the war. They are attacked by Japanese fighters, which kill one American and wound two others while losing two aircraft to bomber defenses.

August 19

MILITARY: In Manila, Philippines, a Japanese surrender delegation arrives to help plan the occupation of their country by American forces.

MARINES: In Guam, Task Force 31 is organized for occupation duties in Japan and they are soon joined by the 4th Marines.

August 20

MILITARY: OSS agents operating near Sian, northeast Manchuria, locate Major General Jonathan M. Wainwright, who was captured at Bataan in April 1942. They also free four captured “Doolittle Raiders.”

- On Luzon, Philippines, Major General Robert S. Beightler, 37th Infantry Division, is tasked with collecting and processing Japanese prisoners of war for shipping them back home. Meanwhile, the 31st Infantry Division under Major General Clarence A. Martin assumes responsibility for Japanese captives on Mindanao.

August 21

MILITARY: In Washington, D.C., President Harry S. Truman officially terminates the Lend-Lease program, which had dispensed \$50 billion in military aid to the Allies.

NAVAL: On the Chinese coast between Haimen and Shanghai, a junk manned by Chinese guerrillas and American sailors under Lieutenant Livingston Swentzel, Jr., is attacked by a junk carrying Japanese troops. The Allies respond with a withering blast from machine guns, bazookas, and hand grenades, completely defeating their adversaries. Livingston wins the Medal of Honor.

August 25

MILITARY: In the Belluno-Agordo region of Italy, the 85th Infantry Division is the first army formation to be inactivated and troops are demobilized and sent home.

August 27

AVIATION: B-29s of the Twentieth Air Force begin air dropping supplies to prisoner of war camps in Japan, China, and Korea. Ultimately, 4,470 tons of food and supplies are delivered to 150 camps and the 63,000 inmates they house.

NAVAL: Admiral William F. Halsey conducts the Third Fleet into Sagami Wan outside Tokyo Bay, Japan.

August 28

MILITARY: At Atsugi Field, Yokohama, Japan, a fleet of C-54 transports begins airlifting the 11th Airborne Division as the first wave of military occupation commences. They are shortly joined by the 27th infantry Division.

MARINES: Task Force 31 enters Tokyo Bay, Japan, and anchors off Yokohama. It is an imposing armada stretching for miles.

August 29

AVIATION: A B-29 bomber delivering supplies to prisoners in Korea is attacked by Soviet fighters and shot down.

NAVAL: The prisoner-of-war camp at Omori, Japan, is liberated by landing craft provided by the U.S. Navy.

August 29–30

MILITARY: General Douglas MacArthur is appointed supreme commander of the Allied powers in occupied Japan as American forces begin landing.

August 30

MILITARY: General Robert L. Eichelberger and his headquarters staff fly into Atsugi Field, Yokohama, Japan, to help establish his Eighth Army as an occupation force.

MARINES: At Yokohama, Japan, marines from the United States and Great Britain go ashore to commence occupation duty.

September 1

MILITARY: General Douglas A. MacArthur arrives at Atsugi Field, Yokohama, Japan, and spends the night at the New Grand Hotel.

MARINES: In Cuba, the Marine Barracks at Guantánamo Bay is renamed a Marine Corps Base.

September 2

AVIATION: Film and photos taken of the surrender ceremony in Tokyo, Japan, are placed onboard a C-54 Skymaster in Tokyo, which flies to Washington, D.C., in a record 31 hours and 25 minutes. Ironically, due to crossing the international dateline en route, the flight starts and finishes on the same day!

MILITARY: Representatives of Japan and the victorious Allies gather onboard the deck of the battleship *Missouri* in Tokyo Bay to sign surrender documents. Admiral Chester W. Nimitz signs the document for the United States. General Douglas A. MacArthur then signs the document on behalf of the Allies while his friend, newly freed major general Jonathan W. Wainwright, stands nearby. That same day Wainwright learns that he has won a Medal of Honor.

- Advance elements of the 1st Cavalry Division arrive by ship at Tokyo, Japan. They are the first American formation to occupy the Japanese capital.

MARINES: The Marine Corps consists of 485,833 officers and enlisted men; this is the largest size it attains.

- In Hanoi, Vietnam, Communist revolutionary Ho Chi Minh proclaims the Democratic Republic of Vietnam, and he quotes from the American Declaration of

General of the Army Douglas MacArthur, supreme commander for the Allied Powers, closes the surrender proceedings aboard the USS *Missouri* in Tokyo Bay, Japan, on September 2, 1945. (*National Archives*)

Independence. As he speaks, several OSS officers, who had previously provided the Vietnamese with arms to fight Japan, are in attendance.

NAVAL: By war's end, the U.S. Navy comprises 1,300 combat vessels, 11,000 smaller vessels, and 3.3 million officers and enlisted men. This is the greatest size it ever attains.

September 3

MILITARY: At Baguio, Philippines, newly prompted Lieutenant General Jonathan M. Wainwright accepts the surrender of General Tomoyuki Yamashita, commanding the Fourteen Area Army. The latter is arrested and shipped to Japan for a war crimes trial.

September 4

MARINES: After nearly three and a half years of Japanese occupation, Wake Island surrenders to General Lawson H. M. Saunderson, 4th Marine Air Wing.

- The G-series table of organization is adopted, which raises full-strength divisions by 1,700 men.

September 5

AVIATION: At Santa Monica, California, the Douglas XC-74 prototype flies for the first time; this huge, four-engined transport enters into service as the Globemaster.

MILITARY: In Yokohama, Japan, Iva Toguri D'Aquino, better known to millions of Americans in the Pacific as "Tokyo Rose," is arrested and charged with collaborating with the enemy.

September 6

MARINES: At Yokohama, Japan, the bulk of the marine force present has been returned to the fleet; the 4th Marines parade with 120 members of the regiment who had been captured on Corregidor in April 1942.

September 7

MARINES: On Yokosuka Airfield, Japan, the headquarters unit of Marine Air Group 31 and aircraft from VMF-441 become the first American aviation units to operate from Japanese soil.

September 8

MILITARY: At Heidelberg, Germany, command of the Seventh Army passes to Lieutenant General Geoffrey Keyes, formerly of the II Corps.

- General Douglas A. MacArthur, Admiral William Halsey, and Lieutenant General Robert L. Eichelberger complete a 22-mile drive from Yokohama to Tokyo. They are saluted by an honor guard of the 1st Cavalry Division outside the American embassy. In a touching ceremony, the American flag that flew over Congress on December 7, 1941, is hoisted aloft on the grounds.
- At Inchon, Korea, the XXIV Corps (6th, 7th, and 40th Infantry Divisions) under Major General John C. Hodge arrives to begin occupation duty beneath the 38th Parallel.

September 10

MILITARY: In Japan, search-and-rescue teams scour the countryside looking for liberated American prisoners of war. Ultimately, 35,000 prisoners are repatriated.

NAVAL: The large carrier *Midway*, the first vessel of its class, is commissioned, although too late to see wartime service.

September 11

NAVAL: The U.S. Navy commences Operation Magic Carpet, whereby warships are rigged as temporary transports to return servicemen back to the United States.

September 19

MILITARY: On western Honshu, advanced elements of General Walter Krueger's Sixth Army arrive to take up occupation duties.

September 21

MILITARY: In Washington, D.C., Secretary of War Henry L. Stimson resigns from office after an eventful five-year tenure and is replaced by Robert P. Patterson.

September 22

MARINES: Advanced elements of the V Amphibious Corps arrive from the Marianas Islands. The 2nd and 5th Marine Divisions occupy the Nagasaki-Sasebo and Shimoneseki-Fukuoka regions.

September 23

MILITARY: At Yokohama, Japan, the 97th Infantry Division under Major General Herman F. Kramer arrives from Europe via Leyte, Philippines.

NAVAL: In Washington, D.C., the Navy Department is reorganized with the addition of an Office of Naval Material and five new deputy chiefs of naval operations for personnel, administration, naval operations, logistics, and aviation.

September 24

MILITARY: The Sixth Army assumes responsibility for all ground forces presently occupying Japan.

September 25

MILITARY: South of Osaka, Japan, the I Corps arrives from Luzon, Philippines, with the 6th, 25th, and 33rd Infantry Divisions, which eventually end up garrisoning parts of western Honshu.

September 26

AVIATION: At the White Sands Range, New Mexico, the U.S. Army fires its first liquid-propelled rocket, the WAC Corporal, which reaches an altitude of 43.5 miles. It is basically a copy of the German V-2.

September 29

NAVAL: The post of commander in chief, U.S. Fleet, is eliminated by an executive order.

September 30

MARINES: At Tangku, China, the III Amphibious Corps lands the 2nd Battalion, 7th Marines to secure the city while the 3rd Battalion rides a train to Tientsin.

October 1

MILITARY: At Khorramshahr, Iran, the new Persian Gulf Service Command is activated to replace the Persian Gulf Command. It falls under the purview of U.S. Army Forces, Africa-Middle East Theater (MET) and is tasked with disbanding American installations in the region.

MARINES: At Chinwangtao, China, the 1st Battalion, 7th Marines arrives and arranges a truce between Japanese troops and Chinese Communist forces. The regiment's 3rd Battalion also takes control of Tientsin to secure the vital railroad system.

October 2

MILITARY: The Fifth Army, conqueror of Italy, is disbanded after 54 months of service life.

October 3

MILITARY: In Hiro Wan, Japan, the X Corps arrives with the 24th and 41st Infantry Divisions before occupying the Kure-Hiroshima section of western Honshu.

October 6

MARINES: In China, the III Amphibious Corps begins to accept the surrender of 50,000 Japanese troops from the Tientsin-Tangku-Chinwangtao region. In an ominous sign, a group of marines marching to Beijing is fired upon by Chinese Communists.

October 7

MILITARY: At Bad Tolz, Germany, General George S. Patton is relieved as military governor of Bavaria for contesting occupation policies and replaced by General Lucius K. Truscott.

MARINES: The 5th Marines reach Beijing, China, without opposition while transport aircraft belonging to Marine Air Group 25 begin operations out of Tientsin.

October 10

MILITARY: At Fort Bragg, North Carolina, the Ninth Army is disbanded following the unconditional surrender of Japan.

October 11

AVIATION: At the White Sands Proving Ground, New Mexico, a Tiny Tim rocket, the first liquid-fueled rocket entirely of American origin, is strapped to the nose of a WAC (without altitude control) Corporal and fired, reaching an altitude of 43 miles.

MARINES: At Tsingtao, China, the 6th Marine Division lands to provide order and help process surrendering Japanese.

October 12

MILITARY: At Atomi, Japan, a patrol from the Americal Division discovers a stash of 2,660 silver ingots (103.4 tons) worth \$1.3 million.

October 13

AVIATION: At Wright Field, Dayton, Ohio, the Army Air Force sponsors a large open house to display American and captured aircraft to the public. The display draws 1 million visitors over the following week.

MILITARY: In Tientsin, China, detachments of the 1st Marines save Japanese civilians from angry Chinese mobs.

October 15

MILITARY: At Yokohama, Japan, the 43rd Infantry Division, a veteran of three grueling campaigns, is the first Pacific division to be deactivated and shipped home.

October 18

MARINES: In Peiping Beijing, China, a marine railroad guard kills six Chinese Communists who had been firing at their train.

October 19

MARINES: In Washington, D.C., the Senate Military Affairs Committee weighs proposed legislation that would merge the War and Navy Departments into a single entity. The unification would threaten the existence of the Marine Corps because, superficially, the marines duplicate tasks performed by the army.

October 20

AVIATION: In Washington, D.C., a flight of B-29 bombers led by Lieutenant General Nathan F. Twining lands, having covered 13,000 miles in only 60 hours. The flight originated on Guam with refueling stops in India and Germany.

October 26

MARINES: On Peleliu, the 26th Marines are dispatched to relieve the army's 111th Infantry Regiment; once deployed, they are responsible for processing and repatriating surrendering Japanese troops in the Palaus and Western Carolines.

October 27

NAVAL: President Harry S. Truman presides over launching ceremonies for the new aircraft carrier *Franklin D. Roosevelt*.

November 1

MILITARY: Private Desmond T. Doss, a conscientious objector who served with a medical detachment with the 77th Infantry Division on Okinawa, receives a Medal of Honor for saving the lives of several soldiers while under fire.

MARINES: At Yokosuka, Japan, the 4th Marines are turned over to navy authority by the U.S. Army.

November 3

MARINES: At Camp Pendleton, California, the 4th Marine Division arrives and begins demobilizing.

November 5

AVIATION: A Ryan FR-1 Fireball, a propeller/jet hybrid fighter, makes its first successful landing on the escort carrier *Wake Island*. This is, technically, the first carrier landing of a jet aircraft on a naval craft.

November 6

MARINES: The 1st Battalion, 29th Marines are added to the 1st Marine Division's rail guards near Beijing, China.

November 7

AVIATION: The Bell Aircraft Corporation flies a remote-controlled version of its P-59 jet fighter, which features a television camera that projects instrument panel readings to a ground station.

November 10

MARINES: Lieutenant Frederick C. Branch becomes the first commissioned African-American officer in the U.S. Marine Corps.

November 15

AVIATION: In a portent of things to come, a PBM Mariner flying off the coast of Manchuria is fired upon by Soviet fighters.

November 19

MILITARY: In Washington, D.C., General Dwight D. Eisenhower replaces General George C. Marshall as army chief of staff, the latter having retired from active duty.

- In Seattle, Washington, advanced elements of the Americal Division arrive and soldiers await their final discharge.

November 20

AVIATION: A world distance flying record of 8,198 miles is made by a B-29 Superfortress, which flies nonstop from Guam to Washington, D.C.

November 21

MILITARY: At San Antonio, Texas, Lieutenant General Alexander M. Patch, commander of the Seventh Army, dies suddenly; he receives posthumous promotion to full (four-star) general.

November 23

MARINES: On Kyushu, Japan, the 5th Marine Division begins reducing its occupation responsibilities and transfers them to the 2nd Marine Division.

November 25

MARINES: On Truk, the 2nd Battalion, 21st Marines deploys as a garrison force and to help repatriate Japanese troops from the region.

November 26

MILITARY: At Frankfurt, Germany, General Joseph T. McNarney is appointed commander of the United States Forces, European Theater (USFET); he is the last person so appointed until his reassignment on March 10, 1947.

November 29

AVIATION: At Maxwell, Alabama, the Army Air Forces School permanently relocates from Orlando, Florida; it becomes a major command and also the present-day site of the Air University.

December 3

AVIATION: At March Field, California, the 412th Fighter Group becomes the first American unit equipped with new Lockheed P-80A Shooting Star jet fighters.

December 5

AVIATION: A flight of five TBM Avengers lifts off from Naval Air Station Fort Lauderdale, Florida on a routine training flight—then vanishes without a trace. A PBM Mariner sent after them also mysteriously disappears. Their unexplained fate gives rise to a theory behind the so-called Bermuda Triangle.

December 6

AVIATION: Due to increased incidents of Chinese Communists firing upon marine reconnaissance aircraft in northern China, III Amphibious Corps Headquarters grants them authority to return fire.

December 8

AVIATION: The ubiquitous, glass-domed Bell Model 47 becomes the first CAA-certified helicopter to fly commercially in the United States.

- In northern China, a flight of six Marine SB2C Helldivers crashes in a snow storm, killing 10 crew members out of 12.

December 9

MILITARY: Near Mannheim, Germany, the celebrated General George S. Patton, late commander of the Third Army, is critically injured when his staff car collides with an army vehicle.

December 14

AVIATION: The Bell Aircraft Company contracts with the Army Air Force to construct three, swept-wing, supersonic research aircraft; three aircraft eventually emerge as the X-2.

December 15

MILITARY: General George C. Marshall is appointed special ambassador to China by President Harry S. Truman. He is tasked with trying to arrange a truce between Nationalists under Chiang Kai-shek and Communists under Mao Zedong and assess the strategic situation there.

NAVAL: In Washington, D.C., Admiral Chester W. Nimitz is appointed the 10th chief of naval operations.

December 17

AVIATION: In Washington, D.C., General Carl A. Spaatz receives the prestigious Collier Trophy from President Harry S. Truman for his efforts in directing the air war in Europe.

December 19

MARINES: In Washington, D.C., President Harry S. Truman submits a plan to Congress calling for the unification of the armed forces. Consequently, the secretary of the navy instructs U.S. Navy and Marine Corps officers not to promote or oppose the issue in public.

December 21

MILITARY: Noted military leader General George S. Patton dies in Bad Neuheim, Germany, from injuries received in an auto accident.

December 24

MILITARY: The XIV (Guadalcanal) Corps under Major General Joseph M. Swing returns to the West Coast to face demobilization and deactivation.

December 28

MARINES: On Guam, the 3rd Marine Division disbands with discharge-eligible marines proceeding back to the United States while those still serving are sent on to China.

December 31

MILITARY: In Japan, the Eighth Army assumes full responsibility for occupation duties, allowing the V Amphibious Corp to depart. Consequently, the 2nd Marine Division on Kyushu reports to the Army's I Corps headquarters.

- Of the 10.4 million men and women in the U.S. Army and Army Air Force, no less than 936,259—roughly 10 percent—have been killed or wounded in World War II.

INTRODUCTION

After victory in World War II, the United States rushed to demobilize the mighty military machine it had assembled, a move that coincided with the first rumblings of the cold war with the Soviet Union and its satellites. At this time the American monopoly on nuclear weapons seemed like a safe bet for several years, while the Russians and Chinese were still viewed favorably as former allies. Still, despite dwindling manpower and military expenditures at home, the United States managed to win a startling victory of sorts during the Berlin Airlift of 1948–49. Moreover, political expedients such as the Truman Doctrine, NATO, and the Marshall Plan put the Communist bloc on notice that the West would be neither militarily intimidated from without nor submit passively to political subversion from within. Despite such bold posturing, the American military was roundly unprepared for the Korean War (1950–53), the West's first military challenge from the East. The U.S. Army, U.S. Navy, U.S. Marine Corps, and U.S. Air Force all recovered from their initial surprise, which included modern MiG-15 jets and hordes of fighting Chinese, but, for the first time in its history, the United States was forced to accept a draw instead of complete victory. Such were the geopolitical realities of limited war in the nuclear age, when neither side dare risk an all-out conflagration that might result in total annihilation for all involved. The decade of the 1950s was nonetheless a golden age of American rearmament in which jet bombers of the Strategic Air Command formed the first rank of nuclear deterrence, pending the development of even newer land- and submarine-based nuclear missiles. The Americans were superbly equipped and determined to confront the next challenge when it arose in Cuba, and they forced the Soviets to withdraw offensive weapons from that island without a shot being fired. However, the Kennedy and Johnson administrations were also increasingly drawn into Southeast Asia to halt what, on the surface, appeared to be an overt attempt by Communist North Vietnam to subjugate South Vietnam. To North Vietnamese leaders the struggle centered more on a long-desired goal of vanquishing colonial influences than anything else and, despite the tremendous firepower brought to bear by American forces, and the huge toll in lives and materiel it extracted,

they proved unrelenting in their quest for national unity. The United States, having propped up the losing side as long as possible, had to accept its first strategic defeat. The experience also soured public opinion on military matters and, for a while, it appeared as if the American armed forces were in decline. Fortunately, attitudes and preparedness experienced an abrupt turnaround with the election of Ronald Reagan in 1980, who not only rebuilt and modernized the American military, but also evinced clear determination to intervene abroad whenever deemed necessary. Reagan and his successor, George H. W. Bush, successfully accomplished American goals in Grenada and Panama by force of arms, and Nicaragua and Afghanistan by clandestine means. The Vietnam-era anti-intervention mania evaporated completely after the smashing victory of Desert Storm in January 1991, after which American soldiers were again hailed as heroes and honored with ticker-tape parades. Reagan and Bush also conducted a comprehensive rearmament strategy that literally bankrupted the Soviet Union when it attempted to follow suit, bringing the cold war to a victorious conclusion in 1991.

Since the collapse of the Soviet Union, the American military has been principally involved in small, brush fire wars in Somalia and Bosnia with varying results. Its status as a military superpower nonetheless lay unchallenged until the horrendous terror attack on the World Trade Center on September 11, 2001, a date that marked America's struggle with fanatical Muslim extremists worldwide. Operation Enduring Freedom cleared the violent Taliban regime out of Afghanistan in less than 90 days while Operation Iraqi Freedom laid the dictatorship of Saddam Hussein to waste in only three weeks. Militarily victorious, the United States found itself embroiled in seemingly intractable sectarian-based insurgencies in both countries. By 2008 the corner appeared to have turned in Iraq, once Sunni tribesmen agreed to unite in a common cause against al-Qaeda terrorists lurking there, but the Taliban, safely ensconced in neighboring Pakistan, has proved a durable, tenacious foe. It appears that the new administration of Barack Obama will rely more on diplomacy than on military force to resolve these pressing issues, as well as grapple with the acquisition of expensive new weapons systems in an age of declining economic strength. The United States still remains the greatest military power in the world and, having acknowledged the limits of that power, the nation remains all the more secure because of it.

This volume contains extensive chronological coverage of U.S. military history from 1946 to 2009, from the beginning phases of the cold war through Operations Enduring Freedom and Iraqi Freedom. Thematically, entries are listed by service with *Military* denoting army, militia, and National Guard, *Naval* for navy, *Marines* for marines, and *Aviation* dealing with individual events in the Army Air Service, Army Air Corps, and Army Air Force. *Technology* highlights important inventions with significant military applications

as they appear in the time line. Finally, a handful of topical entries such as *Diplomacy* and *Politics* are included when necessary for greater clarification. Given the vast geographical expanse covered, this volume also delineates military events by a strictly ordered geographical region (East, South, then West) while naval events are listed by geography (Atlantic, Pacific, then rivers). For World War II, multiple entries are listed in the order of Europe, North Africa, and Asia. Most entries cover single events, but wherever two or more military or naval events fall under a given date, they are listed in this strict geographic order for uniformity. Also, the exact locale is spelled out in each entry for clarity. Moreover, the scope of this series is inclusive and an “event” might entail coverage of a battle, a noted person’s activities, a congressional law, or policy concerning some facet of the army and navy, such as the debut of a new military weapon or system. Space constraints limit most entries to a few lines at best, but significant events may command up to a paragraph according to their importance. The text is interspersed with 46 capsule biographies of significant military figures (generals, admirals, officers, Native Americans) who deserve greater attention than these citations allow. Finally, a 5,000-word bibliography is included of all the latest scholarship on U.S. military history, listed by subdivisions to promote ease of use. The text is also replete with numerous illustrations, which serve both as embellishments and as visual points of reference.

By perusing these pages even a casual reader can grasp the great complexity and richness of the American military experience, which has done so much to influence the history and politics of the nation and the world at large. I am indebted to my editor, Owen Lancer, for accepting this project at my suggestion; it was an arduous endeavor but also a learning experience for which I am much obliged.

—John C. Fredriksen, Ph.D.

CHRONOLOGY

1946

January

AVIATION: At Wright-Patterson Airfield, Ohio, engineer J. W. McGee begins investigating the properties of various high-temperature alloys at the Materials Laboratory. Within a year he develops the new “ML” alloy, so-named after the laboratory where it was developed.

MILITARY: The army now numbers 1.8 million officers and men, down from 8 million a year previous, with many of these men slated for demobilization. However, owing to the nation’s new overseas commitments in Germany, Italy, Japan, and Korea, along with mounting tensions with the Soviet Union, the standing establishment is not reduced as readily as had been the case in previous conflicts.

January 1

NAVAL: The Coast Guard is returned to the Treasury Department for the first time since November 1941. Throughout World War II it fell under the purview of the U.S. Navy.

MARINES: At Yokosuka, Japan, the 3rd Battalion, 4th Marines assumes security duties once the 2nd Battalion returns to the United States for disbandment.

January 4–15

MILITARY: In Washington, D.C., the War Department announces that complete demobilization would be slowed down to preserve sufficient army personnel to meet current international obligations. This change in policy triggers an outpouring of anger from many soldiers still deployed overseas, and Congress is besieged by letters of protest.

January 6

MARINES: In light of increasing security commitments on the mainland, the headquarters element, 4th Marines, ships from Yokosuka, Japan to Tsingtao, China.

January 8

MARINES: At Camp Pendleton, California, the 12th Marines are disbanded.

- In Japan, the 2nd Marine Division continues with occupation duty on Kyushu once the last corps-level element of the V Amphibious Corps ships out for the United States.

January 10

AVIATION: Over Stratford, Connecticut, a Sikorsky R-5 helicopter flown by C. A. Moeller and D. D. Viner sets an unofficial world altitude record by reaching 21,000 feet.

DIPLOMACY: In China, former general and now U.S. special envoy George C. Marshall arranges a cease-fire between Nationalist (KMT) and Communist (CCP) factions to take effect beginning January 13.

MARINES: In Hawaii, a group of disgruntled NCOs petitions Major General Roy S. Geiger for an early discharge to civilian life, much as army counterparts have done. Geiger responds by demoting all of them to private, ending all further protests in the Marine Corps at present.

January 11

MARINES: In Washington, D.C., a marine honor guard is present at ceremonies attending the return of the original Magna Carta from the Library of Congress to the British ambassador. It had been kept there secretly during the war for safekeeping.

January 13

MARINES: At Camp Pendleton, California, the 3rd Marines are deactivated.

January 15

AVIATION: In China, transport aircraft from Marine Air Group 25 (MAG-25) drop leaflets announcing the cease-fire between Nationalist and Communist factions.

January 16

AVIATION: A panel of scientific experts is cobbled together to found the U.S. Upper Atmosphere Research Panel. They are tasked with testing and evaluating the 60 captured V-2 rockets presently in American hands. Their findings also give rise to similar programs at Johns Hopkins University and the Naval Research Laboratory.

January 19

AVIATION: Over Pinecastle Army Air Force Base, Florida, test pilot Jack Wollams takes the Bell XS-1 rocket research airplane on its first glide test.

January 20

MILITARY: In Washington, D.C., President Harry S. Truman signs an executive order establishing the Central Intelligence Group, forerunner of the Central Intelligence Agency (CIA).

- General Dwight D. Eisenhower, in light of discontent over demobilization practices, addresses Congress to assure legislators that there has been no dramatic change in army policy respecting discharges and, in fact, the military is actually ahead of stated goals.

January 22

MARINES: In Washington, D.C., Commandant Archie Vandegrift orders that an expeditionary brigade be held in readiness for service in any troubled parts of the Caribbean.

January 26

AVIATION: At Eglin Field, Florida, the army activates the 1st Experimental Guided Missile Group to guide the development and research of drones and guided missiles.

- A Lockheed F-80 Shooting Star piloted by Colonel William H. Council sets a new transcontinental record by flying coast to coast in four hours and 13 minutes at 584 miles per hour.

January 28

MARINES: At Quantico, Virginia, and Camp Lejeune, North Carolina, the 1st Special Marine Brigade is created from the three separate battalions numbered 1–3.

January 29

AVIATION: The carrier *Philippine Sea* launches six R4D transports under Rear Admiral Richard E. Byrd as part of Operation Highjump. This is the most ambitious plan yet to chart and map the Antarctic.

February 3

AVIATION: In a nod to the future, the Army Air Force declares that it is developing an aircraft with a completely automated flight profile system, whereby the onboard pilot has little to do but monitor engine controls for safety reasons.

February 4

AVIATION: Lieutenant General James H. Doolittle (retired) becomes the first president of the new Air Force Association (AFA). This is a civilian organization dedicated to promoting public awareness of aeronautics and its centrality to national defense.

MARINES: At Quantico, Virginia, Major General Oliver P. Smith assumes command of the 1st Special Marine Brigade, now strengthened by the addition of Marine Air Group 11 (MAG-11).

- On Kyushu, Japan, the 2nd Marine Division is assisted in its garrison duties by advanced elements of the British Commonwealth Occupation force.

February 5

MARINES: At Camp Pendleton, California, headquarter elements of the 5th Marine Division are disbanded, removing that unit from the duty roster.

February 9

AVIATION: In Washington, D.C., General of the Army Henry H. Arnold relinquishes command of the Army Air Force, which he was so instrumental in developing, to General Carl A. Spaatz. The latter officially takes charge as of March 1.

February 10

MARINES: On Wake Island, the marine detachment in garrison is transferred to Eniwetok Atoll to cooperate with forthcoming atomic bomb testing to be held there.

February 15

AVIATION: The 2nd Marine Air Wing (MAW) ships from Okinawa, Japan, for its usual billet at Cherry Point, North Carolina.

MARINES: At San Diego, California, the final headquarter elements of V Amphibious Corps disband and that hard-fighting formation ceases to exist.

- In Yokosuka, Japan, the 3rd Battalion, 4th Marines is redesignated the 2nd Separate Guard battalion and assigned primary guard duties at that naval base.

February 19

MARINES: In Washington, D.C., the secretary of the navy creates the Marine Air Reserve Training Command (MARTC) to oversee training functions within Marine Corps Reserve aviation units. Shortly after, it is activated at Glenview Naval Air Station, Illinois.

February 26

AVIATION: In England, the Army Air Force closes the last of its 112 former air bases with a special ceremony held at Honington Air Station, Suffolk. The weather refuses to cooperate, however, and the departure of the last remaining B-17 bombers in the British Isles is delayed due to a heavy snow storm.

February 28

AVIATION: The prototype Republic XP-84 is flown by Major William Lien for the first time. It enters service as the F-84 Thunderjet and renders distinguished service in the Korean War.

March

AVIATION: In Los Angeles, Project RAND is founded as a division of the Douglas Aircraft Company by the Army Air Force. It is tasked with studying the possibilities of missiles, earth satellites, and supersonic flight.

- In light of the fact that ballistic missiles are a military reality, the Army Air Forces commences studies to develop a ballistic missile defense system.

March 1

AVIATION: In Washington, D.C., General Carl A. Spaatz formally replaces General Henry H. Arnold as commanding general, Army Air Forces.

March 1–22

NAVAL: In the Davis Strait north of Greenland, the carrier *Midway* steams to the Arctic Circle to conduct Operation Frostbite, an extensive series of cold-weather operational tests to evaluate the navy's performance there.

March 3

MILITARY: In Berlin, Germany, a Soviet sentry kills ordnance officer Lieutenant James Wilson in a sign of increasing hostility between the West and the Communist bloc.

March 5

DIPLOMACY: Former prime minister Winston Churchill, speaking at Westminster College in Fulton, Missouri, declares that an "Iron Curtain" has descended across Soviet-controlled sections of Central and Eastern Europe. This speech is considered by many to signal the start of the cold war between the United States and the Soviet Union.

March 8

AVIATION: The two-seat Bell Model 47 helicopter, distinct with its bubble canopy, is certified by the Civil Aeronautic Agency (CAA) for public use. This is the first rotary-wing aircraft so designated and it is adopted by the military as the ubiquitous UH-13.

MARINES: In northern China, the 6th Marine Division reincorporates the headquarters of the 4th Marines; all subordinate elements will be reconstituted from recently deactivated units elsewhere.

March 11

AVIATION: An afterburner is successfully tested under simulated high-altitude conditions by the NACA Lewis Altitude Wind Tunnel. This device enhances jet propulsion by having fuel poured directly into it.

MARINES: In Washington, D.C., the Basic Post-War Plan No. 2 is issued. This plan sets personnel levels at 8,000 officers and 100,000 enlisted men, divided into a Fleet Marine Force (FMF) for the Atlantic and Pacific Oceans. Ground forces are reduced to two divisions at Camp Lejeune, North Carolina, and Guam, with an additional brigade at Camp Pendleton, California. Marine aviation is also reduced to two wing-sized commands, although those marine units assigned to carrier groups will retain their own headquarters.

March 12

AVIATION: The new Air University is created at Maxwell Field, Alabama, to draft the curricula of the Air Command and Staff School and the Air War College.

March 15

AVIATION: At the White Sands Proving Ground, New Mexico, technicians and scientists conduct the first static firing of a captured German V-2 rocket.

March 21

AVIATION: The Army Air Force is reorganized to include the new Air Defense Command (ADC), the Strategic Air Command (SAC), and the Tactical Air Command (TAC).

March 22

AVIATION: A WAC missile, jointly developed by the Jet Propulsion Laboratory and Army Ordnance, becomes the first American-made projectile to enter Earth's outer atmosphere by reaching an altitude of 50 miles.

April

MARINES: In Washington, D.C., Congress sets personnel levels for the Marine Corps at 7,000 officers and 100,000 enlisted men.

April 1

AVIATION: Bell Aircraft acquires one of the few remaining missile contracts when it signs on to develop a guided missile capable of hitting targets at a distance of 100 miles. This is the origin of the Rascal missile, also known in military circles as Project MX-776.

MARINES: In northern China, the newly activated 3rd Marine Brigade replaces the 6th Marine Division, which is demobilized. This consists of the 4th Marines plus several supporting remnants of the 6th Marine Division.

April 5–14

NAVAL: The battleship *Missouri* arrives in Turkey to retrieve the body of the U.S. ambassador who died there in 1946 and convoy him back home. It also serves as a show of force to deter communist activity in the eastern Mediterranean.

April 15

AVIATION: At the White Sands Proving Ground, New Mexico, military scientists and technicians successfully launch a captured German V-2 rocket for the first time. The effort is being assisted by Project Paperclip, a clandestine program to incorporate German technology, research, and scientists into

American military defense. White Sands conducts over 40 such tests in the next two years.

MARINES: Consistent with peacetime footing, the 1st Marine Division demobilizes one battalion from each of its three infantry regiments, along with one artillery battery in each battalion of the 11th Marines.

April 19

AVIATION: In San Diego, California, Consolidated-Vultee (Convair) contracts with the Army Air Force to design and build an intercontinental ballistic missile (ICBM), Project MX-774.

April 22

AVIATION: In Maryland, the Glenn L. Martin Company signs a contract with the Army Air Force to develop a surface-to-surface guided missile capable of hitting targets 600 miles away. This is the origin of the Matador missile, or MX-771.

- The U.S. Weather Bureau with the Army Air Force, navy, NACA, and several university research institutes join forces to better understand weather-related phenomena. Both piloted and unpiloted glider and aircraft are flown under a variety of conditions to gather the requisite scientific data.

April 27

MILITARY: In Washington, D.C., the Gillem Report is released by the War Department, which purports to be a comprehensive study of African Americans serving in the ranks. Many of the reports are inconclusive and do little to improve the status of blacks in the military, although they do call for an end to racial discrimination.

May

MARINES: Throughout the month, the 1st Special Marine Brigade conducts the first postwar training exercise in the Caribbean.

May 1

MARINES: Leathernecks being released from active duty are advised by Marine Corps Reserve Bulletin No. 1 that they can maintain connections to the corps by joining its reserve component.

- In China, the theater command is eliminated and operational command of all marines reverts back to the U.S. Seventh Fleet.

May 2

MARINES: In San Francisco, California, marines are called upon to assist local police put down a prison riot on Alcatraz Island in the bay.

May 6

MARINES: As the battle of defense service unification heats up, Commandant Major General Archie Vandegrift angrily testifies before Congress, insisting that if the corps is to be abolished after 175 years of unparalleled service to the nation, it should be “with dignity and honor, not by subjugation to the status of uselessness and servility planned . . . by the War Department.” Vandegrift’s tough words stop Congress in its tracks and no further attempts to abolish the marines are considered. Apparently, army leaders wanted to reduce the marines to a small force restricted to operating landing craft.

Vandegrift, Archie (1887–1973)

Marine Corps general

Alexander Archer Vandegrift was born in Charlottesville, Virginia, on March 13, 1887, and he joined the Marine Corps in January 1909 as a second lieutenant. Over the next three decades he completed a series of wide-ranging assignments in Nicaragua, Veracruz, Mexico, and Haiti, where he served with distinction under legendary major Smedley D. Butler. A capable officer, Vandegrift rose steadily through the ranks and, shortly after American entry into World War II, he became a major general commanding the 1st Marine Division. In this post, Vandegrift spearheaded Operation Watchtower, the first American offensive action of the Pacific theater, by landing at Guadalcanal on August 7, 1942. A tremendous trial of strength ensued as the air, naval, and air forces of Japan were marshaled against the marines, who were outnumbered and isolated once Admiral Frank J. Fletcher withdrew his carriers from the Solomons. However, Vandegrift was an old hand at jungle warfare at this point, and his marines defeated Japanese veterans in several determined efforts to storm Henderson Field. That November the tide had turned in America's favor and the exhausted 1st Division was relieved by the 2nd Marine Division. Guadalcanal, moreover, was the first major ground victory over the heretofore invincible Japanese, and U.S. forces seized the strategic initiative and kept it for the remainder of the war. Vandegrift, for his part, won a Medal of Honor and promotion to lieutenant general before returning to the Pacific to plan and lead the successful landings at Bougainville. In January 1944

Alexander Vandegrift (U.S. Marine Corps)

he succeeded General Thomas Holcomb as commandant of the Marine Corps and orchestrated the expansion of that force to half a million men. In March 1945 Vandegrift became the first marine officer to become a full general while still on active service.

The postwar period proved even more challenging to the survival of the Marine Corps than World War II. The advent of nuclear weapons meant that present amphibious tactics had to be completely overhauled. President Harry S. Truman,

(continues)

(continued)

determined to slash military expenditures, also embarked on a “unification” program to bring all three services under a single command. Vandegrift, realizing that this meant abolishing the corps, took his case before Congress and pleaded that it be maintained as an integral part of America’s defense establishment. So forcefully did Vandegrift make his case that Congress forced the president to scuttle the plans altogether. In light of Vandegrift’s perfor-

mance, Truman subsequently stated that the Marine Corps possessed a propaganda machine nearly equal to that of Soviet dictator Joseph Stalin. The general spent his final years as commandant exploring new helicopter technology and new amphibious doctrines before resigning in March 1949. Vandegrift died in Bethesda, Maryland, on May 8, 1973, another legendary marine commander who epitomized the motto of “first to fight.” His impressive victory at Guadalcanal serves as a major part of Marine Corps tradition.

May 14

MILITARY: The War Department announces its first postwar reorganization scheme for the army, whereby Army Ground Forces and the Army Air Force continue on as separate entities, with the latter slated to become an independent service. Also, the wartime corps areas nationwide are to be replaced by six army areas.

May 16

AVIATION: At Wright Field, Ohio, the Army Air Force Institute of Technology opens; it is tasked with graduating 350 technically minded officers every year.

May 17

AVIATION: At Muroc, California, the Douglas XB-43 jet bomber completes its maiden flight. This is the Army Air Force’s first jet bomber and, while it demonstrates impressive performance, the AAF believes that four-engine designs hold more promise and performance.

May 20

MARINES: On Okinawa, the 8th Military Police Battalion (Provincial) is redesignated a Marine Barracks.

May 21

MARINES: Near Tientsin, China, Communists open fire on a marine patrol, killing one serviceman. Truce violations are growing more frequent and violent between the Communists and their Nationalist opponents.

May 28

AVIATION: Project NEPA is initiated by the Army Air Force to investigate the possibility of atomic energy in aircraft propulsion. The endeavor continues over the next decade.

May 29

AVIATION: A report issued by the War Department Equipment Board recognizes the military implications of missile technology in future warfare. It also recommends pursuing no less than seven surface-to-surface systems with ranges from several hundred to several thousand miles.

June 3

AVIATION: A P-80 Shooting Star jet fighter flown by Lieutenant Henry A. Johnson finishes a 1,000-kilometer course in a record one hour and 20 minutes; his speed averages 462 miles per hour.

June 5

AVIATION: The Army Air Force reveals that it has ordered prototypes of two multijet engine bombers: North American's XB-45 and Boeing's XB-47.

June 10

MARINES: In China, force restructuring continues as the III Amphibious Corps headquarters disbands and its responsibilities are assumed by the 1st Marine Division.

- On Saipan, Central Pacific, the 5th Military Police Battalion (Provisional) is redesignated Marine Barracks Saipan.

June 13

AVIATION: The Navy Flight Demonstration Squadron, or Blue Angels, gives its maiden performance.

MARINES: In Kyushu, Japan, the first elements of the 2nd Marine Division begin embarking for the United States and army forces assume more responsibility for occupation duty.

June 15

MARINES: On Kyushu, Japan, the army 24th Infantry Division assumes occupation duties formerly held by the 2nd Marine Division. However, at Yokosuka, the 2nd Separate Guard Battalion (Provisional) is redesignated a Marine Barracks.

June 17

AVIATION: In Washington, D.C., the first meeting of the Scientific Advisory Board (SAB) meets at the Pentagon under the aegis of Chairman Theodore von Karman. This is an outgrowth of an earlier group of 33 scientists who participated in Operation Lusty, which helped acquire top-secret German technology at the end of World War II. Presently, it functions as a sounding board for new ideas and concepts relative to the Army Air Force.

June 22

AVIATION: Two P-80 Shooting Stars make the first jet-powered mail delivery when they take off from Schenectady, New York; one heads for Chicago, Illinois, while the other descends upon Washington, D.C.

June 25

MILITARY: In Washington, D.C., the Selective Service Act is extended by Congress to March 31, 1947, for all able-bodied men between 19 and 34 years of age. The length of service, however, is reduced to 18 months.

June 26

MILITARY: The Army Air Force and the navy adopt the Knot (one nautical mile per hour) and the Nautical Mile (1.15 statute mile) as standard measures of speed and distance.

June 27

MARINES: In Washington, D.C., the Marine Corps Reserve, Division of the Reserve, is removed from the Personnel Department and reassigned to the Commandant's Office. This is undertaken to boost the status of reserve forces.

June 28

AVIATION: The Boeing Company signs an agreement with the Army Air Force to develop a long-range, intercontinental bomber, which eventually emerges as the B-52 Stratofortress.

June 30

MARINES: At this time, Marine Corps strength is 14,028 officers and 141,471 enlisted men; roughly one-third higher than personnel levels mandated by Congress.

July 1

MILITARY: In Bamberg, Germany, the U.S. Constabulary is made operational to meet the need for a highly mobile security and border force in Germany and Austria. Drawn from elements of the 1st and 4th Armored Divisions, it is organized into a headquarters, three Constabulary brigades, and 10 Constabulary Regiments under Major General Ernest Harmon. In addition to the usual jeeps, armored cars, and motorcycles, horses are also employed, making it the military's last mounted unit.

MARINES: In order to expedite reductions in Marine Corps personnel levels, draft-ees and reservists possessing 30 months of active service are now eligible for immediate discharge, if desired.

TECHNOLOGY: Operation Crossroads commences as the United States conducts atomic weapons testing at Bikini Atoll in the Marshall Islands. The objective is to assess damage inflicted on an anchored armada of 73 obsolete warships acting as the target. The experiment unfolds as a 23-kiloton Fat Boy-type fission device is dropped by the B-29 *Dave's Dream* from 30,000 feet. The ensuing air burst is several miles off target yet sinks five old warships anchored around the bomb site. Nine more are heavily damaged.

July 7

MARINES: In China, Communist Party authorities release a manifesto accusing the United States of supporting the Nationalist government of Chiang Kai-shek. This stance increases tensions with marines presently deployed throughout the country.

- At Camp Leujene, North Carolina, advanced elements of the 2nd Marine Division begin arriving at this, their new home and headquarters.
- In China a patrol of seven marines disappears after visiting a village near Peit-aiho; no trace can be found by subsequent patrols.

July 12

MILITARY: At Ursina on the Italian-Yugoslavian border, Communist partisans ambush a squad from L Company, 351st Infantry Regiment and are driven off with two killed; the Americans sustain no losses.

July 15

MARINES: At Tangku, China, marines oversee the final demobilization of the few remaining Japanese troops still overseas. Over 2 million soldiers and civilians have been repatriated back to their homeland.

July 16

MARINES: In Washington, D.C., in accordance with presidential wishes, the Marine Corps abolishes its Paymaster Department while also redesignating the Quartermaster Department the Supply Department.

July 21

AVIATION: A McDonnell XFD-1 Phantom piloted by Lieutenant Commander James J. Davidson becomes the first true jet fighter to land on the carrier *Franklin D. Roosevelt*.

TECHNOLOGY: President Harry S. Truman signs the McMahon Act, which establishes the Atomic Energy Commission (AEC) and places future nuclear development under the control of civilians, not the military.

July 24

MARINES: In China, negotiations unfold that lead to the release of seven Marines abducted from Peitaiho.

July 25

TECHNOLOGY: At Bikini Atoll, Pacific, Operation Crossroads continues as the first underwater nuclear test sinks or heavily damages 75 vessels anchored around the site, sending a plume of water 6,000 feet into the air. Radioactive contamination in the immediate vicinity is also intense and forces the evacuation of many participants.

July 29

MARINES: On the road to Peiping, China, Communists ambush a supply convoy run by the 1st Battalion, 11th Marines and the 1st Marines, the attackers are rebuffed but the Americans lose four dead and 10 wounded.

August 1

AVIATION: In Washington, D.C., Commandant Major General Archie Vandegrift proposes marine aviation strength at 1,498 aviation and 2,149 ground officers, and 11,848 aviation and 36,493 ground enlisted personnel. Moreover, the bulk of Marine Corps aviation is to be concentrated either on the West Coast of the United States or in the Pacific region.

August 6

AVIATION: A pair of radio-controlled B-17 bombers successfully fly from Hilo, Hawaii, to Muroc Dry Lake, California.

August 7

MARINES: In Washington, D.C., Commandant Major General Archie Vandegrift orders 100 women reservists to be retained on active duty to perform clerical

chores at headquarters until June 30, 1947; the number is soon after increased to 300.

August 8

AVIATION: The massive, six-engine XB-36 bomber prototype flies for the first time at Fort Worth, Texas. This huge machine was originally designed for service during World War II, but it performs a useful role during the cold war.

NAVAL: The carrier *Franklin D. Roosevelt* embarks on a Mediterranean cruise lasting several months, and it makes a port of call at Athens, Greece, as a strong signal against communism there.

August 9

AVIATION: A Yugoslavian Yak-3 fighter downs an American C-47 transport over Slovenia, although the crew is unhurt and eventually released.

August 12

AVIATION: In Washington, D.C., President Harry S. Truman signs a congressional appropriations bill, which includes \$50,000 to found the National Air Museum at the Smithsonian Institution. It opens its doors in 1976 and remains the most visited museum in the world.

MILITARY: In another sign of rising tension, three American soldiers belonging to the 32nd Infantry Regiment, 7th Infantry Division, are seized by Soviet forces in Yohyon, northern Korea. They are detained for 13 days before being released.

August 13

NAVAL: In Washington, D.C., a plan drawn up by a board chaired by Rear Admiral James L. Holloway for preserving the structure of the U.S. Naval Academy and strengthening the Naval Reserve Officer Training Corps is signed into law by President Harry S. Truman. The plan is intended to provide sufficient ensigns to meet the needs of a global navy cannot be met by Annapolis alone.

August 17

AVIATION: Over Ohio, Sergeant Larry Lambert is the first American pilot to “punch out” of an aircraft when he uses an ejection seat from his P-61 Black Widow at 7,800 feet.

August 19

AVIATION: In Ohio, aviation pioneer Orville Wright receives a plaque from Major General Laurence C. Craigie in recognition of his contributions to the field of aeronautics.

August 21

NAVAL: In Washington, D.C., the Office of Naval Research is founded to facilitate planning and carry out the most modern scientific research.

MARINES: Major General Roy S. Geiger, having observed atomic bomb tests at Bikini in person, concludes that World War II–style amphibious operations, traditionally based on concentrated naval and ground forces, are no longer viable in the atomic age. He therefore urges that new amphibious warfare techniques be developed and quickly.

August 31

AVIATION: Colonel Leon Gray, flying a Lockheed P-80 Shooting Star, wins the first postwar Bendix Race, Jet Division, by racing from Los Angeles, California, to Cleveland, Ohio, in four hours and eight minutes at an average speed of 495 miles per hour.

MARINES: At Camp Lejeune, North Carolina, and Quantico, Virginia, the 1st Special Marine Brigade and allied units are demobilized.

September 6

MARINES: In light of recent attacks upon marine personnel in China, Nationalist troops are delegated sole responsibility for guarding their own supply convoys. Henceforth, marines will guard only trains carrying American supplies or personnel.

September 10

POLITICS: In Washington, D.C., President Harry S. Truman, having failed in his attempt at defense unification, instructs the secretaries of war and the navy to write a compromise bill that Congress can pass.

September 11

MARINES: At Camp Pendleton, California, parts of the 6th Marines are ordered to serve as the headquarters and weapons company of the 3rd Marine Brigade.

September 13

MARINES: In Washington, D.C., Commandant Archie Vandegrift appoints a Special Board tasked with developing new concepts and principles for adapting traditional amphibious war techniques to the atomic age.

September 18

AVIATION: Over Muroc Dry Lake, California, the experimental Convair XF-92, the first true delta-wing design, performs its maiden flight with test pilot Sam Shannon at the controls.

September 29

AVIATION: Commander Thomas Davies and his crew of three men fly a Lockheed P2V-1 Neptune named *Truculent Turtle* a distance of 11,235.6 miles from Perth, Australia, to Columbus, Ohio, in 55 hours and 17 minutes. It is a record-breaking long-distance flight.

September 30

AVIATION: At Muroc, California, 13 engineers of the new Muroc Flight Test Unit begin assisting the X-1 Program; their success leads to the eventual founding of the NASA Flight Research Centers at Edwards, California.

MILITARY: At Fort McKinley, Manila, Philippines, a detachment of American military police are attacked by Communist Huk guerrillas; the Americans lose one dead and one wounded.

October 1

AVIATION: At Point Mugu, California, the Navy Air Missile Test Center is founded to help guide the development of such weapons.

NAVAL: In light of the strategic significance of the Mediterranean region, the government establishes U.S. Naval Force, Mediterranean, a progenitor of the future Sixth Fleet. Shortly afterwards, the carrier *Randolph* is ordered to cruise the region.

MARINES: Today the Marine Corps slips slightly below its assigned personnel levels with 95,000 serving on peacetime contracts.

October 2

MILITARY: In Washington, D.C., the War Department announces plans to replace the Selective Service with a new scheme calling for Universal Military Training (UMT). All participants, while not part of the regular army, are subject to six months of military instruction. In light of resistance from many civic groups and veterans organizations, the plan is not adopted.

October 3

MARINES: At Hsin Ho, China, Chinese Communists raid the 1st Marine Division's main ammunition depot but they are driven off by the guards.

October 4

MARINES: To expedite the process of demobilization, Headquarters Marine Corps orders the discharge of all remaining personnel who entered the corps as either reservists or draftees, or those whose regular enlistments had expired.

October 4–6

AVIATION: The B-29 *Pacusan Dreamboat* piloted by Colonel C. S. Irvine completes the first, nonstop unrefueled flight over the North Pole from Hawaii. The flight takes almost 40 hours to complete the 10,000-mile mission.

October 7

AVIATION: At Niagara Falls, New York, the Bell Company ships out its first XS-1 rocket-powered test plane to Muroc, California. A total of three are built and they are subsequently redesignated the X-1.

October 10

AVIATION: Space science officially begins after a V-2 rocket fitted with spectroscopic reading equipment is launched high into the atmosphere over the White Sands Proving Ground, New Mexico.

October 16

MILITARY: At Nuremberg Germany, an army executioner carries out the death sentence by hanging the last 10 Nazi war criminals who had been condemned by an international court.

October 24

AVIATION: At the White Sands Proving Ground, New Mexico, a V-2 rocket carries a De Vry 35mm movie camera to an altitude of 65 miles while its film records 40,000 square miles of the Earth's surface.

November 21

NAVAL: President Harry S. Truman observes naval maneuvers off Key West, Florida, from aboard a captured German U-boat.

December 1

MARINES: The Marine Corps streamlines its existing rank structure for enlisted men to seven pay grades: private, private first class, corporal, sergeant, staff sergeant, technical sergeant, and master sergeant.

- At Parris Island, South Carolina, the Marine Barracks is redesignated the Marine Corps Recruit Depot.

December 6

AVIATION: Navy Attack Squadron VA-19A takes delivery of the first Douglas AD Skyraiders (or “Spad”), an outstanding propeller-driven carrier aircraft that serves well through the Vietnam War, and in a wide variety of attack and electronic countermeasure roles.

December 8

AVIATION: At Muroc, California, the first powered flight of the Bell XS-1 by Bell pilot Chalmers Goodlin takes place as it is dropped from the belly of a B-29 carrier aircraft. The XS-1 then ignites its RMI XLR-1 rocket engine and zooms to 35,000 feet at a speed of Mach .75.

December 10

AVIATION: In Washington State, a Marine R5C transport disappears without a trace with 32 marines onboard. The wreckage is recovered on the South Tacoma Glacier in July 1947.

MARINES: In the Pacific, the provisional detachments on Wake Island and Eniwetok are disbanded while the unit on Kwajalein is redesignated as a Marine Barracks.

December 16

MARINES: The headquarters of Fleet Marine Force Atlantic (FMFANT) is created and is initially the purview of the commanding general of the 2nd Marine Division. This office is subordinated to the commander of the Atlantic Fleet.

- Major General Lem Shepherd, reporting the result of a board charged with evaluating the impact of atomic weapons on amphibious warfare, concludes that dispersal of assets at sea is essential and that helicopters, seaplanes, or any other means of rapidly deploying ashore is necessary to achieve concentration of forces at the last possible moment to deny an enemy a potential target. Shepherd therefore requests that a helicopter squadron be formed to begin experimenting with this possibility.

December 17

AVIATION: In Washington, D.C., President Harry S. Truman forwards a telegram of congratulations to Orville Wright on the 43rd anniversary of his first manned flight at Kitty Hawk, North Carolina.

- At the White Sands Proving Ground, a German V-2 establishes a velocity and altitude record for single stage rockets: 3,600 miles per hour and 116 miles in altitude. The rocket also carries a collection of fungus spores aloft for an experiment.

MEDICAL: At Holloman Air Force Base, New Mexico, the National Institutes of Health begin a space biological research program. It includes subjecting volunteers to high-G acceleration in rocket sleds.

December 31

DIPLOMACY: In Washington, D.C., President Harry S. Truman declares World War II formally over and terminates all hostilities with the former Axis powers of Germany, Italy, and Japan.

1947

January 1

NAVAL: Admiral John H. Towers is appointed to the new post of commander in chief, Pacific Command, becoming the first naval aviator so honored.

MARINES: Cognizant that every marine is a rifleman, the pre-World War II practice of paying extra money for good marksmanship is reinstituted.

January 6

DIPLOMACY: In Washington, D.C., President Harry S. Truman orders an end to American efforts at truce-making between Communists and Nationalists in China. The 7th Marines, 3rd and 4th Battalions, 11th Marines, and several air elements sail from Chinwangtao for Hawaii.

January 11

AVIATION: The McDonnell XF2H-1 Banshee, the navy's first twin-jet fighter plane, makes its maiden flight.

January 13

AVIATION: At Eglin Field, Florida, a drone launched by the 1st Experimental Guided Missile Group successfully flies nonstop to Washington, D.C.; the flight is intended as a simulated, long-range bombing mission.

- Aeronautics and popular culture merge in the new comic strip *Steve Canyon*, drawn by Milt Caniff, which highlights the contributions of military aviation to America.

January 15

NAVAL: At Annapolis, Maryland, Rear Admiral James L. Holloway gains appointment as the 35th superintendent of the U.S. Naval Academy.

January 16

MILITARY: In Washington, D.C., President Harry S. Truman submits a new unification defense bill, based on input from the secretaries of war and the navy, to Congress for its approval. To placate the Marine Corps and its supporters, Truman also promises to more clearly define its role and mission in the national defense establishment.

January 23

AVIATION: At White Sands Proving Ground, New Mexico, Project Hermes gets underway when a V-2 rocket is fitted with special telemetry equipment that is transmitted in flight. A ground receiving station records and evaluates its flight performance.

January 28

AVIATION: At Mission Inn, Riverside, California, General of the Army Henry H. Arnold holds a special ceremony during which he affixes a pair of wings autographed by Orville Wright to the commemorative "Flier's Wall."

January 29

NAVAL: Rear Admiral Richard E. Byrd directs the first phase of Operation Highjump, during which six R4D Skytrain transports are launched from the carrier *Philippine Sea* for landing at Little America in the Antarctic. From there

they will aerially map 150,000 square miles of the ice cap over the next three months.

January 31

MARINES: After months of official tabulations, the Navy Department declares that of 88,939 dead and missing in the naval services during World War II, 24,479 were members of the Marine Corps.

February 3

MARINES: At Chicago, Illinois, the first Volunteer Training Unit is created to allow reservists not attached to a tactical unit to acquire some basic skills in staff or specialty fields.

- In China, the 1st Marine Division is ordered to prepare to evacuate all U.S. personnel from Beijing in light of an impending showdown between Communist and Nationalist forces.

February 5

MILITARY: In Washington, D.C., President Harry S. Truman is urged by the Atomic Energy Commission and the secretaries of the army and navy to continue with the production and testing of atomic weapons; the president concurs.

February 10

AVIATION: Over Dayton, Ohio, a Sikorsky R-5 reaches an altitude of 19,167 feet, an unofficial world record for helicopters.

February 12

AVIATION: The submarine *Cusk* becomes the first such American vessel to launch a guided missile when it unleashes a Loon—a copy of the German V-1 rocket.

February 17

AVIATION: At the White Sands Proving Ground, a WAC rocket is launched to an altitude of 240,000 feet.

February 20

AVIATION: At the White Sands Proving Ground, Project Blossom unfolds as a V-2 is fitted with canisters that are ejected once the rocket reaches its maximum altitude.

February 27

AVIATION: The North American F-82B Twin Mustang *Betty Jo*, piloted by Lieutenant Colonel Robert Thacker and John M. Ard, flies nonstop from Hickham Field, Hawaii, to LaGuardia Airport, New York, a distance of over 5,000 miles. The craft makes the record-breaking flight in 14 hours and 33 minutes.

March 5

MARINES: At Camp Pendleton, California, the 7th Marines disband and the bulk of personnel are reassigned to the 3rd Marine Brigade.

March 6

AVIATION: At Muroc Air Force Base, California, the North American XB-45, America's first jet bomber, arrives on a flat-bed truck for flight testing.

March 10

MARINES: In China, the 1st Pioneer Battalion embarks for Guam, where they are to begin constructing a camp for the forthcoming 1st Marine Brigade.

March 12

DIPLOMACY: In Washington, D.C., President Harry S. Truman outlines what becomes known as the Truman Doctrine by requesting millions of dollars in financial aid for the governments of Greece and Turkey to help them defeat Moscow-backed Communist insurgencies. Such assistance defines U.S. cold war foreign policy over the next five decades.

March 15

MILITARY: General Joseph McNarney, current military governor of Germany and commander in chief, Europe, is replaced by General Lucius D. Clay.

NAVAL: Ensign John W. Lee becomes the first African-American officer to receive a regular navy commission. During World War II, blacks could hold commissions only in the Naval Reserve.

March 16

AVIATION: At San Diego, California, the Convair 240 airliner prototype makes its maiden flight. It is adopted into the military and flies for many years as the T-29 trainer and C-131 MedEvac aircraft.

**Clay, Lucius D. (1897–1978)**

Army general

Lucius Dubignon Clay was born in Marietta, Georgia, on April 23, 1897, a descendant of Henry Clay, the noted 19th-century politician. He graduated from West Point in 1918 as a second lieutenant of engineers and held down a number of routine assignments. His big break occurred in 1933 when President Franklin D. Roosevelt initiated a large public construction project, the Works Project Administration (WPA) to help fight the Great Depression. Clay, who enjoyed a reputation as a fine organizer, became liaison for the Corps of Engineers to Congress. He excelled at orchestrating public works projects, including the Denison Dam on the Red River in Texas, and, in 1940, Clay was authorized to direct the improvement of 277 airports for possible military use. During World War II he rose to major general in 1942 and oversaw the coordination of industrial production and procurement of supplies for the war effort. Clay sought out a

combat command, but in 1944 he arrived in France to untangle allied logistical arrangements at Cherbourg, France, in the wake of the D-Day invasion. He quickly sorted matters out, achieved a 20-fold increase in supplies delivered to the front, and ended the war as deputy of the War Mobilization and Reconversion Agency in Washington, D.C. However, in May 1945 he was summoned back to Europe to serve as General Dwight D. Eisenhower's civilian affairs deputy in Germany.

Clay arrived in a German nation emaciated by war and divided into Western and Soviet zones of occupation. The civilian populace was suffering from the postwar depression and a devastated industrial base. Clay, who was appointed military governor in 1947, set about instituting remedial reforms. First, he insisted that Germany be treated like a sovereign nation and not a conquered province. Second, Clay sepa-

March 17

AVIATION: At Muroc Dry Lake, California, the North American XB-45 prototype flies for the first time with company test pilots George Krebs and Paul Brewer at the controls. This is also America's first four-engine jet bomber and it enters service as the B-45 Tornado.

MARINES: Technical Sergeant Mary E. Wancheck is the first female marine to earn a four-year service stripe ("hashmark") on her uniform.

- On Peleliu, a force of 62 marines are flown in from Hawaii and Guam to hunt down a Japanese holdout who tossed a grenade at a marine patrol.

March 27

AVIATION: Over northern China, transports of VMR-153 have airlifted 750,000 pounds of food and medicine in support of United Nations relief efforts.

March 31

MILITARY: In light of high rates of voluntary enlistment, the War Department declines to ask the Selective Service for an extension of the military draft and it expires; this is the first time since 1940 that the country does not rely on conscription.

rated military from civilian functions, a concept alien to central European traditions, and he encouraged the first free elections in Germany since the 1920s. Moreover, when the Soviets instituted their blockade of Berlin, in June 1948, Clay proved instrumental in helping to orchestrate Operation Vittles, the so-called Berlin Airlift, which provided 2.3 millions tons of supplies to the city's residents and completely thwarted Soviet intentions. Consequently, Clay advanced to lieutenant general in 1948. His final official act as governor was to help draft a constitution for the new Federal Republic of Germany. On May 12, 1949, he retired from the military a full general. He then served as chief executive for several corporations. In 1961, when the Berlin Wall crisis erupted, he returned to West Germany as President John F. Kennedy's personal ambassador to assure German citizens of America's commitment to that nation. He ordered all Western diplomats to be given armed escort convoys while visiting the Soviet zone, as

Lieutenant General Lucius Clay (*National Archives and Records Administration*)

was allowed by treaty. After the crisis subsided, Clay returned home to resume his business interests. He died in Chatham, Massachusetts, on April 16, 1978, a pivotal figure of the early cold war period.

April 3

MARINES: On Peleliu, a Japanese soldier surrenders to marines looking for him and he relays information as to the whereabouts of other survivors.

April 4

NAVY: The Reserve Officer Training Corps program is reinstituted on college campuses by the Navy Department.

April 5

MARINES: At Hsin Ho, China, Communist guerrillas attack an ammunition supply point while another band waits to ambush a relief company sent by the 5th Marines. Five Americans are killed and 16 are wounded while the Chinese leave six dead on the field.

- On Peleliu, another 25 marines arrive to bolster the effort to round up all remaining Japanese holdouts.

April 15

AVIATION: The A-26 Invader *Reynolds Bombshell* flown by Captain William P. Odom establishes a new, round-the world flight record in 78 hours, 56 minutes. The distance covered is over 20,000 miles.

April 16

MILITARY: In Washington, D.C., President Harry S. Truman signs the Army-Navy Nurses Act of 1947 into law; this makes the Army Nurse Corps a part of the regular army establishment. The Women's Medical Specialist Corps also comes into being, although in 1955 it is renamed the Army Medical Specialist Corps.

April 20

MARINES: On Peleliu, a force of 26 Japanese infantry under a lieutenant turn themselves in to a party of marines looking for them. They are joined by seven additional soldiers on the following day.

April 22–24

MARINES: In Washington, D.C., Commandant Major General Archie Vandegrift again appears before the Senate Armed Services Committee, where he expresses only moderate concern about the new defense unification bill.

April 30

AVIATION: A standard nomenclature for guided missiles is adopted by the army and navy. Henceforth, designations will contain either A (Air), S (Surface), or U (Underwater) to indicate the missile type and its target.

May 1

MARINES: At Tsingtao, China, the Fleet Marine Force Western Pacific (FMF-WESPAC) becomes the sole controlling force for the region following the departure of the 1st Marine Division and the 1st Marine Air Wing.

May 12

MARINES: A chapter closes in Marine Corps history once the final elements of the 5th Marines depart Beijing and head for redeployment on Guam.

May 21

AVIATION: At NACA Langley, Virginia, engineers test what is probably the first stealth airplane, an almost silent machine employing a special, five-bladed propeller, or muffled exhausts.

May 22

AVIATION: At White Sands Proving Ground, New Mexico, the Corporal E missile is successfully launched and tested; this is the army's first ballistic missile to be designed solely in the United States.

May 23

MARINES: At Peitaiho Beach, China, marines rescue and evacuate 66 American and foreign nationals after Communist troops began attacking the area.

May 24

MILITARY: To thwart a potential Communist takeover of Greece, President Harry S. Truman authorizes creation of the U.S. Army Military Group-Greece (USAMGG), which facilitates delivery of modern weapons and training to Greek forces. This is one of the earliest manifestations of the Truman Doctrine to help fight the spread of communism.

May 27

AVIATION: At the White Sands Proving Ground, the new Corporal E surface-to-surface rocket exceeds all technical expectations on its maiden flight.

June 1

MARINES: On Guam, the 1st Marine Division is reactivated; at the time, it consists of the 5th Marines and the 1st Battalion, 11th Field Artillery.

June 5

AVIATION: The Air Materiel Command (AMC) contracts with New York University to construct the army's first research balloon.

DIPLOMACY: Secretary of State George C. Marshall, speaking at Harvard University, delineates his program for providing massive amounts of aid to the struggling democracies of Western Europe to thwart any potential Communist takeovers. His program to rebuild economic infrastructure to insure political stability gains fame as the Marshall Plan. Aid is also offered to the Soviet Union and its satellites, but dictator Joseph Stalin refuses.

June 17

MARINES: In Washington, D.C., retiring brigadier general Merritt Edson testifies before the House Committee on Expenditures in the Executive Department. He opposes the new unification bill because of the perceived threat it represents toward civilian control of the military.

June 18

MILITARY: Colonel Florence Blanchfield, Army Nurse Corps, becomes the first woman tended a regular army commission.

June 19

AVIATION: Over Muroc Dry Lake, California, Colonel Albert Boyd, the Army Air Force's chief test pilot, sets a new world air speed record of 623.8 miles per hour in a P-80R Shooting Star jet fighter.

June 20

MARINES: By this date, the majority of the 1st Marine Division has shipped out to Guam. All that remains at Tsingtao, China, are the headquarters and 2nd Battalion, 1st Marines, some aviation detachments, and the 12th Service Battalion; their purpose is to protect the few remaining American citizens still living in the area.

June 23

NAVAL: In Washington, D.C., Secretary of the Navy James V. Forrestal issues a statement to senior U.S. Navy and Marine Corps personnel that they are free to express their opinion about the unification bill before Congress. Thus assured, several leader go on record opposing the bill as written.

June 25

AVIATION: The Boeing XB-50, an improved version of the classic B-29 bomber, makes its maiden flight. It serves as a bomber until 1955 and as a tanker until 1965.

June 30

AVIATION: In light of rising friction between the Army Air Force and NACA, a meeting of representatives at Wright Field, Ohio, parcels out responsibilities for the ongoing X-1 program. Henceforth, the army will be responsible for breaking the sound barrier while NACA will monitor, collect, and evaluate research information obtained from these activities.

MILITARY: World War II demobilization ends when the last wartime draftee is discharged back to civilian life.

MARINES: In Washington, D.C., President Harry S. Truman signs legislation posthumously promoting Lieutenant General Roy S. Geiger to full general (four-star).

- By this date, Marine Corps manpower levels have dipped to 7,506 officers and 85,547 enlisted men, far below the 108,000 ceiling established by Congress.

July

DIPLOMACY: In an essay signed anonymously by “X,” published in *Foreign Affairs* magazine, foreign service officer George Kennan suggests that the United States adopt a policy of “containment”—shifting U.S. political, economic, and military resources to threatened regions—to counter Soviet expansionism. In concert with the Truman Doctrine and the Marshall Plan, containment is the third and final policy guiding American foreign policy throughout the cold war period.

July 1

AVIATION: In light of postwar fiscal retrenchment, the MX-774 program, destined to create the first intercontinental ballistic missile, is cancelled. Revived later on, it creates the Atlas missile.

July 3

AVIATION: A 10-balloon cluster designed by New York University scientists is released by the Army Air Force. Rigged to carry aloft a 50-pound instrument package, it reaches an altitude of 18,550 feet.

July 4

MARINES: On Guam, the 1st Marine Brigade names its cantonment Camp Witek after Private Frank P. Witek, who received a posthumous Medal of Honor there in 1944.

July 6

MARINES: At Camp Pendleton, California, the headquarters unit of the 1st Marine Division arrives; Pendleton has since served as its permanent home station.

July 7

MARINES: In Quantico, Virginia, the first postwar Platoon Leaders Class officer training course begins.

July 16

MARINES: In Washington, the tussle over defense unification continues as Clare Hoffman, chair of the House Committee on Expenditures in the Executive Department, reports a new version of the bill that clearly delineates the roles and mission of the Marine Corps in national defense and also minimizes the merger between the War and Navy Departments. Once passed by the House it goes to a Conference Committee, with the Senate version preferred by President Harry S. Truman.

- At Camp Pendleton, California, the 3rd Marine Brigade is disbanded and its personnel are absorbed into the 1st Marine Division.

July 18

AVIATION: In Washington, D.C., President Harry S. Truman appoints Thomas K. Finletter to chair a five-man board tasked with sounding out the best ideas for providing the United States with the greatest benefits from aviation.

July 19

MILITARY: In Washington, D.C., Robert P. Patterson is replaced as secretary of war by Kenneth C. Royall; Royall also becomes the first man to hold the title secretary of the army.

July 22

MARINES: The *Freedom Train*, which carries treasured documents and artifacts of American history on a national tour, is guarded by a detachment of 26 marines.

July 26

MILITARY: In Washington, D.C., President Harry S. Truman signs the National Security Act of 1947 into law; this mandates a “National Security Establishment” consisting of the U.S. Army, U.S. Navy/Marines Corps, and a new, independent U.S. Air Force. A National Air Guard also is established as a reserve unit of the air force. Moreover, the new cabinet post of secretary of defense is created as the chief presidential adviser in military affairs while the various department heads serve under him; current secretary of the navy James V. Forrestal is the first appointee. Furthermore, the Joint Chiefs of Staff (JCS) receives statutory recognition, although the commandant, Marine Corps, is not a member. The Central Intelligence Agency (CIA) and National Security Council (NSC) emerge as separate entities.

August 4

MILITARY: To improve administrative efficiency, all ancillary organizations of the Medical Department are now collectively grouped under the new Medical Service Corps. The four sections involved are Pharmacy, Supply, and Administration; Medical and Allied Sciences; Sanitary Engineering; and Optometry.

August 7

MARINES: In Washington, D.C., Congress passes a new law that raises the permanent rank of the commandant, Marine Corps, to four stars.

August 20

AVIATION: Over Muroc, California, a Douglas D-588-1 Skystreak piloted by Marine Lieutenant Colonel Marion Carl establishes a new world speed record of 640.6 miles per hour. Carl beats his own record with the same aircraft five days later.

**Carl, Marion (1915–1998)**

Marine Corps general, aviator

Marion Carl was born near Hubbard, Oregon, on November 1, 1915, and, in 1936, after graduating from the University of Oregon, he joined the Marine Corps as a private. After attending the flight school at Pensacola Naval Air Station, he received his wings and a lieutenant's commission. Carl served several years as a flight instructor, then transferred to Midway Island in the Pacific with Marine Air Group 21. On June 3, 1942, the Americans there were roughly handled by highly maneuverable Japanese aircraft, but Carl managed to flame a A6M Zero in his F4F Wildcat. He was one of three surviving pilots in his squadron and he received the Navy Cross. Soon after, Carl transferred to VMF-223 on Guadalcanal, where he shot down four more Japanese aircraft, becoming the first Marine Corps ace of the war. He also entered into friendly competition with his commanding officer, Major John Smith, to see who could down more enemy planes. On September 9, 1942, Carl was himself shot down and spent five days in the jungle making his way back to American lines, rather disturbed that, in his absence, Smith's tally had exceeded his own. By the time he left Guadalcanal, Carl's score stood at 16 kills, which won him a second Navy Cross. He rose to captain stateside and then returned to the Solomon Islands flying the new F4U Corsair fighters, bagging additional Zeroes for a total of 18. At this juncture, Carl drew a staff assignment at Jacksonville Naval Air Station and, despite

his protests, spent the final months of the war behind a desk.

After the war, Carl volunteered as a test pilot and spent two years flying experimental jets. In 1946 he made some of the earliest carrier landings in jet aircraft and he also became the Marine Corps first helicopter pilot. On August 25, 1947, he became the fastest man alive by flying the Douglas D-558-1 Skystreak at 650 miles per hour. Carl rose to lieutenant colonel, and, on August 21, 1953, he broke another world speed record by piloting the Douglas D-558-2 Skyrocket to an altitude of 83,000 feet. He resumed military flights in 1955 by piloting reconnaissance aircraft over Red China as a colonel, and, in 1958, he was allowed to attend the Air War College at Maxwell Air Force Base. Carl next served as a brigadier general in Vietnam by commanding the First Marine Expeditionary Brigade at Da Nang. He personally flew over 40 jet and helicopter combat missions. In April 1967 he transferred back to command the Marine Corps Air Station at Cherry Point, North Carolina, and, that fall, he rose to major general commanding the Second Marine Aircraft Wing. In May 1973 Carl concluded 35 years of active service by retiring, having accumulated over 14,000 hours of flight time in 250 different types of aircraft. This singular aviator died in a robbery attempt at his home in Roseburg, Oregon, on June 25, 1998. Close acquaintances once described him as the "ultimate fighter pilot."

August 22

AVIATION: At Langley, Virginia, Dr. Hugh L. Dryden, a former confidant of Theodore von Karman, is appointed the director of NACA Aeronautical Research.

August 27

MARINES: The pullout of the 1st Battalion, 1st Marines from Tientsin, China, leaves the Fleet Marine Force Western Pacific (FMFWESPAC) at Tsingtao as the only marine contingent left on Chinese soil.

August 28

AVIATION: At Carswell Air Force Base, Texas, the first of 22 production model Convair B-36A Peacemakers makes its maiden flight. This initial version is intended as a training raft for future combat crews.

September 6

AVIATION: The first American launching of a German V-2 rocket at sea is completed onboard the carrier *Midway*.

September 15

MILITARY: The army-led occupation of Italy officially ends. Moreover, because Italy is now a member of the new North Atlantic Treaty Organization (NATO), American forces will remain at several leased bases.

MARINES: In light of declining military budgets, the Marine Corps adopts the J-series tables of organization whereby infantry regiment headquarters are abolished and battalion landing teams are redesignated as regiments.

September 18

AVIATION: After a long struggle, the U.S. Air Force finally emerges as an independent arm of the American military. W. Stuart Symington is seated as the first secretary of the air force.

September 18–23

MILITARY: In Washington, D.C., once the National Security Act of 1947 takes effect, Secretary of the Navy James V. Forrestal becomes the new secretary of defense. Meanwhile, Kenneth C. Royall is appointed the first secretary of the army, while John L. Sullivan becomes the 49th secretary of the navy. Also, the former National Military Establishment is renamed the Department of Defense.

September 19

MILITARY: General Albert C. Wedemeyer reports back to President Harry S. Truman concerning recent events in China and proposes a five-year military assistance program to shore up the Nationalist regime of Chiang Kai-shek.

September 22

AVIATION: At Stephenville, Newfoundland, a remote-controlled C-54 transport aircraft lifts off and flies nonstop to Brize Norton, England. This is the first aircraft to cross the Atlantic and safely land under these conditions.

September 25

AVIATION: At White Sands Proving Ground, New Mexico, the new Aerobee sounding rocket is successfully launched for the first time; this liquid-fueled device performs useful scientific research over the next 40 years.

September 26

AVIATION: In Washington, D.C., General Carl A. Spaatz officially becomes the first chief of staff of the U.S. Air Force. Accordingly, Secretary of Defense James V. Forrestal orders all personnel, facilities, and aircraft transferred from the army to the new service.

- Major General William E. Kepner, who commanded the Eighth Air Force during the war, is appointed to head the new Atomic Energy Division within the U.S. Air Force.

October 1

AVIATION: At Muroc Dry Lake, California, the North American XP-86, America's first swept-wing jet fighter, successfully flies for the first time. It enters service as the legendary F-86 Sabre.

- At Bethpage, New York, the Grumman XJR2F-1 amphibian prototype makes its maiden flight. This aircraft enters production as the SA-16 and HU-16 Albatross and saves thousands of downed pilots during the Korean War.

October 6

AVIATION: The Firebird XAAM-A-1, the first U.S. Air Force air-to-air missile, is successfully tested. However, production of such weapons is still a decade away.

October 14

AVIATION: Over Muroc Dry Lake, California, Captain Charles "Chuck" Yeager flies an experimental Bell XS-1 research plane through the sound barrier for the first time. Once dropped from the belly of a B-29 mothership, Yeager rockets upward at a speed of Mach 1.06 in level flight, winning the Mackay Trophy for most memorable flight of the year.

October 21

AVIATION: The futuristic Northrop YB-49 "Flying Wing" makes its maiden flight over Muroc Dry Lake, California. Despite an impressive performance, it is unstable as a bombing platform and does not enter production.

October 24

AVIATION: At Cherry Point, North Carolina, VMF-122 becomes the first marine jet squadron to fly McDonnell FH-1 Phantoms under the command of Major Marion Carl.

November 10–14

MARINES: Off the Southern California coast, the 1st Marine Division holds large-scale amphibious exercises during the next five days.

November 14

DIPLOMACY: In New York, the United Nations establishes a Korean commission to oversee elections in Korea despite objections by the Soviets, who boycott the proceedings.

November 15

AVIATION: The air force reveals the existence of its one-man XH-20 *Little Henry* ramjet helicopter, which first flew the previous May 5. A novelty, it does not enter production and the prototype is on display at the Air Force Museum, Dayton, Ohio.

**Yeager, Chuck (1923–)***Air Force officer*

Charles Elwood (“Chuck”) Yeager was born in Myra, West Virginia, on February 13, 1923, the son of an oil driller. He joined the Army Air Corps in 1940 and trained as an airplane mechanic but developed an affinity for flying and earned his pilot’s wings at Luke Field, Arizona, in July 1942. Yeager subsequently flew P-51 Mustangs with the 363rd Fighter Squadron in England, where, in 55 missions, he shot down 13 German aircraft, including five in one day. In the course of intense aerial combat, Yeager was himself downed over France and fled across the Pyrenees to Spain with the help

of the French underground. He returned to combat soon after and his most notable kill came on November 6, 1944, when a futuristic Messerschmitt Me-262 jet fighter fell before his guns. After the war, Yeager reported to Perrin Field, Texas, where he trained pilots as an instructor. However, the new jet age had dawned and he yearned to be a part of it. In 1947 he was selected to fly the top-secret Bell XS-1 rocket-powered research aircraft owing to his excellent reputation for piloting and his relative short

Captain Charles E. Yeager is shown here standing in front of the U.S. Air Force’s Bell-built X-1 supersonic research aircraft. (U.S. Air Force)

(continued)

stature, for the cockpit of this streamlined machine was extremely cramped. On October 14, 1947, Yeager was released by a B-29 bomber and broke the sound barrier at Mach 1, faster than 660 miles per hour, for the first time. He accomplished this despite the fact that two days earlier he had fallen from his horse and broken two ribs. His feat won him the prestigious Mackay Trophy for the year's most outstanding flight. Yeager continued flying out of Edwards Air Force Base, California, where, in December 1953, he piloted a new Bell X-1A to 1,650 miles per hour, roughly three times the speed of sound. Tragedy nearly struck when the craft began tumbling and he fell nearly 50,000 feet (10 miles) before regaining control. President Dwight D. Eisenhower awarded him the Harmon trophy for outstanding airmanship.

In 1954 Yeager left flight testing to command an F-100 Super Sabre squad-

ron in Germany. He returned home three years later a lieutenant colonel. In 1961 he assumed command of the Air Force Flight Test Center at Edwards Air Force Base, where, from 1962 to 1966, he trained 19 astronauts. In 1969 he resumed combat operations in commanding the 405th Tactical Fighter Wing, and he flew an additional 127 missions over Vietnam in Martin B-57 Intruders. He retired from active duty in 1975 as a brigadier general and retained his celebrity status. In 1983 actor Sam Shepard played Yeager in the movie *The Right Stuff* and, two years later, President Ronald W. Reagan awarded him the Presidential Medal of Freedom. On October 14, 1997, the 50th anniversary of his record-breaking flight, Yeager once again broke the sound barrier in his supersonic F-15 Eagle jet fighter for the last time at an Edwards Air Force Base air show. He has since retired and resides in Cedar Ridge, California. In an active career spanning 50 years, Yeager flew and tested no less than 330 different types of aircraft.

November 21

NAVAL: The prototype Grumman XF9F-2 jet fighter makes its maiden flight, and it enters service as the F9F Panther.

November 23

AVIATION: In San Diego, California, the gigantic Convair XC-99 prototype makes its maiden flight. This huge cargo plane is capable of lifting 400 fully armed troops and is based on the B-36 Peacekeeper but, unlike the bomber version, it does not enter production.

November 24

AVIATION: At the White Sands Proving Ground, New Mexico, technicians fire a liquid-fueled Aerobee rocket to an altitude of 190,000 feet.

November 26

AVIATION: At Langley, Virginia, NACA scientists successfully operate the first hypersonic flow wind tunnel to study airfoils faster than the speed of sound.

December 1

AVIATION: At Quantico, Virginia, HMX-1, the first experimental marine helicopter squadron, assembles. It is to be equipped with Sikorsky H3S-1 and Piasecki HRP-1 helicopters.

NAVAL: Admiral William H. P. Blandy is appointed the first commander in chief, Atlantic Command, and commander in chief, Atlantic Fleet.

December 10

AVIATION: Lieutenant Colonel John P. Stapp becomes the first human being to study the effects of rapid acceleration along a 2,000-foot track while strapped to a rocket sled. No serious injuries result.

December 15

NAVAL: In Washington, D.C., Admiral Louis E. Denfield is appointed the 11th chief of naval operations.

December 17

AVIATION: Over Seattle, Washington, the swept-wing Boeing XB-47, the most important multijet bomber in aviation history, flies for the first time. It has been designed with a cruising range of 1,500 miles at speeds of up to 500 miles per hour and inspires other significant designs, such as the B-52 bomber, the KC-135 aerial tanker, and the 707 commercial airliner.

December 25

MARINES: In China, five marines stumble into Communist-held territory while on a hunting expedition and are ambushed; one American is killed and the others are taken captive.

December 30

AVIATION: In Washington, D.C., the National Military Establishment assigns the U.S. Air Force sole responsibility for developing the Joint Long-Range Proving Ground at Cape Canaveral, Florida, and other down-range sites.

1948**January**

MILITARY: In three years, army personnel levels have dropped from 8 million to a mere 554,000; moreover, many of its major weapons systems are verging on technical obsolescence.

January 1

MARINES: In Washington, D.C., Major General Clifton B. Cates is appointed the 19th commandant of the Marine Corps.

- In California, the Marine Corps Base San Diego is redesignated Marine Corps Recruit Depot San Diego.

January 2

AVIATION: At Patterson Field, Ohio, the Air Force Technical Museum opens its doors for the first time.

January 4

AVIATION: At the University of California, scientists complete a pilot model for the world's first low-pressure supersonic wind tunnel.

January 5

MARINES: In the Mediterranean, the 2nd Marines are designated to join the Sixth Fleet for an extended tour afloat. This initiates a high visibility for marines as a landing force in that region.

January 7

MARINES: Admiral Chester W. Nimitz warns the government of Yugoslavia not to threaten the 5,000 army troops garrisoned in the free city of Trieste, and he orders the Sixth Fleet and the 2nd Marines into the Adriatic to back up his threat.

January 11

MARINES: In Philadelphia, Pennsylvania, the Marine Corps sponsors National Marine Corps Reserve Week to help spur a recruiting drive.

January 31

MARINES: Near Tsangkou Airfield, China, a marine patrol is attacked by Chinese Communists, although no casualties result. This is also the home base of air elements belonging to the Fleet Marine Force West Pacific (FMFWESPAC).

February

AVIATION: Throughout this month, Marine Corps air transports evacuate American and foreign nationals from Changchun, Manchuria, just ahead of victorious Communist Chinese forces.

February 6

AVIATION: At the White Sands Proving Ground, New Mexico, a V-2 fitted with a Hermes A-1 flight control system is launched and controlled for the first time by ground control. The dawn of guided missiles is at hand.

February 7

MILITARY: In Washington, D.C., General Omar N. Bradley gains appointment as the 17th chief of staff, U.S. Army, to replace outgoing General Dwight D. Eisenhower. Eisenhower has resigned from active duty to serve as president of Columbia University, New York.

February 9

AVIATION: At Quantico, Virginia, the Marine Experimental Helicopter Squadron (HMX-1) begins operating its first two Sikorsky HO2S-1s.

February 13

MARINES: In China, the Communists admit they have captured five marines on December 25, 1947, and that one has since died in captivity. They also demand a formal apology from the United States for having sided with the Nationalists during the civil war there.

February 16

AVIATION: B-29 bombers of the Strategic Air Command (SAC) deploy to airfields in Germany as part of a long-distance training exercise; on the return trip, they are "intercepted" by Royal Air Force fighters.

February 19

MILITARY: Command of the new Joint U.S. Military Advisory and Planning Group (JUSMAPG) goes to Lieutenant General James A. Van Fleet. This orga-

nization is tasked with providing arms and training to the Greek army and replaces the earlier USAMGG. There are presently 400 American military personnel in Greece, including 182 army advisers, and they prove instrumental in orchestrating the ultimate Greek victory over Communist insurgents by October 16, 1948.

February 20

AVIATION: The first Boeing B-50 Superfortress is delivered to the Strategic Air Command (SAC). Though superficially similar to the B-29 it replaces, the new machine boasts more powerful engines, a higher tail section to absorb the torque, and inflight refueling capabilities for virtually unlimited range.

February 24

DIPLOMACY: The legitimate government of Czechoslovakia is toppled in a coup orchestrated by the Soviet Union, underscoring for many in the West that the Iron Curtain is a political reality and the cold war is real.

March 5

SCIENCE: A U.S. Navy missile reaches speeds of 3,000 miles per hour and an altitude of 78 miles at White Sands, New Mexico.

March 10

AVIATION: Over Muroc Dry Lake, California, the air force reports that a B-29 has dropped a bomb weighing in excess of 42,000 pounds, larger than any aerial ordnance dropped during World War II.

MILITARY: General Jacob L. Devers gains appointment as commander of the newly created Army Field Forces, which replaces the earlier designation of army Ground Forces. This entity oversees army responsibilities within the continental United States.

March 11–14

MILITARY: In Key West, Florida, Secretary of Defense James V. Forrestal meets with the Joint Chiefs of Staff in an attempt to iron out traditional interservice rivalries. Ultimately, the navy halts its opposition to the air force monopoly on strategic bombing, while the air force will no longer oppose the new carrier under construction. Nor are the marines allowed to form a second land army. They will be restricted to only four divisions in wartime. Significantly, the new field of rocket research will not be allocated to one service. It is hoped that these arrangements will also end mounting friction in the field of nuclear warfare planning.

March 17

POLITICS: In Washington, D.C., President Harry S. Truman advocates before Congress that the military draft be resurrected and universal military training be instituted in light of the current world situation. He also urges speedy passage of the Marshall Plan to thwart the spread of communism in war-ravaged western Europe.

March 22

AVIATION: At Van Nuys, California, the prototype two-seat TP-80C successfully flies. It enters the service as the T-33 jet trainer, which trains thousands of American and allied jet pilots over the next two decades.

March 25

MARINES: Commandant General Clifton B. Cates testifies before Congress, calling for resumption of the military draft and a gradual implementation of universal military training. He is seconded in these opinions by the secretary of defense, the three service secretaries, and members of the Joint Chiefs of Staff.

March 28

AVIATION: To extend the range of strategic bombers, the Strategic Air Command begins testing KB-29M tanker aircraft in aerial refueling exercises. These craft can unload 2,300 gallons of fuel from a tank in the bomb bay from a hose and reel system in the tail.

March 31

DIPLOMACY: Beginning today, Soviet troops in East Germany begin repeatedly interrupting the flow of Western supplies and traffic to West Berlin, which come to a complete halt on June 24.

April 1

AVIATION: At Naval Air Station Lakehurst, New Jersey, HU-1 becomes the navy's first helicopter utility squadron.

MARINES: In China, the Communists release the four marines seized on Christmas Day last.

April 10

AVIATION: A marine air transport makes an emergency landing in Communist-held territory in China and the four crewmen are taken prisoner.

AVIATION: In Washington, D.C., Secretary of Defense James V. Forrestal assigns the U.S. Air Force the mission of protecting the United States from attack.

April 26

AVIATION: The air force, a technically oriented, forward-thinking service, orders that all ranks be racially integrated. Henceforth, African Americans will be employed wherever their talents best suit the service. This order anticipates President Harry S. Truman's antidiscrimination order by three months.

April 30

AVIATION: In Washington, D.C., General Hoyt S. Vandenberg becomes the second chief of staff of the Air Force.

May 6

AVIATION: Fighter Squadron VF-11, operating new McDonnell FH-1 Phantom fighters on the carrier *Saipan*, is established as the navy's first jet squadron.

May 10

MILITARY: Faced with a national railroad strike, President Harry S. Truman orders the army to seize control of all U.S. railroads until labor peace can be restored on July 19.

May 19

AVIATION: The marine experimental helicopter squadron HMX-1 goes to sea for the first time onboard the escort carrier *Palau*.

Vandenberg, Hoyt S. (1899–1954)

Air Force general

Hoyt Sanford Vandenberg was born in Milwaukee, Wisconsin, on January 24, 1899, and raised in Lowell, Massachusetts. He passed through the U.S. Military Academy in 1923 near the bottom of his class and became a second lieutenant assigned to the Air Service. Vandenberg, a natural flier, rose steadily through the ranks after winning his wings at Kelly Field, Texas, and, in 1927, he served as a flight instructor at March Field, California. Vandenberg subsequently attended the Air Corps Tactical School and the Command and General Staff School, where he met and befriended Carl A. Spaatz, another future air leader. Following American entry into World War II, he served on the staff of General James H. Doolittle in North Africa, rising to brigadier general as of December 1942. A year of distinguished service in the Mediterranean ensued. In March 1944 Vandenberg rose to major general and helped plan Operation Overlord in England. The following August he took charge of the Ninth Air Force and provided close support mission for General George S. Patton's Third Army as it raced across France. Shortly before World War II ended, Vandenberg, who rose from lieutenant colonel to lieutenant general in the space of three years, was back home functioning as assistant chief of staff for the Army Air Force.

In April 1947 Vandenberg's friend, General Spaatz, appointed him deputy chief of staff of the newly independent U.S. Air Force. He succeeded Spaatz the following year and became, aged 48 years, the youngest four-star general in service. Sub-

Hoyt S. Vandenberg (U.S. Air Force)

sequently, he made several critical decisions that catapulted the air force to the forefront of national defense. Vandenberg realized that, in an age of fiscal restraint, the greatest firepower available would be in the form of nuclear weapons, so he opted to spend most of his budget on expensive, impressive systems like Convair's giant B-36 bomber and a host of new jet aircraft. He also instituted the new Strategic Air Command (SAC) under General George C. Kenny to usher in the age of nuclear deterrence. Throughout 1948 he responded to the challenge of com-

(continues)

(continued)

munism by authorizing Operation Vittles, a massive airlift that broke the Soviet-inspired Berlin blockade. The cold war became much hotter once North Korean Communists invaded South Korea, and Vandenberg orchestrated a massive air campaign that help beat them back. The conflict also led to a resurgence in defense spending, for which the air force was the major beneficiary, and

Vandenberg proved instrumental in expanding its nuclear, tactical, and airlift capabilities. During his tenure, the service expanded from 49 to 90 combat wings, becoming the largest aerial force in the world. Unfortunately, poor health forced Vandenberg to resign from office, and he died of cancer in Washington, D.C., on April 2, 1954. He was a far-sighted aviation leader who put the U.S. Air Force on a sound footing for the remainder of the cold war.

May 20

AVIATION: Over Inglewood, California, the first production F-86A Sabre jet fighter flies. This is the first of 6,000 aircraft constructed in several versions.

May 23

AVIATION: During Operation Packard II at Camp Lejeune, North Carolina, experimental helicopter squadron HMX-1 ferries 66 marines from the escort carrier *Palau* to positions on land.

May 24

AVIATION: Noted aviatrix Jacqueline Cochran sets a world speed record for propeller-driven aircraft over a 1,000-kilometer course by reaching 432 miles per hour.

May 26

AVIATION: In Washington, D.C., President Harry S. Truman signs legislation creating the Civil Air Patrol as an auxiliary of the U.S. Air Force.

June 1

AVIATION: The air force and navy transport commands are combined and unified under a single, U.S. Air Force-controlled entity, the Military Air Transport Service (MATS) under Major General Lawrence S. Kuter.

June 10

AVIATION: The air force confirms that the Bell X-1 rocket plane has exceeded the speed of sound on several occasions since Chuck Yeager's landmark flight was publicized.

June 11

AVIATION: The air force updates its aircraft designations: henceforth "F" is used to signify fighters, "R" stands for reconnaissance, and "H" is used for helicopters. These replace the P, F, and R designations in use since before World War II.

June 12

MILITARY: In Washington, D.C., Congress passes the Women's Armed Services Integration Act granting the Women's Army Corps (WAC) both regular and reserve status as part of the standing U.S. Army, U.S. Air Force, U.S. Navy, and Marine Corps. However, although women may now serve in the regulars, they are restricted to 2 percent of each service. The present WAC director, Colonel Mary A. Halloran, is also retained in office.

June 16

AVIATION: Colonel Geraldine P. May, the first female in the air force to achieve that rank, is appointed the first director of Women in the Air Force (WAF).

June 18

AVIATION: At Davis-Monthan Air Force Base, Tucson, Arizona, and Roswell, New Mexico, the air force activates the first two aerial refueling squadrons in its inventory; both are equipped with Boeing KB-29Ms.

June 24

AVIATION: A Soviet land blockade of Berlin commences, which requires the Western powers to supply the city's inhabitants by air. It becomes known as the Berlin airlift, or Operation Vittles.

MILITARY: In light of cold war realities, President Harry S. Truman signs the new Selective Service Act, requiring all males between 18 and 25 to register for possible military service.

June 26

AVIATION: At Fort Worth, Texas, the first B-36 Peacekeeper intercontinental bomber is accepted into service by the Air Force's 7th Bomb Wing. This is also the

Transport airplanes taking part in the Berlin airlift (National Archives)

world's largest bombardment aircraft, with a wingspan of 230 feet and a length of 160 feet. By year's end, 35 of the giant craft are operational.

- Responding to the Russian-imposed land blockade of Berlin, the American European Command authorizes Operation Vittles. Transport aircraft begin flying in food and other essential supplies for the city's beleaguered inhabitants. The first aircraft deployed are C-47s while U.S. Air Force Europe (USAFE) commander General Curtis E. LeMay begins gathering aircraft elsewhere.

June 30

MARINES: In Washington, D.C., President Harry S. Truman signs the Reserve Retirement Law into effect, which allows reserve members to receive retirement pay for their time in uniform.

- Present manpower levels have dipped to 6,907 officers and 78,081 enlisted men, largely on account of budgetary constraint and fiscal retrenchment.

July 2

MARINES: In China, the Communists release four captive airmen seized on April 5.

July 13

AVIATION: The Convair MX-774 rocket is successfully tested and features moveable (gimballed) directional nozzles that later show up on the Atlas ICBM in the late 1950s.

July 17

AVIATION: Air Force B-29s belonging to the Strategic Air Command (SAC) arrive in England for training. Because these aircraft are capable of delivering atomic weapons, their presence send a powerful signal to the Soviet Union.

July 18

MARINES: As the first Arab-Israeli War rages, the 21st Marines are tapped to serve as a provisional consular guard to protect the U.S. consul general in Jerusalem.

July 20

AVIATION: At Selfridge Field, Michigan, a squadron of 16 F-80 Shooting Stars commanded by Colonel David Schilling takes off and flies nonstop to Scotland while en route to Furtsenfeldbruck, West Germany. This is the first mass west-to-east transatlantic flight by jet fighters and takes nine hours and 20 minutes.

MILITARY: In Washington, D.C., President Harry S. Truman orders all males between the ages of 18 and 25 to register for the draft by September 18; the actual draft begins on October 1.

July 22

MARINES: The Marine Corps declares that it will not accept draftees this year as its recruiting quotas are being met.

July 23

AVIATION: In light of the Soviet blockade of Berlin, West Germany, the Military Airlift Transport Service (MATS) establishes the Airlift Task Force under Major General William H. Tunner to counter it.

July 26

MILITARY: In a major development, President Harry S. Truman signs Executive Order 9981, mandating an end to segregation in all U.S. armed forces—although the last segregated unit is not disbanded until 1954. The president also calls for an immediate end to racial discrimination in federal employment.

July 30

AVIATION: The air force accepts delivery of its first operational North American B-45A Tornado. This is the first large jet bomber in aviation history and it serves capably over the next decade in a variety of roles.

August 6

AVIATION: Two B-29s from the 43rd Bomb Group, *Gas Gobbler* and *Lucky Lady*, complete a 20,000-mile flight around the world in 15 days

August 8

AVIATION: A Convair B-36 Peacekeeper touches down in Fort Worth, Texas, after flying 9,400 miles round trip and nonstop from Hawaii. Aerial refueling proves unnecessary.

August 9

MARINES: As amphibious CAMID exercises unfold at Camp Lejeune, North Carolina, all branches of the armed forces participate for the first time since World War II.

August 15

AVIATION: The marine experimental helicopter squadron HMX-1 accepts delivery of its first Piasecki HRP-1 twin-rotor helicopters. Due to its distinctive curved shape it is known as the “Flying Banana.”

MILITARY: In light of the recent division of the Korean Peninsula into Western and Soviet halves, the Provisional Military Advisory Group (PMAG) is established to funnel logistical support and equipment to the South Korean constabulary force. It presently consists of 100 officers and men.

POLITICS: In South Korea, Syngman Rhee becomes the first democratically elected president through U.S.-sponsored elections. North Korea, a sphere of the Soviet Union, does not allow elections.

August 16

AVIATION: At Muroc Dry Lake, California, the Northrop XF-89 prototype flies for the first time. It enters the service as the F-89 Scorpion and is the air force’s first all-weather, radar-guided interceptor.

August 20

NAVAL: At Newport, Rhode Island, Secretary of Defense James Forrestal convenes a second meeting of the Joint Chiefs of Staff at the Naval War College. He attempts to solidify and define the roles and missions of the respective services, whereby the air force temporarily receives control of all atom bombs.

August 23

AVIATION: Over Muroc Dry Lake, California, an XF-85 Goblin parasite fighter flown by test pilot Ed Schoch collides with its hookup trapeze dangling from a

B-36 bomber and is forced to crash-land. The notion of “parasite fighters” dates back to the 1930s when several were stored on dirigibles, but it never becomes operational.

August 25

MARINES: At Quantico, Virginia, Lieutenant John E. Rudder becomes the first African-American marine officer to receive a regular Marine Corps commission and begins his training at the Basic School.

September 3

AVIATION: In England, Operation Dagger unfolds as U.S. Air Force B-29s and Royal Air Force aircraft hold a joint defense exercise.

September 9

AVIATION: The navy founds Composite Squadron VC-5 to develop tactics for delivering atomic weapons from the decks of aircraft carriers. It is initially equipped with specially modified P2V Neptune patrol planes.

POLITICS: In North Korea, former Red Army member Kim Il Sung proclaims establishment of the Communist People’s Democratic Republic. Little known in the West, he intends to unify the Korean Peninsula under his rule by force, if necessary.

September 12–16

AVIATION: Over newly renamed Edwards Air Force Base (previously Muroc Dry Lake), California, the Convair XF-92 prototype flown by Sam Shannon is successfully flown. This sleek, delta-configured jet was inspired by Alexander Lippisch, a radical German aircraft designer and the information it gathers leads to several air force delta fighters a decade later.

September 15

AVIATION: Over Muroc Dry Lake, California, an F-86A flown by Major Richard L. Johnson sets a new world airspeed record of 671 miles per hour.

October 1

AVIATION: The seaplane tender *Norton* is converted into a guided missile test ship and is eventually designated AVM-1.

MARINES: By this date, the Marine Corps Reserve has risen to a strength of 116,000; of these, 37,742 presently serve in active duty units.

October 15

AVIATION: In Europe, Major General William H. Tunner, who successfully organized and commanded the cargo flying effort over the Himalayas in World War II, takes charge of the Berlin airlift. A logistical wizard, Tunner completely turns the flagging airlift around, making it highly successful.

October 18

MARINES: At Headquarters Marine Corps, Colonel Katherine A. Towle becomes the director of Women Marines and the first head of the female corps component.

October 19

AVIATION: In a major development, General Curtis E. LeMay gains appointment as the new head of the Strategic Air Command (SAC). Within a decade he trans-

forms it into the world's greatest bomber fleet and a major component of American nuclear deterrence.

October 20

AVIATION: The McDonnell XF-88 prototype flies for the first time, although it is subsequently cancelled and never enters production. However, the lessons learned lead to development of the highly successful F-101 Voodoo.

October 31

AVIATION: Air force authorities announce that an F-80 fighter has been flown at high altitude, powered by two wingtip ramjets. This is the first known instance of ramjet propulsion on a piloted craft.

November

AVIATION: Helicopter use now dawning, the Marine Corps publishes its first doctrine on the subject, *Amphibious Operations-Employment of Helicopters (Tentative)*.

November 4

AVIATION: In Santa Monica, California, the research-oriented RAND Corporation is established as a result of the joint Air Force-Douglas RAND project. It serves as an advisory body to the air force and draws upon noted scientists, industrialists, and military thinkers.

November 9

AVIATION: To contribute to Operation Vittles, the navy sends Transport Squadrons VR-6 and VR-8 to fly as part of the ongoing Berlin airlift. By the following July, they will have flown 45,990 flight hours and hauled 129,989 tons of cargo.

November 10

MEDICAL: At Randolph Air Force Base, Texas, the medical problems associated with space flight are the topic of the first-ever School of Aviation Medicine symposium.

November 14

MARINES: In Beijing and Tientsin, China, small detachments of marines arrive to escort the few remaining Americans to safety as Communist forces begin closing in on those cities.

November 16

NAVAL: At the Boston Navy Yard, Massachusetts, the heavy cruiser *Des Moines* is commissioned into service. This is the first of a three-ship class and, equipped with automatic 8-inch guns, it is the largest heavy cruiser ever launched.

November 17

MARINES: In light of the deteriorating situation in China, Secretary of the Navy James V. Forrestal directs that 1,250 marines on Guam will be immediately transported to Tsingtao to reinforce the 3,000 men comprising the Fleet Marine Force Western Pacific (FMFWESPAC). A platoon of marines is also deployed to Nan-king to protect the American embassy before the city falls to Communist forces.

November 18

MARINES: In Haifa, Israel, a detachment of 62 marines is tapped to serve in the U.S. Military Observer Group and help conduct truce supervision.

November 20

AVIATION: A U.S. Army Signal Corps balloon reaches an altitude of 140,000 feet (26.5 miles).

November 28

MARINES: On Guam, BLT-9, consisting of the 9th Marines and reinforcing elements, embarks on the transport *Bayfield* for China. It is tasked with evacuating 2,500 American citizens from Shanghai before it falls to Communist forces.

November 30

AVIATION: A Douglas C-54 Skymaster transport, fitted with Curtis-Wright reversible propellers, manages a controlled descent from 15,000 feet to just 1,000 feet in only one minute and 22 seconds.

December 1

AVIATION: While created over a year ago, the Continental Air Command (CAC) is finally activated.

December 2

AVIATION: The prototype Beech Model 45 demonstrator performs its maiden flight. It enters the service as the T-34A Mentor, the first primary trainer adopted since the end of World War II, and it remains in the inventory until 1961.

December 8

AVIATION: Today a B-36 Peacekeeper flies nonstop from Carswell Air Force Base, Texas, to Hawaii, flying all 9,400 miles without refueling. Concurrently, a B-50 also makes the same trip, assisted by three inflight refuelings. Both feats demonstrate the range potential of Strategic Air Command (SAC) bombers.

December 9–27

AVIATION: In Greenland, a severe storm forces a C-47 to crash land on the icecap, stranding seven airmen there. An attempt to reach them through a glider towed by a B-17 fails, stranding another five would-be rescuers as well. An attempt is launched to rescue them before they freeze to death.

December 10

MILITARY: At Ceska Kubie, Czechoslovakia, two American soldiers from the 6th Armored Cavalry Regiment are detained by Communist forces and kept prisoner until February 1949.

December 15

MILITARY: The head of the U.S. Military Advisory Group in China declares that the Nationalist Army is not fighting effectively against Communist forces and, in all likelihood, will lose control of the entire country.

December 16

AVIATION: At Edwards Air Force Base, California, the tailless Northrop X-4 Bantam jet performs its maiden flight. Two X-4s are built to test the characteristics of tailless, swept-wing designs.

MARINES: BLT-9 arrives at Shanghai, China, although Secretary of State George C. Marshall declares that they will not get involved in the Chinese civil war unless violence threatens American lives.

December 17

AVIATION: In Washington, D.C., the original Wright flier, history's first heavier-than-air aircraft, is donated to the Smithsonian Institution for permanent display. Today is also the 45th anniversary of the first heavier-than-air flight.

December 28

AVIATION: A ski-equipped C-47 cargo plane flown by Lieutenant Colonel Emil Beaudry safely lands on the Greenland icecap and rescues 12 airmen who had crashed there on December 9. This daring rescue earns Beaudry the Mackay Trophy.

December 29

AVIATION: In Washington, D.C., Secretary of Defense Forrestal declares that the country is developing a program to place objects in low Earth orbit.

December 31

AVIATION: At this juncture, Operation Vittles has made its 100,000th flight during the Berlin airlift.

MARINES: By this date, the Marine Corps boasts 24 women officers and 300 enlisted on active duty.

1949**January**

MILITARY: With the aid of the draft, army manpower levels have increased to 660,473 officers and men.

January 3

MARINES: In Jerusalem, the formal marine guard is organized for the U.S. consulate there.

January 3–March 15

AVIATION: In the wake of severe snowstorms throughout the Midwest, air force transports commence Operation Hayride, bringing 4,700 tons of livestock feed and other supplies to snow-bound ranchers.

January 5

AVIATION: At Edwards Air Force Base, California, a Bell X-1 piloted by Chuck Yeager makes the first standard takeoff by a rocket-propelled airplane, rising to 13,000 feet while making an unofficial climbing record. This is the only such takeoff in the rocket research program.

January 8

AVIATION: Boeing's new, swept-wing XB-47 jet bomber makes a transcontinental flight in three hours, 46 minutes, at an average speed of 607 miles per hour.

January 19

AVIATION: At Holoman Air Force Base, New Mexico, the Martin XB-61 Matador surface-to-surface missile is successfully fired.

January 21

AVIATION: Marine fighter squadron VMF-211 leaves China and is reassigned to the carrier *Rendova* in the western Pacific.

January 22

AVIATION: An Air Force AT-6 is shot down by Communist guerrillas in Greece and the pilot is killed.

January 25

AVIATION: A new slate blue uniform is adopted by the air force to replace the World War II–vintage olive drab uniforms.

February 8

AVIATION: A B-47 Stratojet lifts off from Moses Lake Airfield, Washington, and shatters all existing transcontinental records by touching down at Andrews Air Force Base, Maryland, in three hours and 45 minutes. The raft maintained an average speed of 600 miles per hour, faster than most fighter jets of the day, and cuts the previous record nearly in half.

MARINES: At Tsingtao, China, the bulk of the Fleet Marine Force Western Pacific (FMFWESPAC) embarks and sails for the United States. They leave behind a detachment of the 3rd Marines to maintain order as the Chinese civil war rages around them.

February 9

MEDICAL: At Randolph Air Force Base, Texas, the School of Aviation Medicine establishes a Department of Space Medicine.

February 23

MARINES: At Parris Island, South Carolina, the 3rd Recruit Battalion is activated for the purpose of training female recruits, the first of whom arrive five days later.

February 24

AVIATION: The army supervises launching of a two-stage WAC-Corporal missile at the White Sands Proving Ground, New Mexico. The device is basically a modified German V-2 rocket with a nose attachment, but it reaches a record altitude of 244 miles at 5,150 miles per hour, becoming the first human object to skirt the fringes of outer space.

February 25

MARINES: In Alaska, 20,000 sailors and marines conduct a month-long amphibious exercise.

February 26

MARINES: At Camp Pendleton, California, the Fleet Marine Force Western Pacific (FMFWESPAC) disbands and its personnel are absorbed into the 1st Marine Division.

February 26–March 2

AVIATION: A Boeing B-50 Superfortress named *Lucky Lady II*, piloted by Captain James Gallagher, completes a round-the-world flight with four inflight refuelings over the Azores, Arabia, the Philippines, and Hawaii. The 23,452-mile trip was completed in 94 hours, one minute. It also puts potential aggressors on notice that the United States possesses viable intercontinental strike capability with atomic weapons. The crew wins the Mackay Trophy for outstanding flight of the year.

February 28

MILITARY: In Washington, D.C., the Hoover Commission on the Organization of the Executive Branch suggests that the secretary of defense be given greater authority over all branches of the armed forces so as to diminish interservice rivalry.

March

AVIATION: A P2V Neptune from Composite Squadron VC-5 launches from the carrier *Coral Sea* off the Atlantic Coast, then flies a 23-hour mission simulating an atomic strike on the West Coast before landing at Naval Air Station Patuxent River, Maryland.

March 2

MARINES: On Vieques Island, Puerto Rico, marines, army troops, and several platoons of Canadian soldiers conduct the largest amphibious exercise since World War II.

March 4

AVIATION: Since June 1948, the Berlin airlift has delivered over 1 million tons of coal, food, and supplies to the city's inhabitants.

March 5

MILITARY: In Washington, D.C., President Harry S. Truman adheres to the recommendation of the recent Hoover Commission in changing the National Security Act of 1947 to strengthen the secretary of defense's office at the expense of the service secretaries.

March 15

AVIATION: The Military Air Transport Service (MATS) establishes the Global Weather Service to assist operations of the Strategic Air Command (SAC).

March 23

AVIATION: The air force begins deploying four-engine North American B-45 Tornado jet bombers, the first such aircraft in the world, with the 47th Bomb Group at Barksdale Air Force Base, Louisiana, under Colonel Willis F. Chapman. A tough, two-year shakedown period ensues, but the Tornado achieves operational status.

March 26

AVIATION: At Fort Worth, Texas, the new Convair B-36D Peacekeeper debuts and features two wingtip pods housing four J-47 jet engines. The 10-engine behemoth is now capable of reaching 440 miles per hour in level flight and can lift an 85,000 lb. payload. Success, however, triggers an internecine struggle with navy officials, who hotly dispute the notion of atomic-armed strategic bombers in an age of fiscal retrenchment.

March 28

MILITARY: In Washington, D.C., Louis Johnson replaces James V. Forrestal as the second secretary of defense.

March 30

AVIATION: In Washington, D.C., President Harry S. Truman signs legislation mandating the nation's first, permanent radar defense network.

MARINES: In Shanghai, China, the 3rd Marines assume protection duties for American civilians in the city once BLT-9 embarks for the United States.

April

MARINES: In round two of the defense unification battle, Secretary of the Army Kenneth C. Royall testifies before Congress that the Marine Corps ought to be abolished.

April 4

DIPLOMACY: Lines of the cold war harden when 10 European nations join the United States and Canada in a mutual defense pact called the North Atlantic Treaty, which lays the groundwork for the North Atlantic Treaty Organization (NATO). Its charter members are the United States, Great Britain, France, Italy, Canada, Belgium, Luxembourg, Portugal, the Netherlands, Denmark, Norway, and Iceland. All signatories are committed to the military defense of Western Europe; this is also the first time that the United States has joined a military alliance in peacetime.

April 6

AVIATION: Curtiss-Wright declares that the XS-1 rocket research aircraft (built by Bell, powered by a Curtiss-Wright engine) has established an unofficial world speed record of 1,000 miles per hour.

- The Berlin airlift reaches its highest point of efficiency with one cargo plane landing at Tempelhof Airfield every four minutes for six consecutive hours.

April 16

AVIATION: At Van Nuys, California, the Lockheed YF-94 makes its maiden flight. This is a stretched version of the F-80 Shooting Star intended to serve as an all-weather interceptor, and it enters the service as the F-94 Starfire.

- By this date, 1,398 aircraft sorties of the Berlin airlift have delivered 12,940 tons of supplies to the citizens of that beleaguered city.

April 20

NAVAL: Military violence against foreigners in China reaches a new peak when Chinese forces shell a Royal Navy frigate moving up the Yangtze River to rescue British citizens marooned in Nanking. The British suffer 40 dead and 78 wounded. The Communists are playing for keeps.

April 21

MARINES: Because of escalating violence against foreign troops in China, the naval commander there orders the solitary Marine platoon, 3rd Marines, in Nanking to be evacuated by air to Shanghai as soon as possible.

April 23

NAVAL: In Washington, D.C., Secretary of Defense Louis Johnson cancels the new carrier *United States* only five days after its keel has been laid in Newport News, Virginia. Because this move was arbitrarily performed without consulting either Secretary of the Navy John L. Sullivan or Chief of Naval Operations admiral Louis E. Denfield, Sullivan resigns from office in protest.

April 26

AVIATION: In another blow aimed at the Marine Corps, Secretary of Defense Louis Johnson declares he is transferring all marine aviation assets and personnel to the new U.S. Air Force.

April 28

POLITICS: In Washington, D.C., political wrangling intensifies over the Marine Corps after Carl Vinson, chairman of the House Armed Services Committee informs Secretary of Defense Louis Johnson that any changes to the National Security Act of 1947, including those respecting Marine Corps aviation, must meet first with congressional approval.

April 29

MARINES: At Shanghai, China, the 3rd Marines embark for the United States, leaving a sole rifle company in Tsingtao as the only Leathernecks on the Asian landmass.

May 1

MARINES: In light of prevailing realities in China, the 7th Marines, en route to Shanghai, are rerouted back to Pearl Harbor, Hawaii.

May 7

AVIATION: A special act of Congress makes retired five-star general Henry H. Arnold a permanent general of the U.S. Air Force; he remains the only officer so honored.

May 9

AVIATION: At Quantico, Virginia, the marine experimental helicopter squadron HMX-1 performs a simulated amphibious assault for members of Congress. Eight HRP-1s convey 56 marines and 75mm pack howitzers into two successful lifts.

- At Edwards Air Force Base, California, the Republic XF-91 Thunderceptor jet/rocket hybrid performs its first flight. Based roughly on the F-84 Thunderjet, this new design employs inverse-tapered swept wings; it does not enter production.

May 11

AVIATION: In Washington, D.C., President Harry S. Truman signs legislation to construct a guided-missile test range for the air force at Cape Canaveral, Florida. The actual range itself extends 3,000 miles out to sea.

May 12

DIPLOMACY: In East Germany, Soviet forces lift their ground blockade of Berlin, but airlift sorties continue to build up stockpiles of supplies for an emergency.

May 14

NAVAL: The *Salem* becomes the last all-gun cruiser in the U.S. Navy; like all *Des Moines*-class vessels, it is equipped with automatic 8-inch guns.

May 16

MARINES: The 9th Marines are assigned to the 2nd Marine Division at Camp Lejeune, North Carolina.

- At Tsingtao, China, Company C, 3rd Marines embarks for the United States, ending postwar occupation duties on the Asian landmass.

May 20–21

AVIATION: At Camp Lejeune, North Carolina, Marine experimental helicopter squadron HMX-1 lifts several infantry units ashore as part of Operation Packard III.

May 21

AVIATION: Over Bridgeport, Connecticut, a Sikorsky S-52-1 flown by Captain H. D. Gaddis establishes a world altitude record 21,220 feet.

May 24–26

AVIATION: In New York City, the Institute of Aeronautical Sciences and the Royal Aeronautical Society convene their second International Conference of Aeronautics.

May 25

NAVAL: In Washington, D.C., Francis P. Matthews gains appointment as the 50th secretary of the navy.

May 26

NAVAL: Off Tsingtao, China, the cruiser *Manchester* sails off in anticipation of a Nationalist surrender there.

June 3

NAVAL: At Annapolis, Maryland, Wesley Brown is the first African-American cadet to graduate from the U.S. Naval Academy with an ensign's commission.

June 4

AVIATION: The streamlined Lockheed XF-90 strategic fighter successfully flies for the first time. It does not go into production, but, a decade later, it appears in the comic book *Black Hawk* as the protagonist's aircraft. Shortly afterward, it also appears in *Wonder Woman* comics as her invisible mount.

June 20

MILITARY: In Washington, D.C., Secretary of the Army Kenneth C. Royall is replaced by Gordon Gray.

June 29

MILITARY: Pursuant to a prior agreement, the United States removes the last of its X Corps from South Korea, while 472 military advisers remain in place. No sooner do they depart, however, than a series of hostile events takes place along the 38th parallel separating South and North Korea.

June 30

MILITARY: The 5th Regimental Combat Team is the last U.S. Army unit to depart South Korea at the end of American occupation. The only military presence are the 472 officers and men attached to the Korean Military Assistance Group (KMAG).

July 1

AVIATION: In California, the first F-94A Starfire, the first American jet fitted with an afterburner, is flown for the first time.

MEDICAL: Major General Malcom C. Grow is appointed first surgeon general of the Air Force and the U.S. Air Force Medical Service is also established.

MILITARY: In light of Philippine independence, the army disbands its elite Philippine Scouts after 48 years of distinguished service.

MARINES: In light of budgetary cuts, the Fleet Marine Force plans to reduce its number of battalions from 11 to eight, and aviation squadrons from 23 to 12.

July 3

AVIATION: The B-29 *Enola Gay*, which dropped the atomic bomb on Hiroshima, Japan and helped to end World War II, is donated to the Smithsonian Institution and stored at Park Ridge, Illinois.

August 1

NAVAL: In the western Pacific, the Seventh Fleet is reestablished as the navy's forward-deployed force, ostensibly to keep an eye on Red China and its threats to invade Taiwan.

August 8

AVIATION: Over Edwards Air Force Base, California, a Bell X-1 flown by Major Frank K. Everest reaches a record 71,902 feet, the highest altitude attained by a first generation research aircraft.

August 9

AVIATION: Over South Carolina, Lieutenant J. L. Fruin, flying an F2H Banshee jet fighter belonging to VF-171, suffers from engine trouble and punches out at 500 miles per hour. He is the first American jet aviator to use an ejection seat in the line of duty.

- The Soviet Union, aided and abetted by an efficient spy ring at Alamogordo, New Mexico, during World War II, detonates its first atomic bomb at Semipalatinsk. It is a virtual copy of the "Fat Boy" weapon that destroyed Nagasaki, Japan, five years earlier.

August 10

MILITARY: The National Security Act is amended by President Harry S. Truman, which establishes the new Department of Defense (DoD) to replace the National Military Establishment. It also grants subcabinet status to the secretaries of the army, navy, and air force, who thus lose their executive status and become subordinate branches within the department. The Joint Chiefs of Staff is also enlarged from 100 to 210 officers while the Marine Corps mission, originally spelled out in 1947, is left unaltered.

August 11

MARINES: In the Middle East, Brigadier General William R. Riley becomes chief of staff of the UN Palestine Truce Mission to oversee the shaky peace between Israel and its resentful Arab neighbors.

August 16

MILITARY: General Omar Bradley is appointed the first chairman of the Joint Chiefs of Staff (JCS). General Joseph Lawton succeeds him as chief of staff.

August 25

AVIATION: Over Edwards Air Force Base, California, a Bell X-1 flown by Major Frank K. Everest experiences drastic decompression at 69,000 feet, and he becomes the first pilot saved by a T-1 pressure suit; he is able to land safely.

August 26

NAVAL: In the Greenland Sea, the submarine *Cochino* suffers a battery explosion while submerged and is forced to surface. Before a second explosion sinks the

vessel, its crew safely transfers to the submarine *Cusk* nearby; one civilian and six sailors are killed.

August 31

GENERAL: The Grand Army of the Republic holds its 83rd encampment in Indianapolis, Indiana, and is attended by six of the surviving 16 Civil War veterans.

September

AVIATION: A Sikorsky S-52 helicopter, the first such machine fitted with metal rotor blades, also becomes the first helicopter to be successfully looped in flight.

September 8

MARINES: Annie E. Graham makes history by becoming the first African-American female to enlist in the Marine Corps.

September 9

MARINES: Consistent with new desegregation laws, the Montford Point Camp reserved for African-American marines closes down and all personnel are integrated into training platoons at Camp Lejeune, North Carolina.

September 24

AVIATION: At Inglewood, California, the prototype T-28 flies for the first time. It enters the service as the T-28A Trojan and serves as a basic trainer and an attack plane through the Vietnam War years.

September 30

AVIATION: The Berlin airlift, America's first victory of the cold war, officially concludes today. More than 277,000 flights have been flown by U.S. Air Force, U.S. Navy, Royal Air Force, and Commonwealth aircraft, which delivered 2.34 million tons of food, coal, and supplies. Air force pilots are responsible for 1.78 million tons of that total.

October 1

AVIATION: At Cape Canaveral, Florida, Major General W. L. Richardson takes charge of the new Long Range Proving Ground.

DIPLOMACY: In Beijing, China, Chairman Mao Zedong declares the founding of the People's Republic of China; remaining Nationalist forces still on the Asian continent flee to Taiwan offshore.

NAVAL: The navy establishes the Military Sea Transportation Service, which encompasses both army and navy cargo ships. It is controlled by the secretary of the navy.

MARINES: The J-series tables of organization are replaced and historic regiments are restored to their true numerical sequence. The 1st Marine Division acts first, converting the 1st, 6th, and 7th Marines into the headquarters, 1st Battalion and 2nd Battalion, 5th Marines.

October 5

POLITICS: In Washington, D.C., Congressman Carl Vinson, chairman of the House Ways and Means Committee, conducts hearings relative to complaints by navy and marine authorities that the sea services are being neglected. The seemingly arbitrary cancellation of the supercarrier *United States* is cited as the most glaring example. With shrinking defense appropriations also comes renewed

naval opposition to the air force's new B-36 intercontinental bomber. Several high-ranking naval officers, headed by Admiral Arthur W. Radford, testify to that effect before Congress.

October 11

AVIATION: In Washington, D.C., assistance director of Marine Corps Aviation, Brigadier General Vernon A. Megee, alerts the House Armed Services Committee that the air force is neglecting its close air support mission to the army and marines.

October 14

AVIATION: The Chase Aircraft Company XC-123 assault transport prototype flies for the first time. It enters service as the Fairchild C-123 Provider and performs yeoman work during the Vietnam War.

October 17

NAVAL: In Washington, D.C., Chief of Naval Operations Louis E. Denfeld defies instructions from the secretary of defense and secretary of the navy, and vociferously speaks out against the air force B-36 Peacekeeper program. He is consequently removed from office as of November 1. However, this "Revolt of the Admirals" induces Congress to preserve traditional roles for the U.S. Navy and Marine Corps in the standing military establishment.

MARINES: Commandant Clifton B. Cates declares before Congress that the Marine Corps is being made irrelevant despite provisions of the National Security Act of 1947 to the contrary. He also maintains that, because the marines lack representation on the Joint Chiefs of Staff, their budgets are being drastically cut.

October 21

MARINES: In Washington, D.C., Secretary of Defense Louis Johnson assures leaders of the Marine Corps that their service is secure. However, rumors abound that Secretary of the Navy John L. Sullivan resigned from office because of his vocal opposition to abolishing the corps.

October 25–26

MARINES: Off Hawaii, the navy and Marine Corps stage their largest ever amphibious assault exercises by "liberating" the islands from an aggressor.

October 27

AVIATION: In Washington, D.C., Congress passes the Unitary Wind Tunnel Act to construct several advanced wind tunnels at test facilities nationwide. A further \$100 million is earmarked for the new Arnold Engineering Development Center in Tullahoma, Tennessee.

October 30

MARINES: In line with the latest spate of defense expenditure reductions, plan are made to reduce existing marine battalions to two rifle companies of two platoons each.

November 2

NAVAL: In Washington, D.C., Admiral Forrest P. Sherman is appointed the 12th chief of naval operations to replace the defiant Louis Denfeld; he is the youngest officer to hold this position.

November 5

AVIATION: At El Toro, California, marine aviators begin jet training in a Lockheed TO-1, a two-seater version of the famous F-80 "Shooting Star."

November 10

AVIATION: At Stratford, Connecticut, the Sikorsky YH-19A Chickasaw helicopter performs its maiden flight. This somewhat bulbous craft is the first such machine with an unobstructed cabin, as the engine is mounted in the nose.

November 18

AVIATION: The giant Douglas C-74 Globemaster I named *The Champ* flies non-stop from Mobile, Alabama, to RAF Marham, United Kingdom, while carrying 103 passengers and crew. It is the first aircraft to make a transatlantic crossing with more than 100 people onboard.

MARINES: The Marine Corps formally embraces President Harry S. Truman's executive order banning racial discrimination against African Americans and other minorities. Henceforth, unit assignments must be made without regard to race.

November 29

AVIATION: The prototype Douglas YC-124 performs its maiden flight. It enters service as the C-124 Globemaster II, better known to passengers as "Old Shakey" and sees extensive service with the Military Air Transport Service (MATS) and the Strategic Air Command (SAC).

December

AVIATION: At Langley, Virginia, NACA engineers reach a technical milestone by creating the first, continuous, transonic flow of air in their eight-foot-high speed tunnel.

December 2

AVIATION: At Holloman Air Development Center, New Mexico, the new Aerobee research rocket (RTV-A-1a) is successfully fired.

December 5

AVIATION: The air force diverts \$50 million from other projects and begins constructing a chain of radar stations across the northern Alaskan frontier for the purpose of detecting incoming Soviet bombers. The recent testing of a Soviet atomic bomb makes this all the more imperative.

December 22

AVIATION: The North American YF-84D all-weather interceptor completes its maiden flight. It enters service as the F-86D, or Sabre Dog, conspicuous with its redesigned radome nose cone.

December 25

AVIATION: The air force reveals the existence of the new ceramic called Stupalith, which expands and contracts when heated and cooled and can withstand 2,000 degree temperatures. It is utilized as insulation around jet and rocket engines.

December 28

AVIATION: Amid much public hoopla, the air force ends a two-year old investigation of "flying saucers" at Wright Patterson Air Force Base, Ohio, concluding that they do not exist.

December 29

AVIATION: In California, an F-51 Mustang flown by noted aviatrix Jacqueline Cochran establishes an international speed record of 436.995 miles per hour over a 500-kilometer course.

1950

January

MILITARY: Army personnel declines to 593,167–10 divisions—in light of drastic budget cuts; the force is also hobbled by a lack of large-scale, live-fire exercises and by decreases in new weapons development.

January 9

MARINES: The latest round of military budget cuts will reduce Marine Corps personnel by an additional 10,000 men to 74,396.

January 14

AVIATION: Off Miami, Florida, aviation units from the air force, navy, and marines stage their first unified aerial maneuvers.

January 15

AVIATION: In Sonoma, California, General of the Air Force Henry H. Arnold dies. He was a major architect of American air power with a career spanning the Wright brothers' pioneering efforts to the dawn of jet aviation and rockets.

January 17

NAVAL: Off Hampton Roads, Virginia, the battleship *Missouri* runs aground, resulting in court-martials for its captain, operations officer, and combat information officer.

January 18

AVIATION: The Lockheed YF-94C prototype completes its maiden flight; this is the first air force interceptor armed solely with air-to-air rockets.

January 23

AVIATION: To separate research operations from logistics and procurement activities of the Air Materiel Command, the Air Force Research and Development Command is established at Wright-Patterson Field, Ohio. It is subsequently redesignated the Research and Development Command.

January 31

TECHNOLOGY: President Harry S. Truman, forewarned that the Soviets are already developing a “super bomb,” orders the military and scientific communities to begin work on constructing a new thermonuclear weapon, or hydrogen bomb.

February 12

NAVAL: The navy officially designates the Sixth Task Fleet and Seventh Task Fleet the Sixth and Seventh Fleets, respectively.

February 14

DIPLOMACY: The Soviet Union and the People's Republic of China conclude a treaty of alliance and mutual assistance. For all intents and purposes, this is a pact between two scorpions in a bottle but it frightens the United States and the West.

February 25–March 11

MARINES: At Vieques Island, Puerto Rico, all four U.S. services participate in POR-TEX, the largest peacetime amphibious-airborne maneuver since World War II. It involves 800,000 men, 160 vessels, and 700 aircraft; seven people die in accidents.

March 1

AVIATION: Following a protracted development to wrinkle out the bugs, the first B-47A Stratojet is delivered to the air force for testing. The A-model is used strictly for training flight and ground personnel.

MARINES: In Washington, D.C., a report is issued by the House Armed Services Committee, which argues that the Commandant of the Marine Corps should be admitted as a full partner to the Joint Chiefs of Staff. It also calls for more joint training and expanded wartime roles for naval aviation.

March 10

MARINES: At Quantico, Virginia, the new Marine Corps Development Center and the Marine Corps Educational Center are formed from the older Marine Corps Schools in order to place added focus on new equipment and doctrines along with better educational and training programs.

March 15

AVIATION: The Department of Defense allocates exclusive responsibility for developing strategic guided missiles, ICBMs, to the U.S. Air Force.

March 16–April 5

NAVAL: The submarine *Pickrel* performs a record underwater voyage between Hong Kong and Pearl Harbor, Hawaii, by remaining submerged for 21 days and covering 5,194 nautical miles.

March 22

AVIATION: At RAF Marham, England, the United States hands over the first four of 70 Boeing B-29 Superfortress bombers to the Royal Air Force. Once employed by the British, they receive the designation of Washington.

April 8

AVIATION: Soviet La-7 fighters attack and shoot down a navy Consolidated PB4Y-2 Privateer as it performed an electronic reconnaissance mission over the Baltic Sea near the Latvian coastline; the entire crew of 10 perishes.

April 12

MILITARY: In Washington, D.C., Frank Pace is appointed the third secretary of the army.

April 18

AVIATION: The air force declares that its anticipated procurement of 1,250 modern aircraft this year will set the taxpayers back \$1.2 billion.

April 21

AVIATION: A North American AJ-1 Savage, the first naval attack craft capable of delivering atomic weapons, is successfully launched from the deck of the carrier *Coral Sea* for the first time. This aircraft is also unique in being powered by two propeller-driven engines and one jet engine in the tail section.

April 24

AVIATION: In Washington, D.C., Thomas K. Finletter gains appointment as the secretary of the air force.

April 28

NAVAL: At Annapolis, Maryland, Vice Admiral Harry W. Hill is appointed the 36th superintendent of the U.S. Naval Academy.

May 5

AVIATION: At Hawthorne, California, the futuristic YRB-49A Flying Wing, which sports two additional J-35 engines in wing-mounted pods, performs its maiden flight. This spectacular-looking reconnaissance machine does not enter production.

MILITARY: In Washington, D.C., the Articles of War, long the judicial regulations for the U.S. armed forces, are replaced by the new Uniform Code of Military Justice.

May 9

MARINES: In China, the Communists release two marine airmen held since October 1948 when their airplane crash-landed in Manchuria.

May 10

TECHNOLOGY: In Washington, D.C., President Harry S. Truman signs legislation creating the National Science Foundation.

May 12

AVIATION: At Edwards Air Force Base, California, the first Bell X-1 rocket plane makes a final flight before being turned over to the Smithsonian Institution for display purposes.

June 1

AVIATION: The air force is ordered to organize the Ground Observer Corps to serve as an adjunct of the overall civil air raid warning system.

June 3

AVIATION: The Republic YF-96A, a swept-wing version of the venerable F-84 Thunderjet, makes its initial flight. It enters the service as the F-84F Thunderstreak.

June 9

AVIATION: In Washington, D.C., Secretary Louis Johnson, citing budgetary restrictions, announces that military aircraft will not be participating in this year's National Air Races.

June 15

AVIATION: At Quantico, Virginia, Marine Corps helicopters and infantry stage a mock aerial assault for President Harry S. Truman. The service seeks to convince him that they deserve a bigger slice of the Defense Department's shrinking pie.

June 25

AVIATION: The Korean War commences as Russian-flown Yak-9 fighters strafe Kimpo Air Base, South Korea. Consequently, Major General Earle E. Partridge, commanding the Fifth Air Force in Japan, places his forces on high alert.

DIPLOMACY: In New York, the UN Security Council passes a resolution condemning the Communist invasion of South Korea.

MILITARY: Prevailing winds of the cold war suddenly blow hotter when 135,000 men of the North Korean People's Army (NKPA), backed by 150 Soviet-built tanks, roll south of the 38th parallel and invade South Korea. Communist forces have been both trained and equipped by the Soviet Union, and the aggression unfolds with the apparent acquiescence of Soviet leader Joseph Stalin and Chinese leader Mao Zedong. For the United States, this is the first military challenge of the cold war.

June 26

AVIATION: Air Force F-82 Twin Mustangs of the 68th Fighter All-Weather Squadron provide top cover for evacuation activities at Inchon, South Korea, as thousands of foreign nationals flee the Communist onslaught.

MILITARY: President Harry S. Truman immediately authorizes U.S. Navy and U.S. Air Force units in Japan to begin direct military support of South Korean forces below the 38th parallel.

NAVAL: The destroyers *Mansfield* and *De Haven* are on hand at Inchon, South Korea, to assist in the evacuation of 700 foreign nationals caught up in fighting between North and South Koreans.

June 27

AVIATION: Over Seoul, South Korea, an F-82 Twin Mustang, flown by Lieutenant William Hudson and Lieutenant Carl S. Fraser, shoots down a Soviet-made Yak-11 fighter of the North Korean air force. This is the first American aerial victory of the war and is soon joined by seven others—the highest tally scored on a single day in 1950.

- B-26 Invaders of the Fifth Air Force commence launching air strikes against North Korean infantry and tank columns; poor weather negates most of their actions. Meanwhile, RF-80s deploy at Itazuke, Japan, to provide badly needed aerial reconnaissance.

- The 374th Troop Carrier Wing deploys C-46s, C-147s, and C-54s to Suwon Air Field, South Korea, in order to evacuate hundreds of foreign nationals to Japan.

DIPLOMACY: In New York, the UN Security Council passes a second resolution condemning Communist aggression in South Korea and recommends that UN members so inclined contribute military forces to help repel it.

MILITARY: In Washington, D.C., President Harry S. Truman authorizes General Douglas MacArthur, as commander in chief, Far East, to commit air and naval forces against Communist aggression in South Korea.

- At Suwon, South Korea, Brigadier General John H. Church arrives as part of the General Headquarters, Advance Command and Liaison Group, to assess military conditions on the Korean Peninsula. He subsequently notified General Douglas MacArthur, commander in chief, U.S. Far East Command, that American troops are necessary to drive out the invaders.

June 28

AVIATION: As North Korean troops occupy Kimpo Air Base near Seoul, South Korea, B-26 Invaders of the 3rd Bombardment Group continue hammering away at them, sometimes as far north as the 38th parallel. They are joined by other

Invaders from the same unit, who commence their first offensive daylight missions of the war by striking Heijo Air Field near Pyongyang, North Korea.

- The first jet reconnaissance mission is flown by Lieutenant Bryce Poe in an RF-80.

MILITARY: Tanks and infantry of the North Korean People's Army capture the South Korean capital of Seoul. Soldiers of the Republic of Korea (ROK) resist tenaciously but, being lightly equipped as a constabulary, they are completely outclassed by their heavily armed, Soviet-equipped opponents.

June 29

AVIATION: In South Korea, F-82s drop napalm for the first time while five North Korean fighters are shot down in the vicinity of Suwon. A force of B-29s bombing targets near Seoul shoots down a Communist aircraft, marking the first bomber gunner victory of the war.

- At Yokota, Japan, aircraft of the 8th Tactical Reconnaissance Squadron (TRS) commence flying photographic sorties over South Korea.

MILITARY: At Suwon, South Korea, five soldiers of the 507th Antiaircraft Artillery Battalion become the nation's first casualties of the Korean War.

NAVAL: Off Samchok, Korea, the light cruiser *Juneau* bombards shore installations in the first example of naval gunfire in the Korean War.

June 30

AVIATION: General Douglas MacArthur is authorized by President Harry S. Truman to employ air force fighters and bombers to destroy targets in Communist North Korea as well as in South Korea.

- In Japan, the Fifth Air Force is bolstered by the arrival of No. 77 Squadron, Royal Australian Air Force (RAAF).

MILITARY: President Harry S. Truman orders the deployment of U.S. ground forces to South Korea and he also signs a bill extending the military draft for another year while Reserve and National Guard personnel are subject to call up and 21 months of service. The closest American forces, the Eighth Army in Japan, are in poor shape after five years of occupation duty, and they lack heavy tanks and other essential equipment.

- North Korean columns cross the Han River below Seoul, South Korea, and threaten the airfield at Suwon. Far East Air Forces (FEAF) orders an immediate evacuation of that field and transfers its assets to Pusan on the east side of the peninsula.

NAVAL: President Harry S. Truman orders a naval blockade of the Korean coastline.

MARINES: At the onset of hostilities in Korea, marine manpower levels are only 7,254 officers and 67,025 enlisted men. Fortunately, the Marine Corps can dip into a very large pool of trained reservists to buttress all ranks.

July 1

AVIATION: With the fall of Suwon Air Field, Seoul, to the Communists, the 374th Troop Carrier Wing (TCW) airlifts advanced echelons of the 24th Infantry Division from Japan to Pusan, South Korea.

MILITARY: Army troops from the 1st Battalion, 21st Regiment, 24th Infantry Division, designated Task Force Smith, cross from Japan and deploy in South Korea.

U.N.C. Commander General of the Army Douglas MacArthur (right) at the frontlines in Suwon, Korea, with Lieutenant General Matthew B. Ridgway (third from right) (*Library of Congress*)

They are commanded by Lieutenant Colonel Charles B. Smith, who takes up defensive positions at Osan. The remainder of the division is expected to join them in days under Major General William F. Dean.

NAVAL: The Military Transportation Service begins shipping the main body of the 24th Infantry Division from Japan to Pusan, South Korea.

July 2

NAVAL: The light cruisers *Juneau* and HMS *Jamaica* and the frigate HMS *Black Swan* are attacked by three North Korean patrol boats; the Communist vessels are all sunk without damage to the UN ships. This is also the sole purely naval action of the war involving an American warship.

MARINES: General Douglas MacArthur requests the immediate dispatch of a Marine Corps regimental combat team to Korea, so Fleet Marine Force Pacific (FMFPAC) issues embarkation orders to the 1st Marine Division.

July 3

AVIATION: Over Pyongyang, North Korea, navy F9F Panthers from VF-51 shoot down two Yak-9 fighters, the first jet aerial victories of the Korean War.

- Because large, heavy Douglas C-54 Sky Masters damage the thin airfields at Pusan, South Korea, the work of troop transport falls upon smaller C-46s and C-47s.

NAVAL: Task Force 77 under Vice Admiral Arthur D. Struble orders the carrier *Valley Forge*, then the only American carrier available in the western Pacific, and the British carrier *Triumph* to launch the first naval aviation strikes of the Korean War.

MARINES: In Washington, D.C., the Joint Chiefs of Staff agree to General Douglas MacArthur's request for a Marine Corps Regimental Combat team and accompanying aircraft.

July 4

DIPLOMACY: In Washington, D.C., President Harry S. Truman declares the coasts of North Korea to be under a naval blockade.

MILITARY: In Tokyo, Japan, the staff of General Douglas MacArthur begins planning for a major amphibious assault upon the western Korean port of Inchon. The plan is initially scrubbed as overly ambitious but it is resurrected two months later under the title Operation Chromite.

July 5

AVIATION: The 1st Marine Aviation Wing absorbs men and equipment of Marine Air Group 33 under Brigadier General Thomas J. Cushman.

MILITARY: In South Korea, the Battle of Osan unfolds as the men of Task Force Smith are attacked in strength by the North Korean 4th Division. Though outnumbered, the Americans destroy four T-34 tanks and delay the enemy advance by seven hours. Task Force Smith loses 181 dead, wounded, and missing.

July 6

AVIATION: The Harmon International Aviation Awards Committee votes General James H. Doolittle "Aviator of the Decade" while Jacqueline Cochran is named "Outstanding Aviatrice." Vice Admiral Charles E. Rosenthal also becomes the top aeronaut (lighter-than-air pilot).

- Nine Fifth Air Force B-29s make their first strategic bomb run of the war by striking at the Rising Sun Oil Refinery at Wonsan and various chemical facilities in Hungnam, North Korea.

July 6–12

MILITARY: At Pyongtaek, South Korea, the 34th Infantry tangles with advancing North Korean forces and wages a desperate rearguard action that delays the Communist advance for several hours. The 21st Infantry performs similar work at Chochiwan before being forced to retreat. A number of American soldiers taken prisoner are subsequently bound and executed by Communist forces, who also shoot thousands of South Korean civilians.

July 7

AVIATION: Headquarters Marine Corps directs that flight and ground personnel of the experimental helicopter squadron HMX-1 be transferred to observation squadron VMO-6, so that the 1st Provisional Marine Brigade can possess a helicopter detachment.

MARINES: At Camp Pendleton, California, the 1st Provisional Marine Brigade is cobbled together under the command of Brigadier General Edward A. Craig. It consists of the entire 5th Marines and the forward echelon of the 1st Marine Air Wing (1st MAW). Presently, its three battalions consist of only six rifle companies and other platoons are hurriedly added to bring the units up to strength.

July 7–8

MILITARY: In New York, the United Nations Security Council asks the United States to serve as its executive agent for hostilities in South Korea through the aegis of a UN Command (UNC).

July 8

MILITARY: General Douglas MacArthur is appointed supreme commander of United Nations forces in Korea and head of the United Nations Command (UNC) by President Harry S. Truman.

- At Yokota, Japan, Major General Emmett “Rosie” O’Donnell takes charge of Far East Air Forces Bomber Command (Provisional), which now directs B-29 operations against North Korea.

July 9

AVIATION: In South Korea, air force forward air controllers fling L-5G and L-17 liaison craft into directing close support missions for F-80 Shooting Star fighter bombers.

NAVAL: Commander Michael J. Luosey is placed in command of all South Korean naval assets.

July 10

AVIATION: In South Korea, a T-6 Texan trainer employed on a “Mosquito” mission, calls down an F-80 close support strike on a column of North Korean tanks, which is destroyed.

- A North Korean column is caught in the open near Pyongtaek, South Korea, and destroyed by F-80s, F-82s, and B-26s. Dozens of vehicles go up in flames.

MILITARY: Advanced elements of the 24th Infantry Division begin debarking at Pusan, South Korea, under Major General William F. Dean.

- In light of the mounting military crisis on the Korean Peninsula, General Douglas MacArthur requests additional reinforcements, including an entire marine division with air support.

July 11

NAVAL: In a bold attack, Commander W. B. Porter of the light cruiser *Juneau* goes ashore with 10 sailors and marines to blow up a railroad tunnel at Rashin, North Korea.

July 12

AVIATION: The first shipment of 58 3.5-inch bazookas capable of knocking out Soviet-made T-34 tanks arrives from the United States onboard four Military Air Service Transport Service (MATS) aircraft.

- Over South Korea, North Korean fighters manage to down a B-29, a B-26, and an L-4, the first Communist aerial victories in this conflict.

MILITARY: In Tokyo, Japan, General Douglas MacArthur orders Lieutenant General Walton H. Walker to take control of all U.S. ground forces in Korea.

MARINES: The first elements of the 1st Provisional Marine Brigade ship out from California and head for Korea.

July 13

AVIATION: A force of 49 B-29s from the 22nd and 92nd Bombardment Groups strikes marshaling yards and an oil refinery at Wonsan, North Korea. These units had arrived from the United States only six days previously.

MILITARY: At Taegu, South Korea, Lieutenant General Walton H. Walker, head of the Eighth Army, establishes his headquarters and assumes control of all U.S. forces on the peninsula.

July 14

AVIATION: Eager to be closer to the scene of action to preserve fuel, the 35th Tactical Interceptor Group deploys at Pohang, South Korea, while the 6132d Tactical Air Control Squadron also arrives at Taegu.

July 14–26

MILITARY: Along the Kum River, South Korea, the badly outgunned 24th Infantry Division wages an ill-fated struggle to stop superior North Korean forces from crossing. Fighting focuses on the city of Taejon, an important communications hub and Major General William F. Dean joins his men, bazooka in hand, in destroying an enemy tank in the streets. At length the Americans give way and fall back in disorder; Dean is separated from his men and is taken captive on August 25. However, this gallant stand allows General Walton H. Walker to set up a defensive perimeter along the Naktong River outside Pusan.

July 15

AVIATION: F-51 Mustangs belonging to the 51st Fighter Squadron (FS) at Taegu, South Korea, commence flying their first sorties.

MARINES: Orders are issued from Fleet Marine Force Pacific (FMFPAC) that the 1st Marine Division is going to be expanded to full strength. Two air transport squadrons are also dispatched to Korea to support airlift operations.

July 16

MILITARY: The U.S. Eighth Army assumes control of all Republic of Korea (ROK) military forces.

July 18

AVIATION: Task Force 77 launches carrier air strikes against Wonsan, North Korea, hitting railroad yards, factories, and an oil refinery.

MILITARY: Advanced elements of the 1st Cavalry Division under Major General Hobart R. Gay debark at Pohang, South Korea.

NAVAL: Amphibious Group 1 under Rear Admiral James H. Doyle transports men and equipment of the 1st Cavalry Division from Japan to Pohang, South Korea.

July 19

AVIATION: At Kangmyong-ni, North Korea, an AD Skyraider flown by Ensign Donald E. Stevens of VA-55 hits a truck while on a strafing run; he is naval aviation's first fatality in this conflict.

- Over Taejon, South Korea, Fifth Air Force F-80s shoot down three Communist Yak fighters, this month's highest tally.
- Determined to acquire air superiority over the enemy, a strike by seven F-80s of the 8th Fighter Bomber Group (FBG) destroys 15 North Korean aircraft on a field near Pyongyang.

MARINES: In Washington, D.C., President Harry S. Truman signs legislation activating the Organized Marine Corps Reserve.

July 20

AVIATION: In Japan, Major General Otto P. Weyland arrives to serve as Far East Air Forces (FEAF) vice commander for operations.

Dean, William F. (1899–1981)

Army general

William F. Dean was born in Carlyle, Illinois, on August 1, 1899, and he applied, but failed, to gain entrance into the Military Academy, West Point. He nonetheless took Reserve Officer Candidate (ROTC) training at the University of California, Berkeley, and was commissioned a second lieutenant in 1922. An excellent soldier, he rose rapidly through the ranks and attended the Command and General Staff School, the Army Industrial College, and the Army War College before being assigned as assistant secretary to the War Department general staff. Dean rose to brigadier general in 1943 and began soliciting for a combat command. The following year, he became commander of the 44th Infantry Division and was assigned to General Alexander M. Patch's Seventh Army. He participated in Operation Anvil/Dragoon, the invasion of southern France in August 1944, and particularly distinguished himself in the captures of Strasbourg and Worms. His

subsequent actions in Austria also led to the surrender of 30,00 German troops. In consequence, Dean received a Distinguished Service Cross and gained a reputation as a leader who led from the front. He returned home to serve as assistant commandant of the War College and, in October 1947, Dean was appointed military governor of South Korea. He was reassigned to Japan the following year as commander of the 24th Infantry Division and was serving in this office when Communist North Korea attacked South Korea in an act of overt aggression.

No soon had the Korean War started than General Douglas MacArthur dispatched Dean's 24th Division to South Korea to halt the Communist onslaught. Unfortunately for the Americans, the North Koreans were hardened veterans of fighting the Japanese in World War II, and they were equipped with Soviet-built T-34 tanks, which were fast and well-armored. Dean's advance troops,

- Two Communist Yak-9s fall before the guns of Fifth Air Force F-80s, becoming the final aerial victories until November. The United Nations now enjoys virtual air superiority over the entire Korean Peninsula.

MILITARY: In Washington, D.C., President Harry S. Truman, fearing that all-out war with the Soviet Union might be inevitable, urges Congress to pass a \$10 billion rearmament program.

- The Army Reorganization Act of 1950 is passed by Congress, which, among other changes, removes size limits on the Army General Staff, consolidates the field, coast, and antiaircraft artillery into a single artillery branch, merges tanks and mechanized cavalry into the armor branch, and recognizes a total of 14 specialist branches within the U.S. Army, namely, Chemical Corps, Corps of Engineers, Military Police Corps, Ordnance Corps, Quartermaster Corps, Transportation Corps, Adjutant General Corps, Finance Corps, Women's Army Corps, Army Medical Service, Chaplain Corps, Inspectors General, and Judge Advocate General Corps.

Task Force Smith, were easily brushed aside in one battle. The Communists then began converging on the city of Taejon from the north and west. Dean was preparing to evacuate that city when General Walton H. Walker arrived and asked him to hold out at least two days while he consolidated his position around Pusan. Dean complied and pitched into the defense of Taejon, personally destroying a T-34 tank with a new 3.5-inch bazooka. He ordered a withdrawal two days later but became separated from his men and spent 36 days in the countryside avoiding roving columns of North Koreans. He was turned in to the Communists by a peasant on August 25, 1950, becoming the highest-ranking UN prisoner in captivity. Despite hardship and torture, Dean held up well to captivity until his release on September 4, 1953. At that time he was surprised to learn that he had won a Medal of Honor for his deeds at Taejon. After his repatriation, he served as deputy commander of the Sixth Army based at San Francisco, California. He

Major General William F. Dean, commander of the 24th Division during the Korean War. Dean won the Medal of Honor and was the highest-ranking officer to be held prisoner during the war. (*Center for the Study of the Korean War, Graceland University*)

retired in 1955 and died in nearby Berkeley on August 26, 1981, an unsung hero of the Korean War.

- With the fall of Taejon, South Korea, the 24th Infantry Division begins falling back to the southeast and the port of Pusan.

July 22

AVIATION: An emergency shipment of 145 air force F-51 Mustang fighters arrives in Japan aboard the carrier *Boxer*.

- At Taegu, South Korea, the 3rd Air Rescue Squadron deploys the first Sikorsky R-5 helicopter in the theater. Helicopters, though in their technical infancy, begin playing a very prominent role in this conflict.

MARINES: In Washington, D.C., Commandant Cates, determined to flesh out his skeletal formations, orders the formation of three rifle companies to bring the entire 1st Provisional Marine Brigade up to strength. Moreover, all ranks will ship immediately out of California on August 10, 1950.

July 24

AVIATION: At Taegu, South Korea, Eighth Army Headquarters is joined by Fifth Air Force in Korea headquarters to better coordinate missions and planning.

MILITARY: As the United Nations command solidifies, General Douglas MacArthur reaffirms General Walton S. Walker as ground commander, Eighth Army, Admiral C. Turner Joy as commander, Naval Forces, and General George E. Stratemeyer as commander, Far East Air Forces (FEAF).

July 25

AVIATION: In light of the desperate situation of the Eighth Army along the Pusan perimeter, General Walton H. Walker requests close air support from carrier aircraft. Supporting army units is something naval aviators are not accustomed to do and some technical awkwardness results.

NAVAL: Off San Francisco, California, the hospital ship *Benevolence* collides with the vessel *SS Mary Luckenbach* and sinks with the loss of 13 lives.

- The navy configures Task Force 96.5 to blockade the east coast of North Korea. Responsibility for the west coast falls upon British Commonwealth forces of Task Group 96.53 under Rear Admiral William G. Andrewes, RN.

MARINES: In Washington, D.C., the Joint Chiefs of Staff agree to General Douglas MacArthur's plea for a full marine division, but it will partly consist of the provisional brigade already en route to Korea. Commandant Cates also orders the 2nd Marine Division to depart Camp Lejeune, North Carolina, for Camp Pendleton, California, where they will help bring the 1st Marine Division up to full strength. Moreover, to scrape together every available marine, a 50 percent reduction in marine security forces at all naval installations is also undertaken.

July 25–27

MILITARY: At Chinju, South Korea, two battalions of the 29th Infantry Regiment are sent to reinforce a badly battered 19th Infantry; all are decimated in combat by the North Korean 6th Division. The 3rd Battalion, 29th infantry, loses 400 men, while the 1st Battalion sustains a further 200. The survivors are eventually reassigned as part of the 25th Infantry Division.

July 27

MILITARY: In Washington, D.C., President Harry S. Truman extends the enlistment period for all armed forces for 12 months; he also authorizes a draft of 50,000 men to report for training in September.

July 28

AVIATION: The first Grumman SA-16 Albatross, an outstanding air sea rescue aircraft, deploys in Japan for service off Korea's coastline.

MILITARY: The Military Police Corps is established as a permanent army unit by Congress.

July 29

MILITARY: At Pusan, South Korea, General Walton H. Walker, his back to the sea at Pusan, issues a "Stand or Die" order to the Eighth Army, declaring "There will be no Dunkirk, there will be no Bataan."

July 30

AVIATION: In another major raid, 47 Bomber Command B-29s strike the Chosin nitrate explosive factory near Hungnam, North Korea.

**Walker, Walton H. (1889–1950)***Army general*

Walton Harris Walker was born in Belmont, Texas, on December 3, 1889, and, in 1909, he was admitted to the U.S. Military Academy. After graduating in 1912, Walker became an infantry lieutenant and, in 1918, he received two Silver Stars for bravery at the battles of Saint-Mihiel and Meuse-Argonne. A promising officer, he was allowed to attend the Infantry School, the Command and General Staff School, and the Artillery School before being billeted with the War Plans Division of the War Department in Washington, D.C., in 1936. Five years later he rose to temporary brigadier general commanding the 3rd Armored Brigade. In light of his excellent reputation for leadership, Walker took charge of the 3rd Armored Division during World War II, which was expanded into the XX Corps by 1944. With it, he blazed a trail across western Europe as part of General George S. Patton's Third Army, moving so fast that his force gained renown as the "Ghost Corps." He especially demonstrated his skill at handling units during the Battle of the Bulge, when Patton ordered his army to turn north on a 90-degree axis and flank the Germans from below. In April 1945, Walker's tanks smashed through the remaining Nazi defenses and liberated the infamous death camp at Buchenwald. Patton, who valued Walker as a no-nonsense fighter, promoted him to lieutenant general.

After the war, Walker held several administrative posts back in the United States until 1948, when he transferred to Japan as head of the Eighth Army. He

did not get along well with the imperious general Douglas MacArthur, but he did work to restore his troops, having grown soft through occupation duty, back to combat efficiency. When the Korean War erupted in 1950, Walker's troops were ordered into combat and he established his first headquarters at Taegu. However, the Americans could not cope initially with the well-armed and ferociously disciplined North Koreans, who swept aside Task Force Smith and pushed General William F. Dean out of Taejon. Walker drew up his last-ditch perimeter around the port of Pusan, and he ordered his men to stand or die. Under his aggressive leadership, the Eighth Army withstood a constant pounding for six weeks and did not yield until MacArthur made his famous Inchon landing. As soon as the Communists retreated, Walton sprang at them like a tiger and captured the North Korean capital of Pyongyang on October 19, 1950. When MacArthur ordered all UN forces to advance to the Yalu River, Walker suspected a Chinese trap and proceeded cautiously. On November 25, a massive Communist attack drove the Eighth Army southward and destroyed the 2nd Division, then acting as a rearguard. Nonetheless, Walker managed to stabilize his line against tremendous odds and established new lines below the 38th parallel. He died in a traffic accident in Korea on December 23, 1950, a pugnacious combat commander. In recognition of his excellent service, the army christened its newest light tank the M-41 *Walker Bulldog*.

July 31

AVIATION: Marine Air Group 33 (MAG-33) arrives at Kobe, Japan, and occupies Itami Airfield as its initial base for operations.

- Secretary of Defense Louis Johnson authorizes the expansion of Marine Corps aviation units to 18 squadrons.

MARINES: In Washington, D.C., President Harry S. Truman authorizes expansion of the Marine Corps to a full two divisions of 23,500 men apiece.

July 31–August 1

MILITARY: At Pusan, South Korea, the Eighth Army is stiffened by the arrival of the 5th Regimental Combat Team, the 555th Field Artillery Battalion, and advanced elements of the 2nd Infantry Division under Major General Laurence B. Keiser. These forces have come from as far as Hawaii and Fort Lewis, Washington.

August 2

MILITARY: At Fort Bragg, North Carolina, Major General John B. Coulter assumes command of the newly activated I Corps; it is immediately ordered to ship out to Korea.

MARINES: Advanced elements of the 1st Provisional Marine Brigade under Brigadier General Edward A. Craig begin disembarking at Pusan in southeast South Korea.

August 2–3

AVIATION: The best airlift record of the Korean War happens when the 374th Troop Carrier Squadron delivers 150 tons of supplies from Ashiya, Japan, to Eighth Army units in South Korea in only 24 hours.

August 3

AVIATION: Over Chinju, South Korea, Marine Corps aviation debuts when F4U Corsairs of VMF-214 of Marine Air Group 33 (MAG-33) make rocket and bombing strikes against Communist forces for the first time. They are flying from the escort carrier *Sicily* to reduce flying time to the battlefield.

- Along the Korean coast, Grumman SA-16 Albatross amphibians begin flying rescue sorties; by war's end they have saved several thousand pilots and crew.

MILITARY: As part of the general mobilization scheme, 134 National Guard units are federalized and ordered to report for active duty.

- Outside Pusan, South Korea, the Eighth Army under General Walton H. Walker establishes its perimeter behind the Naktong River. The position, anchored on Pusan, runs 10 miles north and south, 50 miles east to west, and is garrisoned by the 1st Cavalry Division, the 2nd, 24th, and 25th Infantry Divisions, the 1st Provisional Marine Brigade, the 27th British Brigade, and eight Republic of Korea (ROK) divisions.

MARINES: As Marine units and reservists begin arriving at Camp Pendleton, California, orders go out to resurrect the 1st Marines under the legendary Colonel "Chesty" Puller. Its missing third rifle companies are transferred from the 5th Marines.

- With the bulk of the 1st Provisional Marine Brigade in place at Pusan, South Korea, they are ordered to position themselves along the Naktong River to the

southwest corner of the evolving “Pusan Perimeter.” Once in place, the Leathernecks will act as a “fire brigade,” a mobile reserve tasked with closing off any Communist penetrations of UN lines.

August 4

AVIATION: In South Korea, HO3S-1 helicopters of VMO-6 begin executing reconnaissance missions and also perform the first aerial evacuations of wounded personnel.

- Far East Air Forces (FEAF) commences Interdiction Campaign No. 1 by dispatching B-29 bombers to raid key bridges in North Korea.

MILITARY: To flesh out the army’s peacetime ranks, 62,000 reservists are recalled to the colors.

August 5

AVIATION: F4U Corsairs of VMF-214 launch from the escort carrier *Sicily* and perform bombing missions in the Inchon-Seoul region for the first time. Meanwhile, newly arrived VMF-323 departs from Itami Airfield, Japan, and lands on the escort carrier *Badoeng Strait* to commence air strikes on the Korean Peninsula.

- Near Hamchang, South Korea, an F-51D Mustang flown by Major Louis J. Seville is damaged while strafing North Korean targets; rather than parachute, he dives directly into an enemy position, sacrificing himself. Seville receives the first Medal of Honor ever given to a member of the U.S. Air Force.

August 5–19

MILITARY: The First Battle of the Naktong Bulge unfolds as North Korean forces begin probing the American perimeter near the 24th Infantry Division. That unit, assisted by the 1st Provisional Marine Brigade, and 2nd and 25th Infantry Divisions, drive the enemy off with 8,500 casualties and large amounts of equipment destroyed; UN losses amount to 1,800 killed, wounded, and missing.

August 7

MARINES: Headquarters Marine Corps alerts 80,000 individual reservists for call up to active-duty status.

- On this propitious date, the eighth anniversary of the Guadalcanal landings, the 1st Provisional Marine Brigade is ordered into combat to seize the town of Chinju, 25 miles to the west of their present position along the Naktong River. This puts them directly in the path of oncoming North Korean troops.

August 8

AVIATION: Near Chindong-ni, South Korea, a Marine Corps HO3S-1 helicopter from VMO-6 makes the first nighttime evacuation of wounded troops.

August 10

AVIATION: The first two Reserve Air Force Units are called to active duty by the U.S. Air Force; they are gradually joined by a total of 25 such units.

MILITARY: At Fort Sheridan, Illinois, the Army IX Corps is activated and ordered to Korea under Major General Frank W. Milburn. Four National Guard divisions (28th, 40th, 43rd, and 45th Infantry Divisions) are called to active duty.

MARINES: At San Diego, California, the first elements of the 1st Marine Division begin embarking on ships for Korea.

August 11

AVIATION: The Fairchild XC-120 Packplane makes its maiden flight, cobbled together from C-119B Flying Boxcar wing and tail assemblies. It does not enter production.

- Using rockets and napalm, marine air units attack and destroy a North Korean convoy as it retreats down the road from Kosong, South Korea, destroying roughly 100 enemy vehicles.
- At Tachikawa Air Base, Japan, Fairchild C-119 Flying Boxcars begin transporting trucks and other utility vehicles to Taegu, South Korea.

MARINES: Along the “Pusan Perimeter,” marine artillery scatters a North Korean motorized force in the town of Kosong, South Korea, which falls to the 1st Provisional Marine Brigade this evening.

August 12

MARINES: Marines and army troops no sooner begin a drive to capture Changchon, several miles south of Chinju, when Communist forces break the UN defensive lines along the Naktong River and the offensive is called off.

August 14

MARINES: As the “Pusan” perimeter’s fire brigade (mobile reserve), the 1st Provisional Marine Brigade moves 75 miles by truck, train, and ship to the Naktong River bulge to secure UN defensive lines.

August 15–16

NAVAL: The high-speed transport *Bass* delivers several Underwater Demolition Teams (UDT) that raid the eastern coast of Korea at night, destroying several bridges and railroad tunnels.

August 16

AVIATION: Near Waegwan, South Korea, a force of 98 Fifth Air Force B-29s carpet bomb North Korean troop formations in a 30-square-mile area. This spoiling attack is the largest such aerial operation undertaken since D-Day in 1944.

MILITARY: In Japan, the X Corps is activated under Major General Edward M. Almond in anticipation of the upcoming Operation Chromite, an amphibious descent upon Inchon, South Korea. This consists of the 1st Marine Division and the 7th Infantry Division, and it is independent of the Eighth Army.

NAVAL: At Yonghae, South Korea, the encircled ROK 3rd Division is evacuated to safety by Task Element 96.51’s four landing ships and the cruiser *Helena*.

August 17

MARINES: The 1st Provisional Marine Brigade counterattacks along the Naktong Bulge and drives the 4th North Korean Division back across the river with a loss of 34 guns; they are assisted by the army’s 24th Infantry Division on their right flank.

August 18

MARINES: The Marine Corps reduces the minimum service contract from four to three years to spur enlistments. It also enlists recruits directly into the Volunteer Reserve for active duty, allowing enlistees to achieve reserve status once the war has ended.

- General Oliver P. Smith, commanding the 1st Marine Division, arrives in Japan for meetings with Eighth Army officials. He learns that his force will spearhead the forthcoming Inchon landings scheduled for September 15.
- In South Korea, the 5th Marines seize the Obong-ni Ridge as fleeing North Koreans are rocketed and napalmed by F4U Corsairs.

August 18–25

MILITARY: Outside Pusan, South Korea, North Korean forces try attacking through a series of narrow valleys dubbed the “Bowling Alley” by American forces. However, the 23rd and 27th Infantry Regiments easily hold their ground, inflicting an estimated 4,000 casualties on the Communists. American losses are minimal.

August 19

AVIATION: At Yongsan Bridgehead, American aircraft drive North Korean forces back across the Naktong River, thereby helping to end the battle for the Naktong Bulge.

MARINES: After a stiff fight, the 5th Marines eliminate all remaining North Koreans from the Naktong Bulge. The Pusan Perimeter is secured for the time being, although Communist attacks are developing elsewhere along the line.

August 20

MARINES: The 1st Provisional Marine Brigade resumes its role as the Eighth Army reserve, and it is billeted in the rear at Masan, South Korea, until needed again.

August 21

AVIATION: Over Pyongyang, North Korea, naval aviation units from the carriers *Valley Forge* and *Philippine Sea* establish a new operational record by completing 202 bombing sorties in one day. From this point forward, the air war over Korea intensifies exponentially.

August 22

AVIATION: In an ominous development, Chinese antiaircraft gunners across the Yalu River begin firing at RB-29 aircraft operating in North Korean airspace. This is the first-known instance of Chinese aggression against UN forces.

August 23

AVIATION: The air force drops guided Razon bombs against North Korean targets for the first time; results are limited with only one bridge west of Pyongyang being brought down.

MILITARY: In Tokyo, Japan, General Douglas MacArthur dramatically presents his case for an amphibious assault upon Inchon, on the west coast of South Korea, to sever Communist supply lines and possibly end the war. He convinces both Admiral Forrest P. Sherman, chief of naval operations, and General Joseph L. Collins, army chief of staff, to agree. The date for the Inchon invasion is fixed at September 15 by MacArthur himself.

August 25

AVIATION: To prevent a possible buildup of Communist air strength prior to the Inchon landings, Fifth Air Force is directed to maintain around-the-clock surveillance of all enemy airfields. It will be followed by air strikes, as necessary.

MILITARY: In Washington, D.C., President Harry S. Truman orders the army to take control of the railroad system during a period of labor unrest; they remain in charge until May 1952.

- The Japan Logistical Command is formed by the army to facilitate the flow of supplies to the Eighth Army in South Korea.

August 26

AVIATION: In Washington, D.C., Air Force Chief of Staff General Hoyt S. Vandenberg presents Smithsonian Institution officials with the first Bell X-1, the aircraft that first broke the sound barrier.

- At Ashiya, Japan, Major General William H. Tunner, the architect of the Berlin airlift, arrives to take charge of a new Combat Cargo Command (Provisional) based on the 1st Troop Carrier Task Force. On a related note, the Far East Air Force (FEAF) begins scraping together all available C-46 Commando transports within its jurisdiction in anticipation of a UN offensive the following September.

August 27

MARINES: In Washington, D.C., Representative Carl Vinson, chairman of the House Armed Services Committee, declares that the Marine Corps should consist of no less than four divisions and 26 squadrons.

- In Saigon, Vietnam, a dozen marines arrive to serve as U.S. embassy guards.

August 29

AVIATION: Marine experimental helicopter squadron HMX-1 begins experimenting with a 3.5-inch bazooka mounted on a Bell HTL-3 utility helicopter. However, the use of armed helicopters is still a decade off.

MARINES: Advanced echelons of the 1st Marine Division begin trickling into Japan. Once arrived, they immediately begin rehearsing for the upcoming landing at Inchon, South Korea.

August 31–September 9

AVIATION: As North Korean forces begin probing UN lines for a final, last-ditch offensive, aircraft of the Fifth Air Force hammer away at them incessantly with close air support.

- At Chinnampo, North Korea, the largest strategic mission of the month unfolds as 74 Bomber Command B-29s strike at mining facilities, metal industries, and marshaling yards.

MILITARY: North Korean forces launch their second attempt to penetrate the Naktong Bulge; some American positions are overrun but army and marine units counterattack, driving the Communists off with as many as 10,000 casualties.

September 1

MILITARY: In Washington, D.C., President Harry S. Truman unveils a plan to double the existing defense establishment from 1.5 million to 3 million.

MARINES: In Washington, D.C., Representative Gordon L. McDonough publishes a letter from President Harry S. Truman, in which the latter declares that the Marine Corps employs a propaganda program “that is almost equal to Stalin’s.” An uproar ensues along with demands for the president to apologize.

- As four North Korean divisions begin a second drive against the Naktong River and push the army’s 2nd Infantry Division back, the 1st Provisional Marine

Brigade is withdrawn from the Inchon operation and sent advancing in the direction of the fighting.

September 3

MARINES: The 1st Marine Division begins to combat load its ships in preparation for the Inchon landing, although their labors are complicated by heavy rains soaking their equipment and supplies.

- In South Korea, the 1st Provisional Marine Brigade counterattacks along the Naktong Bulge, first slowing, then stopping a concerted North Korean advance.

September 4

AVIATION: Navy Chance Vought F4U-4Bs of VF-53 intercept a Soviet Lend-Lease Douglas A-20 Havoc bomber west of the North Korean coast and shoot it down after the tail gunner fires on them.

- The first combat rescue mission behind enemy lines occurs when a Sikorsky R-5 helicopter flown by Lieutenant Paul W. Van Boven retrieves a downed UN pilot.

September 5

MARINES: In South Korea, the 1st Provisional Marine Brigade counterattacks and drives North Korean forces before them, partially restoring the Naktong Bulge. They stop just short of retaking Obong-ni Ridge, however, when orders arrive directing them to embark in preparation for a landing at Inchon.

September 6

MARINES: In Washington, D.C., President Harry S. Truman sends a letter of apology to Commandant Cates and one to the Marine Corps League, which will be read aloud during the latter's national convention.

September 9

AVIATION: Captain Leslie F. Brown, a marine exchange pilot with an air force squadron, flies the first jet combat mission of the Marine Corps at the controls of a Lockheed F-80 Shooting Star.

- North of Seoul, South Korea, B-29s of Bomber Command begin attacking rail-bound Communist reinforcements headed for Inchon while B-26s attack key supply routes and marshaling yards.

September 10

MARINES: The 1st Marine Division has embarked at Japan and is steaming toward Inchon on South Korea's northwestern coast.

September 12

MILITARY: In Washington, D.C., Secretary of Defense Louis Johnson resigns from office and is replaced by former general and secretary of state George C. Marshall.

NAVAL: Off Korea, blockading forces are reorganized under the title Task Force 95, although operations on the western coastline remain the responsibility of British Commonwealth forces.

September 13

MARINES: At Pusan, South Korea, the 1st Provisional Marine Brigade is deactivated once it embarks for Inchon and is reassigned to the 1st Marine Division.

September 14

AVIATION: At Itami Field, Japan, the 1st Marine Air Wing Headquarters joins Marine Air Group 12 (MAG-12) as Marine Corps aviation assumes a more definite form in this theater.

NAVAL: At Samchok, South Korea, the newly arrived battleship *Missouri* lays down a heavy barrage of 50 16-inch shells that knock out a strategic bridge.

September 15

AVIATION: Fifth Air Force light and heavy bombers redouble their efforts in attacking North Korean positions outside Pusan, South Korea, to prepare for an expected UN breakout.

MILITARY: General Douglas MacArthur launches the audacious Operation Chromite at Inchon, South Korea, braving tricky tides and tough defenses to land the X Corps of Major General Edward M. Almond on the west coast of the peninsula. The attack succeeds brilliantly with few casualties on the American

**Almond, Edward M. (1892–1979)**

Army general

Edward Mallory Almond was born in Luray, Virginia, on December 12, 1892, and he graduated from the Virginia Military Institute in 1915. The following year he was commissioned a lieutenant in the infantry and fought in France while commanding a machine gun company. After World War I, Almond returned to the United States where he attended the Infantry School, the Command and General Staff College, and the War College. He was promoted to brigadier general in March 1942 and, the following July, he received command of the 92nd Infantry Division, composed mainly of African Americans. He was personally selected for this command by Army chief of staff George C. Marshall, who was a good judge of his abilities as a leader. Almond transcended the awkwardness of being a white officer from the South commanding black troops, and he spent two years

training them. Constantly exposed to the media and closely scrutinized by the public, Almond considered this assignment the most difficult of his long career. Nevertheless, his “Buffalo soldiers” performed poorly in grueling campaigns in the Serchio Valley in 1944, and along the German Gothic Line in 1945, although the famous 442nd Regimental Combat Team composed of Japanese Americans excelled. He returned home a highly decorated major general commanding the 2nd Infantry Division, but his reputation was tarnished by racism.

In 1946 Almond was ordered to Japan, where he served as deputy chief of staff to General Douglas MacArthur’s Far East Command, and, by 1950, he had advanced to chief of staff, United Nations Command. Almond commanded the new X Corps during MacArthur’s brilliant Inchon campaign, and he helped spearhead the recapture of

side, and the 1st Marine Division, backed by the 7th Infantry Division under Major General David G. Barr, begins pressing inland toward the capital of Seoul. In a single stroke, the tide of war in Korea has turned decisively in the UN's favor.

NAVAL: General Douglas MacArthur stages one of the most brilliant amphibious operations in military history by storming ashore at Inchon, South Korea, and threatening North Korean supply lines. The actual operation is flawlessly performed by Amphibious Group One, Task Force 90, under Rear Admiral James H. Doyle. In the words of General MacArthur, "The navy and marines have never shone more brightly than this morning."

MARINES: At Inchon, South Korea, the 1st Marine Division under General Oliver P. Smith, consisting of the 1st and 5th Marines, lands and captures the city by nightfall. The attack is preceded by the 3rd Battalion, 5th Marines, who seize the island of Wolmi-do in the harbor, and clear it in only 45 minutes.

Seoul, South Korea, in September 1950. The X Corps then packed up and landed at Hungnam, North Korea, that October, as part of the overall UN advance to the Yalu River bordering China. An aggressive commander, Almond pushed his columns deep into the countryside, some might say recklessly, until November 25, when a massive Chinese counterattack forced UN forces to withdraw. Despite heavy losses and subzero weather, Almond kept his force intact and waged a fighting retreat back to Hungnam, where 105,000 men and all their equipment were safely evacuated. Thereafter the X Corps was anchored in east-central Korea on the UN line, which was gradually forced back to the 38th parallel. During the retreat from Chosin, Almond made exclusive use of Marine Corps helicopters to fly in supplies and fly out the wounded. He thereafter advocated similar units for the army. He also instituted studies for adopting tactical air support techniques, heretofore a Marine Corps specialty, into army doctrine. Made a lieutenant

Edward M. Almond observing the shelling of Inchon from the USS *Mt. McKinley* (U.S. Army)

general in February 1951, he rotated back to the United States in July to take charge of the Army War College. He died in Washington, D.C., on June 11, 1979, an aggressive but somewhat limited commander.

- At Inchon, Lieutenant Baldomero Lopez, a platoon leader in the 3rd Marines, covers a North Korean hand grenade with his body, dying in the explosion but saving the lives of his men. He wins a posthumous Medal of Honor.

September 15–18

AVIATION: The first wave of F-84E Thunderjets of the 27th Fighter Escort Wing depart Bergstrom Air Force Base, Texas, and begin their deployment in West Germany.

September 16

MILITARY: In concert with landing operations at Inchon, General Walton H. Walker orders the Eighth Army to break out of the Naktong Perimeter. North Korean forces, wary of being cut off, hastily retreat northward. The 3rd Infantry Division under Major General Robert H. Soule also arrives at Pusan and forms the new reserve.

September 17

AVIATION: Acting in concert with the Eighth Army, F-51 Mustangs and F-80 Shooting Stars from the Fifth Air Force harry retreating North Korean columns with massed napalm attacks, killing hundreds of Communist soldiers.

MARINES: The 3rd Battalion, 5th Marines under Colonel R. L. Murray overcome die-hard resistance and capture Kimpo Airfield, which places American forces halfway between Inchon and Seoul, South Korea.

September 18

AVIATION: A force of 42 B-29 bombers from the 92nd and 98th Bombardment Groups drop 1,600 500-pound bombs on Communist troop concentrations near Waegwan, South Korea. The confusion wrought allows the Eighth Army to better consolidate its position around the port of Pusan.

NAVAL: At Samchok, South Korea, the withdrawal of 725 South Korean troops to vessels offshore is covered by gunfire from the battleship *Missouri*, heavy cruiser *Helena*, and four destroyers.

September 19

AVIATION: Marine Air Group 33 (MAG-33) deploys at Kimpo Airfield, South Korea, bringing with it VMF-212 and VMF-312, and the night-fighting VMF (N)-542.

- In Japan, the Combat Cargo Command launches a force of 32 C-54 Skymasters carrying troops and equipment to Kimpo Airfield near Seoul, South Korea. This is the start of a major supply effort by airlift.

MILITARY: The Second Logistical Command is created to replace the Pusan Logistical Command for the purpose of supporting the Eighth Army. The Third Logistical Command also is established to support the X Corps.

- As the 1st Marine Division drives on Seoul, South Korea, its right flank is covered by the 7th Infantry Division. Hard fighting ensues with fanatical North Korean troops, who are slowly driven back.

September 20

AVIATION: At Kimpo Airfield, South Korea, transports of the Combat Cargo Command begin round-the-clock operations by using night-lighting equipment to illuminate the field.

MILITARY: In Washington, D.C., Congress promotes General Omar N. Bradley to the rank of general of the army (five stars), the first so honored since the end of World War II and also the last. Bradley continues as chairman of the Joint Chiefs of Staff (JCS).

MARINES: Eight miles northwest of Seoul, South Korea, the 5th Marines cross the Han River and establish a bridgehead. Simultaneously, the 1st Marines launch an attack on the industrial suburb of Yongdungpo on the west bank of the Han River. Communist resistance remains fierce.

September 21

MILITARY: In Washington, D.C., Secretary of State George C. Marshall is formally appointed secretary of defense to replace outgoing Louis Johnson.

MARINES: At Inchon, South Korea, the 7th Marines come ashore to reinforce the 1st Marine Division.

September 22

AVIATION: Colonel David C. Schilling completes another nonstop jet fighter flight over the Atlantic by departing RAF Manston, England, and touching down at Limestone, Maine, after covering 3,300 miles in 10 hours, one minute. Schilling refueled three times in the air but his wingman, Lieutenant Colonel William D. Ritchie, ran out of fuel and was forced to ditch safely. Schilling receives the Harmon Trophy for his feat.

- In South Korea, a T-6 Mosquito aircraft flown by Lieutenant George W. Nelson drops surrender notes to 200 North Korean soldiers holed up at Kunsan and, upon further reflection, they lay down their arms and report to a designated hill for internment.

MARINES: After a stiff fight, Yongdungpo, South Korea, falls to the 1st Marines of Colonel Lewis B. “Chesty” Puller as the drive on Seoul continues.

September 23

AVIATION: At Pusan, Headquarters, Fifth Air Force in Korea begins relocating to Taegu to be closer to the front.

- An SB-17 is recorded as having made the first classified, special mission over North Korea.

September 24

MARINES: Near Seoul, South Korea, the 1st Marines finally link up with the 5th Marines under Colonel Chesty Puller and hoist the first American flag over the city’s suburbs.

September 24–25

MILITARY: At Kimpo Airfield, Seoul, South Korea, the 187th Airborne Regimental Combat Team is flown in from Japan under Colonel Frank S. Bowen. This is the first parachute unit deployed in the war.

MARINES: Pushing inland, the 1st and 5th Marines launch a concerted effort to capture the remaining parts of Seoul, South Korea. Advancing out of the city that night, the 1st Marine Division stumbles into a heavy North Korean counterattack and drives it off with heavy losses.

Puller, Lewis B. (1898–1971)

Marine Corps general

Lewis Burwell Puller was born in West Port, Virginia, on June 26, 1898, and he briefly attended the Virginia Military Academy before quitting to join the Marine Corps in 1918. World War I ended before he could ship overseas, so he spent several general tours in Haiti and Nicaragua fighting bandits. Puller proved himself adept as a fighter and he won two Navy Crosses for bravery under fire. His aggressive patrolling netted several prisoners, which gained him the nickname of “El Tigre.” The rebel leader Augusto Sandino found him so troublesome that he offered a price for Puller’s head. His next stint of duty came with the famous “Horse Marines,” which guarded the U.S. legation in Beijing, China. He came to respect and admire Chinese and Japanese soldiers for their discipline and endurance. In August 1941 Puller reported to Camp Lejeune, North Carolina, where he was one of the first marine officers to study jungle fighting techniques. This paid tremendous dividends during World War II when Puller, commanding the Seventh Marines on Guadalcanal, bloodily repulsed a Japanese night attack upon Henderson Field on October 24, 1942. Puller won his third Navy Cross, and, subsequently, he fought well at Cape Gloucester and Peleliu, winning his fourth Navy Cross. He then returned to the United States using his expertise to train new recruits.

The onset of the Korean War in 1950 saw Puller rejoin the 1st Marine Division and participate in General Douglas MacArthur’s brilliant Inchon landing.

He then followed the UN advance into North Korea, where, in November 1950, the marines were suddenly cut off by thousands of Chinese troops. Puller again distinguished himself by directing the 1st Marine Regiment in the defense of Koto-ri, which allowed the Fifth and Seventh Marines to escape intact. He was virtually the last marine out of Koto-ri as the retreat continued, winning his fifth Navy Cross. Puller advanced to brigadier general in January 1951, and he spent several months as assistant divisional commander before transferring back home. He was billeted at Camp Pendleton, California, for several months and, in September 1953, he rose to major general commanding the 2nd Marine Division. He suffered a mild stroke and concluded 37 years of exceptional service by resigning from active duty in January 1955. Never one to skirt controversy, Puller testified favorably at the trial of Sergeant Matthew McKeon, charged with the reckless death of six recruits, in insisting that tough discipline and realistic training were essential to the Marine Corps. Puller, who went by the nickname “Chesty” on account of his habit of walking with his chest extended, died in Hampton, Virginia, on October 11, 1971. Such was his renown that the Marine Corps commandant, 43 generals, and 1,500 former and active-duty marines attended his funeral. A rugged disciplinarian who fought fearlessly and trained his men vigorously, Puller remains the most decorated officer in Marine Corps history.

September 25–29

NAVAL: The destroyer *Mansfield* and minesweeper *Magpie* strike mines in North Korean waters; the former is heavily damaged and the latter is sunk. The navy estimates that there are in excess of 3,500 mines in Communist waters, which poses serious problems for shipping.

September 26

AVIATION: Fighters and bombers of the Fifth Air Force continue supporting the UN counterattack with close support missions in the drive toward the 38th parallel.

- The first strategic bombing campaign against North Korea concludes after a force of 20 B-29s of the 22nd Bomb Group attack and destroy munitions factories in Haeju and a hydroelectric power plant near Hungnam.

MILITARY: The 7th Infantry Division (X Corps), pushing west, and the 1st Cavalry Division (Eighth Army), marching north, link up at Suwon, South Korea. Communist forces continue their pell-mell retreat back to North Korea and cease to exist as an organized force.

MARINES: Headquarters Marine Corps reports that the Organized Reserve is completely mobilized.

- Near Seoul, South Korea, the 7th Marines pitch into the fighting as they position themselves on the north flank of the 5th Marines.

September 27

AVIATION: With all of North Korea's strategic targets in ruins, the Joint Chiefs of Staff (JCS) order a halt to all strategic bombardment missions.

MILITARY: In a fateful move, President Harry S. Truman, acting upon the advice of the Joint Chiefs of Staff (JCS), orders UN forces north of the 38th parallel separating North and South Korea to destroy all remaining forces of the NKPA. This will facilitate unification of the country under UN auspices. However, this decision sparks a sharp reaction from the People's Republic of China, which has until now refrained from active intervention in the conflict.

MARINES: After a hard fight against fanatical North Korean resistance, the 1st Marine Division and the 7th Infantry Division recapture the South Korean capital of Seoul. A party from the 1st Marines raises the American flag over the U.S. consulate.

September 28

AVIATION: A group of eight mice, launched to 97,000 feet in a test balloon, are returned to Holloman Air Force Base, New Mexico, in perfect health.

POLITICS: In Seoul, South Korea, President Syngman Rhee is officially restored to power by General Douglas MacArthur.

- At Yotota, Japan, three RB-45C Tornados from Detachment A, 84th Bombardment Squadron, arrive from Hawaii. The world's most capable reconnaissance aircraft at present, their top-secret mission is delayed when special photographic equipment fails to arrive.

September 29

AVIATION: Over Holloman Air Force Base, New Mexico, Captain Richard V. Wheeler sets a record for parachuting when he jumps from an altitude of 42,449 feet.

MILITARY: Newly victorious South Korean troops arrive at the 38th parallel, where the war began four months earlier.

NAVAL: Off Chuksan, North Korea, the minesweeper *Magpie* strikes a mine and sinks, becoming the first U.S. Navy vessel lost in the Korean War.

October 1

NAVAL: The carrier *Leyte*, having sailed all the way from the Atlantic Fleet, joins the war effort off Korea.

MILITARY: General Douglas MacArthur calls upon North Korean premier Kim Il Sung to surrender his forces and prevent a useless effusion of blood. The summons goes unanswered.

MARINES: The town of Uijongbu is the target of a determined thrust by the 7th Marines, which captures it two days later.

POLITICS: Representative McDonough sells his insulting letter from President Harry S. Truman for \$2,500, and he donates the proceedings to the Marine Corps League.

October 2

AVIATION: Over North Korea, B-29s of Bomber Command strike the training facilities at Nanam, destroying three-quarters of all buildings and impeding Communist reinforcements.

- At Taegu Air Base (T-2), South Korea, the 8th Tactical Reconnaissance Squadron deploys, becoming the first reconnaissance unit deployed on the peninsula.

October 4

AVIATION: Far East Air Forces (FEAF) is directed to assume tactical control of all land-based aircraft in Korea, including those belonging to the Marine Corps at Kimpo.

- The aerial war effort is bolstered by F-51s of South African Squadron No. 2, which is attached to the Far East Air Forces (FEAF).

October 5

MARINES: The 1st Marine Division, having been replaced by army units, returns to Inchon, South Korea, for immediate embarking. Its losses in the recent campaign amounted to 411 dead and 2,029 wounded.

October 6

AVIATION: At Edgewater Arsenal, Maryland, Piasecki HRP-1 from marine experimental helicopter squadron HMX-1 test drops a bomb from an altitude of 8,000 feet.

- Near Seoul, South Korea, the air force assumes control of Kimpo Airfield from the Marine Corps.
- The arsenal at Kan-ni, North Korea, is leveled by 18 Bomber Command B-29s. However, Far East Air Forces (FEAF) instructs that bombing of all bridges south of Pyongyang and Wonsan be halted, presumably to allow their use by counterattacking UN forces.

October 7

DIPLOMACY: The United Nations passes a resolution authorizing UN forces to enter North Korea for the purpose of establishing a unified and democratic regime in that country.

October 8

AVIATION: The Fifth Air Force, headquartered in Tokyo, Japan, is given control of the 1st Marine Air Wing (1st MAW) and begins directing its operational sorties.

- Once Razon bombs are fitted with more reliable electronic equipment arrive, attacks with these radio-guided weapons resumes.

October 9

MILITARY: Near Kaesong, South Korea, the I Corps, Eighth Army, crosses the 38th parallel in force and begins working its way toward Pyongyang, North Korea, the Communist capital. The advance is spearheaded by the 1st Cavalry Division. General Douglas MacArthur issues a second summons to the North Korean government to surrender. Red China issues increasingly vocal warnings that it will not tolerate non-Korean units along its borders.

October 10

AVIATION: The Air National Guard mobilizes the first of 66 units and 45,000 men that will see service in the Korean War.

- In Europe, Lieutenant General Lauris Norstad is appointed commander of United States Air Forces Europe (USAFE).

NAVAL: Task Force 77 minesweepers begin clearing the harbor of Wonsan, North Korea, in preparation for landing the Army X Corps on October 20.

October 11

DIPLOMACY: General Douglas MacArthur calls on the North Korean government to surrender, which again goes unheeded.

- The government of the People's Republic of China sternly reiterates that it will not "stand idly by" as American forces advance toward its border with North Korea.

October 12

NAVAL: Off Wonsan, North Korea, the minesweepers *Pirate* and *Pledge* strike mines as they maneuver to avoid enemy shore fire and sink. It is estimated that the harbor is defended by 3,000 Soviet magnetic and acoustic mines.

October 15

AVIATION: VMF-312 and VMF (M)-513 of Marine Air Group 12 (MAG-12) are the first American aviation units to operate on North Korean soil when they begin operating from the airfield at Wonsan.

MILITARY: President Harry S. Truman and General Douglas MacArthur convene at Wake Island in the Pacific to discuss military strategy in Korea. At the time, MacArthur denies any further need for additional troops and also discounts any possibility of Soviet or Chinese intervention. Despite a good public showing, tension is mounting between the two leaders.

MARINES: At Inchon, South Korea, the 1st Marine Division embarks for an intended attack upon the North Korean port of Wonsan on the east coast of North Korea, unaware that it has already fallen to ROK forces.

October 14–17

MILITARY: At Pusan, South Korea, the 7th Infantry Division embarks on ships for immediate redeployment to the northeastern coast of the peninsula.

October 19

MILITARY: Pyongyang, the capital of Communist North Korea, falls to the 1st Cavalry Division and the 1st ROK Division.

October 20

AVIATION: The Fairchild C-119 Flying Boxcar makes its combat debut by dropping 4,000 paratroopers over Sukchon and Sunchon, North Korea, 30 miles north of the capital Pyongyang. This is also the first time that 105mm howitzers are successfully air-dropped to ground forces.

MILITARY: The 187th Airborne Regimental Combat Team makes the first parachute drop of the Korean War by landing at Sukchon and Sunchon, North Korea. The move fails to snare many retreating North Koreans, however.

October 21

MILITARY: In a move that is viewed as somewhat premature, General Douglas MacArthur publicly declares that the end of the war in Korea is at hand.

October 24

MILITARY: In a fateful move, General Douglas MacArthur removes all movement restrictions on UN forces, allowing them to advance up to the border with Red China.

October 25

AVIATION: Far East Air Forces suspend all B-29 operations for want of appropriate targets. However, all restrictions on close air support missions are lifted, allowing UN aircraft to fly up to the Chinese border.

- In Japan, Combat Cargo Command establishes a new daily record of 1,767 tons of equipment conveyed to South Korea.

MILITARY: North of Unsan, North Korea, ROK forces are attacked by the Chinese 50th Field Army for the first time. A Chinese prisoner taken by the Americans declares that large numbers of Chinese troops have already infiltrated into North Korea. Despite this alarming intelligence, General Douglas MacArthur allows the X Corps and the Eighth Army, divided by the Taebeck Mountains, to operate independently of each other.

October 26

AVIATION: Over North Korea, C-119 Flying Boxcars of the Combat Cargo Command drop 28 tons of food, supplies, and ammunition to UN troops cut off by Communist forces.

MILITARY: At this juncture of the war, the Army X Corps is tasked with assisting South Korean forces to eliminate Communist troops in northeastern Korea, while the Eighth Army does the same in northwest Korea. However, neither force operates in conjunction with the other and they are separated by a mountain range between them.

Private Seiju Nakandakarc and Private Ralph Saul operate a 3.5-mm bazooka on the frontlines of Korea, 1950. (*Library of Congress*)

NAVAL: Two weeks of minesweeping at Wonsan Harbor, North Korea, results in advanced echelons of the 1st Marine Division landing there. The landing is five days behind schedule.

October 27

MARINES: As UN forces surge northward, the 5th Marines become responsible for controlling 50 square miles of terrain between the ports of Wonsan and Hungnam, North Korea. Meanwhile, the 1st Battalion, 1st Marines occupies the town of Kojo, 25 miles south of Wonsan. Tonight NKPA forces attack in force and are driven off; marine casualties are 27 killed and 47 injured.

October 28

AVIATION: F-84Es belonging to the 27th Fighter Escort Wing complete their deployment from Texas to bases in West Germany. This is the first mass transatlantic crossing by jet aircraft and wins the unit a Mackay Trophy.

MILITARY: In an ominous sign, ROK troops engage Chinese Communist forces (CCF) at Suding, North Korea, taking 16 prisoners. They talk freely and alert their captors that thousands of Chinese are in the vicinity.

October 29

MILITARY: At Iwon, North Korea, the 7th Infantry Division comes ashore unopposed and begins advancing north toward the Chinese border.

November 1

AVIATION: Russian-built and -manned MiG-15 jet fighters begin harassing UN aircraft from bases across the Yalu River in Manchuria.

MILITARY: The 21st Infantry Regiment, 24th Infantry Division, slogs into Chonggodo, North Korea, 18 miles south of the Yalu River separating Korea from China. It is the northernmost point the Eighth Army will reach during this war.

November 2

AVIATION: At Yokota, Japan, an RB-45C of Detachment A, 84th Bomb Squadron flies its first reconnaissance mission of the war.

MARINES: At Majon-ni, North Korea, Communist forces ambush a marine supply convoy, killing 25 and wounding 41.

- At Sudong, farther north, ROK forces in the area are relieved by the 7th Marines, which begin advancing along a narrow mountain road to the Chosin (Cangjin) Reservoir. Tonight, Chinese forces make several strong probes along their perimeter, but they are repulsed.

November 2–6

MILITARY: Near Unsan, North Korea, the 116th Chinese Division annihilates the 3rd Battalion, 8th Cavalry Regiment, 1st Cavalry Division as a warning to UN forces, then disappears back into the hills. The message goes unheeded at General Douglas MacArthur's headquarters.

November 2–20

NAVAL: UN minesweeping forces clear the harbor of Chinnampo, the port city of Pyongyang, North Korea, without casualties.

November 3

MILITARY: At Wonsan, North Korea, the 3rd Infantry Division disembarks and begins marching northward.

November 4

AVIATION: Near Chongju, North Korea, B-26s fly close support missions for the Eighth Army, killing hundreds of enemy soldiers and allowing the Eighth Army to retreat.

November 4–6

MARINES: As the 7th Marines under Colonel Homer L. Litzenberger march up the Funchilin Pass, they stumble headlong into the Chinese 124th Division directly in their path. Three days of intense fighting fails to dislodge them, but the Communists finally withdraw on the evening of the 6th. Marine losses are 50 dead and 200 wounded; the Chinese are estimated to have lost at least 2,000 men.

November 5

AVIATION: A force of 21 B-29s from the 19th Bomb Group drops incendiaries on the North Korean city of Kanggye, only 20 miles from the Chinese border, burning 65 percent of the urban center.

MILITARY: General Douglas MacArthur informs UN authorities of Chinese forces deployed in North Korea.

MARINES: On the road to Majon-ni, Company A, 1st Marines, under Captain Robert Barrow engages and destroys a North Korean roadblock, killing 51 of the enemy.

November 8

AVIATION: The world's first all jet dog fight breaks out over North Korea as American F-80 fighters tangle with Soviet MiG-15s; the Americans claim one kill by Lieutenant Russell J. Brown. However, the Russians have since disputed this claim, noting that the MiG-15 in question, though damaged, made it back to base.

- An armada of 70 Bomber Command B-29s drops 580 tons of fire bombs on Sinuiju, North Korea, astride the Chinese border. This is the largest incendiary raid of the war and occurs as other B-29s attack bridges spanning the Yalu River.
- Carrier aircraft of Task Force 77 are ordered to attack bridges across the Yalu River near Chongsonjin, North Korea; however, they are to strike only the Korean side of the structure.

November 9

AVIATION: Over North Korea, Lieutenant Commander William T. Amen, flying an F9F Panther with VF-111 from the carrier *Philippine Sea*, conducts the first naval jet-versus-jet combat in aviation history when he downs a MiG-15.

- B-29 tail gunner Airman Jerry J. LaVerne shoots down the first MiG-15 lost to a bomber. His own aircraft is nonetheless badly shot up and crash-lands back in Japan; five crewmen are killed.

MARINES: In Sweden, detachments from the cruiser *Columbus* and destroyer *Furse* attend ceremonies marking the funeral of King Gustav V.

November 10

AVIATION: Near the Yalu River, Russian-piloted MiG-15s, bedecked in North Korean colors, shoot down the first B-29 lost in the Korean War. The crew, belonging to the 307th Bombardment Group, survives the crash but are imprisoned.

MARINES: At the Washington Navy Yard, D.C., the Marine Corps celebrates its 175th anniversary by opening an exhibit of historical documents and artifacts.

November 15

MARINES: At Hagaru-ri, North Korea, the 7th Marines occupy the southern end of the Chosin Reservoir and the balance of the division trudges up to join it. Movement in this vicinity is restricted to a single road stretching along the mountains from the reservoir to Hungnam.

November 18

AVIATION: The 35th Fighter Interceptor Group (FIG) departs its airfield in South Korea and deploys near Hungnam, North Korea, becoming the first unit to fly from Communist soil.

November 19

AVIATION: A force of 50 B-26s unloads incendiary bombs on Musan, North Korea, destroying three-quarters of the military barracks there. This is the first mass attack by light bombers in the war and takes place on the Tumen River bordering Red China.

November 20

MARINES: In North Korea, the 1st Marine Division is joined by 41 independent commandos of the Royal Marines under Lieutenant Colonel Douglas B. Drysdale.

November 21

MILITARY: Disregarding Chinese warnings, United Nations forces continue advancing and reach the Yalu River bordering Manchuria. Elements of the 17th Infantry, 7th Infantry Division, march into Hyesanjin along the river and directly on the Chinese border.

November 22

AVIATION: The 2nd Helicopter Detachment, equipped with Bell H-13s, deploys in Korea as part of the 8055th Mobile Army Surgical Hospital (MASH); this is the army's first helicopter unit committed to combat operations in the war.

November 23

AVIATION: Fifth Air Force B-29s continue striking Communist supply and communication centers throughout North Korea and light bombers and fighters redouble their close support missions.

- Combat Cargo Command begins air dropping large quantities of ammunition to UN forces in North Korea to support their new offensive.

MARINES: The 1st Battalion, 1st Marines occupies the town of Chinhung-ni, on the main road just north of Sudong.

November 24

MILITARY: At Bamberg, Germany, the Headquarters, U.S. Army Constabulary, is deactivated and all of its constituent units rejoin their parent organizations as part of the U.S. Seventh Army.

- In North Korea, as UN forces launch what they hope will be their final offensive of the war, General Douglas MacArthur assures reporters that it will “get the boys home by Christmas.”

MARINES: As the 5th Marines move up the eastern side of the Chosin Reservoir, responsibility for protecting Koto-ri falls to the headquarters and 2nd Battalion, 1st Marines.

November 25–27

MILITARY: In North Korea, despite repeated warnings that went unheeded, the Chinese 13th Army Group, comprising 18 divisions and 300,000 men, stages a successful counteroffensive against the Eighth Army. Their nighttime assault, committed during bitterly cold weather, overruns the 2nd and 25th Infantry Divisions while several South Korean formations of the ROK II Corps are likewise destroyed. The Eighth Army begins an immediate withdrawal back down the peninsula to prevent encirclement and destruction.

MARINES: In North Korea, the 7th Marines advance to Yudan-ni west of the Chosin Reservoir, and they string out several company-sized outposts along the Toktong Pass. Meanwhile, the 5th Marines are relieved at the Chosin Reservoir by an army battalion, and they trudge up through Hagaru-ni toward Yudan-ni in freezing, subzero weather.

November 26

AVIATION: Bomber Command B-26s conduct their first night close support missions against Chinese forces pressing down upon the X Corps and Eighth Army in North Korea.

MARINES: Two companies of the 3rd Battalion, 1st Marines are assigned to hold Hagaru-ni, which serves as the divisional command post, supply dump, and airfield for the 1st Marine Division.

November 27

MILITARY: In North Korea, the X Corps launches an immediate offensive to take pressure off the battered Eighth Army. Meanwhile the Chinese 9th Army Group begins an offensive of its own in the Chosin Reservoir area. They manage to catch the 31st Regimental Combat Team under Colonel Allan D. MacLean and completely overrun it. MacLean is killed, his column is annihilated, and only 1,000 soldiers of the original 2,500 manage to make it to marine lines at Hagaru-ri by December 1. The majority of the survivors suffer from frostbite and are unable to fight further. However, their gallant stand upsets Chinese timetables and enables the marines to prepare defensive positions at Chosin.

MARINES: X Corps orders the 2nd Battalion, 5th Marines to attack west from Yudan-ni, but Chinese resistance proves insurmountable. The remainder of the regiment arrives later in the day and reinforces the 7th Marines in Yudan-ni. The Chinese launch four divisions after dark and in freezing temperatures below zero, but all marine positions at Yudan-ni and the Toktong Pass hold fast and repel them.

November 28

AVIATION: Fifth Air Force B-26s, assisted by advanced radar equipment, begin dropping bombs within 1,000 yards of UN lines.

- The Combat Cargo Command begins airlifting wounded soldiers and marines out of North Korea while also delivering 1,600 tons of supplies to the surrounded 1st Marine Division at Chosin.

MILITARY: At Singalpajin, North Korea, elements of the 3rd Battalion, 32nd Infantry, 7th Infantry Division, become the second American unit to reach the Yalu River separating Korea from China.

MARINES: Near the Chosin Reservoir, General Oliver O. Smith halts the marine offensive west of Yudan-ni in favor of clearing the main supply route back to Hungnam, which is the only way out. The 1st Battalion, 7th Marines succeeds in rescuing Company C and brings it back into town. Tonight, massive Chinese forces again surge toward the Hagaru-ni perimeter, but again the 3rd Battalion, 1st Marines hold their ground and inflict severe losses upon their antagonists.

November 28–29

MILITARY: The Battle of Kunri, North Korea, unfolds as the 2nd Division forms the rearguard of the retreating Eighth Army. Proceeding south in a massive convoy, they are ambushed by thousands of Chinese and overrun, losing 5,000 killed, wounded, and captured; the 9th and 38th Infantries are nearly wiped out.

November 29

AVIATION: The Combat Cargo Command resorts to a maximum effort to keep the 1st Marine Division, trapped by overwhelming Chinese forces at Chosin, North Korea, adequately supplied by air. They are a major contributor to the division's survival against tremendous odds.

MARINES: Near Chosin, North Korea, the 1st Battalion, 1st Marines launches a spoiling attack against Chinese forces massing at Chinhung-ni as Task Force Drysdale (41 Commando, G Company, 3rd Battalion, 1st Marines, and an Army infantry company) escort a convoy of headquarters and other elements from Koto-ri to Hagaru-ni. Tonight, the Chinese stop and overrun the convoy, but they are repulsed at Koto-ri by the 2nd Battalion, 1st Marines.

- In the face of overpowering Chinese strength, X Corps commander Major General Edward M. Almond orders the 1st Marine Division to fall back to Hamhung.

November 30

AVIATION: To be closer to ground forces, Marine Air Group 12 (MAG-12) transfers its operations from Wosan, North Korea, to Yonpo Field, Hungnam.

MILITARY: In light of the deteriorating situation, Major General Edward M. Almond orders his X Corps (3rd and 7th Infantry Divisions, 1st Marine Division, and ROK I Corps) to fall back to the port of Hungnam for evacuation.

MARINES: The Chinese launch another mass attack against marines holding Hagaru-ni, but they are again repulsed with heavy losses.

December 1

AVIATION: After Herculean efforts, the airstrip at Hagaru-ni is kept operational and the first C-47 lands, bringing supplies and evacuating the wounded.

MARINES: Near Chosin, North Korea, the 5th and 7th Marines fight their way from Yudan-ni and reach Hagaru-ni while the 1st Battalion, 7th Marines marches tonight to relieve Fox Company trapped at Toktong Pass.

December 2

MARINES: Near Chosin, North Korea, the rearguard of marines at Yudam-ni defeats a Chinese attempt to carry the position. Meanwhile, the 1st Battalion, 7th Marines links up with Fox Company in the Toktong Pass, which has lost half its men to nightly attacks.

December 3

MARINES: At Toktong Pass, North Korea, the 5th and 7th Marines fight their way to join the 1st Battalion, 7th Marines already there. By evening, the head of the column is trudging into Hagaru-ni. Despite 79 hours of continuous combat, the Chinese are determined to cut off and annihilate the marines, redoubling their efforts to prevent them from reaching the port of Hungnam.

December 4

AVIATION: The world's first jet bomber interception takes place when Russian-piloted MiG-15s shoot down an air force RB-45C Tornado reconnaissance aircraft over Sinuiju, along the Yalu River between Red China and North Korea; the crew of four is killed.

- While flying in support of marines at Chosin Reservoir, Ensign Jesse L. Brown's F4U Corsair is damaged and he crash-lands near Hagaru-ni. Brown is injured and pinned in the wreckage, so Lieutenant Thomas J. Hudner of carrier *Leyte's* VF-31 deliberately crash-lands his Corsair nearby to assist, but he cannot cut him free from the wreckage. A helicopter arrives and evacuates Hudner before the position is overrun by Chinese and Brown, the navy's first African-American aviator, perishes horribly in subzero weather. For his attempted rescue of a squadron mate, Hudner wins the Medal of Honor; Brown receives a posthumous Distinguished Flying Cross.

MARINES: Remaining elements of the 5th and 7th Marines slog into Hagaru-ni with massed Chinese close behind, but, now united, the 1st Marine Division under Major General Oliver P. Smith prepares to fight its way back to the sea.

December 5

AVIATION: On a frozen airstrip at Hagaru-ni, North Korea, the Combat Cargo Command, aided by C-47s of the Royal Hellenic Air Force, has its most active day by flying 131 missions and evacuating 3,925 patients to Japan. This is the largest aeromedical airlift of the entire war.

MILITARY: As the Chinese juggernaut rolls down the Korean Peninsula, Pyongyang is abandoned by retreating United Nations forces; it had been occupied since October 19.

NAVAL: At Chinnampo, on the west coast of North Korea, U.S. and Commonwealth naval forces evacuate 7,700 American and South Korean forces.

December 6

AVIATION: The marine withdrawal from Hagaru-ni is covered by an average of 200 close support air strikes per day by air force, navy, and marine aircraft. To this end, a marine R5D transport is rigged as a aerial direction center, the first time a transport aircraft has been rigged for this purpose.

- F-84 Thunderjets of the 27th Fighter Escort Wing perform their first combat mission over North Korea, flying from airfields at Itazuke, Japan.

MARINES: Near Chosin, North Korea, General Oliver P. Smith orders his 1st Marine Division to attack down the single road from Hagaru-ni to the port of Hungnam. The Chinese resort to ambushes in daylight and, tonight, they launch a mass assault against marine positions on East Hill, being repulsed with losses.

Smith, Oliver P. (1893–1977)

Marine Corps general

Oliver Prince Smith was born in Menard, Texas, on October 26, 1893, and he joined an ROTC chapter while attending the University of California, Berkeley. He was commissioned a second lieutenant in the army after graduating in 1916, but he transferred to the Marine Corps the following year. Thereafter Smith fulfilled the usual litany of overseas assignments, including stints in Haiti, Guam, and a two-year course at the École Supérieure in Paris, France. Smith subsequently taught amphibious tactics at the Marine Corps school in Quantico, Virginia, and, given his background as a religious, highly courteous individual, he acquired the nickname of “the Professor.” When World War II broke out, Smith was serving as executive officer at Marine Corps headquarters, but he pushed for a combat position and, in March 1944, he assumed command of the Fifth Marines. He helped to plan and execute the successful campaigns at New Britain and Peleliu. His final wartime assignment was as deputy chief of staff to U.S. Army general Simon B. Buckner on Okinawa in April–June, 1945. After the war, Smith returned to Quantico, where he became fascinated with helicopter technology and urged its wholesale adoption by the Marine Corps.

Smith was serving as assistant commandant and chief of staff of the Marine Corps when the Korean War erupted in

General Oliver P. Smith (U.S. Marine Corps)

June 1950. He gained command of the 1st Marine Division and helped plan and execute the successful landing at Inchon under General Douglas MacArthur. After directing the recapture of Seoul, South Korea, in a stiff, month-long fight, Smith became part of General William M. Almond's X Corps and was directed to land on the eastern coast of North Korea. From here

(continues)

(continued)

UN forces advanced to the Chinese border along the Yalu River, but Smith, anticipating a trap, ordered supplies stockpiled and airstrips constructed along his avenue of advance. During the massive Chinese attack of November 27, 1950, the 1st Marine Division managed to stand its ground at the Chosin Reservoir and, under Smith's enlightened generalship, fought its way 76 miles to safety. This retreat, conducted under howling, subzero weather in the face of eight Chinese divisions, became a legendary performance in the annals of warfare. Not only did Smith manage to bring off all

his dead, his wounded, and his equipment, he also inflicted an estimated 25,000 casualties on superior Chinese forces, which failed to destroy him. The marines were evacuated at Hungnam and redeployed in South Korea as part of IX Corps, where, after an army general suffered a heart attack, Smith became the first Marine Corps general to lead a combined army-marine force in the field. In April 1951 he returned to the United States to assume control of Camp Pendleton, California, and, two years later, he advanced to lieutenant general. Smith died in Los Altos, California, on December 25, 1977, one of the greatest tactical minds in Marine Corps history.

December 7

AVIATION: In a bit of ingenuity, air force transports successfully parachute bridging sections to waiting marines below, and they reconstruct a fallen, 1,500-foot span over Funchilin Pass. This is the first bridge ever air-dropped in military history. Meanwhile, the close proximity of Chinese forces makes VMF-214 depart the airfield at Yonpo and return to the carrier *Sicily*.

- B-29s of Bomber Command strike Communist towns and troop concentrations near the Chosin Reservoir, North Korea, to assist marine and army units surrounded there. The troops fashion crude air strips wherever possible to permit transport craft to land supplies and remove the wounded.

MARINES: The rearguard of the 1st Marine Division reaches Koto-ri, while the vehicle column stretches out ahead of it for several miles.

December 8

AVIATION: To this date, the Combat Cargo Command has flown in 1,580 tons of food, ammunition, and supplies to the 1st Marine Division, including eight bridge spans. They have also airlifted 5,000 sick and injured marines to safety.

MARINES: Lead elements of the 1st Marine Division fight their way through Koto-ri as the entire force continues pushing south. Ahead of them, the 1st Battalion, 1st Marines clears Funchilin Pass of enemy troops, and engineers begin repairing a fallen span.

December 9

MILITARY: At Hungnam, North Korea, the X Corps is ordered to evacuate that port by General Douglas MacArthur and redeploy at Pusan, South Korea.

NAVAL: Vice Admiral Turner C. Joy, commander, U.S. Naval Force, Far East, instructs Rear Admiral James H. Doyle, Task Force 90, to evacuate the X Corps from Hungnam, North Korea.

December 10

AVIATION: At Yonpo Airfield, North Korea, VMF-311 deploys and flies the first Marine Corps jet missions while flying Grumman F9F Panthers.

NAVAL: Task Force 90 under Rear Admiral James H. Doyle commences evacuating UN forces and their equipment from Hungnam, North Korea. Over the next two weeks, 105,000 American and South Korean forces, 91,000 civilians, and 350,000 tons of supplies are safely transported before all Hungnam's harbor installations are destroyed by demolition charges.

MARINES: The front of the 1st Marine Division reaches Chihung-ni while its rearguard still holds its own at Koto-ri. However, several M-26 Pershing tanks are abandoned on the one-lane road after the lead vehicle suffers from locked brakes.

December 11

MARINES: The rearguard of the 1st Marine Division presses on into the safety of Hungnam, North Korea; they are ordered to embark on ships the following day. The perilous retreat from the Chosin Reservoir was a brilliantly conducted affair and a hallmark in Marine Corps history. Marine losses are 908 dead, 3,508 wounded, and 7,513 noncombat casualties, mostly frostbite and illness. Chinese casualties are estimated in excess of 40,000.

December 12

AVIATION: During the mass evacuation at Hungnam, North Korea, UN forces are covered by VMF-212 on the carrier *Bataan*, VMF-214 on the carrier *Sicily*, and VMF323 on the *Badoeng Strait*.

December 14

AVIATION: The first six-ton Tarzon radio-guided bombs are dropped on a tunnel near Huichon, North Korea, with mediocre results.

December 14–17

AVIATION: With Communist forces fast approaching Hamhung, North Korea, Combat Cargo Command stages a three-day evacuation from nearby Yonpo Airfield, removing 228 wounded, 3,891 passengers, and 20,088 tons of cargo in only 72 hours.

December 15

AVIATION: The air force ups the ante over North Korea as North American F-86A Sabre jet fighters begin combat operations.

MILITARY: General Walton H. Walker deploys his battered Eighth Army in new defensive lines along the Imjin River north of Seoul, and he awaits the Chinese onslaught.

MARINES: Final elements of the 1st Marine Division depart Hungnam, North Korea, leaving behind only the 1st Amphibious Tractor Battalion.

December 16

POLITICS: In light of the deteriorating situation in northeastern Asia, President Harry S. Truman declares a national emergency while Dwight D. Eisenhower

quits his post as president of Columbia University and becomes head of NATO as supreme allied commander. A surprise attack by the Soviet Union on western Europe is greatly feared.

MARINES: The 1st Marine Division disembarks at Masan, in the same rest area employed by the 1st Provisional Marine Brigade during the Pusan Perimeter campaign. Several units are deployed in the countryside, scouring it for bandits and Communist guerrillas.

December 17

AVIATION: Over North Korea, the first swept-wing jet combat in aviation history results in Lieutenant Colonel Bruce H. Hinton downing a MiG-15 in his F-86A.

December 18

AVIATION: Patrol Squadron 892 (VP-892) becomes the first of many Naval Air Reserve squadrons to deploy in the Korean War.

MARINES: The 1st Marine Division is reassigned to the Eighth Army reserve.

December 19

MILITARY: General Dwight D. Eisenhower is approved as supreme commander of all Western European defense forces by the North Atlantic Council.

December 20

AVIATION: At Kimpo, South Korea, Operation Christmas Kidlift unfolds as 12 C-54s of the 61st Troop Carrier Group transport 800 Korean orphans to the safety of Cheju-do, an island off the coast.

December 23

DIPLOMACY: The United States enters a mutual defense pact with France, Vietnam, Cambodia, and Laos to provide indirect military assistance in the face of a mounting Communist insurgency throughout Indochina.

MILITARY: Near Uijongbu, South Korea, Lieutenant General Walton H. Walker dies in an unfortunate jeep accident. The Americans scramble for a new commander to replace him.

December 24

AVIATION: Navy jets and air force B-26s sweep in over Hungnam, North Korea, to cover the final departing UN forces there.

MARINES: At Hungnam, North Korea, the 1st Amphibious Tractor Battalion is the last UN unit to depart from that port. Over the past two weeks, over 105,000 troops of the X Corps and 91,000 civilians have been removed to safety.

December 25

MILITARY: Communist Chinese forces, flush with victory, cross the 38th parallel into South Korea.

December 26

MILITARY: Lieutenant General Matthew C. Ridgway is appointed commander of the Eighth Army in South Korea.

December 28

AVIATION: In Japan, Marine Corps R5D air transports ferry the first Bell HTL helicopters for use in Korea.

December 29

AVIATION: In Korea, RF-51 Mustangs begin flying critical reconnaissance missions out of Taegu for the first time. Though slower than the RF-80 Shooting Star, they possess far greater range and loitering time over a target.

MILITARY: The outspoken general Douglas MacArthur publicly states that the United Nations ought to attack Communist installations in Manchuria, even with the use of atomic weapons. He also seeks a naval blockade of the Chinese coast and the employment of Nationalist Chinese troops. He informs the Joint Chiefs of Staff (JCS) that failure to abide by his demands will result in the loss of the entire Korean Peninsula to the Communists.

December 31

AVIATION: As the Chinese resume their offensive, Marine Corps aviation lends direct air support to units in the frontline while the majority of air force jets strike at enemy rear areas and supply lines.

MILITARY: Gleeful Chinese Communist forces, surprised by their easy success over UN forces, launch another offensive involving seven field armies and two North Korean corps in a bid to drive the Americans farther south. They are successful in routing the ROK 1st Division, prompting the allies to fall back from the 38th parallel to new lines 70 miles farther south.

1951**January**

MILITARY: In light of recent events, the Army's size swells through draftees and volunteers to 1.5 million and 18 divisions.

January 1

AVIATION: The Air Defense Command is reestablished under Lieutenant General Ennis C. Whitehead.

- In light of the new Chinese offensive, the carrier *Bataan* and VMF-212 shift from Korea's east coast to provide air support along the west coast. Fifth Air Force fighters and bombers also turn out in force to help blunt Communist advances.

January 2

AVIATION: In South Korea, a C-47 transport drops flares to assist B-26s and F-82s making night attacks against Chinese positions.

MILITARY: In Washington, D.C., a supplemental defense appropriations bill is passed by Congress by adding \$20 billion to the \$14 billion already approved for the Department of Defense.

January 3

AVIATION: In Washington, D.C., the Joint Chiefs of Staff authorizes the Marine Corps to create an additional three aviation squadrons, bringing the total to 21.

- Over 60 Bomber Command B-29s strike targets in Pyongyang, North Korea, with over 650 tons of incendiary bombs with a similar-sized follow-up raid two days later.
- Desperate to assist the retreating Eighth Army, Far East Air Forces (FEAF) mount a record 958 combat sorties today.

MILITARY: With Chinese forces pressing hard upon the Han River east and west of Seoul, South Korea, the Eighth Army evacuates the capital and continues falling back to new lines farther south.

January 4–5

AVIATION: After the final American aircraft depart from Kimpo Airfield, South Korea, the runway is bombed and cratered to prevent its use by Communist air forces.

MILITARY: Advancing Communists capture Inchon and the Kimpo airport in South Korea, for the second time in six months, forcing UN forces to evacuate Seoul once again. Meanwhile, General Matthew B. Ridgway orders the Eighth Army and X Corps withdrawn to Line D, 50 miles below the 38th parallel. The Chinese willingly follow, all the while overextending their supply lines and exposing themselves to attacks from the air.

January 6

AVIATION: In Japan, the Combat Cargo Command finishes an extensive resupply division to the 2nd Infantry Division as it fights to hold off a determined Chinese advance.

January 7

AVIATION: All three carriers with Marine Corps squadron onboard are withdrawn from Korean waters; consequently, VMF-214, VMF-311, and VMF-323 end up back at Itami Airfield, Japan, for want of good operating conditions on the peninsula.

January 7–14

MILITARY: General Matthew B. Ridgway stabilizes X Corps and Eighth Army positions 50 miles south of the 38th parallel in a bid to receive—and crush—the latest Chinese offensive. However, the 2nd Infantry Division is forced to give ground and leaves a 20-mile salient on the UN's right flank, through which North Korean guerrillas pour through. Consequently, Ridgway directs the 1st Marine Division from the reserves to this threatened position.

January 10

AVIATION: In Tokyo, Japan, Brigadier General James E. Briggs arrives to take charge of Bomber Command. This reflects the Strategic Air Command's (SAC) policy of rotating commanders every six months to give them as much wartime experience as possible.

- Marine air transport squadrons VMR-152 and 352 begin airlifting thousands of replacements for the 1st Marine Division in South Korea.

MARINES: The 1st Marine Division begins moving north to the port city of Pohang on South Korea's eastern coast.

January 12

AVIATION: In a new tactic for heavy bombers, Fifth Air Force B-29s drop 500-pound bombs fused for airburst above the ground. The result is like a giant shotgun, showering Chinese formations with millions of metal shards.

DIPLOMACY: In New York, the UN cease-fire committee suggests ending the fighting in Korea. The Chinese, who are convinced that they are winning, express no interest at first.

January 13

AVIATION: A six-ton Tarzan guided bomb scores a direct hit on the bridge at Kanggye, North Korea, taking out 60 feet of the center span.

January 14

MILITARY: Attacking Chinese columns capture the city of Wonju, South Korea, marking their farthest advance down the peninsula.

January 15

AVIATION: At El Toro, California, the Marine Helicopter Squadron 161 (HMR-161) becomes the first such organization in the world.

MILITARY: In Washington, D.C., President Harry S. Truman asks Congress for another \$14 billion defense budget supplement.

January 15–17

MILITARY: Throughout western South Korea, General Matthew B. Ridgway commits Operation Wolfhound, which unleashes 6,000 troops, tanks, and artillery to destroy nearby Chinese Communist units. The revived UN forces inflict 1,800 casualties over the next two days at a loss of three dead and seven injured.

January 16

AVIATION: The U.S. Air Force contracts with Convair to begin Project MS-1593, which is designed to acquire the nation's first intercontinental ballistic missile (ICBM) by the end of the decade. The end result is the Atlas missile.

- Six B-36 Peacekeeper bombers from the Strategic Air Command (SAC) depart Bergstrom Air Force Base, Texas, and fly the entire 7,000 miles distance to RAF Lakenheath, England, without refueling.
- In Korea, continuing teething problems with Grumman F9F Panthers leave VMF-121 grounded until the manufacturer can send technical representatives.

MILITARY: The 31st and 47th National Guard Divisions are federalized, but they both will remain stateside.

January 17

AVIATION: At Taegu, South Korea, a small force of F-86 Sabres deploys in order to be closer to the frontlines and cut down traveling time to targets. This is also the first time they are rigged to serve as fighter bombers in close support missions.

DIPLOMACY: Through intermediaries, the Chinese Communists formally reject the proposed United Nations cease-fire in Korea. They are placing great faith in their ongoing and upcoming offensives.

January 17–18

AVIATION: From bases in Japan, the Cargo Combat Command conducts 109 C-119 Flying Boxcar missions and airdrops over 550 tons of supplies to embattled UN forces in South Korea.

January 18

MARINES: The 1st Marine Division, having deployed over a 1,600-square mile area north and west of Pohang, South Korea, begins the arduous task of clearing out Communist guerrillas and keeping all supply routes to the frontlines open. Once regiments are assigned a zone of action, the hunt begins.

January 19

AVIATION: Determined to interrupt the flow of Communist supplies and reinforcements into South Korea, Far East Air Forces initiates a comprehensive air interdiction campaign.

January 21

AVIATION: In several aerial battles against superior MiG-15s, an F-80 and an F-84 are lost in combat over North Korea. However, Lieutenant Colonel William E. Bertram shoots down a Communist jet, marking the first victory for an F-84.

MARINES: The 1st Korean Marine Corps (KMC) regiment is assigned to the 1st Marine Division.

January 23

AVIATION: At Bofu Airfield, Japan, Marin Air Group 33 (MAG-33) and VMF-312 begin flying sorties to South Korea; they are joined the next day by men and aircraft of the 1st Marine Air Wing (1st MAW).

- A swarm of 33 F-84s staging from Taegu, South Korea, strike Sinuiju, North Korea, which prompts a large MiG force to intercept them from across the Yalu River. A swirling, 30-minute melee ensues, but the Thunderjets manage to down three Communist jets.
- As Bomber Command B-29s strike airfields around Pyongyang, North Korea, 46 F-80s attack Communist antiaircraft defenses.

UN soldiers in Korea fought in all kinds of weather. (*Center for the Study of the Korean War, Graceland University*)

January 24–26

MARINES: Near Pohang, South Korea, North Korean guerrillas attack the command post of the 7th Marines, who pursue them over the next two days, killing 168 Communists.

January 25

AVIATION: In concert with Operation Thunderbolt, Combat Cargo Command dispatches 70 C-119 Flying Boxcars to airdrop 1,162 tons of supplies to sustain the UN offensive.

MILITARY: On the western flank of South Korea, General Matthew B. Ridgway initiates Operation Thunderbolt with the I and IX Corps to recapture Inchon and Suwon. The attack is slow and methodical, much like a meat grinder, and forces Chinese troops to take cover behind the Han River by February 20. To the east, the X Corps also conducts a similar operation entitled Roundup.

January 26

AVIATION: To better coordinate artillery and air strike spotting aircraft, a C-47 transport is outfitted with radio equipment and serves as an aerial tactical center in contact with all T-6 Mosquitos.

January 29

AVIATION: Admiral Arthur D. Struble instructs carrier aviation of Task Force 77 to begin systematically destroying railway and bridge systems along the eastern coast of North Korea; Struble initially opposed the mission, feeling his aviators were better suited for flying close support.

January 31

AVIATION: The UN makes its first spy mission of the war when the 21st TCS drops an agent at Yonan, South Korea, behind enemy lines.

February 1

MILITARY: At Sinchon, South Korea, the 23rd Infantry Regiment and a French battalion attack and rout the Chinese 125th Division, inflicting 5,000 casualties for a loss of 225 dead and injured.

February 2

NAVAL: Off Wonsan Harbor, North Korea, the minesweeper *Partridge* strikes a mine and sinks with the loss of eight sailors; this is the last vessel of its class lost in Korea.

February 5–8

AVIATION: A force of eight AJ-1 Savages and three P2V Neptunes from VC-5 flies from Norfolk, Virginia, to Port Lyautey, French Morocco, there to be deployed on *Midway*-class carriers as atomic strike aircraft.

February 5–9

MILITARY: South of Seoul, South Korea, General Matthew B. Ridgway commences Operation Punch to seize the Hill 440 complex south of the city. Here the 25th Infantry Division, backed by artillery, tanks, and air power, seizes its objective and inflicts 4,200 casualties on Chinese forces at a cost of 70 killed and wounded.

February 8

AVIATION: Far East Air Forces (FEAF) launches a maximum effort to neutralize all Communist rail lines in northeastern North Korea.

- In Tokyo, Japan, Brigadier General John P. Henebry assumes command of the 315th Air Division to oversee all cargo-carrying operations into South Korea.

February 10

MILITARY: The army 24th Infantry Division seizes Inchon and Kimpo Airfield from the Chinese.

February 11

MILITARY: In central Korea, Chinese forces commence the Fourth Offensive in an attempt to destroy remaining UN forces. Two ROK divisions give way at the onset and the IX Corps is forced to withdraw from the middle of the UN lines.

February 11–13

MILITARY: As the 2nd Infantry Division withdraws through Hoengsong, South Korea, it is attacked by superior Chinese forces and suffers heavy losses. While two battalions of the 38th infantry are decimated and the 15th and 503rd Field Artillery Battalions lose many of their guns, a determined stand by the Dutch Battalion allows the Americans to withdraw safely to Wonju.

February 12

MARINES: Antiguerilla operations at Pohang, South Korea, conclude with a loss of 36 dead and 148 wounded. The 1st Marine Division is ordered up to Chungju in support of Operation Killer to retake territory lost in the center of UN lines.

February 13

AVIATION: Operating from forward airstrips throughout South Korea, the 315th Air Division transports over 800 sick and wounded soldiers to hospitals at Taegu and Pusan.

- At K-3 airfield near Pohang, South Korea, Marine Air Group 33 (MAG-33) establishes a command post before ordering its squadrons in. Meanwhile, VMF-311 has restored its F9F Panther jets back to operating condition and resumes tactical support missions.

February 13–15

AVIATION: Braving strong winds and intense antiaircraft fire from the ground, 100 transports of the 315th Air Division (Combat Cargo Command) drop 420 tons of food, supplies, and ammunition to the defenders of Chipyong-ni.

MILITARY: The strategic Battle of Chipyong-ni unfolds as the 23rd U.S. Infantry under Colonel Paul Freeman, in concert with a French battalion and supporting armor and artillery units, defend their perimeter against superior Chinese forces. In two days of severe fighting UN forces lose 350 men killed, wounded, and missing, and they are completely cut off and surrounded, but they refuse to surrender. At length the defenders are rescued by the 5th Cavalry Regiment. China's failure to take Chipyong-ni indicates that its latest offensive is losing steam and it finally stalls by February 18.

February 14–17

MILITARY: At Wonju, South Korea, elements of the 2nd and 7th Infantry Divisions, 187th Airborne Regimental Combat Team, and several artillery detachments engage large numbers of Chinese infantry in a one-sided slaughter that becomes known as the "Wonju Shoot" owing to the vast amount of shells expended.

February 15–16

AVIATION: At Chipyong-ni, South Korea, H-5 helicopters of the 3rd Air Rescue Squadron ignore blinding snowstorms and 40-knot winds to deliver medical supplies to soldiers of the 2nd Infantry Division. They also evacuate 52 wounded men.

February 16

AVIATION: Army Cessna L-19 Bird Dogs begin their lengthy career as a forward artillery spotting aircraft, leaving Fifth Air Force pilots to attend to other missions.

NAVAL: With all UN forces safely evacuated, the navy institutes an 861-day blockade of Wonsan, North Korea, to deny its use to Communist forces. However, the nearby harbor remains a popular ditching area for damaged American aircraft, and helicopters continue rescuing pilots landing there throughout the war.

February 17–18

AVIATION: B-26 bombers fly the first Shoran mission of the war. Shoran is a navigational system employing ground beacon stations and an airborne radar receiver to insure precise navigation.

February 21–24

MARINES: The 5th Marines are the first unit attacking from Wonju; their target is the town of Hoengsong and resistance is slight until the 23rd. Despite heavy rain and fighting, the objective falls on the 24th.

February 21–March 6

MILITARY: As a preliminary move to a major counteroffensive, General Matthew B. Ridgway initiates Operation Killer by ordering the IX and X Corps to clear out a large Chinese-held salient in UN lines. The operation takes two weeks and inflicts 10,000 Communist casualties.

February 23

AVIATION: Northeast of Seoul, South Korea, Bomber Command B-29s begin air strikes using MPQ-2 airborne radar. The first target is a highway bridge seven miles from the capital.

February 24

AVIATION: C-119 Flying Boxcars of the Combat Cargo Command air drop a record 333 tons of supplies to UN forces on the frontlines of Korea.

MARINES: After the army commander of IX Corps dies in a helicopter crash, he is temporarily succeeded by Major General Oliver P. Smith. Command of the 1st Marine Division consequently reverts to Colonel Chesty Puller, pending Smith's return.

March 1

AVIATION: The air force establishes Thule Air Base in Greenland, 690 miles north of the Arctic Circle, which serves as its northernmost operational base.

- After a force of 18 Bomber Command B-29s are unable to rendezvous with their F-80 fighter escort over North Korea, they are set upon by MiG-15s, which damage 10 aircraft; three of these make forced landings in South Korea.
- Operation Killer serves to highlight the air force's tendency toward centralizing control of all air missions, the vast majority of which fall upon rear-area targets. Consequently, requests made by the marines for close air support are largely ignored. Afterward, marine commanders confer with the Fifth Air Force commander, who authorizes additional marine aircraft, specializing in close support missions, to assist the 1st Marine Division.

MARINES: The 1st Marine Division fulfills its part of Operation Killer by advancing from Hoengsong and, overcoming all Chinese resistance, achieves its objectives three days later.

March 4

AVIATION: C-119 Flying Boxcars of Combat Cargo Command deliver a record 260 tons of supplies to the 1st Marine Division; this is the month's largest airdrop.

March 5

MARINES: General Oliver P. Smith is relieved from command of the IX Corps and he returns to the 1st Marine Division in time for Operation Ripper.

March 6

AVIATION: After a three-month hiatus, F-86 Sabres begin patrolling along the Yalu River again. There is no shortage of MiG opposition based across the river in Manchuria.

March 6–31

MILITARY: Sensing the time ripe, General Matthew B. Ridgway commences a broad offensive he calls Operation Ripper. Under a heavy artillery bombardment, the 25th and 7th Infantry Divisions cross the Han River against light opposition and recapture Seoul on March 14. The city is promptly occupied by the 3rd Infantry Division and ROK 6th Division as Ridgway's remaining forces continue pressing toward the 38th parallel. Despite Ripper's success, the State Department complains about the aggressive names given to Ridgway's offensives and insists they assume less menacing titles.

March 7

MARINES: During Operation Ripper, the goal of the 1st Marine Division is the town of Hongchon, north of Hoengsong. The Leathernecks push northward, encountering only slight resistance.

March 8

NAVAL: UN naval forces establish a tight blockade of the port of Songjin, North Korea.

March 12

AVIATION: Night fighting VMF (N)-542 departs Korea for the United States to transition to new Douglas F3D Skynights, an all-weather, night-fighting jet interceptor.

March 14

AVIATION: In yet another attempt to retard Communist supply efforts, B-26 bombers drop millions of tetrahedral tacks designed to puncture truck tires.

MILITARY: Republic of Korea troops (ROK) are allowed to recapture their capital of Seoul from the Communist Chinese and begin driving them back over the 38th parallel.

MARINES: As Operation Ripper concludes, marine forces capture the town of Hongchon, then begin fanning out northward into the hilly countryside.

March 14–19

NAVAL: In an impressive display of firepower, the battleship *Missouri* shells eight railroad bridges and seven highway bridges between Wonsan and Kyojo Wan, North Korea.

March 15

AVIATION: In a major development, a B-47 Stratojet bomber refuels in midair from a KC-97A tanker. This ability greatly extends the range of Strategic Command Aircraft (SAC) and puts targets in the Soviet Union within striking distance from wherever they are based.

- In Korea, Far East Air Forces (FEAF) fly a record 1,123 sorties of all kinds.

MILITARY: For a second time, victorious UN forces occupy the much battered capital of Seoul, South Korea, only now for good.

MARINES: North of Hongchon, the 1st and 7th Marines engage Chinese infantry in hilly terrain and flush them out in a close-quarters firepower and grenades fight.

March 20

AVIATION: In England, the Strategic Air Command (SAC) 7th Air Division, which fields nuclear-armed B-47 Stratojets, establishes its headquarters at South Ruislip, outside London.

March 21

MILITARY: Secretary of Defense George C. Marshall announces American military strength at 2.9 million men and women, roughly twice the strength prior to the Korean War.

March 22–31

MILITARY: In concert with Operation Ripper, General Matthew Ridgway commences Operation Courageous against Chinese forces confronting the I Corps; not many enemy soldiers are killed, but UN forces push them and their North Korean allies north of the 38th parallel.

March 23

AVIATION: In South Korea, Operation Tomahawk, the largest-single airborne maneuver of the Korean War, commences as a fleet of 120 C-119s and C-46s convey the 187th Airborne Regimental Combat Team behind enemy lines at Munsan-ni, South Korea. They drop 3,400 men and 220 tons of supplies under the watchful gaze of 16 F-51s acting as escorts.

- In another major raid, 22 B-29s of the 19th and 307th Bomb Groups knock out two bridges in northwestern North Korea. A force of 45 F-86s Sabres provides an escort.

MILITARY: Near Munsan-ri, South Korea, the 187th Airborne Regimental Combat Team, reinforced by companies from the 2nd and 4th Rangers, makes the second and final airborne assault of the war in an attempt to cut off retreating Communist forces. However, the majority of enemy troops escape; one American is killed while 84 suffer jump-related injuries.

March 24

AVIATION: The air force deploys its first Sikorsky H-19 Chickasaw helicopters in South Korea. This versatile machine continues to serve with distinction for over a decade.

MILITARY: General Douglas MacArthur, buoyed by recent events, unilaterally demands that the Chinese surrender in Korea. Not only do they refuse, but the action also compromises a peace initiative tended by Washington to Beijing.

March 29

AVIATION: The carrier *Boxer* arrives in Korean waters bearing Carrier Air Group (CVG) 101, comprised solely of Naval Reserve units, and begins flying combat missions.

- With ice over the Yalu River beginning to thaw, Bomber Command B-29s begin striking at bridges to help cut off Communist supply efforts.

March 31

MILITARY: As Chinese resistance fades, army forces begin pushing north of the 38th parallel for the first time in four months.

April 1

MARINES: At Camp Lejeune, North Carolina, Fleet Marine Force Atlantic organizes to provide support and combat units for any marine division involved in extended operations.

April 2

AVIATION: Major General David M. Schlatter is appointed to command the new Air Research and Development Command (ARDC).

- Navy F9F Panther jets of VF-191 perform their first mission as bombers when they bomb the bridge at Songjin, North Korea. This squadron, operating from the carrier *Princeton*, is composed mostly of pilots from the Blue Angels Flight Demonstration Team, which has been temporarily disbanded for the duration of the conflict.

April 3

AVIATION: The 3rd Air Rescue Squadron (ARS) deploys a service-test H-19 helicopter for the first time as it rescues a downed F-51 pilot southeast of Pyongyang, North Korea, under heavy fire.

April 4

MILITARY: General Dwight D. Eisenhower selects Paris, France, as the new site for Supreme Headquarters, Allied Power in Europe (SHAPE).

April 5

MILITARY: General Douglas MacArthur, unhappy with President Harry S. Truman's intention to seek a negotiated truce with the Communist powers, unequivocally declares in a letter to Speaker of the House Joseph Martin that, "there is no substitute for victory."

- Operation Rugged unfolds as units of the 8th Army cross the 38th parallel en masse and establish lines in Kansas and Utah; American losses are roughly 1,000 killed, wounded, and missing.

NAVAL: Hospital Corpsman Richard D. DeWert, attached to the 1st Marine Division, dashes through enemy fire four times to rescue wounded marines. Fatally wounded on his last foray, he receives a posthumous Medal of Honor.

April 6

AVIATION: In Washington, D.C., the Labor Department announces that an additional 100,000 workers are now toiling in aircraft factories around the nation.

April 7

AVIATION: Aerial defense of the Pusan-Pohang region is entrusted to men and aircraft of the 1st Marine Air Wing (1st MAW).

NAVAL: The cruiser *St. Paul* and two destroyers cover a landing by 251 men of the 41st Independent Commando, Royal Marines, as they destroy a bridge section near Chongjin, along North Korea's east coast.

April 8

MARINES: Shortly after resuming close air support for marine units, the Air Force Joint Operations Center begins diverting operations of the 1st Marine Air Wing (1st MAW) to other priorities.

April 9

AVIATION: Over Indio, California, an F-51 Mustang flown by aviatrix Jacqueline Cochran sets a new world speed record of 469.5 miles per hour over a 16-mile course. This is her fifth propeller-driven aircraft record.

April 10

MILITARY: In a search for additional manpower, the Department of Defense imposes the army's lower intelligence standards on the air force, navy, and marines. The three services are also authorized to accept draftees for the first time since World War II.

April 11

MILITARY: President Harry S. Truman, angered by General Douglas MacArthur's tactless public comment about his policies in Korea, relieves him as UN supreme commander, Far East, and appoints General Matthew B. Ridgway to succeed him. MacArthur was tactlessly adamant about expanding the war into Manchuria and possibly using atomic weapons against Communist China.

April 11–22

MILITARY: Operation Dauntless is launched as the 2nd, 24th, and 25th Infantry Divisions press northward into North Korea and enter the region known as the Iron Triangle against light opposition to establish Lines Utah and Wyoming.

April 12

AVIATION: Over Sinuiji, North Korea, a huge air battle erupts as a fleet of 46 B-29s bomb bridges over the Yalu River while escorted by 100 fighters. The Communists also scramble 100 MiG-15s in response. Three bombers are shot down and seven more are damaged. However, seven Communist jets are claimed by the bomber gunners while the F-86s down four more.

April 14

MILITARY: Lieutenant General James Van Fleet, formerly commander of the Second Army at Fort Meade, Maryland, is appointed the new commander of the Eighth Army.

April 15

MARINES: At Parris Island, South Carolina, the first Officer Candidate School is convened since World War II.

April 17

AVIATION: In North Korea, Warrant Officer Donald Nicholas wins a Distinguished Service Cross for leading a helicopter-borne special operations team to examine and recover technical information from a downed MiG-15 fighter.

MILITARY: In Washington, D.C., President Harry S. Truman, determined to alleviate pressing manpower shortages, signs an executive order extending all military enlistments by nine more months.

April 18

AVIATION: At Holloman Air Force Base, New Mexico, an Aerobee rocket is launched with a live monkey as a passenger. Sadly, the primate does not survive reentry back to Earth.

**Ridgway, Matthew B. (1895–1993)***Army general*

Matthew Bunker Ridgway was born in Fort Monroe, Virginia, on March 3, 1895, the son of an army colonel. He graduated from West Point in 1917 but failed to secure a combat position in World War I, instead spending several months patrolling the Mexican border. Over the next two decades, Ridgway fulfilled a typical regimen of far-ranging appointments in China, Nicaragua, and the Philippines, and, in 1935, he was chosen to pass through the elite Army War College. He graduated two years later with distinction and found himself attached to the War Plans Division within the War Department as a lieutenant colonel. Following American entry into World War II, Ridgway rose to major general commanding the 82nd Infantry Division and supervised its conversion to a parachute unit. In July 1943 Ridgway spearheaded the invasion of Sicily with his 82nd Airborne Division, and he overcame a scattered landing to seize strategic points of

that island until relieved. He enjoyed similar success at Salerno the following August and, in June 1944, he jumped with his men over Normandy, France, this time spearheading Operation Overlord. Ridgway's command suffered nearly 50 percent losses but took all their strategic objectives and he subsequently assumed control of the 18th Airborne Corps of American, British, and Polish units. He spearheaded ill-fated Operation Market Garden against German forces in the Netherlands, becoming one of the few commanders to seize their objectives. In December 1944 Ridgway's paratroopers helped blunt the northern shoulder of the German offensive during the Battle of the Bulge in the Ardennes, Belgium. They crossed the Rhine River into Germany in 1945 and linked up with Soviet forces along the Elbe River in May. For his distinguished services, Ridgway gained temporary promotion to lieutenant general.

April 19

AVIATION: In Japan, the entire fleet of C-119 Flying Boxcars undergoes an upgrade and refurbishing before resuming combat operations.

POLITICS: An unrepentant general Douglas MacArthur, addressing a joint session of Congress, renews his call for use of atomic bombs and other weapons against the Chinese in Manchuria. He then declares, "Old soldiers never die, they just fade away." It is the passage of a national icon.

April 21

AVIATION: A Fairchild XC-123 is fitted with four J47 jet engines and becomes the first jet-powered transport aircraft, but it does not enter production.

- Marine Corps captain Philip C. DeLong of VMF-312 scores that service's first aerial victories of the war by downing two Russian-made Yak-9 fighters while wingman Lieutenant Harold D. Haight bags another. However, increasingly

During the postwar period, Ridgway served with the Military Staff Committee of the United Nations from 1946 to 1948, and, in 1950, he was ordered to replace the late general Walton Walker as head of the Eighth Army in Korea. At that time UN forces were buckling under a huge Chinese surprise offensive, but Ridgway calmly reordered his lines, allowed the Communists to outstrip their supply lines below Seoul, then sharply counterattacked. Operations Killer and Ripper promptly drove Chinese forces back across the 38th parallel where the war began. Ridgway consented to cease-fire talks in July 1951. In May 1952 he was tapped to succeed General Dwight D. Eisenhower as commander of the North Atlantic Treaty Organization (NATO), and he supervised its enlargement from 12 to 80 divisions. The following year Eisenhower picked him to serve as army chief of staff in Washington, D.C., and he strongly urged the president not to get involved in French Indochina. Ridgway retired from active service in 1955,

Matthew Ridgway arrives at Haneda Air Force base. (U.S. Army)

and he died in Pittsburgh, Pennsylvania, on July 26, 1993. From the standpoint of strategy and tactics, he remains one of the most adept American military leaders of the 20th century.

effective Chinese antiaircraft defenses account for 16 Marine Corps aircraft this month, with nine pilots killed and one captured.

April 22

MILITARY: In light of extended military service in Korea, the army adopts a new troop rotation policy, which is based on a point system. Any soldiers accumulating 36 points in a combat zone will be returned to the United States and discharged from the service. However, officers complain that the relatively high turnover rate hurts unit cohesion due to the steady influx of new replacement personnel.

- Undaunted by massive losses, the Chinese Communists unleash their Fifth Offensive against the Eighth Army with 250,000 new troops. The Americans are forced back to a new defensive line north of Seoul, which is dubbed “No Name Line,” to contain the Chinese, inflicting 70,000 casualties. UN losses are 1,900 killed, wounded, and missing.

MARINES: The 1st Marine Division, having advanced 45 miles since the inception of Operation Ripper, reaches the Hwachon Reservoir in concert with the 1st Korean Marine Corps regiment. This evening, however, the Chinese unleash their spring offensive, which routs the ROK 6th Division on their left flank. Fortunately, the 7th Marines hold firm while the remainder of the 1st Division refuses its left flank.

April 23

AVIATION: Aircraft of the Far East Air Forces conduct 340 close support sorties for UN forces, the highest daily tally achieved before 1953.

- At Suwon, South Korea, F-86 Sabre jet fighters begin deploying to cut down their flying time to “MiG Alley” astride the Yalu River.
- Reverting back to close air support missions, the 1st Marine Air Wing (1st MAW) flies 205 sorties along the frontlines; the 1st Marine Division is the object of no less than 42 of its sorties.

MARINES: The new Chinese offensive, having punched a few holes in UN lines, Eighth Army headquarters orders the 1st Marine Division to fall back and attempt to plug the leaks. Chinese forces also mount a strong attack against the 1st Battalion, 1st Marines along Horseshoe Hill and a fierce battle rages.

April 23–26

AVIATION: Aircraft of the Far East Air Forces fly over 1,000 combat sorties in to interdict enemy supplies and inflict heavy troop losses.

April 26

NAVAL: UN naval forces place Hungnam, North Korea, under blockade.

April 30

AVIATION: In Japan, bombers of the Fifth Air Force undertake 960 combat sorties for a new daily record.

MARINES: As UN forces cease their withdrawal, the 1st Marine Division repositions itself at Hongchon, where it had been deployed two months earlier.

May 1

AVIATION: In a very innovative sortie, eight navy AD Skyraiders from Attack Squadron VA-195 and Composite Squadron VC-35 strike the Hwachon Dam, North Korea, with torpedoes, scoring several hits and flooding the Han and Pukhan River valleys. To this day VA-195 (now VFA-195) goes by the nickname “Dambusters.”

May 3

MILITARY: In another provocation, a military policeman from the 769th Military Police Battalion is killed by Soviet troops in Vienna, Austria.

May 5

MARINES: In Washington, D.C., the Senate votes to give the Marine Corps a 400,000-man ceiling and full membership in the Joint Chiefs of Staff, while the House of Representatives seeks a 300,000-man limit with JCS representation. The legislation fails when neither body can reach a compromise in conference; the entire effort is strenuously resisted by both the navy and the army.

May 9

AVIATION: Over Sinuiju, North Korea, now the temporary Communist capital, over 300 U.S. aircraft, including F4U Corsairs and F9F Panthers of the 1st

Marine Air Wing (1st MAW), strike important bridges spanning the Yalu River into China.

May 15

AVIATION: Marine Fighter Squadron VMF-121 is reequipped with Douglas AD Skyraiders, each capable of lugging 5,000 pounds of ordnance. They are accordingly redesignated VMA-121 (attack).

May 16

MILITARY: Switching fronts, the Chinese Communists mass 175,000 soldiers and hurl them down the center of UN lines by striking the X Corps, the ROK III Corps, and the right flank of the 8th Army. The Allies are driven back by sheer weight of numbers but gradually contain the attack with massed artillery and air power. Chinese losses are estimated at 90,000 while the Americans suffer 1,200 killed, wounded, and missing.

MARINES: Chinese Communist forces launch a large offensive against the 1st Marine Division near Hongchon, which is defeated. However, ROK formations to the east of the Marines are routed, creating a new 20-mile gap in UN lines.

May 16–26

AVIATION: For 10 uninterrupted days, the Combat Cargo Command airlifts an average 1,000 tons of supplies per day to embattled troops in South Korea.

May 17–22

AVIATION: B-29s of Bomber Command execute 94 close support missions for UN ground forces, many of them at night.

May 20

AVIATION: Over North Korea, Major James Jabara, 334th Fighter Interceptor Squadron, flames his fifth and sixth MiG-15s, becoming the first all-jet ace in aviation history.

- In Tokyo, Far East Air Forces commander Lieutenant General George E. Stratemeyer suffers a heart attack and is replaced the following day by Major General Earle E. Partridge. He is replaced at Fifth Air Force by Major General Edward J. Timberlake.

MILITARY: In several quick moves, Eighth Army reserves plug a 20-mile gap created recently by Chinese forces.

NAVAL: Off Wonsan, North Korea, the destroyer *Brinkley Bass* is struck from shore battery fire, which kills one sailor and wounds nine more. After maneuvering out of range of enemy cannon, the ship responds with counterbattery fire.

- The newly recommissioned battleship *New Jersey* enters the Korean War by shelling Communist positions at Kangsong, North Korea.

May 21

NAVAL: The battleship *New Jersey*, on its second day of action in Korea, is struck by shore battery fire that kills one sailor and wounds three more.

May 23

AVIATION: Determined to blunt the latest Chinese offensive, the Fifth Air Force commences Operation Strangle to interdict Communist supply lines running down the length of the Korean Peninsula. The region known as the “Iron Triangle” is

assigned to the 1st Marine Air Wing (1st MAW), near Pyongyang, North Korea. Activity here costs them 20 aircraft over the next two months.

MARINES: As UN forces mount a sharp counterattack, the 1st Marine Division advances into the vicinity of the Hwachon Reservoir again, where opposition is light and many prisoners are taken.

May 27

AVIATION: The 1st Marine Air Wing (1st MAW), in order to be closer to the front lines, moves its F4U Corsairs from airfield K-46 to K-1 (Kimp'o). Marine transport aircraft also drop flares in support of Marine night operations on the ground.

May 27–28

AVIATION: Psychological warfare flights by specially equipped C-47 transports armed with broadcast speakers convince over 4,000 Communist troops to surrender to the Army IX Corps. Interrogators learn that enemy morale is low, due mainly to incessant air attacks.

May 31

AVIATION: The Fifth Air Force commences Operation Strangle, its most ambitious aerial interdiction campaign of the war so far.

MILITARY: In Washington, D.C., traditional army-navy-marine-air force legal systems are all replaced by the new Uniform Code of Military Justice.

- The Eighth Army is pushing Chinese forces back across the front, having inflicted roughly 200,000 casualties since January. The Communists verge on collapse but President Harry S. Truman, fearful of an expanding conflict, rules out a second advance into North Korea.

June

AVIATION: At Edwards Air Force Base, California, the Air Force Flight Test Center (AFFTC) is officially opened.

June 1

AVIATION: In Tokyo, Japan, Major General Frank E. Everest is appointed commander of the Fifth Air Force.

- Aeromedical researcher Major John P. Strapp commences subjecting himself to a series of High-G (Earth gravity) experiments by being strapped to a series of rocket sleds. At one point, he survives the force of 48 “Gs,” highlighting that the human body can endure far more physical stress than thought medically possible.

MARINES: At Camp Pendleton, California, the 3rd Marine Brigade is reestablished as part of the authorized buildup to four divisions and is centered around the 3rd Marines.

- The Marine Corps discharges 2,200 officers and men from the organized reserve back into civilian life.

June 3

AVIATION: After two C-119 Flying Boxcars are downed by friendly fire, the army and air force establish new identification procedures to accompany air drops.

June 3–12

MILITARY: General James A. Van Fleet commences Operation Piledriver, the last large UN offensive of the Korean War, in ordering the 8th Army back into

Van Fleet, James A. (1892–1992)

Army general

James Alward Van Fleet was born in Coytesville, New Jersey, on March 19, 1892, and he graduated from the U.S. Military Academy in 1915. He commanded a machine gun battalion at Meuse-Argonne in 1918, and returned home to teach military science at several universities. Van Fleet passed through the Infantry School in 1929 and was serving as colonel of the 8th Infantry when World War II erupted. It was not until June 6, 1944, when he landed at Utah Beach on D-Day, that Van Fleet first saw battle, but his rise through the ranks proved meteoric. He advanced to brigadier general commanding the 90th Division that fall, distinguished himself in the capture of Metz, gained promotion to major general in General George S. Patton's Third Army, and subsequently commanded the III Corps as it spearheaded the drive across Remagen bridgehead into Germany proper. Van Fleet returned home after the war, but, in 1948, he became lieutenant general and director of the Joint U.S. Military Advisory and Planning Group in Athens, Greece. He helped train the Greek army to successfully stamp out a Communist-inspired insurgency, which was completely routed by 1949. This was one of the West's earliest Cold War triumphs. Van Fleet subsequently returned home to command the Second U.S. Army until events in Asia summoned him abroad once more.

In April 1951, Van Fleet arrived in South Korea to replace General Matthew B. Ridgway as commander of the Eighth Army. His immediate task was to prepare

his troops to brace for several Chinese offensives, which were heavily repulsed that spring, and then to drive the Communists back across the 38th parallel. Van Fleet's aggressive tactics inflicted 250,000 Chinese casualties, but Ridgway, fearing that a renewed drive into North Korea would prove too costly, ordered him to halt just north of the 38th parallel and dig in. The war then degenerated into a struggle of small units fighting and dying over various hills and positions along the UN lines. Van Fleet, amply supplied with artillery and air power, invariably inflicted greater losses than he sustained, but he remained frustrated by the concept of limited victory and pressed superiors for an all-out offensive. Meanwhile, he rose to full general in August 1951 and his small but successful offensives that fall were ended by superiors who wished to facilitate truce talks with Communist leaders. An angry Van Fleet reverted back to small-scale actions, backed by massive artillery fire, which expended so much ammunition that shortages resulted. Van Fleet was frustrated and greatly relieved when General Maxwell D. Taylor replaced him as head of the Eighth Army in February 1953, and he came home to resign from the army. Van Fleet harshly criticized the handling of the Korean War, but President Dwight D. Eisenhower nonetheless appointed him special ambassador to the Far East. He died on September 23, 1992, an aggressive military leader but too wedded to traditional notions of victory to flourish in the age of "limited war."

the Iron Triangle, just north of the 38th parallel. Heavy resistance is encountered and the Americans fail to take all their objectives. For the remainder of the war, the Iron Triangle remains something of a no-man's land, possessed by neither side.

June 5–September 20

AVIATION: Naval aviation attached to Task Force 77 begins participating in the Air Force's Operation Strangle to interdict Communist supply routes. They are soon joined by aircraft of the First Marine Air Wing, but the effort is deemed only marginally successful.

June 6

MARINES: Men of the 1st Marines begin a concerted drive to secure the Hwachon Reservoir, encountering stiff resistance from North Korean troops.

June 10

AVIATION: In Tokyo, Japan, Lieutenant General Otto P. Weyland arrives to serve as the commander of Far East Air Forces (FEAF).

- F4U Corsairs from VMF-214 and VMF-(N)-513 provide around-the-clock, close support missions for operations along the ridges of the Hwachon Reservoir.

MARINES: Six days of close-in fighting with bayonets and hand grenades end with the 1st Marines seizing the heights overlooking the Hwachon Reservoir, North Korea. The 1st Korean Marine Corps regiment and the 7th Marines have an equally hard go at it but at length stand triumphant over their section of the ridge line known as the "Punchbowl"—a huge, extinct volcanic crater.

June 11

AVIATION: At Edwards Air Force Base, California, a Douglass D-558 Phase II Skyrocket attains a world record speed of 1,200 miles per hour.

June 12

NAVAL: Off Hungnam, North Korea, the destroyer *Walker* strikes a mine, which kills 26 sailors and wounds 35. The vessel does not sink, however, and is eventually towed off and repaired.

June 14

NAVAL: Off Songjin, North Korea, Communist shore batteries strike the destroyer minesweeper *Thompson* with 14 hits, killing three sailors and wounding four more.

June 15

MARINES: Off Southern California, Fleet Marine Force Pacific (FMFPAC) stages Operation Lex, a large amphibious exercise.

June 16

MARINES: The 1st Marine Division, having secured a line from Hwachon Reservoir northeast to the Punchbowl, are ordered to dig in and consolidate their positions.

June 18

NAVAL: The NATO post of commander, Allied Command Southern Europe, is tended to Admiral Robert B. Carney.

June 19

MILITARY: In Washington, D.C., President Harry S. Truman signs the Universal Military Training and Service Act, which extends the national draft through July 1, 1955, and increases the length of service to two years. The draft age is also lowered to 18½ years. The act also endorses the concept of Universal Military Training (UMT) but it provides no funding or legal requirements to enforce it.

June 20

AVIATION: At Edwards Air Force Base, California, a Bell X-5, the first aircraft with variable-sweep (adjustable) wings is flown by test pilot Jean L. Ziegler.

- The Martin B-61 Matador guided surface-to-surface missile is launched for the first time.

MARINES: At Camp Lejeune, North Carolina, two mortar rounds fall short during a training exercise and strike a battalion command post; eight Marines are killed and 25 wounded.

- At Camp Pendleton, California, the 3rd Marines are formally activated as the nucleus of the new 3rd Marine Brigade.

June 23

DIPLOMACY: In New York, Soviet UN ambassador Jacob Malik suggests opening cease-fire negotiations in Korea, a good indication of how badly Communist forces there have fared of late.

June 25

AVIATION: At Tullahoma, Tennessee, President Harry S. Truman attends ceremonies marking the opening of the Arnold Engineering Development Center.

DIPLOMACY: In light of staggering losses suffered since January, the Chinese Communists also make known their desire for truce talks on Korea.

June 30

AVIATION: Over Seoul, South Korea, a Marine Corps Grumman F7F Tigercat from VMF-513 shoots down a North Korean PO-2 biplane during a nighttime nuisance raid; this is the first operational kill for the twin-engine Tigercat, the last and best piston-engined navy fighter.

MARINES: At this date, Marine Corps manpower levels have risen to 15,150 officers and 177,770 enlisted men—more than double from the year previous.

July 1

DIPLOMACY: North Korean leader Kim Il Sung and Chinese military leader Peng Teh-huai accept General Matthew Ridgway's invitation to attend cease-fire talks. In light of recent Communist losses, it is a face-saving expedient.

- In South Korea, Colonel Karl L. Polifka, the distinguished reconnaissance pilot, dies when his RF-51 Mustang is shot down near the frontlines. His parachute is snagged by the aircraft's tail after he jumps.

July 3

AVIATION: Over North Korea, a navy HO3S helicopter flown by Lieutenant John K. Koelsch is shot down while rescuing a badly burned marine aviator. The men evade capture for several days and are then seized and interned. Koelsch refuses

to aid the Communists and dies in captivity, winning posthumously a Medal of Honor.

July 4

AVIATION: An Air Force RB-45C Tornado jet reconnaissance bomber flown by Captain Stacy D. Naftel, having penetrated 500 miles into Manchuria on a top-secret overflight mission, is attacked by MiG-15 jet fighters, but nonetheless outruns his antagonists.

July 6

AVIATION: Over North Korea, a KB-29M tanker belonging to the 43rd Air Refueling Squadron performs the first combat refueling mission when it gasses up four RF-80s during a reconnaissance mission over enemy territory.

MARINES: In Washington, D.C., President Harry S. Truman signs legislation extending the enlistments of 300,000 personnel by a full year before they are set to expire on July 1, 1952.

July 9–November 27

MILITARY: United Nations forces take to the counteroffensive in launching a protracted campaign to further wear down Chinese units in their immediate frontlines. This entails some of the heaviest fighting of the war.

July 10

DIPLOMACY: With the Korean War effectively stalemated on the ground, the United States joins United Nations truce talks with the Communist powers at Kaesang at the 38th parallel, Korea. Vice Admiral Turner C. Joy is the principal UN negotiator during discussions, joined by Rear Admiral Arleigh A. Burke.

MARINES: In light of declining enlistments, the Marine Corps is forced to accept 7,000 draftees, the first admitted since World War II.

July 14

AVIATION: Across the United States, the civilian Ground Observer Corps begins an around-the-clock vigil looking for Communist aircraft in American skies.

- Unable to resolve problems associated with a muddy, dirt runway, Marine Air Group 12 (MAG-12) transfers its operations in Korea to airfield K-18, much closer to the 38th parallel.

July 15

MARINES: The 1st Marine Division is replaced in line by the 2nd Infantry Division and is reposted to the Eighth Army Reserve.

July 22

NAVAL: In Naples, Italy, Chief of Naval Operations admiral Forrest P. Sherman dies of a heart attack while on official business.

July 25

DIPLOMACY: At Kaesong, South Korea, truce talks between UN and Communist representatives result in an agenda for further discussions, including a prisoner exchange and a line of demarcation.

July 28

NAVAL: In a lightning raid, the cruiser *Los Angeles* slips into waters off the Ongjin Peninsula, North Korea, and shells several Communist positions with impunity.

July 30

AVIATION: Over Korea, a major air strike involving 91 F-80s, which suppresses anti-aircraft defenses, and 354 marine and air force fighter bombers that strike Communist positions across the peninsula, is executed. The Joint Chiefs of Staff, however, not wishing to generate negative publicity during cease-fire talks, withholds information about the action.

July 31

NAVAL: In Washington, D.C., Dan A. Kimball, a former army pilot during World War II, becomes the 51st secretary of the navy.

August 11

NAVAL: Off Hodo-Pando, North Korea, minesweepers *Dextrous* and *Redstart* come under fire from shore batteries; *Dextrous* takes two direct hits that kill one sailor and wound three others.

August 15

AVIATION: The Douglass D-558 Phase II Skyrocket reaches a record altitude of 79,494 feet over Southern California.

August 16

NAVAL: In Washington, D.C., Admiral William M. Fechteler is appointed the 13th chief of naval operations.

August 17

AVIATION: At the National Air Races in Detroit, Michigan, an F-86E flown by Colonel Fred J. Ascani establishes a new world speed record by reaching 635.6 miles per hour over a 100-kilometer course; he wins the Mackay Trophy for his efforts.

August 18

AVIATION: The first jets-only Bendix Trophy transcontinental air race is won by an F-86A Sabre flown by Colonel Keith Compton, who flies from Muroc, California, to Detroit, Michigan, in three hours and 27 minutes. He narrowly edges out an F-84 and two B-45 Tornado jet bombers pitted against him.

- Fifth Air Force bombers and fighter bombers expand the mission of Operation Strangle to include railroads in North Korea.
- With a powerful typhoon threatening the Korean Peninsula, the 1st Marine Air Wing (1st MAW) relocates men and equipment to Japan over the next three days.

August 18–September 5

MILITARY: A region at the southwest apex of the Iron Triangle, known locally as Bloody Ridge, is the focus of incessant attacks by the 2nd Infantry Division, assisted by several ROK units. The position is taken at a loss of 2,700 UN casualties while Chinese losses are estimated at 15,000.

August 23

DIPLOMACY: Unable to achieve their goals, Communist negotiators break off truce talks at Kaesong, South Korea.

August 24

AVIATION: In Washington, D.C., air force chief of staff Hoyt S. Vandenberg declares that tests involving a new generation of smaller, tactical nuclear weapons have been completed in the previous February. Most of the new weapons developed will be deployed in Europe on Air Force F-84G Thunderjet and B-45A Tornado jet bombers.

August 24–25

AVIATION: In Korea, during a single night of anti-truck operations, Fifth Air Force B-26s claim to have destroyed over 800 vehicles as part of Operation Strangle.

August 25

AVIATION: Marshaling yards at Rashin, North Korea, are destroyed by a fleet of 35 Bomber Command B-29s under heavy U.S. navy jet escort. This attack takes place only 20 miles from the Soviet border, but no aircraft are lost.

- F2H Banshees and F9F Panthers from the carrier *Essex* escort air force B-29 bombers on a long-range strike against railyards in Rashin, North Korea, just south of the Soviet border.

August 27

MARINES: The 1st Marine Division redeploys into the line southeast of the Punch Bowl, North Korea, in anticipation of a new round of fighting.

August 28

AVIATION: The air force competition to construct the next generation of large transport aircraft is won by Lockheed's XC-130. It enters service as the C-130 Hercules, garners the reputation as one of the most rugged and dependable aircraft ever built, and is still in service today.

August 31–September 3

AVIATION: Marine helicopter squadron HMR-161 deploys in South Korea with 15 Sikorsky HRS-1s, each capable of hauling 1,500 pounds of cargo or an infantry squad.

MARINES: The 1st Marine Division launches an attack intending to seize a ridge running along the northeast rim of the Punch Bowl, North Korea. Three days later it falls through the combined efforts of the 7th Marines and the 1st KMC regiment.

September 5

AVIATION: Convair Aircraft contracts with the U.S. Air Force to construct a specially modified B-36 bomber capable of using a nuclear reactor as its power source. The aircraft flies in 1955 but the program is ultimately cancelled for a host of technical and environmental reasons.

September 7

AVIATION: The missile test ship *Norton Sound* successfully launches a Terrier anti-aircraft missile, which strikes an F6F target drone.

DIPLOMACY: The United States becomes mired further into the problems of Southeast Asia, when it agrees to provide economic assistance to the French-controlled government of Vietnam, then in the throes of a Communist insurgency.

September 9

AVIATION: Over North Korea, a force of 28 F-86 Sabres is jumped by 70 Communist MiG-15s. Ignoring three-to-one odds, Captains Richard S. Becket and Ralph D.

Gibson each flame a MiG, raising the number of all-jet aces to three.

September 11–20

MARINES: Along the Punchbowl, North Korea, the 1st Marine Division prepares to storm another series of ridgelines. The 2nd Battalion, 7th Marines manages to infiltrate Chinese positions, which fall the following day, but cost the attackers 250 men. During the lull created by truce talks, the Chinese have strengthened their positions and can now field nearly as many howitzers and mortars as the Americans.

September 13

AVIATION: Near Cocoa, Florida, the air force establishes its first pilotless bomber squadron at the Missile Test Center.

- In a clear demonstration of their battlefield utility, helicopters of HMR-161 lift 10 tons of supplies to marines battling along the Punchbowl, and they evacuate 74 casualties.

MARINES: At the Punchbowl, North Korea, the 1st Marines renew their drive to capture the right half of the Communist-controlled ridgeline. The dug-in Chinese resist tenaciously.

September 13–October 15

MILITARY: Moving up from Bloody Ridge, the 2nd Infantry Division sets its sights on seizing Heartbreak Ridge in concert with several ROK formations and a French battalion. Fighting is fierce and the UN forces suffer 2,700 casualties before finally storming the ridge. The Chinese lose an estimated 25,000 men and UN artillery expends so many shells evicting them that it creates an ammunition shortage for the entire army. At one juncture, the 15th Field Artillery Battalion loosed 14,425 rounds in a single 24-hour period.

September 14

AVIATION: Over North Korea, a B-26 Invader flown by Captain John S. Walmsley, Jr., exhausts all of its munitions while attacking a train, then turns on its experimental wing searchlight to illuminate the target for other bombers. Walmsley is subsequently shot down and killed, but he receives a posthumous Medal of Honor.

September 16–17

MARINES: At Punchbowl Ridge, North Korea, the 5th Marines advance through the line to take strategic Hill 812.

September 17

MILITARY: In Washington, D.C., Robert A. Lovett gains appointment as the fourth secretary of defense.

September 20

AVIATION: For the first time, an Aerobee rocket flies to an altitude of 236,000 feet and returns with its cargo of one monkey and 11 mice alive and well.

The F-86 Sabre was the USAF's first swept-wing jet fighter. (U.S. Air Force)

MARINES: The 1st Marine Division concludes its offensive along the Punchbowl ridgelines and consolidates its position. The units, having replaced the ROK 11th Division, is now strung out for 23,000 yards (13 miles) in rugged terrain. This action marks the final U.S. drive of the war, which is now restricted to local offensives for territorial gain, reminiscent of trench fighting in World War I.

September 21

AVIATION: Helicopters of HMR-161 achieve another first by depositing 224 marines of the 2nd Battalion, 7th Marines on Hill 884 near the Punchbowl, North Korea. They achieve in four hours what would have taken infantrymen 15 hours to accomplish across difficult terrain.

September 23

AVIATION: The first production B-47B Startojet bomber is delivered to the 306th Bombardment Wing.

- Over North Korea, eight B-29s guided by Shoran navigation knock out the center span of the Sunchon rail bridge.

September 25

AVIATION: In a major clash over Suniju, North Korea, 36 F-86 Sabres and an estimated 100 MiG-15s clash in swirling, high-speed combat. The Sabres get the better of it this time, downing five Communist jets.

September 26

MILITARY: The Department of Defense releases plans to increase the number of women in the armed services. For the marines, current numbers of 63 officers and 2,187 enlisted are elevated to 100 and 2,900, respectively.

September 27

AVIATION: At the Punchbowl, North Korea, helicopters of HMR-161 rehearse moving a marine infantry company by air to any threatened position along the attenuated frontline. The move is accomplished in only two hours and 20 minutes.

- A service-test Douglas C-124 Globemaster II lands at Seoul, South Korea, and disgorges 30,000 pounds of aircraft parts as part of Operation Pelican.

September 28

AVIATION: In a mission lasting 14 hours and 15 minutes, an RF-80 reconnaissance fighter refuels in the air several times before concluding its record-breaking sortie.

September 29

MARINES: In Washington, D.C., President Harry S. Truman authorizes a rise in Marine Corps personnel to 211,000. The upcoming drafts for November and December are expected to bring in 19,900 of these.

September 30

AVIATION: In Tokyo, Japan, Brigadier General Joe W. Kelly gains appointment as the head of Bomber Command.

MARINES: Offensives in the Punchbowl region result in 2,416 casualties, the third-highest since December 1950 and June 1951.

TECHNOLOGY: Marines introduce the MPQ-14 radar system, which is designed to drop bombs based on radar guidance from the set.

October 1

MILITARY: In a major development, the Eighth Army integrates itself by disbanding the all-black 24th Infantry Regiment and 159th Field Artillery battalion and assigning the personnel to the 25th Infantry Division. The two units in question are replaced by the 14th Infantry and 69th Field Artillery Battalion.

MARINES: At Quantico, Virginia, Lieutenant General Franklin A. Hart is appointed the first president of the Joint Landing Force Board.

October 3

AVIATION: At Naval Air Station Key West, Florida, Helicopter Antisubmarine Squadron 1 (HS-1) introduces rotary-wing aircraft into the arena of submarine warfare for the first time.

October 3–9

MILITARY: Operation Commando unfolds as the I Corps commits five divisions to secure Lines Jamestown in the Old Baldy area. Success here costs the Americans 2,500 casualties, primarily among the 1st Cavalry Division.

October 11

AVIATION: It takes 156 sorties, but helicopters of HMR-161 make aviation history by completing the first battalion-sized troop lift. In effect, they relocate the 958 men of the 3rd Battalion, 7th Marines from a reserve position 17 miles in the rear, to the frontlines of the Punchbowl.

October 13

TECHNOLOGY: A handful of soldiers and marines in Korea are issued new bullet- and shrapnel-resistant flak jackets for testing under combat operations. Success leads later to mass production.

October 16

AVIATION: In various air battles over North Korea, a record nine MiG-15s are shot down by F-86 Sabres.

October 22

AVIATION: Off the Korean coast, SA-16 Albatrosses rescue 12 men from a downed B-29 bomber; this is the largest single number of men pulled out of the water of the entire war.

October 23

AVIATION: At MacDill Air Force Base, Florida, the first shipment of production model B-47Bs for the 306th Bombardment Wing is completed. This craft emerges as one of the most important jets in Strategic Air Command (SAC) history.

- One of the largest air battles over North Korea occurs as Communist jets attack B-29s and their F-84 Sabre escorts. Three bombers and a Thunderjet go down in flames while gunners manage to claim five MiG-15s.

October 25

AVIATION: Over North Korea, marine F4Us encounter MiG-15 jets; no damage is incurred by either side.

October 29

AVIATION: The carrier *Essex*, acting upon military intelligence, launches a strike with AD Skyraiders VF-54 against Communist Party headquarters at Kapsan, North Korea. Apparently, the raid kills over 500 Communists.

November 2

MILITARY: In Washington, D.C., the Department of Defense declares a large draft call of 60,000 men, from which 11,650 are slated for the Marine Corps.

November 4

AVIATION: Over Sinanju, North Korea, a clash between 34 F-86 Sabres and an estimated 60 MiG-15s results in two Communist aircraft downed and three damaged.

- Over North Korea, an F9F Panther flown by Captain William F. Guss of VMF-311 shoots down a Chinese MiG-15 jet fighter. This is the first Communist jet downed by a marine.

November 6

AVIATION: Soviet La-11 fighters intercept a U.S. navy weather reconnaissance P2V-3W Neptune patrol plane in the Sea of Japan off Vladivostok, shooting it down and killing the crew of 10.

November 9

AVIATION: A C-47 transport lands on the beaches of Paengnyong-do Island, North Korea, and rescues 11 members of a downed B-29 bomber that crashed there.

November 10

MARINES: At Quantico, Virginia, sculptor Felix de Weldon unveils his limestone rendition of the Iwo Jima flag-raising scene and it is displayed at the front gate of the base. This also serves as the basis for his much larger bronze version, which is located in Arlington, Virginia.

November 12

DIPLOMACY: UN-Communist peace negotiations are transferred from Kaesong, South Korea, to the village of Panmunjom, which lays in the middle of the new Demilitarized Zone (DMZ) on the 38th parallel.

MILITARY: General Matthew B. Ridgway orders a halt to offensive operations across Korea and substitutes a new policy of “active defense” whereby UN units will employ patrols, raids, and ambushes instead of simply remaining static. Any operations undertaken will also be supported by air power and ample artillery.

November 15

TECHNOLOGY: The 1st Marine Division distributes new thermal boots to all personnel. This footwear is designed to prevent frostbite by retaining body heat, which is caught by two layers of rubber insulation. The boots are heavy to walk in but are satisfactory for the kind of static warfare the Leathernecks now find themselves in.

November 16

AVIATION: Fifth Air Force bombers and fighter bombers begin another concerted air interdiction campaign against Communist supply routes, this time focusing upon rail lines through North Korea. Bridges, gun positions, supply buildings, and freight cars are also targeted when espied.

November 18

AVIATION: An Air Force C-47 transport accidentally strays into Romanian airspace while flying to Belgrade, Yugoslavia, and is shot down by MiG-15 jets; three crew members die, but one survives and is released.

November 21

NAVAL: Off Kojo, North Korea, the cruiser *Los Angeles* slips into bombardment position and shells enemy forces attacking the ROK I Corps; the Communists are driven back.

November 27

DIPLOMACY: Truce talks between UN and Communist negotiators yield little beyond an agreement to accept a line of demarcation roughly along existing lines of contact.

November 30

AVIATION: In another major air battle, F-86 Sabres intercept 44 Communist aircraft flying south to attack UN forces. The Americans shoot down 12 enemy aircraft and damage three more; Major George A. Davis becomes a double ace this day, in being distinct among contemporaries as an ace from World War II.

December 5–29

MILITARY: In South Korea, the 45th Infantry Division, a National Guard formation, replaces the 1st Cavalry Division in the frontlines as the latter rotates back to Japan as part of the Far East Command reserve.

December 8

MILITARY: The War Department announces a draft of 55,000 men, of which 14,000 are slated for the Marine Corps.

December 13

AVIATION: Over Sinanju, North Korea, a force of 29 F-86 Sabres tackles 75 MiG-15s, downing nine of them. Added to aerial victories elsewhere, UN aircraft claim a total of 13 victories this day.

December 27

AVIATION: In their biggest sortie of the month, Far East Air Forces (FEAF) mount 900 sorties aimed at destroying locomotives, railcars, buildings, vehicles, and gun positions—in sum, anything of use to the enemy.

December 31

MARINES: In Washington, D.C., General Lemuel C. Shepherd, Jr., gains appointment as the 20th commandant of the Marine Corps.

- The 1st Marine Division maintains its lines along the Punchbowl and restricts its activities to occasional trench raids; casualties for the month decline to only 171.

1952**January**

MILITARY: In light of the ongoing Korean conflict, the army's size has expanded to 20 divisions and 1.5 million officers and men.

January 2

MARINES: In Washington, D.C., Commandant lieutenant general Lemuel C. Shepherd orders Headquarters Marine Corps to adopt a general staff system similar to that in the army (G1, G2, G3, G4) to replace the Division of Plans and Policies, although the Aviation and Personnel branches survive intact.

January 7

AVIATION: In Washington, D.C., the secretary of the air force announces plans for a 50 percent increase in combat strength. This entails enlarging the force to 143 wings and 1.2 million airmen.

- In another demonstration of helicopter versatility, HMR-161 completes Operation Mule Train by providing sufficient supplies to a frontline marine battalion for over a week.

MARINES: At Camp Pendleton, California, the 3rd Marine Brigade becomes the 3rd Marine Division, and is slated to contain the 3rd, 4th, 9th, and 12th Marines, with the latter formed as an artillery unit. However, at present, only the 3rd Marine is fully formed and deployed.

January 8–13

AVIATION: Exercise Snowfall unfolds as 100 aircraft of the 516th Troop Carrier Wing convey over 8,600 men from Fort Campbell, Kentucky, to Wheeler-Sack Airfield, New York. This is also the largest troop airlift to date.

January 11

NAVAL: Project Package and Project Detail are undertaken by the vessels of Task Force 95 and the aircraft of Task Force 77 in an attempt to disrupt Communist rail lines along the coast.

January 12

AVIATION: Over North Korea, having bombed shut the entrance to a train tunnel, F-84s systematically destroy a Communist supply train as it sits idled.

January 29

NAVAL: Landing Ship Tanks (LSTs) of Task Force 90 complete the evacuation of 20,000 South Korean civilians trapped on islands along the west coast of Korea.

January 30

NAVAL: The position of Supreme Allied Commander Atlantic within the NATO infrastructure is assigned to Vice Admiral Lynde D. McCormick.

January 31

AVIATION: At Camp Lejeune, California, helicopters of HMR-261 and HMR-262 perform Operation HELEX 1, during which the 1st Battalion, 8th Marines is airlifted from the escort carrier *Siboney* and transferred to shore in only four hours and 25 minutes.

MILITARY: In South Korea, the 40th Infantry Division, a National Guard unit, moves into the frontlines to replace the 25th Infantry Division, which heads to Japan. However, the 5th Infantry remains behind in concert with the 555th Field Artillery Battalion to act as an independent regimental combat team.

MARINES: In an expanded experiment, men of the 1st Marine Division are issued the first 500 flak jackets to be worn by those most exposed to enemy fire. The vests prove highly successful.

February 1

TECHNOLOGY: The air force employs its first Univac I, a high speed digital computer using primitive vacuum-tube electronics.

February 9

AVIATION: A force of 10 B-29s, bombing by radar-aiming devices, drop over 100 tons of 500-pound bombs on the Chongju rail bridge, nearly destroying it.

February 10

AVIATION: Along the Manchurian border, a flight of F-86E Sabres under Major George A. Davis engages a large force of MiG-15s. Davis shoots down two Communist jets, bringing his total to 14 kills. He is then shot down and killed while rescuing his wingman. Davis receives a posthumous Medal of Honor.

MARINES: The Eighth Army, in an attempt to lure enemy patrols forward and capture them, engages in a series of feigned retreats known as Operation Clam-Up. Marines are involved in several firefights but secure no captives.

February 11

AVIATION: The F4Us of VFM-312 depart Itami Airfield, Japan, and deploy onboard the escort carrier *Bairoko*, which then sails off to Korea's western coast. Shortly after, VMF-115 is assigned to Marine Air Wing 33 (MAG-33) at Pohang, South Korea.

February 19

NAVAL: Off Songjin, North Korea, the destroyer *Shelton*, the minesweeper *Endicott*, and the New Zealand frigate *Taupo* interrupt a Communist attack on Kil-chu and Myongchon Islands offshore. The enemy, who employ a force of 45 sampans crammed with troops, is completely defeated.

MARINES: A handful of North Korean sampans that manage to reach the island of Kil-chu, South Korea, are quickly mopped up by a detachment of South Korean marines under Lieutenant Joseph Bartos of the U.S. Marine Corps.

February 20

AVIATION: In light of mounting airport congestion in American cities, retired general James H. Doolittle is appointed to a presidential commission by President Harry S. Truman to seek solutions.

February 23

AVIATION: Off the California coast, helicopters of HMR-162 participate in LEX Baker One in concert with the 3rd Marines. This is the largest amphibious operation held since 1949 and serves as a major test of rotary aircraft in a troop-carrying role.

March

AVIATION: Ongoing studies by the new Rocket Engine Advancement Program (REAP) suggest better thrust would be achieved by changing the standard arrangement of liquid oxygen and hydrocarbon fuel combinations. These changes come in time to power the new Atlas intercontinental ballistic missiles.

March 1

AVIATION: After a spate of hard landings, helicopters of HMR-161 are grounded pending the arrival of redesigned tail pylons.

March 3

AVIATION: The Fifth Air Force commences Operation Saturate, its latest all-out interdiction of Communist supply lines in North Korea.

March 11

AVIATION: Over North Korea, Fifth Air Force fighter bombers unload 150 tons of bombs and 33,000 gallons of napalm on a four-square-mile supply storage and troop training facility. This proves to be one of the most effective napalm attacks of the war.

MARINES: By this date the Marine Corps has accepted 73,340 draftees, but Headquarters Marine Corps declares that, because voluntary enlistment quotas are being met, none will be accepted after June 30.

March 12

MARINES: The Eighth Army alerts the 1st Marine Division that it will be shifting its position from the east-central front to farther west along the line.

March 17

MARINES: At Camp Pendleton, California, the 9th and 12th Marines are reactivated as part of the new 3rd Marine Division.

- The 1st Marine Division, with the 1st KMC Regiment in tow, begins marching 140 miles west to new positions along the UN line.

March 19

AVIATION: North American test flies its new F-86F-25 Sabre, which features modified leading edges for better control at high altitude. Prior to its deployment, MiG-15s enjoy better performance higher up.

March 22

MARINES: To achieve its three division/three air-wing authorized strength, the Marine Corps activates six battalions and a new air group along the West Coast.

March 25

AVIATION: In concert with Operation Saturate, Fifth Air Force bombers and fighter bombers execute 959 interdiction sorties between Sinanju and Chongju, North Korea. Railroads and highways are the main target.

MARINES: The 1st Marine Division assumes new positions astride the traditional invasion route toward Seoul, South Korea, as part of the I Corps. Their new front covers 32 miles, but it is effectively hemmed in on either flank by the Han and Imjin Rivers.

March 30

AVIATION: Night fighting VMF (N)-513 redeploys from the east coast of South Korea to K-8 airfield (Kunsan), placing it 100 miles below the capital of Seoul.

April 1

AVIATION: The air force drops its former army enlisted grades of private first class, corporal, and buck sergeant to airman third, second, and first class.

- Over North Korea, a flight of F-86 Sabres downs 10 MiG-15s for the loss of one. Colonel Francis "Gabby" Gabreski claims one Communist jet and becomes the eighth American ace of the war.

MARINES: Above Seoul, South Korea, Chinese forces single out and launch a heavy attack on the 1st Korean Marine Corps Regiment, and they are handily repulsed.

April 5

AVIATION: Helicopters of HMR-161 perform Operation Pronto in concert with the 2nd Battalion, 7th Marines, which simulates a reserve force being rushed in to counterattack enemy landings along the coast.

April 10

AVIATION: In Tokyo, Japan, Brigadier General Chester E. McCarty assumes command of the 315th Air Division for the remainder of the war.

April 12

AVIATION: Over Seattle, Washington, Boeing's eight-jet YB-52 jet bomber prototype flies for the first time. It becomes the first all-jet intercontinental heavy bomber and a mainstay of Strategic Air Command (SAC) operations; over half a century later, B-52s are still a mainstay of air force bombardment forces.

April 15

MARINES: At an isolated outpost in the 1st Marine Division area, Easy Company, 2nd Battalion, 5th Marines defeats a Chinese attempt to storm their position, losing 11 killed and 25 wounded to an enemy loss of 70 men. To save the useless effusion of blood in static warfare, the division orders its outposts abandoned at night and uses them only during daylight hours.

April 17

MILITARY: In Washington, D.C., President Harry S. Truman signs Executive Order 10345 to extend enlistments for another nine months.

April 18

AVIATION: At Carswell Air Force Base, Texas, the Convair YB-60 jet bomber flies for the first time. Essentially a swept-wing, jet-powered version of the B-36, it loses to the YB-52 for an air force contract.

April 21

NAVAL: Off the Korean coast, a turret explosion onboard the cruiser *St. Paul* kills 30 sailors.

April 24

AVIATION: The first aerial engagement of the year occurs when Communist MiGs attack two marine photo reconnaissance jets; no damage is incurred.

April 26

AVIATION: Helicopters of HMR-161 are grounded for three weeks pending the replacement of defective tail rotor shafts.

NAVAL: The destroyer *Hobson* accidentally collides with the carrier *Wasp* in the mid-Atlantic and sinks with a loss of 176 men. This is the navy's worst operational accident since World War II.

April 27

MILITARY: The United States formally terminates its occupation of Japan after civilian authority is restored. However, the Americans retain basing rights on

the mainland and administration of the Ryukyu Islands also remains under U.S. jurisdiction.

April 28

MILITARY: General Matthew Ridgway is tapped to serve as the new supreme commander of NATO forces in Europe after General Dwight D. Eisenhower retires.

NAVAL: The navy decides to adopt steam catapult systems invented by the Royal Navy for eventual use on American carriers.

April 29–30

AVIATION: During this two-day period, the 315th Air Division loses a C-47, a C-119, and a C-46 through crashes, with a loss of 16 lives. This is the division's biggest single loss of life for the first half of the year.

April 30

AVIATION: Over North Korea, F9F Panthers of VMF-311 engage eight Communist MiG-15s, damaging one.

May 1

MARINES: At Yucca Flats, Nevada, Exercise Desert Rock IV unfolds as 2,000 men from the 3rd Marine Division are stationed in trenches just 2,000 yards from an atomic bomb blast. Immediately afterward, the marines move in and conduct simulated military maneuvers near the drop zone.

May 2

MARINES: In Boston, Massachusetts, Red Sox star and Marine Reserve captain Ted Williams reports for duty following activation. He is subsequently an F9F

A Panther jet that failed its carrier landing burns off the side of the carrier. (Center for the Study of the Korean War, Graceland University)

Panther pilot with VMF-311. In New York, Jerry Coleman of the New York Yankees also returns to duty and flies 63 missions in his F4U Corsair.

May 3

AVIATION: A ski-equipped air force C-47 flown by Lieutenant Colonel William Benedict and Joseph Fletcher makes the first successful landing at the North Pole.

May 7

AVIATION: A test B-29 launches the Lockheed X-7 air-launched ramjet for the first time. Success results in the design of the new Bomarc missile program.

May 7–June 10

MILITARY: On Koje-do Island, South Korea, Chinese and North Korean prisoners stage a mass uprising, seizing Brigadier General Francis Dodd, the camp commander. The impasse continues until June 10, when the 187th Regimental Combat Team is sent in to restore order, killing 150 captives; one American dies in the fighting.

May 8

AVIATION: A Communist supply depot located 40 miles southwest of Pyongyang, North Korea, is struck by 465 sorties by Fifth Air Force fighter bombers. This is the largest one-day interdiction sortie of the war so far and destroys over 200 buildings, shelters, revetments, vehicles, and gun positions. However, the first F-86 lost to ground fire goes down while flying a dive-bombing mission.

MILITARY: The new, 75-ton atomic cannon is under development, according to Secretary of the Army Frank Pace.

NAVAL: The Fleet Air Gunnery Unit is established to provide more realistic aerial gunnery training for Pacific Fleet aircraft squadrons.

May 9

MARINES: In the 1st Marine Division area, the 1st Battalion, 5th Marines raids a former outpost now occupied by Chinese. They suffer seven dead and 66 wounded but Communist losses are believed to be even higher.

May 12

DIPLOMACY: General Mark W. Clark replaces General Matthew Ridgway as supreme commander of United Nations forces in the Far East and is also directed to begin peace negotiations with the Communists there.

May 16–17

AVIATION: In Japan, C-199s, C-54s, and C-46s convey the 187th Airborne Regimental Combat Team to Koje-do, South Korea, to help put down a prisoner-of-war insurrection.

May 19

AVIATION: In Tokyo, Japan, the Fifth Air Force relaxes restrictions on close air support missions to allow marine aviators to hone their skills along the front occupied by the 1st Marine Division.

MILITARY: At Panmunjom, Korea, Major General William K. Harrison, Jr., deputy commander of the Eighth Army, gains appointment as the senior UN negotiator. One of his first acts is to declare a recess when the Chinese and North Koreans begin reciting propaganda speeches.

May 22

AVIATION: Fifth Air Force fighter bombers and light bombers conduct 500 sorties against industrial targets southwest of Pyongyang, North Korea, completely destroying several arms-making facilities.

May 26

AVIATION: In Japan, the 315th Air Division receives its first Douglas C-124 Globemaster IIs to replace their aging C-54s.

May 29

AVIATION: A force of 12 F-84 Thunderjets complete a strike mission in northernmost North Korea, then refuel en route home to Itazuke, Japan, as part of Operation Rightside.

May 30

AVIATION: In Tokyo, Japan, Lieutenant General Glenn O. Barcus assumes command of the Fifth Air Force.

June 1

MILITARY: In Washington, D.C., General Dwight D. Eisenhower confers with President Harry S. Truman over the state of NATO and its defenses in Western Europe.

June 7

AVIATION: Over North Korea, Lieutenant Jon W. Andre of VMF (N)-513 shoots down a North Korean Yak-9 fighter; added to his four Japanese kills achieved in World War II, he becomes another Marine Corps ace.

- Operation Hightide unfolds as a force of 35 F-84 Thunderjets takes off from Japan, refuel from KB-29Ms in the air, then strikes at targets deep in North Korea. Aerial refueling is fast becoming a standard air force practice.

June 10

AVIATION: Off the Korean coast, helicopters of HMR-161 participate in MARLEX-1 and amphibious operations held in conjunction with the 1st Marine Division's reserve elements. This is subsequently adopted as a standard, large-unit exercise.

June 10–11

AVIATION: Three B-29s bombers are lost to searchlights, flak, and MiG interceptors during a night attack against the rail bridge at Kwaksan, North Korea, which prompts the Fifth Air Force to begin revising its electronic countermeasures program.

June 11

MILITARY: At Fort Bragg, North Carolina, the 10th Special Forces Group is activated; this is the army's first, formal Special Forces outfit.

June 13

AVIATION: Russian MiG-15 fighters intercept an air force RB-29 Superfortress reconnaissance aircraft in international waters over the Sea of Japan, shooting it down and killing the crew of 10.

June 14

MILITARY: In Korea, the Chinese launch a heavy attack on a position known as Old Baldy, which is defended by the 2nd and 45th Infantry Divisions. For the

remainder of the war, this position changes hands several times at considerable loss to both sides.

NAVAL: President Harry S. Truman attends keel-laying ceremonies for the *Nautilus*, the world's first atomic-powered submarine, at the Electric Boat Company, Groton, Connecticut.

June 15

AVIATION: U.S. Air Force lieutenant James F. Low, only six months out of flight school, becomes the latest F-86 Sabre ace.

June 23–24

AVIATION: Hydroelectric plants at Suiho, Chosen, Fusen, and Kyosen, North Korea, are the target of multiple attacks by air force, navy, and marine aircraft. This marks a shift in Fifth Air Force priorities away from cutting supply lines and back to hitting strategic targets. Over 1,200 sorties are flown, making this the largest single air strike since World War II.

- The Suiho raid is accompanied by 35 AD Skyraiders and a like number of F9F Panthers from the carriers *Boxer*, *Philippine Sea*, and *Princeton*.

June 24

AVIATION: Aircraft of the Far East Air Forces (FEAF) complete over 1,000 sorties, the highest daily total for the month.

MARINES: In the 1st Marine Division area, the Chinese mount several mortar-supported attacks on daylight outposts of the 2nd Battalion, 5th Marines, and are roundly repulsed.

June 28

MARINES: In Washington, D.C., Congress passes the Armed Force Reserve Act of 1952. Hereafter, the Marine Corps Reserve is restructured into a Ready Reserve, a Standby Reserve, and the Retired Reserve. A Reserve Policy Board is also created to advise the secretary of the navy.

June 30

AVIATION: In an attempt to reduce the number of aircraft lost to enemy anti-aircraft fire, the 11th Marines publishes a procedure for suppressing losses with artillery fire while close air supports are being executed. These SEAD (suppression of enemy air defenses) tactics result in an immediate drop in aerial losses.

MARINES: In Washington, D.C., President Harry S. Truman signs the Douglas-Mansfield Act, which authorizes a three-division, three-wing organization for the Marine Corps with a 400,000-man peacetime ceiling to quell fears of the corps becoming a second land army. Equally important, the commandant is now allowed to attend Joint Chiefs of Staff meetings in a limited capacity and vote on matters considered essential to the Marine Corps. The Marine Corps also now exists as a separate service within the Navy Department.

July 1

AVIATION: The air force makes public its new F-94C Starfire interceptor, the first jet fighter armed solely with unguided air-to-air rockets.

NAVAL: At Dam Neck, Virginia, the Naval Guided Missile School is founded while at Naval Air Station Jacksonville, Florida, the Naval Air Guided Missile School

(Advanced) is also founded. Missile technology plays an increasingly vital role in naval armaments.

July 3

AVIATION: The first of the huge C-124 Globemaster II transports touches down in South Korea.

- A record 22 million propaganda leaflets are dropped over North Korea by C-47s this month.

MARINES: In the 1st Marine Division area, G Company, 3rd Battalion, 7th Marines launches a night raid against Hill 159, only to find it defended by a Chinese battalion; they suffer 44 casualties before withdrawing.

July 4

AVIATION: A major air battle unfolds over North Korea as MiG-15s attempt to penetrate a fighter screen of F-86s and shoot down incoming bombers. However, the Sabres have a field day in downing 13 Communist jets for a loss of two of their own.

July 4–17

AVIATION: A force of 58 F-84Gs under Colonel David C. Schilling makes the first massed transpacific flight by departing Turner Air Force Base, Georgia, and landing at Yokota Air Base, Japan. A total of 10,895 miles are covered through seven ground stops and two inflight refuelings.

July 6

MARINES: In another heavy night action along the 1st Marine Division area, the 1st Battalion, 7th Marines raids Hill 159 for the second time, losing 102 casualties.

July 9

MILITARY: The Armed Forces Reserve Act of 1952 is passed by Congress to overhaul the army's reserve components. Consequently, the Officers' Reserve Corps and the Enlisted Reserve Corps are eliminated in favor of the new Organized Reserve Corps of the Army Reserve.

July 10

AVIATION: The 315th Air Division begins airlifting the entire 474th Fighter Bomber Wing from Misawa, Japan, to Kusan, South Korea. This constitutes the largest unit transported by air to date.

July 11–12

AVIATION: A combined force of air force, navy, and marine aircraft, assisted by units from Britain and Australia, attack marshaling yards and industrial targets in Pyongyang, North Korea, as part of Operation Pressure Pump. This represents the largest single air strike of the war and results in the North Korean Ministry of Industry being completely flattened.

July 13–31

AVIATION: Two air force H-19 helicopters, christened *Hopalong* and *Whirl O Way* conduct the first transatlantic helicopter flight by flying from Westover, Massachusetts, to Prestwick, Scotland, after five refueling stops.

July 14

AVIATION: To enhance the nationwide air-defense effort, the Ground Observer Corps initiates its 24-hour per day Skywatch program to scan the skies for possible Soviet intruders.

NAVAL: At Norfolk, Virginia, the keel of the navy's first supercarrier, the *Forrestal*, is laid at the Newport News Shipbuilding and Dry Dock Company.

July 16

MILITARY: Congress passes the Korean War G.I. Bill of Rights, which confers educational benefits, loan guarantees, and similar perquisites for veterans.

July 19

AVIATION: The air force declares success in flying balloons at controlled constant stratospheric altitudes for up to three days.

July 27–28

AVIATION: Task Force 77 launches carrier aircraft that strike the lead and zinc mill at Sindok and the magnesite plant at Kilchu, North Korea.

July 29

AVIATION: An air force RB-45C Tornado jet reconnaissance bomber flown by Majors Louis H. Carrington, Frederick W. Shook, and Captain Wallace D. Yancey travels nonstop from Elmendorf Air Force Base, Alaska, to Yokota Air Base, Japan, for the first time. They cover the entire 3,640 miles in nine hours and 50 minutes, winning the Mackay Trophy.

July 30–31

AVIATION: Over North Korea, a force of 60 Bomber Command B-29s obliterates the Oriental Light Metals Company located only four miles from the Yalu River. The attack, made at night, suffers no losses despite search lights, flak, and MiGs.

August 3

AVIATION: The Fifth Air Force, harassed by Eighth Army complaints that the 1st Marine Division receives more close air support than their units, terminates the program allowing marine pilots to rehearse close air support missions with other marine units. Marine aviators are unhappy with the decision.

August 4

NAVAL: In Annapolis, Maryland, Vice Admiral Turner C. Joy gains appointment as the 37th superintendent of the U.S. Naval Academy.

August 6

AVIATION: In the final major air battle of the month, a force of 34 F-86s are attacked by 52 MiG-15s, and they bring down six of their antagonists without loss.

- Marine Air Group 33 (MAG-33) flies a record daily number of 141 sorties.

NAVAL: Off the Korean coast, a fire onboard the carrier *Boxer* kills eight sailors but does not necessitate that vessel's withdrawal from combat operations.

August 8

AVIATION: Fifth Air Force fighter bombers conduct 285 close support sorties, this month's highest daily total. Tonight, specially rigged B-26s fly three voice broadcast psychological warfare sorties over enemy positions.

August 9

MARINES: In South Korea, the Marine Corps reverses its policy and resumes permanently occupying outposts at night. Tonight, the Chinese attack and seize outpost Siberia and the 1st Marines win it back and lose it twice more by day-break. Their losses are 17 dead and 243 wounded.

August 11–15

MARINES: The Combat Duty Pay Act is enacted, allowing increased compensation for personnel serving in combat zones.

- This evening the 1st Marines return to outpost Siberia by seizing Bunker Hill, which commands the latter position. The Chinese make repeated and costly attempts to regain both and are finally driven off after four days of fighting. American losses are 38 killed and 268 wounded to a Chinese tally estimated in excess of 3,200.

August 13

NAVAL: In Korea, U.S. Navy corpsman John E. Kilmer rushes through enemy force to treat wounded marines and shields one Leatherneck from enemy gunfire, which kills him; he wins a posthumous Medal of Honor.

August 19

AVIATION: During Operation Ripple, helicopters of HM-161 deploy a battery of 4.5-rockets into firing position, they then remove it to safety before the enemy can mount effective counterbattery fire.

August 20

AVIATION: At Changpyng-ni, North Korea, Marine warplanes participate in a mass strike against Communist supply areas.

August 22

MILITARY: Not to be outdone, the army orders 25,000 copies of the Marine Corps flak vests for its soldiers.

August 22–23

AVIATION: Over the frontlines in South Korea, three C-47s fly 60-minute voice broadcasts to accentuate the UN's growing emphasis on psychological warfare.

August 28

AVIATION: At Hungnam, North Korea, an explosive-laden F6F drone controlled by Guided Missile Unit 90 (*Boxer*) damages a railroad bridge.

August 29

AVIATION: At the behest of the U.S. State Department, Far East Air Forces (FEAF) mount a major aerial attack against Pyongyang, North Korea, in one of the biggest concerted air strikes of the war. They do so in response to the arrival of Chinese foreign minister Chou Enlai in Moscow, so a show of strength seemed appropriate. Only three UN aircraft are lost in 1,400 air-to-ground sorties.

August 30

NAVAL: Off Hungnam, North Korea, the ocean tug *Sarsi* strikes a mine and sinks; this is the final navy vessel lost in the Korean War.

Gunners of the U.S. Fifth Air Force in Korea, September 1952 (*National Archives and Records Administration*)

September 1

AVIATION: Task Force 77 aircraft strike at the oil refinery at Aoji, North Korea, only eight miles from the Soviet border. This is also the largest single carrier raid of the Korean War.

NAVAL: In the North Atlantic, Operation Mainbrace, NATO's first large-scale maneuver, is undertaken. Present are the carriers *Midway* and *Franklin D. Roosevelt*, and the battleship *Wisconsin*.

September 1–2

AVIATION: During MARLEX VII, helicopters of HM-161 operate off the escort carrier *Sicily* and transport the 1st Battalion, 7th Marines to objectives ashore.

September 2

AVIATION: In a setback for marine aviation, Douglas A3D-2 Skynight jet night fighters are restricted from combat operations after a series of engine explosions.

MARINES: At Camp Pendleton, California, the 4th Marines are activated and begin filling its battalions. This becomes the final unit for the 3rd Marine Division.

September 3

AVIATION: At Inyokern, California, the first test-firing of a heat-seeking air-to-air Sidewinder missile is conducted by the Naval Ordnance Test Station. The Sidewinder becomes a standard naval weapon over the next four decades.

September 3–4

AVIATION: Bomber Command B-29s fly 52 sorties, all but two against hydroelectric power plants at Chosin, North Korea,.

September 4

AVIATION: UN aircraft mount a major fighter bomber attack along the Manchurian border to provoke a Communist response. An estimated 90 MiG-15s tangle with the F-86 escorts, losing 13 jets in exchange for four Sabres. Major Frederick Blesse downs his fifth Communist jet to become the latest American ace.

September 4–6

MARINES: In the 1st Marine Division area, the Chinese make several strong attacks to capture Bunker Hill and Outpost Bruce, but they are rebuffed over the next two evenings.

September 5

NAVAL: In a Communist night attack against the 1st Marine Division, Hospital Corpsman Third Class Edward C. Benford rushes to the assistance of wounded Leathernecks under fire, grabs two enemy grenades, then charges into a group of oncoming Chinese; Benford and several enemy troops are killed in the explosion that follows. He wins a posthumous Medal of Honor.

September 9

AVIATION: At Sakchu, North Korea, the military academy is attacked by a force of 45 F-84s, who are in turn attacked by MiG-15s. Three Thunderjets are shot down while escorting F-86 Sabres claim five Communists jets.

September 10

AVIATION: Over North Korea, a marine F4U Corsair flown by Captain Jessie G. Folmar of VMA-312 becomes the first American propeller fighter to shoot down a Communist MiG-15 jet and after eight of them pounce on him and his wingman. Folmer himself is also shot down and rescued at sea.

- At K-2 airfield, South Korea, a flight of six F9F Panthers from VMF-115, attempting to land during foggy weather, crashes headlong into a mountainside.

September 15

AVIATION: In South Korea, Composite Squadron 1 (VMC-1) is created to perform electronic countermeasure missions in support of aerial operations.

September 16

AVIATION: Night-flying B-26s conduct 110 interdiction and attack sorties over North Korea, destroying over 100 enemy vehicles.

NAVAL: Several miles off Wonsan, North Korea, the destroyer *Barton* strikes a mine, which kills five sailors onboard.

September 19

AVIATION: A force of 32 Bomber Command B-29s attacks Communist barracks and supply areas southwest of Hamhung, North Korea. This is the first B-29 raid in almost 11 months and is preceded by an RB-45C flight for acquiring prestrike reconnaissance.

September 21

AVIATION: Over Pukchong, North Korea, an F-86 flown by Captain Robinson Risner flames two MiG-15s, making him the latest American jet ace.

September 28

AVIATION: Marine Major Alexander J. Gillis, performing exchange duty with an air force squadron, bags two Communist MiG-15s over the Yellow Sea before he is himself shot down and rescued.

September 30

AVIATION: The Bell GAM-63 Rascal, an air-launched air-to-surface missile, is launched for the first time. Though capable of carrying an atomic warhead, the Rascal does not proceed beyond the experimental stage.

October 1

AVIATION: After this date navy and marine aircraft begin de-emphasizing supply interdiction missions in favor of more traditional, close support sorties.

October 2

MARINES: In the 1st Marine Division area, the Chinese successfully storm into Outposts Warsaw and Seattle. The marines counterattack at dawn and retake the former, but not the latter; losses are 13 dead and 88 wounded.

October 4

AVIATION: In Tokyo, Japan, Brigadier General William P. Fisher assumes control of Bomber Command.

October 6–7

MARINES: In the 1st Marine Division area, the 7th Marines have a second go at recapturing Outpost Seattle and fail, losing a further 12 dead and 44 wounded. Adding insult to injury, the Chinese attack and seize Outposts Detroit and Frisco the same evening. The marines counterattack at dawn and retake Frisco, but ultimately they abandon this exposed position. Total losses in this front-line squabble are 32 dead marines and 128 wounded.

October 7

AVIATION: Soviet La-11 fighters intercept an air force RB-29 Superfortress reconnaissance bomber over the Kurile Islands and shoot it down, killing the crew of eight.

October 8

AVIATION: A force of 10 B-29s conducts a rare daylight raid over Kowon, North Korea, in conjunction with 12 F2H-2 Banshee carrier-based navy fighters. This proves the second and last time navy fighters cover air force bombers.

DIPLOMACY: At Panmunjom, South Korea, peace talks deadlock over the issue of prisoner-of-war repatriation. The Communists insist that all their captives be returned to them, whether they are willing to return or not.

October 9

NAVAL: Along the 38th parallel, South Korea, Admiral Joseph J. Clark directs Seventh Fleet aircraft strikes that go well beyond the range of UN artillery. Such attacks are popularly deemed “Cherokee strikes” owing to Clark’s Native-American ances-

try, and they prove extremely popular with Eighth Army commanders. These operations occupy half the carrier aviation for the remainder of the war.

October 13

AVIATION: Over Seoul, South Korea, Communist PO-2 biplanes begin nocturnal harassment raids after nearly a year. The troops refer to them as “Bedcheck Charlies.”

October 14–November 5

MILITARY: In Korea, General James A. Van Fleet responds to a Chinese attack on White Horse Hill by ordering the 7th Infantry Division to capture Triangle Hill. The attack is spearheaded by the 31st Infantry, backed by 16 field artillery battalions and waves of air force fighter bombers, but they fail to take the hill after 12 days of fierce combat. The 7th Division suffers 2,000 casualties to an estimated Chinese loss of 19,000 by the time General Mark W. Clark cancels the operation.

October 15

AVIATION: An air force RB-47 Stratojet reconnaissance jet makes a deep penetration of the Chutotsky Peninsula from Alaska and the pictures taken confirm that the Soviets are, in fact, building Arctic bomber bases from which they could strike targets in North America. The mission was personally authorized by President Harry S. Truman.

October 20

AVIATION: At Edwards Air Force Base, California, the futuristic Douglas X-3 Stiletto flies for the first time with test pilot William Bridgeman at the controls. It provides useful information about titanium construction and short-span, low-aspect wings in high-speed flight.

October 24–28

MARINES: In the 1st Marine Division area, massed Chinese artillery begin the heaviest bombardment marines will face during the Korean War. Over 34,000 shells rain down on the position known as the Hook, followed by a determined infantry assault. At one point Lieutenant Sherrod E. Skinner, Jr., jumps on a grenade tossed into his bunker to shield fellow marines from the explosion; he wins a posthumous Medal of Honor. The 7th Marines scrape together a handful of troops to counterattack, whereupon Lieutenant George O’Brien, badly wounded, jumps into a trench and kills three Chinese in hand-to-hand combat, then refuses to be evacuated. He also receives a Medal of Honor for bravery under fire. The Hook is recaptured after four days of intense combat and a tally of 70 dead Marines, 435 wounded, and 39 missing. The Chinese leave 369 bodies on the ground and sustain an estimated 1,000 more wounded. Hereafter, the marines resort to digging deeper trenches and employing better barbed wire.

October 28

AVIATION: The twin-jet XA3D-1 Skywarrior, the largest aircraft to operate off a carrier deck, performs its maiden flight. Popularly known as “the Whale” on account of sheer size, Skywarriors remain in service through the 1980s, performing nuclear strike, reconnaissance, electronics, and aerial refueling missions.

October 30

AVIATION: Helicopters of HM-161 perform a record 365 medical evacuations this month while the 1st Marine Aviation Wing (1st MAW) achieves 3,765 sorties, its second highest monthly total.

October 31

AVIATION: At Eniwetok, Marshall Islands, the United States explodes “Mike Shot,” its first thermonuclear, or hydrogen, bomb. The weapon has a yield of 10 million tons of TNT, and is more than 1,000 times more powerful than the atomic device that destroyed Hiroshima, Japan, in 1945.

November 1

AVIATION: Off the Naval Air Test Center, Point Mugu, California, the missile testing vessel *Norton Sound* fires a Regulus I Missile for the first time.

- In South Korea, VMF (N)-513 resumes operations following repairs and engine upgrades to their Douglas F3D-2 Skyknights. In light of mounting resistance from MiG-15 fighters, they are now tasked with escorting air force B-29s during nighttime raids.

November 3

AVIATION: Over North Korea, an F3D-2 Skyknight flown by Major William T. Stratton and Master Sergeant Han C. Hoglund of VMF (N)-513 scores the first nocturnal kill of a jet fighter by downing a Soviet-built Yak-15.

November 4

POLITICS: Former general Dwight D. Eisenhower is elected president of the United States as a Republican. He is the first professional military officer to occupy the White House since Ulysses S. Grant in 1868. One of his first acts as president-elect is to visit the troops in Korea.

November 8

AVIATION: Over North Korea, Captain Oliver R. Davis and Warrant Officer Dramus F. Fessler of VMF (N)-513 score the nighttime kill of a MiG-15 with their squadron.

November 10

AVIATION: In Japan, the 315th Air Division passes another milestone by evacuating its 250,000th patient from South Korea.

November 12–13

AVIATION: A force of six B-29s from the 98th Bomb Group attack four repaired spans in Pyongyang, North Korea, bringing them down again.

November 15

AVIATION: A C-119 Flying Boxcar belonging to the 315th Air Division crashes in Japan, killing 40 passengers.

November 18

AVIATION: As Task Force 77 launches air strikes against North Korean installations 90 miles south of Vladivostok, Soviet Union, the Russians dispatch seven MiG-15 fighters toward the fleet. They are intercepted by F9F Panthers from VF-781, which down two of the enemy jets while damaging a third.

President-elect Dwight D. Eisenhower inspects the living quarters of troops of the ROK's Capital Division, December 4, 1952. (Dwight D. Eisenhower Library and Museum)

November 19

AVIATION: Over the Salton Sea, California, an F-86D flown by Captain J. Slade Nash sets a new world record of 698.5 miles per hour over a three-kilometer course.

- The North American XLR-43-NA-3 becomes the first American rocket engine to develop over 100,000 pounds of thrust in a test firing.

November 22

AVIATION: Over South Korea, an F-80 flown by Major Charles J. Loring, Jr., deliberately crashes into Communist infantry positions along Sniper Ridge after being hit by ground fire. His sacrifice spares the lives of many UN troops and he receives a posthumous Medal of Honor.

November 26

AVIATION: The Northrop Snark, an early turbojet-powered cruise missile with intercontinental range, is successfully tested from a zero-launch ground launcher for the first time. It enters into service as the B-62 following a prolonged and troubled development.

December 2–5

POLITICS: In South Korea, President-elect Dwight D. Eisenhower tours the front-lines and also confers with President Syngman Rhee.

December 3

MARINES: The 1st Marine Division command post is visited by President-elect Dwight D. Eisenhower and JCS chairman Omar N. Bradley.

December 4

AVIATION: The prototype Grumman XS2F-1 flies for the first time; it enters service as the Tracker and is the first carrier-based aircraft specifically designed for antisubmarine warfare.

December 9

DIPLOMACY: In light of overwhelming Soviet tactical superiority in conventional weapons, the United Nations adopts Strategy 14/1, predicated on defending Western Europe with American nuclear weapons.

December 11

AVIATION: At Kunsan Airfield, South Korea, a fully loaded B-26 bomber catches fire and explodes, wrecking three nearby Invaders and damaging six F-84s on the tarmac.

December 16

AVIATION: The Tactical Air Command activates its first helicopter squadron, which is equipped with bulky but reliable Sikorsky H-16s.

December 17

AVIATION: Above the Suiho Reservoir, North Korea, a pair of roaming F-86s spy a Soviet-built Illyushin Il-28 Beagle jet bomber escorted by MiG fighters. They attack and drive them back across the Yalu River.

1953

JANUARY: Army personnel levels remain at 1.5 million, which are shunted into 20 divisions.

January 5

MARINES: In a test of alternative tables of organization, the 3rd Battalion, 4th Marines adds a fourth rifle company while the 4th Battalion, 4th Marines is raised.

January 9

MARINES: In Washington, D.C., President Harry S. Truman requests \$46 billion in defense spending in his 1954 fiscal budget.

January 12–16

AVIATION: Operational testing commences with the new angle-deck carrier *Antietam*. Six types of aircraft and various wind conditions are employed, along with day and night conditions. Adoption of the angle deck on modern classes of carriers increases sorties and greatly reduces the accident rate.

January 17–18

AVIATION: Over Pyongyang, North Korea, a force of 11 B-29s drops 2,000-pound bombs on an underground radio station. Several direct hits are scored, although the radio station remains intact and keeps on broadcasting.

January 18

AVIATION: Off Swatow, China, a P2V Neptune of VP-22 is shot down by Communist antiaircraft fire. Eleven survivors of 13 men on board are rescued by a Coast Guard PBM Mariner, which crashes in heavy seas while attempting to lift off. It falls upon the destroyer *Halsey Powell* to rescue 10 men from the water; eleven navy and Coast Guard personnel perish.

January 19

AVIATION: At Kaneohe Bay, Oahu, Hawaii, the Marine Corps 1st Provisional Air-Ground Task Force is formed.

January 20

MILITARY: In Washington, D.C., Dwight D. Eisenhower is inaugurated as the 34th president and commander in chief of the armed forces.

January 22

AVIATION: In Korea, the air force retires that last of its venerable F-51 Mustangs prior to transitioning to F-86 Sabres; this marks the final use of propeller-driven fighters in this war.

January 24

AVIATION: Over North Korea, Captain Dolphin D. Overton III scores five kills in only five days, the shortest period of any air force pilot for becoming an ace.

January 28

AVIATION: Off Cape Cod, Massachusetts, the former battleship turned missile test vessel *Mississippi* fires a new Terrier surface-to-air missile for the first time.

January 28

NAVAL: In Washington, D.C., Charles E. Wilson becomes the fifth secretary of defense.

January 28–29

AVIATION: Over Sariwon, North Korea, a B-29 is shot down, becoming the last aircraft of its type lost in the Korean War.

January 30

AVIATION: At Seattle, Washington, the B-47E flies its maiden flight and becomes the major production model with over 1,300 bomber versions constructed, along with 255 RB-47E reconnaissance aircraft.

- A B-29 from the 307th Bomb Wing is jumped by 10 Communist fighters and so damaged that it is forced to make an emergency landing in South Korea.
- Over the Yellow Sea east of Pyongyang, North Korea, a Tupelov Tu-2 bomber is intercepted by an F-86 fighter and shot down. This is also the first Tu-2 encountered since November 1951.

February 2–20

MILITARY: The Netherlands suffers from massive flooding and army troops are called in as part of a large relief operation.

February 3

MARINES: In the 1st Marine Division area, the 1st Battalion, 5th Marines, raids Hills 51 and 51A and inflicts an estimated 400 Chinese casualties. American losses are 41 dead and 91 wounded.

February 4

AVIATION: In Washington, D.C., Harold E. Talbott gains appointment as the new secretary of the air force.

MILITARY: In Washington, D.C., Robert Ten Broeck Stevens is appointed the fourth secretary of the army.

NAVAL: Former Texas attorney Robert B. Anderson becomes the 52nd secretary of the navy.

February 8

MEDICAL: The American Medical Association recognizes Aviation Medicine as a medical specialty, the first branch to originate solely from military practice and research.

February 9–10

AVIATION: Task Force 77 launches carrier air strikes against transportation networks from Wonsan through Songjin and Chongjin, North Korea.

February 10

MILITARY: In Korea, General James A. Van Fleet is replaced by Lieutenant General Maxwell D. Taylor as commander of the Eighth Army.

February 12

AVIATION: Off Pusan Harbor, South Korea, HMR-161 suffers its first casualties when an HRS-1 helicopter crashes into the sea.

February 13

AVIATION: At the Naval Missile Test Center, Point Mugu, California, the Sparrow radar-guided missile is launched for the first time under its own guidance. This weapon sees active service over the next three decades as a standard anti-aircraft missile.

February 14

AVIATION: At Edwards Air Force Base, California, the Bell X-1A is launched on its first successful test glide with pilot Jean Ziegler at the controls. This is an enlarged version of the original X-1, possessing a revised cockpit and greater fuel loads.

February 15

AVIATION: Over North Korea, a force of 22 F-84 Thunderjets strikes the Suiho hydroelectric power plant with 1,000-pound bombs while their F-86 Sabre escort tangles with 30 MiG-15s. The facility is knocked out for several months.

February 16

AVIATION: Captain Joseph C. McConnell, Jr., bags his fifth MiG-15, becoming an ace.

- After a large air raid, Captain Ted Williams, the Red Six slugger, crash-lands his damaged F9F Panther and walks away unscathed.

February 18–19

AVIATION: South of the Suiho Reservoir, four F-86s pounce on a formation of 48 MiG-15s, downing two. Two more MiG-s crash after maneuvering violently and entering into uncontrollable flat spins. Captain Manuel Fernandez, who bags his fifth Communist jet, also becomes an ace.

- A force of 500 fighter bombers attacks a tank and infantry school southwest of Pyongyang, North Korea, obliterating 243 buildings.
- Over North Korea, Marine Corps colonel Robert Shaw, commander of Marine Air Group 22 (MAG-22), leads a total of 208 marine and air force aircraft against military targets around Pyongyang. This is the largest air raid conducted by a marine officer.

February 25

MARINES: In the 1st Marine Division area, the 2nd Battalion, 5th Marines stages a large raid against Chinese-held Outpost Detroit.

March 1

AVIATION: The 138th Fighter-Interceptor Squadron at Syracuse, New York, and the 104th Fighter-Bomber Squadron at Hayward California, are tapped to commence the Air Defense Command's (ADC) runway alert program. This is the first step in exposing Air National Guard units to the new "total force" concept training for all air force components.

March 1–5

AVIATION: Task Force 77 launches carrier strikes against the hydroelectric plant at Chosen, North Korea, and they hit it again four days later.

March 5

AVIATION: Today Fifth Air Force fighters and fighter bombers perform 700 sorties. One of these involves an attack by 16 F-84 Thunderjets against an industrial park only 60 miles south of the Soviet border.

MILITARY: In Moscow, Soviet Union, Communist dictator Joseph Stalin dies, removing a dogged obstacle to peace in Korea.

March 6

NAVAL: The World War II submarine *Tunny* is recommissioned and undergoes modifications to carry the Regulus I surface-to-surface missile.

March 10

AVIATION: Two air force F-84G fighter bombers accidentally stray into Czechoslovakian airspace from West Germany and are attacked by MiG-15 fighters; one American plane crashes and the pilot is eventually released.

March 13

AVIATION: Carrier aircraft from Task Force 77 launch a destructive raid against the industrial areas of Chongjin, North Korea.

March 14

AVIATION: Over newly bombed sites in North Korea, air force combat crews drop leaflets that tauntingly ask: "Where is the Communist Air Force?" in order to provoke an aerial confrontation.

MARINES: In the 1st Marine Division sector, the Chinese launch several company-sized attacks against Outposts Hedy and Esther but elements of the 1st Marines repel them.

March 21–22

AVIATION: At Yongmi-dong, North Korea, Operation Spring Thaw unfolds as Fifth Air Force B-26s knock down two spans across a river and damage a third.

March 23–25

MILITARY: After an artillery and mortar bombardment, Chinese Communist forces capture the hill known as Old Baldy. The 31st Infantry Regiment, supported by the Colombian Battalion, is ordered to recapture it, but they fail to overcome stout defenses. Moreover, General Maxwell D. Taylor, who views the hill as unsentential to UN defenses, cancels further operations against it.

March 25–30

AVIATION: The 1st Marine Air Wing is allowed by Fifth Air Force headquarters to provide emergency close support during the attempt to take back the Vegas Cities outposts; 100 sorties are flown on March 28 alone.

MARINES: In the 1st Marine Division area, the Chinese launch a large attack against the Nevada Cities complex defended by the 5th Marines. Outposts Vegas and Reno are quickly taken from defending platoons, but Carson manages to hold out. The 5th Marines launch a counterattack over the next five days and manage to liberate only Outpost Vegas. American losses are 214 dead and 801 wounded to a Chinese tally estimated at 2,300.

March 26–27

NAVAL: Hospital Corpsman Francis C. Hammond, serving with the 1st Marine Division, ignore serious wounds as he crawls along the ground under fire to treat injured Leathernecks. He is killed supervising the evacuation of casualties, winning a posthumous Medal of Honor.

March 27

AVIATION: In a surprising turn of events, two MiG-15s equipped with drop tanks fly to within 38 miles of the 38th parallel and attack several RF-80s and Australia Meteor jets.

NAVAL: In a stiff action with Chinese troops, Hospital Corpsman Third Class William R. Charette performs bravely under fire, shielding a wounded marine from grenades with his own body, and donating his body vest to another. He wins a Medal of Honor.

March 31

AVIATION: After performing yeoman work for two-and-a-half years, the air force retires the last of its Lockheed F-80 Shooting Stars from front-line service.

April 7

AVIATION: The Atomic Energy Commission reveals that it will study radioactive clouds generated by atomic tests by flying Lockheed QF-80 drones directly into them. These are controlled by other aircraft using Sperry radio equipment.

April 12

AVIATION: Over the Yellow Sea west of North Korea a MiG-15 and an F-86 flown by Captain Joseph C. McConnell shoot each other down; this is McConnell's eighth kill and he is rescued by an H-19 helicopter.

- Discussions between the 1st Marine Division and the 1st Marine Air Wing (1st MAW) result in the use of searchlights to illuminate targets for close air support at night; the tactic proves successful.

April 13

AVIATION: Over North Korea, the F-86F Sabre performs its first combat mission; this new model equals or exceeds MiG-15 fighters at high altitudes for the first time.

April 17

AVIATION: Marine Air Groups 12 and 33 jointly execute 262 sorties in one 24-hour period while the 39 pilots of VMF-115 rack up 114 sorties and drop 120 tons of bombs.

April 18

MARINES: At Yucca Flats, Nevada, Operation Desert Rock IV involves the participation of 2,200 marines in the wake of a nuclear exercise. After the blast subsides, four helicopter squadrons of Marine Air Group 16 (MAG-16) airlift troops to within 1,000 yards of the blast site. The employment of 39 helicopters also makes this the largest such operation in the United States to date.

April 20–May 3

MILITARY: Operation Little Switch commences as the UN repatriates 6,670 Communist captives while the Chinese return 684 prisoners, including 149 Americans.

MARINES: Off the California coast, the 3rd Marine Division participates in PACPHIBEX II, which involves helicopters, simulated atomic strikes, and a full-scale landing on Coronado Island off San Diego. The exercise continues through May 10.

April 26–27

AVIATION: Over North Korea, Project Moola commences as B-29s begin dropping leaflets encouraging MiG pilots to defect south with their aircraft in order to collect a \$1 million reward.

North Korean prisoners of war released under Operation Little Switch march into Compound #13 for processing and repatriation. (Center for the Study of the Korean War, Graceland University)

April 29

MARINES: Colonel Katharine Towle, director of Women Marines, becomes the first female line officer to retire from military service; she is replaced by Lieutenant Colonel Julia E. Hamblet.

April 30

MARINES: In Washington, D.C., President Dwight D. Eisenhower submits a defense plan to Congress that enlarges the secretary of defense's power.

May 1–4

MARINES: The 1st Marine Division is being replaced on the frontline by the Army's 25th Infantry Division. The only unit retained is the 1st Tank Battalion, which provides artillery support for the soldiers. The bulk of the marines serve as the I Corps reserve at Camp Casey, 15 miles farther back.

May 13

AVIATION: Over Pyongyang, North Korea, a force of 59 F-84 Thunderjets makes their first attacks on irrigation dams north of the city. The target is destroyed by four waves of aircraft and the ensuing flood ruins five square miles of rice crop, five bridges, a highway, and also closes the Sunan airfield.

MARINES: In South Korea, the 5th Marines are tapped to take part in an amphibious training exercise, and the remaining regiments also take their place in turn.

May 16

AVIATION: Over Chasan, North Korea, waves of 90 F-84 Thunderjets destroy the irrigation dam there, flooding the area, spoiling rice, and destroying three railroad bridges.

May 18

AVIATION: Over North Korea, Captain Joseph C. McConnell, Jr., bags three more MiG-15s to become the highest-scoring American ace of the war with 16 kills.

- Over Edwards Air Force Base, California, aviatrix Jacqueline Cochran is the first woman to break the sound barrier while flying a North American F-86E Sabre at 652.3 miles per hour over a 100-kilometer course. This is also a new world speed record, one of many established by Cochran.

May 25

AVIATION: The North American YF-100, the first American fighter capable of sustained supersonic flight, debuts at Edwards Air Force Base, California, with test pilot George Welsh at the controls. It enters the service at the F-100 Super Sabre, of which 2,300 are built.

MILITARY: At Fort Sill, Oklahoma, the army announces that it has successfully tested the 280mm new atomic cannon in Nevada. The projectile flies 10,000 meters and detonates 160 meters above the ground with a force of 15 kilotons; while impressive, this remains the only nuclear artillery shell ever fired by army forces.

May 25–29

AVIATION: Over South Korea, VFM-121, 212, and 323 fly several close support missions from the 25th Infantry Division as it battles renewed Chinese attacks along the Nevada Cities complex.

MARINES: The 11th Marines and the 1st Tank Battalion support the 25th Infantry Division in its struggle to maintain the Nevada Cities complex; the position is ultimately abandoned on the 29th.

May 27

AVIATION: The Air Force Historical Foundation is established to preserve and disseminate the story of American military aviation.

May 29–June 10

AVIATION: On the escort carrier *Bairoka*, VMA-332 begins arriving from the United States to replace VMA-312.

May 31

AVIATION: In Tokyo, Japan, Lieutenant General Samuel E. Anderson gains appointment as commander of the Fifth Air Force.

June 8

AVIATION: Over Luke Air Force Base, Arizona, highly decorated F-84s of the 3600th Air Demonstration Flight make their unofficial debut; they become better known as the U.S. Air Force Thunderbirds.

June 10

MILITARY: In South Korea, the Chinese launch a heavy assault against Outpost Harry, defended by troops of the 74th Infantry Division. In heavy fighting, the 15th Infantry Regiment and 5th Regimental Combat Team repel their antagonists, inflicting an estimated 4,200 casualties at a cost of 550 killed, wounded, and missing. This is also one of the last major Communist attacks of the war.

June 10–18

AVIATION: Aircraft of the 1st Marine Air Wing (1st MAW) perform close support missions for ROK troops defending the center of the UN line, including a one-day record of 283 sorties flown on June 15.

June 11

AVIATION: A force of 13 F-84 Thunderjets strike at targets along the Manchurian border; this is also the deepest raid flown into enemy territory and completely disrupts a Communist runway.

NAVAL: By this date, the navy has evacuated 19,425 Korean civilians from offshore islands along the peninsula's western coast and north of the 38th parallel.

June 13–18

AVIATION: Over North Korea, a joint strike by Fifth Air Force F-84s, Bomber Command B-29s, and Navy F4Us destroys the irrigation dams at Toksan and

Kusong. However, because the Communists had expected to be attacked and previously lowered water levels behind the dam, the raid does not cause extensive damage to the countryside.

June 15

AVIATION: In Tokyo, Japan, Brigadier General Richard H. Carmichael takes charge of Bomber Command.

- The carrier *Princeton* launches a record 184 sorties against enemy targets in a single day.

June 16

AVIATION: Fighter bombers and light bombers of the Fifth Air Force conduct 1,834 sorties over North Korea; half of these are close support missions in the Pukhan Valley.

June 18

AVIATION: An air force C-124 Globemaster II transport crashes near Tokyo, Japan, killing 129 servicemen; this is the most serious aviation accident to date.

June 21

AVIATION: Over Cheyenne, Wyoming, the U.S. Air Force Thunderbirds make their official first performance before enthralled onlookers.

June 24–20

AVIATION: As Chinese Communists resume their offensive against ROK troops, aircraft of the 1st Marine Air Wing (1st MAW) break their own sortie record by flying 301 close support missions on June 30.

June 30

AVIATION: In Washington, D.C., General Nathan F. Twining gains appointment as the new air force chief of staff.

- Over North Korea, F-86 fighter sweeps bring down a record total of 16 MiG-15s. Obviously, the Russian veterans have withdrawn from combat and the Americans are now facing poorly trained Chinese and North Korean pilots.

MARINES: At this point in the war, Marine Corps strength is 18,731 officers and 230,488 enlisted.

July 6

MARINES: The 1st Marine Division is ordered back to its former position along the west flank of the Eighth Army line.

July 6–10

MILITARY: In North Korea, the Battle of Pork Chop Hill takes place as the Chinese stage a large attack to seize it. Men of the 7th Infantry Division are subsequently sent in to take it back, supported by massive artillery fire, but they fail after trying four days. At this juncture, General Maxwell D. Taylor, who regards the position as unimportant, orders the struggle abandoned. American losses are 232 killed, 805 wounded, and nine missing; the Chinese are estimated to have suffered around 6,500 casualties.

July 7–8

MARINES: In the 1st Marine Division area, Chinese forces launch a major attack against Outposts Berlin and East Berlin as marines are arriving to relieve Turkish

forces defending them. Marines and Turks hold Berlin and recapture East Berlin in a subsequent counterattack. Additional Chinese are repelled during the night. The 7th Marines suffer 21 killed and 140 wounded.

Twining, Nathan F. (1897–1982)

Air Force general

Nathan Farragut Twining was born in Monroe, Wisconsin, and raised in Oregon. He joined the National Guard at 16 before attending the U.S. Military Academy during World War I. Afterward, he completed routine assignments in Germany and at home, and, in 1923, he became an air power enthusiast and received his wings at Brook Field, Texas. Over the next 15 years Twining held down a succession of staff and command positions in the expanding Army Air Corps and, in 1938, he reported to Washington, D.C., to serve on the general staff. Twining rose to colonel at the Pentagon but sought a combat command. In July 1942 he became a brigadier general assigned to the Southwest Pacific. He helped coordinate a concerted air strategy that destroyed Japanese air power over Bougainville and Rabaul, winning a commendation from Admiral William F. Halsey. In November 1943 he transferred to Italy as head of the Fifteenth Air Force and again distinguished himself by orchestrating a prolonged bombardment campaign against German-held oil refineries at Ploesti, Romania. In May 1945 Twining transferred back to the Pacific to replace General Curtis E. LeMay as head of the Twentieth Air Force in the Marianas. He supervised the fire bombing of major Japanese cities and, that August, his aircraft dropped atomic bombs on Hiroshima and Nagasaki. An obscure lieutenant colonel when it began, Twining ended the war with a temporary rank of lieutenant general.

During the ensuing cold war period, Twining was called on to fulfill major administration positions with the Air Materiel Command and the Alaska Defense Command, and, in 1948, he gained appointment as vice chief of staff in the newly independent U.S. Air Force. In 1953 President Dwight D. Eisenhower appointed him to succeed General Hoyt S. Vandenberg as U.S. Air Force chief of staff. Twining did much to accommodate Eisenhower's "New Look" strategy by acquiring large numbers of jet bombers and laying the groundwork for the first intercontinental ballistic missiles. Stridently anticommunist, in 1956 Twining became the first American general to tour Soviet aviation facilities since World War II and he came back warning the nation about an impending "bomber gap." In response, Eisenhower appointed him chairman of the Joint Chiefs of Staff in 1957, whereupon he pushed for the Atlas and Jupiter missiles, the XB-70 jet bomber, and the navy's Polaris submarine. However, other generals questioned his overreliance on nuclear weapons. In September 1960, Twining resigned from the Joint Chiefs. Thereafter he held several positions in corporate management, published the book *Neither Liberty nor Safety* in 1964, and unsuccessfully ran for the U.S. Senate from New Hampshire that same year. Twining died at Lackland Air Force Base, Texas, on March 29, 1982, one of the most highly respected and influential military officials of the early cold war period.

July 11

AVIATION: Over North Korea, Major John F. Bolt, flying as an exchange pilot with the 51st Fighter Interceptor Squadron (FIS), becomes the first and only Marine Corps jet ace after downing his fifth and sixth MiG-15s.

DIPLOMACY: In South Korea, President Syngman Rhee agrees to the terms of a cease-fire with the Communists; he receives promises of a mutual security pact with the United States in exchange.

July 13–20

MILITARY: In Korea, Chinese forces stage their final offensive of the war by attacking in strength along the Kumsong River. The six divisions committed engage the 2nd, 3rd, 40th and 45th Infantry Divisions, backed by the 187th Airborne Regimental Combat Team and massed artillery. They are repelled with a loss estimated at several thousand men. American casualties total 243 dead, 768 wounded, and 88 missing.

July 15

AVIATION: Over North Korea, Major James Jabara downs his fifteenth Mig-15 to become the world's second triple jet ace.

- The submarine *Tunny* test launches a Regulus I surface-to-surface missile at sea for the first time.

July 16

AVIATION: An F-86D Sabre flown by Lieutenant William Barnes pushes the absolute flight speed record to 715.7 miles per hour in level flight. He does so by breaking an early record also achieved by the F-86D.

- Lieutenant Guy P. Bordelon, Jr., of VC-3, shoots down a North Korean PO-2 biplane ("Bedcheck Charlie") at night in his F4U-5N Corsair; this is also his fifth kill, rendering him the navy's only ace of the Korean War.

July 17

AVIATION: Near Milton, Florida, a marine Fairchild C-119 Flying Boxcar crashes, killing four crewmen and 38 NROTC midshipmen.

July 19

DIPLOMACY: At Panmunjom, South Korea, armistice negotiators convene their final session. Technical negotiators subsequently hammer out the actual cease-fire details.

MARINES: In the 1st Marine Division area, a Chinese battalion captures Outposts Berlin and East Berlin, wiping out the two platoons guarding them. Consequently, the marines adopt a defense-in-depth strategy of multiple lines rather than simply isolated outposts to their immediate front.

July 20

AVIATION: Over Middle River, Maryland, the first Martin B-57A Canberra light jet bomber flies for the first time. This is an American copy of the famous English Electric aircraft built under license, and it is the first non-American aircraft to begin service with the U.S. Air Force.

- Over North Korea, Marine Corps major Thomas M. Sellers bags two MiG-15s while flying in an air force squadron, but he is then shot down and killed.

July 21–22

AVIATION: A force of 18 Bomber Command B-29s flies their final mission of the war by striking at Uiju Airfield, North Korea.

July 22

AVIATION: Over North Korea, Marine Major John H. Glenn shoots down his third MiG-15 in 10 days while flying as an exchange officer in an air force squadron.

- In a final aerial confrontation over North Korea, three F-86Es attack four MiG-15s, whereupon Lieutenant Sam P. Young shoots down a final Communist fighter.

July 24–27

MARINES: In the 1st Marine Division area, two Chinese battalions attack the hill dubbed Boulder City, while other units lunge at Outposts Esther and Dagmar. The defending marines easily repel the attackers. The Chinese attack again over the next two nights without success. Marine losses are 43 dead and 316 wounded; Communist losses are estimated as much higher.

July 25

MARINES: In Washington, D.C., President Dwight D. Eisenhower orders the 3rd Marine Division and Marine Air Group 11 (MAG-11) to deploy to Japan as part of a ready amphibious force in the region.

July 27

AVIATION: Shortly after the Korean armistice takes effect, an air force F-86 Sabre jet fighter flown by Captain Ralph S. Parr, Jr., encounters a Soviet Il-12 transport over Kanggye, North Korea, and shoots it down, killing all 21 passengers. Apparently, these were high-ranking Chinese and Soviet military personnel and their loss sparks a retaliatory response from the Russians off Vladivostok. Parr, for his part, becomes the last double ace of the war.

- On this, the final day of hostilities, Task Force 77 launches air strikes that destroy or damage 23 railroad cars, 11 bridges, a tunnel, and nine highway bridges.
- Just 24 minutes before the cease-fire takes effect at midnight, a B-26 crew flies the final close support mission of the Korean War in a radar-directed bomb strike. Ironically, Invader aircraft had also flown the very first bomber raid three years previously.
- Over North Korea, a Fifth Air Force RB-26 conducts the final reconnaissance mission of the war.

DIPLOMACY: After two years of negotiations, UN and Communist representatives conclude an armistice at Panmunjom to go into effect at 10 o'clock (2200) tonight. Lieutenant General William K. Harrison signs the document for the United Nations. The lines as they are presently occupied are preserved with a 4,000-yard demilitarized zone between them. The U.S. Army has suffered 29,856 dead or missing and 77,596 wounded with the 2nd Infantry Division hardest hit of all (7,094 killed, 16,575 wounded). The marines have sustained 4,262 dead and 26,038 wounded. Chinese and North Korean casualties are estimated as high as 1.2 million while an estimated 2 million Korean civilians are believed to have been killed.

July 28

AVIATION: A Boeing B-47 Stratojet establishes a new transatlantic speed record by crossing from Limestone, Maine, to Fairford, England, averaging 618 miles per hour. It completes its mission in only four hours and 43 minutes.

MARINES: The 1st Marine Division is reorganized, with one regiment deployed on the forward line while the rest are farther back to provide in-depth defense.

July 29

AVIATION: The air force releases its official tally for the three-year air war over Korea: Far East Air Forces claim 839 MiG-15s shot down, with another 154 probables, and 919 damaged over the course of 37 months. In exchange, the UN lost 110 aircraft in aerial combat, 677 to antiaircraft fire, and 213 to accidents and other causes.

- An air force RB-50 Superfortress reconnaissance aircraft flying from Yokota Air Base, Japan, is shot down by Soviet MiG-15 jet interceptors off the coast of Vladivostok, Siberia. One man from the 17-man crew survives and is rescued. The attack is most likely in retribution for the earlier downing of an IL-2 transport over North Korea.

MILITARY: In Washington, D.C., Congress passes a \$34 billion defense budget for fiscal year 1954.

August 3

AVIATION: At Cape Canaveral, Florida, the Missile Test Center successfully launches a Redstone missile for the first time. This is the first such ballistic weapon designed to carry a tactical nuclear warhead.

August 5–December 23

MILITARY: At Panmunjom, Korea, Operation Big Switch unfolds as the Communists repatriate 12,773 UN prisoners in exchange for 75,823 Chinese and North Koreans. Of these 157 are marines—27 having died in captivity. Twenty-three Americans voluntarily decide to remain in Communist hands.

August 6

AVIATION: Operation Big Switch continues as 800 former prisoners of war are flown back to the United States by the Military Air Transport Service (MATS).

MARINES: The standard tour in Korea for marines is extended from 11 months to 14.

August 7

MARINES: Staff Sergeant Barbara O. Barnwell saves a fellow marine from drowning and wins the first Navy-Marine Corps Medal for Heroism given to a female.

August 12

AVIATION: The experimental ship *Mississippi* test launches a fully operative Terrier antiaircraft missile, which downs an F6F target drone.

TECHNOLOGY: In another ominous cold war development, the United States loses its monopoly on thermonuclear weapons when the Soviet Union explodes its first hydrogen bomb.

August 13

AVIATION: Marine Air Group 16 (MAG-16), a helicopter transport group flying Sikorsky HRS-2s, arrives in Japan.

MARINES: At Camp Pendleton, California, headquarters, 3rd Marine Division, ships out for Japan.

August 14–19

MARINES: In the Mediterranean, the Sixth Fleet sends in marines to assist earthquake survivors in the Greek Ionian Isles.

August 16

AVIATION: VMR-253, a transport squadron operating the first squadron of Fairchild R4Q Packets, arrives at Atsugi, Japan.

MILITARY: In Washington, D.C., General Matthew B. Ridgway is appointed the new army chief of staff to replace outgoing General Joseph L. Collins. Ridgway considers this assignment the toughest job he has ever held.

August 17

NAVAL: In Washington, D.C., Admiral Robert B. Carney gains appointment as the 14th chief of naval operations.

August 20

AVIATION: At the White Sands Proving Ground, New Mexico, the army successfully launches a Redstone missile, which is capable of lobbing a nuclear warhead over 200 miles.

- Two separate F-84G units of the 40th Air Division fly en masse from the United States to overseas bases in a clear demonstration of the Strategic Air Command's (SAC) long-range deployment abilities. The 31st Strategic Fighter Wing lifts off from Albany, Georgia, and wings its way nonstop to Nouasseur Air Base, Morocco. Aircraft assigned to the 508th Strategic Fighter Wing also travel nonstop from Albany to RAF Lakenheath, England. The feat earns the 40th Air Division a Mackay Trophy for most significant flight of the year.

August 25

AVIATION: In a return to the "parasite fighter" concept first espoused with dirigibles in the 1930s, a modified RF-84F successfully attaches itself to a B-36 bomber using the new Fighter Conveyor (FICON) system. The air force touts the aging B-36 as a "flying aircraft carrier," although the concept never proves practical.

August 31

AVIATION: Marine Corps lieutenant colonel Marion E. Carl sets a world altitude record of 15 miles while flying the Douglas D-558-2 *Skyrocket*.

September 1

AVIATION: The first jet-to-jet aerial refueling occurs when a B-47 Stratojet hooks up with a KB-47 jet deploying a hose and drogue system. As a rule, propeller-driven tankers are too slow for most jet bombers to refuel with a margin of safety.

September 2

NAVAL: Plans are announced to retrofit and upgrade all *Midway*-class aircraft carriers with new angle decks and steam catapults.

September 4

DIPLOMACY: General William Dean, captured in the early days of the Korean conflict, is released by North Korean authorities at Panmunjon, Korea.

September 6

MILITARY: By this date the repatriation of all willing prisoners of war is completed.

September 10

AVIATION: At Atsugi, Japan, Marine Air Group 11 (MAG-11) deploys three squadrons, all equipped with Grumman F9F Panthers.

September 11

AVIATION: Over China Lake, California, an AIM-9 infrared-guided Sidewinder missile successfully intercepts and destroys an airborne F6F drone.

September 21

AVIATION: At Kimpo Airfield in Seoul, South Korea, air traffic controllers are taken aback when a Communist MiG-15 jet fighter touches down and taxis in. The defecting pilot, Lieutenant Noh Kum Suk, is not aware of Operation Moola, which encouraged such action, but he nonetheless receives \$100,000 and political asylum in the United States. The aircraft in question is subsequently disassembled and flown to Okinawa for flight tests; it ultimately ends up on display at the Air Force Museum in Dayton, Ohio.

October 1

AVIATION: At McClellan Air Force Base, California, Lockheed delivers its first RC-121 Super Constellation to the 4701st Early Warning Radar Squadron, Air Force Defense Command. The aircraft displays a conspicuous radar dome on its backside and is intended to serve as a distant early warning aircraft. It is a forerunner of present-day AWACS aircraft.

October 3

AVIATION: Over Muroc, California, Lieutenant Commander James F. Verdin pilots a Douglas F4D Skyray to a new world speed record of 752.943 miles per hour.

October 14

AVIATION: The North American X-10 (B-64) Navaho ramjet-powered, surface-to-surface, guided missile is successfully test flown for the first time.

October 16

NAVAL: The carrier *Leyte* suffers from a catapult explosion and fire while docked at Boston Navy Yard, Massachusetts, killing 32 sailors and injuring five civilian workers.

October 23

AVIATION: The Piasecki YH-16 twin rotor helicopter prototype is flown for the first time.

October 24

AVIATION: Over Edwards Air Force Base, California, the delta-wing Convair XF-102 flies for the first time, being the first jet fighter designed to be armed solely with air-to-air missiles. However, it fails to break the speed barrier and is subject to extensive redesign under the new "area rule." This gives it a pinched fuselage to cut down wind resistance; only then does it enter service as the F-102 Delta Dart.

October 30

MILITARY: National Security Directive No. 162 is adopted by the government as national defense policy. It fully reflects President Dwight D. Eisenhower's "New Look," which emphasizes strategic (nuclear) warfare at the expense of conventional arms.

October 31

AVIATION: In Washington, D.C., the Strategic Missiles Evaluation Committee is formed under the aegis of the secretary of the air force. It is eventually headed by distinguished mathematician John von Neumann.

November 6

AVIATION: A B-47 Stratojet departs Limestone Air Force Base, Maine, and sets a new transatlantic crossing record by touching down at RAF Brize Norton, England, in four hours and 57 minutes.

November 20

AVIATION: A Douglas D-558-2 Skyrocket flown by A. Scott Crossfield becomes the first manned vehicle to break Mach 2 by reaching 1,328 miles per hour. This particular vehicle remains in service until 1957 and is on permanent display at the National Air and Space Museum, Washington, D.C.

November 30

MARINES: Marine Corps strength reaches 251,770, its maximum strength during the Korean War period.

December 10

DIPLOMACY: Former general and now Secretary of State George C. Marshall receives a Nobel Peace Prize for his efforts at rebuilding Europe's shattered economic structure. He is the first professional soldier so honored.

December 12

AVIATION: Over Edwards Air Force Base, California, Major Charles E. "Chuck" Yeager flies the Bell X-1A to 1,612 miles per hour, or 2½ times the speed of sound, at an altitude of 70,000 feet. However, he loses control of the craft, which spirals down to 25,000 feet before he can recover and successfully land. Yeager wins the Harmon Trophy for his efforts.

December 26

MILITARY: The United States announces the withdrawal of two infantry divisions from the Korean Peninsula.

1954**January**

MILITARY: With the Korean War over, army personnel levels have declined slightly to 1.4 million officers and men while the six National Guard divisions called into federal service have gradually reverted back to state control.

January 4

NAVAL: In a major development, the carrier *Leyte* begins serving as the first anti-submarine warfare (ASW) carrier. This is an integrated concept employing carrier

aircraft, destroyers, and attack submarines in concert to thwart the rising menace posed by Soviet submersibles.

January 10

AVIATION: In Washington, D.C., the Air Force Strategic Missile Evaluation Committee (or Teapot Committee) reports great strides in reducing the size and weight of nuclear warheads. The committee strongly recommends that a group be formed to expedite the speedy development of practical intercontinental ballistic missiles (ICBMs).

January 15

MARINES: In South Korea, the 3rd Battalion, 4th Marines act as guards on vessels conveying 14,500 Chinese captives who desire Taiwanese citizenship.

January 21

NAVAL: The *Nautilus*, the world's first nuclear-powered submarine, is launched at Groton, Connecticut.

MARINE: Off Inchon, South Korea, a ship strikes a landing craft crammed with marines; 27 drown along with two navy corpsmen.

January 27

AVIATION: An air force RB-45C Tornado reconnaissance bomber is jumped by North Korean MiG-15 fighters over the Yellow Sea and is rescued by a flight of F-86 Sabres; one MiG is shot down.

February 15

AVIATION: In Washington, D.C., President Dwight D. Eisenhower signs a bill to begin construction of a series of early warning radar sites across the Arctic Circle called the Distant Early Warning (DEW) Line.

February 28

AVIATION: The Lockheed XF-104, the world first jet capable of sustained speeds in excess of Mach 2, performs high-speed taxi tests for the first time.

March 1

TECHNOLOGY: In the Marshall Islands, Pacific Ocean, American technicians detonate a new thermonuclear (hydrogen) weapon with a 15 megaton yield.

March 5

AVIATION: At Edwards Air Force Base, California, test pilot Tony LaVier flies the new XF-104 prototype for the first time. This machine, nicknamed "the missile with a man in it," is the brainchild of famous aircraft designer Clarence Kelly Johnson of Lockheed's noted "Skunk works." It enter the service as the F-104 Starfighter.

March 16

AVIATION: In Washington, D.C., the fact that the United States possesses a viable thermonuclear weapon that can be delivered anywhere in the world is announced by Representative W. Sterling Cole, chairman of the Atomic Energy Committee (AEC).

April 1

AVIATION: In Washington, D.C., President Dwight D. Eisenhower signs legislation creating the U.S. Air Force Academy. The first classes are to take place at

Lowry Air Force Base in Denver until construction of a separate facility can be completed.

- The air force takes delivery of its first Convair C-131A transport aircraft. This is the military version of the Model 240 airliner.
- At Fort Bragg, North Carolina, the army activates its first formal Helicopter Battalion under Major Robert Kolb. It consists of three helicopter companies and one maintenance company.

April 8

AVIATION: At the Pentagon, Washington, D.C., the office of the Air Force Assistant Chief of Staff for Guided Missiles is created. The quest for intercontinental ballistic missiles is a project of increasing concern to national security in light of the world political situation.

April 13

AVIATION: Pilots of VMF-324 ferry their fighters from the light carrier *Saipan* to Touraine Airfield, Vietnam, where the aircraft are turned over to the French. The equipment is needed for battling a mounting Communist insurgency.

May 3

NAVAL: In Washington, D.C., Charles S. Thomas gains appointment as the 53rd secretary of the navy.

May 7

DIPLOMACY: In the wake of the Communist victory over France at Dien Bien Phu, negotiators from the Viet Minh, the United States, Communist China, and France convene a meeting at Geneva, Switzerland, to hammer out cease-fire terms.

May 25

AVIATION: The heyday of dirigibles has passed, but ZPG-2 under Commander Marion H. Eppes sets a new record flight for the type by remaining aloft eight days and eight hours.

May 26

NAVAL: At Newport, Rhode Island, a catapult explosion on board the vessel *Bennington* kills 103 sailors and injures another 201.

May 27

NAVAL: Chief of Naval Operations Charles S. Thomas, eager to extend the usefulness of World War II straight deck carriers, authorizes the addition of angled flight decks and closed hurricane bows to all *Essex*-class vessels in service.

May 30

AVIATION: At Fort Meade, Maryland, the army activates its first Nike Ajax surface-to-air missile site. For the rest of the decade, this system will be deployed around the nation to defend major cities, industrial centers, and military facilities from aerial attack.

June 1

AVIATION: The army deploys eight artillery batteries armed with Honest John ballistic missiles, its first tactical nuclear weapon delivery system.

- The *Hancock* tests the first steam-powered catapult installed on a carrier by successfully launching a Grumman S2F Tracker aircraft.

June 4

AVIATION: Over Edwards Air Force Base, California, a Bell X-1A rocket airplane flown by Major Arthur Murray reaches a record altitude of 90,000 feet.

June 7–July 1

MARINES: Off Guatemala, the amphibious assault vessel *Mellette* prepares to evacuate American citizens as the pro-Communist government there is overthrown in a CIA-inspired coup. The 2nd Battalion, 8th Marines remains on station, if needed, until July 1.

June 18

AVIATION: The Martin B-57B Canberra, the first interdiction version of this noted aircraft, makes its maiden flight. It differs from the A model by replacing the British-inspired “bowl” canopy with a more traditional “teardrop-shaped” structure.

June 21

AVIATION: Three B-47 Stratojets commanded by Major General Walter C. Sweeney, 22nd Bombardment Wing, fly nonstop from March Air Force Base, California, to Yokota Air Base, Japan, with two inflight refuelings. They cover 6,700 miles in 15 hours; the Strategic Air Command (SAC) is beginning to flex its aerial muscles.

June 22

AVIATION: The diminutive Douglas XA4D-1 light bomber makes its successful maiden flight. This versatile craft enters service as the A-4 Skyhawk (or “Scooter”) and serves with distinction in Vietnam and elsewhere.

MARINES: In Washington, D.C., President Dwight D. Eisenhower signs an executive order adopting an official seal for the U.S. Marine Corps.

June 24

AVIATION: In Washington, D.C., Secretary of the Air Force Harold E. Talbott announces that the new U.S. Air Force Academy will be located on 15,000 acres in Colorado Springs, Colorado.

June 26–July 17

AVIATION: In Vietnam, Operation Wounded Warrior unfolds as the 315th Air Division and the Military Air Transport Service (MATS) begins transporting 500 wounded French soldiers back to France. Their route takes them first to Japan and then across the United States before reaching home.

June 28

AVIATION: The Douglas RB-66 Destroyer reconnaissance aircraft performs its maiden flight. This sleek-looking machine is based on the navy A3D Sky Warrior and performs distinguished service throughout the Vietnam conflict.

June 30

MARINES: The post-Korean War strength of the Marine Corps begins dipping to 18,593 officers and 205,275 men.

July 1

AVIATION: Brigadier General Bernard A. Schriever gains appointment as head of the new Western Development Division, tasked with facilitating creation of the

first intercontinental ballistic missiles (ICBMs). Schriever's first priority is accelerating the deployment of the forthcoming Atlas missile.

July 12

MARINES: In Japan, the 3rd Marine Division is placed on alert for a possible transfer to Vietnam to help the French military, but President Dwight D. Eisenhower has no intention of getting involved with Southeast Asian affairs.

July 15

AVIATION: In Seattle, Washington, the prototype Boeing KC-135 aerial tanker jet performs its maiden flight. In order to relieve jet-powered strategic bombers from the dangerous practice of refueling behind slower propeller-driven tankers, several hundred KC-135s are ordered; they receive the appropriate moniker Stratotanker.

July 21

DIPLOMACY: In Geneva, Switzerland, peace negotiators debating the fate of Vietnam agree to a Communist zone established above the 17th parallel (North Vietnam) and a non-Communist zone to the south (South Vietnam). The two regions are never meant to be sovereign states, even though the North is ruled by the Viet Minh and the South by the French-installed Bao Dai regime. The United States, wishing to contain the growth of communism in Southeast Asia, begins offering military assistance to the Bao Dai government.

July 26

AVIATION: Lieutenant General Hubert R. Harmon becomes the first superintendent of the new U.S. Air Force Academy.

- Off Hainan Island, China, a pair of Douglas AD-1 Skyraiders, searching for a British Cathay airliner downed by the Communists two days earlier, are attacked by a pair of Communist La-7 fighters. The navy planes promptly flame both of their antagonists.

August 2

MARINES: In Vietnam, Lieutenant Colonel Victor J. Croizat is the first marine assigned to work with the U.S. Military Assistance Advisory Group (MAAG).

August 5

AVIATION: The first production of the eight-jet B-52 A bomber flies for the first time. Unlike the prototype, which featured a fighter-type "teardrop" canopy, production models house pilot and co-pilot side-by-side in a cockpit cabin. Possessing much greater range and payload than the B-47 Stratojet, it quickly becomes the backbone of the Strategic Air Command (SAC).

August 6–7

AVIATION: The 38th Air Division conducts two impressive demonstrations of long-range strategic flying when two B-47s from the 308th Bombardment Wing fly from Hunter Air Force Base, Georgia, and complete a 10,000-mile round trip flight to French Morocco and back. Concurrently, two additional B-47s from the 308th depart Hunter and conduct a simulated bomb run over Morocco, then land there. For its efforts, the 38th Air Division receives a Mackay Trophy.

August 11

DIPLOMACY: Red Chinese foreign minister Chou En-lai insists that Nationalist-held Taiwan will be "liberated" by Communists forces.

August 12

NAVAL: At Annapolis, Maryland, Rear Admiral Walter F. Boone is appointed the 38th superintendent of the U.S. Naval Academy.

August 16

NAVAL: At Haiphong, North Vietnam, the navy commences Operation Passage to Freedom, which eventually relocates 293,002 civilians and 17,846 Vietnamese soldiers to South Vietnam who decline to live under communism by May 1955. This is done in accordance with the Geneva accords ending the French Indochina War.

August 17

DIPLOMACY: President Dwight D. Eisenhower, reacting to Chinese Communist threats to attack Taiwan, declares that any Communist invasion of that island "would have to run over the 7th Fleet."

August 23

AVIATION: The prototype Lockheed YC-130 transport completes its maiden flight.

August 26

AVIATION: Over Edwards Air Force Base, California, a Bell X-1A flown by Major Arthur Murray reaches a record 90,440 feet, where, the pilot reports, the curvature of the Earth is visible.

September 1

AVIATION: The Continental Air Defense Command is established at Colorado Springs, Colorado, under General Benjamin W. Chidlaw.

September 3

MILITARY: Communist Chinese forces on the mainland shell National Chinese positions on Quemoy Island, killing army advisers Lieutenant Colonels Alfred Medendorp and Frank Lynn.

September 4

AVIATION: Off the coast of Siberia, Soviet MiG-15 fighters accost a navy P2V-5 Neptune patrol aircraft of VP-19 and shoot it down, killing one crew member. Nine others are rescued by Coast Guard aircraft.

September 8

DIPLOMACY: The Southeast Asia Treaty Organization (SEATO), a collective defensive alliance, is established among the United States, Australia, France, Great Britain, the Philippines, and Thailand. It differs from NATO, however, establishing neither an allied army nor an integrated command.

September 13

NAVAL: In Washington, D.C., President Dwight D. Eisenhower directs the Seventh Fleet to logistically support Chinese Nationalist forces on the islands of Quemoy and Matsu.

September 27

AVIATION: At George Air Force Base, California, the first North American F-100A Super Sabres achieve operational status. This is the first air force fighter to routinely exceed the speed of sound in level flight.

September 29

AVIATION: The prototype, twin-engined McDonnell-Douglas XF-101, an enlarged version of the earlier XF-88, completes its maiden flight. It enters service as the F-101 Voodoo and performs as both an interceptor and a reconnaissance craft.

September 30

NAVAL: The *Nautilus*, the world's first nuclear-powered submarine and the navy's first nuclear-powered vessel, is commissioned into service at Groton, Connecticut.

October 4

AVIATION: At Coronado Beach, California, the giant, turboprop-powered Convair R3Y-2 Tradewind flying boat lands a detachment of marines ashore for the first time.

October 8

AVIATION: Over Edwards Air Force Base, California, the Bell X-1B research rocket plane makes its maiden flight with Major Arthur Murray at the controls.

October 9

AVIATION: In Washington, D.C., Congress adds an additional \$500 million to accelerate development and production of the Atlas intercontinental ballistic missile.

October 12

AVIATION: At Wichita, Kansas, Cessna unveils its XT-37 side-by-side trainer; it enters production as the T-37 "Tweety Bird" and also serves as a light attack craft.

October 13

AVIATION: Congress agrees to fund development of the Convair XB-58, a four-engined, delta-winged jet bomber destined to be the first supersonic aircraft of its class.

MARINES: In South Vietnam, the Bao Dai administration orders the creation of a Marine Corps of 1,137 men.

October 17

AVIATION: A Sikorsky XH-39 helicopter piloted by U.S. Army warrant officer Billy Wester reaches a record altitude of 24,500 feet.

October 18–19

AVIATION: In Washington, D.C., the Air Force Scientific Advisory Board assembles an ad hoc committee under Dr. Theodore von Karman to ponder the possibilities of using atomic power for missile propulsion. At this juncture, the board can recommend only additional study of the concept so as not to fall behind the Soviets.

October 24

DIPLOMACY: President Dwight D. Eisenhower alerts the new South Vietnamese premier Ngo Dinh Diem that the United States will provide military assistance directly through his government, instead of through the French.

October 27

AVIATION: Another racial barrier falls as Benjamin O. Davis, Jr., becomes the first African-American brigadier general in the U.S. Air Force. During World War II he commanded the famous “Tuskegee Airmen.”

November 1

AVIATION: After a long and distinguished service career in both the Army Air Force and the U.S. Air Force, the venerable Boeing B-29 is retired from active service.

November 2

AVIATION: At San Diego, California, the radical Convair XFY-1 Pogo vertical takeoff fighter is tested with test pilot James F. Coleman at the controls. The device takes off like a helicopter, flies like a normal aircraft for 21 minutes, then lands backward on its launching pad without incident. Coleman wins a Harmon Trophy for his efforts.

November 7

AVIATION: An Air Force RB-29 Superfortress reconnaissance aircraft is attacked by Soviet MiG-15s near Hokkaido, northern Japan, and shot down. One crew member dies.

November 10

MARINES: At the Marine Corps War Memorial, Arlington, Virginia, sculptor Felix de Weldon dedicates his bronze statute of the Iwo Jima flag raising; this is perhaps the most iconic representation of the Marine Corps.

November 17–19

AVIATION: England’s notoriously bad weather was never more manifest than when Colonel David A. Burchinal flies his B-47 Stratojet for 47 hours and 35 minutes—refueling in midair nine times—while waiting for safe landing conditions to appear!

December

MARINES: In some administrative fine-tuning, the ranks of first sergeant and sergeant major are reestablished, although below master sergeant in seniority. All three grades receive the same pay.

December 7

AVIATION: At Edwards Air Force Base, California, a Navaho X-10 guided missile arrives successfully using an automated approach and landing system.

December 10

AVIATION: Colonel John P. Stapp, a glutton for punishment, rides a rocket sled to 632 miles per hour. This is the equivalent of ejecting from a jet plane at 35,000 feet at Mach 1.7, yet he survives without serious injuries.

December 11

NAVAL: The giant angle-deck carrier *Forrestal*, weighing in at 59,650 tons, is launched at Newport News, Virginia.

December 20

AVIATION: The first production Convair F-102A Delta Dagger performs its maiden flight; this is the first air force fighter armed solely with guided missiles.

The USS *Nautilus* (SS-571), the navy's first atomic-powered submarine, on its initial sea trials (*Library of Congress*)

MARINES: In Washington, D.C., the secretary of defense declares that the 1st Marine Division will depart South Korea and be replaced by an army infantry division; the marines will head back to Camp Pendleton, California.

December 23

AVIATION: The search for a new, hypersonic research aircraft begins once representatives from the air force, navy, and NACA, sign a joint memorandum to begin development. The end result is the famous X-15 rocket-powered airplane.

1955

January

MILITARY: Demobilization continues in the army, reducing overall manpower levels to 1.1 million officers and men in 19 divisions.

January 19

NAVAL: The nuclear-powered submarine *Nautilus* under Commander Eugene P. Wilkinson slips out of Groton, Connecticut, and heads into blue water for sea trials. The vessel heralds a new age in submarine capabilities for the reactors powering it possess virtually unlimited range.

January 20

DIPLOMACY: The governments of the United States, Great Britain, and France conclude an agreement with South Vietnam to assist modernization of its military forces.

January 26–May 6

MARINES: At Camp Lejeune, North Carolina, the 2nd Marine Division begins a series of amphibious exercises named TRAEX 2-55, which will also take them on simulated raids against guided-missile launching sites.

January 29

MILITARY: Congress approves a resolution allowing an immediate troop mobilization by President Dwight D. Eisenhower should Chinese Communists attack Taiwan.

February 1

MILITARY: General John E. Dahlquist is appointed the first commander of the U.S. Army Continental Army Command (CONARC), which is tasked with supervising military matters within the United States. It replaces the older Army Field Forces.

February 3

MARINES: In Japan, the 3rd Engineering Battalion begins shifting men and equipment to its future home on the U.S.-administered island of Okinawa; in time, the entire 3rd Marine Division is stationed there.

February 4

MARINES: At Kaneohe Bay, Oahu, Hawaii, the 4th Marines arrive from Japan; this is to be their new duty station.

February 5

AVIATION: An air force RB-45C Tornado jet reconnaissance bomber is attacked by North Korean MiG-15s over the Yellow Sea and is rescued by an escort of F-86 Sabres, who shoot down two MiGs.

February 6

NAVAL: At the Tachen Islands, China, the Seventh Fleet under Vice Admiral Alfred M. Pride begins the evacuation of 29,000 Nationalists soldiers and civilians to Taiwan. To prevent any interference from the Red Chinese air force, the maneuver is amply covered by carrier aviation.

February 12

MARINES: In South Vietnam, no sooner do the French relinquish control of Vietnamese armed forces than the United States steps in and begins training them through the Military Advisory Assistance Group (MAAG).

February 19

DIPLOMACY: The SEATO alliance extends its protective umbrella to Laos, Cambodia, and South Vietnam in an attempt to deter Communist aggression there.

February 26

AVIATION: Over California, test pilot George Smith is forced to eject from his F-100 Super Sabre at 600 miles per hour. He is knocked unconscious by the force of 64 "Gs" upon ejecting, and he falls until he awakens and parachutes into the Pacific; he is picked up by a fishing boat with serious injuries but eventually resumes flight testing. Smith's experience typifies what jet pilots face during a high-speed egress.

MILITARY: Professor Cecil F. Powell of England estimates that the United States has stockpiled 4,000 atomic bombs while the Soviet Union possesses 1,000.

March 1

AVIATION: In Washington, D.C., Trevor Gardner is appointed the first secretary of the air force for research and development.

- At Otis Air Force Base, Massachusetts, the new RC-121D Super Constellation airborne early warning radar plane begins operating along the east coast of the United States.

March 6

AVIATION: In Washington, D.C., U.S. Air Force chief of staff general Nathan F. Twining announces that the Atlas, Navaho, and Snark programs are being accelerated in light of Soviet advances in missile technology.

March 17–18

MARINES: Along the Demilitarized Zone (DMZ), South Korea, the 1st Marine Division has been completely supplanted by the army's 24th Infantry Division.

March 25

AVIATION: The Chance Vought XF8U-1 prototype carrier fighter exceeds Mach 1 on its maiden flight and eventually goes into service as the F8U Crusader, an outstanding fighter and reconnaissance platform of the Vietnam War.

April 6

AVIATION: Over Yucca Flats, Nevada, a B-36 launches a nuclear-tipped missile, which climbs to 42,000 feet before detonating; this is the highest altitude that a nuclear device has ever been exploded.

April 17

AVIATION: Soviet MiG-15 jets intercept and shoot down an air force RB-47E Stratojet reconnaissance airplane near Kamchatka, killing the crew of three.

April 21

AVIATION: The new Aerobee-Hi rocket is launched for the first time and reaches an altitude of 123 miles while carrying a 200-pound cargo.

May 2

AVIATION: The Western Development Division's suggestion to begin constructing a second and larger type of intercontinental ballistic missile is approved by air force authorities; this is the genesis of the Titan missile program.

May 5–July 27

MILITARY: The United States concludes its military occupation of West Germany following the election of a civilian government. Germany is also granted NATO membership. The city of Berlin, replete with an American, French, and British garrison, remains deep behind Soviet/East German lines.

May 10

AVIATION: The air force accepts its final Douglas C-124 Globemaster II transport; a total of 448 have been constructed and deployed.

- At Schenectady, New York, a B-45 jet bomber takes off with a GE XJ-79 jet engine buried in its bomb bay for testing purposes. The J-79 design goes on to power several air force aircraft.

May 20

NAVAL: U.S. naval vessels, assisted by contingents of marines, assist in the removal of an additional 300,000 anti-Communist refugees from North Vietnam to new homes in the south.

May 31

AVIATION: After five years of service in the Far East, Marine Air Group 33 (MAG-33) returns to El Toro, California.

June 1

MARINES: The 9th Marines transfer from Japan to new bases on Okinawa, which is still administered by the U.S. military.

June 11

AVIATION: At Wright-Patterson Air Force Base, Ohio, an F-80C jet constructed almost entirely from magnesium is flown to test its strength and weight under flying conditions.

- The prototype Atlas rocket is test fired for the first time.

June 16

MILITARY: The Selective Service Act is extended by the House of Representatives to June 30, 1959.

June 20

MARINES: In Washington, D.C., a proposal by the House of Representatives to slash marine manpower from 215,000 to 193,000 is defeated in the Senate.

June 22

AVIATION: Soviet MiG-15 jet fighters shoot up a P2V-5 Neptune patrol plane from VP-9 in the Bering Sea, injuring seven of 11 crew members. Fortunately, the aircraft makes a forced landing on St. Lawrence Island without further damage.

June 29

AVIATION: At Castle Air Force Base, California, the 93rd Bombardment Wing receives its first operational, eight-jet B-52 Stratofortress. They remain an important part of the air force inventory to present times.

June 30

MILITARY: In Washington, D.C., General Maxwell D. Taylor gains appointment as the 20th chief of staff, U.S. Army, to replace outgoing General Matthew D. Ridgway. Like Ridgway, Taylor finds himself conflicted by President Dwight D. Eisenhower's policy of emphasizing nuclear weapons ("massive retaliation") at the expense of conventional forces and flexible military responses.

July 1

AVIATION: In light of the rapidly approaching dawn of space flight, the air force resumes testing on the problems of weightlessness. One result is the use of parabolic flight profiles for aircraft, which produce momentary weightlessness while descending. To those participating in such flights, the aircraft are jocularly known as "Vomit Comets."

- At Kaneohe Bay, Oahu, Hawaii, the 1st Provisional Marines Air Ground Task Force is cobbled together from the 4th Marines Marine Air Group 13 (MAG-13).

July 7

DIPLOMACY: Communist China signs an agreement with North Vietnam to provide economic assistance.

July 11

AVIATION: The first class of 306 cadets reports to the U.S. Air Force Academy at Lowry Air Force Base, Denver, Colorado, until more permanent facilities at Colorado Springs are constructed.

**Taylor, Maxwell D. (1901–1987)***Army general*

Maxwell Davenport Taylor was born in Keytesville, Missouri, on August 26, 1901, and he gained admittance into the U.S. Military Academy in 1918. He graduated fourth in his class four years later, and he enjoyed a far-ranging career over the next two decades, including stints as military attaché in China and Japan. Shortly after World War II broke out, Taylor joined the 82nd Airborne Division as General Matthew B. Ridgway's chief of staff. He fought with the division in North Africa and Sicily and, in September 1943, Taylor performed one of the most daring clandestine missions of the war by entering Rome in a truck to see if the city could be seized by paratroopers. Several hours in the city convinced him that German defenses were far too strong, so he secretly telegraphed General Dwight D. Eisenhower to halt an impending attack. For this display of courage, Taylor received a Silver Star and served as part of the Allied Control Commission in occupied Italy. The following year he reported to England as a major general commanding the 101st Airborne Division. In this capacity, on June 6, 1944, Taylor was the first American general to reach occupied France by dropping over Normandy. He accompanied his division in campaigns in the Netherlands and also fought in final phases of the Battle of the Bulge in December 1944. On May 7, 1945, Taylor rounded out a superb military career by capturing Berchtesgaden in Bavaria, which served as Adolf Hitler's mountain retreat.

After the war Taylor held several important posts and commanded UN forces during the last six months of the Korean War. In 1955 President Eisenhower appointed him chief of staff of the army, but his tenure proved an unhappy one. Taylor strongly disagreed with Eisenhower's "New Look" program, which forsook conventional forces in favor of nuclear arms. In concert with Ridgway and General James M. Gavin, Taylor advocated a more flexible response to the threat of communism. He was consequently eased into retirement in July 1959 and, the following year, he published *The Uncertain Trumpet*, a scathing appraisal of Eisenhower's defense policies. This brought him to the attention of President John F. Kennedy in 1961, who appointed him chairman of the Joint Chiefs of Staff shortly before the Cuban missile crisis. Taylor was subsequently dispatched to South Vietnam to evaluate conditions there, and while he supported giving the regime weapons and assistance to fight a Communist-backed insurgency, he predicated such aid on carrying out meaningful reforms. Taylor left Saigon in 1965 to serve as President Lyndon B. Johnson's special military adviser, and he also served as head of the Foreign Intelligence Advisory Board, which oversaw the American military buildup in Southeast Asia. In that position he became the architect of early American involvement in Vietnam. Taylor resigned from the military in 1970 and resumed his publishing activities. He died in Washington, D.C., on April 19, 1987, one of the most influential soldier-statesmen of the 20th century.

July 18

DIPLOMACY: Not to be outdone by its fast-rising rival, the Soviet Union also concludes an economic aid agreement with North Vietnam.

July 20

AVIATION: An NB-36H Peacekeeper aircraft carrying a nuclear reactor is flown for the first time, although the reactor itself remains inert.

July 21

MILITARY: In Washington, D.C., Wilber M. Bruckner, the general counsel for the Department of Defense, gains appointment as the fifth secretary of the army.

NAVAL: The *Sea Wolf*, the world's second atomic-powered submarine, is launched at Groton, Connecticut.

July 26

MILITARY: Congress passes a bill calling for U.S. military reserves to be expanded from 800,000 to 2.9 million by 1960.

August 1

AVIATION: Lockheed F-80s and T-33 aircraft are used as aerial simulation programs in the first zero-gravity research flights.

August 4

AVIATION: Over a secured airfield at Groom Lake, Nevada, the top-secret U-2 high-altitude reconnaissance aircraft prototype flies for the first time.

- The crew of the special operations B-29 Stardust 40 gain their freedom after being held in Red China since January 13, 1953. They had been incarcerated longer than any other prisoners of the Korean War.

August 8

AVIATION: Over Edwards Air Force Base, California, the Bell X-1A rocket plane explodes in the belly of its B-29 mothership and is ejected; test pilot Joseph A. Walker is rescued beforehand and survives unhurt.

August 10

AVIATION: The 3rd Marine Aviation Wing (3rd MAW) begins transferring its aerial assets from Miami, Florida, to El Toro, California.

August 13

MARINES: In Washington, D.C., President Dwight D. Eisenhower signs an executive order mandating that the army and marines begin enlisting personnel under the new Armed Forces Reserve Act of 1955. This stipulates that all new reservist personnel must undergo a six-month period of active duty training before being released into the Reserves. Consequently, reservists receive the same intensity of training as the regular forces they supplement in wartime.

August 17

MILITARY: The U.S. Army, ever conscious of public relations, creates the Civil Affairs/Military Government Branch as part of the Army Reserve. In 1959 it is subsequently renamed the Civil Affairs Branch.

Burke, Arleigh A. (1901–1996)

Admiral

Arleigh Albert Burke was born in Boulder, Colorado, on October 19, 1901, and he passed through the U.S. Naval Academy in 1919 within the top third of his class. He fulfilled the usual tour of routine duties on land and sea over the next two decades while receiving graduate degrees in chemical engineering and becoming a noted weapons expert. In 1937 Burke became executive officer onboard the destroyer *Craven*, commencing his long association with “Tin Cans.” Two years later he commanded his own vessel, the *Mugford*, trained it to a razor’s edge, and won the Coveted Destroyer Gunnery Trophy for 1939. After World War II broke out he appealed for a combat command and, in March 1943, he took charge of Destroyer Squadron 23 commanding the *Waller*. Within days, he sank a Japanese destroyer in the Solomon Islands, rose to captain, then assumed control of Destroyer Squadron 23. In the Battles of Empress Augusta Bay and Cape St. George, Burke’s well-aimed torpedoes sank several more Japanese destroyers without loss. Admiral William F. Halsey even christened him “Thirty-One Knot Burke” on account of his high-speed tactics. In March 1944 Burke transferred to the staff of Vice Admiral Marc A. Mitscher’s Task Force 58, where he helped plan and coordinate some of the largest naval encounters of the Pacific war. Off Okinawa in April 1945, repeated kamikaze strikes forced Burke to change his flagship three times and, after the war,

he served as director of research at the Bureau of Ordnance in Washington, D.C.

The postwar years were a period of fiscal entrenchment for the military, and, in 1948, he had emerged as a leading opponent of the air force’s new B-36 intercontinental bomber. His vocal opposition caused President Harry S. Truman to delete Burke’s name from the list of potential flag officers, but, in July 1950, Truman reversed himself and promoted him to rear admiral. Burke performed distinguished service in Korea, and, in 1955, President Dwight D. Eisenhower appointed him—at age 53—the youngest-ever chief of naval operations, bypassing 97 other officers with more seniority. In this office, Burke helped the navy redefine itself and its mission in an age of limited conflict and nuclear weapons by promoting nuclear-powered submarines, the Polaris ballistic missile, and the angle-deck *Forrestal*-class carriers. He also orchestrated a far-ranging series of activities from handling the Quemoy-Matsu crisis off China to marine landings in Lebanon. His success as CNO may be gauged from the fact that he served three terms, longer than another other incumbent, before retiring from active service in 1961. The navy paid him a distinct homage by naming one of their most powerful group warships, the Arleigh Burke class (DDG-51) guided-missile destroyers in his honor while he was still alive. Burke died in Washington, D.C., on January 1, 1996, one of the navy’s most far-sighted and accomplished senior officers.

NAVAL: In Washington, D.C. Admiral Arleigh A. Burke, a noted destroyerman of World War II, gains appointment as the 15th chief of naval operations.

August 18

AVIATION: In the wake of Hurricane Diane, helicopters from HMR-161 and HMX-1 perform emergency relief work in battered areas of Connecticut and Pennsylvania.

August 20

AVIATION: Over Edwards Air Force Base, California, a North American F-100 Super Sabre jet flown by Colonel Horace A. Hanes, director of the Air Force Flight Test Center, achieves a world speed record of 822 miles per hour in a production aircraft. For achieving the first high speed record set at high altitude, Hanes wins the Mackay Trophy.

August 22–24

AVIATION: The carrier *Bennington* tests the new mirror landing system with pilots of Experimental Squadron VX-3. Highly successful, these replace the old hand-held paddle system and become standard features on all U.S. carriers.

September 8

MARINES: Command of Fleet Marine Force Pacific (FMFPAC) passes to Lieutenant General William O. Brice, the first aviator so appointed since General Roy S. Geiger.

September 10

MARINES: The dictum “Every Marine is a rifleman” is soundly underscored when a team of marksmen sweeps the National Trophy Rifle Matches, including the National Trophy, the Pershing Trophy, the Daniel Boone Trophy, the Rattlesnake Trophy, and the Infantry Trophy.

September 13

AVIATION: In Washington, D.C., President Dwight D. Eisenhower orders the Department of Defense to begin work on a ballistic missile with a range of 1,500 miles, one capable of being launched from either land or sea.

September 16–30

MARINES: In Hawaii, the 3rd Battalion, 4th Marines and helicopters of HMR-161 conduct training exercises simulating counter guerrilla, mountain, and night fighting operations.

September 20

MARINES: Near Santa Barbara, California, 600 marines from the 2nd Infantry Training Regiment at Camp Pendleton are rushed to the Los Padres National Forest as fire fighters.

October 1

NAVAL: At Newport News, Virginia, the *Forrestal*, the navy’s largest carrier, is commissioned into active service. This is also the first of a class of six “super” carriers, each weighing 59,630 tons and specifically designed to handle jet aircraft operations.

October 2–13

AVIATION: Aircraft and helicopters of the 2nd Marine Air Wing (2nd MAW) fly to Tampico, Mexico, to provide relief aid in the wake of heavy flooding.

October 5

AVIATION: The air force contracts with Boeing to procure 29 KC-135 tankers, the first of 700 it will acquire in 88 models. It grants bombers of the Strategic Air Command (SAC) virtually unlimited range to reach hostile targets.

October 6

AVIATION: In Washington, D.C., the Department of Defense reveals a contract with the Glenn L. Martin Company to construct a rocket vehicle capable of putting a small satellite into Earth orbit. General Electric is also contracted to construct the actual rocket motor.

MILITARY: Edward L. T. Lyon, an anesthetist, is the first male commissioned into the Army Nurse Corps.

October 20

AVIATION: At Biggs Air Force Base, Texas, the 97th Bombardment Wing retires its last propeller-driven B-50D Superfortress. The age of jet bombardment is at hand.

October 22

AVIATION: Over Edwards Air Force Base, California, The Republic XF-105 prototype flies successfully for the first time and breaks the sound barrier during its maiden flight. It enters service at the F-105 Thunderchief, or “Thud,” and accrues a distinguished career during the Vietnam War.

October 26

DIPLOMACY: In South Vietnam, Ngo Dinh Diem declares himself elected president of the new Republic of Vietnam; the move does nothing to deter North Vietnamese Communists under Ho Chi Minh from planning its ultimate subjugation.

November 1

MILITARY: Lieutenant General Samuel T. Williams is appointed head of the new Military Assistance Advisory Group Vietnam (MAAG-Vietnam). This body is tasked with supply arms and advice to the new government of South Vietnam.

NAVAL: At the Philadelphia Navy Yard, Pennsylvania, the new guided-missile cruiser *Boston* is commissioned. This is the first vessel of its kind in the world and capable of firing Terrier antiaircraft missiles from two automated launchers.

November 2

EXPLORING: Admiral Richard E. Byrd is appointed director of all Antarctic research by President Dwight D. Eisenhower.

November 7–18

MARINES: At Camp Pendleton, California, the 1st Marine Division and the 3rd Marine Air Wing (3rd MAW) participate in the PACTRAEX 56L fleet training exercise; opposition forces are provided by the Fleet Marine Force Pacific.

November 8–14

AVIATION: With guided ballistic missile programs pronounced the nation’s top military priority, the Joint Army-Navy Missile Committee implements streamlined procedures to accelerate their procurement. The first intermediate-range ballistic missile (IRBM) to emerge is the Jupiter.

November 17

NAVAL: In Washington, D.C., the Special Projects Office is established by the secretary of the navy to oversee the development of new ballistic missiles and their shipboard launching systems. It is commanded by Rear Admiral William F. Raborn, Jr.

November 18

AVIATION: Over Edwards Air Force Base, California, the streamlined Bell X-2 research rocket plane successfully completes its first flight once dropped from an EB-50A. It reaches 627 miles per hour with Colonel Frank Everest at the controls.

MARINES: At Belleau Wood, France, Commandant Lemuel C. Shepherd dedicates a memorial to the 4th Marine Brigade that so distinguished itself here in 1918.

November 28

AVIATION: In Washington, D.C., the secretary of the navy establishes 1965 as the target date to acquire functional, solid-fuel ballistic missiles for a new class of submarines designed to carry and launch them.

December 2

MARINES: In Jacksonville, North Carolina, marines are dispatched from Camp Lejeune to assist fire fighters in extinguishing a major fire in the downtown district.

December 10

AVIATION: The Ryan X-13 Vertijet flies for the first time as a conventional aircraft; it is designed to rise vertically off the ground using its jet engine.

December 13

MARINES: The new Landing Force Bulletin Number 17 announces that, very soon, advanced echelons of an invading amphibious force will be transported entirely by helicopters.

December 25–27

MARINES: In Northern California, helicopters of HMR-152 and 352 are dispatched from El Toro to provide relief and medical supplies to flood victims.

December 31

MARINES: In Washington, D.C., General Randolph M. Pate is appointed the 21st Marine Corps Commandant to replace retiring general Lemuel C. Shepherd.

1956**January 1**

AVIATION: The Strategic Air Command (SAC) accepts its 1,000th Boeing B-47 Stratojet, now the mainstay of its bomber fleet.

January 10

NAVAL: At New London, Connecticut, the U.S. Navy establishes its first school for nuclear propulsion.

January 17

AVIATION: In Washington, D.C., the Department of Defense reveals that its semi-automated ground environment (SAGE) has been activated. This is an automated,

electronic air defense system employing telephone lines to transmit information to large computers housed at combat centers.

January 31

MARINES: On Halawa Heights, Oahu, Hawaii, Headquarters, Fleet Marine Force Pacific (FMFPAC) opens its new headquarters at Camp H. M. Smith.

February 1

MILITARY: The U.S. Army initiates its Army Ballistic Missile Agency at the Redstone Arsenal, Huntsville, Alabama, for the purpose of developing the new Thor and Jupiter intermediate-range ballistic missiles. However, in light of public safety concerns, Secretary of Defense Charles Wilson restricts the range of all testing to only 200 miles.

February 17

AVIATION: At Edwards Air Force Base, California, the first production Lockheed F-104 Starfighter completes its maiden flight.

March 9

AVIATION: Over Seattle, Washington, the first B-52C jet bomber performs its maiden flight; it differs from earlier models in possessing large underwing fuel tanks.

March 12

AVIATION: Attack squadron VA-83, flying Chance Vought F7U Cutlass fighters on the carrier *Intrepid*, becomes the first missile-equipped navy squadron. These aircraft are equipped with early versions of the Sparrow radar-guided, air-to-air missile.

March 16

NAVAL: In Annapolis, Maryland, Rear Admiral W. R. Smedberg III gains appointment as the 39th superintendent of the U.S. Naval Academy.

March 28

AVIATION: Airman D. F. Smith establishes a record, of sorts, in remaining sealed in the air force space cabin simulator for 24 hours.

April 8

MILITARY: During a night exercise in a swamp, six recruits from Platoon 71, Company A, 3rd Recruit Training Battalion, drown in Ribbon Creek near Parris Island, South Carolina. Staff Sergeant Matthew C. McKeon is charged with negligent homicide.

April 23

AVIATION: The prototype Douglas XC-133 flies for the first time. This very large aircraft enters service as the C-133 Cargomaster, of which 50 are built over the ensuing two years to air transport ballistic missiles.

May 1

MARINES: In response to the recent recruit fatalities at Ribbon Creek, Commandant General Randolph M. Pate orders that training commands at Parris Island, South Carolina, and Camp Pendleton, California, be separated from base commands and assigned to brigadier generals. The new Inspector General of Recruit Training is also established.

May 7

AVIATION: On the Georges Bank, 100 miles off the Cape Cod coast, Massachusetts, the air force activates its “Texas Tower” early warning radar platform.

May 14–18

MARINES: At Twenty-Nine Palms, California, Marines from Camp Pendleton conduct military exercises involving simulated atomic weapons.

May 21

AVIATION: Operation Redwing takes place as a B-52 bomber commanded by Major David Crichlow test drops the first air-delivered hydrogen bomb over Bikini Atoll; the weapon is released from an altitude of 50,000 feet.

May 22

NAVAL: In Washington, D.C., the secretary of the navy and the commandant, Marine Corps sign a five-year plan to construct five helicopter landing ships (LPH). They are to be built by converting existing escort carriers to that role.

May 31

AVIATION: At Turner Air Force Base, Georgia, the 4080th Strategic Reconnaissance Wing receives its first, high-altitude RB-57D Canberra jet.

June 4

AVIATION: Over Seattle, Washington, the new B-52D jet bomber performs its maiden flight. It becomes a major production variant.

June 4–December 1

MARINES: At Quantico, Virginia, the Organization and Composition Board convenes to consider organizational changes within the Fleet Marine Force (FMF).

June 12

MILITARY: In a ceremony at Independence Hall, Philadelphia, presided over by President Dwight D. Eisenhower, the U.S. Army adopts its first official flag in 181 years.

June 22

AVIATION: The Air Force Reserve commences Operation Sixteen Tons in the Caribbean; this is the first sustained cargo exercise ever conducted by these forces.

July 4

AVIATION: The secret Lockheed U-2 spy plane begins the first overflight of Soviet territory by photographing Minsk, Leningrad, and the Baltic region before returning to its base at Wiesbaden, West Germany.

July 5

AVIATION: The 1st Marine Aviation Wing (1st MAW) relocates permanently from Korea to Japan.

July 15

AVIATION: At Torrejón, Spain, the Sixteenth Air Force is activated.

July 18

AVIATION: At Renton, Washington, the final Boeing KC-97G aerial tanker is constructed.

The TR-1 is an advanced, modern version of the famous U-2 “Dragon Lady”
(National Archives)

July 20

NAVAL: The *Thetis Bay* is commissioned into active service; this is the navy’s first amphibious assault ship, although it never engages in any landings prior to being decommissioned in 1964. It was formerly an escort carrier and can carry 20 Sikorsky HRS helicopters along with a battalion of marines.

July 23

AVIATION: Over Edwards Air Force Base, California, the Bell X-2 rocket plane flown by Lieutenant Colonel Frank K. Everest reaches at altitude of 75,000 feet at 1,900 miles per hour. This is a new world speed record.

August 2

MILITARY: Albert Woolson, the oldest surviving Union soldier of the Civil War, dies at the age of 109. He had served as a drummer boy in the 1st Minnesota Heavy Artillery.

August 4

MARINES: At Parris Island, South Carolina, Staff Sergeant Matthew C. McKeon is convicted of negligent homicide for the death of six recruits during night maneuvers at Ribbon Creek.

August 14

MILITARY: Over Fort Rucker, Alabama, the army conducts its first aerial refueling between an H-21 helicopter and a fixed wing aircraft.

August 21

AVIATION: Over the Naval Ordnance Test Station, China Lake, California, an F8U Crusader piloted by Commander Robert W. Windsor establishes a new national speed record of 1,015.428 miles per hour. Crusaders are the first jet aircraft to routinely operate at such high rates of speed.

August 22

AVIATION: A Japan-based Martin P4M-1Q Mercator of VQ-1 is attacked by Chinese fighters 32 miles off the coast of Wenchow and shot down with a loss of all 16 crewmen.

August 23–24

AVIATION: An Army H-21 Chickasaw helicopter with a crew of five men conducts the first transcontinental flight for this type of aircraft by flying nonstop from San Diego, California, to Washington, D.C., and covering 2,610 miles in 37 hours.

August 27

AVIATION: At Edwards Air Force Base, California, the first static engine test of the new Thor rocket is run by the Flight Test Center.

August 31

AVIATION: At Renton, Washington, the first production model Boeing KC-135 aerial tanker performs its maiden flight.

September 7

AVIATION: Over Edwards Air Force Base, California, the Bell X-2 rocket research aircraft flown by Captain Iven C. Kincheloe reaches an altitude of 126,000 feet. This is the first manned flight exceeding the 100,000 foot-mark and earns Kincheloe the Mackay Trophy.

September 15

AVIATION: At Hahn Air Base, Germany, the 701st Tactical Missile Wing (TMW) is activated as part of the Twelfth Air Force. This is the first such unit in the air force and will be equipped with Matador tactical missiles.

September 20

AVIATION: At Cape Canaveral, Florida, the first Jupiter C, three-stage missile, is successfully launched. It reaches 680 miles in altitude and splashes down 3,300 miles away.

September 21

MILITARY: At Fort Campbell, Kentucky, the 101st Airborne Division becomes the first unit to adopt the new Pentomic structure. This replaces the traditional triangular organization of three regiments with five battle groups, each slightly larger than a battalion. Although all infantry and airborne divisions adopt this scheme, there are no changes made to current armor formations.

September 27

AVIATION: Over Edwards Air Force Base, California, a Bell X-2 flown by Captain Milburn G. Apt manages to exceed Mach 3.2–2,094 miles per hour—then loses control; Apt is killed after crashing.

October 11

AVIATION: Over the Atlantic, a Douglas R6D Skymaster of VR-6 crashes, killing all 59 passengers and crewmen onboard.

October 23

MILITARY: The brutal Soviet response to the Hungarian uprising results in the 6th Armored Cavalry Regiment being placed on alert along the West German–East German border.

October 26

AVIATION: At Fort Worth, Texas, the prototype Bell XH-40 helicopter performs its maiden flight. It enters into production as the UH-1 Iroquois and renders exceptional service during the Vietnam War.

October 29

NAVAL: In response to the Suez Crisis in Egypt, the Sixth Fleet begins evacuating 2,213 people from the Sinai Peninsula, Israel, and Syria.

MARINES: At Port Lyautey, Morocco, a company from the 2nd Battalion, 2nd Marines is flown in to reinforce the Naval Air Station there during increasing tensions between Moroccans and French authorities.

October 30

MARINES: In the wake of the latest round of fighting between Egyptians and Israelis, the 3rd Battalion, 2nd Marines is reinforced and placed on alert for possible landings in the eastern Mediterranean.

October 31

AVIATION: Lieutenant Commander Conrad Shinn lands his Douglas R4D Skytrain at the South Pole, becoming the first to visit that area since 1912, when British Royal Navy captain Robert F. Scott arrived. Among the passengers are Rear Admiral G. J. Dufek, commander of Naval Support Force Antarctic, and seven of his officers.

November 1

NAVAL: In Alexandria, Egypt, vessels of the Sixth Fleet and marines help evacuate 1,500 Americans and other foreign nationals; at this time British and French forces are attacking Egypt in retaliation for its nationalization of the Suez Canal.

November 6

AVIATION: At Cape Canaveral, Florida, a Navaho ramjet missile is launched for the first time and breaks up 30 seconds into its flight.

November 11

AVIATION: At Fort Worth, Texas, the Convair XB-58, the world's first supersonic jet bomber, is flown for the first time and eventually goes into production as the B-58 Hustler. It incorporates the "area rule," giving it a pinched-in fuselage, making such high-speed flight possible.

MARINES: On Okinawa, the 3rd Battalion, 3rd Marines sails for Port Lyautey, Morocco, to bolster American facilities there during heightened tensions caused by the ongoing Suez Crisis. A cease-fire takes place while they are en route and the marines are diverted to a goodwill tour of Asia.

November 16

AVIATION: Parts of Camp Cooke, California, are transferred to the air force by the Department of Defense. This is the future site of Vandenberg Air Force Base and the nation's first intercontinental ballistic missile base.

November 26

AVIATION: In Washington, D.C., Secretary of Defense Charles E. Wilson assigns operational jurisdiction over all long-range missiles to the air force. Within four years, this authority will have to be shared, however, once the navy perfects its Polaris submarine-launched missiles.

November 30

AVIATION: The jet-propelled Martin TM-61 Matador becomes operational, being the first tactical guided missile deployed by the U.S. Air Force. It possesses a speed of 650 miles per hour and can reach an altitude of 35,000 feet.

December 1

MILITARY: In a sign of the times, the army deactivates its last mules and carrier pigeons for transport and communication purposes, respectively.

December 3

AVIATION: The navy receives permission to withdraw from the liquid-fueled Jupiter missile project in seeking to concentrate its efforts on the new Polaris, solid-fuel ballistic missile program. This weapon is designed specifically for use in submarines.

NAVAL: The destroyer *Gyatt* becomes the first vessel of its class to be equipped with Terrier anti-aircraft missiles. This vessel is also fitted with a Denny-Brown stabilization system, including two 45-square-foot retractable fins fitted amidships below the waterline. This device greatly reduces pitching and rolling in heavy seas.

December 8

AVIATION: The Special Projects Office receives authorization to begin development of the navy's first generation of solid-fuel guided missiles for use in ballistic submarines. They emerge in 1960 as the Polaris.

December 9

AVIATION: The 463rd Troop Carrier Wing receives its first C-130 Hercules transport aircraft. A wonderfully versatile aircraft, it can carry a 25-ton cargo or 92 fully equipped troops over 2,500 miles, as well as operate off primitive 4,000-foot airstrips.

December 11

AVIATION: In light of the failed Hungarian revolt, the Military Transport Service (MATS) commences Operation Safe Haven to transport 10,000 refugees from West Germany to the United States. The entire operation lasts seven months.

December 18

AVIATION: Unable to compromise between the competing Jupiter and Polaris ballistic missile programs, the Joint Army-Navy Missile Committee disbands.

December 19

AVIATION: The Special Projects Office under Admiral William F. Raborn is accorded the highest priority in designing and constructing the new Polaris, submarine-launched, ballistic missile.

December 21

AVIATION: At the Air Research and Development Command, Dayton, Ohio, Major Arnold I. Beck endures conditions equivalent to those at 198,770 feet in a simulated altitude chamber.

December 26

AVIATION: Over Edwards Air Force Base, California, the Convair YF-106 performs its maiden flight. It enters service as the F-106 Delta Dagger and serves as a supersonic bomber interceptor over the next three decades.

December 31

AVIATION: HMR squadrons are redesignated Marine Light Helicopter Squadrons HMR (L) as larger, "medium" helicopters are slated to be deployed soon.

1957

January

AVIATION: The Marine Corps's first Douglas A-4 Skyhawk light jet bombers are assigned to VMA-224; these render exceptional service during the Vietnam War years.

January 7

MARINES: In Washington, D.C., the Organization and Composition Board (or Hogaboom Board) makes its final recommendations to Commandant General Randolph M. Pate. They include adding a fourth rifle company to each infantry battalion, transferring the tank battalion to the Fleet Marine Force, and adding a battalion of 45 Ontos antitank tracked vehicles (each mounting six 105mm recoilless rifles). A new M-series table of organization, meant to facilitate helicopter transportability of a division, is also advocated. The commandant concurs with the suggestions and most are implemented by the fall of 1958.

January 12

AVIATION: At New River, North Carolina, the first Marine Corps medium helicopter squadron is formed. HMR(M)-461 is equipped with new Sikorsky HR2S-1 (CH-37) helicopters capable of carrying 23 marines or 8,000 pounds of cargo at 100 knots. This is also the largest helicopter in American service.

January 16–18

AVIATION: The B-52 *Lucky Lady II*, commanded by Major General Archie J. Olds, 93rd Bombardment Wing, makes the first around-the-world flight by a jet aircraft. The aircraft covers 24,325 miles in 45 hours, 19 minutes, and requires three aerial refuelings. Consequently, the crewmen all receive the Distinguished Flying Cross while their unit is awarded a Mackay Trophy. Operation Power Flite also demonstrates to the Soviets that the U.S. Air Force can deploy its assets quickly to any point on the globe.

January 25

AVIATION: The first test launch of the air force's Thor intermediate-range ballistic missile ends in failure; the first successful launch occurs in August.

January 28

MILITARY: Secretary of Defense Charles E. Wilson addresses the House Armed Services Committee and declares that the National Guard harbored draft dodgers throughout the Korean War.

February 1

MARINES: In Southern California, the Twenty-Nine Palms desert facility is configured as a Marine Corps base.

February 8

AVIATION: Chief of Naval Operations Admiral Arleigh Burke, unwilling to brook further delays, reiterates a January 1965 deadline for deploying solid-fuel, submarine-based missiles with a 1,500-mile range.

February 13

AVIATION: The Marine Corps receives its first Sikorsky HUS-1 utility helicopters, capable for hauling 12 marines or 6,000 pounds of cargo at 90 knots.

February 14

MARINES: In the Pacific, the 3rd Marine and helicopter squadron HMR-162 are positioned 550 miles north of Sumatra, Indonesia, in case a violent rebellion against the government requires the evacuation of American citizens.

February 18

AVIATION: At Harvard University, Cambridge, Massachusetts, the Aviation Health and Safety Center receives \$250,000 from the Guggenheim Foundation.

March 4–15

AVIATION: The airship ZPG-2 under Commander Jack R. Hunt makes a record endurance flight by flying from the United States to the African coast and back in 264 hours.

March 10

AVIATION: The NACA Lewis Laboratory commences research on an ion engine for use in outer space. This entails emitting ions, or charged particles, as exhaust, which reach 30 kilometers per second and theoretically can propel a vehicle through the vacuum of space.

March 17

AVIATION: At Cape Canaveral, Florida, the Navy launches its first satellite, *Vanguard*, weighing in at three and-a-half pounds.

- In the Philippines, Marine helicopters of HMR(L)-162 assist in search and rescue operations after the aircraft carrying President Ramon Magsaysay crashes while on a flight from Cebu to Manila.

March 21

AVIATION: A Douglas A3D Skywarrior piloted by Commander Dale Cox establishes an east-to-west continental speed record followed by a west-to-east one between New York and Los Angeles, California, and back.

March 27

AVIATION: The McDonnell F-101B Voodoo, a two-seater version of the fighter interceptor, performs its maiden flight.

March 30

NAVAL: The *Seawolf*, America's second nuclear-powered submarine, is commissioned at Groton, Connecticut.

April 1

AVIATION: In order to concentrate on its bombing functions, the Strategic Air Command (SAC) begins turning over the first of its seven fighter wings to the Tactical Air Command (TAC).

NAVAL: In Washington, D.C., Thomas G. Gates gains appointment as the 54th secretary of the navy.

April 11

AVIATION: The Ryan X-13 Vertijet vertical takeoff and landing (VTOL) aircraft flies for the first time in its intended mode by rising straight off the ground, flying in level flight, and then landing vertically.

April 19

AVIATION: At Cape Canaveral, Florida, the Douglas Thor (SM-75) intermediate-range ballistic missile (IRBM) is successfully launched but ends up being destroyed by the range safety officer in midflight.

April 29

MILITARY: At Fort Belvoir, Virginia, the army's first nuclear reactor is dedicated by Secretary of the Army William M. Bruckner. This device, SM1, becomes the first American reactor providing power to an electrical grid.

May 1

MILITARY: The M1 semi-automatic rifle, which has been a standard-issue weapon since 1939, is replaced by the M14 automatic/semi-automatic rifle. This new weapon dispenses with traditional .30-caliber bullets and is chambered to fire the standard NATO 7.62mm round.

May 6

AVIATION: In Washington, D.C., William M. Holaday becomes Department of Defense special assistant for guided missiles.

May 15–July 5

MARINES: At Desert Rock, Nevada, the 4th Provisional Marine Brigades participate in Operation Plumbbob, an atomic exercise.

May 16

NAVAL: The world's third nuclear-powered submarine, the *Skate*, is launched at Groton, Connecticut.

May 23

MARINES: Sergeant Major Wilbur Bestwick becomes the first sergeant major of the Marine Corps and serves as the commandant's senior enlisted adviser.

May 31

AVIATION: At Cape Canaveral, Florida, the army-developed Jupiter intermediate-range ballistic missile (IRBM) makes its first successful test flight of 1,500 miles at an altitude of 300 miles.

June 1

MARINES: At Rota, Spain, as a sign of increasing commitments to the Mediterranean region, a Marine Barracks is established.

June 2

AVIATION: Over Minnesota, the balloon *Man High 1* flown by Captain Joseph W. Kittinger reaches an altitude of 96,000 feet for two hours and establishes a new world record for lighter-than-air aircraft. This is also the first solo balloon flight to reach the stratosphere

June 11

AVIATION: At Laughlin, Texas, the 4080th Strategic Reconnaissance Wing receives its first operational U-2 spyplane. It is capable of flying 10-hour missions at extremely high altitude.

June 19

MARINES: At Camp Pendleton, California, the 1st Force Reconnaissance Company is created from the older 1st Amphibious Reconnaissance Company.

June 28

AVIATION: At Castle Air Force Base, California, the 93rd Refueling Squadron receives its first operational Boeing KC-135 Stratotanker. Because it is capable of high-speed flight, refueling large jet bombers can be accomplished with less time and greater safety.

June 30

MARINES: At this juncture, Marine Corps manpower stands at 17,434 officers and 183,427 enlisted men.

July 1

AVIATION: In Washington, D.C., General Thomas D. White is appointed the air force chief of staff.

- At Cook (Vandenberg) Air Force Base, California, the 704th Strategic Missile Wing (SMW), armed with Northrop Snark missiles, becomes the first intercontinental ballistic missile wing.
- In Tokyo, Japan, the Far East Air Forces (FEAF) is redesignated the Pacific Air Command (PACAF) and its headquarters are transferred to Hickham Air Force Base, Hawaii.

July 10

AVIATION: The super-sleek and futuristic Convair B-58 Hustler is unveiled to the public for the first time.

July 13

AVIATION: In Washington, D.C., President Dwight D. Eisenhower becomes the first chief executive to fly in a helicopter, an air force Bell UH-13J.

- Marine Corps major John H. Glenn sets a new transcontinental speed record of three hours, 23 minutes, eight seconds flying in a Chance Vought F8U Crusader from Los Alamitos, California, to Floyd Bennet Field, New York; he averages 760 miles per hour.

MILITARY: Secretary of Defense Charles E. Wilson announces his intention to cut the armed forces by 100,000 men by year's end.

July 19

AVIATION: Over Yucca Flats, Nevada, a nuclear-tipped Douglas MB-1 Genie missile is fired for the first time by an F-89J Scorpion. This weapon is intended to break up or destroy Soviet bomber formations attacking the United States.

July 31

AVIATION: The chain of distant early warning (DEW) radars strung across the Arctic Circle becomes operational and is christened the DEW Line.

August 1

AVIATION: The United States and Canada formally establish the North American Air Defense Command (NORAD) with joint responsibilities for air-defense missions.

August 12

AVIATION: On the carrier *Antietam*, Lieutenant Commander Don Walker makes the first "hands-off" landing on a flight deck in an F3D Skyknight, relying solely upon the automated landing system installed on that vessel.

MARINES: In Washington, D.C., the secretary of the navy orders a reduction in Marine Corps personnel to 175,000 men and women of all ranks. Budget constraints also impose similar cutbacks on the navy.

August 15

MILITARY: In Washington, D.C., General Nathan F. Twining gains appointment as the chairman of the Joint Chiefs of Staff (JCS); he is the first air force officer so honored.

August 19–20

AVIATION: Over Crosby, Minnesota, Major David G. Simon sets a new balloon altitude record of 101,486 feet in *Man High II*, which places him on the very edge of space. His flight lasts 32 hours and terminates at Elm Lake, South Dakota.

August 20

AVIATION: At Morehead City, North Carolina, helicopters of HMR(L)-261 and HMR(L)-262 accompany the 6th Marines on a deployment with the Sixth Fleet. This is the first time helicopters have been committed to vessels afloat.

September 3

AVIATION: The *Study of the Feasibility of a Hypersonic Research Plane* is prepared by NACA for the air force.

September 4

AVIATION: The Lockheed CL-329 performs its maiden flight; it enters the service with the Military Air Transport Service (MATS) as the C-140 Jetsar for testing navigation aids and communication equipment.

September 20

AVIATION: In Washington, D.C., U.S. Air Force chief of staff Thomas D. White reveals the existence of radar units capable of detecting incoming ICBMs up to 3,000 miles away.

- At Cape Canaveral, Florida, a Thor intermediate-range ballistic missile (IRBM) is successfully launched.

September 22

MARINES: At Saros, Turkey, the 6th Marines, Marine Air Group 26 (MAG-26), VMF-312, and the 2nd Amphibious Reconnaissance Company conduct landing exercises.

September 24

MILITARY: In Little Rock, Arkansas, National Guard Troops and units of the 101st Airborne Division are ordered by President Dwight D. Eisenhower to assist desegregation efforts at the city's Central High School.

October 1

AVIATION: At Cape Canaveral, Florida, air force technicians test fire a Northrop Snark missile for the first time.

October 4

AVIATION: The Soviets launch *Sputnik I*, Earth's first artificial satellite, and the launch resonates throughout the United States like a technological Pearl Harbor. The new Space Age has arrived and the U.S. government responds by calling for

**Glenn, John H. (1921–)***Marine Corps officer, astronaut*

John Herschel Glenn, Jr. was born in Cambridge, Ohio, on July 18, 1921, the son of a plumber. He was raised in nearby New Concord and attended Muskingum College to study chemical engineering, but left before graduating to undergo naval aviation training for service in World War II. By March 1943 Glenn was commissioned a lieutenant in the Marine Corps Reserve and flew F4U Corsairs with VMO-155 in the Pacific; he completed 59 missions, winning two Distinguished Flying Crosses and 10 Air Medals. After the war, he rose to captain and returned to the United States to serve as a flight instructor. In 1952 Glenn was sent to Korea to fly F9F Panthers with VMF-311, although toward the end of that conflict he served as an exchange pilot with the U.S. Air Force, switched to F-86 Sabres, and downed two MiG-15s. Glenn consequently received two additional Distinguished Flying Crosses and eight more air medals. He then rose to major in 1953 and

was assigned to the navy's Patuxent River test school as a test pilot. As a test pilot, he completed the first supersonic, transcontinental flight in an F8U Crusader on July 16, 1957, crossing the country in only three hours, 23 minutes. He won his fifth Distinguished Flying Cross, became a lieutenant colonel, and then gained entry into Project Mercury, which aimed to put an American in orbit. Glenn trained intensely for three years and, on February 20, 1963, he piloted his *Friendship 7* space capsule for three orbits around the globe at an altitude of 185 miles and for a distance of 81,000 miles. Glenn became a national hero and received ticker-tape parades in both New York and Washington, D.C.

It was President John F. Kennedy who is believed to have convinced Glenn to run for public office. Glenn resigned from the astronaut program in 1964 and declared his candidacy for the U.S. Senate seat in Ohio, but his campaign was sidelined by a severe per-

greater concentration on science and mathematics courses in the public school system.

October 9

NAVAL: In Washington, D.C., Neil H. McElroy gains appointment as the sixth secretary of defense.

October 11

AVIATION: At Cape Canaveral, Florida, the second successful launching of a Thor intermediate-range ballistic missile is accomplished. The vehicle travels 2,000 miles down range and splashes into the Atlantic Ocean.

October 16

AVIATION: The air force launches an Aerobee research rocket to an altitude of 35 miles, whereupon its nose cone separates and coasts a further 54 miles into the atmosphere. At that juncture, the shaped charges it carries forces pellets into

sonal injury. He worked as a business executive until 1970, when he lost a Democratic primary for the Senate to Howard Metzenbaum. It was not until 1974 that Glenn was elected to office as Ohio's junior senator, and he served on the Foreign Relations and Governmental Affairs Committees. Glenn was a moderate Democrat, conservative on defense matters and liberal on labor and social issues. In 1984 he declared his candidacy for the presidency but he was defeated by the leading contender, Vice President Walter Mondale. He subsequently gained reelection to Congress in 1992. Glenn was launched into space a second time on October 29, 1998, 35 years after his initial flight, as a member of the crew of the space shuttle *Discovery*. Although his flight was dismissed in political circles as a public relations stunt, the 77-year-old Glenn, the oldest person ever to fly in space, performed useful service researching the effects of weightlessness on the aged. He retired from public life in 1998 with little fanfare although earlier, in 1989, actor Ed Harris portrayed him in the popular movie *The Right Stuff*. He currently

Colonel John H. Glenn, Jr. (USMC) (U.S. Marine Corps)

holds an adjunct professorship at Ohio State University in the Department of Political Science.

space at speeds of 33,000 per hour, well past escape velocity for Earth's gravity. These are the first man-made objects in outer space.

MARINES: At Valencia, Spain, helicopters of HMR(L)-262, flying from the carrier *Lake Champlain*, assist flood victims and deliver medical supplies.

October 22

AVIATION: At Eniwetok, Operation Far Side unfolds as a four-stage rocket is carried aloft by a large balloon to 100,000 feet, launches at high altitude, and reaches 2,700 miles into outer space. This is an attempt by the Air Force Office of Scientific Research to collect data on cosmic rays from 4,000 miles up.

October 24

AVIATION: A new proposal is submitted by the Air Force Research and Development Command, which calls for a hypersonic glide rocket weapon system designated WS464L. This is the genesis of the Dyna-Soar vehicle.

November 13

AVIATION: U.S. Air Force Vice Chief of Staff general Curtis E. LeMay establishes two flight records while piloting a KC-135 Stratotanker. The first is a nonstop distance record of 6,350 miles flown between Westover Air Force Base, Massachusetts, to Buenos Aires, Argentina. The second is between Buenos Aires and Washington, D.C., a 5,200-mile trip covered in 11 hours and five minutes. LeMay is awarded the Distinguished Flying Cross after landing.

November 21

AVIATION: U.S. Air Force authorities select Francis E. Warren Air Force Base, Wyoming, as the site of the first intercontinental ballistic missile (ICBM) base. Said missiles are to be housed underground in silos until launched.

- Retired general James H. Doolittle assembles a special committee on space technology for NACA.

November 25

AVIATION: Noted nuclear physicist Dr. Edward Teller testifies before the Senate Preparedness Committee that strengthening nuclear-armed jet bomber forces is presently the best deterrent against Soviet attack.

November 27

AVIATION: In Washington, D.C., the government elects to proceed with production of the Thor and Jupiter intermediate-range ballistic missiles (IRBM). Responsibility for operating weapons will be the exclusive domain of the air force.

- Operation Sun Run unfolds as three RF101C Voodoos of the 363rd Tactical Reconnaissance Wing establish three transcontinental speed records. They achieve this through careful planning and refueling from KC-135 tankers at high altitude.

November 29

AVIATION: In Washington, D.C., U.S. Air Force Chief of Staff Thomas D. White assigns control of all Thor and Jupiter missiles to the Strategic Air Command (SAC), along with the 1st Missile Division. The Air Force Depot at San Bernardino, California, will also support continuing missile programs.

December

AVIATION: The first Marine Corps F8U Crusader jet fighters are delivered to VMF (AW)-122.

December 1

MARINES: At Headquarters Marine Corps, duties of the assistant commandant and chief of staff are divided into two sections headed up by their own lieutenant general.

December 6

SCIENCE: The navy's *Vanguard*, America's first space rocket, explodes humiliateingly on its launching pad at Cape Canaveral, Florida.

December 9

AVIATION: In Washington, D.C., Secretary of Defense Neil H. McElroy accelerates the deadline for deploying new Polaris submarine-launched ballistic missiles

to 1960. The new class of vessel intended to carry them have also been designed and are awaiting construction.

December 12

AVIATION: Major Adrian E. Drew sets a new jet speed record of 1,207.6 miles per hour while flying a McDonnell F-101A Voodoo jet fighter over the Mojave Desert, California.

December 15

AVIATION: At Patrick Air Force Base, Florida, the air force activates the 556th Strategic Missile Squadron; it is the first unit armed with Northrop Snark (SM-62) missiles.

December 17

MILITARY: A prototype of the Atlas intercontinental ballistic missile (ICBM) is successfully tested by the air force and splashes 500 miles down range.

December 18

MARINES: At Okinawa, the 3rd Marines and helicopters of HMR(L)-162 sail for Indonesia in the event that continuing civil violence against the government requires evacuating American citizens.

December 19

AVIATION: The air force successfully tests a Thor intermediate-range ballistic missile; this is also the first fully guided flight employing its own inertial guidance system.

December 23

AVIATION: The air force contracts with North American aviation to construct a supersonic, intercontinental jet bomber; this is the genesis of the XB-40 Valkyrie.

NAVAL: The nuclear-powered submarine *Skate* is commissioned. It is the first such vessel in this class of new warship.

December 24

AVIATION: An air force RB-57D Canberra conducting a top-secret reconnaissance spy flight is intercepted over the Black Sea by Soviet fighters and shot down.

December 26

AVIATION: Helicopters of HMR(L)-162, stored on the carrier *Princeton*, are diverted to Ceylon to assist victims of recent flooding.

December 28

AVIATION: A Cessna YH-41 helicopter reaches a record altitude of 30,335 feet.

December 31

MARINES: At Iwakuni, Japan, the Naval Air Station is transformed into a Marine Corps base.

1958

January

MILITARY: Lieutenant James M. Gavin, angered by what he deems President Dwight D. Eisenhower's neglect of the army through his nuclear-oriented "New Look" policy, resigns from the service on the cusp of being promoted to full general.

Furthermore, he articulates his critique of American military weakness in the book *War and Peace in the Space Age*.

NAVAL: Construction of the first three Polaris fleet ballistic submarines commences. The first vessel, *George Washington*, was originally a *Scorpion*-class nuclear-powered attack submarine, which was cut in half with a 130-foot long midsection for carrying missiles.

January 1–15

AVIATION: At Cooke (Vandenberg) Air Force Base, California, the 672nd Strategic Missile Squadron begins training to handle and deploy the Thor intermediate-range ballistic missile (IRBM).

January 3

AVIATION: Two squadrons of intermediate-range ballistic missiles (IRBM) are formed by the Strategic Air Command (SAC) as part of air force nuclear deterrence under General Curtis E. LeMay.

Gavin, James M. (1907–1990)

Army general

James Maurice Gavin was born in Brooklyn, New York, on March 22, 1907, and he enlisted as a private in April 1924. Intent upon making a career in of the military, he passed entrance exams to the U.S. Military Academy at West Point, and he was commissioned a second lieutenant in 1929. Gavin, an excellent soldier, capably performed routine duties over the next decade, although his career changed dramatically in 1940 when he decided to become a paratrooper. After attending the new jump school at Fort Benning, Georgia, he became a colonel of the 505th Parachute Infantry Regiment, 82nd Airborne Division, by 1942. Gavin jumped with his units into hazardous locations over Sicily and Anzio in Italy and Normandy, France, and invariably distinguished himself in combat. At one point, Gavin seized a bazooka and destroyed a German tank at point-blank range to demonstrate the relative weakness of American antitank weapons. In

light of his splendid combat reputation, the aggressive, hard-hitting Gavin replaced Major General Matthew Ridgway as commander of the 82nd Airborne in August 1944, aged but 37 years. Gavin went on to further distinguish himself during the failed Operation Market Garden in the Netherlands, then helped spearhead the final drive in Germany itself. Under his command, the 82nd Airborne emerged as one of the nation's premier fighting units and, in May 1945, it was selected to lead the four-mile-long victory parade through New York City.

After the war, Gavin accepted several high-level command positions in Western Europe, and, in 1954, he served as chief of staff to the Joint Chiefs of Staff in Washington, D.C. In March 1955 he became the youngest lieutenant general in American history and served as chief of research and development for new mobile forces, including helicopters. However, Gavin

January 7

MILITARY: President Dwight D. Eisenhower asks the Democratic majority in Congress for \$1.3 billion dollars for missile and air defense research.

January 15

AVIATION: The 475th Air Defense Missile Wing is activated to develop and train with the new Bomarc supersonic intercept missile; this guided, supersonic weapon possesses a range of 450 nautical miles.

January 16

MARINES: At Camp Hansen, Okinawa, the 3rd Antitank Battalion is the first unit to receive the new Ontos vehicles.

January 21

MARINES: A spate of civil violence brought on by the overthrow of dictator Pérez Jiménez in Venezuela leads to a company of marines deployed on the cruiser *Des Moines*, which hovers off the coast for a week.

grew disillusioned with President Dwight D. Eisenhower's "New Look" policy, which emphasized nuclear arms at the expense of conventional forces. This approach, or so he believed, restricted the United States to using nuclear weapons in an age of mounting guerrilla warfare. Gavin was slated for promotion to full general in 1958 but, rather than uphold a policy he opposed, he resigned from the army and published the book *War and Peace in the Space Age* to protest administration strategy. He held several high-level corporate positions until 1962, when President John F. Kennedy appointed him ambassador to France. He also became a vocal critic of America's increasing involvement in Vietnam. He promulgated the "enclave plan," which would have restricted American forces to the defense of a few key regions while negotiating a political settlement with the Communists. Gavin continued penning various treatises on national defense until his death in Baltimore, Maryland, on February 23, 1990. The wiry, athletic general,

Major General James M. Gavin (U.S. Army Military History Institute)

known to the troops as "Slim Jim," was the most celebrated paratroop commander of his day.

January 25

MARINES: In Japan, construction of Camp Futema begins to house Marine Air Group 16 (MAG-16), presently deployed at Oppama.

January 28

MARINES: At Vieques, Puerto Rico, the amphibious exercise PHIBTRAEX 1-58 commences and lasts through March 17.

January 29

AVIATION: In Washington, D.C., the Department of Defense announces its intention to create the National Pacific Missile Range at Point Magu, California. This facility will serve as part of the Naval Air Missile Test range already extant.

January 31

AVIATION: At Cape Canaveral, Florida, the army successfully launches *Explorer I*, the nation's first satellite, on top a Jupiter C launch vehicle. The device is only 80 inches long, six inches in diameter, and 30.8 pounds in weight.

February 1

AVIATION: At Francis E. Warren Air Force Base, Wyoming, the 706th Strategic Missile Wing, armed with new Atlas missiles, is activated by the Strategic Air Command (SAC).

February 4

NAVAL: At Newport News, Virginia, the keel of the *Enterprise*, the world's first nuclear-powered aircraft carrier, is laid.

February 7

AVIATION: In Washington, D.C., the Defense Department founds the Advanced Research Projects Agency (ARPA) to better promote and coordinate space exploration.

February 8

AVIATION: In order to provide a viable, early warning system against ballistic missile attacks, the air force contracts with the RCA Corporation to manage all existing communications facilities such as the DEW Line and the SAGE system.

February 11

MARINES: In the Philippines, Marine units conduct amphibious exercise PHIBLEX 58M, which lasts until March 13.

February 14

MARINES: In Pennsylvania, the onset of blizzard conditions results in the 6th Truck Company deploying from Scranton and assisting motorists stranded along the Pennsylvania Turnpike.

February 18

AVIATION: At Tullahoma, Tennessee, air force scientists at the Arnold Research Development Center create a wind tunnel airflow of 32,400 miles per hour lasting for one-tenth of a second.

February 27

AVIATION: With the tactical shortcomings of liquid-fueled rockets glaringly apparent, a plan to build a 5,000-mile-range solid fuel ballistic weapon is approved

by Missile Director William M. Holaday. This is the genesis of the Minuteman missile.

February 28

SCIENCE: A Thor/Agena rocket lifts *Discoverer 1*, the world's first photo reconnaissance satellite, into orbit.

March 4

AVIATION: Secretary of the Air Force James H. Douglas revokes the court-martial verdict against General William "Billy" Mitchell rendered 37 years earlier, declaring that his beliefs in air power have been vindicated.

March 5

NAVAL: The nuclear submarine *Skate* crosses the Atlantic Ocean in only eight days, 11 hours, before berthing at Plymouth, England.

March 7

NAVAL: The *Grayback*, the navy's first nuclear ballistic missile submarine, is commissioned. It had been designed from the onset to carry a complement of Regulus II nuclear-tipped missiles that are launched while surfaced. However, the concept is quickly abandoned in favor of the new Polaris firing vessels.

March 9

MARINES: In light of continuing violence in Indonesia, ships of the Seventh Fleet are bolstered by the arrival of Company C, 1st Battalion, 3rd Marines, VMA-332, and helicopters of HMR(L)-163 offshore.

March 17

AVIATION: America's second satellite, *Vanguard I*, is successfully launched at Cape Canaveral, Florida by the navy and enters a wider orbit than any man-made device thus far. It is only 6.4 inches in diameter and weighs 3.25 pounds yet it reveals that planet Earth has a slight pear shape to it.

March 21

AVIATION: At Holloman Air Force Base, New Mexico, a two-stage rocket sled is fired that accelerates to 2,700 miles per hour.

March 23

AVIATION: Off Los Angeles, the navy successfully conducts an underwater launch test of their new Polaris ballistic missile. These weapons are designed to be fired from submerged nuclear submarines.

March 26

AVIATION: An F-100D Super Sabre, fitted with an Astrodyne rocket motor, is launched for a rail system for the first time. This is an attempt to get jet fighters airborne in as little time as possible.

March 27

AVIATION: A plan is conceived by Advanced Research Projects Agency (ARPA) to carry three lunar probes aloft through a Thor-Vanguard launching system. The actual work is to be done by the Air Force Ballistic Missile Division.

April 2

AVIATION: In Washington, D.C., President Dwight D. Eisenhower signs legislation creating the National Aeronautics and Space Administration (NASA), which incorporates NACA and numerous civilian and military projects related to outer space.

April 5

AVIATION: At Cape Canaveral, Florida, an Atlas intercontinental ballistic missile is launched 600 miles downrange and strikes its designated impact area.

April 8

AVIATION: An air force KC-135 Stratotanker, flying between Tokyo, Japan, and Lajes Field, Azores, covers the 10,288 miles while establishing a nonstop, unrefueled jet flight record.

April 16

MILITARY: Dr. Edward Teller warns a Senate subcommittee that the United States imperils millions of its own citizens in a nuclear war with the Soviet Union should it halt its own atomic testing.

April 20

MARINES: In northern Oahu, Hawaii, the 4th Marines begin three days of intense counter guerrilla warfare instruction at the Kahuku Training Area.

April 23

MILITARY: Strong winds at Fort Campbell, Kentucky, result in the deaths of five paratroopers during a practice drop.

MARINES: The first helicopter squadrons assigned to the Marine Corps Reserve are created on the orders of Commandant Randolph M. Pate.

April 25

MARINES: In Hyde County, North Carolina, Company M, 3rd Battalion, 2nd Marines deploys to help fight forest fires.

April 28

AVIATION: A B-47 Stratojet from the 341st Bombardment Wing experiences a serious inflight explosion, prompting the pilot and navigator to eject successfully. However, co-pilot James E. Obenauf notices that a fourth crew member is unconscious and unable to egress, so he fights to keep the weaving bomber under control and makes a safe landing at Dyess Air Force Base, Texas. Obenauf wins a Distinguished Flying Cross for his heroism.

May 1

AVIATION: Sensors onboard the *Explorer I* satellite reveal the existence of an intense radioactive band around the Earth at an altitude of between 600 to 8,000 miles above ground level. It is christened the Van Allen Radiation Belt in honor of the scientist who designed the sensors, Dr. James Van Allen.

MARINES: In the Mediterranean, the 2nd Battalion, 2nd Marines and helicopters of HMR(L)-262 deploy with the Sixth Fleet as its landing force.

POLITICS: The Coast Guard intercepts four antinuclear protestors as they depart Honolulu for testing grounds at Eniwetok in the Pacific.

May 7

AVIATION: A Lockheed F-104 Starfighter flown by Major Howard Johnson reaches a record altitude of 91,249 feet, quite a feat for an air-breathing aircraft.

May 12

AVIATION: At Colorado Springs, Colorado, the new North American Air Defense Command (NORAD) is commissioned for the purpose of protecting the United States and Canada from Communist missile and bomber attacks. It is jointly staffed by American and Canadian personnel.

DIPLOMACY: The United States and Canada agree to jointly man the North American Defense Command (NORAD) for their mutual defense against Soviet bombers and missiles.

NAVAL: The Defense Department doubles the size of the U.S. Sixth Fleet in the Mediterranean.

May 13

MARINES: A naval task force containing the 1st Battalion, 6th Marines and Marine Air Groups 26 and 35 deploy off Venezuela during riots occasioned by the state visit of Vice President Richard M. Nixon.

May 14

MARINES: Mounting political instability in Lebanon necessitates that the 1st Battalion, 8th Marines be withheld on the Sixth Fleet to reinforce the newly arriving 2nd Battalion, 2nd Marines.

May 16

AVIATION: Captain Walter W. Irwin sets a new jet speed record of 1,404.2 miles per hour while flying his Lockheed F-104 Starfighter over Edwards Air Force Base, California.

May 24

AVIATION: The Bell X-14 vertical flight research plane makes its debut and transitions from vertical liftoff to horizontal flight in 30 seconds. It is also the only open-cockpit X-plane and is eventually transferred to NASA.

- At Holoman Air Force Base, New Mexico, Captain E. L. Breeding is strapped to a rocket sled and accelerated up to 83 “Gs” without injury.

May 27

AVIATION: At St. Louis, Missouri, the McDonnell-Douglas XF4H-1 prototype flies for the first time; it eventually enters service as the Phantom II, a legendary fighter plane.

- At Eglin Air Force Base, Florida, the 335th Tactical Fighter Squadron begins deploying the first Republic F-105B Thunderchiefs.

May 28

NAVAL: The new guided-missile cruiser *Galveston* is commissioned, being the first vessel equipped with Talos anti-aircraft missiles.

- Off Pearl Harbor, Hawaii, the destroyer escort *Silverstein* collides with the submarine *Stickleback* once the latter loses power and hurriedly surfaces. It gradually sinks but the crew is saved.

May 30

MILITARY: Ceremonies are conducted at the Tomb of the Unknown Soldier at Arlington National Ceremony, Virginia, for soldiers killed in World War II and Korea.

June 3

AVIATION: It is revealed that the forthcoming X-15 hypersonic research aircraft will employ an inertial guidance system, similar to those used in ballistic missiles, to control its pitch attitude while reentering the atmosphere.

June 4

AVIATION: At Cape Canaveral, Florida, a Thor intermediate-range ballistic missile is launched for the first time from a tactical launcher.

June 8

AVIATION: An army helicopter makes a forced emergency landing in East Germany and its nine-man crew is taken into custody.

June 16

AVIATION: The air force contracts with Martin to build its new Dyna-Soar boost-glide orbital spacecraft while Boeing becomes a major parts subcontractor.

June 27

AVIATION: Air force pilot Colonel Harry Burrell establishes a world speed record by flying from New York to London in only five hours and 27 minutes in a Boeing KC-135 tanker jet. His average speed is 630.2 miles per hour.

- An air force Fairchild C-119 Flying Boxcar accidentally strays into Armenian airspace while on a routine mission to Iran, and it is shot down by Soviet fighters; the crew of nine survives and is repatriated.
- At Cape Canaveral, Florida. The 556th Strategic Missile Squadron fires off its first Snark intercontinental cruise missile.

NAVAL: At Annapolis, Maryland, Rear Admiral Charles L. Melson gains appointment as superintendent of the U.S. Naval Academy.

MARINES: In Cuba, a group of marines and sailors are kidnaped by revolutionaries under Raúl Castro, brother of rebel leader Fidel Castro; all are released on July 18.

June 30

AVIATION: Space flight has become such a research priority that NACA declares that fully 50 percent of its efforts are taken up by missiles and other forms of space vehicles.

July 1

NAVAL: Submarine Squadron 14 becomes the navy's first Fleet Ballistic Missile Submarine Squadron, which forms an important part of America's nuclear deterrence during the cold war.

July 9

AVIATION: At Cape Canaveral, Florida, a mouse is launched in the nose cone of a Thor-Able reentry test vehicle, which flies 6,000 miles downrange and lands near the Ascension Islands.

July 12

MARINES: At Camp Pendleton, California, 1,500 marines of the 1st Marine Division are deployed in that state's Cleveland National Forest to fight forest fires.

July 14

DIPLOMACY: In Beirut, Lebanon, President Camille Chamoun appeals to the United States for assistance to combat rising Syrian interference and prevent a possible civil war between Lebanese Christians and Muslims. Accordingly, President Dwight D. Eisenhower orders several marine battalions in the Mediterranean to land and assist.

July 14–15

AVIATION: Operation Blue Bat unfolds as the Tactical Air Command (TAC) transports 2,000 army troops from West Germany to Beirut, Lebanon, at the behest of the president there.

July 15–18

MARINES: The Sixth Fleet under Admiral James J. Holloway, Jr., disembarks marines from the 2nd, 6th, and 8th Regiments at various control points along the Lebanese coast.

July 19

DIPLOMACY: Nine captured members of an American helicopter crew are released to the International Red Cross by the East German government.

MILITARY: In Lebanon, Task Force 201, consisting of the 187th Battle Group, 24th Infantry Division, lands in support of marines conducting Operation Blue Bat to prevent an outbreak of civil war there.

July 26

AVIATION: Over Edwards Air Force Base, California, Captain Iven C. Kincheloe dies when his F-104 Starfighter crashes in the desert.

August 1

AVIATION: Over Johnson Island in the Pacific, the air force launches and detonates a nuclear-armed anti-ICBM missile to test its capacity for destroying incoming enemy missiles.

August 2

AVIATION: For the first time, the air force launches an Atlas missile with a full-power profile for both its sustainer and its booster rocket engines.

August 3

NAVAL: The nuclear submarine *Nautilus* under Commander William R. Anderson makes the first submerged crossing of the North Pole under 50-foot thick sheets of ice over a period of 96 hours. It becomes the first vessel of any kind to reach the North Pole.

August 6

AVIATION: The Rocketdyne Division of North American contracts with the air force to develop a rocket engine with one-million pounds of thrust.

MILITARY: President Dwight D. Eisenhower signs the Defense Reorganization Act that gives the secretary of defense more administrative control over the Departments of the Army, Navy, and Air Force.

August 11

NAVAL: At the North Pole, the nuclear-powered submarine *Skate* under Commander James F. Calvert is the first vessel of its kind to surface and break the ice with its conning tower. It then submerges and resurfaces on August 17.

August 13

MILITARY: A force of U.S. Marines is withdrawn from Lebanon following the restoration of stability.

August 14

MARINES: In the wake of peaceful elections and declining tensions, the 2nd Battalion, 2nd Marines is ordered to embark back to the Sixth Fleet.

August 19

AVIATION: In Washington, D.C., Dr. T. Keith Glennan gains appointment as the first head of the National Aeronautics and Space Agency (NASA)

- The Lockheed XP3V-1 makes its maiden flight; it enters into service as the P-3 Orion patrol plane and it is still in service today.
- At the Naval Ordnance Test Station, China Lake, California, a Tartar surface-to-air missile successfully tracks and destroys an F6F Target drone.

August 21

AVIATION: In Washington, D.C., the venerable National Advisory Committee for Aeronautics (NACA) holds its final meeting before being incorporated into NASA. Retired general James H. Doolittle presides over the ceremonies.

August 23

AVIATION: In Washington, D.C., Congress creates the new Federal Aviation Administration (FAA) charged with establishing civilian and military air control procedures, as well as locating airports and missile sites. Retired U.S. Air Force general Elwood Quesada is appointed its first president.

NAVAL: Once Communist Chinese forces begin bombarding the Nationalist-held islands of Matsu and Quemoy off its coast, President Dwight D. Eisenhower orders the Seventh Fleet to begin shuttling supplies to the 100,000-man garrison there. All six carriers are present in the waters surrounding Taiwan as a deterrent to attack.

MARINES: In Scotland, revelers at the annual Edinburgh Tattoo are serenaded by music from the Marine Corps Drum and Bugle Corps, the Marine Corps Recruit Depot Parris Island Band, and a ceremonial troop.

August 25

AVIATION: Navy commander Forrest S. Petersen flies the rocket-powered X-15 high-speed research aircraft for the first time. Currently, he is the only naval aviator working for the National Aeronautics and Space Administration (NASA).

August 28

AVIATION: At Cape Canaveral, Florida, an Atlas intercontinental ballistic missile is launched, which flies accurately for 3,000 miles down range under the influence of its radio-command guidance system.

September 2

AVIATION: An air force C-130C Hercules electronic intelligence-gathering (ELINT) aircraft is shot down by Soviet MiG-17s after it strays into Armenian airspace near Yerevan, killing the crew of 17.

MARINES: At Camp Pendleton, California, units of the 1st, 5th, and 7th Marines, and Marine Air Groups 33 and 36 participate in amphibious exercise PHIBLEX 2-59, which keeps them occupied through September 14.

September 3–9

AVIATION: Recent Chinese threats made against Taiwan result in Operation Xray Tango, during which by a composite force of F-100 Super Sabres, F-101 Voodoos, B-57 Canberras, and C-130 Hercules aircraft are readily deployed there by the Tactical Air Command (TAC). The swift and competent transfer of all these aircraft over a short period of time results in a Mackay Trophy.

September 8

AVIATION: During the latest crisis between Communist China and Taiwan, wherein the latter begins an artillery barrage of the Nationalist-held islands of Quemoy and Matsu, Marine Air Group 11 (MAG-11) deploys from Japan to Taiwan to bolster nationalist air defenses.

September 9

AVIATION: A Boeing EB-50 airplane launches a Lockheed X-7 pilotless ramjet aircraft that reaches Mach 4 in level flight.

September 10

MARINES: North of Beirut, Lebanon, a small detachment of marines and army troops in boats and helicopters conducts a joint amphibious exercise.

September 15

AVIATION: An F8U Crusader flown by Lieutenant William P. Lawrence hits speeds of 1,200 miles per hour in level flight; he becomes the first naval aviator to fly twice the speed of sound.

September 16

AVIATION: The North American NA-246 jet transport prototype performs its maiden flight; it enters the service as the T-39 Sabreliner for purposes of transport, cargo carrying, and radar training.

September 19

AVIATION: The Kaman twin-rotor H-43A Huskie helicopter flies for the first time. The air force acquires 18 as firefighting and crash recovery machines with the Tactical Air Command. In light of their side-by-side intermeshing rotors, they acquire the name "Eggbeaters."

September 22

NAVAL: The nuclear-powered submarine *Skate* sets a new underwater endurance record by remaining submerged for 31 days while circumnavigating the polar ice cap.

September 24

AVIATION: In Washington, D.C., the National Aeronautics and Space Administration (NASA) holds its first senior staff meeting.

- At Cape Canaveral, Florida, a Bomarc missile is fired at an incoming target drone flying at 48,000 feet and 1,000 miles per hour. The Bomarc, remotely controlled from Kingston, New York, successfully destroys the target 75 miles away over the Atlantic.

October 1

AVIATION: In Washington, D.C., the National Aeronautics and Space Administration (NASA) officially begins tackling the thorny problems associated with manned spaceflight and nonmilitary scientific space projects.

October 6

NAVAL: The nuclear-powered submarine *Seawolf* sets an endurance record by operating while submerged for 60 days.

October 11–13

AVIATION: The air force launches the *Pioneer I* lunar probe vehicle, which rises to an altitude of 80,000 miles before falling back to Earth.

October 13

AVIATION: Aircraft belonging to VMF-212 and 214 fly the entire 4,800 miles from Hawaii to Japan without incident. This is the first squadron strength transpacific flight by either navy or marine fighters.

October 18

MARINES: The American deployment in Lebanon ends once the 2nd Battalion, 6th Marines and its headquarters embark on Sixth Fleet vessels offshore.

October 24

AVIATION: At Nicara, Cuba, the transport *Kliensmith* evacuates 56 American citizens fleeing Fidel Castro's revolution, now drawing to a successful conclusion.

October 25

MILITARY: The last remaining American forces are withdrawn from Lebanese soil.

October 26

AVIATION: At Travis Air Force Base, California, the new Boeing B-52G model performs its maiden flight. This particular version is also designed to carry two AGM-28 Hound Dog nuclear-tipped missiles under its wings.

November 1

AVIATION: The Kaman H-43B performs its maiden flight; the air force acquires several hundred of these useful craft and deploys them around the world.

November 8

AVIATION: At Cape Canaveral, the air force tries and fails to launch a lunar probe for the third time. In this instance, the third stage of the rocket fails to ignite and *Pioneer 2* falls back into the atmosphere and burns up. Given pressing priorities in other missile-related fields, the air force abandons moon shots.

November 10

AVIATION: At Norfolk, Virginia, the carrier *Boxer* hosts the first marine aviation detachment permanently assigned to a navy vessel. It is there to supply and service marine helicopters operating from the flight deck.

November 28

AVIATION: The air force launches an operational Atlas missile that flies 6,300 miles down range and lands near its assigned target.

December 2

MARINES: Near Malibu, California, 650 men of the 2nd Infantry Training Regiment deploy to combat forest fires.

December 3

AVIATION: In Washington, D.C., President Dwight D. Eisenhower directs that the Jet Propulsion Laboratory (JPL) in Pasadena, California, be transferred to the National Aeronautics and Space Administration (NASA).

December 6

MARINES: Near Pungo Lake, North Carolina, a party of marines from the 3rd Battalion, 6th Marines is tapped to fight a forest fire.

December 12

AVIATION: In Washington, D.C., the secretary of the navy cancels the Regulus II missile program in light of more capable Polaris missiles then under development. Like its predecessor, the Regulus II can be launched only from a submarine while it is surfaced.

December 14

MARINES: Near San Juan Capistrano, California, 700 marines of the 2nd Infantry Training Regiment are assigned to combat forest fires.

December 16

AVIATION: At the new Pacific Missile Test Range, California, Air Force technicians test-fire a Thor missile. Simultaneously, another Thor missile is launched from Cape Canaveral, Florida.

- A Douglas C-133 Cargomaster of the Military Air Transport Service (MATS) sets an official payload record by hauling 117,900 pounds up to 10,000 feet.

December 18–19

AVIATION: Project Score unfolds as an Atlas rocket carries the first communications satellite into low Earth orbit; the following day a taped message from President Dwight D. Eisenhower sending the nation Christmas greetings is broadcast around the world. Ike's is the first human voice to come from space.

December 23

AVIATION: At Cape Canaveral, Florida, the Atlas-C missile is successfully tested for the first time.

1959**January**

MILITARY: In light of President Dwight D. Eisenhower's emphasis on nuclear weapons, the army is allowed to decline in strength to 861,964 officers and men in 16 divisions, the lowest it has been since before the outbreak of the Korean War.

January 1

DIPLOMACY: In Cuba, the government of dictator Fulgencio Batista is driven from power by rebels under Fidel Castro; for the time being, naval and marine facilities at Guantánamo Bay are placed on alert.

MARINES: The Marine Corps overhauls its enlisted rank structure as follows: private, private first class, lance corporal, corporal, sergeant, staff sergeant, gunnery sergeant, and first or master sergeant. The last two ranks are reserved for technical specialists while first sergeant and sergeant major remain leadership positions.

January 4

AVIATION: In California, both Vandenberg Air Force Base and the Pacific Missile Range are declared operational for testing purposes.

January 10

AVIATION: In Yuma, Arizona, Vincent Air Force Base is transferred to the Marine Corps and serves as an auxiliary airfield for El Toro, California.

January 15

AVIATION: The integration of missile and bomber units begins after the Strategic Air Command (SAC) orders the 703rd and 706th Strategic Missile Wings transferred from the 1st Missile Division to the Fifteenth Air Force.

January 21

AVIATION: An army Jupiter intermediate-range ballistic missile (IRMB) successfully reaches its designated target 1,700 miles downrange. It eventually becomes an air force weapon.

February

NAVAL: The navy declares its intention to scrap 43 obsolete warships, including the pre-World War II battleships and Pearl Harbor survivors *California*, *Colorado*, *Maryland*, and *Tennessee*.

February 1

AVIATION: Across the Canadian Arctic, the United States formally transfers control of the Distant Early Warning (DEW) Line over to the Royal Canadian Air Force.

February 6

AVIATION: The air force successfully tests the Titan I intercontinental ballistic missile for the first time. This is a two-stage, liquid-fueled rocket with a range of 5,500 miles and among the largest weapons of its class. It is stored in underground silos and has to be raised to the surface in order to be launched.

February 12

AVIATION: With the retirement of the last B-36 Peacekeeper, the Strategic Air Command (SAC) becomes an all-jet deterrent force.

MARINES: On Vieques Island, Puerto Rico, the Marine Corps training base is named in honor of PFC Fernando Luis Garcia, a Medal of Honor recipient.

February 17

AVIATION: In Cambridge, Massachusetts, Dr. J. Allen Hynek of the Smithsonian Astrophysical Observatory declares that the air force should take an active and objective role during all UFO investigations.

February 19

AVIATION: At Holloman Air Force Base, New Mexico, a two-stage rocket sled reaches 3,090 miles per hour, four times the speed of sound.

February 28

AVIATION: At Vandenberg Air Force Base, California, a Thor-Hustler rocket system successfully hoists the *Discoverer 1* satellite into a polar orbit for the first time. This trajectory allows a satellite to cover the entire planet due to the Earth's rotation.

March 10

AVIATION: A B-29 carries the first X-15 hypersonic research airplane aloft during its first captive flight. Test pilot A. Scott Crossfield makes several instrument check flights in preparation for a real test drop.

March 11

AVIATION: The Sikorsky XHSS-2 antisubmarine helicopter successfully performs its maiden flight; it enters service as the Sea King.

March 17

MARINES: At Camp Pendleton, California, the 1st Battalion, 1st Marines embarks on a one-year tour of duty on Okinawa as part of the 3rd Marine Division. This pilot program gradually rotates several battalions to that island over the next few years.

April 2

AVIATION: From a field of 110 applicants, the National Aeronautics and Space Administration selects seven astronauts for its ambitious Mercury program.

April 5

MILITARY: The Naval Research Laboratory reports a 300 percent increase in radioactive air samples over the East Coast of the United States, signifying that the Soviet Union has been conducting above-ground nuclear tests.

April 6

AVIATION: The seven Project Mercury astronauts chosen by NASA are introduced to the public for the first time amidst national celebration: Alan B. Shepard (Navy), Virgil I. Grissom (Air Force), John H. Glenn (Marines), Malcolm Scott Carpenter (Navy), Walter M. Schirra (Navy), L. Gordon Cooper (Air Force), and Donald K. Slayton (Air Force).

- The Northrop YT-38 prototype performs its maiden flight; it enters service as the T-38 Talon jet trainer, which is still in service today.

April 13

SCIENCE: The military research satellite *Discoverer 2* is launched into orbit from Vandenberg Air Force Base, California.

April 18

MARINES: Off the South Korean coast, the 3rd Marines, Marine Air Group 12 (MAG-12) and the Korean Marine Corps conduct an amphibious training exercise that lasts through May 9.

April 20

AVIATION: At Cape Canaveral, Florida, the prototype Polaris submarine-launched ballistic missile makes a successful maiden flight.

April 23

AVIATION: Over the Atlantic Missile Range, Eglin Air Force Base, Florida, the GAM-77 Hound Dog supersonic, air-to-surface nuclear-tipped missile is launched from a B-52 bomber for the first time.

April 25

AVIATION: Attack Squadron VA-16 deploys on the carrier *Lexington*, being the first navy squadron equipped with Bullpup air-to-ground missiles.

April 27

AVIATION: NACA, which was founded in 1915, published its 44th and final annual report to Congress. The historical sections are written by James H. Doolittle and Jerome C. Hunsaker, previously heads of that agency.

April 28

AVIATION: Douglas Aircraft contracts with the National Aeronautics and Space Administration (NASA) to design and build a three-stage, Thor-Vanguard type rocket called the Delta.

May 1

AVIATION: At Woomera, Australia, the Smithsonian Optical Tracking Station successfully photographs the *Vanguard 1* satellite at a range of 2,500 miles above the Earth's surface.

May 4

AVIATION: Two Marine A-4 Skyhawk jets fly nonstop from Argentia, Newfoundland, to Rota, Spain, a total of 2,270 miles, for the first time.

May 6

AVIATION: The air force declares its Jupiter intermediate-range ballistic missile operational. On a recent test flight, one Jupiter landed near its assigned target 1,500 miles downrange.

May 8

MARINES: In Camden County, North Carolina, men from the 8th Marines are utilized to put out forest fires.

May 12

AVIATION: At Andrews Air Force Base, Maryland, the 1298th Air Transport Squadron accepts delivery of three Boeing VC-137a executive transports (Model 707s).

- A Thor missile is launched, which carries a GE Mark 2 nose cone that photographs the Earth from a range of 300 miles.

May 15

AVIATION: Air Research and Development Center commander general Bernard A. Schriever displays the first reentry vehicle recovered from an intercontinental missile flight.

May 18

MARINES: At Camp Pendleton, California, the 1st Marine Expeditionary Force, consisting of the 1st Marine Division and the 3rd Marine Air Wing (3rd MAW) undergo amphibious maneuvers.

- In British North Borneo, the 89th Marines, Marine Air Group 16 (MAG-16), and helicopters of HMR(L)-362 conduct amphibious exercises.

May 19

MARINES: In light of tensions arising from Communist threats to blockade the city of Berlin, the 1st Battalion, 2nd Infantry and helicopters of HMR(L)-262 are alerted for possible deployment there; they are ordered to stand down on June 4.

May 22

CIVIL: Benjamin O. Davis, Jr., becomes the first African-American major general in the U.S. Air Force.

May 25

AVIATION: The first Convair F-106 Delta Daggers are delivered to the Air Defense Command, where they serve 30 years. They gradually replace the F-102 Delta Darts already in service.

May 28

AVIATION: Two monkeys named Able and Miss Baker are placed in the nose cone of a Jupiter rocket, launched to an altitude of 300 miles, then parachuted back into the ocean and recovered. The medical data recovered helps advance the state of human space travel.

June 1

MARINES: In South Vietnam, the Vietnamese Marine Corps adds a third battalion to its organization, which now boasts 3,000 men.

June 2

MARINES: The 2nd Battalion, 6th Marines departs Morehead City, North Carolina, for the newly opened St. Lawrence Seaway and Great Lakes region, where it will perform amphibious landings for public viewing.

June 3

AVIATION: At Colorado Springs, Colorado, the Air Force Academy graduates its first class of 207 cadets as newly commissioned officers.

June 8

AVIATION: Over the Mohave Desert, a B-52 carrier aircraft releases the X-15 hypersonic research airplane on its first nonpowered flight. Test pilot A. Scott Crossfield guides the craft from 38,000 feet to a successful landing. This exceptional aircraft is designed to operate along the edge of space at 4,000 miles per hour.

NAVAL: In Washington, D.C., William B. Franke gains appointment as the 55th secretary of the navy.

June 9

NAVAL: The nuclear-powered submarine *George Washington* is launched at Groton, Connecticut, being the first submarine to carry nuclear-tipped Polaris ballistic missiles.

**Davis, Benjamin O. (1912–2002)***Air Force general*

Benjamin Oliver Davis, Jr., was born in Washington, D.C., the son of Lieutenant Benjamin O. Davis, Sr., an African-American army officer. Raised in a military environment, he acquired leadership traits from his father and graduated from the nearly all-white Central High School in Cleveland, Ohio, as president of his class. Davis subsequently attended Case Western University and the University of Chicago, but he found the lure of military service irresistible. In 1932 he gained appointment to the U.S. Military Academy, West Point, and graduated four years later 35th in his class of 276. However, options for African Americans in the military proved limited and Davis was completely shut out from flying, his main interest. He subsequently taught military science at the famous Tuskegee Institute, Alabama, until 1940, when political pressure forced the Army Air Force to accept minority pilots. Davis passed through the flying program established at Tuskegee,

commanding the first class, and gained his wings in March 1942. He then rose to lieutenant colonel of the all-black 99th Pursuit Squadron, but high-level discrimination kept them out of combat. It was not until April 1943 that Davis and his men were deployed to North Africa, and they fought well there, in Italy, and in the Balkans. The following year Davis rose to colonel commanding the all-black 322nd Fighter Group, the famous “Red tails,” which he led competently through 60 missions. So adept were his pilots at performing escort missions that, in two years of combat, the 322nd lost fewer bombers to German aircraft than any fighter group. After the war Davis repaired back to Godman Field, Kentucky, where he commanded the racially troubled 477th Composite Group, and he succeeded in calming the tense situation due to his evenhandedness and leadership abilities.

In 1947 the new U.S. Air Force was born and the following year President

June 16

AVIATION: Over the Sea of Japan near Korea, a Martin P4M Mercator from VQ-1 is attacked and damaged by a pair of MiG fighters; it is forced to make an emergency landing in Japan.

June 19

AVIATION: At Naval Air Station Lakehurst, New Jersey, the ZPG-3W, the world's largest nonrigid airship, is delivered to the navy.

June 20

MARINES: At Gufo di Bomba, Libya, the 3rd Battalion, 2nd Marines train with British Royal Marine Commandos during week-long landing exercises.

June 23

AVIATION: In Tullahoma, Tennessee, the Arnold Engineering Development Center accepts operational and design requirements for a large space test facility to test weapons in space.

Harry S. Truman, bowing to the inevitable, ordered all branches of the military completely desegregated. Davis, for his part, attended the Air War College in 1949 and served in the Pentagon as deputy of operations in the Fighter Branch. In 1954 he made history by becoming the U.S. Air Force's first black brigadier general, and, in 1959, he rose to become the first African-American major general in that service. By 1965 he had risen to become the first black lieutenant general of any service. He concluded his lengthy career as deputy commander of the U.S. Strike Force at McDill Air Force Base, Florida. Davis retired from active duty in 1970 and then held several high-ranking posts within the government, including assistant secretary of the Transportation Department. However, owing to bitter memories of discrimination he encountered at West Point, Davis did not return to that institution until 1987, over 50 years after his graduation. He also published his memoirs in 1991 and, in 1998, he became the first African American to hold

General Benjamin O. Davis, Jr. (U.S. Air Force)

the honorary rank of general. Davis, a consummate military leader, died in Arlington, Virginia, on July 4, 2002.

July 1

AVIATION: At Jackass Flats, Nevada, the *Kiwi I*, the first experimental nuclear reactor designed for space flight, undergoes initial testing.

MILITARY: In Washington, D.C., Vice Chief of Staff Lyman L. Lemnitzer replaces outgoing General Maxwell Taylor as the 21st army chief of staff.

July 8

MILITARY: In a foretaste of things to come, Vietcong rockets kill U.S. Army advisers Major Dale Buis and Master Sergeant Chester Ovnard at Bienhoa, South Vietnam.

July 11

AVIATION: At Pensacola, Florida, shortages in the number of military pilots being commissioned forces the Marine Corps to resume its participation in the aviation cadet program there.

July 13

MARINES: The 1st Reconnaissance Battalion is ordered to undertake a 175-mile foot march from Death Valley, California, to Mount Whitney. In sum, they have to traverse the lowest point in the United States to the highest.

July 24

AVIATION: In the waters off Antigua, a Thor rocket nose cone is recovered with film coverage of the inflight nose-cone separation.

July 30

AVIATION: The Northrop Y5-5A, a light-weight fighter based on the T-38 Talon, flies for the first time and even breaks the speed barrier. It is subsequently redesignated the F-5 Freedom Fighter.

MARINES: In North Carolina, the 3rd Battalion, 8th Marines, VMA-225, and helicopters of HMR(L)-262 depart to serve with the Sixth Fleet as its Mediterranean landing force.

August 7

AVIATION: A pair of F-100 Super Sabres become the first jet fighters to fly over the North Pole.

- In space, the *Explorer 6* satellite transmits the first televised images back to Earth, along with an intercontinental message relayed from Major Robert G. Mathis, U.S. Air Force.

August 24

AVIATION: During the flight of an Atlas C rocket, cameras in its nose cone photograph one-sixth of the Earth's surface from an altitude of 700 miles. The nose cone is subsequently recovered and demonstrates that space photography has military reconnaissance potential.

August 28

MARINES: Sergeant Major Francis D. Bauber becomes the second sergeant major of the Marine Corps.

August 29

AVIATION: In California, the Lockheed Aircraft Company signs onto Project Oxcart to design and develop a high-speed, high-altitude photo-reconnaissance aircraft. Such a machine will be managed for the Central Intelligence Agency (CIA) by the U.S. Air Force. This is the origin of the Lockheed SR-71 Blackbird.

September 1

AVIATION: At Vandenberg Air Force Base, California, the Strategic Air Command assumes control of all Atlas intercontinental ballistic missile (ICBM) operations.

September 2

AVIATION: In Washington, D.C., noted scientist Theodor von Kármán is tasked with heading an international committee that will help create an International Academy on Astronautics.

September 5

MARINES: On Okinawa, the 3rd Marine Expeditionary Force, consisting of the 9th Marines and Marine Air Group 16 (MAG-16), sails to join the Seventh Fleet as its first landing force in the western Pacific.

September 9

AVIATION: At Vandenberg Air Force Base, California, the air force test-fires an Atlas missile, which flies 4,300 miles downrange at a speed of 16,000 miles per hour. Consequently, the Atlas weapon system is declared to be operational by General Thomas S. Power.

September 17

AVIATION: The X-15 hypersonic research aircraft makes its first powered drop from a B-52 bomber with A. Scott Crossfield at the controls. In this initial flight, Crossfield reaches Mach 2.11 at an altitude of 53,000 feet.

September 21

NAVAL: The submarine *Barbero*, equipped with nuclear-capable Regulus I missiles, makes the cold war's first deterrent patrol in the North Pacific.

October 1

MEDICAL: At Brooks, Air Force Base, Texas, the U.S. Air Force Aerospace Medical Center is activated to consolidate a number of similar aerospace facilities.

October 2

AVIATION: General Donald N. Yates, currently commander of the Air Force Missile Test Center, becomes the Department of Defense representative for NASA's Project Mercury.

October 6

AVIATION: At Cape Canaveral, Florida, the air force launches an Atlas and Thor missile to their full flight range in this latest test.

NAVAL: At Nagoya, Japan, the carrier *Kearsarge* provides medicine and disaster relief to survivors of a recent typhoon. Ultimately, 6,000 people are evacuated from the city while 200,000 pounds of medicine and food are transferred ashore.

October 13

AVIATION: A B-47 bomber launches an air-launched ballistic missile dubbed Bold Orion, which reaches an altitude of 160 miles.

October 16

MILITARY: Former general George C. Marshall, a major architect of victory in World War II, dies at Walter Reed Army Hospital, Maryland.

October 28–December 19

AVIATION: The Air Force Thunderbirds conduct a precision flying demonstration throughout the Far East. Their goodwill tour culminates in receipt of a Mackay Trophy.

October 31

AVIATION: An Atlas intercontinental ballistic missile, armed with a nuclear warhead, becomes the first such weapon placed on military alert status. It is now fully armed and capable of delivering its warhead to distant targets.

November 2

MARINES: In Alaska, the 1st Battalion, 9th Marines, Company H, 2nd Battalion, 9th Marines, and the 1st Force Reconnaissance Company engage in winter exercises that last through December.

November 3

AVIATION: A Douglas C-133 Cargomaster lifts an Atlas missile to its designated silo. This large aircraft had been expressly designed for that purpose.

November 5

MARINES: In California, 200 men of the 5th Marines are tapped to help fight fires in the Cleveland National Forest.

November 7

AVIATION: The air force places the *Discovery VII* satellite in a polar orbit but, unfortunately, its camera capsule cannot be recovered for examination.

November 10

NAVAL: The nuclear submarine *Triton*, which is also the world's largest submersible, is launched at Groton, Connecticut.

November 16

AVIATION: Captain Joseph W. Kittinger is carried aloft to 76,400 feet by the balloon *Excelsior I*, then he jumps and makes a record parachute fall.

MILITARY: President Dwight D. Eisenhower places a defense budget request for \$41 billion and declares there would be no immediate reductions in U.S. troop strengths abroad.

November 17

AVIATION: In Washington, D.C., all satellite and space vehicle programs are transferred from the Advanced Research Projects Agency (ARPA) to the military service enjoying "primary interest" in each. For the air force, they assume control of Projects Discoverer, Midas, and Samos.

November 20

MARINES: Camp Pendleton, California, deploys 300 marines to fight fires in the Las Pulgas and Alysso Canyons.

- In North Carolina, the 4th Provisional Marine Force departs Camp Lejeune for deployment in Cuba during a period of rising tensions with the regime of Fidel Castro.

November 30

MARINES: The first element of marines from Camp Lejeune, North Carolina, deploys at Guantánamo, Cuba, to bolster local defenses there.

December 1

DIPLOMACY: By the Antarctic Treaty, the United States, Soviet Union, and 10 other nations agree not to conduct any kind of military activity near the South Pole.

NAVAL: In Washington, D.C., the Bureau of Naval Weapons is created by merging the Bureau of Aeronautics with the Bureau of Ordnance.

December 2

MILITARY: In Washington, D.C., Thomas S. Gates gains appointment as the seventh secretary of defense.

December 3–7

AVIATION: FJ-4 Fury flown by pilots of Marine Air Group 13 (MAG-13) fly nonstop from Hawaii to California. This is the first such flight by single-engine naval fighters.

December 6

AVIATION: A McDonnell-Douglas F4H-1 Phantom II jet piloted by Commander Larry E. Flint zooms upward to 98,560 feet, breaking no less than 12 speed, altitude, and time-to-climb marks.

December 8

AVIATION: In Washington, D.C., Major General Don R. Ostrander departs the Advanced Research Projects Agency (ARPA) and becomes head of the Office of Launch Vehicle Programs for the National Aeronautics and Space Administration (NASA).

December 9

AVIATION: A Kaman H-43B helicopter reaches a new rotary-wing altitude record of 29,846 feet.

- Over Akron, Ohio, a Goodyear balloon equipped with a radar camera reaches 100,000 feet in altitude, takes a picture, then safely descends.

December 11

AVIATION: The balloon *Excelsior 2* flies to 74,400 feet, at which point Captain Joseph Kittinger jumps and freefalls for 55,000 feet—another record.

- Brigadier General J. H. Moore, piloting a Republic F-105B Thunderchief, reaches a speed of 1,216.5 miles per hour over a 100-kilometer course.

December 14

AVIATION: Over Edwards Air Force Base, an F-104C piloted by Captain Joseph B. Jordan flies to a record 103,389 feet, the first time that an air-breathing machine has exceeded the 100,000-foot mark.

December 15

AVIATION: At Edwards Air Force Base, California, Major Joseph W. Rogers sets an absolute speed record by flying a Convair F-106A Delta Dart at an average speed of 1,525.95 miles per hour.

December 30

NAVAL: The *George Washington*, the first nuclear-powered, ballistic missile submarine in the world, is commissioned at Groton, Connecticut. Hereafter, nuclear-powered ballistic missile submarines form an important part of America's nuclear-armed "Triad," along with strategic jet bombers and intercontinental ballistic missiles (ICBMs).

December 31

MARINES: In Washington, D.C., Lieutenant General David M. Shoup is appointed the 22nd commandant of the Marine Corps. In 1943 Shoup received a Medal of Honor for bravery at Tarawa.

- Ongoing cuts in Marine Corps manpower levels have reduced the number of battalions available from 27 to 21.

1960**January**

MILITARY: Army strength levels off at 873,078 but the number of active divisions declines to 15.

- Former U.S. Army chief of staff general Maxwell Taylor strongly critiques American military policy in his book *Uncertain Trumpet*. He criticizes America's growing overreliance on nuclear weapons and argues for a more conventional, "flexible response."

NAVAL: During Project Nekton this month, Lieutenant Don Walsh and civilian Jacques Piccard take the bathyscaph *Trieste* to depths of 35,800 feet off the coast of Mauritania.

January 2

MARINES: On Okinawa, the Marine Corps Air Facility Futema is commissioned and begins operations.

January 20

MARINES: At Bridgeport, California, 1st Battalion, 5th Marines commences SNOWFLEX II-60 at the Cold Weather Training Center, which lasts until February 11.

January 21

AVIATION: Off Wallops Island, Virginia, helicopters of Marine Air Group 21 (MAG-21) help recover a Mercury space capsule from an early unmanned test flight.

January 25

AVIATION: At the White Sands Missile Range, New Mexico, an army Hawk missile successfully downs an Honest John ballistic missile for the first time. The Hawk is specifically designed to down low-flying aircraft.

January 30

AVIATION: The Central Intelligence Agency (CIA) orders 12 of Lockheed's super-secret A-12 jets for high-speed, high-altitude reconnaissance work. Funding for this "Black" project is immediately approved.

MARINES: At Vieques, Puerto Rico, the 8th Provisional Marine Brigade tests new aerial/amphibious delivery techniques with helicopters from the carrier *Boxer*.

February 3

MARINES: In Washington, D.C., Commandant David M. Shoup declares that, due to the success of the four-year enlistment program, it is possible to reactivate two of the recently disbanded infantry battalions.

February 9

AVIATION: At Bedford, Massachusetts, the air force initiates the National Space Surveillance Control Center (SPACETRACK) to keep an eye on the mounting number of man-made objects circling the planet.

February 10–12

AVIATION: In light of rising tensions with the Castro regime, fighter craft from VMF-122 and 312 are deployed at Naval Air Station Leeward Point, Cuba.

February 17

SCIENCE: The Defense Department conducts a feasibility study on the possible use of underground seismic stations to detect underground nuclear testing.

February 23

MILITARY: Missouri senator Stuart A. Symington declares that the American people are being misled by the present administration and that a profound “missile gap” exists between the United States and the Soviet Union, favoring the latter.

February 24

AVIATION: At Cape Canaveral, a Titan intercontinental ballistic missile flies down-range for 5,000 miles, its longest flight thus far.

February 25

AVIATION: A collision between a navy R6D Liftmaster and a Brazilian airliner over Rio de Janeiro takes the lives of 35 sailors and 26 Brazilians; three sailors survive.

- At the White Sands Missile Range, New Mexico, the Army successfully test launches its new Pershing tactical ballistic missile, which is solid fuel-propelled, nuclear capable, and designed to replace the earlier Redstone.

March 1

AVIATION: At Beaufort, South Carolina, the auxiliary air station is upgraded to a Marine Corps Air Station.

MARINES: At Port Lyautey, Morocco, marines are utilized to provide relief to earthquake victims at Agadir.

March 4

MARINES: The army chief of staff presents Commandant David M. Shoup with a new M14 automatic rifle, which will replace the famous M1 Garand from World War II.

March 7–April 10

MARINES: Off Taiwan, the 3rd Marine Division, 1st Marine Brigade, 1st Marine Air Wing (1st MAW), the Seventh Fleet all perform large-scale military exercises with the Nationalist Chinese Navy and Marine Corps. This involves the first helicopter lift of Nationalist troops and the first construction of a Short Expeditionary Landing Field (SELF).

March 14–30

MARINES: At Twenty-Nine Palms, California, the bulk of the 5th Marines begins a 150-mile training march through the desert.

April 1

AVIATION: At Cape Canaveral, a Thor-Able rocket lifts TIROS 1, the first American weather satellite, into orbit. Equipped with a television and an infrared detection system, it takes 22,952 images of Earth’s cloud formations during the course of over 1,300 orbits.

April 13

AVIATION: At Cape Canaveral, Florida, the navy launches *Transit 1B*, its first navigational satellite.

April 14

NAVAL: A Polaris missile, destined to carry nuclear warheads while onboard submarines, is successfully test-fired off San Clemente Island, California.

April 19

AVIATION: The Grumman YA2F-1 makes its successful maiden flight; it enters service as the A-6 Intruder all-weather bomber.

April 20

MILITARY: The new M-60 Patton tank, sporting a large 105mm cannon, enters production and begins replacing the earlier M-48 tank. Continually modified, it will see front-line service over the next 30 years.

May 1

AVIATION: A Lockheed U-2 reconnaissance aircraft piloted by Captain Gary Francis Powers is shot down by an SA-2 missile over Sverdlovsk in the Soviet Union. Ironically, the radar proximity fuse employed by the Soviet missile had been designed by the United States during World War II and supplied to the Soviets by the Rosenberg spy ring.

May 2

AVIATION: At Twenty-Nine Palms, California, the marines activate the 1st Light Antiaircraft Missile Battalion (LAAM) as part of the Fleet Marine Force. This is also the first marine unit to employ Hawk (homing all the way killer) missiles.

May 5

DIPLOMACY: The South Vietnamese government requests that the United States double the current number of military advisers to 685 and the Americans comply.

May 6

NAVAL: In the San Nicholas Channel off Cuba, the submarine *Sea Poacher* is fired upon by the Cuban cutter *Oriente*.

May 9

DIPLOMACY: The Eisenhower administration declares an end to all U-2 overflights such as the one recently downed by the Soviets over Russia.

May 10

NAVAL: The nuclear-powered *Triton* under Commander Edward L. Beach, then the world's largest submarine, completes the first undersea transit around the world by covering 41,419 miles in only 84 days. The vessel subsequently receives a Presidential Unit Citation.

May 19

AVIATION: The X-15 hypersonic research aircraft, piloted by Major Robert M. White, reaches an altitude of 107,000 feet.

May 20

AVIATION: The military potential of intercontinental ballistic missiles is underscored when an Atlas missile launched from Cape Canaveral, Florida, reaches an apogee of 1,000 miles and splashes down off the tip of Africa, 9,000 miles distant.

May 23

AVIATION: Operation Amigos unfolds as air force transports begin a massive relief effort for earthquake victims in Chile. Over the ensuing month, over 1,000 tons of supplies are carried across 4,500 miles to their destination.

May 24

MILITARY: A top-secret *Midas 2* satellite weighing 5,000 pounds is launched from Cape Canaveral, Florida, to serve as an early warning system against Soviet missile attacks. It is the first to contain infrared detection sensors.

June 6

MARINES: Off the South Korean coast, the 9th Provisional Marine Brigade engages in amphibious exercises, which includes a 4,600-men airborne assault conveyed by helicopters.

June 10

DIPLOMACY: In Tokyo, a stone-throwing band of ultranationalists forces Ambassador Douglas MacArthur II to escape on a marine helicopter.

MARINES: In the Caribbean, the 2nd Marine Expeditionary Brigade (including battalions from the 2nd, 6th, and 8th Marines), VFM-225, and the Provisional Marine Air Group 30 begin an extensive series of training exercises.

June 22

NAVAL: At Annapolis, Maryland, Rear Admiral John F. Davidson gains appointment as the 41st superintendent of the U.S. Naval Academy.

June 25

AVIATION: The Aerospace Corporation is established by the air force, which is a nonprofit civilian group to oversee engineering, research, and development of projects related to missile and space programs.

June 28

AVIATION: In Washington, D.C., the late rocket pioneer Dr. Robert W. Goddard receives a posthumous Langley Medal from the Smithsonian Institution.

June 30

MARINES: The Department of the Pacific headquarters and the Marine Barracks at the Naval Ammunition Depot, Bremerton, Washington, are both deactivated.

- At this date, Marine Corps manpower totals 16,203 officers and 145,418 enlisted men.

July 1

AVIATION: At Norfolk, Virginia, Fleet Marine Force Atlantic consolidates both its headquarters and Air headquarters in the same building, at considerable savings to the corps.

- Soviet MiG-17 jet fighters shoot down an unarmed American ERB-47H aircraft in international airspace over the Barents Sea, killing four crew members and capturing two. The survivors are released on January 25, 1961.

July 8

AVIATION: At Jackass Flats, Nevada, the second part of Project Rover commences as the second experimental reactor, *Kiwi-A Prime*, is tested at full power as a possible nuclear rocket motor.

- When civil and ethnic unrest results in rioting throughout the Democratic Republic of the Congo, Operation New Tape commences to evacuate American citizens and foreign nationals from the trouble zone. The operation lasts four years and also flies in UN peacekeepers.

July 9

MARINES: Company L, 3rd Battalion, 2nd Marines and helicopters from HMR(L)-261 are dispatched from the carrier *Wasp* to serve as UN peacekeepers in newly independent Congo.

July 11

DIPLOMACY: The Soviet Union claims that the American RB-47 it shot down in international airspace was actually flying in Soviet airspace.

July 14

AVIATION: Over 100 C-130 and C-124 transport aircraft conduct Operation Safari, which airlifts some 38,000 UN peacekeepers at various places on the African continent.

July 17

AVIATION: To test the effect of prolonged cosmic ray exposure on living organisms, an NASA balloon goes aloft to 130,000 while carrying 12 live mice. They remain subject to such exposure for 12 hours, then return safely.

July 19

NAVAL: Off Long Beach, California, the destroyers *Ammen* and *Collett* collide during maneuvers; the former is beyond repair and loses 11 dead and 20 injured. The former is so heavily damaged that it is scrapped.

July 20

NAVAL: Off Cape Canaveral, Florida, the fleet ballistic missile submarine *George Washington* successfully test-fires two Polaris A-1 missiles, which fly downrange for 1,150 miles. This is also the first test launch from a submerged vessel.

August 1

AVIATION: At Carswell Air Force Base, Texas, the 43rd Bombardment Wing accepts delivery of its first Convair B-58 Hustler. This delta-wing giant is also the first strategic bomber capable of sustained supersonic flight and is capable of being refueled in midflight.

August 4

AVIATION: Civilian test pilot Joseph A. Walker flies the experimental X-15 rocket plane to a record speed of 2,196 miles per hour.

August 10–11

NAVAL: Navy frogmen recover a 300-pound payload from outer space, which had been ejected from orbit by the *Discoverer XIII* military reconnaissance satellite. This is the first object from space to be retrieved; however, it could not be retrieved by helicopter as planned for it fell outside its designated landing zone.

August 12

AVIATION: A North American X-15 hypersonic research plane is piloted to a record 136,500 feet by Major Robert White.

August 13

MARINES: In Washington, D.C., Commandant David M. Shoup reveals plans to reactivate the rest of the six battalions that were demobilized due to budget cuts in 1959.

August 14

MARINES: On Okinawa, the 2nd Battalion, 5th Marines, embarks with the amphibious assault ships to serve as the landing force of the Seventh Fleet. Plans are enacted to continually rotate battalions in this capacity to hone their proficiencies.

August 15

MARINES: In light of increasing tensions with the Castro regime in Cuba, the 8th Marine Expeditionary Force (3rd Battalion, 8th Marines, VMA-331, VMF-122, HMR(L)-261, and HMR(M)-461 arrives in the Caribbean in the event of hostilities.

August 16

AVIATION: The *Excelsior III* balloon carries Captain Joseph W. Kittinger, Jr., to an altitude of 102,800 feet, whereupon he makes a record-breaking jump of 17 miles in free fall and reaches a speed of 614 miles per hour during the next four minutes and 17 seconds. Kittinger fell 84,700 feet, which remains the highest parachute jump on record.

August 18

AVIATION: At Vandenberg Air Force Base, California, the air force launches the satellite *Discovery XIV* into a polar orbit.

August 19

AVIATION: Off Honolulu, Hawaii, a Fairchild C-119 Flying Boxcar flown by Captain Harold F. Mitchell successfully snares a 300-pound KH-1 Corona 13 capsule in midair for the first time; the item had been ejected from space by the *Discoverer XIV* reconnaissance satellite. Consequently the 6593rd Test Squadron (Special) wins the Mackay Trophy.

- In Moscow, Soviet Union, U-2 pilot Francis Gary Powers is sentenced by a State Court to 10 years of “deprivation of freedom.”

August 22–24

MARINES: At Twenty-Nine Palms, California, Operation Charger is conducted by 13 ground units and 9 squadrons from the reserves, along with the 1st Marine Division, force troops, and the 1st Marine Air Wing (1st MAW). This is also the largest reserve exercise ever held.

August 26

AVIATION: Construction of the world’s largest radar begins at Arecibo, Puerto Rico, under air force supervision. This device is capable of sending signals out as far as Venus, Mars, and Jupiter.

August 30

AVIATION: At F. E. Warren Air Force Base, Wyoming, the 564th Strategic Missile Squadron becomes the first fully operational ICBM unit; it boasts a strength of six nuclear-tipped Atlas missiles.

September 5

AVIATION: A McDonnell Douglas F4H Phantom II jet flown by Lieutenant Colonel Thomas H. Miller blazes a new world speed air record of 1,218.78 miles per hour.

F-4 Phantom (U.S. Air Force)

September 10

AVIATION: All commercial air operations cease for six hours as NORAD conducts Operation Sky Shield, which entails military aircraft flying defensive maneuvers across the entire United States.

NAVAL: The navy commissions the *Charles F. Adams*, the first guided-missile destroyer designed that way from the “keel up.” It is also the first of 23 such 4,500-ton warships in its class.

September 11

MARINES: At Quantico, Virginia, the Marine Corps Museum is officially opened.

- Camp Lejeune, North Carolina, is heavily damaged by Hurricane Donna and sustains \$500,000 in damages.

September 14

AVIATION: Jets of VMF-122 take up stations at Roosevelt Roads, Puerto Rico, while supporting the 8th Marine Expeditionary Unit. They remain in place until June 1961.

September 15

AVIATION: At Brooks Air Force Base, Texas, U.S. Air Force captain W. D. Habluetzel and Lieutenant J. S. Hargreaves undergo a simulated moon flight by remaining in a space cabin simulator over the next 30 days. The test is conducted by the School for Aviation Medicine located on the base.

September 17

NAVAL: The new helicopter carrier *Iwo Jima* is launched; this is the first vessel designed to operate helicopters from the keel up. Moreover, it can carry up to 2,000 marines and an entire squadron of helicopters to convey them ashore.

September 21

AVIATION: The first nuclear-capable F-105D Thunderchiefs are deployed by the Tactical Air Command at Nellis Air Force Base, Nevada.

October 1

AVIATION: At Thule, Greenland, the first Ballistic Missile Early Warning System (BMEWS) becomes operational. This station is to provide the Strategic Air Command (SAC) with sufficient warning of an enemy attack for it to get its jet bombers off the ground.

MILITARY: In Washington, D.C., General George Decker is appointed the 22nd army chief of staff, replacing outgoing General Lynam L. Lemnitzer, who is advancing to chairman, Joint Chiefs of Staff.

October 6

MARINES: Tours of Fleet Marine Force units in the Far East are reduced from 15 months to 13.

October 12

AVIATION: Over El Centro, California, an air force C-130 parachutes a record 41,470 pounds of heavy equipment airdrop.

MARINES: On Okinawa, the 1st Force Reconnaissance Company begins the rotation process through that island.

October 21

AVIATION: The Grumman W2F-1 prototype flies successfully for the first time; it enters the service as the E-2 Hawkeye, which is still employed today.

November 1

DIPLOMACY: In London, England, Prime Minister Harold Macmillan declares his government's intention to allow Polaris submarines to berth at Holy Loch, Scotland.

November 12

AVIATION: At Vandenberg Air Force Base, California, the launch of the *Discovery XVII* satellite employs a restartable rocket motor for the first time.

November 14

AVIATION: A capsule ejected from the *Discovery 17* satellite is successfully retrieved in midair by a C-119 Flying Boxcar. The capsule carries a letter from General Thomas D. White, U.S. Air Force chief of staff, to the secretary of defense.

November 15

NAVAL: At Charleston, South Carolina, the nuclear-powered ballistic submarine *George Washington* departs on its first deterrence cruise. It is armed with 16 Polaris A-1 nuclear-tipped missiles, each with a range of 1,200 miles.

MARINES: At Camp Lejeune, North Carolina, the 24th Expeditionary Unit is activated; it consists of an infantry battalion, a light helicopter squadron, and an attack squadron.

November 19

NAVAL: At the Brooklyn Navy Yard, New York, a fire breaks out onboard the carrier *Constellation*. The vessel sustains \$75 million in damages while 50 workers are killed and 150 are injured.

November 23

AVIATION: A Thor-Delta rocket launches the *TIROS II* weather satellite; this is also the 14th successful launch of a U.S. space vehicle for 1960.

November 30

MARINES: Company G, 2nd Battalion, 6th Marine and helicopters of HMR(L)-264 are dispatched to Africa on a goodwill tour.

December 1

AVIATION: The Jet Propulsion Laboratory (JPL) in Pasadena, California, receives a detailed scale map of the lunar landing site selected by the National Aeronautics and Space Administration.

December 3

AVIATION: During a nighttime refueling exercise at Vandenberg Air Force Base, California, a Titan missile explodes in its silo.

December 10

AVIATION: A C-119 Flying Boxcar piloted by Captain Gene Jones snares a capsule ejected from the *Discovery XVIII* satellite at an altitude of 14,000 feet. This carried sample human tissues onboard to check the effects of space radiation.

December 13

AVIATION: Over Edwards Air Force Base, California, a North American A3-J Vigilante jet bomber piloted by navy commander Leroy A. Heath achieves a new altitude record of 91,540.8 feet.

December 14

AVIATION: A B-52 Stratofortress from the 5th Strategic Bombardment Wing, Travis Air Force Base, Texas, flies 10,079 miles in 19 hours and 44 minutes, establishing a new, unrefueled distance record for jet aircraft.

December 15

MARINES: By adopting the new Landing Party Manual, the Marine Corps abolishes the World War II-era, eight-man squad as a basic tactical unit.

December 16

AVIATION: At Vandenberg Air Force Base, California, an Atlas-D missile mounting A Mark 3 reentry nose cone flies 4,384 miles downrange to Eniwetok. This is also the first missile fired by the Strategic Air Command (SAC).

December 19

AVIATION: At Cape Canaveral, Florida, a Redstone rocket booster is launched carrying an unmanned space capsule as part of Project Mercury. The capsule flies 235 miles downrange at 4,200 miles per hour and reaches an altitude of 135 miles. After splashdown in the ocean by parachute, it is quickly recovered by helicopters.

December 20

POLITICS: In Hanoi, North Vietnam, Ho Chi Minh organizes the National Liberation Front of South Vietnam, or Viet Cong. Its purpose is to drive out all foreign military advisers and overthrow the current South Vietnamese regime.

December 22

MILITARY: A Polaris intermediate-range ballistic missile (IRBM) is successfully launched by the nuclear ballistic submarine *Robert E. Lee*.

December 23

AVIATION: The first Chance Vought F8U-2N Crusaders in Marine Corps service are handed over to VMF-334.

1961

January

MILITARY: Only four months in office, U.S. Army chief of staff general George Decker confronts rising concerns about Southeast Asia as a Communist insurgency in Laos mounts. At this time there are also 800 military personnel serving in South Vietnam as part of the Military Assistance Advisory Group (MAAG).

January 1

MARINES: In Okinawa, the 3rd Marine Division imposes a new designation system for the units that are constantly rotating through it. Now, newly arrived units must adopt the designation of the unit they replace, which, critics claim, undercuts traditional, identified unit histories.

January 3

DIPLOMACY: In Washington, D.C., President Dwight D. Eisenhower formally severs diplomatic ties with the Communist regime of Fidel Castro in Cuba. He also warns that American facilities at Guantánamo Bay will be defended by force, if need be.

January 12

NAVY: In Washington, D.C., President Dwight D. Eisenhower submits a proposal for fiscal year 1962 for a U.S. Navy of 817 ships and 625,000 personnel, and a three air wing, three division Marine Corps of 175,000 men.

January 13

AVIATION: Major H. J. Deutschendorf flies a B-58 Hustler through six world speed records; it averages 1,200.2 miles per hour while carrying a 4,408 payload.

January 18

MARINES: Bertha L. Peters is the first female marine to reach the esteemed rank of sergeant major.

January 20

MILITARY: President John F. Kennedy appoints Robert S. McNamara to be the eighth secretary of defense.

NAVAL: In Washington, D.C., John B. Connally, Jr., gains appointment as the 56th secretary of the navy.

MARINES: In Orange County, California, a force of 400 marines from Camp Pendleton arrive to help put out brush fires.

- At Matadi, Congo, a famine relief force is helicoptered in from the landing ship LSD-34.

January 22

AVIATION: The air force selects the new Titan II rocket to launch the Dyna-Soar project into space.

January 24

MILITARY: In Washington, D.C., Elvis J. Stahr is appointed the sixth secretary of the army.

January 28

MILITARY: Newly inaugurated President John F. Kennedy approves a \$28.4 million “counterinsurgency” plan to thwart growing Communist infiltration and sabotage in South Vietnam. The funds will be used to increase the size of the Army of the Republic of South Vietnam (ARVN) to 170,000 men.

January 31

AVIATION: In the Mediterranean, VMA-225, the first marine squadron equipped with Douglas A4D-2N Skyhawks, joins the Sixth Fleet onboard the carrier *Shangri-La*.

- At Holoman Air Base, New Mexico, an Army Redstone rocket booster launches a chimpanzee named Ham into orbit while inside a Mercury space capsule. The test proves that the capsule’s life support systems work and Ham endures the 18-minute, 420-mile ride without ill effects.
- At Cape Canaveral, Florida, the new LGM-130 Minuteman, a three-stage, solid-propellant missile, is successfully launched and flies downrange 4,600 miles to its target area. Missiles of this sort are intended to replace the more dangerous, liquid-fuel variety.
- At Point Arguello, California, an Atlas-Agena rocket places the 4,100-pound *Samos II* photographic satellite into orbit.

MARINES: By this date, active duty women marines total 124 officers and 1,486 enlisted.

February 1

AVIATION: At Matadi, Congo, helicopters of HMR(L)-264 evacuate UN peacekeepers to the safety of the *Hermitage* offshore. They are subsequently landed at Conakry, Guinea, a week later.

- At Cape Canaveral, Florida, a Minuteman I intercontinental ballistic missile (ICBM) is launched for the first time under its own internal guidance. The vehicle travels downrange for 4,600 miles and hits its designated target area.
- At Thule, Greenland, the ballistic missile early warning system is declared operational by the North American Air Defense Command. It is designed to detect a Soviet missile attack and give the United States ample time to respond militarily.

MILITARY: In Washington, D.C., President John F. Kennedy revokes restrictions on the number of dependents that can accompany military personnel overseas.

February 3

AVIATION: The ambitious Looking Glass program is initiated by the Strategic Air Command (SAC). This entails EC-135 aircraft, specially outfitted with communication equipment, to act as airborne command posts 24 hours a day. While aloft they are in constant touch with the Joint Chiefs of Staff, SAC air bases, and any SAC aircraft. This program is designed to lessen the impact of a surprise Soviet missile strike upon air force command centers.

February 6

AVIATION: At Vieques Island, Puerto Rico, a F4D-1 Skyray piloted by Lieutenant Colonel W. D. Patterson lands on the Short Expeditionary Landing Field (SELF) for the first time.

February 13

AVIATION: An F-100 Super Sabre fires a GAM-83B Bullpup missile for the first time. This is an adaptation of the navy weapon of the same name and it can be either fitted with a nuclear warhead or guided by the pilot through use of a miniature joystick.

March 1

AVIATION: Lockheed GV-1 Hercules tanker aircraft are delivered to Marine Corps VMR-352, which is the first inflight refueling squadron in that service.

MARINES: Headquarters Marine Corps adds the Marine Corps Emergency Actions Center to its G-3 division.

March 6

AVIATION: At Wichita, Kansas, the first B-52H bomber flies. This version is unique in mounting eight turbo-fan engines and is capable of firing GAM-87A Skybolt nuclear missiles.

March 7

AVIATION: An X-15 hypersonic research aircraft piloted by Major Robert M. White reaches 2,905 miles per hour and White is the first human being to fly faster than Mach 4.

- The GAM-72A Quail diversionary missile is authorized for use on B-52 bombers by the Strategic Air Command (SAC). This device makes a false radar impression of the size of a B-52 bomber to confuse Soviet ground defenses.

March 17

AVIATION: At Randolph Air Force Base, Texas, the Training Air Command accepts deliveries of the first Northrop T-38 Talon supersonic jet trainers.

April

MILITARY: To thwart potential Communist gains, the Military Assistance Advisory Group–Laos (MAAG–Laos) is formed under Lieutenant Colonel Arthur D. Simons. This consists of 430 soldiers divided into 48 mobile “White Star” training teams.

April 1

AVIATION: In a reorganization move, the Air Materiel Command is designated the Air Force Logistics Command while the Air Research and Development Command is redesignated the Air Force Systems Command.

April 3

MARINES: In Southern California, Operation Greenlight involves 50,000 personnel, 150 vessels, and 300 U.S. Navy and Marine Corps aircraft. The maneuver runs through June 8.

April 12

AVIATION: In a second shock to the American scientific community after the launch of *Sputnik*, the Soviets successfully launch Yuri Gagarin into space and

return him safely to Earth. Public and political pressure begins building to launch an American into space.

April 14

AVIATION: At Hurlburt Field, Florida, the 4400th Combat Crew Training Squadron becomes the air force's first special operations unit since the Korean War.

MARINES: In Borneo, the 5th Marine Expeditionary Brigade (9th Marines and helicopters of HMR(L)-162) conducts a SEATO exercise through May 4.

April 17

AVIATION: At Vernalis, California, a constant-altitude balloon is launched, which remains in place for nine days at 70,000 feet while carrying a 49-pound payload.

April 17–20

AVIATION: During the ill-fated Bay of Pigs invasion launched by President John F. Kennedy against the Communist regime of Fidel Castro, six jets from the carrier *Essex* are launched to protect a force of CIA-flown B-26 light bombers. However, the B-26s arrive over their target before the escort does, and two are downed by Cuban aircraft.

MARINES: During fighting associated with the Bay of Pigs invasion, facilities at Guantánamo Bay are placed on heightened alert.

April 18

MARINES: In North Carolina, Company F, 2nd Battalion, 2nd Marines, and helicopters of HMR(L)-262 are dispatched to Africa on a goodwill tour entitled Operation Solant Amity II.

April 19

AVIATION: In closing phases of the Bay of Pigs "invasion," four Alabama Air National Guard crewmen are killed when two B-26s are downed while conducting special operations.

April 21

AVIATION: An X-15 hypersonic research plane flown by Captain Robert M. White reaches 3,074 miles per hour at 105,000 feet; he is the first pilot to exceed 3,000 miles per hour.

April 26–29

MILITARY: In Washington, D.C., Deputy Secretary of Defense Roswell L. Gilpatric promulgates a scheme to send 3,200 military advisers and 400 Special Forces into Laos to thwart a growing Communist insurgency instigated by North Vietnam. He does so at a time when President John F. Kennedy and the National Security Council ponder how to handle what they view as deliberate Communist aggression.

April 27–30

MARINES: At Porto Scudo, Sardinia, the 16th Marine Expeditionary Brigade is involved in an amphibious exercise.

April 29

NAVAL: At Camden, New Jersey, the *Kitty Hawk*, the first missile-armed aircraft carrier, is commissioned.

May

MARINES: In Washington, D.C., the Headquarters Marine Corps Reorganization Board is appointed by Commandant Shoup and includes Lieutenant General Robert H. Pepper, Major General Alpha M. Bowser, and Colonel Norman Anderson. They are to report their findings and recommendations by August 1.

- In Vietnam, the On the Job Training (OJT) program is begun by the Marine Corps, which rotates 20 junior officers and senior NCOs to Southeast Asia to observe ongoing counterinsurgency operations.

May 2

AVIATION: A B-58 Hustler named *Fire Fly* makes a record transatlantic flight between New York and Paris, France, in three hours and 56 minutes.

May 3

AVIATION: At Vandenberg Air Force Base, California, a Titan I missile is launched aboveground from a “hard silo” lift launcher for the first time.

May 3–5

MARINES: At Zambales Beach, Luzon, Philippines, the 2nd Battalion, 12th Marines engages in live-fire artillery exercises.

May 4

AVIATION: Over the Gulf of Mexico, Project Stratolab unfolds as navy commander Malcolm D. Ross and marine lieutenant commander Victor A. Prather set a new balloon altitude record by climbing to 113,740 feet. Prather, unfortunately, drowns when he falls from the recovery helicopter.

May 5

AVIATION: At Cape Canaveral, Florida, navy commander Alan B. Shepard, Jr., is the first American to complete a 15-minute suborbital flight of 300 miles down-range at a height of 116.5 miles in a Mercury capsule named *Freedom 7*. He and his craft are secured in the ocean by a helicopter from HMR(L)-262, which transports them to the carrier *Lake Champlain*.

MILITARY: In Washington, D.C., President John F. Kennedy begins pondering the use of American forces to help South Vietnam counter a rising Communist insurgency.

May 11

MILITARY: In Washington, D.C., National Security Action Memorandum No. 52 is issued by President John F. Kennedy to explore ways of increasing the army’s counterinsurgency abilities. He also authorizes deployment of 400 Special Forces to Laos, with a further 100 military advisers sent to South Vietnam. This is the beginning of a military and political quagmire that no one could have anticipated.

May 15

MARINES: Off Southeast Asia, the Seventh Fleet is bolstered by the arrival of the 3rd Battalion, 9th Battalion and helicopters of HMR (L)-162, which serve as its landing force.

May 20

MARINES: At Marmaris, Turkey, the 3rd Battalion, 6th Marines and helicopters of HMR (L)-262 provide relief and medical assistance to earthquake victims.

May 25

MARINES: In Washington, D.C., President John F. Kennedy seeks funding from Congress to enlarge the Marine Corps from 175,000 men to 190,000.

May 26

AVIATION: A Convair B-58 Hustler supersonic bomber under Major William R. Payne of the 43rd Bombardment Wing makes a record flight of only three hours and 19 minutes from New York City to Paris, France. This flight, made to commemorate the 34th anniversary of Charles A. Lindbergh's transatlantic crossing, earns the crew a Mackay Trophy.

June 1

AVIATION: At Kincheloe Air Force Base, Michigan, the air force activates its first Bomarc-B pilotless interceptor base.

June 3

AVIATION: At Paris, France, the B-58 Hustler named *Fire Fly* stalls and crashes during an air show, killing its crew of three.

June 9

AVIATION: The Military Air Transport Service (MATS) accepts delivery of its first Boeing C-135 Stratolifter, marking the modernization of the piston-driven transport fleet with jet aircraft.

MILITARY: President Ngo Dinh Diem requests military assistance from President John F. Kennedy to increase his army by an additional 100,000 men to 275,000. Kennedy only consents to fund an additional 30,000-man build up, but he also holds back on sending the necessary advisers to train them.

June 12

MARINES: In Washington, D.C., President John F. Kennedy orders that the U.S. flag be flown 24 hours a day at the Marine Corps Memorial in Arlington, Virginia.

- Off Southeast Asia, the 1st Battalion, 3rd Marines joins the Seventh Fleet to act as its special landing force.

June 15

MARINES: In the Caribbean, the 8th Marine Expeditionary Force (1st Battalion, 8th Marines, Marine Air Group 20, VMA-242, and helicopters of HMR(L)-262 are deployed on standby alert. Until August 1, they practice counterinsurgency and riot control exercises.

June 23

AVIATION: An X-15 hypersonic research aircraft flown by Major Robert M. White reaches 3,603 miles per hour; White is the first man to exceed Mach 5 in level flight.

June 30

AVIATION: In Washington, D.C., General Curtis E. LeMay gains appointment as the chief of staff, U.S. Air Force.

MARINES: At this juncture, marine manpower levels are 16,132 officers and 160,777 enlisted men.

July

AVIATION: In a sign of growing competence and confidence, the Strategic Air Command (SAC) places 50 percent of all its airborne nuclear assets on 15-minute ground-launch alert.

July 1

AVIATION: The North American Defense Command initiates a cataloging effort to log all man-made space objects with a specially designed tracking system.

- The Air Force Communications Service (AFCS) begins maintenance of communications and air traffic control at U.S. Air Force installations across the globe.

July 3

GENERAL: Aging and ailing, former general Douglas MacArthur pays a final visit to his beloved Philippines, receiving an affectionate welcome by an estimated 2 million Filipinos.

July 8

MILITARY: In light of a possible confrontation with the Soviet Union over Berlin, President John F. Kennedy orders a complete reappraisal of American military strength.

July 15

AVIATION: A *Midas 3* satellite is launched onboard an Agena Rocket with a restartable second stage, which boosts it into a polar orbit nearly 1,850 miles above the surface.

July 21

SPACE: At Cape Canaveral, Florida, Air Force Captain Virgil I. “Gus” Grissom becomes America’s second man in space by zooming 188 miles in a suborbital flight while commanding the Mercury capsule *Liberty Bell 7*. His flight attains an altitude of 118 miles and speeds of up to 5,310 mile per hour. Grissom consequently wins the first-ever General Thomas D. White USAF Space Trophy for his efforts.

July 25

MILITARY: Determined to display his resolve to the Soviet Union, President John F. Kennedy asks Congress for \$3.5 billion for defense and additional troops for the Reserve.

August

MARINES: An unexpected increase in voluntary enlistments, coupled with a strong response from reservists flocking to the colors, means that the Marine Corps will reach its assign strength of 190,000 men six months earlier than expected.

August 1

AVIATION: In response to the Berlin Wall crisis, five U.S. Air Force Reserve C-124 units and over 15,000 reservists are mobilized for active duty.

- On Okinawa, helicopters of HMR(L)-362 begin a transplacement rotation alongside infantry units.

NAVAL: In Washington, D.C., Admiral George W. Anderson becomes the 16th chief of naval operations.

LeMay, Curtis E. (1906–1990)

Air Force general

Curtis Emerson LeMay was born in Columbus, Ohio, on November 15, 1906, and he attended Ohio State University ROTC after failing to secure an appointment to the U.S. Military Academy. LeMay was commissioned in the artillery on June 14, 1928, but, inspired by the feats of Charles Lindbergh, he volunteered for flight training. LeMay won his wings at March Field, California, in October 1929 and spent six years touring with fighter squadrons. The turning point in his career came in 1937 when he transferred to bombers at Langley Field, Virginia, and demonstrated his prowess as a navigator by intercepting the Italian liner *Rex* at sea in 1938. After the United States entered World War II, LeMay was promoted to colonel commanding the 305th Bombardment Squadron and deployed to England, where he proved himself tactically innovative. In August 1943 he personally led the first shuttle bombing run from England to North Africa and in March 1944, at the age

of 37, he became the youngest major general since Ulysses S. Grant. That summer he transferred to China to command the XX Bomber Command flying new B-29 Superfortresses and commenced the first large raids on the Japanese homeland. When these proved inadequate due to range considerations, LeMay transferred to the XXI Bomber Command on Guam, much closer to his target, and he orchestrated a devastating firebomb campaign against Japanese cities. His low-altitude raid against Tokyo on March 9, 1945, burned out 16 square miles of the city and inflicted over 100,000 casualties. In August 1945 LeMay transferred again to the staff of General Carl A. Spaatz, where he helped plan the final atomic bomb missions over Hiroshima and Nagasaki.

LeMay came home after the war and, as deputy chief of research and development, he helped develop and deploy the first American jet bombers. In 1948 he was called upon to break the Soviet land block-

MARINES: Responding to increasing tension with the Soviet Union, Congress votes to authorize the president to call up 250,000 reservists for up to one year.

August 2

DIPLOMACY: In a major policy decision, President John F. Kennedy declares that the United States will do everything in its power to help South Vietnam in its struggle against communism. This marks the beginning of a doomed 15-year effort.

August 8

AVIATION: At Cape Canaveral, Florida, the Atlas F intercontinental ballistic missile is successfully tested. This weapon is also designed for long-term storage of volatile liquid fuels that can be placed in hardened silos. It also enjoys a significantly shorter launch sequence than earlier models.

ade of Berlin, which he countered with Operation Vittles, the famous Berlin airlift, forcing the Russians to relent. However, his biggest challenge came that same year when he advanced to lead the Strategic Air Command (SAC), which he transformed from a dispirited force with a handful of obsolete bombers to a thoroughly elite atomic strike force of nearly 2,000 jets. By the time he left in 1957 to serve as vice chief of staff, U.S. Air Force, SAC was a modern, well-equipped nuclear deterrent force, second to none. In June 1961 President John F. Kennedy appointed him chief of staff of the U.S. Air Force, although in this office he clashed repeatedly with the missile-oriented defense secretary, Robert MacNamara. He was also vociferous in his support for the unpopular war in Vietnam, and felt that President Lyndon B. Johnson was not doing enough. LeMay then concluded 47 years of distinguished service by resigning in 1965 and, three years later, he ran as the vice presidential candidate with Alabama governor George Wallace.

General Curtis E. LeMay (*Library of Congress*)

He died in San Bernadino, California, on October 1, 1990, the foremost aerial strategist of the cold war years.

August 10

MARINES: Off Southeast Asia, the 2nd Battalion, 3rd Marines and helicopters of HMR(L)-261 join the Seventh Fleet as its landing force.

August 13

DIPLOMACY: In a monumental blunder, Soviet premier Nikita Khrushchev orders a concrete wall constructed between East and West Berlin to cut off a steady stream of refugees fleeing communism. The obstacle, reviled as the "Berlin Wall," becomes symbolic of Soviet political oppression throughout the world.

August 24

AVIATION: Noted aviatrix Jacqueline Cochran flies her Northrop T-38 talon to a new women's speed record of 844.2 miles per hour.

August 26

NAVAL: The landing assault ship *Iwo Jima* is commissioned; it is the first vessel capable of launching marines from landing craft and helicopters.

August 30

AVIATION: Operation Stair Step commences as the first of 216 Air National Guard fighters begin deploying across the Atlantic to bases in Europe.

MARINES: Over Camp Horno, California, 31 marines of the 1st Force Reconnaissance Company make their first nighttime jump from a GV-1 Hercules transport aircraft.

September 6

MARINES: In North Carolina, the 500 marines participating in Operation Solant Amity II return from Africa, having visited 17 ports and covered 30,191 miles.

September 8

AVIATION: Aviatrix Jacqueline Cochran flies her T-38 Talon over a 1,000-kilometer closed speed course at 639.4 miles per hour, a new women's speed record.

September 10

NAVAL: The nuclear-powered cruiser *Long Beach* is commissioned as the only vessel of its class in the world. It is also the first warship armed entirely with missiles.

September 12

MARINES: Victims of Hurricane Carla in Texas and Louisiana are assisted by 400 marines from the 2nd Marine Division and Marine Air Group 26 (MAG-26).

September 13

AVIATION: The new global Mercury tracking network is used to observe the orbit of an unmanned Mercury space capsule for the first time. This successful launch also demonstrates to air force authorities that the Atlas rocket is an ideal vehicle for lifting a man into space.

September 14

MARINES: In North Carolina, Company F, 2nd Battalion, 6th Marines, embarks on Solant Amity II, another African goodwill tour.

September 15

AVIATION: Jacqueline Cochran sets another women's closed course distance record in a T-38 by flying 1,346.5 miles.

September 19

AVIATION: At Eglin Air Force Base, Florida, a Bomarc B pilotless interceptor is launched toward a Regulus II supersonic target drone. The Bomarc, remotely controlled from Gunther Air Force Base, Alabama, executes a 180-degree turn in pursuit of its quarry and destroys it at an altitude of seven miles and 250 miles downrange.

October

MARINES: For the first time, enlisted marines serve as voting members on the board that chooses individuals for promotion to gunnery sergeant.

October 1

AVIATION: The ongoing Berlin Wall crisis results in Operation Stairstep, during which 18,500 members of the Air National Guard are called to active service while several units are deployed to Europe to support the regular air force there.

October 11

AVIATION: An X-15 hypersonic research aircraft flown by Major Robert M. White reaches an altitude of 217,000 feet; White is the first man to exceed the 200,000 foot mark.

October 12

AVIATION: Jacqueline Cochran flies her Northrop T-38 Talon to 56,712 feet, establishing a new women's altitude record.

October 18

AVIATION: An air force Kaman H-43B helicopter reaches a new altitude record of 32,840 feet.

MILITARY: In Saigon, South Vietnam, former U.S. Army chief of staff general Maxwell D. Taylor is assured by President Ngo Dinh Diem that the presence of American military troops is not required. However, he does appeal for continuing military aid and advisers.

October 20

AVIATION: In South Vietnam, an air force RF-101C Voodoo jet aircraft begins flying tactical reconnaissance missions at the behest of the South Vietnamese army.

October 23

AVIATION: In the Atlantic, the fleet ballistic submarine *Ethan Allen* completes the first submerged launching of a new A-2 Polaris missile. This new version features an increased range of 1,500 miles.

November 1

MILITARY: The Central Intelligence Agency (CIA) founds the Civilian Irregular Defense Group (CIDG) to organize indigenous mountain peoples (Montagnards) into anticommunist paramilitary forces. Total authorized strength is 530 men, including many Special Forces.

November 1–3

MILITARY: General Maxwell D. Taylor recommends to President John F. Kennedy that a "U.S. military task force" of 6,000 to 8,000 men be dispatched to South Vietnam to help combat the mounting Communist insurgency there. The president dismisses the project.

November 1–17

MARINES: In British Honduras, marines and helicopters of HMR(L)-264 assist recent victims of Hurricane Hattie.

November 9

AVIATION: An X-15 hypersonic research aircraft flown by Major Robert M. White hits speeds of over 4,000 miles per hour at an altitude of 101,600 feet. Thus,

on the X-15's 45th successful flight, it becomes the first manned craft to reach Mach 6.

- In South Vietnam, an Air Commando detachment called Farm Gate begins cobbling together a fleet of AT-28 Trojans, Douglas C-47s, and B-26 Invaders for the South Vietnamese air force.

November 15

AVIATION: In Saigon, South Vietnam, the 2nd Advanced Echelon, Thirteenth Air Force, is formally activated. The U.S. Air Force is now formally committed to the war in Southeast Asia. Operation Farm Gate also commences as teams from the 4400th Combat Crew Training Squadron deploy with special operations aircraft.

November 16

MILITARY: In Washington, D.C., President John F. Kennedy, after reading a report by General Maxwell D. Taylor, increases the number of military advisers to the Republic of South Vietnam.

November 17

AVIATION: At Cape Canaveral, Florida, a solid-propelled Minuteman missile is launched from a silo for the first time and sails to its target area 3,000 miles downrange.

November 18

MARINES: In the Dominican Republic, a navy task force carrying marines positions itself off the coast in the event of civil strife occasioned by the overthrow of its ruling dictator, General Rafael Trujillo.

November 21

AVIATION: At Cape Canaveral, Florida, the 6555th Aerospace Test Wing launches a Titan ICBM that carries a nose cone used in Nike-Zeus antimissile tests.

November 22

AVIATION: A McDonnell-Douglas F-4 Phantom II jet fighter establishes a new air speed record of 1,606 miles per hour.

- The air force launches an Atlas-Agena B launch booster carrying a highly secret *Samos* reconnaissance satellite.

November 25

NAVAL: At Newport News, Virginia, the nuclear-powered aircraft carrier *Enterprise* is commissioned. It is also the largest warship constructed to date, being 1,123 feet in length and possessing a flight deck covering four and a half acres and a gross weight of 85,320 tons.

November 28

AVIATION: The navy formally approves the antisubmarine rocket system (ASROC), the first of its kind in the world.

November 29

AVIATION: At Cape Canaveral, Florida, a Mercury capsule is launched while carrying two chimpanzees as passengers. They complete two orbits and then return safely to Earth.

November 30

AVIATION: The navy decides to eliminate lighter-than-air craft, which it has employed since the days of World War I.

December 1

AVIATION: At Malmstrom Air Force Base, Montana, the 10th Strategic Missile Squadron becomes the first Minuteman-equipped unit to be activated.

December 5

AVIATION: A McDonnell-Douglas F-4 Phantom II jet sets a new sustained altitude record of 66,443 feet; air force F-102 Delta Darts also intercept a Soviet Tu-16 Badger jet bomber attempting to penetrate Alaskan air space and turn it back.

December 11

AVIATION: The first shipment of 33 Vertol H-21C Shawnee helicopters and 400 crewmen arrives in Saigon, South Vietnam, onboard the transport vessel *Core*. Their mission is to ferry South Vietnamese forces to battle zones; they are also the first American combat troops in Southeast Asia.

December 15

AVIATION: With the completion of the 21st and final control center at Sioux City, Iowa, the North American Air Defense Command (NORAD), the SAGE system, becomes operational.

December 26

MILITARY: Viet Cong capture Army Specialist George Fryett as he rides his bicycle in Saigon, South Vietnam. He is the first American prisoner of the war, although the Communists, perplexed by this foreigner, release him the following June.

December 31

MILITARY: The tally of army casualties in Southeast Asia amounts to 14 killed and wounded.

1962**January**

AVIATION: In Europe, the air force disbands the Skyblazers, its first jet display team, which had been performing before enthralled spectators since 1948.

MILITARY: Presently, there are 3,200 American personnel in South Vietnam of which 2,100 are army troops, which is a fourfold increase from only two months previously.

MARINES: In South Vietnam, Detachment A, 1st Radio Company, Fleet Marine Force, arrives to assist an army communications unit.

January 1

NAVAL: The navy creates the first Sea Air Land (SEAL) teams in response to President John F. Kennedy's penchant for unconventional warfare and counterinsurgency operations. The first cadre are drawn from existing Underwater Demolition Teams (UDT), which were first created during World War II.

MARINES: In South Vietnam, the Vietnamese Marine Corps is enlarged to over 6,000 rank and file.

January 4

NAVAL: In Washington, D.C., Fred Korth gains appointment as the 57th secretary of the navy.

January 7

AVIATION: At Tan Son Nhut Air Base, Saigon, South Vietnam, a detachment of specially equipped Fairchild C-123 Providers deploys to participate in Operation Trail Dust. This ambitious deforestation program is designed to deny Communist units their jungle cover through the spraying of herbicides. The air force contribution to this project, dubbed Ranch Hand, lasts nine years to the day and performs its last mission on January 7, 1971.

January 9

MARINES: At Camp Pendleton, California, the 5th Marines, elements of the 1st Marine Division, and the 3rd Marine Air Group (3rd MAW) rehearse a four-day counterinsurgency exercise. This training appears increasingly relevant, considering the course of events in Southeast Asia.

January 10–11

AVIATION: An air force Boeing B-52H jet bomber flown by Major Clyde P. Evely flies nonstop from Okinawa, Japan, to Madrid, Spain, in 22 hours and 10 minutes, covering 12,532 miles. This is a new record for unrefueled flight distance.

MILITARY: To calm tensions along the Berlin Wall, the American government removes its tanks from that sector of Berlin. The Soviets reciprocate two days later.

January 13

AVIATION: Near Saigon, South Vietnam, air force C-123 Providers begin Ranch Hand operations by spraying deforesting agents along suspected Communist jungle strongholds.

January 15

AVIATION: A force of 18 F4U-2N Crusader jet fighters from VMF-451 crosses the Pacific to Hawaii nonstop while refueling from tanker squadrons VMR-153, 253, and 352. This is also the first mass crossing of the Pacific by an active jet squadron.

January 20

MILITARY: In a major move, men and officers of the Military Advisory and Assistance Group (MAAG) are ordered by the commander in chief, Pacific, to accompany into the field South Vietnamese units they are training. Shortly after, they are authorized by President John F. Kennedy to return fire if attacked.

January 29

AVIATION: At Cape Canaveral, the last of 47 test firings of the Titan I missile occurs; there were only three complete failures.

February 1

AVIATION: Marine helicopter squadrons receive new designations with HMR(L)s becoming medium helicopter squadrons (HMM), HMR(M) squadrons becoming HMMH, while fixed-wing transport and tanker squadrons become aerial refueler transport squadrons (VMGR).

February 2

AVIATION: Over South Vietnam, a C-123 Provider performing defoliant missions crashes into the jungle during a training exercise. Captain Fergus C. Groves, Captain Robert D. Larsen, and Staff Sergeant Milo B. Coghill are the first air force fatalities in Southeast Asia.

February 4

AVIATION: South of Saigon, South Vietnam, Vietcong ground fire brings down the first army H-21C Shawnee helicopter as it ferries ARVN troops into battle. The crew of four is killed; this is also the first helicopter lost in Southeast Asia.

February 5

AVIATION: A Sikorsky SH3A turbine-powered helicopter flown by Marine captain L. K. Keck and Navy lieutenant R. W. Crafton achieves a world speed record of 210.6 miles per hour.

February 8

AVIATION: At Lakehurst, New Jersey, an A-4 Skyhawk jet is launched at only 1,000 feet by the new XRE-1 Catapult (portable catapult). When combined with portable arresting gear, the new Short Afield for Tactical Support (SATS) system will allow aircraft to operate from primitive expeditionary airfields.

MILITARY: In the latest sign of growing American involvement, the new Military Assistance Command, Vietnam (MACV) is created under Major General Paul D. Harkins for funneling advisers and supplies into South Vietnam. This unit complements the preexisting Military Advisory Assistance Group (MAAG), which continues as an independent entity under the commander in chief, Pacific (CINCPAC), for another two years.

February 10

DIPLOMACY: In Berlin, the Soviet Union releases Gary Francis Powers, whose U-2 spy plane was shot down over Russia in May 1960, in return for Soviet spy Rudolf Abel. He served one and a half years of a 10-year sentence.

February 20

AVIATION: Marine Corps lieutenant colonel John H. Glenn, Jr., becomes the first American to successfully orbit the Earth three times in his Mercury capsule named *Friendship 7*. He remains in space for five hours at a speed of 17,400 miles per hour at an altitude of 162 miles before a heat shield malfunction forces him to return early.

March 5

AVIATION: A B-58 Hustler flown by Captain Robert G. Sowers, 43rd Bombardment Wing, makes three speed records while flying round-trip and cross-country from New York to Los Angeles and back in four hours, 41 minutes, 11 seconds at an average speed of 1,044.5 miles per hour. The crew wins both Mackay and Bendix trophies.

March 8

MARINES: Along the Outer Banks, North Carolina, helicopters of HMM-263 render emergency relief assistance after one of the most violent storms to hit the area.

March 15

MILITARY: The first official campaign streamer of the Vietnam conflict, the Vietnam Advisory Campaign, begins today.

March 16

SCIENCE: The 100-foot tall, multiengined Titan 2 ICBM missile is launched and tested for the first time from Cape Canaveral, Florida, and flies downrange as far as Ascension Island in the South Atlantic.

March 21

AVIATION: The high-speed ejection capsule of the B-58 Hustler is tested when a live bear is strapped inside and then shot out at 35,000 feet while traveling at 870 miles per hour. The animal survives the seven-minute parachute descent without harm.

March 22

AVIATION: Reports of unidentified aircraft flying over South Vietnam prompts the deployment of four F-102 Delta Daggers to Tan Son Nhut Air Base, Saigon. The aircraft arrive from their deployment station at Clark Air Base, Philippines.

MILITARY: The Strategic Hamlet program, also known as Operation Sunrise, begins in Binh Dong province, South Vietnam, as American advisers help construct and fortify a new village to deny the Viet Cong access to the local population. However, this forced relocation causes intense resentment as many villagers do not want to move.

March 23

MILITARY: The first battalion-sized American unit to arrive in South Vietnam is the 39th Signal Battalion; it is in charge of all communication and support for the U.S. Army Support Group, Vietnam.

April 3

MILITARY: The Defense Department orders the full racial integration of military reserves and National Guard units.

April 4

AVIATION: A McDonnell Douglas F-4 Phantom II jet sets several time-to-climb records, becoming the first aircraft in history to simultaneously hold world records for high speed, sustained altitude, and climbing speed.

MARINES: Near Jacksonville, North Carolina, around 400 marines are dispatched to assist fire fighters.

April 9

MARINES: At the Soc Trang airstrip, Mekong Delta, South Vietnam, Marine Task Force Unit 79.3.5 (Shufly detachment) are flown in by transport aircraft. Their mission is to assist Vietnamese combat units with helicopter transport.

April 12

MARINES: Amphibious transport vessels of the Seventh Fleet land marines ashore in Thailand to support an independence movement there.

April 14

MARINES: At Onslow Beach, North Carolina, marines participate in LANTPHI-BEX 1-61 while observed by President John F. Kennedy.

April 15

MARINES: At Soc Trang airstrip, Mekong Delta, South Vietnam, helicopters of HMM-362 depart the carrier *Princeton* and deploy ashore to assist Vietnamese combat units.

April 18

AVIATION: At Lowry Air Force Base, Colorado, the Strategic Air Command (SAC) activates the 724th Strategic Missile Squadron, armed with nine nuclear-tipped Titan I missiles. They are also deployed in hardened underground silos designed to survive a Soviet first strike. The unit attains operational alert two days later.

April 19

AVIATION: An experimental Skybolt missile, an early form of cruise missile, is test-fired from a B-52 jet bomber over Cape Canaveral, but it falls short of its intended target.

April 22

AVIATION: Noted aviatrix Jacqueline Cochran flies a Lockheed Jetstar named *Scarlet O'Hara* across the Atlantic. Not only is Cochran the first woman to do so, but she also breaks 68 flight records in the process.

- In Lien Phong Province, Mekong Delta, South Vietnam, a force of 29 helicopters from HMM-362 airlifts a battalion of ARVN soldiers from the 7th Division into combat against the Viet Cong.

April 23

AVIATION: Helicopters of marine HMM-362 provide tactical assault airlift to units of the South Vietnamese marines.

April 26

AVIATION: The prototype Lockheed A-12 high-speed aircraft flies for the first time with company test pilot Lou Schalk at the controls. This aircraft is the precursor of the famous SR-71 Blackbird.

April 27

AVIATION: At Eglin Air Force Base, the Special Air Warfare Center is established.

May 2

MILITARY: The Pentagon and the Central Intelligence Agency agree to form a joint National Reconnaissance Office (NRO) to better manage spy satellite programs.

May 4

AVIATION: The top-secret Lockheed A-12 performs its maiden flight and reaches Mach 1.1 for the first time.

May 6

NAVAL: The nuclear missile submarine *Ethan Allen* successfully conducts a live Polaris missile test, which explodes downrange near Christmas Island. This is the first test of an American ballistic missile armed with a live warhead.

May 9

AVIATION: On the Ca Mau Peninsula, South Vietnam, eight marine helicopters are pot-shot at by Viet Cong small arms fire and damaged.

May 12

MARINES: Alarmed by the recent gains by Communist insurgents in Laos, the State Department authorizes the deployment of 5,000 marines to Thailand to enhance the latter's security.

MEDICAL: In Tuy Hoa, South Vietnam, the first Medevac operation is performed by the 57th Medical Detachment. This is also the first helicopter evacuation unit in the theater. By war's end in 1975, units such as this will have evacuated 900,000 American and allied casualties from a battlefield environment.

May 18

AVIATION: At Udorn Airfield, Thailand, a squadron of 20 A-4 Skyhawks arrives from the Philippines.

MARINES: In response to possible Communist aggression, the 3rd Marine Expeditionary Brigade begins deploying troops in Thailand. The Seventh Fleet also disgorges its landing force (3rd Battalion, 9th Marines and helicopters of HMM-261) at Bangkok.

May 20

MILITARY: In Washington, D.C., Cyrus W. Vance is named secretary of the army.

May 24

AVIATION: Lieutenant Commander Malcolm Scott Carpenter becomes the second American blasted into space and he completes three orbits in his Mercury capsule named *Aurora 7*.

June 16

MILITARY: Two U.S. Army officers, acting as advisers, are killed in a Viet Cong ambush north of Saigon.

June 19

AVIATION: The Dyna-Soar reentry vehicle receives the official designation of X-20. It is destined to be carried aloft by the huge Titan II rocket.

June 26

NAVAL: At Charleston Navy Base, South Carolina, the fleet ballistic submarine *Ethan Allen* conducts the first deterrent cruise while armed with new Polaris A-2 missiles.

June 29

AVIATION: At Cape Canaveral, Florida, the first military crew launches a Minuteman missile from an underground silo. The weapon flies to a target area 2,300 miles away.

- At El Toro, California, VMF(AW)-314 becomes the first marine squadron to receive F4H Phantom II jet fighters.

MARINES: Sergeant Major Thomas J. McHugh becomes the third sergeant major of the Marine Corps.

June 30

MARINES: On the cusp of intervention in Southeast Asia, Marine Corps manpower levels stand at 16,861 officers and 174,101 enlisted men.

July 1

MILITARY: In Washington, D.C., General Orders 58 creates the new Army Intelligence and Security Branch; in 1967 it is redesignated the Military Intelligence Branch.

MARINES: In a major move, the new 4th Marine Division and the 4th Marine Air Wing (4th MAW) are created entirely from reserve components. This is a complete departure from the previous organization, which relied entirely upon battalions and squadrons. Those units newly reestablished include the 23rd, 24th, and 25th Marines, the 14th Marines (artillery), and Marine Air Groups 41, 43, and 46.

- In light of ongoing negotiations in Laos, 1,000 men of the 3rd Marine Expeditionary Brigade depart Thailand and return to vessels of the Seventh Fleet.

July 5

MILITARY: In Washington, D.C., Cyrus R. Vance is sworn in as the seventh secretary of the army.

July 9

AVIATION: Operation Dominic unfolds 248 miles above the Pacific Missile Range as a nuclear-tipped missile, launched from Johnson Island in the Pacific, is detonated 200 miles up in the atmosphere. This is the highest-ever thermonuclear explosion and its electromagnetic pulse is felt at Oahu, Hawaii, 800 miles away.

July 17

AVIATION: An X-15 hypersonic research aircraft piloted by Major Robert M. White sets a new world altitude of 58.7 miles at a speed of 3,748 miles per hour. Having briefly glided through the vacuum of space at 300,000 feet, White also becomes the first test pilot to win astronaut wings in an airplane.

July 18

AVIATION: The growing utility of helicopters as a battlefield weapon is clearly demonstrated today when ARVN troops are airlifted into battle by a fleet of 18 marine, 12 army, and 11 Vietnamese air force helicopters.

July 19

AVIATION: Over the Pacific, a Nike-Zeus antimissile missile launches from Kwajalein Atoll and intercepts an Atlas missile nose cone previously launched from Vandenberg Air Force Base, California. This marks the first time that a missile has been intercepted by a specifically designed antimissile missile.

July 25

AVIATION: The army activates the Utility Tactical Transport Squadron, unique in also being the first armed helicopter unit.

July 27

MARINES: Laos having declared its neutrality, the last of 5,000 marines begins withdrawing from Thailand.

August 1

AVIATION: At Vandenberg Air Force Base, California, the first launch of an Atlas F missile takes place successfully and flies toward its target area in the Marshall Islands some 5,000 miles downrange.

MILITARY: Congress passes a military appropriations bill for \$48.1 billion.

August 7

AVIATION: At Cape Canaveral, Florida, the first A-3 Polaris ballistic missile is launched; this vastly improved version has a range of 2,500 miles.

August 9

AVIATION: At Cape Canaveral, Florida, a demonstration of multiple countdown capability is staged when two Atlas D missiles are launched in quick succession.

August 17

NAVAL: At Seattle, Washington, the navy launches its first experimental, high-speed hydrofoil named the *Long Point*.

August 18

NAVAL: At Annapolis, Maryland, Rear Admiral Charles C. Kirkpatrick gains appointment as the 42nd superintendent of the U.S. Naval Academy.

August 22

NAVAL: The successful rendezvous of two American nuclear submarines beneath the North Pole's ice caps is announced by President John F. Kennedy.

August 31

AVIATION: At Naval Air Station Lakehurst, New Jersey, the navy's last airship makes its final flight before all lighter-than-air operations cease.

September 4

MARINES: The Shufly force and its helicopters (HMM-362 having replaced HMM-163) are deployed at Da Nang, South Vietnam, in the I Corps tactical zone.

September 8–20

NAVAL: The *Raleigh*, the first in a class of amphibious transport docks, is commissioned.

September 14

AVIATION: The National Aeronautics and Space Administration (NASA) reveals the next nine astronauts chosen for the space program. The air force officers are Major Frank Borman, Captain James A. McDivitt, Captain Edward H. White, and Captain Thomas P. Stafford. A civilian NASA pilot among them, Neil A. Armstrong, becomes the first man to walk on the moon in 1969.

September 18

AVIATION: At Edwards Air Force Base, a B-58 Hustler flown by Major Fitzhugh L. Fulton carries an 11,000-pound payload at an altitude of 85,360 feet; this record remains unbroken.

September 21

MILITARY: At Fort Bragg, North Carolina, the 5th Special Force Group, 1st Special Forces, is activated. President John F. Kennedy takes a keen interest in their counterinsurgency capabilities.

September 30–1 October

MILITARY: In Oxford, Mississippi, the Mississippi National Guard is federalized by President John F. Kennedy and sent to restore order after integration-related riots break out at the University of Mississippi.

October 1

MILITARY: In Washington, D.C., General Earle G. Wheeler becomes the 23rd chief of staff of the army.

October 3

AVIATION: At Cape Canaveral, Florida, Commander Walter M. Schirra completes six orbits around the Earth in 10 hours and 46 minutes while piloting his Mercury capsule *Sigma 7*.

October 6

MILITARY: The army removes its last Special Forces White Team from Laos. That nation had declared its neutrality four months earlier.

NAVAL: The navy commissions the *Bainbridge*, the world's first nuclear-powered guided missile frigate.

MARINES: In South Vietnam, the marines sustain their first fatalities when a helicopter of HMM-362 (Shufly force) crashes, killing five marines and two navy corpsmen.

October 12

MILITARY: In a move of iconic significance, President John F. Kennedy approves a request by Brigadier General William P. Yarborough to allow Special Forces to wear green berets as part of their standard uniform.

October 14

AVIATION: In a startling revelation, a U-2 flown by Major Steve Heyser from the 4080th Strategic Reconnaissance Wing photographs Soviet medium-range ballistic missiles on the island of Cuba. Viewed as a direct threat to American security, it marks the start of the Cuban missile crisis.

October 15

AVIATION: At Naval Air Station Jacksonville, Florida, the RF-8A Crusaders of Light Photoreconnaissance Squadron 62 (VFP-62) begin assisting air force units with intelligence-gathering flights over Communist Cuba.

October 16

MILITARY: In Washington, D.C., President John F. Kennedy is shown incontrovertible evidence of Soviet missiles and IL-28 Beagle jet bombers through U-2 photographs. He consults with the Executive Committee of the National Security Council to draft an appropriate response. Kennedy rejects a recommendation from the Joint Chiefs of Staff for surgical air strikes because they cannot guarantee that all missile sites and bombers would be disabled in the first strike. He settles upon a more flexible approach by imposing a quarantine, a peacetime naval blockade, of Cuba.

October 18

AVIATION: The air force mobilizes eight Reserve troop-carrier wings and six aerial port squadrons in response to the Cuban missile crisis.

October 19

MILITARY: Marine units begin receiving alert orders following the discovery of Soviet offensive nuclear missiles on Cuba. The first unit to depart is the

Wheeler, Earle G. (1908–1975)

Army general

Earl Gilmore Wheeler was born in Washington, D.C., on January 13, 1908, and he graduated from the U.S. Military Academy in 1932. A competent officer, he passed through the Infantry School in 1937 and the Command and General Staff College in 1941, and, by the end of World War II, he was a colonel in the 63rd Infantry Division. Wheeler campaigned in Europe throughout 1945 and returned home to successfully fill a number of significant positions, including intelligence officer with the Joint Chiefs of Staff, director of plans for the Office of the Deputy Chief of Staff for Military Operations, and director of the Joint Staff of the Department of Defense. Wheeler became a protégé of General Maxwell D. Taylor and agreed with him on many fundamentals of his new “flexible response” strategy. He was also an extremely cordial, low-key individual, much given to the notion of civilian authority over the military. In October 1962, with Taylor’s urging, President John

F. Kennedy appointed him the new army chief of staff. Wheeler’s deference to Secretary of Defense Robert S. McNamara, his willingness to part with other senior military leaders and endorse the nuclear test ban treaty, and his overall reputation as a “team player” culminated in his appointment as chairman of the Joint Chiefs of Staff in July 1964. Given his reputation for intelligence and military acumen, much was expected of him.

Wheeler was certainly a smooth and loyal operative, but his six-year tenure in office proved stormy owing to the expanding American role in the Vietnam War. As President Lyndon B. Johnson ordered more and more American troops into that theater, Wheeler pressed him to declare a national emergency and mobilize the Reserves to maintain army manpower levels elsewhere, but the president refused. Wheeler also expressed public support for Johnson’s and McNamara’s “gradualist”

2nd Battalion, 1st Marines, which leaves El Toro, California, on the following day.

- In Tay Ninh Province, South Vietnam, a force of 5,000 ARVN soldiers are ferried by helicopters to battle Viet Cong forces northwest of Saigon.

October 21

MARINES: To increase pressure on the Soviet and Cuban governments, advanced echelons of the 1st and 2nd Marine Divisions begin arriving at Guantánamo Bay, Cuba, to bolster the garrison there.

October 22

AVIATION: In light of ongoing tensions with the Soviet Union over Cuba, all aircraft and missiles of the Strategic Air Command (SAC) are placed on 24-hour alert. To underscore American determination, B-52 bombers take up orbital positions outside of Soviet airspace where they are clearly observed by radar.

approach to military escalation, but he opposed it privately as did the Joint Chiefs of Staff. The downturn in developments in the war nearly alienated Johnson from his senior military leaders, but Wheeler remained unwilling to confront civilian authority and American strategy remained unchanged. The politically disastrous Tet Offensive in January 1968 was exploited by Wheeler, who sought to have General William C. Westmoreland request 200,000 additional troops by mobilizing the Reserves and National Guard. Once again, Johnson refused. Wheeler enjoyed a closer rapport with President Richard M. Nixon, who took Wheeler's advice and bombed Communist sanctuaries in Laos and Cambodia, but, by then the war was lost. Wheeler suffered a second heart attack in July 1970 and resigned from active duty. He died in Frederick, Maryland, on December 18, 1975, generally regarded as a highly intelligent and competent military leader, but one whose deference to political authority and whose nonconfrontational style

Earle Wheeler, former secretary of the U.S. Army (*Department of Defense*)

insured that the disastrous strategy devised by civilians and imposed on the military throughout the Vietnam War prevailed.

MILITARY: From Washington, D.C., President John F. Kennedy addresses the nation on television about his imposition of a naval quarantine of Cuba, as of October 24. After that date, no Soviet vessels will be allowed to approach the island and will be turned back at sea, by force if necessary.

- In light of growing tensions over Soviet nuclear missiles in Cuba, President John F. Kennedy orders two Hawk and one Nike-Hercules missile batteries into southern Florida; similar units will remain on active alert there until 1979.

MARINES: In San Diego, California, the 5th Marine Expeditionary Brigade—11,000 strong—prepares to sail for service in the Caribbean.

October 24–November 30

NAVAL: Because Soviet offensive weapons are arriving by ship in Cuba, President John F. Kennedy takes the unprecedented step of ordering the navy to quarantine that island and search all Russian vessels approaching Cuban water. The mission

falls upon Task Force 136 under Vice Admiral Alfred G. Ward, whose force consists of the antisubmarine carrier *Essex*, assisted by two heavy cruisers and support ships. Simultaneously, Task Force 135 is created under Rear Admiral John T. Hayward to help defend American bases at Guantánamo Bay. This consists of two carrier battle groups centered upon the *Enterprise* and *Independence* as backup. The Cuban missile crisis is edging the world to the brink of nuclear war.

October 23

DIPLOMACY: In New York, the United Nations Security Council convenes to consider a charge by the United States that the Soviet Union is threatening world peace. The Organization of American States also vote 19–0 to authorize force to impose the quarantine on Cuba.

October 24

NAVAL: With the naval quarantine of Cuba in effect, upward of 25 Soviet vessels headed for that island halt, then turn around.

October 25

AVIATION: RB-47 Stratojets and KC-97 tankers of the Strategic Air Command (SAC) assist the navy in detecting and tracking Soviet vessels headed for Cuba.

NAVAL: The destroyer *Gearing* accosts the Soviet tanker *Bucharest* at sea and searches it for offensive weapons; none are found and the ship is allowed to continue.

October 26

DIPLOMACY: In Washington, D.C., President John F. Kennedy receives a letter from Soviet premier Nikita Khrushchev stating that he placed missiles in Cuba only to deter the United States from invading. Moreover, he is willing to remove them if the Americans end the blockade and pledge not to attack the Castro regime.

NAVAL: Destroyers *Joseph P. Kennedy* and *John R. Pierce* halt the Soviet chartered Lebanese freighter SS *Marucla* at sea and allow it to continue once its cargo is inspected.

October 27

AVIATION: A U-2 reconnaissance craft flown by Major Rudolph Anderson, Jr., of the 4080th Strategic Reconnaissance Wing is shot down by Soviet missiles over Cuba; Anderson is killed and wins a posthumous Medal of Honor.

- At Malmstrom Air Force Base, Montana, the 10th Strategic Missile Squadron places its 10 Minuteman I missiles on operational alert for the first time.

October 28

DIPLOMACY: Under intense pressure, the Soviet government agrees to remove all offensive nuclear missiles from Cuba. In return, the United States will not attack that island and will also remove its intermediate-range missiles from Turkey. Concerning the latter, given their obsolete, liquid-fuel technology, the Americans were intending to scrap them anyway.

MARINES: As the 5th Marine Expeditionary Brigade sails from San Diego, California, the 2nd Marine Division and elements of Marine Air Groups 14, 24, 26, 31, and 32 deploy at Key West, Florida, for an anticipated invasion of Cuba.

October 28

DIPLOMACY: In Moscow, Premier Khrushchev informs the American government that he is ordering all offensive Soviet weapons in Cuba withdrawn within 30 days. This declaration diffuses the crisis.

October 29

AVIATION: Continuing reconnaissance flights by air force RF-101 Voodoos reveal that Soviet missiles in Cuba are being dismantled.

NAVAL: The United States temporarily lifts its blockade of Cuba to allow UN Secretary-General U Thant passage to confer with Communist dictator Fidel Castro.

November 2

AVIATION: In the wake of the Chinese/India border clash, Operation Long Skip is authorized by President John F. Kennedy to airlift military supplies and equipment to Calcutta. In this instance the Military Air Transport Service (MATS) relies on its new C-135 jet transports and conveys 1,000 tons of military cargo in only two weeks.

- Marine lieutenant colonel John H. Glenn receives the first Cunningham Trophy for outstanding marine pilot of the year. It is presented by the Marine Aviation Force Veterans Association.

November 8

MILITARY: In Washington, D.C., Department of Defense officials certify that all Soviet missile launchers in Cuba have been disassembled.

November 13

MARINES: In Hawaii, 400 men of the 3rd Battalion, 4th Marines are airlifted to Guam to provide relief measures in the wake of a violent typhoon.

November 20

NAVAL: In light of the Soviet decision to remove all offensive bombers and missiles from Cuba, the naval quarantine is suspended by President John F. Kennedy.

November 24

AVIATION: Both Grumman and General Dynamics are contracted by the Department of Defense to construct the prototype Tactical Fighter Experimental (TFX), an advanced design with variable-sweep wings, twin engines, and a 20,000 payload capacity at Mach 2.5. It emerges as the controversial F-111, popularly known as the Aardvark because of its peculiarly long nose.

November 30

MARINES: Marine units activated for service during the Cuban missile crisis are ordered to stand down and begin returning to their home stations.

December 5

AVIATION: At Cape Canaveral, Florida, the last Atlas missile is test-fired, at which point the program concludes. Of 151 launches, only 108 are judged successful.

December 13–14

AVIATION: Project Stargazer takes place over New Mexico as a specially equipped balloon piloted by Captain Joseph A. Kittinger, Jr., and astronomer William C.

White rises to 82,000. They remain in place for 18 hours and use the gondola-mounted telescope for the closest-ever observation of the stars.

December 22

AVIATION: On Kwajalein Island, the air force fires a Nike-Zeus antimissile missile and an incoming Atlas launched from Vandenberg Air Force Base, California. The test proves that the Nike-Zeus can discriminate between a target and its attendant decoys.

December 27

AVIATION: The air force orders six Lockheed SR-71 high-speed reconnaissance aircraft; they are derived from the A-12 version already under construction.

1963

January

MILITARY: American troop strength in South Vietnam stands at 7,900 soldiers and advisers. To date, army aviation units have performed 50,000 sorties on behalf of ARVN, nearly half of them during combat operations.

January 2

AVIATION: At Ap Bac, South Vietnam, U.S. aircraft participating in Operation Burning Arrow bomb suspected Viet Cong sites for an hour. Subsequently, Piasecki H-21 helicopters follow up by landing South Vietnamese troops and supplies in the area.

January 7

AVIATION: At Fort Benning, Georgia, moves are underway to create an experimental Air Assault Division under Brigadier General Harry O. Kinnard. It will consist of eight battalions in three brigades, two assault helicopter battalions, a company of light observation helicopters and several companies of Bell UH-1B gunships armed with M60 machine guns and rocket pods. By 1965 it is ready for deployment to South Vietnam as the 1st Air Cavalry Division.

February 1

AVIATION: The American Rocket Society (1930) and the Institute of Aerospace Sciences (1932) are combined to form the new American Institute of Aeronautics and Astronautics.

February 6

AVIATION: At Cape Canaveral, the 655th Aerospace Test Wing launches a Titan II for the first time.

MARINES: In Washington, D.C., President John F. Kennedy invokes Theodore Roosevelt's 1908 orders that marine officers serving in the capital should complete a 50-mile hike within 20 hours of marching over three days. Twenty officers at Camp Lejeune, North Carolina, take up the president's challenge.

February 13

MARINES: At Camp Lejeune, North Carolina, a force of 53 marines board the ship *Spiegel Grove* on a 14-week goodwill tour of Africa entitled Solant Amity IV.

February 21

AVIATION: Two Cuban-based military jets attack the American fishing boat *Ala* as it drifts in international waters 60 miles north of Cuba.

February 24

MILITARY: In South Vietnam, an American soldier is killed after Viet Cong ground fire downs three H-21 helicopters. Hereafter, all army soldiers are authorized to shoot back in their own defense. The gloves are coming off.

March 1

AVIATION: At Cape Canaveral, Florida, the air force successfully tests an advanced ballistic reentry system for the first time.

March 13

AVIATION: Two large Soviet reconnaissance aircraft apparently flew over Alaskan territory and three days later the United States files a formal protest.

April 10

NAVAL: In the North Atlantic, 240 miles east of Cape Cod, Massachusetts, a tragic accident claims the nuclear-powered submarine *Thresher* under Lieutenant Commander John W. Harvey and 129 crew members during a test dive. The vessel was apparently at a test depth of 1,300 feet when its reactor shut down and its auxiliary engines could not halt its descent.

April 11

MILITARY: In Saigon, South Vietnam, 100 soldiers from the 25th Infantry Division arrive to serve as door gunners on army H-21 Shawnee helicopters.

April 12

AVIATION: Noted aviatrix Jacqueline Cochran sets a new women's world speed record of 1,273.2 miles per hour in a Lockheed F-104 Starfighter.

April 13

AVIATION: In Vietnam, marine transport helicopters are escorted by army UH-1B helicopter gunships for the first time.

April 23

NAVAL: The submarine *Lafayette* is commissioned, the first of a new class of ballistic missile vessels.

April 30

DIPLOMACY: In Haiti, the government requests that the marine training mission be withdrawn.

May 1

AVIATION: Over Edwards Air Force Base, California, aviatrix Jacqueline Cochran makes another women's world record by passing through a 100-kilometer course at 1,203.7 miles per hour.

May 4

MARINES: During a period of political unrest in Haiti, the 2nd, Battalion, 2nd Marines, while training in the Caribbean, positions itself off that embattled country if needed.

Cochran, Jacqueline (1906–1980)

Air Force officer

Jacqueline Cochran was born in Pensacola, Florida, and orphaned at an early age. Raised by relatives, she endured a hard-scrabble existence by toiling in the cotton fields until finding success as a beautician. In 1932, while on a business trip to New York City, she met and married millionaire Floyd Odlum, who convinced her to take flying lessons. Barely literate, she passed her flying exam orally in 1934 and the following year became the first woman to compete in the Bendix Continental Air Race. In 1938 she was approached by flamboyant aircraft designer Alexander P. De Seversky to fly his specially modified fighter craft, and that year Cochran became the first woman to win the Bendix Trophy. She later garnered no less than six prestigious Harmon trophies for being the most distinguished aviator of the year. Following the outbreak of World War II,

Cochran approached Army Air Force head Henry H. Arnold to push for female pilots, and, in 1941, he allowed her to ferry a bomber to England for the first time. Once America joined the war, Arnold appointed

Jackie Cochran in the cockpit of a Canadair F-86 with Chuck Yeager (U.S. Air Force)

May 7

AVIATION: In South Vietnam, an air force RB-57E participates in Operation Patricia Lynn by performing a high-altitude reconnaissance mission.

May 9

MILITARY: A highly classified air force satellite is launched from Point Arguello, California, containing 400 million copper hairs that are released in orbit to form a reflective cloud for relaying radio signals across the United States.

May 15–16

AVIATION: At Cape Canaveral, Florida, the Mercury Space Capsule *Faith 7* blasts into orbit carrying U.S. Air Force major L. Gordon Cooper. He remains in space for 34 hours and 19 minutes while completing 22 orbits before returning safely to Earth. Cooper is the first American astronaut to remain in space for more than one day and his mission also concludes Project Mercury.

Cochran head of the new Women's Air Force Service Pilots (WASPs) with a rank of lieutenant colonel. In this post she oversaw more than 1,000 women pilots who flew more than 60 million miles while ferrying aircraft abroad, and who sustained 38 fatalities. The WASPs were disbanded in December 1944 and women would not be allowed to fly military aircraft again for the next three decades. In 1945 Cochran became the first woman to land an aircraft in Japan and was present during surrender ceremonies on the battleship *Missouri* in Tokyo Harbor. She was also the first civilian to receive the Distinguished Service Medal and was honored by the governments of France, Spain, Turkey, China, and Thailand.

After the war, Cochran remained a lieutenant colonel in the Air Force Reserve and eagerly sought to become part of the new jet age. Mentored by her friend and test pilot Chuck Yeager, she became the first woman to break the sound barrier fly-

ing an F-86 Sabrejet in May 1953. Three years later she became the first woman president of the Federation Aeronautique International, and, in 1962, she became the first woman to pilot a jet aircraft across the Atlantic. Cochran next set the woman's world speed record flying an F-104 Starfighter at speeds of 1,424 miles per hour in 1964. Cochran retired from the military as a full colonel in 1969, and, two years later, she became the first woman inducted into the U.S. Aviation Hall of Fame. Cochran also pushed Congress to recognize the WASPs as military veterans, which it finally did in 1977. Through all this Cochran also found the time to run a successful cosmetics company, serve as a director of Northwest Airlines, and twice be nominated as businesswoman of the year. Cochran died in Indio, California, on August 9, 1980, having set over 200 flying records, most of which still stand, and forever laying to rest the gender barrier in aviation.

May 24

AVIATION: At Wendover, Utah, a top-secret Lockheed A-12 crashes for the first time.

May 27

AVIATION: At St. Louis, Missouri, the first F-4C Phantom II performs its maiden flight; nearly 600 are acquired by the Tactical Air Command (TAC).

June 8

AVIATION: At Davis Monthan Air Force Base, the 570th Strategic Missile Squadron is the first operational Titan II unit in the Strategic Air Command (SAC).

June 15–24

MARINES: Off Pohang, South Korea, the 11th Marine Expeditionary Brigade and elements of the Korean Marine Corps (KMC) conduct joint amphibious operations.

June 17

AVIATION: The prototype Sikorsky CH-3C helicopter performs its maiden flight; it is unique in possessing a hydraulic rear ramp.

July 1

MILITARY: In Southeast Asia, the CIA CIDG program to recruit indigenous tribesmen as anticommunist allies falls under the purview of the 5th Special Forces Group.

July 20

AVIATION: The Lockheed A-12 flies for the first time over Mach 3.

July 20–21

AVIATION: In South Vietnam, a C-47 transport flown by Captain Warren P. Tomsett rescues a group of wounded South Vietnamese soldiers near the Cambodian border. They then land at Lon Noc under Viet Cong fire and fly the injured men back to Bien Hoa Air Base. Their efforts culminate in a Mackay Trophy.

July 25

DIPLOMACY: Negotiations between the United States, Great Britain, and the Soviet Union culminate in the Partial Test Ban Treaty, which outlaws above-ground, outer space, or underwater testing of nuclear weapons.

July 26

AVIATION: *Syncon 2* becomes the first satellite placed in a geosynchronous orbit, which remains fixed over a specific position on Earth.

August 1

AVIATION: An air force rocket booster launches the *Mariner 2* satellite; a year later it completes a journey of 540 million miles to become the first man-made object to orbit the Sun.

- Marine all-weather attack squadrons are redesignated fighter attack squadrons. They are now called MFA-314, 513, and 531, and are equipped with McDonnell-Douglas F4H Phantom II jets.

NAVAL: In Washington, D.C., Admiral David L. McDonald gains appointment as the 17th chief of naval operations.

August 7

AVIATION: At Groom Lake, Nevada, the Lockheed YF-12A high-speed interceptor performs its maiden flight with test pilot James Eastham at the controls.

August 22

AVIATION: An X-15 hypersonic research airplane flown by test pilot Joe Walker reaches an altitude of 354,200 feet (67 miles) while cruising at 4,159 miles per hour. This is the highest altitude ever reached during the program.

August 30

MILITARY: In Tay Ninh Province, northwest of Saigon, South Vietnam, Viet Cong ground fire downs an H-21 Shawnee helicopter, killing two Americans and injuring three others.

October 7

MARINES: At Bridgeport, California, the new Mountain Warfare Training Center is created from the previous Cold Weather Training Center.

October 10

AVIATION: All seven of the original Mercury astronauts receive the Collier Trophy for their accomplishments.

October 16

MILITARY: To preclude any secret violations of the nuclear test ban treaty, two top-secret detection satellites (Project Vela Hotel) are launched from Cape Canaveral, Florida. They assume 7,000-mile orbits at opposite poles of the Earth to obtain the widest possible coverage.

- During Operation Greased Lightning, a B-58 Hustler flies from Tokyo, Japan, to RAF Greenham Common, England, in eight hours and 35 minutes. This is a new record for the 8,028-mile distance.

October 22

AVIATION: The Cessna YAT-37D, an armed version of the T-27 trainer, flies for the first time. This craft will see extensive service over South Vietnam.

- In a startling display of military airlift, the entire 2nd Armored Division transfers from Fort Hood, Texas, to Germany in only 65 hours. This is the first time an entire armored formation has been moved in such fashion.

MARINES: At Port-au-Prince, Haiti, helicopters of HMM-162 arrive on the *Thetis Bay* to bring food and medical supplies to hurricane ravaged areas of that nation.

October 25

NAVAL: The nation of Haiti, reeling from the effects of Hurricane Flora, is assisted by humanitarian supplies provided by several navy ships, which deliver 375 tons of supplies, food, and medicine.

October 26

AVIATION: The fleet ballistic submarine *Andrew Jackson* conducts the first submerged test firing of a Polaris A-3 missile. This latest variant weighs two tons more than its predecessors and has a range of 2,500 miles.

November 1–2

DIPLOMACY: In Saigon, South Vietnam, the government of Ngo Dinh Diem is overthrown by a military coup; President Diem is killed. The ensuing political instability impedes American efforts to assist the country fight a Communist insurgency.

MILITARY: In Southeast Asia, the CIA turns over its border surveillance program to the 5th Special Forces Group. By the following summer, border camps have been erected along strategic infiltration routes.

November 4

DIPLOMACY: Soviet troops obstruct a U.S. military convoy headed for Berlin, but it is allowed to proceed after protests are lodged.

November 15

MILITARY: In South Vietnam, MACV declares that 1,000 of the 16,575 American military personnel present will be gradually withdrawn owing to progress made by the Vietnamese armed forces.

November 22

MILITARY: President Lyndon B. Johnson is sworn in as president and commander in chief following the assassination of John F. Kennedy. At the time, Johnson, who

has been deliberately kept out of Kennedy's inner circle, knows little about his predecessor's plans for Southeast Asia.

November 24

POLITICS: In Washington, D.C., President Lyndon B. Johnson declares his support for continued military support for South Vietnam in its struggle against Communist aggression.

November 29

AVIATION: In Washington, D.C., President Lyndon B. Johnson signs an executive order renaming Cape Canaveral, Florida, Cape Kennedy.

NAVAL: In Washington, D.C., Paul H. Nitze gains appointment as the 58th secretary of the navy.

December 3

MILITARY: In South Vietnam, the first 100 American military advisers slated for removal depart.

December 4

AVIATION: The navy makes public its plans to develop a rocket-powered, nuclear-tipped guided missile capable of destroying enemy submarines at long range. Entitled SUBROC, it is designed to be fired from a conventional torpedo tube.

December 10

AVIATION: In Washington, D.C., Secretary of Defense Robert S. McNamara signs legislation to produce the Manned Orbiting Laboratory for the air force.

- Over Edwards Air Force Base, California, a rocket-augmented NF-104A Starfighter flown by Colonel Chuck Yeager reaches 90,000 feet and then stalls in a flat spin. Yeager falls to 10,000 feet before he is able to eject safely with minor injuries.
- The X-20 Dyna-Soar program is cancelled without ever reaching the prototype stage.

December 17

AVIATION: At Dobbins Air Force Base, Georgia, the Lockheed C-141 Starlifter performs its maiden flight. This will be the first all-jet transport aircraft obtained by the air force and is capable of hauling 123 fully armed troops or 70,000 pounds of cargo.

December 31

AVIATION: In Washington, D.C., President Lyndon B. Johnson authorizes U-2s of the 4028th Strategic Reconnaissance Squadron to deploy in South Vietnam. They will join the 100 or so air force aircraft already there.

MARINES: In Washington, D.C., General Wallace M. Greene becomes the 32nd commandant of the Marine Corps.

1964

January

MILITARY: Presently, there are 10,100 army personnel in South Vietnam; of these 489 have become casualties with 45 killed in action.

January 11

NAVAL: In Annapolis, Maryland, Rear Admiral Charles S. Minter gains appointment as the 43rd superintendent of the U.S. Naval Academy.

January 13

NAVAL: In the Indian Ocean off Africa, a spate of revolutionary violence on the island of Zanzibar forces the destroyer *Manley* to evacuate 55 American citizens.

January 16

MILITARY: In Washington, D.C., the Joint Chiefs of Staff approve creation of the MACV Studies and Observation Group (SOG), a highly classified operation employing Special Forces and intended for secret operations in Vietnam, Cambodia, and Laos. Special teams of South Vietnamese operatives are also being instructed for clandestine work inside of Communist North Vietnam.

January 24

AVIATION: An air force T-39 Sabreliner, on a routine training mission, strays into East German airspace and is shot down over Thuringia; the crew of three is killed.

January 28

MILITARY: In Washington, D.C., Stephen Ailes becomes the eighth secretary of the army. He becomes responsible for dispatching the first combat units to South Vietnam.

February 1

NAVAL: Vice Admiral Hyman G. Rickover, assistant chief of the Bureau of Ships for Nuclear Propulsion and director of atomic reactors in the Atomic Energy Commission, remains in service at the request of President Lyndon B. Johnson. Rickover is at the mandatory retirement age of 64, but he subsequently obtains biennial extensions for the next decade and a half.

February 3

MILITARY: In an ominous development, Viet Cong sappers attack an army advisory compound and kill an American soldier. This marks the first time that soldiers have been targeted within their own facilities.

February 6

NAVAL: After Communist authorities on Cuba cut off fresh water supplies to the navy base at Guantánamo, the United States responds by constructing its own saltwater conversion plants to make it self-sufficient.

February 29

AVIATION: President Lyndon B. Johnson announces at a press conference that the Lockheed A-11 (a fighter version of the famous SR-71 reconnaissance jet) is capable of operating at speeds in excess of Mach 3, or 2,000 miles per hour, at altitudes of 70,000 feet. However, it does not enter production.

March 3

MARINES: On Taiwan, the VII Marine Expeditionary Force (elements of the 1st and 3rd Marine Divisions, the 1st Marine Brigade, and the 1st Marine Air Group) conduct joint amphibious exercises with Nationalist Chinese forces.

March 10

AVIATION: Soviet jets shoot down an unarmed Douglas RB-66 Destroyer reconnaissance jet after it strays into East German airspace near Gardelegen; the crew of three is detained and then released.

March 23

MARINES: In light of current events in Southeast Asia, the 1st Marines conduct a 12-day counterinsurgency exercise at Camp Pendleton, California.

March 28–April 17

AVIATION: In the wake of a devastating earthquake/tidal wave at Anchorage, Alaska, Operation Helping Hand is launched as air force cargo planes fly in 1,800 tons of supplies over the next three weeks.

April

MARINES: On Okinawa, the 1st and 3rd Battalions, 12th Marines, have their mortar companies equipped with the new M98 107mm mortar. The device is dubbed the “Howtar” because of its howitzer-like wheeled mount.

April 8

AVIATION: At Cape Canaveral, Florida, an air force Titan II launch rocket carries an unmanned Gemini space capsule into orbit for the first time.

April 9–15

MILITARY: In the Mekong Delta, South Vietnam, Viet Cong attacks kill 250 ARVN soldiers and militiamen, along with four American advisers.

April 21

AVIATION: In an important benchmark, the number of intercontinental ballistic missiles in the Strategic Air Command (SAC) equals the number of manned bombers it operates for the first time. From this point forward, faster ICBMs begin to exceed manned bombers in importance from the standpoint of nuclear deterrence.

April 27

AVIATION: In northern II Corps, South Vietnam, helicopters of HMM-364 transport Vietnamese troops throughout Operation Sure Wind.

May 11

AVIATION: Aviatrice Jacqueline Cochran sets a new women’s speed record by flying a Lockheed F-104G Starfighter at 1,429.3 miles per hour over a 15–25 kilometer course.

- At Palmdale, California, North American rolls out its futuristic XB-70 Valkyrie supersonic bomber, capable of flying to targets from 70,000 feet and three times the speed of sound. It is also a huge bombing platform, being 185 feet long with a 105-foot wingspan.

May 13

NAVAL: The first nuclear-powered task group, consisting of the carrier *Enterprise*, the cruiser *Long Beach*, and the frigate *Bainbridge*, forms in the Mediterranean as part of the Sixth Fleet.

**Rickover, Hyman G. (1900–1986)***Admiral*

Hyman George Rickover was born in Makow, Poland, on January 27, 1900, a son of Russian Jews. He immigrated to the United States at the age of six and helped support his family by working as a messenger. An excellent student, in 1918 he gained admission to the U.S. Naval Academy and weathered four years of anti-Semitism by studying in his room. Rickover graduated in 1922 and performed a number of routine land and naval assignments before receiving a master's degree in electrical engineering from Columbia University in 1929. His reputation as a problem-solver then landed him a position as head of the electrical division with the Bureau of Ships in Washington, D.C. In this post he oversaw the development and installation of modern electrical systems on warships. However, the turning point in his career occurred in 1946 when he was one of a handful of officers chosen to study at the Manhattan Engineering District at Oak Ridge, Tennessee. Here Rickover was fully exposed to the new science of atomic energy and he began crusading for its application to sea power. The problem was that the tradition-bound naval bureaucracy scoffed at the notion of nuclear energy for anything but weapons. Fortunately for the navy, he proved himself a skilled political fighter with influential friends in Congress.

In 1947 Rickover maneuvered himself into serving as both chief of the nuclear power division at the Bureau of Ships and head of the naval reactor branch of the Atomic Energy Commission. Moreover, he

had a direct hand in designing and building all the essential components, which, when tested, worked perfectly. These efforts culminated in March 1953 when the *Nautilus*, the world's first atomic-powered submarine, was launched. It was a brilliant technological accomplishment coming only a decade after the first atomic reaction, but Rickover made plenty of enemies in the process. He was passed over for promotion twice in 1951 and 1952, until Congress pressured the navy to make him an admiral in July 1953. Admiral Rickover pushed hard for a fleet of nuclear-powered surface vessels, and, in the early 1960s, the carrier *Enterprise*, the guided-missile cruiser *Long Beach*, and the frigate *Bainbridge* all demonstrated the viability of nuclear propulsion for warships. To say that he controlled the navy's atomic program is an understatement; Rickover not only held final authority over the most minute design changes, but he also rigorously grilled and handpicked all officers serving on nuclear submarines at sea. Rickover was considered so indispensable that he was retained on active duty after the mandatory retirement age of 65 and, in 1973, he advanced in rank to full admiral. Rickover retired in January 1982 after six decades of conscientious service to the nation. He died in Washington, D.C., on July 8, 1986, one of the most contentious and truly visionary figures in American naval history. The nuclear submarines he championed in the 1940s have since become standard equipment in all major navies of the world. He was truly "father of the nuclear navy."

May 15

MILITARY: In a consolidation move, MACV absorbs the MAAG, and also receives increased manpower and expanded responsibilities for training and arming the ARVN.

- Leaping Lena, a CIA-run covert reconnaissance project, is turned over to MACV under the new code name Project Delta. It requires U.S. Special Forces to train several companies of their South Vietnamese counterparts for intelligence-gathering missions anywhere in the country. The project is maintained until July 1970 and collects useful information on 70 North Vietnamese units and infiltration routes.

May 18

AVIATION: The first RF-4C Phantom II reconnaissance jet performs its maiden flight. This craft serves as the tactical reconnaissance workhorse of the Vietnam War.

May 20

MARINES: A threshold is crossed after Marine Advisory Team One under Major Alfred M. Gray arrives in South Vietnam, consisting of 30 radio operators and 76 men from Company G, 2nd Battalion, 3rd Marines. This is the first marine combat unit sent to Southeast Asia and it is tasked with providing radio support to ARVN forces.

June 1–20

MARINES: In Norway, 300 miles above the Arctic Circle, Company I, 3rd Battalion, 6th Marines participates in Northern Express, a NATO cold-weather exercise.

June 4

MARINES: On Mindoro, Philippines, the SEATO Exercise Ligta unfolds with marines from the United States and troops from Australia, Great Britain, New Zealand, and the Philippines. Exercises include large amphibious and airborne assaults.

June 6

AVIATION: Over the Plaine des Jarres, Laos, an RF-8A Crusader of VFP-63 (*Kitty Hawk*) flown by Lieutenant Charles F. Klusmann is shot down by the Pathet Lao and he ejects into the jungle; he is held captive until escaping on September 1 and receives a Distinguished Flying Cross. Klusmann is part of a reconnaissance effort known as “Team Yankee.”

June 7

AVIATION: Over Laos, an F8U Crusader flown by Commander Doyle W. Lynn of VF-111 (*Kitty Hawk*) is shot down; Doyle ejects and is rescued by a helicopter.

June 9

AVIATION: Eight F-100 Super Sabres, refueled in midair by KC-135 Stratotankers, bomb Pathet Lao Communist gun emplacements for the first time.

June 20

MILITARY: In Saigon, South Vietnam, General William C. Westmoreland succeeds to the head of MACV.

June 21

AVIATION: In South Vietnam, HMM-364 turns over all its helicopters to the Vietnamese air force, which is forming its first squadron. Its role in Shufly Force is also assumed by HMM-162.

June 28

AVIATION: VMFA-531 arrives in the Far East after flying from Cherry Point, North Carolina, and crossing the Pacific after stops at Hawaii and Wake Island.

- At Cape Canaveral, Florida, the *Ranger 7* space probe is launched on a lunar trajectory. It is tasked with taking photographs of the moon's surface before crashing northwest of the Sea of Clouds.

July 1

AVIATION: At Santa Ana, California, marine helicopter squadron HMM-164 is activated and also becomes the first such unit equipped with new, twin-rotor Boeing CH-46 Skyknights.

July 3

MILITARY: In Washington, D.C., General Harold K. Johnson gains appointment as the 24th chief of staff of the army.

July 4

MILITARY: At Polei Krong, South Vietnam, a strong Viet Cong detachment overruns a Special Forces camp, killing 51 ARVN soldiers and wounding two American advisers.

July 6

AVIATION: Marine helicopters of HMM-162 participate in the relief of the Special Forces camp at Nam Dong.

MILITARY: At Nam Dong, Central Highlands, South Vietnam, a Viet Cong battalion attempts to storm a Special Forces camp but is repelled by Captain Roger A. Donlon and 11 men of Detachment A-726.

July 17

MARINES: On Tiger Tooth Mountain, South Vietnam, Marine Advisory Team One repels a Viet Cong attack on its perimeter.

July 24

AVIATION: In Washington, D.C., President Lyndon B. Johnson reveals the existence of the RS-71 high-speed reconnaissance aircraft. He inadvertently refers to it as the "SR-71" and the moniker sticks.

July 27

MILITARY: In light of mounting Communist activity throughout South Vietnam, the United States announces the deployment of 5,000 additional combat troops.

July 30

NAVAL: At Guantánamo Bay, Cuba, the navy dedicates a new freshwater plant; the base is no longer dependent upon Cuban water sources.

July 31–October 3

NAVAL: At Gibraltar, Task Force 1, consisting of the carrier *Enterprise*, the cruiser *Long Beach*, and the guided-missile frigate *Bainbridge*, all nuclear-powered,

**Westmoreland, William C. (1914–2005)***Army general*

William Childs Westmoreland was born in Spartanburg, South Carolina, on March 26, 1914, the son of a banker. He graduated from the U.S. Military Academy in 1936 and was assigned routine garrison duties in Hawaii prior to World War II. Once the United States entered the conflict, Westmoreland transferred to the European theater where he performed capably in North Africa, Sicily, and France from 1943 to 1944. Westmoreland advanced to colonel in July 1944 and served as a staff officer in the drive toward Germany, and afterward commanded the 60th Infantry during a stint of occupation duty. He returned home after the war to take paratroop training at Fort Bragg, North Carolina, and subsequently attended the Command and General Staff College at Fort Leavenworth, Kansas. After the Korean War broke out in 1950 he pressed superiors for a command and subsequently led the 187th Airborne Regimental

Combat Team into action. This was the only paratroop formation committed to combat during that conflict and Westmoreland led it with distinction. After serving several years as secretary to U.S. Army chief of staff general Maxwell Taylor, Westmoreland became the army's youngest major general in 1956, and, two years later, he took charge of the elite 101st Airborne Division. In July 1960 President Dwight D. Eisenhower appointed him superintendent of West Point, where he remained three years before leaving to command the 18th Airborne Corps at Fort Bragg. The turning point in Westmoreland's career came in 1964 when President Lyndon B. Johnson appointed him head of the U.S. Military Assistance Program in South Vietnam, one of the most daunting challenges ever faced by any American general of the 20th century.

South Vietnam was then being heavily infiltrated by guerrilla units commanded by

embark on an around-the-world cruise without refueling. Operation Sea Orbit is completed in only 64 days after they dock at Charleston, South Carolina, on October 1.

August 1

MARINES: At Quantico, Virginia, the Marine Corps School Senior Course is redesignated the Marine Corps Command and Staff College, and the Junior Course becomes the Amphibious Warfare School.

August 2

NAVAL: The destroyer *Maddox* under Captain Herbert L. Ogier, patrolling the Gulf of Tonkin 30 miles off of North Vietnam, is attacked in international waters by three Communist patrol boats, one of which is sunk by return fire.

August 4

NAVAL: In the Gulf of Tonkin off North Vietnam, the destroyers *Maddox* and *Turner Joy* report being attacked by several Communist torpedo boats, which

Communist North Vietnam, and Westmoreland successfully pressed for an increase in American manpower from 20,000 to half a million by 1968. With such a force at his disposal, he orchestrated an intense campaign of “search-and-destroy” missions in the jungles to root out the insurgents and their supply bases, and the forces inflicted heavy losses on enemy units when cornered. Though bloodied, however, the Communists were far from defeated, and, in January 1968, they launched their surprise Tet Offensive. Westmoreland quickly countered this attack and defeated it with severe losses, but many Americans now felt that the war was unwinnable. Prior to this event, Westmoreland had been sending back optimistic progress reports and he took the blame for failing to crush his adversaries. In June 1968 he was succeeded by General Creighton Abrams and returned home to serve as chief of staff of the army. He served in this post until his retirement in July 1972. In 1982 he won

Secretary of Defense Robert S. McNamara and General Westmoreland talk with Gen. Thi, I Corps Commander, July 1965. (*National Archives*)

a bitter lawsuit against the CBS network over its assertion that he had lied about known enemy troop strengths. Westmoreland died in Charleston, South Carolina, on July 18, 2005, a talented but luckless commander.

they repel with gunfire. This is a major escalation of hostilities between the two nations and provides President Lyndon B. Johnson with a convenient pretext for expanding American military involvement in Southeast Asia.

August 5

AVIATION: Acting upon the orders of President Lyndon B. Johnson, Operation Pierce Arrow commences as aircraft from the carriers *Ticonderoga* and *Constellation* attack petroleum assets and naval facilities at Vinh, Phuc Loi, Loc, Chao, Hongay, and Quang Khe, North Vietnam. The *Constellation* loses two aircraft: Lieutenant Richard A. Sather dies when his A-1H Skyraider is downed by anti-aircraft defenses; Lieutenant Everett Alvarez becomes the first American captive of the Vietnam War after his A-4 Skyhawk is shot down; he remains a prisoner for nine years until February 1973.

- The air force begins a mass redeployment of B-57s, F-100s, F-102s, RF-101s, and F-105s to Southeast Asia for participation in the Vietnam War.

August 7

POLITICS: In a major abrogation of its oversight responsibilities, Congress overwhelmingly approves the Gulf of Tonkin Resolution, which grants President Lyndon B. Johnson unlimited authority to expand the conflict in South Vietnam.

August 14

AVIATION: At Vandenberg, California, the Atlas/Agena D booster rocket is flight tested for the first time.

August 17

MARINES: At Camp Pendleton, California, the Edson Range opens as a replacement for Camp Calvin B. Matthews, which is closing due to urban encroachment from nearby San Diego.

September 1

AVIATION: At the General Electric Space Center, Valley Forge, Pennsylvania, Air Force Captains Albert R. Crews and Richard E. Lawler finish a two-week “mission” onboard a simulated space cabin. NASA officials now believe humans can perform numerous tasks in space for longer periods of time than previously expected.

September 11

AVIATION: The air force retires two squadrons of Atlas liquid-fueled intercontinental ballistic missiles in favor of more versatile Minuteman I solid-fuel rockets. Over 100 more Atlas missiles are destined to be decommissioned as more Minuteman missiles are deployed.

September 13

MARINES: In South Vietnam, Marine Advisory Team One is disbanded and departs the theater.

September 17

MILITARY: President Lyndon B. Johnson announces that two antimissile systems, based upon existing Nike-Zeus and Thor rockets, are under development. Apparently, these employ radar that can see “over the horizon” by following the curvature of the Earth.

September 18

NAVAL: Nighttime jitters continue in the Gulf of Tonkin as the destroyers *Morton* and *Parsons* fire on radar contacts believed to be North Vietnamese torpedo boats. Neither vessel sustains damage.

September 21

AVIATION: At Palmdale, California, the huge North American XB-70 Valkyrie, an experimental supersonic bomber, passes its maiden flight. This is a six-engined giant intended to fly at supersonic speeds. However, because of recent strides in surface-to-air missile technology, such aerial tactics are obsolete and it never enters production.

MILITARY: In Darlac, Central Highlands, South Vietnam, allied Montagnard tribesmen rebel against South Vietnamese troops in their vicinity, killing 34 and taking several American advisers hostage. Special Forces are rushed in to prevent a general massacre of South Vietnamese prisoners and calm is restored.

September 28

NAVAL: At Charleston, South Carolina, the fleet ballistic submarine *Daniel Webster* embarks on its first deterrent cruise while armed with the new Polaris A-3 missiles.

October 1

MILITARY: In South Vietnam, the 5th Special Forces Group deploys and establishes its headquarters. However, because many field teams are undermanned, the tour of duty is extended from six months to 12.

October 13

MILITARY: The army declares its decision to dispatch a third helicopter company to work with ARVN forces in the Mekong Delta, South Vietnam.

October 26

MARINES: In Spain, Exercise Steel Pike I unfolds as 22,000 marines train with 2,000 Spanish marines.

November 1

AVIATION: In another major escalation, Viet Cong sappers sneak past the perimeter of the U.S. air base at Bien Hoa, South Vietnam, and fire mortars; five B-57s Canberras are destroyed and 15 more are damaged while four Americans are killed and 72 wounded. Four Douglas A-1 Skyraiders belonging to the South Vietnamese air force are also gutted.

November 10

AVIATION: The first A-12 reconnaissance sortie takes place over the island of Cuba.

November 17

AVIATION: Operation Dragon Rouge unfolds as C-130 Hercules transports of the 464th Troop Carrier Wing deliver French paratroopers and help rescues hostages held in Zaire. After returning nearly 2,000 hostages to France, the unit receives a Mackay Trophy.

- Marine helicopters from HMM-365 and 162 assist victims of recent flooding in central South Vietnam.

November 26

MARINES: In Cairo, Egypt, a mob protesting U.S. policies in Zaire attacks the U.S. embassy and part of the Marine Guard facility is burned.

December 4

MILITARY: At Binh Gia, southeast of Saigon, South Vietnam, Viet Cong units attack and defeat ARVN forces until three battalions of marines and airborne troops are helicoptered in. The Communists withdraw, but only after 500 South Vietnamese and five American advisers are killed.

December 6

NAVAL: At Guantánamo Bay, Cuba, the navy completes the last of three saltwater conversion plants, making the base independent of any outside water source. The Communist regime of Fidel Castro had cut off the flow of fresh water the previous February 6.

December 10

AVIATION: A Titan II booster hoists a 3,700-pound satellite into orbit using new “Transtage” technology. This entails placing the entire third stage of the rocket into orbit, then launching the payload into an even farther orbit.

- Over Quang Tin and Binh Dinh Provinces, South Vietnam, air force A-1 Sky-raidiers deliver punishing blows to Viet Cong units caught in the open. Rocket and cannon fire inflicts several hundred casualties.

December 14

AVIATION: In Southeast Asia, Operation Barrel Roll commences as air force armed reconnaissance aircraft begin flying missions over northern Laos; the project is maintained until the following April.

December 15

AVIATION: In South Vietnam, an AC-47 flown by Captain Jack Harvey, equipped with side-firing Gatling guns, performs the first aerial gunship mission of the Vietnam War. Such aircraft also receive the nickname “Spooky.”

December 17

MILITARY: Special Forces captain Roger A. Donlon becomes the first American soldier to receive the Medal of Honor for fighting in South Vietnam, and the first so honored since the Korean War.

December 21

AVIATION: At Fort Worth, Texas, the revolutionary General Dynamics YF-111A successfully flies for the first time; this is the first American military aircraft incorporating a variable geometry (swing) wing.

December 22

AVIATION: The SR-71A flies a one-hour mission, during which time it easily reaches 1,000 miles per hour.

- In Washington, D.C., President Lyndon B. Johnson approves funding for development of a new, large jet transport, the C-5A Galaxy. This new aircraft will be capable of carrying 345 fully armed troops or 250,000 pounds of cargo over 6,500 miles at speeds of 550 miles per hour.

December 22–January 22

AVIATION: Severe flooding in Oregon and northern California leads to Operation Biglift, during which air force transports carry 1,500 tons of humanitarian relief to victims.

December 23

MILITARY: In An Xuyen Province, South Vietnam, U.S. troops use CS riot gas in an attempt to free prisoners held by the Viet Cong. The mission turns up empty, although, hereafter, MACV policy allows soldiers to employ gas in self-defense when attacked.

December 24

MILITARY: In Saigon, South Vietnam, a Viet Cong bomb demolishes the Bachelor Officer’s Club, killing two Americans and wounded 51.

December 26

NAVAL: At Guam, the fleet ballistic submarine *Daniel Boone* embarks on the first A-3 Polaris deterrent cruise of Pacific waters.

December 31

MILITARY: At this juncture, the United States has deployed 23,000 servicemen from all four branches in South Vietnam.

1965

January

AVIATION: The Bell Corporation begins manufacturing the AH-1 Cobra, the world's first helicopter gunship. This is a complete departure from existing helicopter designs for it is slim, agile, and heavily armed with machine guns and rockets.

MILITARY: Army personnel in South Vietnam totals 14,700 officers and men. More important, because MACV is aware that North Vietnamese troops have begun infiltrating down the Ho Chi Minh Trail into South Vietnam, the cry goes out for additional manpower to stop them. Since fighting began in 1961, the United States has suffered 1,300 dead and 6,100 wounded in South Vietnam.

January 1

AVIATION: At Beale Air Force Base, California, the 4200th Strategic Reconnaissance Wing is activated. It is the first unit equipped with SR-71 Blackbirds.

January 6

AVIATION: Flight testing continues with the General Dynamics F-111A swing-wing fighter bomber. Early trials of the variable-geometry wing at 470 miles per hour reveal no ill effects to the flight profile.

January 12

AVIATION: An Atlas rocket booster launches the Aerospace Research Satellite into a westward orbit for the first time. This device is used to measure radiation and micrometeorites while in orbit.

January 18

AVIATION: In Washington, D.C., President Lyndon B. Johnson informs Congress of his intention to acquire a short-range attack missile to be carried by B-52s and F-111s. This nuclear-tipped, standoff weapon will have a range of at least 50 miles.

February 1

AVIATION: In Washington, D.C., General John P. McConnell gains appointment as U.S. Air Force chief of staff.

MARINES: At Fort Drum, New York, the 1st Battalion, 8th Marines, VMGR-252, and helicopters of HMM-265 participate in Operation Snowflex-65. For marines, this is the largest cold-weather exercise on the East Coast in four decades.

February 4

AVIATION: A Titan IIIC solid-fuel rocket booster is fired for the first time in a two-minute test, and develops 25 percent greater thrust than anticipated—1.25 million pounds.

- A Bomarc supersonic drone is successfully intercepted by Air Defense Command pilots. The target was cruising at 1,500 miles per hour at an altitude of 50,000 feet.

February 6

MILITARY: A Viet Cong raid on Camp Holloway at Pleiku, South Vietnam, results in eight Americans killed and 126 wounded. President Lyndon B. Johnson expands aerial bombardment of North Vietnam in retaliation.

February 7–11

AVIATION: The navy executes Operation Flaming Dart 1, during which the carriers *Hancock*, *Coral Sea*, and *Ranger* launch air strikes against military barracks at Dong Hoi, North Vietnam. The move comes in response to an earlier Viet Cong attack against American installation at Pleiku, South Vietnam; one aircraft is shot down.

February 8

AVIATION: As part of Operation Flaming Dart, air force F-100 Super Sabres fly top cover for South Vietnamese aircraft making bombing strikes over North Vietnam. This is the first time air force aircraft have ventured so far north.

MARINES: In light of recent Communist attacks on American units, President Lyndon B. Johnson orders the 1st Light Anti-Aircraft Missile (LAAM) Battalion to deploy at Dan Nang, South Vietnam.

February 10

MILITARY: At Qui Nhon, Vietnam, an American enlisted men's barracks is blown up by Viet Cong sappers, 23 soldiers die and 21 are wounded.

February 11

AVIATION: In retaliation for the recent attack on Americans in Qui Nhon, South Vietnam, the carriers *Hancock*, *Coral Sea*, and *Ranger* unleash Operation Flaming Dart II against military barracks at Chan Hoa, North Vietnam. The *Coral Sea* loses an F-8 Crusader.

February 12–March 9

MARINES: At Camp Pendleton, California, Operation Silver Lance is the largest amphibious operation held since World War II and involves 25,000 marines and 20,000 sailors.

February 17

MARINES: In Da Nang, South Vietnam, a company of the 7th Engineer Battalion is deployed.

February 18

AVIATION: In South Vietnam, the air force begins a long regimen of tactical air strikes against Communist ground targets when B-57s and F-100s unload bombs near An Khe.

February 22–26

MARINES: In South Vietnam, MACV commander General Westmoreland requests two battalions of marines for the defense of the coastal city of Danang. Former general Maxwell D. Taylor, now ambassador to South Vietnam, cautions against

the move, feeling that it will give the impression that the Americans are coming to fight the war for the South Vietnamese. After much deliberation, however, the Joint Chiefs of Staff agree to the move, which constitutes the first phase of a general American buildup.

March 1

AVIATION: At Ellsworth Air Force Base, South Dakota, the first launch of an operational Minuteman I missile transpires.

March 2

AVIATION: President Lyndon B. Johnson, determined to awe the North Vietnamese into submission, authorizes Operation Rolling Thunder, a sustained aerial offensive against Communist military and economic targets. The strategy lasts until October 31, 1968, but its gradual escalation, allowing the North Vietnamese to adjust accordingly, fails to break the enemy's resolve to resist.

- An air force F-100 Super Sabre flown by Lieutenant Hayden J. Lockhart is shot down over North Vietnam on the first day of Operation Rolling Thunder. After evading capture for a week, he is imprisoned and remains a POW for the next eight years.

March 5

AVIATION: At Fort Worth, Texas, the General Dynamics F-111 prototype completes its first supersonic flight.

March 8

NAVAL: At Da Nang, South Vietnam, the amphibious transport dock *Vancouver*, the amphibious force flagship *Mount McKinley*, the attack transport *Henrico*, and the attack cargo ship *Union* land the 9th Marine Expeditionary Brigade ashore.

MARINES: The 9th Marine Expeditionary Brigade under Brigadier General Frederick J. Karch, totaling 3,500 men, lands at Da Nang, South Vietnam. This is the first American combat unit assigned here although its mission is to protect airfield facilities only. They join 23,000 military personnel already deployed, although the bulk of these troops serve in advisory capacities only.

March 9

MARINES: At Da Nang, South Vietnam, helicopters of HMM-162 and 163, and the 1st Light Antiaircraft Missile Battalion (LAAM), are assigned to the 9th Marine Expeditionary Brigade. All three are incorporated into Marine Air Group 16 (MAG-16).

March 11

NAVAL: Operation Market Time takes place as navy vessels and patrol aircraft of the Seventh Fleet are detailed to begin tracking and searching all coastal traffic for Communist arms smugglers. In time, Task Force 71 is created to coordinate all such endeavors and, by November, some 6,000 junks have been boarded and searched.

March 15

AVIATION: Aircraft from the carrier *Hancock* strike at the Phu Qui ammunition dump, 100 miles south of Hanoi; one aircraft and its pilot are lost.

March 21

MILITARY: To prevent the outbreak of hostilities, President Lyndon B. Johnson federalizes the Alabama National Guard and then deploys 2,200 army troops to protect 25,000 civil rights marchers en route from Selma to Montgomery.

March 23

AVIATION: At Patrick Air Force Base, Florida, Project Gemini commences as Lieutenant Colonel Virgil I. Grissom and Lieutenant Commander John W. Young are successfully launched in the *Gemini 3* capsule for three orbits around the Earth. This is the space flight in which the orbit was deliberately modified. Grissom is also the first American astronaut to return to space.

March 24

MILITARY: In Saigon, South Vietnam, the 716th Military Police Battalion is the first army unit to arrive following the decision to build up American forces. The country is also divided into four tactical zones for combat and administrative purposes.

March 26

AVIATION: A force of 40 aircraft from the carriers *Hancock* and *Coral Sea* attack four radar sites across North Vietnam; two are shot down but the pilots are rescued.

March 29

MARINES: In Saigon, South Vietnam, a bomb explodes outside the U.S. embassy, at which point the Marine Security Guard detachment restores order and security in that compound.

March 30

AVIATION: In the wake of civil unrest on the island of Cyprus, air force C-124 Providers transport 3,000 Danish peacekeepers and 76 tons of cargo to restore the peace.

April

AVIATION: From this month to the end of the Vietnam War, carriers on Yankee Station in the South China Sea begin launching daily raids of up to 100 aircraft against targets in North Vietnam, especially military bases, transportation networks, and power stations.

April 1

MARINES: At Da Nang, South Vietnam, the 9th Marine Expeditionary Brigade receives authorization to engage Viet Cong and North Vietnamese forces in their vicinity.

April 2–5

MILITARY: In the Mekong Delta, South Vietnam, heavy skirmishing with Viet Cong units takes the lives of six American advisers.

April 3

AVIATION: The air force, cognizant that the Communists are using a jungle route called the Ho Chi Minh Trail to infiltrate men and supplies into South Vietnam, commences Operation Steel Tiger to interdict them. This operation persists for the remainder of the war.

- South of Hanoi, North Vietnam, carrier aircraft from the *Hancock* and *Coral Sea* destroy the Dong Phuong Highway bridge. American pilots also mark the first visual observations of enemy MiG aircraft in the distance.

April 3–4

AVIATION: Over North Vietnam, Air Force F-105 Thunderchiefs severely damage the Thanh Hoa Bridge but are unable to drop any spans. Two F-105s are claimed by heavy antiaircraft fire.

April 9

AVIATION: South of Hainan Island, China, four navy F-4 Phantom IIs escorting an air raid into North Vietnam are attacked by four MiG-17s whose nationality is not determined. One F-4 is apparently lost.

April 10

AVIATION: Marine jets of VFMA-531 deploy directly onto the airfield at Da Nang, South Vietnam. This is the first appearance of Marine Corps aviation in the war.

MARINES: At Da Nang, South Vietnam, the 9th Marine Expeditionary Brigade is reinforced by the 2nd Battalion, 3rd Marines while its accompanying helicopters deploy at Phu Bai, 50 miles to the north.

April 12

MARINES: At Da Nang, South Vietnam, headquarters of the 3rd Marines arrive as the command element of various battalions.

April 13

AVIATION: Marine jets of VMFA-531 conduct their first combat mission in South Vietnam.

April 14

MARINES: At Da Nang, South Vietnam, the 3rd Battalion, 4th Marines is landed and marches inland. American combat strength at this juncture is 8,000 troops.

April 15

AVIATION: Aircraft from the carriers *Midway* and *Coral Sea* are joined by land-based army and marine counterparts in bombing suspected Viet Cong positions in South Vietnam. This is the first air strike to involve men and machines from all three services.

- The *Coral Sea* and *Midway* launch 10 aircraft, which perform the first reconnaissance missions over North Vietnam.

April 16

AVIATION: At Da Nang, South Vietnam, Marine Composite Reconnaissance Squadron 1 (VMCJ-1) deploys. It is equipped with updated but venerable Douglas EF-10B Skyknights.

April 20

AVIATION: At Lincoln, Nebraska, a milestone in American missile history is reached as the last of the liquid-fueled Atlas F intercontinental ballistic missiles of the 551st Strategic Missile Squadron are retired from operational status and placed in storage until used as launch vehicles for satellites. This completes the

phaseout of the first generation of ICBMs. Hereafter, the U.S. Air Force depends almost entirely on solid-fueled rockets such as the Minuteman.

MARINES: At Da Nang, South Vietnam, the 9th Marine Expeditionary Brigade numbers 8,600 men and MACV commander General William C. Westmoreland orders them to conduct aggressive patrolling in the area. They are also instructed to prepare to act as a mobile reserve force.

April 22

AVIATION: A company of the 1st Battalion, 3rd Marines conducts the first helicopter assault in Marine Corps history by reinforcing a patrol outside Da Nang, South Vietnam.

MARINES: Outside Da Nang, South Vietnam, a patrol of the 9th Marine Expeditionary Brigade engages in the first firefight with Viet Cong forces, killing one enemy and sustaining one wounded.

April 23

AVIATION: At Travis Air Force Base, California, the first operational Lockheed C-141 Starlifter arrives. This four-engine jet becomes the backbone of the Military Air Transport Service (MATS).

April 26

MILITARY: Secretary of Defense Robert S. McNamara estimates that the total cost for supporting the burgeoning war effort in South Vietnam will cost \$1.5 billion annually.

April 27

AVIATION: An air force ERB-47H Stratojet is attacked by North Korean MiG-17s over the Sea of Japan, suffers damage, yet lands safely in Japan.

NAVAL: In light of civil unrest in the Dominican Republic, the amphibious assault ship *Boxer* lands marines ashore and also evacuates 556 American citizens.

April 28

MILITARY: Elements of the 82nd Airborne Division and some Special Forces units are deployed to the Dominican Republic to restore order following a military coup and the onset of civil war. Once a provisional government is installed in September, the Americans are withdrawn.

MARINES: At Santo Domingo, Dominican Republic, parts of the 3rd Battalion, 6th Marines are landed to provide protection to the U.S. embassy during a period of political turmoil.

April 29–30

AVIATION: At Pope Air Force Base, North Carolina, Air Force C-130s and C-124s commence Operation Power Pack by flying in 17,000 tons of supplies to the strife-torn Dominican Republic. The flights are made by aircraft belonging to the U.S. Air Force, Air Force Reserve, and National Guard.

MARINES: At Santo Domingo, Dominican Republic, U.S. Marines strength rises to 1,600 with the arrival of other units, all of which are being organized into the 4th Marine Expeditionary Brigade.

April 30

MARINES: In Santo Domingo, Dominican Republic, two marines from the 3rd Battalion, 6th Marines are killed during street fighting to restore order in the city.

May 1

AVIATION: In a very good day for Colonel Robert L. Stephens, he flies the YF-12A at 2,070 miles per hour, breaking eight speed and altitude records in the process. Stephens and the SR-71 Test Force consequently win the Mackay Trophy.

May 2

AVIATION: The air force deploys an Oklahoma National Guard C-97 flying command post to facilitate transport services to the Dominican Republic. MATS eventually flies in 4,547 tons of supplies and 5,436 passengers as part of the mission.

MARINES: Men of the 4th Marine Expeditionary Brigade begin deploying in the Dominican Republic to help restore order; there are presently over 5,500 marines in the country. However, street fighting results in one marine death and three marines wounded.

May 3

MARINES: In the Dominican Republic, marines from the *Newport News* are landed to assist the 3rd Battalion, 6th Marines.

May 3–12

MILITARY: At Bien Hoa, northeast of Saigon, South Vietnam, the 173rd Airborne Brigade flies in from Okinawa and deploys. It is the first army combat unit to arrive in theater, and consists of 3,500 men, including the 3rd Battalion, 319th Artillery, also the first of its kind to arrive.

May 7

MARINES: In the I Corps zone, South Vietnam, III Marine Amphibious Force under Lieutenant General Lewis W. Walt replaces the 9th Marine Expeditionary Brigade while 3rd Marine Division headquarters assumes command for most ground units. The term expeditionary is dropped following a request by General William C. Westmoreland to remove the stigma attached to the French Expeditionary Force of a decade earlier.

- At Chu Lai, South Vietnam, the 3rd Marine Amphibious Brigade lands at Chu Lai, 50 miles south of Da Nang to construct a marine airfield. They are accompanied by several SeaBees construction engineers to complete the task.

May 9

MILITARY: The State Department announces that American troop strength in South Vietnam stands at 42,200.

May 10

AVIATION: Off the California coast, the tank-landing vessel *Tioga County* test-fires the first Seaspar anti-aircraft missile. This weapon is subsequently renamed the Sea Sparrow, being based largely on the aircraft-carried Sparrow missile.

MILITARY: In Phuoc Long Province, South Vietnam, two Viet Cong regiments attack and overrun a base at Song Be, killing 48 South Vietnamese and five American advisers.

May 11

AVIATION: Headquarters, 1st Marine Air Wing (1st MAW) arrives at Da Nang to assume control of marine squadrons.

MILITARY: In the Dominican Republic, elements of the 82nd Airborne Division begin arriving, bringing total American manpower on that island to 5,000 army and 6,000 marines. Political order, however, remains elusive.

MARINES: Near Da Nang, South Vietnam, men of the 2nd Battalion, 3rd Marines clear Viet Cong from the village of Le My and begin civic action programs to win over the population.

May 12

MARINES: At Chu Lai, South Vietnam, the 3rd Marine Amphibious Brigade disbands with the arrival of the 3rd Battalion, 3rd Marines, and control of the forces passes to the III Marine Amphibian Force. A total of 17,500 marines are present in country.

May 12–18

AVIATION: The air force is ordered by President Lyndon B. Johnson to suspend bombing of North Vietnam for the next six days in the hopes of prodding the Communist leadership into negotiating an end to the fighting; the gesture fails to evoke a response.

May 16

NAVAL: The navy establishes the single-carrier Dixie Station, 100 miles southeast of Cam Ranh Bay, South Vietnam, from which air strikes can be launched in support of ground forces. Within 15 months, once air strength ashore builds up, the station is abolished.

May 20

NAVAL: Destroyers of the Seventh Fleet provide the first naval gunfire support missions of the Vietnam War by attacking suspected enemy positions along the coast of South Vietnam.

May 22

AVIATION: Air force F-105 Thunderchiefs bomb north of the 20th parallel for the first time by striking North Vietnamese army barracks.

May 25

MARINES: In the Dominican Republic, U.S. mediation leads to a truce between various factions and marine units begin departing to vessels offshore.

May 26–June 6

MILITARY: Once the Organization of American States arranges a cease-fire in the Dominican Republic, army troops and marines begin withdrawing from that island.

June 1

AVIATION: At Chu Lai, South Vietnam, A-4 Skyhawks of VMA-225 deploy on the new SATS field completed there, the first time this concept has been used under combat conditions. The squadron also runs its first air strikes the same day.

June 3

MARINES: In Washington, D.C., President Lyndon B. Johnson orders the remaining 2,100 marines in the Dominican Republic withdrawn from the island. Casualties during this operation came to nine dead and 30 wounded.

Walt, Lewis W. (1913–1989)

Marine Corps general

Lewis William Walt was born near Harveyville, Kansas and attended Colorado State University. After graduating in 1936 Walt was commissioned second lieutenant in the Marine Corps and the following year he served as a platoon leader in Shanghai, China, guarding the International Settlement there. After World War II commenced, Walt joined the First Marine Raider Battalion and, in August 1942, he won his first Silver Star by fighting at Tulagi. Walt next fought on Guadalcanal, where he was wounded and won a Navy Cross defending Aogiri Ridge, subsequently named Walt Ridge in his honor. As a lieutenant colonel, Walt commanded the Fifth Marines in severe actions at New Britain and Peleliu, being wounded again. Walt remained in the service after the war and, in November 1952, he resumed command of the Fifth Marines in Korea and also served as chief of staff in the 1st Marine Division. He fought in the mountains of western Korea until August 1953, then returned home to receive the Legion of Merit and Bronze Star for outstanding service there. Walt rose to brigadier general in 1961 and major general in 1965. That year he faced his most daunting assignment as head of the III Marine Amphibious Force, then part of America's growing military involvement in the Vietnam War.

For a headstrong combat officer like Walt, his assignment in the I Corps tactical zone bordering Communist North Vietnam was vexing in the extreme. He differed with the large unit, search-and-destroy strategy of General William C. Westmoreland

and felt that American interests were best served by small unit actions backed by an extensive rural pacification program. He originated the Combined Action Platoon program, which dispersed marine units in villages to help train local militias to defend themselves against the Viet Cong. Some progress was made, but after 1966 the North Vietnamese Army (NVA) began moving bigger units across the demilitarized zone, forcing Walt to respond in kind. The result was a higher casualty count on both sides, but no real military solution. Leaders in Washington also felt that his approach to winning hearts and minds was too slow to produce viable results. Walt departed Vietnam in June 1967, angered by the lack of progress, his disputes with Westmoreland, sagging public support for the war, and the refusal of political leaders in Washington, D.C., to allow the marines to attack Communist sanctuaries in neighboring Laos and Cambodia. Nonetheless, in light of his sterling reputation, he was appointed assistant commandant of the Marine Corps in 1968 and advanced to four-star rank a year later. Walt retired from active duty in February 1971, although not before roundly criticizing Congress for its lack of leadership, public schools for their ineffectiveness, and parents for not correctly teaching children. He also published his memoir, *Strange War, Strange Strategy* (1970), which excoriated American conduct of the Vietnam War. Walt died in Gulfport, Mississippi, on March 26, 1989, an accomplished and outspoken Marine Corps leader.

June 3–7

AVIATION: The *Gemini 4* space capsule blasts into space with U.S. Air Force majors Edward H. White and James A. McDivitt onboard. They set a new endurance record for U.S. astronauts by completing 63 Earth orbits in 97 hours. White also becomes the first American to perform a space walk outside his capsule, propelled by a gas-jet propulsion unit, for 23 minutes.

June 4

MARINES: In I Corps, South Vietnam, the III Marine Amphibious Force and 3rd Marine Division are to be commanded by Major General Lewis W. Walt.

- In a sign of escalating conflict, marines wage several company-sized engagements near Da Nang and Phu Bai, which costs them two dead and 10 wounded. They report killing 70 Communist troops.

June 7

MILITARY: In Saigon, General William C. Westmoreland requests an additional 44 battalions to counter the increasing number of North Vietnamese troops infiltrating down the Ho Chi Minh Trail. He hopes that such a show of force will convince Communist leaders that they cannot possibly win the war.

June 9

MILITARY: At Cam Ranh Bay, South Vietnam, the army 35th Engineer Group lands and begins developing it into a major port facility.

June 9–12

MILITARY: In Phuoc Long Province, South Vietnam, an estimated force of 1,500 Viet Cong attacks a Special Forces camp at Dong Xoai in the northern III Corps. The defenders, consisting of Montagnards and 24 Special Forces advisers, manage to repulse four heavy attacks before they can be evacuated by helicopter. Eight Americans die in action; executive officer Lieutenant Charles Q. Williams wins a Medal of Honor.

June 10

NAVAL: At Dong Xoai, South Vietnam, Seabee Team 1104 is attacked by superior Viet Cong forces and Construction Mechanic Third Class Marvin G. Shields, already wounded, volunteers to knock out a Communist machine-gun emplacement. He succeeds and is wounded a second time, then is fatally hit while returning to American lines. Shields receives a posthumous Medal of Honor.

June 12

NAVAL: At Annapolis, Maryland, Rear Admiral Draper L. Kaufman gains appointment as the 44th superintendent of the U.S. Naval Academy.

June 17

AVIATION: Over North Vietnam, two F-4B Phantom II jets from VF-21 (*Midway*) engage four North Vietnamese MiG-17s fighters and down two with Sidewinder missiles. These are the first confirmed aerial kills of the war.

June 18

AVIATION: An air force Titan III booster rocket, which generates 2.5 million pounds of thrust, hoists a 10.5-ton payload into Earth orbit. This is presently

the most powerful launch rocket in use anywhere and consists of a liquid-fueled center rocket and two solid-fuel, trap-on boosters.

- Massed B-52 bombing raids (Arc Light missions) are carried out against suspected Viet Cong emplacements and concentrations only 30 miles north of Saigon, South Vietnam. A total of 28 aircraft complete the mission after flying in from Guam. This is the first time these massive bombers, designed for nuclear warfare, are impressed into a tactical role.

June 20

AVIATION: Over North Vietnam, four AD-1 Skyraiders from the carrier *Midway* are attacked by four MiG-17s; 20mm cannon fire from one of the Spads downs a MiG.

June 25

AVIATION: At El Toro, California, a military transport plane crashes after takeoff. A total of 79 marines are killed.

June 26

MILITARY: In Washington, D.C., the government allows General William C. Westmoreland permission to commit American forces to combat whenever he deems necessary. This move spells the end of the former, defense-minded enclave strategy and a new offensive phase of the war commences.

June 29

AVIATION: At Edwards Air Force Base, test pilot Joseph Engle, who flies the hypersonic X-15 research rocket, becomes the youngest pilot to earn his astronaut's wings.

June 30

AVIATION: At F. E. Warren Air Force Base, Wyoming, the 800th Minuteman I missile is activated by the Strategic Air Command (SAC). This is also the final example of this particular model acquired.

MARINES: At this stage in the Vietnam War, marine manpower totals 17,258 officers and 172,995 enlisted men. Of 50,000 American military personnel engaged in South Vietnam, marines account for 18,156, over one-third.

July 1

MARINES: At Da Nang, South Vietnam, Viet Cong sappers covered by a mortar barrage slip past the perimeter and damage six air force aircraft.

- In Qui Hon, South Vietnam, the Special Landing Force (3rd Battalion, 7th Marine and helicopters of HMM-163) are landed to protect an important logistics base in II Corps tactical zone.

July 2

MILITARY: In Washington, D.C., Stanley R. Resor is sworn in as the ninth secretary of the army. During his tenure, the first large overseas deployment of American combat troops occurs, as well as their initial withdrawal.

July 8

AVIATION: The former NASA communication and weather satellites *Syncom 2* and *Syncom 3* are taken over by the Air Force Satellite Control Facility upon orders from the Department of Defense.

July 10

AVIATION: Over North Vietnam, a pair of F-4C Phantom IIs from the 45th Tactical Fighter Squadron shoots down two Communist MiG-17 jets, the first air force aerial victories of this war. The crews in question are pilots Thomas S. Roberts and Kenneth E. Holcomb and weapons officers Ronald C. Anderson and Arthur C. Clark.

July 14

MARINES: At Dong Ha, South Vietnam, units of the 3rd Marine Division move to an airfield just south of the Demilitarized Zone (DMZ) and bridges crossing the Cua Viet River into North Vietnam.

July 16

AVIATION: The prototype YOY-10A counterinsurgency (COIN) aircraft flies for the first time. It enters the U.S. Air Force and Marine Corps inventories as the OV10 Bronco.

MARINES: Sergeant Major Herbert J. Sweet becomes the fourth Sergeant major of the Marine Corps.

July 20–August 1

NAVAL: Coast Guard Division 1, boasting 17 82-foot vessels, arrives off of South Vietnam. They are tasked with monitoring coastal traffic to interdict weapons being smuggled to the Viet Cong.

July 24

AVIATION: Over North Vietnam, surface-to-air missiles down an air force F-4C Phantom II jet; this is the first American aircraft downed by SAMs in combat.

MILITARY: The Pentagon points to great advances in battlefield medicine and treatment, as the ratio of wounded to dead soldiers in combat is five-to-one, the highest of any American conflict.

July 26

MILITARY: President Lyndon B. Johnson, determined to stop Communist attacks in South Vietnam, announces an increase in military manpower from 75,000 to 125,000. The military draft will also be doubled from 17,000 to 35,000 young men per month.

July 28

MILITARY: In Washington, D.C., President Lyndon B. Johnson addresses the nation, informing the public that he is dispatching the 1st Cavalry Division and other units to South Vietnam. This move boosts American military strength in the region to 125,000.

July 29

MILITARY: The 1st Brigade, 101st Airborne Division under Colonel Joseph D. Mitchell deploys to II Corps, where it is to garrison the coastal province of Phu Yen. General William C. Westmoreland and Ambassador Maxwell D. Taylor, both former commanders, are on hand to greet them.

August 1

NAVAL: Along the coast of South Vietnam, Operation Market Time gives way to Task Force 115 under Rear Admiral Norvell G. Ward, Military Advisory Command, Vietnam (MACV).

MARINES: At Phu Bai, South Vietnam, the Combined Action Program commences with units of the 3rd Battalion, 4th Marines. This entails a “Combined Action Platoon” of marines being assigned to local Vietnamese militia units for the purpose of protecting a specific village from Communist coercion.

August 2–11

MILITARY: At Duc Co, Central Highlands, South Vietnam, a Viet Cong force estimated at 3,000 attacks a Special Forces camp for several days until it is succored by the 173rd Airborne Brigade.

August 3

MILITARY: In Saigon, Army Military Police units deploy the first sentry dogs in the Vietnam War. No less than 2,200 dogs are used for scouting, sentry work, and mine detection by war’s end.

MARINES: In the village of Can Ne, South Vietnam, marines are filmed burning huts by a CBS film crew; the footage, once aired, occasions public controversy.

August 5

AVIATION: The huge Saturn V booster rocket is ignited for a 2.5 minute static burn, during which it releases the equivalent of 7.5 million pounds of thrust. This same test vehicle is presently on display at the Kennedy Space Center.

August 7

AVIATION: At Grand Forks Air Force Base, North Dakota, the first Minuteman II missile is eased into its hardened silo.

A marine from 1st Battalion, 3rd Marine, escorts a Vietcong suspect. (*National Archives*)

August 10

MARINES: The Marine Corps is authorized to add three new infantry battalions, expanding manpower levels to 223,100.

August 11

AVIATION: Over North Vietnam, an A-4 Skyhawk from VA-23 (*Midway*) becomes the first navy jet shot down by a North Vietnamese surface-to-air missile (SAM).

- In South Vietnam, marine aircraft drop cluster bomb units (CBU) during a tactical sortie. These are particularly devastating in antipersonnel roles, although unexploded bomblets pose a hazard to civilians.

August 13

AVIATION: The dangers of attacking a heavily defended region like North Vietnam is underscored today when an A-1 Skyraider, two A-4 Skyhawks, and two F-8 Crusaders from the carriers *Midway* and *Coral Sea* are lost in combat.

August 14

NAVAL: In Washington, D.C., the Navy Department announces that all navy and marine enlistments will be involuntarily expanded by four months to facilitate personnel requirements.

August 15

MARINES: At Chu Lai, South Vietnam, the 7th Marine headquarters and the 1st Battalion, 7th Marines are deployed as the 3rd Battalion, 9th Marines rotates back to Okinawa.

August 18–24

NAVAL: On the Van Tuong Peninsula, 14 miles south of Chu Lai, South Vietnam, Operation Starlite commences as the amphibious ship *Iwo Jima* lands marines in defense of the city while the cruiser *Galveston*, accompanied by two destroyers, provides close support fire.

MARINES: Near Van Tuong, south of Chu Lai, South Vietnam, III Marine Amphibious Force commences Operation Starlite, the first regimental-sized operation since the Korean War. Elements of the 7th Marines either helicopter in or land on the shoreline and engage several Viet Cong units in firefights. The Communists are overpowered, leaving 623 bodies on the ground and several hundred sealed off in caves and bunkers; marine losses are 51 killed and 203 wounded. This is also the biggest land engagement fought by Americans since the Korean War.

August 21–29

AVIATION: At Cape Canaveral, Florida, the *Gemini V* space capsule roars aloft with Lieutenant Colonel L. Gordon Cooper and Commander Charles “Pete” Conrad; they successfully fly an eight-day mission and complete a record-breaking 120 Earth orbits.

August 28

NAVAL: Off La Jolla, California, an experiment is conducted to test the capacity of humans to live in confined spaces simulating space flight. To that end a 10-man group, including astronaut commander Malcolm Scott Carpenter, enter the *Sealab II* structure some 200 feet below the surface. While three teams of

volunteers rotate through every 15 days, Carpenter remains on the bottom for an entire month without ill effects.

September 1

MARINES: To increase the flow of manpower to the front without enlarging the instructor cadre, recruit training is decreased from 12 to eight weeks.

September 1–October 27

MARINES: In the I Corps tactical zone, the 9th Marines commence Operation Golden Fleece, a series of cordons and patrols intended to deny Viet Cong units access to the local rice harvest. All similar operations conducted by the III Marine Amphibious Force will bear the same title.

September 2

AVIATION: Marine Air Group 36 (MAG-36) begins deploying in South Vietnam with four helicopter squadrons and an observation squadron.

September 7

MARINES: Headquarters Marine Corps announces that, despite an influx of volunteer recruits, they will have to resort to a draft come January to meet their authorized manpower levels.

September 7–10

MARINES: South of Van Tuong, South Vietnam, the 7th Marines disperse Viet Cong concentrations along the Batangan Peninsula, killing 163 Communists.

September 8

AVIATION: Hurricane Betsey is photographed intensely by four U.S. Air Force–launched *Tiros* satellites, becoming the first large storm so studied.

September 11

MILITARY: At An Khe, South Vietnam, advanced elements of the 1st Cavalry (Airmobile) Division establish their headquarters in the central II Corps. This is a new formation sent to test the theory of vertical envelopment with helicopters and represents a quantum leap in terms of troop mobility.

September 15–21

AVIATION: After the newest India-Pakistan war erupts, the air force commences Operation Nice Way to evacuate 1,000 citizens and foreign nationals.

September 20

MILITARY: In Washington, D.C., the Joint Chiefs of Staff authorize Project Shining Brass, which entails highly classified cross-border operations into Laos for the purpose of gathering military intelligence along the Ho Chi Minh Trail and performing sabotage. The teams involved usually consist of three Special Forces troops and nine Montagnard tribesmen. Over 1,200 missions are performed through 1970.

September 25–26

MARINES: South of Qui Nhon, South Vietnam, the Seventh Fleet Special Landing Force (SLF) employs helicopters and landing craft to strike at Viet Cong positions along the coast. Operation Dagger Thrust is the first of several amphibious raids by the SLF.

September 27

AVIATION: The Vought A-7 Corsair II light attack jets debut over the skies of North Vietnam, seeing distinguished service over the next three decades.

October 1

AVIATION: The air force assembles its first heavy-repair civil-engineering squadron, or Red Horse units, which provide a quick-response civil engineering force in national emergencies.

October 2

MILITARY: At Bien Hoa, South Vietnam, the 1st Infantry Division ("Big Red One") deploys in the northern part of III Corps to guard against Communist infiltration.

October 5

MILITARY: In Washington, D.C., President Lyndon B. Johnson authorizes the use of tear gas in an effort to smoke out Viet Cong units from their underground lairs.

October 10–14

AVIATION: Over Edwards Air Force Base, California, the XB-70 Valkyrie bomber hits 2,000 miles per hour while cruising at 70,000 feet.

MILITARY: Near An Khe, Central Highlands, South Vietnam, the 1st Cavalry Division performs its first airmobile operation by deploying en masse against Communist troop concentrations. The elusive enemy manages to escape intact but the Americans do manage to reopen a highway from the coast to Pleiku.

October 15

AVIATION: At Maxwell Air Force Base, Alabama, the Air University Institute of Technology graduates its first class of 16 missile combat officers, who receive master's degrees in rocket science.

NAVAL: To facilitate supply measures, the U.S. Naval Support Activity Da Nang is founded. It is organized under the Commander, Service Force, Pacific Fleet, to support the naval war effort.

October 17

AVIATION: An A-6 Intruder and four A-4 Skyhawks from the carrier *Independence* successfully attack and knock out a North Vietnamese mobile surface-to-air missile site at Kep, northeast of Hanoi.

October 18

AVIATION: The 107th Tactical Fighter Group (New York ANG) is the first Air National Guard unit deployed to the Pacific for joint service exercises.

October 19–27

MILITARY: At Lei Me, Central Highlands, South Vietnam, Viet Cong forces attack a Special Forces camp for over a week until it is relieved by ARVN troops. The 1st Cavalry Division subsequently lands men west of the camp to cut off the retreat of Communist soldiers before they reach Cambodia.

October 23

AVIATION: In South Vietnam, the 4503rd Tactical Fighter Squadron arrives with the first 12 Northrop F-5E Freedom Fighters deployed in that theater. This aircraft, designed for the export market, is here to conduct combat evaluation tests.

October 26

NAVAL: Off the Vietnam coast, the destroyer *Turner Joy* suffers from a powder charge detonation, which kills three sailors and injures three more.

October 28

AVIATION: At Da Nang, South Vietnam, Viet Cong sappers manage to get onto the airfield, destroying two jets and 19 helicopters.

October 31

AVIATION: The 447th Strategic Missile Squadron at Grand Forks Air Force Base, North Dakota, deploys the first 10 Minuteman II intercontinental ballistic missiles (ICBMs). This version is larger and more accurate than its predecessor, but still squeezes into the same silo.

NAVAL: As Operation Market Time unfolds in South Vietnam the first PCFs, or swift boats, make their successful debut. These are aluminum-hulled craft, 50 feet in length, and armed with three .50-caliber machine guns and an 81mm mortar, and they are manned by one officer and four enlisted men. Their success in an estuary environment eventually gives rise to the so-called Brown Water Navy.

November 1

AVIATION: In Washington, D.C., Colonel Jeanne M. Holm gains appointment as director of the Women of the Air Force (WAF).

November 3

MARINES: In a search-and-destroy operation near Chu Lai, South Vietnam, correspondent Dickie Chapelle is killed by a booby-trapped mortar round while accompanying marines into the field.

November 14–20

AVIATION: For the first time in the war, giant B-52 bombers are called in to assist ground troops during the Battle of Ia Drang, South Vietnam.

MILITARY: In Pleiku Province, South Vietnam, the Battle of Landing Zone X-Ray unfolds between U.S. and Viet Cong forces. The 1st Cavalry Division is deployed deep inside enemy territory in an attempt to secure control of the Cambodian border. No sooner does the 1st Battalion, 7th Cavalry, under Lieutenant Colonel Harold G. Moore land at position “X-Ray” than they are hotly engaged by 2,000 North Vietnamese of the 33rd and 66th Regiments. A platoon from Company D is cut off and surrounded for 24 hours before being rescued. At length the Americans pour in the 2nd Battalion, 7th Cavalry, followed by the 2nd Battalion, 5th Cavalry. This infusion of strength proves too much for the Communists, who break and run for their sanctuary in Cambodia. In this first major engagement of the Vietnam War, the Americans lose 240 killed and 470 wounded while Communist losses are estimated at around 2,000.

November 15

MILITARY: At Nha Trang, South Vietnam, the Field Force, Vietnam (FFV) is created as a provisional headquarters for the II Corps Zone. It is adopted to avoid confusion with South Vietnamese corps headquarters operating in the same zone.

November 17

MILITARY: The 1st Cavalry Division, intent on cutting off Viet Cong and North Vietnamese Army (NVA) units fleeing toward Cambodia, deploys the 2nd Battalion, 7th Cavalry at Ia Drang two miles to the northeast of Landing Zone X-Ray. Marching en route to Landing Zone Albany, they are ambushed by strong Communist forces and nearly overrun until being rescued by the 1st Battalion, 5th Cavalry. The Americans lose 276 men to an estimated Viet Cong loss of 400.

November 17–18

AVIATION: In the Que Son Valley, a force of 30 UH-34 helicopters from Marine Air Groups 16 and 36 transport two ARVN battalions to recapture the village of Hiep Duc, which was recently seized by the Viet Cong. One marine dies in combat while 17 helicopters are damaged by ground fire.

November 26

NAVAL: The carrier *Enterprise* and the guided-missile frigate *Bainbridge* arrive off Vietnam, being the first nuclear-powered vessels committed to the war zone.

November 27–December

MILITARY: In the final months of the year, American troop strength in South Vietnam is built up from 15,000 to 116,800 officers and men. These men are now engaged in direct combat operations and have sustained 898 killed in action. The Defense Department informs General William C. Westmoreland that his active strategy of seeking out and destroying the enemy over so vast a country will require an additional 400,000 men.

December 2

AVIATION: Off Vietnam, the nuclear-powered carrier *Enterprise* launches 118 sorties against Viet Cong positions in South Vietnam.

December 3

AVIATION: In Washington, D.C., the secretary of defense announces that the air force is developing a reconnaissance version of the General Dynamics F-111.

MARINES: The draft for the upcoming month of January is set at 8,980 men and represents the first use of draftees by the Marine Corps since the Korean War.

December 4

AVIATION: At Cape Kennedy, Florida, the *Gemini VII* space capsule is launched into orbit with U.S. Navy commander James A. Lovell and U.S. Air Force lieutenant commander Frank Borman.

December 7

AVIATION: At Vandenberg Air Force Base, California, a Strategic Air Command (SAC) crew launches a Minuteman II missile from its silo for the first time. The projectile flies 4,000 miles downrange toward its target area.

NAVAL: In the South China Sea, the carrier *Kitty Hawk* suffers from a fire in its machinery room that kills two sailors and injures an additional 28.

December 8

AVIATION: In Washington, D.C., Secretary of Defense Robert S. McNamara declares that the air force will begin phasing out all older B-52 Stratofortresses

and all of its B-58 Hustlers. The latter, while impressive, were overly expensive to operate owing to very high fuel consumption rates.

December 8–29

MARINES: Between Chu Lai and Da Nang, South Vietnam, the 2nd Battalion, 7th Marines, 3rd Battalion, 3rd Marines, and 2nd Battalion, 1st Marines conduct an intense sweep backed by artillery and four B-52 bomb strikes. The Viet Cong lose 407 dead and 33 captured while Marine casualties amount to 51 killed and 256 wounded.

December 10

AVIATION: In Washington, D.C., Secretary of Defense Robert S. McNamara declares that the air force is developing a strategic bomber version of its F-111 to be known as the FB-111.

December 14

AVIATION: An air force RB-57F Canberra reconnaissance aircraft crashes near Odessa on the Black Sea, but authorities believe the crew died due to an oxygen system malfunction and not Soviet action.

December 15

AVIATION: In Earth orbit, the *Gemini 7* space capsule piloted by Commander James A. Lovell and Lieutenant Colonel Frank Borman successfully docks with *Gemini 8* flown by Captain Walter M. Schirra and Major Thomas P. Stafford. Lovell and Borman go on to establish a 14-day record in space that endures for the next five years.

December 18

NAVAL: In the Mekong Delta, South Vietnam, Task Force 116, also known as the U.S. Navy River Patrol Force or “Brown Water Navy,” is established to root out Viet Cong units in the vicinity. The activities they engage in on various deltas and waterways fall under the rubric of Operation Game Warden.

December 22

AVIATION: North of Hanoi, North Vietnam, the first Wild Weasel (flak suppression) attack unfolds as Air Force F-100F Wild Weasels destroy a Fan Song radar site while F-105 Thunderchiefs demolish an SA-2 missile battery.

- Aircraft from the carriers *Enterprise*, *Kitty Hawk*, and *Ticonderoga* attack the thermal power plant at Uong Bi, North Vietnam, for the first time; two aircraft are downed in this, the first naval air raid against a purely industrial target.

MILITARY: In a goodwill gesture, MACV institutes a 30-hour truce over Christmas; American and South Vietnamese units will fire only if attacked.

December 23–January 23

AVIATION: At Hickham Air Force Base, Hawaii, Operation Blue Light unfolds as air force transports begin conveying the 3rd Infantry Division to Pleiku, South Vietnam. The entire process takes a month and is the largest maneuver of its kind ever attempted. In addition to 3,000 soldiers, 4,600 tons of equipment are also delivered.

December 24

AVIATION: In Washington, D.C., President Lyndon B. Johnson orders a second halt to air strikes against North Vietnam in the hope of spurring peace talks.

December 31

MARINES: Although not quite a quagmire yet, of 181,000 U.S. military personnel present in South Vietnam, Marines account for 39,092. Since March 8 of this year, 342 marines have died, 2,047 have been wounded, and 18 are missing in action. They claim to have killed 2,627 Viet Cong in return.

1966

January

MILITARY: As the number of American ground forces increases, so does the strength of the Viet Cong and North Vietnamese Army (NVA). The nature of the war also begins changing from a guerrilla conflict to one hinging upon conventional, stand-up engagements. However, the Americans place increasing stress on advisory efforts in an attempt to get ARVN forces to shoulder their share of the fighting.

January 1

AVIATION: The airlift units of the U.S. Air Force are redesignated: hereafter the Military Airlift Transport Service (MATS) is known as the Military Airlift Command (MAC). The Air Rescue Service is renamed the Aerospace Rescue and Recovery Service (ARRS). Concurrently, the Eastern Air Transport Force and the Western Air Transport Force become the Twenty-First and Twenty-Second Air Forces, respectively.

- To assist the Military Airlift Command (MAC) in South Vietnam, Air National Guard (ANG) transport units begin flying 75 sorties per month to that region.
- At Tullahoma, Tennessee, a large rocket facility is constructed at the Arnold Engineering Development Center.

January 3–15

MARINES: Commandant General Greene spends several days touring marine facilities in the Western Pacific, including Vietnam.

January 7

AVIATION: At Beale Air Force Base, California, the first operational SR-71 Blackbird is delivered.

January 15

MARINES: In Guantánamo Bay, Cuba, the 2nd Battalion, 8th Marines arrives at the naval base to serve as the ground defense force.

January 17

AVIATION: Potential disaster strikes as a B-52 jet bomber laden with nuclear weapons collides with a KC-135 tanker off Palomares, Spain, killing seven of 11 airmen onboard. Three of the bombs fall on land and a fourth is eventually salvaged from 2,500 feet of water.

January 20

MARINES: In Washington, D.C., President Lyndon B. Johnson asks Congress for funds to maintain a fourth active-duty division of the Marine Corps.

January 22

AVIATION: Operation Blue Light concludes, during which 3,000 troops and 4,600 tons of equipment have been conveyed by the Military Airlift Command (MAC) from Hawaii to Pleiku, South Vietnam.

January 28–February 17

NAVAL: Near Quang Ngai City and Tam Ky, South Vietnam, the Seventh Fleet Amphibious Ready Group commences Operation Double Eagle I, the largest amphibious landing of the war to date. The landings go off well but the Viet Cong manage to evade most serious contact.

MARINES: Marines of Task Force Delta (4th Marine headquarters, 2nd Battalion, 9th Marines, 2nd Battalion, 3rd Marines, and 2nd Battalion, 4th Marines) conduct an extensive amphibious operation in southern Quang Ngai Province. In stiff fighting, the marines kill 312 Viet Cong and capture 19 while losing 24 dead and 156 wounded.

January 28–March 6

MILITARY: In Binh Dinh Province, South Vietnam, the 3rd Brigade, 1st Cavalry Division under Colonel Hal Moore commences Operation Masher, the war's first "search-and-destroy" mission, in concert with ARVN and Republic of South Korea (ROK) formations. These troops invade the Communist stronghold on the Bong Son Plain against light resistance, and the operation ends with indifferent results. Communist losses are estimated at 1,300 dead, but they quickly reclaim most of the lost territory once the Americans depart.

January 31

AVIATION: In Washington, D.C., President Lyndon B. Johnson orders the aerial bombing of North Vietnam resumed after a 37-day cease-fire after the Communist regime of Ho Chi Minh rejects any notion of "peace talks."

February 1

MEDICAL: At Cam Ranh Bay, South Vietnam, the air force opens a 200-bed hospital facility.

February 14

NAVAL: In the Gulf of Thailand off South Vietnam, *PCF-4* becomes the first swift boat lost in action when it strikes a mine that kills four of six crewmen.

February 16

MEDICAL: At Chu Lai, South Vietnam, the hospital ship *Repose* arrives to provide services.

February 20

NAVAL: At Yerba Linda Island, San Francisco, Fleet Admiral Chester W. Nimitz dies at the age of 81; he is the last U.S. Navy five-star admiral.

February 21

AVIATION: American aircraft resume their attacks against North Vietnam by striking the former French military base at Dien Bien Phu.

February 22

MILITARY: A force of 20,000 American, South Vietnamese, and South Korean troops conduct Operation White Wing to ferret out Viet Cong troops and supply concentrations in Quang Ngai Province.

February 23

MARINES: In Vietnam, the 1st Marine Division headquarters and the 11th Marines begin deploying for combat operations.

February 24

AVIATION: At Vandenberg Air Force Base, California, a Strategic Air Command (SAC) missile crew from the 341st Strategic Missile Wing makes the first Minuteman salvo launch over the Pacific.

February 26

NAVAL: At Vung Tau, South Vietnam, nine newly arrived Coast Guard cutters are organized into Coast Guard Division 13. This brings the total number of cutters in Southeast Asia to 26.

March 1

MARINES: At Camp Pendleton, California, the reactivated 26th Marines become the lead element of the new 5th Marine Division.

- On Okinawa, the 9th Marine Amphibious Brigade is activated to take charge of all marine units throughout the western Pacific that are not in South Vietnam.

March 2

MILITARY: Secretary of Defense Robert S. McNamara declares that American troop strength in Vietnam has reached 215,000 and that another 20,000 are en route.

March 4

AVIATION: Over North Vietnam, three Communist MiG-17 fighters tangle briefly with a flight of F-4C Phantom II fighters, then break off the engagement and return to their airfields.

March 4–7

MARINES: In South Vietnam, Operation Utah commences as helicopters from Marine Air Group 11 (MAG-11) transport the 1st ARVN Airborne Battalion into combat under heavy fire as the 2nd Battalion, 7th Marines, 3rd Battalion, 1st Marines, and 2nd Battalion, 4th Marines pitch into a nearby North Vietnamese Army (NVA) regiment. The Communists are severely drubbed, losing 600 men; Marine casualties total 98 dead and 278 wounded; the ARVN sustains 30 dead and 120 wounded.

March 7

AVIATION: In France, after President Charles de Gaulle announces his decision to withdraw from the North Atlantic Treaty Organization (NATO), several units operating there as part of United States Air Force Europe (USAFE) are obliged to relocate elsewhere.

MARINES: In Washington, D.C., Secretary of Defense Robert S. McNamara seeks to increase the Marine Corps to 278,184 men, a force larger than during the Korean War.

March 8

AVIATION: In South Vietnam, HMM-164 deploys with the first Boeing CH-46 Seaknights to see service in the country.

March 8–17

MARINES: Winter Express unfolds above Norway's Arctic Circle, with the 3rd Battalion, 6th Marines participating in NATO's largest ever cold-weather exercise.

March 10

AVIATION: At an abandoned airstrip in the A Shau Valley, an A-1E Skyraider flown by Major Bernard F. Fisher, 1st Air Commando, lands under enemy fire to rescue downed major Dafford W. Myers. Fisher becomes the first air force officer awarded the new "Air Force Medal of Honor," which was redesigned in 1963.

MILITARY: In the I Corps zone, a popular Vietnamese general is dismissed by his government and a wave of political unrest sweeps the country. The turmoil hinders a successful prosecution of the war for several months.

March 15

MARINES: In I Corps zone, the Force Logistics Command (1st and 3rd Service Battalions) is created by the III Marine Amphibious Force to supply marine units campaigning in country.

March 16

AVIATION: In the A Shau Valley, marine helicopters of HMM-163 and VMO-2 rescue the survivors of a Special Force camp overrun by the Viet Cong; antiaircraft fire results in several losses.

MILITARY: Viet Cong troops overrun a Special Forces camp in the A Shau Valley after a 72-hour siege, killing or wounding 200 Americans and South Vietnamese. This is the last of three such camps previously established in the valley, which is of great strategic importance to the Communists.

March 16–17

AVIATION: The *Gemini 8* space capsule flown by astronauts Neil A. Armstrong and David Scott experience uncontrollable rolling due to a faulty thruster and cut short their flight. Upon splashing down in the Pacific Ocean, they are rescued by an air force helicopter, the first time that service has been involved in the Gemini project.

March 20–25

MARINES: Northwest of Quang Ngai, Operation Texas commences as the 3rd Battalion, 7th Marines, 2nd Battalion, 4th Marines, and 3rd Battalion, 1st Marines, assisted by an ARVN regiment, attack two entrenched Communist regiments. The marines, strongly supported by air and artillery elements, kill 283 enemy troops while suffering 99 dead and 212 wounded.

March 26–April 6

NAVAL: Thirty-five miles south of Saigon, South Vietnam, the Seventh Fleet Amphibious Ready Group lands U.S. and South Vietnamese marines in a fruitless search for Viet Cong units. This is also the first large amphibious operation executed in the Mekong Delta.

MARINES: Near Saigon, South Vietnam, marines stage their first ground action near the capital when the 1st Battalion, 5th Marines sweeps Viet Cong units from the Mekong River delta region, southeast of the city.

March 28

AVIATION: Over the White Sands Missile Range, New Mexico, the first successful midair catch of an air-launched, air-recoverable rocket is made by the Air Force Special Weapons Center.

MILITARY: At Cu Chi, South Vietnam, the famed 25th Infantry Division ("Tropic Lightning") deploys northwest of Saigon to block a well-known Communist infiltration route across the Cambodian border.

March 29

AVIATION: At Naval Air Station Pensacola, Florida, Ensign Gale Ann Gordon becomes the first woman to solo in a navy airplane. She does so as part of her training in aviation experimental psychology.

MARINES: At Chu Lai, South Vietnam, the 1st Marine Division begins to formally operate in the country. This is the first time since World War II that two divisions of marines are in combat together.

March 31

AVIATION: The Strategic Air Command (SAC) completes phasing out all its B-47 Stratojets in favor of B-52 Stratofortresses. This early, swept-wing bomber joined the Strategic Air Command (SAC) in 1951.

NAVAL: In an unusual disciplinary move, Lieutenant Commander Marcus A. Arnheiter is relieved from commanding the destroyer picket *Vance* off South Vietnam. Arnheiter ascribes his dismissal to the disloyalty of junior officers and congressional hearings. Lawsuits persist for several years thereafter.

April 1

AVIATION: In Saigon, South Vietnam, the Seventh Air Force under Lieutenant General Joseph H. Moore becomes a subcommand of the Pacific Air Forces (PACAF).

NAVAL: Rear Admiral Norvell G. Ward is appointed head of the new U.S. Naval Forces Vietnam, which is responsible for all naval forces in the South Vietnamese theater of operations.

April 5

AVIATION: The Air Force Avionics Laboratory conducts the first successful voice communications test utilizing aircraft, satellite, and ground equipment simultaneously.

MARINES: At Camp Pendleton, California, the 5th Marine Division continues taking shape as the 13th Marines are activated as its artillery unit.

April 6

AVIATION: In Vietnam, the army transfers all its tactical lift aircraft to the air force, which now operates a fleet of Canadian-made DeHaviland C-7A Caribous and C-8A Buffalos.

April 7

AVIATION: Off Palomares, Spain, navy divers retrieve an H-bomb lost when a B-52 and a KC-135 collided in midair earlier in the year.

April 10

NAVAL: Along South Vietnamese waterways, Operation Game Warden is strengthened by the arrival of two 31-foot-long, water jet-propelled river patrol boats (PBRs).

April 11–12

AVIATION: In a pitched battle 35 miles east of Saigon, South Vietnam, Airman 1st Class William H. Pitsenbarger, 38th Aerospace Rescue and Recovery Squadron, elects to remain and fight with army troops rather than expose his crew mates and helicopter while picking him up. Pitsenbarger fights bravely and dies in combat, winning a posthumous Medal of Honor.

MILITARY: Major General William E. DuPuy moves his 1st Infantry Division into the heart of Viet Cong territory in III Corps. However, a company of the 2nd Battalion, 16th Infantry, is ambushed and surrounded by Viet Cong units 40 miles east of Saigon and cut to ribbons, losing 35 dead and 71 wounded.

April 12

AVIATION: Giant B-52 bombers are used against targets in North Vietnam for the first time, striking at supply lines running through the Mu Gia Pass, 85 miles north of the Demilitarized Zone (DMZ).

April 17

NAVAL: The heavy cruiser *Canberra*, operating off Vietnam, becomes the first U.S. Navy warship to relay an operational message via the *Syncom 3* communications satellite to the Naval Communications Station, Honolulu, Hawaii, 4,000 miles distant.

April 17–June 9

MILITARY: In the Rung Sat Special Zone, southeast of Saigon, South Vietnam, the 1st Battalion, 18th Infantry enters a swamp-entangled morass seeking Communist hideouts. However, Operation Lexington III concludes without any major engagements and the elusive guerrillas escape.

April 21–23

MARINES: The 7th Marines, sweeping northwest of Quang Ngai, kill over 150 Communist forces.

April 25

AVIATION: At Grand Forks Air Force Base, the 447th Strategic Missile Squadron becomes the first operational Strategic Air Command (SAC) unit to deploy 50 Minuteman II intercontinental ballistic missiles.

April 26

AVIATION: Over Hanoi, North Vietnam, an air force F-4C Phantom II flown by Major Paul Gilmore and Lieutenant William T. Smith brings down the first Communist MiG-21 with a Sidewinder missile. At the time they were escorting a flight of F-105 Thunderchiefs on a bombing run.

May

AVIATION: In the Mekong Delta, South Vietnam, five UH-1 helicopters (“Hueys”) are outfitted with experimental night-vision cameras as an aid to night combat

and navigation. Though not entirely successful, the experiment accelerates the development and deployment of more sophisticated devices by 1969.

May 1

NAVAL: In Washington, D.C., the Navy Department completely overhauls its entrenched bureau system, some of which has been in effect since 1842. Henceforth, the Bureau of Naval Personnel and the Bureau of Naval Medicine are placed directly under the chief of naval operations. Also, the Bureaus of Weapons, Yards and Docks, and Supplies and Accounts are restructured into six system commands under the chief of naval materiel.

May 3

AVIATION: At Edwards Air Force Base, California, the first test of a Fulton Recovery System, or “air snatch” of a man standing on the ground, is successfully completed.

May 5

AVIATION: Air Force A-1E Skyraiders are ordered to bomb targets in North Vietnam for the first time.

May 9

NAVAL: Ten River patrol boats (RPBs) are ordered up the Bassac River into the Mekong Delta, South Vietnam, for the first time. They are tasked with interdicting

Troops of the 173rd Airborne Brigade dash to helicopters under heavy fire during an operation 30 miles north of Saigon, May 1966. (*Texas Tech University Vietnam Archive*)

weapons smuggling to Viet Cong units. Within a year the Mekong River Patrol Group has expanded to include 80 boats, three helicopters, and several SEAL units.

- Three new patrol air-cushion vehicles (PACV) enter Operation Market Time while patrolling the Bassac River of the Mekong Delta, South Vietnam, for Viet Cong units. While capable of 50 knots and heavily armed, PACVs are too troublesome to maintain in this difficult environment.

May 10–July 30

MILITARY: In the Central Highlands of South Vietnam, the 3rd Brigade, 25th Infantry Division, and the 2nd Brigade, 1st Cavalry Division, are committed to a series of sweeps entitled Paul Revere I through IV.

May 11

NAVAL: Off South Vietnam, the escort ship *Brister*, the minesweeper *Vireo*, and the Coast Guard patrol ship *Point Gray* attack and sink a 120-foot North Vietnamese freighter attempting to run supplies to Viet Cong units.

MARINES: At Chu Lai, South Vietnam, jet aircraft are launched for the first time from a land-based catapult when four A-4 Skyhawks take off. With this equipment, their standard runway roll of 8,000 feet is reduced to just 1,400 feet.

May 12

AVIATION: At the Pacific Missile Range at Point Mugu, California, the advanced and highly sophisticated Phoenix missile is test-fired for the first time. Within a decade it is the standard armament of new Grumman F-14 Tomcat fighters.

May 17

MARINES: At New Orleans, Louisiana, Jesuit High School sponsors the first marine-oriented junior naval ROTC program.

May 21

MARINES: At Guantánamo Bay, Cuba, a marine sentry shoots a Cuban soldier attempting to infiltrate the base.

May 22

NAVAL: The swift boat *PCF-41*, while patrolling the Dinh River in the Rung Sat Special Zone, South Vietnam, is fired upon by a 57mm recoilless rifle and sunk.

May 23

AVIATION: Over the Tonkin Gulf, North Vietnam, a Talos missile fired from the nuclear-powered cruiser *Long Beach* downs a Communist MiG at extreme range. This is the first successful kill by the Talos system.

May 25

AVIATION: In South Vietnam, the 1st Aviation Brigade is activated by the army to better manage and control the huge influx of helicopters and light observation aircraft deploying throughout the country. By 1970 they will be servicing 3,500 helicopters and 600 fixed-wing aircraft.

MARINES: At Guantánamo Bay, Cuba, marines drive off five Cuban soldiers who had scaled the fence and infiltrated the naval base.

May 30–31

AVIATION: Nearly 300 American warplanes strike targets in North Vietnam, including an important arsenal, in their heaviest raid yet.

June 1

MARINES: At Camp Pendleton, California, 5th Marine headquarters and two battalions of the 27th Marines are activated. Meanwhile, the 1st Battalion, 27th Infantry is also activated at Kaneohe, Hawaii, within the 1st Marine Brigade.

June 2

AVIATION: The lunar exploration vehicle *Surveyor 1* lands safely on the moon and sends televised images of the surrounding surface back to Earth. These are then relayed around the world by the *Early Bird* satellite.

June 2–13

MILITARY: In Bien Long Province, South Vietnam, the 1st Infantry Division begins Operation El Paso II to destroy Viet Cong units lurking north and west of Saigon. Heavy fighting develops near the Cambodian border by the time the operation concludes; for a loss of 200 dead and wounded, the Americans inflict nearly 1,000 casualties on the Communists.

June 2–20

MILITARY: Near Dak To, Konum Province, General Willard Pearson commits his 101st Airborne Division to Operation Hawthorne. In its course, Lieutenant Colonel David Hackworth's 1st Battalion, 327th Infantry, defeats a force of Viet Cong besieging a Special Forces camp. The Communists are also reinforced and begin attacking the intruders, badly mauling one of Hackworth's companies. Both sides continue pouring in troops and at length the North Vietnamese are forced to withdraw with heavy losses.

June 3–6

AVIATION: As Lieutenant Colonel Thomas P. Stafford pilots the *Gemini 9* spacecraft on orbit around the Earth, Lieutenant Commander Eugene A. Cernan is the second American astronaut to walk in space. However, problems with their Agena Target Docking Adapter result in a shortened mission.

June 7

MILITARY: In Kontum Province, South Vietnam, Company C, 2nd Battalion, 503rd Infantry is besieged by superior numbers of Viet Cong and nearly overrun until Captain William Carpenter calls down a napalm strike on his own position. The Communists are driven back while the Americans hold their ground with a loss of six dead and 25 injured.

June 8

AVIATION: The massive XB-70 Valkyrie prototype is destroyed when an escorting F-104N Starfighter is suddenly drawn in by powerful wingtip vortices and collides with it, knocking off its tail. Major Carl Cross is unable to eject from the spinning bomber and dies in the crash.

June 11

MILITARY: Secretary of Defense Robert McNamara declares U.S. troop strength in South Vietnam at 285,000 men, with total fatalities since the year began at 2,100.

June 12

AVIATION: Commander Harold L. Marr, flying an F-8 Crusader off the carrier *Hancock*, downs a MiG-17 over North Vietnam with a Sidewinder heat-seeking missile. This is also the first confirmed kill by Crusader aircraft, which acquire the nickname "MiG Masters."

June 16

AVIATION: Over Than Hoa, North Vietnam, aircraft from the carrier *Hancock* commence a sustain campaign to destroy the petroleum facilities located there. Similar facilities at Hanoi and Haiphong are likewise struck.

- An Air Force Titan IIIC launch rockets hurls seven experimental communications satellites into orbit 18,000 miles above the equator. Tests demonstrate the viability of a global communications system for the military.

June 18–27

MARINES: In the II Corps zone, the Seventh Fleet Special Landing Force (3rd Battalion, 5th Marines) storms ashore in Phu Yen Province during Operation Deckhouse I. Three more landings are made under the same designation in 1966.

June 20

NAVAL: Along the Mekong Delta, South Vietnam, Coast Guard cutters *Point League* and *Point Slocum* intercept a 120-foot steel trawler near the Co Chien River, drive it ashore, and burn it. The vessel was carrying 120 tons of munitions for local Viet Cong units.

June 25–July 2

MARINES: Helicopter assaults bring the 2nd Battalion, 4th Marines and 3rd Battalion, 1st Marines into combat northwest of the ancient capital of Hue, South Vietnam. They suffer 23 dead and 58 wounded but recover 82 Viet Cong bodies on the ground.

June 26

MARINES: In South Vietnam, Sergeant James S. Dodson and Lance Corporal Walter Eckes, prisoners of the Viet Cong since the previous May, escape and make their way to friendly lines.

June 29

AVIATION: The American government, reacting to increasing infiltration of men and materiel from North Vietnam to the South, now allow the bombing of targets on the outskirts of Hanoi and the port of Haiphong, especially its oil storage facilities. To that end, 46 jets from the carriers *Constellation* and *Ranger* sweep and destroy several petroleum installations.

June 30

MARINES: At this point in the war, marine manpower levels are 20,512 officers and 241,204 enlisted men.

July 1

AVIATION: At Tan Son Nhut Air Base, South Vietnam, General William W. Momyer is appointed commander of the Seventh Air Force.

NAVAL: Off Haiphong, North Vietnam, three Communist torpedo boats attack the frigate *Coontz* and the destroyer *Rogers*, and all torpedo boats are sunk through a combination of gunfire and carrier aircraft.

- To keep the Long Tau River channel south of Saigon, South Vietnam, free of mines, 12 57-foot minesweepers of Mine Squadron 11 are organized into Detachment Alpha.

July 4–14

MARINES: In the An Hoa area south of Da Nang, South Vietnam, several battalions of the 9th Marines sweep through and engage the resident Viet Cong battalion. By the time the operation concludes, the marines kill 380 Communists at a cost of 24 dead and 172 wounded.

July 6

AVIATION: According to Radio Hanoi, American prisoners have been paraded through the city and subjected to taunts by North Vietnamese onlookers.

July 7–August 3

AVIATION: In support of Operation Hastings in the I Corps tactical area, marine helicopters fly 10,000 sorties in support of ground forces while attack aircraft perform another 1,677.

MARINES: In Quang Tri Province, South Vietnam, directly below the Demilitarized Zone (DMZ), Operation Hastings, the largest single marine endeavor to date, commences when five battalions belonging to the 1st, 3rd, 4th, and 5th Marines tackle the North Vietnamese 324B Division, which had infiltrated across the border. In the fighting, reconnaissance units operating deep behind enemy lines call in air and artillery strikes under the code name “Stingray,” and they prove highly effective. By the time fighting ceases, 700 Communists are dead while the marines sustain 126 killed and 448 wounded.

July 9

AVIATION: The General Dynamics F-111 swing-wing fighter hits 1,800 miles per hour for the first time.

July 11

MILITARY: Sergeant Major William O. Woodridge, a highly decorated, 25-year veteran of two wars, is sworn in as the first sergeant major of the army.

July 13

AVIATION: Over North Vietnam, five MiG-17s are downed by air force F-4 Phantom IIs while a sixth falls to a Navy F-4 from the carrier *Constellation*. This brings the total of enemy aircraft destroyed to 15.

July 16

NAVAL: In Quang Tri Province, South Vietnam, the Seventh Fleet Amphibious Ready Force lands marines during opening phases of Operation Deck House II.

July 18–21

AVIATION: The *Gemini 10* space capsule, piloted by Commander John W. Young and Major Michael Collins, completes 43 Earth orbits and also successfully docks with the Athena space vehicle.

July 20

AVIATION: Over southern North Vietnam, the Seventh Air Force commences Operation Tally Ho against military targets there. They are assisted by men and aircraft of the 1st Marine Air Wing (1st MAW), which contributes several sorties.

July 21

AVIATION: In the I Corps tactical zone, South Vietnam, all Boeing CH-46 Sky-knight helicopters are grounded until better air and fuel filters can be retrofitted to handle the intense dust present during operating conditions.

July 30

AVIATION: American warplanes bomb Communist units and strong points in the Demilitarized Zone (DMZ) separating North and South Vietnam.

August 3

AVIATION: Aircraft from the carrier *Constellation* attack oil facilities at Haiphong, North Vietnam. The Soviet Union claims that its merchant ship *Medyn* was struck by bullets fired by the jets.

August 3–September 13

MARINES: In the I Corps tactical zone, the III Marine Amphibious Force commences a reconnaissance effort named Operation Prairie and employs “Stingray” tactics to halt the infiltration of two North Vietnamese divisions into Quang Tri Province.

August 4

MILITARY: The call goes out for a monthly draft of 46,200 men, the highest inducted since the Korean War.

August 6

AVIATION: At Williams Air Force Base, Arizona, civilian scientists-astronauts Owen K. Garriot, Edward G. Gibson, and Harrison H. Schmitt all receive their air force pilot wings.

NAVAL: The *Asheville*, part of a new class of small patrol vessels, or PGMs, is commissioned. In time, PGMs play a vital role in naval operations throughout Southeast Asia.

August 6–22

MARINES: In Quang Nam and Quang Tri Provinces, South Vietnam, the 5th Marines and South Vietnamese forces begin Operation Colorado by sweeping through the Que Son Valley in a search-and-destroy effort, killing 170 Communists. Consequently, the 2nd North Vietnamese Division withdraws from the region.

August 18

MARINES: On the Batangan Peninsula, south of Chu Lai, South Vietnam, the 2nd Korean Marine Brigade deploys for combat operations in the I Corps tactical zone.

August 20–29

MARINES: In Quang Nam Province, South Vietnam, Operation Allegheny commences as a battalion of the 3rd Marines sweeps the region, killing an additional 117 Viet Cong.

August 22

NAVAL: Operation Deckhouse II unfolds as the amphibious assault ship *Iwo Jima* lands marines 100 miles east of Saigon, South Vietnam. There they are to join U.S. and South Vietnamese paratroopers in rooting out local Viet Cong units.

August 23

NAVAL: The freighter SS *Baton Rouge* strikes a mine in the Long Tau Channel 20 miles east of Saigon, South Vietnam; it suffers seven dead and is beached in consequence. This particular vessel had been chartered by the Military Sea Transport Service (MSTS).

August 25

AVIATION: At Sheppard Air Force Base, Texas, the first class of 212 German air force student pilots arrives for training similar to that obtained by U.S. pilots. The clear skies of Texas are also a welcome change from the overcast clime of their homeland.

August 26

AVIATION: Today air force and navy aircraft fly a record 156 missions over North Vietnam without losing a single plane.

Bell UH-1B Iroquois (Huey) gunship flying with Navy Light Attack Helicopter Squadron 4 (HAL-4) in support of navy riverine operations in South Vietnam. (San Diego Aerospace Museum)

MILITARY: Northwest of Saigon, Vietnam, the 196th Infantry Brigade (Light) is rushed into position.

August 29

AVIATION: In the wake of a massive earthquake that devastates large portions of Turkey, air force transports begin conveying 50 tons of medical supplies, water purifying systems, and medical personnel to the afflicted regions.

- In Haiphong Harbor, North Vietnam, several Chinese torpedo boats fire upon A-6 Intruders and A-4 Skyhawks from the carrier *Constellation* and are sunk in consequence. The Red Chinese government protests that these vessels were actually unarmed merchant ships.

August 30

AVIATION: Naval aviators begin flying UH-1B “Huey” helicopters acquired from the army in support of Operation Game Warden. Their success culminates in the founding of Helicopter Attack (Light) Squadron 3 (HAL-3), a highly decorated navy squadron from this conflict.

September 3

AVIATION: Soviet-supplied MiG-21 jet fighters begin appearing at North Vietnamese airfields for the first time but, strangely, they remain off limits to U.S. aircraft.

September 4

MARINES: In the Thang Binh District, Que Son Valley, two companies of the 1st Battalion, 5th Marines are involved in a stiff firefight. At length they are reinforced by the 3rd Battalion, 5th Marines, who are helicoptered in. Father Vincent Capodanno, the beloved “Grunt Chaplain,” is among them, and he sacrifices his life under fire to save several wounded marines. The navy padre wins a Medal of Honor.

September 6

MARINES: Headquarters, Marine Corps requests women marines for service in the Western Pacific. By spring, more than 100 are stationed in Japan, Okinawa, and South Vietnam.

September 8

MILITARY: At Bien Hoa, South Vietnam, the 11th Armored Cavalry (“Blackhorse”) deploys as an independent tactical unit. Equipped with numerous tanks, helicopters, and flamethrower units, it is tasked with securing the U.S. embassy and escorting convoys along dangerous roads.

September 11

AVIATION: Air force and navy aircraft fly a record 171 missions over North Vietnam without losing a single plane.

NAVAL: As Operation Game Warden continues along the Co Chien River, South Vietnam, Viet Cong forces fire upon two river patrol boats, killing one sailor; this is the operation’s first fatality.

September 12–15

AVIATION: In space, the *Gemini 11* space capsule piloted by Lieutenant Commander Richard Gordon and Commander Charles C. Conrad completes 44 orbits,

a space walk, and a docking with an Athena space vehicle. They are recovered by the helicopter assault ship *Guam* in the Atlantic after 71 hours in space.

September 13

MARINES: Just south of the Demilitarized Zone (DMZ), I Corps tactical zone, the Seventh Fleet Special Landing Force (SLF) embarks on Operation Deckhouse in support of ongoing Operation Prairie by landing along the coastline. Over the next 12 days over 200 Communists are killed at a cost of 36 marines killed and 167 wounded.

September 13–February 12, 1967

MILITARY: In Binh Dinh Province, South Vietnam, the 1st Cavalry Division unleashes Operation Thayer in deploying 120 helicopters and five battalions in its biggest maneuver to date. These units invade the Viet Cong stronghold in the Kim Son Valley, but most Communist units slip away and escape intact.

A UH-1D helicopter from the 336th Aviation Company sprays a defoliation agent on the jungle in the Mekong Delta. (*National Archives*)

September 14–November 3

MILITARY: Northwest of Saigon, South Vietnam, the 196th Infantry Brigade begins patrolling in concert with Operation Attleboro. Light resistance is encountered.

September 15

NAVAL: Operation Deckhouse IV unfolds as the Seventh Fleet Amphibious Ready Group deposits marines in Quang Tri Province, South Vietnam.

September 16

AVIATION: Off the Pratas Reef southeast of Hong Kong, helicopters from the carrier *Oriskany* rescue 44 sailors from the sinking merchant vessel *August Moon*.

MARINES: In the I Corps tactical zone, several companies of the 1st Battalion, 4th Marines are ambushed while approaching the Nui Cay Tre ridge line and an intense bush fight erupts that also draws in the 3rd Battalion, 4th Marines and the 2nd Battalion, 7th Marines. The struggle continues until October 4.

September 17–27

MARINES: In Quang Nai Province, South Vietnam, Operation Golden Fleece 7-1 commences when a battalion of the 7th Marines kills 244 Viet Cong while protecting the local rice harvest.

September 20

AVIATION: Over Edwards Air Force Base, California, the NASA X-24 “lifting body” is successfully demonstrated by Lieutenant Colonel Donald M. Sorlie, who reaches 400 miles per hour in a three-and-a-half minute descent. This is the first such aircraft ever flown by an air force officer, which is dropped from 45,000 feet by a B-52.

September 22

NAVAL: On the Long Tau River, South Vietnam, two minesweeping vessels are bombarded by Viet Cong recoilless rifle fire; *MSB 15* is struck in the pilot house, losing one dead and 11 wounded.

September 23

MILITARY: In an attempt to cut off Communist infiltration into South Vietnam, American aircraft began a concerted aerial defoliation program by spraying jungles south of the DMZ.

September 25

MILITARY: At Pleiku, Central Highlands, South Vietnam, the 4th Infantry Division arrives and deploys one of its armored units to the southern reaches of III Corps near Saigon.

September 29

AVIATION: At Khe San, South Vietnam, the 1st Battalion, 3rd Marines and an artillery battery of the 13th Marines are airlifted in place by marine KC-130 transports. This base is in supporting distance of a Special Forces camp known locally as the Rockpile.

NAVAL: The amphibious vessels *Boxer*, *Rankin*, *Plymouth Rock*, *Ruchmankin*, and *Suffolk County* assist victims of Hurricane Inez in Haiti and the Dominican Republic.

October 6

MARINES: In the I Corps tactical zone, the 3rd Marine Division assumes responsibility for Quang Tri and Thua Thien Provinces, the northernmost regions of South Vietnam, while the 1st Marine Division occupies Quang Nam, Quang Tin, and Quang Ngai farther south.

October 7

AVIATION: Given mounting public anxiety over UFO sightings, the air force chooses the University of Colorado to help conduct independent investigations of such phenomena.

October 9

AVIATION: Navy aircraft score two kills over North Vietnam when an A-1 Skyraider from the carrier *Intrepid* downs a MiG-21 over the Phy Ly Bridge, Hanoi, while an F-8 Crusader from the *Oriskany* bags another.

October 13–14

AVIATION: A force of 173 American warplanes launch the heaviest strike on North Vietnam to date; the U.S. government announces that a total of 403 warplanes have been downed by enemy fire since February 7, 1965.

October 14–16

MARINES: In Tampico, Mexico, Marines airlifts assist victims of Hurricane Inez.

October 17

AVIATION: Pressed for trained personnel in South Vietnam, the Marine Corps defers the resignations and retirements of 500 pilots and maintenance officers.

October 25

NAVAL: Off the coast of North Vietnam, Operation Sea Dragon unfolds as warships of the Seventh Fleet, ranging from battleships to destroyers, begin bombarding Communist coastal batteries, radar installations, and transportation routes. They also begin directly attacking enemy coastal shipping, sinking 230 small vessels by month's end. This activity is designed to dovetail with the ongoing air campaign over North Vietnam.

October 26

NAVAL: In the Gulf of Tonkin, a flare locker fire onboard the carrier *Oriskany* kills 43 sailors and injures 16. This is the first of three destructive conflagrations onboard carriers in this conflict.

October 31

AVIATION: The air force contracts with the Boeing Company to develop and manufacture the AGM-65 Maverick missile. This is a short-range, television-guided weapon to be carried by FB-111 and B-52 jet bombers.

NAVAL: On the Mekong River, patrol boats *PBT-105* and *PBR-107* sink or seize 57 Viet Cong junks and sampans in a three-hour action. During the fracas, Boat-swain's Mate First Class James E. Williams orders his boat's searchlights turned on to assist the gunners and arriving helicopters, despite exposing himself to greater danger. He wins a Medal of Honor.

- On the Tau River, the minesweeper *MSB-54* strikes a mine and sinks with the loss of two sailors. This is the first vessel of its class lost in combat.

November 1

AVIATION: At Da Nang, South Vietnam, VMA(AW)-242 deploys with the first marine A-6 Intruder jet bombers in the theater.

MARINES: In California, four marines die during fire fighting efforts along the Piedro de Lumbré Canyon.

November 2

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, North Koreans ambush a patrol of the 23rd Infantry, 2nd Infantry Division, killing six Americans.

November 3

MILITARY: Northwest of Saigon, South Vietnam, the 1st Battalion, 27th Infantry under Major Guy S. Meloy encounters a Viet Cong division near Dau Tieng. The Americans successfully defend themselves over the next 30 hours, heavily repulsing six major assaults.

November 4

NAVAL: In the South China Sea, a fire in the oil and hydraulic storage area onboard the carrier *Franklin D. Roosevelt* results in the deaths of seven sailors, with a further four injured.

November 6–25

MILITARY: In the Central Highlands, South Vietnam, II Field Force commander Lieutenant General Jonathan O. Seaman expands Operation Attleboro into the first multidivisional endeavor of the war effort. The 1st Infantry Division and a brigade from the 25th Infantry Division sweep their assigned area clean of Viet Cong forces, sending them reeling toward the Cambodian border. For a loss of 155 dead and 494 wounded, the Americans kill 300 Communists and take several large weapon caches. General William C. Westmoreland is also convinced that the Viet Cong, normally elusive, will stand and fight to protect their base areas. These regions are the next object for expanded “search-and-destroy” operations.

November 9

AVIATION: The General Dynamics F-111 passes an important hurdle by flying at the speed of sound for 15 minutes at an altitude of less than 1,000 feet. This is a major test of its terrain-following internal guidance system, the first such system anywhere in the world.

November 11–15

AVIATION: The *Gemini 12* space capsule, piloted by Commander James A. Lovell and Lieutenant Colonel Edwin E. Aldrin, Jr., completes 59 Earth orbits, a space walk, and a successful docking with an Athena space craft. This is also the last flight of the Gemini Project.

November 14

AVIATION: At McMurdo Sound, Antarctica, a C-141 Starlifter flown by Captain Howard Geddes, 86th Military Airlift Squadron, having traversed 2,200 miles from Christchurch, New Zealand, successfully touches down on the ice.

November 15

AVIATION: At Tuy Hoa, South Vietnam, the air force constructs its first base, finishing it 45 days ahead of schedule.

November 18

NAVAL: The destroyers *John R. Craig* and *Hamner* shell and destroy a Communist radar facility two miles north of the Demilitarized Zone (DMZ).

November 23

NAVAL: Off the coast of North Vietnam, ongoing Operation Sea Dragon scores a striking success when the destroyers *Mullany* and *Warrington* engage a Communist convoy of 60 barges laden with supplies and sink or damage 47.

December 2

MILITARY: Along the road near Suoi Cat, South Vietnam, the Viet Cong 275th Regiment ambushes the 1st Squadron, 11th Armored Cavalry. The “Blackhorses” respond with concentrated artillery and tank canister rounds that rout the enemy with heavy losses.

December 5

NAVAL: Northeast of Dong Hoi, North Vietnam, Communist shore batteries shell the destroyer *Ingersoll*, scoring several near misses.

December 10

MILITARY: To throw an even tighter security cordon around Saigon, South Vietnam, the 199th Light Infantry Brigade arrives and deploys to III Corps. For the rest of its tour, this unit remains in close proximity to the capital.

December 11

NAVAL: In the Mekong River, South Vietnam, two PBR patrol boats engage a Viet Cong force of 40 sampans along a canal, sinking 28 and killing nine enemy soldiers.

December 14

AVIATION: During a nighttime air strike in South Vietnam, Colonel Albert R. Howarth displays extreme courage and ingenuity under enemy fire; he is awarded the Mackay Trophy.

December 16

MILITARY: At Bear Cat, South Vietnam, the 9th Infantry Division arrives and deploys in the Southern III Corps area. Within weeks it is drawn into fighting along the Mekong Delta and its 2nd Brigade joins the Mobile Riverine Force, the first amphibious force employed by the U.S. Army since the Civil War.

December 23

NAVAL: Three miles north of Dong Hoi, North Vietnam, Communist shore batteries bombard and strike the destroyer *O'Brien* twice, killing two sailors and wounding four.

MARINES: In the I Corps area, III Marine Amphibious Force reaches a strength of 67,789 men (18 infantry battalions, eight artillery battalions, two tank battalions, 11 fixed-wing squadrons, and 10 helicopter squadrons). This year marine losses totaled 1,692 killed and 10,270 injured.

December 24–January 31

AVIATION: In a goodwill gesture, President Lyndon B. Johnson orders a one-month Christmas cease-fire in order to promote peace talks; Communist leaders in Hanoi do not reciprocate.

December 27

MILITARY: In the Lim Som Valley, South Vietnam, Company C, 1st Battalion, 12th Cavalry, is attacked by the North Vietnamese 22nd Regiment at landing Zone Bird. The Americans are nearly overrun until nearby Battery B, 2nd Battalion, 19th Artillery fires new “Beehive” antipersonnel rounds point-blank into enemy ranks.

1967***January***

MILITARY: Of the 485,000 U.S. forces in South Vietnam, no less than 239,400 are U.S. Army troops. General William C. Westmoreland, buoyed by the influx of manpower, wishes to do more than simply stabilize the situation and declares 1967 the “year of the offensive.”

January 1–April 5

MILITARY: In Pleiku Province, Central Highlands, South Vietnam, the 4th Infantry Division under Major General William R. Peers begins screening operations to prevent North Vietnamese infiltration into the region. By the time his offensive ends, no less than 11 engagements have been fought and won by his troops.

January 2

AVIATION: Over the Red River valley, North Vietnam, F-4C Phantom IIs under Colonel Robin Olds of the 8th Tactical Fighter Wing, fly a mission profile identical to F-105 Thunderchiefs fighter bombers to lure MiG-21 interceptors to them. Operation Bolo works perfectly and seven Communist jets are shot down in only 12 minutes. This is a single-day aerial record; among the victors was Colonel Olds, who bagged a MiG and became the only U.S. Air Force ace to score kills in both World War II and Korea.

January 5

MILITARY: The State Department admits that, to date, 5,008 Americans have been killed in South Vietnam, and 30,093 wounded in the year 1966. Total casualties since January 1961 are even higher; 6,664 dead, and 37,738 injured. Presently 380,000 American troops are slogging around Southeast Asia, the majority of them combat troops.

January 8

AVIATION: At Marble Mountain, South Vietnam, marine HMH-463 introduces the first Sikorsky CH-53A Sea Stallion heavy lift helicopters, each capable of lifting up to 12,000 pounds in outside configurations.

January 8–26

MILITARY: Northwest of Saigon, South Vietnam, a force of 16,000 army troops, backed by 14,000 South Vietnamese, commence “Operation Cedar Falls” against Viet Cong positions and encampments in a region known as the Iron Triangle. Elements of the 175th Airborne Brigade, the 1st and 25th Infantry Divisions, and

South Vietnamese forces sweep through the region, but the Viet Cong wisely decide not to stand and fight. It results in 750 Communist dead and 280 captured plus large caches of weapons and supplies, but no knockout blow. The Americans lose 72 soldiers killed in action.

January 12

MILITARY: In Gia Dinh Province, South Vietnam, General William C. Westmoreland commences Operation Fairfax to shore up the defenses of Saigon. The 199th Infantry Brigade and the South Vietnamese 5th Ranger Group commence a year-long pacification program that eliminates much of the threat, but Communist guerrillas remain a persistent problem.

January 13

NAVAL: In Washington, D.C., Master Chief Gunner's Mate Delbert D. Black becomes the navy's senior enlisted adviser, who counsels the chief of naval operations on matters pertaining to enlisted personnel. In time, the position is renamed master chief petty officer of the navy (MCPON).

January 16

MILITARY: Determined to halt Communist infiltration along the Demilitarized Zone (DMZ), MACV orders the construction of a fortified line along the northern border of South Vietnam.

MARINES: In light of intensifying ground combat, the Marine Corps resumes the practice of granting battlefield commissions to enlisted men who demonstrate exceptional leadership qualities under fire.

- At Vieques Island, Puerto Rico, the 10th Marines deploy for month-long live-fire exercises with the 6th and 8th Marines, the 2nd Field Artillery Group, and the 2nd Marine Air Wing (2nd MAW).

January 17

MARINES: At Camp Pendleton, California, the 28th Marines is created as part of the rapidly developing 5th Marine Division.

January 18

AVIATION: At Cape Kennedy, Florida, a Titan IIIC launch vehicle carries eight Department of Defense communications satellites into orbit at one throw.

January 26–April 7

MARINES: In southern Quang Tri Province, South Vietnam, the 7th Marines conducts search-and-destroy missions against Viet Cong units within its grasp. For a loss of 69 marines killed and 556 wounded, the Communists leave behind 383 dead.

January 27

AVIATION: At Cape Kennedy, Florida, a fire onboard the sealed *Apollo 1* space capsule kills three astronauts: Lieutenant Commander Roger B. Chaffee (USN), and Lieutenant Colonel Gus Grissom and Lieutenant Colonel Ed White (both USAF). The accident results in safety modifications to subsequent Apollo spacecraft.

January 31

MARINES: In the I Corps tactical zone, Operation Prairie concludes with a loss of 239 marines dead and 1,214 wounded in return for Communist losses of 1,397 killed.

February 1–March 18

MARINES: In the I Corps tactical zone, the 3rd Marine Division commences Operation Prairie II with one battalion sweeping along the upper part of Quang Tri Province along the Demilitarized Zone (DMZ), while two other battalions stand by in supporting roles. The marines claim 693 Vietnamese dead for the loss of 93 marines killed in action and 483 wounded.

February 4

NAVAL: On the Co Chien River, South Vietnam, the *PBR-113* is set afire by a Viet Cong grenade; damaged beyond repair, it is eventually salvaged for parts.

February 6

AVIATION: The Space Command Center, North American Aerospace Defense Command, is relocated into the very heart of Cheyenne Mountain, Colorado. This hardened, underground facility, protected by millions of tons of solid rock, is impervious to all but a direct hit by a nuclear weapon.

February 8–12

MILITARY: Tet, the Vietnamese New Year, occasions a four-day cease-fire punctuated by small violations, but also a lack of major fighting. However, the Communists use the pause in the fighting to shift 25,000 tons of supplies down the Ho Chi Minh Trail.

February 10

MARINES: At Quantico, Virginia, the Marine Security Guard Battalion is created to train and administer embassy guard detachments around the globe.

February 11–January 21, 1968

MILITARY: In Binh Dinh Province, South Vietnam, Operation Pershing begins as the 1st Cavalry Division unleashes its three brigades in a year-long sweep of the region. They are joined by the South Korean Capital Division and the ARVN 22nd Division; an estimated 9,000 Vietcong are killed.

February 12

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, North Koreans again ambush a patrol of the 23rd Infantry, killing an American soldier.

February 12–22

MARINES: In Quang Nam Province, South Vietnam, the 1st Marine Division begins Operation Stone with a search-and-destroy mission of Go Noi Island; 400 Communists are slain and 74 captured at a price of nine dead and 76 wounded.

February 13

MILITARY: In Long An Province, South Vietnam, Operation Enterprise unfolds as the 3rd Brigade, 9th Infantry Division begins a year-long pacification program to clear out resident Viet Cong units.

MARINES: In the United States, marines begin training with the new, lighter Colt M16 rifle, which is intended to replace the larger, heavier M14. While lethal at close range, the first models acquire a reputation for jamming under combat conditions.

U.S. troops examine drugs and equipment found in an underground Vietcong hospital in War Zone during Operation Junction City, 1967. (Texas Tech University Vietnam Archive)

February 14

MILITARY: In Long Khanh Province, South Vietnam, the 11th Armored Cavalry commences Operation Kittyhawk, designed to keep the highways north of Saigon free from enemy interference. The operation lasts a little over a year and is generally successful.

February 15

NAVAL: On the waterways leading to Saigon, Vietnam, *MSB-45* strikes a mine and sinks while *MSB-49* is damaged by enemy shore fire. One sailor is killed and 16 are wounded.

February 16

NAVAL: In the Rung Sat Special Zone, South Vietnam, River Assault Flotilla 1 cooperates with troops of the 9th Infantry Division while rooting out local Viet Cong units.

February 16–March 3

MARINES: At the southern tip of Quang Ngai Province, South Vietnam, the Special Landing Force (1st Battalion, 4th Marines and helicopters of HMM-363) commences operation Deckhouse IV. They are assisted by Stingray reconnaissance units behind enemy lines, whose air and artillery strikes kill about 280 Viet Cong. Overall, resistance is light and marines sustain seven killed and 111 wounded.

February 21

MARINES: In Hue, South Vietnam, a Viet Cong mine kills writer Bernard B. Fall while he accompanies a marine patrol north of the city.

February 22

AVIATION: Operation Junction City unfolds as a force of 23 C-130 Hercules transports inserts the 173rd Airborne Brigade along the Cambodian border.

MILITARY: In War Zone C near the Cambodian border, the 2nd Brigade, 173rd Airborne Brigade, performs the first and only airborne operation of the Vietnam War. Operation Junction City drops 778 parachutists near Katum in an attempt to halt Communist infiltration movements there.

February 22–May 14

MILITARY: Northwest of Saigon, General William C. Westmoreland commits the second corps-sized operation when Operation Junction City deploys 22 battalions tasked with clearing enemy formations from base areas around the city.

February 24

AVIATION: Near Dalat, South Vietnam, a Cessna O-1A Bird Dog flown by Captain Hilliard A. Wilbanks, 21st Tactical Air Support Squadron, single-handedly engages approaching Viet Cong forces that are threatening a body of South Vietnamese

rangers. He is mortally wounded and shot down on his last pass, winning a posthumous Medal of Honor.

February 25–March 18

MARINES: In the I Corps tactical zone, Operation Prairie II escalates once III Marine Amphibious Force obtains permission to fire artillery across the Demilitarized Zone (DMZ) into North Vietnam. The North Vietnamese army responds in kind; by the time all action ceases, 694 Communists have been killed and 20 taken prisoner. Marine losses are 93 killed and 483 wounded.

February 26

AVIATION: The mouths of the Song Ca and Song Giang Rivers, North Vietnam, are mined by A-6 Intruders off the carrier *Enterprise* in an attempt to stop the flow of enemy supplies. This is also the first aerial mining mission of the Vietnam War.

NAVAL: Off Thanh Hoa, North Vietnam, the cruiser *Canberra* and destroyers *Benner* and *Joseph Strauss* bombard Communist installations along the shoreline. This is the first offensive use of naval gunfire without enemy provocation.

February 27

MARINES: In Da Nang, South Vietnam, Viet Cong forces employ large 122mm Soviet-made rockets for the first time against the airfield; 11 men are killed, 97 are wounded, and 18 parked aircraft are damaged. A further 72 Vietnamese civilians are wounded.

February 28

NAVAL: In the Mekong Delta, South Vietnam, the Mobile Riverine Force, or Task Force 117, employs armored river gunboats to flush out Viet Cong units along the riverbanks.

March 6

NAVAL: While *PBR-124* is patrolling along the banks of the Mekong River, a Viet Cong soldier throws a hand grenade that lands on its deck. Seaman David G. Ouellet suddenly dashes from his machine gun mount and places himself between his captain and the blast, dying instantly. He wins a posthumous Medal of Honor.

March 7

NAVAL: The personnel ceilings for the Women Accepted for Voluntary Emergency Service (WAVES) rise to 600 commissioned and 6,000 enlisted, a 20 percent increase.

March 9–11

NAVAL: Near Vinh Binh, North Vietnam, the heavy cruiser *Canberra* and destroyers *Ingersoll* and *Keppler* shell and destroy several coastal batteries; on the 11th, *Keppler* is struck once, but without casualties.

March 10

AVIATION: Over North Vietnam, air force F-105 Thunderchiefs and F-4C Phantom IIs strike the Thai Nguyen steel factory; this is also the first air raid launched from Ubon, Thailand.

- Today Captain Merlyn H. Dethlefsen ignores damage to his F-105 Thunderchief inflicted by a missile strike and repeatedly attacks Communist gun emplacements so that accompanying fighter bombers can attack the Thai Nguyen steel plant. He wins a Medal of Honor for bravery under fire.
- Two MiG-17s fall before the cannon of Captain Max Brestel, flying an F-105 Thunderchief of the 355th Tactical Fighter Squadron. He is the first air force pilot to claim dual victories during a single sortie.

March 11

AVIATION: The Canal des Rapides bridges outside of Hanoi, North Vietnam, are struck by air force fighter bombers.

- Navy aircraft from the carrier *Oriskany* deploy new Walleye, television-guided glide bombs to attack the Sam Son military barracks, North Vietnam, thereby introducing precision-guided munitions into the war.

NAVAL: The destroyer *Keppeler*, operating off Vinh, North Vietnam, is struck by an enemy shore battery in its forward mount; six sailors are injured.

March 14

NAVAL: Off South Vietnam, the picket escort ship *Brister* and the Coast Guard cutter *Point Ellis* corner a North Vietnamese trawler attempting to land supplies and drive it aground. They had been alerted of its presence by an orbiting P-2 Neptune on Market Time patrol.

March 15

AVIATION: The large Sikorsky HH-53B helicopter performs its maiden flight; it becomes the largest such machine in the air force inventory. It is assigned to Aerospace Rescue and Recovery Squadron operations (ARRS).

March 16

MARINES: Outside Khe Sanh, South Viet Nam, Viet Cong units ambush several marine platoon-sized patrols, killing 19 and wounding 59; only 11 Communists are found dead on the field.

March 17

NAVAL: Off the coast of North Vietnam, the destroyer *Stoddard*, while rescuing a downed pilot from the water, is struck by fire from enemy shore batteries. The vessel uses counterbattery fire to silence its antagonist and then sails off.

March 18

MARINES: In Saigon, South Vietnam, Master Sergeant Barbara J. Dulinsky is the first woman marine to deploy to Vietnam as part of MACV headquarters.

March 19–April 19

MARINES: In the I Corps tactical zone, Operation Prairie II unfolds as the 3rd Marine Division commits five infantry battalions and four artillery battalions to search-and-destroy efforts in Dong Ha and Cam Lo, South Vietnam. By the time the operation winds down 252 Communists have been killed at a cost of 55 dead and 529 wounded.

March 19–20

MILITARY: Near Bau Bang village, northwest of Saigon, South Vietnam, two Viet Cong battalions strike at the 3rd Squadron, 5th Cavalry, but they are repelled in a successful night action.

March 20

NAVAL: Just south of the Demilitarized Zone (DMZ), South Vietnam, the Seventh Fleet's Special Landing Force goes ashore as part of Operation Beacon Hill I. The amphibious ships *Monticello*, *Ogden*, and *Princeton* are all involved.

March 20–April 1

MARINES: Northeast of Dong Ha in the I Corps tactical zone, the Special Landing Force (1st Battalion, 4th Marines) stages an amphibious landing and sweeps along through the region near the coastline. The marines claim 334 North Vietnamese regulars killed at a cost of 29 dead and 230 wounded.

March 21

AVIATION: At Anderson Air Force Base, Guam, President Lyndon B. Johnson decorates 12 Strategic Air Command (SAC) crewmen for B-52 and KC-135 operations over Southeast Asia.

MILITARY: In response to Operation Junction City, large Viet Cong forces attack Firebase Gold near Suoi Tre, South Vietnam, and are badly repulsed by concentrated artillery fire.

March 22

AVIATION: B-52 jet bombers begin arriving at U Tapao, Thailand, to prevent overcrowding at Anderson Air Base, Guam. However, use of this base obviates the need for aerial tankers during bombing missions.

March 22–25

MARINES: In Quang Nam Province, South Vietnam, Operation Newcastle accounts for 188 dead Viet Cong.

March 25

AVIATION: At Eielson Air Force Base, Alaska, the 6th Strategic Wing begins operating as a strategic reconnaissance unit and operates a variety of RC-135 aircraft.

April 1

MILITARY: At Firebase George, northwest of Saigon, South Vietnam, the 1st battalion, 26th Infantry under Lieutenant Colonel Alexander M. Haig repels a determined Viet Cong night attack. By this date, Operation Junction City has succeeded at clearing out major Communist concentrations from the Saigon area.

NAVAL: The navy commissions the *Will Rogers*, the last of its 26 Polaris-armed ballistic missile submarines.

- The cruiser *Providence*, accompanied by four destroyers, unleashes the single-largest shore bombardment of the Vietnam War by hitting coastal targets in North Vietnam.
- The Coast Guard, having spent the last 177 years as part of the Treasury Department, is transferred to the Department of Transportation.

April 3

AVIATION: Paul W. Airey is appointed the first chief master sergeant of the U.S. Air Force; as such, he will advise senior leadership on issues concerning enlisted personnel.

April 8

AVIATION: In Puerto Rico, air force C-141 Starlifters participate in Exercise Clove Hitch III, dropping paratroopers for the first time. This large maneuver

involves over 21,000 U.S. Air Force, U.S. Army, U.S. Navy, and Marine Corps personnel.

April 9–14

AVIATION: Air force C-130 transports of the 315th Air Division begin the largest tactical unit deployment of the Vietnam War by flying 3,500 men of the 196th Light Infantry Brigade and 4,000 tons of equipment from Tay Ninh to Chu Lai, South Vietnam.

April 10

AVIATION: At U Tapao, Thailand, B-52s begin conducting their first air raids against targets in South Vietnam.

MEDICAL: The hospital ship *Sanctuary* is the second vessel of its class to perform medical service off Vietnam.

April 12

MILITARY: In Binh Dinh Province, South Vietnam, a division-sized provisional unit labeled Task Force Oregon deploys in the southern I Corps near Chu Lai to bolster the 1st Cavalry's ongoing operations.

MARINES: In Washington, D.C., Commandant Greene testifies before Congress that the III Marine Amphibious Force requires an additional 40,000 men to successfully fulfill its mission.

April 15

MARINES: Along the Demilitarized Zone (DMZ), South Vietnam, MACV instructs III Marine Amphibious Force to commence building a barrier line just below the border of North Vietnam.

April 19

AVIATION: Over North Vietnam, Major Leo K. Thorsness, 357th Tactical Fighter Squadron, attacks and destroys a missile site and then remains in the area to help discourage MiG-17s from attacking incoming fighter bombers. During this time he refuels twice over Thailand, dodges heavy anti-aircraft fire, and shoots down two MiG-17s. He consequently receives a Medal of Honor for his actions. Thorsness is shot down and captured on March 4, 1973.

April 20

AVIATION: Aircraft from the carriers *Kitty Hawk* and *Ticonderoga* strike power plants only one mile from the center of downtown Haiphong, North Vietnam, the closest they have ever come.

April 20–May 31

MARINES: In the I Corps tactical zone, the 3rd Marine Division commences Operation Prairie IV with new search-and-destroy missions in the vicinity of Dong Ha and Cam Lo. The result is 489 Communist dead and nine captured at a cost of 164 marines killed and 999 wounded.

- At Chu Lai, South Vietnam, marines in the southern I Corps tactical zone are replaced by an army brigade, and they are redeployed along the Demilitarized Zone (DMZ) to staunch the flow of Communist infiltration from North Vietnam.

April 21–May 12

NAVAL: Operation Beacon Star unfolds as the Seventh Fleet drops the Special Landing Force in Thua Thien Province, South Vietnam, to engage any Viet Cong units lurking there. They kill an estimated 764 Communist troops.

April 22–May 17

MARINES: South of Da Nang, South Vietnam, three marine battalions joined by a similar-sized South Vietnamese force begin combat sweeps through the region to eliminate resident Viet Cong units. For a loss of 110 marines dead and 473 wounded, 865 Communists are killed while 173 are captured.

April 24

AVIATION: The carriers *Bon Homme Richard* and *Kitty Hawk* launch jets, which strike enemy airfields at Kep, North Vietnam, for the first time. Concurrently, the air force attacks another base at Hoa Lac, 19 miles to the west. The navy claims two MiG-17s shot down as they attempt to take off.

April 24–May 13

AVIATION: Jets of the 1st Marine Air Wing (1st MAW) fly 1,100 close support missions for marines in close combat near Khe Sahn, South Vietnam.

MARINES: Near Khe Sanh, South Vietnam, Company B, 1st Battalion, 9th Marines engages Communist forces on Hill 861 and they are gradually reinforced by two battalions of the 3rd Marines. This force attacks two North Vietnamese regiments in fortified positions on Hills 861, 881, and 881 South, and intense fighting lasts through May 13. During the struggle, supporting artillery units fire 25,000 rounds. For a cost of 155 marines dead and 425 wounded, 940 Communists are killed.

April 26

AVIATION: The MiG airfields at Kep and Hoa Lac, North Vietnam, become subject to aerial attacks, but those airfields closer to Hanoi remain off limits.

- During his latest Iron Hand mission to Haiphong, North Vietnam, Lieutenant Commander Michael J. Escotin of VA-192 (*Ticonderoga*) is severely damaged by anti-aircraft fire, yet continues attacking a SAM battery before crashing and being killed. He receives a posthumous Medal of Honor.

April 27

NAVAL: Rear Admiral Kenneth L. Veth succeeds Rear Admiral Norvell G. Ward as commander of U.S. naval forces, Vietnam.

April 28

AVIATION: At Ramstein Air Base, West Germany, Operation Creek Party unfolds as Air National Guard KC-97L tankers begin refueling operations as part of a voluntary support effort. This also marks the first time that the ANG has served overseas in an extended capacity.

- A Titan IIIC launch booster sends five *Vela* satellites into orbit for the purpose of monitoring nuclear testing worldwide, especially in China.

April 28–May 12

MARINES: In the Que Son Valley, South Vietnam, Special Landing Force Alpha (1st Battalion, 3rd Marines, and helicopters of HMM-263) conducts Operation

Beaver Cage, an intense search-and-destroy mission against Viet Cong units positioned there. They account for 181 Communists killed and 66 captured at a cost of 55 dead marines and 151 wounded.

April 29

AVIATION: The Military Airlift Command (MAC) wins the 1966 Daedalian Flight Safety Award for a record fifth time.

MILITARY: Along the Demilitarized Zone, South Korea, men of the 2nd Division extract a measure of revenge by ambushing North Korean infiltrators, killing one soldier.

May 1

AVIATION: Aircraft from the carriers *Bon Homme Richard* and *Kitty Hawk* make a second attack on the air base at Kep, North Vietnam, shooting down two MiG-17s and destroying four on the ground.

May 8

MARINES: This being the 13th anniversary of the Communist victory at Dien Bien Phu, North Vietnamese army units attack the marine base at Con Thien, just below the Demilitarized Zone (DMZ). The 1st Battalion, 4th Marines, responds in kind, killing 197 Communists and capturing eight in exchange for 44 dead and 110 wounded.

May 9

MILITARY: In South Vietnam, the Civilian Operations and Revolutionary Development Support (CORDS) is created to support existing pacification efforts. Although a civilian-run agency, 95 percent of its 6,464 advisers are from the army. It is also quite effective at recruiting and enlarging local militias, which mushroom to 475,000 men within one year.

May 11–August 2

MILITARY: In the southern I Corps region, Task Force Oregon is committed to Operation Malheur I to seek out and destroy Communist units in its vicinity. At the end of three months they account for 869 Viet Cong killed, but at the price of 9,000 forcibly evacuated civilians. The extensive use of artillery to reduce suspected targets also leads to widespread devastation.

May 13

AVIATION: Jets of the 8th Tactical Fighter Wing, flying out of Ubon Royal Thai Air Base, Thailand, shoot down another seven MiGs in various aerial engagements for a second time.

May 13–July 16

MARINES: At Khe Sanh, I Corps tactical zone, the newly arrived 26th Marines commit Operation Crockett, a spoiling attack intended to keep the North Vietnamese from building up forces in the region. Marines account for 206 Communist dead while sustaining 52 dead and 255 wounded.

May 15

NAVAL: Three 311-foot long Coast Guard cutters, *Barataria*, *Bering Strait*, and *Gresham*, arrive off South Vietnam. Each carries a crew of 150 men and, collectively, they double the number of Coast Guardsmen in Southeast Asia.

May 18–26

AVIATION: As part of Operation Rolling Thunder, the Seventh Air Force's strategic bombing campaign against North Vietnam, VMA(AW)-242 flies several sorties north of the DMZ in support.

MARINES: Along the Demilitarized Zone (DMZ), marines launch three concurrent sweeps through the area to clear it of Communist forces. Special Landing Force Alpha (1st Battalion, 3rd Marines and helicopters of HMM-263) lands along the coastline and pushes inland under the code name Beau Charger. Simultaneously, battalions of the 4th, 9th, and 26th Marines move into the area of Con Thien as code name Hickory while SLF Bravo lands northeast of that village under the code name Belt Tight. Fighting is intense: 447 Communists are killed at a cost of 142 marines dead and 896 wounded.

MILITARY: In Kontum Province, Central Highlands, South Vietnam, the 4th Infantry Division commits itself to Operations Sam Houston and Francis Marion while engaging two regiments of North Vietnamese regulars. They account for more than 2,000 enemy dead but are worn out by multiple engagements over the next nine days. Consequently, I Field Force commander Lieutenant General Stanley R. Larsen requests MACV to transfer the 173rd Airborne Brigade to the vicinity as reinforcements.

May 19

AVIATION: The carrier *Bon Homme Richard* launches A-4 Skyhawks, which attack a thermal power plant one mile from downtown Hanoi. Escorting F-8 Crusaders also manage to down four MiG-17s in aerial combat.

Marines from 5th Regiment fire at the enemy near the DMZ, May 1967. (*National Archives*)

May 20–28

MARINES: In Quang Tri Province, South Vietnam, two battalions of the 3rd Marine Division sweep the region, killing 445 Communist troops.

May 22

MILITARY: At Camp Greaves, just below the Demilitarized Zone (DMZ), South Korea, Communist infiltrators blow up an American barracks, killing several soldiers.

- Along the Cambodian border, American and Vietnamese Special Forces embark on Operation Daniel Boone, a highly classified border-crossing operation to gather intelligence, take prisoners, and commit sabotage where possible. In the course of four years, 1,825 such missions are launched.

May 25–June 6

MARINES: In Quang Nam and Quang Tin Provinces, I Corps tactical zone, Operation Union II commences as the 5th Marines and 1st Ranger Group (ARVN) commence a search-and-destroy mission through the region. At its conclusion, 701 Communists have been slain in exchange for 110 dead Marines and 241 wounded.

May 27

NAVAL: At Camden, New Jersey, the navy commissions its second nuclear-powered guided-missile frigate, the *Truxtun*.

May 31

AVIATION: Over the Gulf of Tonkin, a KC-135 Stratotanker flown by Major John H. Casteel, 902nd Air Refueling Squadron, makes an emergency refueling of navy fighters low on fuel and saves six of them. For their efforts, Casteel and his crew receive the Mackay Trophy.

- The first A-12 high-speed reconnaissance mission over North Vietnam is flown by CIA pilot Mel Vojvodicha and transpires in three hours and 40 minutes.

May 31

MARINES: Elements of the 3rd Marine Division sweep again through Quang Tri Province, South Vietnam, during Operation Prairie IV, killing 489 Viet Cong; marines losses are 164 dead and 999 wounded.

- Lieutenant General Lewis W. Walt is replaced by Lieutenant Robert E. Cushman as the head of III Marine Amphibious Force.

May 31–June 1

AVIATION: A pair of air force Sikorsky HH-53Es make the first nonstop transatlantic helicopter crossing in time for the Paris air show. They do so in retracing the original flight of Charles A. Lindbergh and complete their sojourn in 30 hours and 46 minutes with nine aerial refuelings.

June 1

AVIATION: The air force transfers 20 Northrop F-5 Freedom Fighters to the South Vietnamese air force to serve as their first jet aircraft.

June 1–July 14

MARINES: In Quang Tri Province, South Vietnam, the 30th Marines, 3rd Marine Division, conduct Operations Cimarron and Buffalo to uproot any lingering Communist influence in the region; 1,290 Viet Cong are reported killed.

June 2

DIPLOMACY: The Soviet Union protests that the merchant vessel *Turkestan* was attacked at Cam Pha, North Vietnam, by American aircraft, killing one sailor and wounding others.

June 5

MARINES: In Qunag Nam and Quang Tri Provinces, South Vietnam, the 5th Marines conduct a final drive through the region, killing 701 enemy soldiers.

June 5–11

AVIATION: When the Six-Day War breaks out between Israel and her Arab neighbors, 1,300 American citizens in Libya are evacuated to Wheelus Air Force Base for their own protection.

June 8

NAVAL: Israeli warplanes mistakenly bomb the intelligence-gathering vessel *Liberty* in international waters north of the Sinai Peninsula, killing 34 sailors and wounding 171. Lieutenant Commander William L. McGonagle, though severely wounded, refuses to quit the bridge until his vessel is out of harm's way, and he wins a Medal of Honor. The government of Israel also promptly apologizes for the action.

June 9

AVIATION: The first Cessna O-2A Skymaster, a twin-boomed, twin-engine forward air control aircraft (FAC) deploys in South Vietnam.

June 17

MILITARY: In the Central Highlands, South Vietnam, the 3rd Brigade, 1st Cavalry Division, and the 173rd Airborne Brigade commence Operation Greeley to preempt any North Vietnamese attacks against Dak To.

June 23

AVIATION: Over Camp Lejeune, North Carolina, a collision between two troop-carrying helicopters results in the death of 20 marines.

June 25

NAVAL: Off the Ca Mau Peninsula, South Vietnam, patrol boat *PCF-97* is hit by Viet Cong recoilless rifle fire and sinks; one sailor is wounded.

June 30

DIPLOMACY: The Soviet Union protests that the merchant vessel *Mikhail Frunze* has been struck by bombs during an American raid on Haiphong, North Vietnam, the day previous.

MARINES: At this point in the war, Marine Corps manpower levels are 23,592 officers and 261,677 enlisted men.

July 1

AVIATION: A Titan IIIC launch vehicle places six satellites in near-synchronous orbit as part of the Initial Defense Communications Satellite Program (IDSCSP); at this date, there are already 18 such satellites deployed.

- At Maxwell Air Force Base, Alabama, the headquarters, Civil Air Patrol, completes its relocation from Ellington Air Force Base, Texas.

NAVAL: In Washington, D.C., the new U.S. Naval Intelligence Command is established under the direction of the director of naval intelligence.

July 2–14

MILITARY: In the I Corps tactical zone, South Vietnam, the 1st Battalion, 9th Marines commences Operation Buffalo with a sweep of the Con Thien area as Special Landing Force Alpha (1st Battalion, 3rd Marines), Special Landing Force Bravo (2nd Battalion, 9th Marines) and the 3rd Battalion, 9th Marines, move in as reinforcements. Communist resistance is fierce, as usual, but at the operation's conclusion 1,301 enemy soldiers have been killed. Marine losses are 113 dead and 290 wounded.

July 7

MARINES: In light of a pressing need for more infantry captains, the Marine Corps drops its two-year time-in-grade requirement for promoting first lieutenants to one year.

July 11

AVIATION: The air force publicly unveils its X-24A wingless lifting body, a rocket-powered vehicle destined for research in atmospheric reentry studies.

July 13

AVIATION: Distinguished Flying Crosses are awarded to 18 astronauts from the U.S. Air Force, U.S. Navy, and Marine Corps for their participation in the Mercury and Gemini space programs.

July 14

NAVAL: Coast Guard vessels performing Operation Market Time accost a steel-hulled trawler that ignores warning shots and is driven ashore at Cape Batangan, South Vietnam. It is found to have been carrying several tons of arms and stores to the Viet Cong.

July 15

MILITARY: At Da Nang, South Vietnam, Viet Cong gunners unleash 50 122mm rockets against aviation facilities. Eight Americans are killed, 175 wounded, and 42 parked aircraft destroyed or damaged.

July 16–October 31

MARINES: In the region of Dong Ha and Cam Lo, South Vietnam. Operation Kingfisher commences as the 3rd and 9th Marines engage in a series of search-and-destroy missions to root out Viet Cong and North Vietnamese units. The marines sustain 340 dead and 1,461 wounded in exchange for 1,117 Communists killed.

July 21

AVIATION: Over North Vietnam, F8U Crusaders from VF-24 and VF-211 (*Bon Homme Richard*) engage and shoot down three MiG-17s in aerial combat near the oil facility at Ta Xa. Air crews from this carrier now claim nine MiGs in all.

July 24

AVIATION: North of Hanoi, North Vietnam, Marine Corps jets strike at the Thai Nguyen power plant facility.

July 29

NAVAL: In the Gulf of Tonkin, the supercarrier *Forrestal* is swept by a fire after a Zuni rocket prematurely ignites and causes a series of explosions on the flight deck. The ensuing conflagration kills 134 sailors and injures 62 and also destroys 21 jet aircraft. Through herculean efforts on the part of its crew, the *Forrestal* returns to operational status in only five days.

July 30

AVIATION: At Fort Worth, Texas, the General Dynamics FB-111A makes its maiden flight; this is a strategic bomber version of the fighter.

July 31

MARINES: At Camp Pendleton, California, regular and reserve Marine Corps units conduct Exercise Golden Slipper to test how well the two elements can be integrated under combat conditions. This is also one of the largest landing exercises held in the area.

August

MILITARY: Army bulldozers, fitted with the new, 4,000-pound Rome plow, begin clearing Route 13 north of Lai Khe, South Vietnam. The Americans clear the jungle back a distance of 200 yards on either side of the road, denying the enemy cover, and the road is declared open by November 1.

August 1

NAVAL: In Washington, D.C., Admiral Thomas H. Moorer gains appointment as the 18th chief of naval operations.

- The navy announces its decision to reactivate the *Iowa*-class battleship *New Jersey*, whose 16-inch guns would prove useful off the coast of Vietnam.

MARINES: At this date, the number of marines committed to combat operations in Southeast Asia tops 78,000.

August 9

MILITARY: In the Central Highlands, South Vietnam, army units return to the Song Re River valley to clear out a concentration of Communist forces. The 2nd Battalion, 8th Cavalry, deploys Company A under Captain Raymond K. Bluhm at Landing Zone (LZ) Pat, where it is immediately taken under enemy fire. Though badly outnumbered, Bluhm calls in helicopter gunships and artillery support as he attacks up the ridge, causing the enemy to flee. Success results in a Valorous Unit Award to the regiment while A Company's guidon also receives a streamer.

August 10

AVIATION: In Washington, D.C., Congress trims \$172 million from the navy F-111B carrier aircraft program upon the understanding that it is too large for carrier operations. Only the air force acquires this aircraft in any quantity.

- South of Hanoi, North Vietnam, F-4 Phantoms from the carrier *Constellation* down two MiG-21s over a truck park they were defending.

MILITARY: Below the Demilitarized Zone (DMZ) in South Korea, Communist infiltrators attack a party of the 13th Engineers, killing three Americans.

**Moorer, Thomas H. (1912–2004)***Admiral*

Thomas Hinman Moorer was born in Mount Willing, Alabama, on February 9, 1912, and he graduated from the U.S. Naval Academy in 1933. After three years of sea duty he qualified to become a naval aviator and was assigned to Patrol Squadron 22 at the time of Pearl Harbor in 1941. The following February his PBY was shot down off northern Australia and the ship that rescued him was subsequently torpedoed. Moorer then transferred to England as an observer and he commanded Bombing Squadron 132 at Key West, Florida, before receiving his final billet during the war with air staff of the Atlantic Fleet. Immediately after the war, Moorer remained in Japan as part of the strategic bombing survey, then undertook a final stint at sea with the carrier *Midway* (1948–49). Thereafter he concentrated on carrier air operations and ordnance development for many years. Moorer also continued climbing up the ranks, reaching captain in 1951, rear admiral in 1957, and vice admiral in 1962. He returned to the Pacific, commanding the Seventh Fleet just as the United States began its involvement in Southeast Asia. On June 26, 1967, Moorer rose to full admiral and commander in chief of the Pacific Fleet and, in that post, he emerged as a vocal proponent of that conflict.

As commander, Moorer strongly supported the use of air power to dissuade Communist North Vietnam from helping insurgents in South Vietnam. To that end, he began dispatching reconnaissance air-

craft over Laos and the Ho Chi Minh Trail to gather military intelligence. In August 1964, following an alleged Communist patrol boat attack on the destroyers *Mad-dox* and *Turner Joy*, Moorer was instrumental in persuading President Lyndon B. Johnson to launch retaliatory air strikes against North Vietnam. He transferred as commander of the Atlantic Fleet in April 1965, but not before committing naval units to patrol the coast of South Vietnam to interdict Communist supplies arriving by sea. He also helped orchestrate the first systematic bombing campaigns of North Vietnam and Laos while openly criticizing Secretary of Defense Robert S. McNamara's attempt to micromanage the air campaign from Washington. In 1967 Moorer advanced to chief of naval operations. He assumed a central role in the ongoing Vietnam War. He advocated mining North Vietnamese harbors and called for a slowdown in the pace of the American withdrawal from Southeast Asia, and he also supported the American incursion into Cambodia. During the Communist Easter offensive of April 1972, Moorer called for mining Haiphong Harbor, which was eventually done. He capped his career in July 1970 when President Richard M. Nixon appointed him chief of naval operations. Moorer resigned from active duty in July 1974 and died at Bethesda Maryland on February 5, 2004, an outspoken hawk throughout the Vietnam War. To the end, he believed that the United States should have invaded North Vietnam.

August 11

AVIATION: Over Hanoi, North Vietnam, F-105 Thunderchiefs from the 355th and 388th Tactical Wings manage to drop several spans of the Paul Doumer Bridge.

August 13–16

AVIATION: Recent flooding in Fairbanks, Alaska, results in a major airlift of humanitarian supplies and equipment by the U.S. Air Force, the Alaska Air National Guard, and the Alaska Air Command.

August 19

AVIATION: In South Vietnam, a Marine UH-1 Huey helicopter gunship flown by Captain Stephen W. Pless swoops in to rescue four American soldiers on a beach where they are being attacked by larger Viet Cong forces. While escaping, the overloaded machine strikes the water four times before becoming airborne. Pless consequently wins a Medal of Honor while his three crewmen receive Navy Crosses.

August 21

AVIATION: Air force officials estimates that 80 surface-to-air missiles have been fired at American warplanes this day, the largest total ever recorded.

August 24–September 4

AVIATION: In the latest goodwill gesture, President Lyndon B. Johnson orders another halt in air attacks against North Vietnam, eliciting no response from the Communist regime.

August 26

AVIATION: Over North Vietnam, an F-100 flown by Major George E. Day is shot down. Day ejects, evades capture for several days, and then is caught and tortured. Escaping again, he is shot and recaptured. For repeated displays of bravery during a harrowing captivity, he receives a Medal of Honor.

August 28

AVIATION: The Lockheed U-2R, a highly improved version, flies for the first time. Only a dozen are constructed with six going to the air force and six to the Central Intelligence Agency (CIA).

MARINES: At Dong Ha, South Vietnam, Communist artillery and rockets strike aviation facilities at Marble Mountain, killing 10 marines and damaging 49 parked aircraft.

August 30

AVIATION: The air assets of Task Force 77 on Yankee Station, Gulf of Tonkin, are ordered to isolate the port of Haiphong, North Vietnam, by cutting various links. The strategy commences with an attack by jets from the *Oriskany*, which strike four major bridges leading into the city.

MARINES: At Phu Bai, South Vietnam, Viet Cong mortars attack aviation facilities, wounding 57 marines and damaging 18 helicopters.

September–December

AVIATION: The marines ground all their Boeing CH-46 Skyknight helicopters after several accidents point to structural failures in the aft motor pylon. They do not resume combat operations again until December.

September 1

AVIATION: The first Bell AH-1G Cobra helicopter gunships deploy in Vietnam for service acceptance trials. Fast and heavily armed with rockets and minigun pods, they impress army evaluators and a further 838 craft are ordered.

NAVAL: In Washington, D.C., Paul R. Ignatius gains appointment as the 59th secretary of the navy.

September 1–October 4

MARINES: The garrison at Con Thien, south of the DMZ, weathers another harrowing siege until concentrated American fire power forces the Viet Cong to withdraw their artillery.

September 3

AVIATION: At Dong Ha, South Vietnam, a Viet Cong artillery barrage strikes the aviation facility, igniting the ammunition dump and fuel farm; 17 helicopters belonging to HMM-361 are also heavily damaged.

POLITICS: General elections held in South Vietnam make General Nguyen Van Thieu the new president; he holds power until April 1975.

September 4–5

MARINES: In the Que Son Basin, South Vietnam, the 5th Marines conducts Operation Swift, a search-and-destroy effort that kills 571 Communists; marine losses total 127 dead and 352 wounded.

September 9

AVIATION: For displaying extreme bravery under fire while rescuing a downed airman, Sergeant Duane D. Hackney becomes the first living enlisted man to receive the Air Force Cross.

September 11

MILITARY: In the southern I Corps tactical zone, Task Force Oregon launches Operation Wheeler, a major search-and-destroy effort.

September 18

MILITARY: Secretary Robert F. McNamara announces plans to develop and deploy a functional antiballistic missile system designed around the Nike X and Spartan missile systems. Its purpose is to thwart an attack from Communist China, which has developed its own atomic weapons.

MARINES: Throughout South Vietnam, intense monsoon rains and flooding near the Demilitarized Zone (DMZ) takes 10 marine lives and complicate supply efforts there.

September 25

MILITARY: As Operation Wheeler unfolds in the southern I Corps tactical zone, Task Force Oregon is reinforced by the 11th Infantry Brigade and the forthcoming 198th Infantry Brigade (Light). The entire force is then redesignated the 23rd Infantry Division (Americal) under Major General Samuel W. Koster.

MARINES: At Con Tien, I Corps tactical zone, marines endure one of the heaviest Communist bombardments of the entire war when 1,000 artillery rounds strike their facilities. Two Marines are killed while 202 are injured.

September 28

NAVAL: On the Mekong River, South Vietnam, Viet Cong rocket fire sinks a navy PBR with a loss of two killed and four wounded.

October 3

AVIATION: A North American X-15 hypersonic research plane piloted by Major William J. Knight reaches a record-breaking 4,534 miles per hour at an altitude of 102,100 feet. At the time this was the absolute world speed record for a non-orbiting manned aircraft.

- In light of the overreliance on air-to-air missiles, whose reliability under combat conditions has proven spotty, the first McDonnell Douglas F-4E Phantom II armed with a 20mm Vulcan gatling gun is delivered to the air force for evaluation.

October 4

MARINES: In Quang Tin and Quang Ngai Provinces, South Vietnam, additional marine units are dispatched to the Demilitarized Zone (DMZ) and are replaced by a brigade of the Army's 1st Cavalry Air Division.

October 5

AVIATION: In Florida, astronaut and Marine Corps major William C. Williams dies after his T-38 jet trainer crashes.

October 7

MILITARY: Along the Imjim River, South Korea, a patrol boat belonging to the 2nd Infantry Division is attacked by Communist infiltrators.

October 10

AVIATION: The Outer Space Treaty is signed by President Lyndon B. Johnson to prevent the militarization of space. It also includes provisions for the rescuing of stranded astronauts and prohibits any nation from claiming the moon or planets.

October 14

MILITARY: The United States charges North Vietnam with mistreatment of its prisoners in violation of the Geneva Convention.

October 16

AVIATION: At Nellis Air Force Base, Nevada, the first operational F-111A supersonic tactical fighter is delivered. This highly advanced machine, fitted with variable swept wings and nighttime terrain-following radar, is capable of missions under all weather conditions. It flew using radar guidance all the way from Fort Worth, Texas.

October 21

MILITARY: The new 198th Brigade (Light) arrives in South Vietnam from Fort Hood Texas, and is assigned to the new 23rd (Americal) Infantry Division in the I Corps.

October 25

AVIATION: During Operation Rolling Thunder, marine, navy, and air force jets participate in a joint-service attack upon Phuc Yen airfield, North Vietnam; 10 MiG fighters are destroyed on the ground while the 69th MiG is downed by air force fighters.

October 26

AVIATION: South of Hanoi, North Vietnam, a navy F-4 Phantom from the carrier *Constellation* downs a MiG-21.

MILITARY: As a warning to peace protestors, Lewis Hershey, director of the Selective Service, informs college students that their educational deferment will be cancelled if they interfere with military recruiting.

October 27

MARINES: In response to civil rights pressure, the Department of Defense releases a plan to double the number of African-American officers in the Marine Corps. It presently stands at 155, or less than 1 percent.

October 30

AVIATION: Over North Vietnam, Communist forces fire six SA-2 missiles at a Lockheed A-12 aircraft during a reconnaissance mission. Afterward, a small missile fragment is found in the lower-wing fillet area.

- A flight of two F-4 Phantom IIs from the carrier *Constellation* engage four MiG-17s 35 miles northeast of Hanoi, North Vietnam; one MiG is downed by an air-to-air missile.

October 30–November 4

MILITARY: A Special Forces camp at Loc Ninh on the Cambodian border resists a determined Viet Cong siege, assisted by artillery and air strikes.

October 31

NAVAL: At Mare Island, California, the navy decommissions the *Currituck*, its last remaining seaplane tender.

November 1

MARINES: At Da Nang, South Vietnam, Vice President Hubert Humphrey arrives to award the 3rd Marine Division with a presidential Unit Citation for its performance and sacrifices along the Demilitarized Zone (DMZ).

November 1–January 28, 1968

MARINES: In the I Corps zone, the 9th Marines embark on Operation Lancaster by conducting search-and-destroy missions in the vicinity of Camp Carroll, South Vietnam.

November 1–February 28, 1968

MARINES: In the I Corps tactical zone, the 3rd Marine Division commences Operation Kentucky over the next four months; casualties are 520 American dead and 3,079 wounded for 3,281 Viet Cong killed in action.

November 3–December 1

MILITARY: In Kontum Province, Central Highlands, South Vietnam, Viet Cong forces prepare to storm a Special Forces camp at Dak To. However, a spoiling attack is launched by the 4th Infantry Division's 3rd Battalion, 12th Infantry, that drives enemy forces off the top of Hill 1338. Units from the 173rd Airborne Brigade and the 1st Cavalry Division take up the pursuit as far as the Cambodian border.

Hershey, Lewis B. (1893–1977)

Army general

Lewis Blaine Hershey was born in Steuben County, Indiana, on September 12, 1893, and he joined the National Guard in 1911. He served in Europe without seeing combat during World War I, but nonetheless won a regular army commission in 1920. Hershey handled his affairs capably and, despite a polo accident that blinded him in one eye, he attended the Command and General Staff College in 1933. The turning point in his career came in 1936 when he was assigned to the Joint Army and Navy Selective Service Committee, a group of officers tasked with planning wartime mobilization in the event of hostilities. Hershey soon demonstrated that he knew more about manpower policy than any of his contemporaries and he played a central role in drafting the Selective Service and Training Act, passed by Congress in September 1940. The following year President Franklin D. Roosevelt appointed him director of the Selective Service, a position he was to hold for the next three decades. It fell upon Hershey to draft sufficient manpower to meet America's military needs during wartime while leaving sufficiently qualified young men available to work in the factories. To this end he was responsible for establishing a system of education-based deferments, alternative duty for conscientious objectors, and assistance in employment for returning veterans.

Hershey handled all his tasks with aplomb and tact, and the draft process unfolded smoothly. In light of his performance he

became a major general in April 1942, despite his lack of combat experience. After the war, Hershey advocated maintaining a peacetime draft, but he was initially overruled by President Harry S. Truman. However, the expanding nature of the new cold war necessitated restarting the Selective Service in 1947, and Hershey was reinstalled as director. After the Korean War the draft continued but, due to declines in the demand for manpower, Hershey again resorted to broad-based exemptions for college students. The public mood, unfortunately, began turning against the draft in the 1960s as the unpopularity of the Vietnam War soared. In fact, Hershey and the draft became synonymous as symbols of government oppression, and students began burning their draft cards. Hershey, upon the urging of President Lyndon B. Johnson, recommended to local draft boards that deferments for protestors be revoked. Moreover, he opposed all attempts to remove the autonomy of local draft boards, which rendered him something of a political liability in 1968. It fell upon newly elected president Richard M. Nixon, who determined that an all-volunteer force was best for the nation, to remove him from Selective Service, promote him to full general, and name him a presidential adviser. The army retired Hershey in April 1973, ending 53 years of devoted service to the nation. He died in Angola, Indiana, on May 20, 1977, having orchestrated a mobilization campaign that inducted tens of millions of young men across three wars.

November 5

AVIATION: At Naval Air Station North Island, California (San Diego), a Martin SP-5B Marlin seaplane of VP- 40 makes the final operational flight of a navy seaplane. Such aircraft have been in operation since 1911.

November 5–December 9, 1968

MARINES: An extended search-and-destroy mission east of Gio Linh, South Vietnam, by the 3rd Marine Division, the Army 196th Light Infantry Brigade, and the 1st Brigade, 5th Infantry Division, accounts for 3,495 Communist dead. American losses are 395 dead and 1,680 wounded.

November 6

MARINES: Near An Hoa, South Vietnam, a sweep conducted by the 2nd Battalion, 5th Marines through Antenna Valley accounts for 72 dead Communists at the price of 37 marines killed and 122 wounded.

November 8

MILITARY: In Washington, D.C., President Lyndon B. Johnson signs legislation granting women equal opportunities for promotion throughout the U.S. military.

November 9

AVIATION: During a clandestine rescue mission to extract an army reconnaissance team from Laos, an HH-3E Jolly Green Giant helicopter flown by Captain Gerald O. Young, 37th Aerospace Rescue and Recovery Squadron is shot down. Rather than expose other helicopters to danger, he evacuates his wounded crewmen into the jungle and evades capture for 17 hours until he is finally able to call in his own rescue. Young consequently receives a Medal of Honor for bravery under fire. He is also the first Air Force Academy graduate so honored.

- A F-4C Phantom II jet flown by Captain Lance P. Sijan is shot down over North Vietnam, but he ejects and manages to evade capture for six weeks. Captured and severely tortured, Sijan escapes again but is caught and contracts pneumonia while imprisoned. He dies on January 21, 1968, and wins a posthumous Medal of Honor.

November 11

MILITARY: In the southern I Corps tactical zone, South Vietnam, the 1st Cavalry Divisions commence Operation Wallowa in concert with Task Force Oregon to crush the North Vietnamese 2nd Division, then lurking in the Que Son Valley. Enemy forces are decimated but not destroyed, and they filter back in once the Americans depart.

November 13–30

MARINES: West of An Hoa, South Vietnam, Operations Foster and Badger Hunt commence as the 3rd Battalion, 7th Marines and the 2nd Battalion, 3rd Marines engage in search-and-destroy operations; 125 Communists are killed at a cost of 21 marines dead and 137 wounded.

November 14

AVIATION: Northeast of Hue, South Vietnam, the UH-1E helicopter bearing Major General Bruno H. Hochmuth, commander of the 3rd Marine Division, crashes, killing him.

November 15

AVIATION: An X-15 hypersonic research aircraft flown by Major Michael J. Adams enters a Mach 5 spin and breaks up at 65,000 feet. Adams is killed in consequence

and receives astronaut wings posthumously. He is also the first fatality since the X-15 program commenced in 1959.

November 17–December 29

AVIATION: At Fort Campbell, Kentucky, Operation Eagle Thrust commences as C-133 and C-141 transports airlift 10,536 paratroopers and 5,118 tons of equipment (including 37 helicopters) to Bien Hoa Air Field, South Vietnam. This constitutes the largest and longest aerial movement of troops in the war.

November 19

MILITARY: At Bien Hoa, South Vietnam, the two remaining brigades of the 101st Airborne Division (“Screaming Eagles”) are deployed while the 1st Brigade remains in the II Corps region. The entire unit is reunited in the I Corps as of April 1968.

November 19–22

MILITARY: Despite surging American forces in Kontum Province, the North Vietnamese position a regiment atop Hill 875 to serve as a rearguard. On this day the 2nd Battalion, 503rd Infantry, arrives to drive them off and does so after heavy fighting. The Americans are reinforced by the 4th Battalion, 503rd Infantry, at which point the Communists flee the area, having lost over 1,000 men. American losses are 115.

December 4

NAVAL: In Dinh Tuong Province, 66 miles south of Saigon, South Vietnam, the Mobile Riverine Force accounts for 235 Viet Cong dead.

December 8

AVIATION: An F-104 Starfighter jet crashes at Edwards Air Force Base, California, killing Major Robert H. Lawrence, Jr., the nation’s first African-American astronaut selected to fly in space.

MILITARY: In Tay Ninh Province, northwest of Saigon, South Vietnam, the 25th Infantry Division commences Operation Yellowstone while the 1st Infantry Division sorties into the Iron Triangle, Binh Duong Province, in a concerted effort to preempt enemy troop concentrations from launching an offensive. The Americans gradually account for 5,000 Communists killed well into the new year.

December 13

MARINES: At Khe Sanh, South Vietnam, increased Viet Cong activity leads dispatch of the 3rd Battalion, 26th Marines to reinforce the garrison.

December 14

AVIATION: Over North Vietnam, Four navy F-4 Phantom IIs from the carrier *Oriskany* square off against four MiG-21s; one Communist jet is sent down in flames.

December 17

AVIATION: Over North Vietnam, Marine Captain Doyle D. Baker, flying as an exchange officer with an air force squadron, shoots down a Communist MiG-17 while escorting a bomb run. He is the first marine pilot to score a victory in this conflict.

December 19

MILITARY: In the I Corps tactical zone, the 11th Infantry Brigade deploys as part of the Americal Division. This is presently the largest American formation in South Vietnam, with an assigned strength of 20,000 men.

December 26

AVIATION: Operation Rolling Thunder continues over North Vietnam as marine jets strike at targets near Hanoi and Dong Hoi.

December 29

AVIATION: At Offutt Air Force Base, Nebraska, the final RB-47H sorties occur when the 55th Strategic Reconnaissance Wing retires its last remaining Stratojet.

December 31

MILITARY: By year's end, no less than 9,378 American soldiers have been killed in action; to this must be added an additional 6,782 combat-related deaths between 1961 and 1966. Overall strength of combined U.S. military personnel tops 478,000.

- Along the Demilitarized Zone (DMZ) separating North and South Vietnam, work on the so-called McNamara Line, a strongpoint barrier system, has consumed 757,000 man-days over the past 12 months.

MARINES: In Washington, D.C., General Leonard F. Chapman is appointed the 24th commandant of the Marine Corps to replace General Greene.

- At this date, 81,249 marines are serving in South Vietnam, of which 3,461 have been killed and 25,525 have been wounded in 1967.

1968

January

MILITARY: The army has deployed 100 infantry and mechanized battalions, along with 54 artillery battalions, in South Vietnam, representing an aggregate of 331,098 officers and men.

January 1

AVIATION: The Aerospace Defense Command (ADC) is the new designation for the Air Defense Command.

- The Office of the Air Force Reserve becomes part of the Air Staff and functions as a policy planning center for Reserve operations.

January 1–15

AVIATION: Carrier aviation has one of its worst weeks as five jets are lost over North Vietnam during this period.

January 3

MARINES: In the I Corps tactical zone, Commandant General Leonard F. Chapman embarks on an inspection tour of marine units and their facilities.

January 5

AVIATION: The T-41 Mescalero Light Plane joins the Flying Program at the U.S. Air Force Academy.

January 6

AVIATION: In Chu Lai, South Vietnam, Major Patrick H. Brady flies his helicopter in and out of a hot landing zone to rescue wounded soldiers of the 198th Infantry Brigade. For evacuating 39 men under heavy fire to safety he receives a Medal of Honor.

MARINES: General William C. Westmoreland initiates Operation Niagara, which employs heavy air and artillery strikes to break up Communist troop concentrations around Khe Sanh, South Vietnam.

January 8

AVIATION: In South Vietnam, a CH-53 Sea Stallion troop helicopter crashes, killing 36 marines.

January 11

AVIATION: In Nevada, a marine transport aircraft from Quantico, Virginia, crashes, killing 19 marines.

January 12

AVIATION: Tactical air units are hereafter directed to carry with them all the essentials needed for operating at bare bases sporting only runways, taxiways, parking areas, and a water source.

January 15–18

DIPLOMACY: In Washington, D.C., President Lyndon B. Johnson suspends air attacks near Haiphong, North Vietnam, to stimulate interest in peace talks.

January 16

AVIATION: On Sicily, Italy, transports from the United States Air Force Europe (USAFE) and the Military Airlift Command (MAC) fly in humanitarian aid to assist earthquake victims.

DIPLOMACY: North Vietnamese officials spurn an offer of peace talks with the United States until all aerial bombing ceases.

MARINES: At Guantánamo Bay, Cuba, the 2nd Battalion, 28th Marines deploys as the permanent garrison. Henceforth, new units will no longer arrive and depart every 90 days, but will instead be rotated through the unit itself.

- The marine outpost at Khe Sanh, I Corps tactical zone, is reinforced by the 2nd Battalion, 26th Marines; the entire regiment is now present with the garrison.

January 19

MARINES: Near Khe Sanh, I Corps tactical zone, a marine patrol encounters strong enemy forces near Hill 881 North and is obliged to withdraw. This signals the beginning of the Communist siege there.

January 20

MARINES: At Khe Sanh, I Corps tactical zone, Company I, 3rd Battalion, 26th Marines attacks Hill 881 North and begins clearing it of Communist forces. However, the operation ceases and the company withdraws back inside the perimeter after a captured North Vietnamese lieutenant informs his captors that a major assault is brewing over the next several days.

January 21

AVIATION: An eight-jet B-52 jet bomber belonging to the Strategic Air Command (SAC) explodes over North Star Bay, Greenland, spilling its four hydrogen bombs into the ocean. No radiation leaks occur, although one of the seven crew members dies in the ensuing crash.

- Waves of B-52s are employed throughout the siege of Khe Sanh, South Vietnam, which relentlessly carpet Viet Cong and North Vietnamese army troop concentrations around the Marine Corps perimeter.

NAVAL: During the protracted siege of Khe Sanh, South Vietnam, Naval Construction Battalion Unit 301, Detail Bravo, indelibly contributes to the defense of that place, winning a Presidential Unit Citation.

MARINES: In light of new intelligence pointing to some kind of Communist offensive, General William C. Westmoreland orders Marines to stop working on the McNamara Line barrier system along the Demilitarized Zone (DMZ).

- Near Camp Carroll, I Corps zone, the 4th Marines commence Operation Lancaster II to clear the region of Communist forces lurking nearby. The 3rd Marines at Quang Tri perform Operation Osceola for identical reasons.
- At Khe Sanh, I Corps zone, a Communist night assault upon Hill 861 is repulsed by Company K, 3rd Battalion, 26th Marines. North Vietnamese artillery units also begin raining shells and rockets on the marine position over the next 77 days. By this time they are surrounded by the 15–20,000 men of the North Vietnamese 324B and 325C Divisions. The NVA also cuts off Route 9, isolating the garrison. Khe Sanh itself is occupied by 3,500 men of Colonel David E. Lownd's 26th Marines.

January 22

AVIATION: At Thule, Greenland, A B-52G crashes while making an emergency landing, cracking several of its four nuclear weapons open. Several months of cleanup are required before radiation levels are returned to normal.

NAVAL: The intelligence-gathering vessel *Pueblo* is boarded and captured by North Korean forces in the Sea of Japan. The vessel's only defensive weapons, two .50-caliber machine guns, are fast frozen beneath tarpaulins on the bridge. The 83-man crew under Lieutenant Commander Lloyd Bucher, accused of violating the 12-mile territorial limit, is carried off into captivity for 11 months; one sailor, Duane Hodges, is killed in action.

MARINES: At Khe Sanh, I Corps area the garrison is stiffened by the arrival of the 1st Battalion, 9th Marines and two batteries of 105mm howitzers.

January 22–29

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, North Korean infiltrators make harassing attacks against several outposts manned by the 2nd Infantry Division.

January 25

NAVAL: In response to the seizure of the *Pueblo*, the aircraft carrier *Enterprise* is dispatched to the Sea of Japan in a show of force. However, President Lyndon B. Johnson, with his hands effectively tied in Vietnam, does not want to risk a second Asian conflict.

ARVN soldier fires at Vietcong positions in Cholon during the 1968 Tet Offensive fighting in Saigon. (Texas Tech University Vietnam Archive)

January 26

AVIATION: In light of tensions arising from the capture of the navy vessel *Pueblo*, an A-12 high-speed reconnaissance aircraft performs a mission over North Korea. Air National Guard and Air Force Reserve elements are also called into active duty status as a precaution.

January 27

MARINES: Despite a seven-day truce that begins the Tet holiday, the ARVN 37th Ranger Battalion joins the garrison at Khe Sanh, in the I Corps zone.

January 30–31

MILITARY: Although MACV has suspected a Communist buildup and a brewing offensive for some time, they are not able to predict when. It occurs at midnight on Tet, the Vietnamese New Year, and strikes at 36 provincial and 64 district capitals. In Saigon, a Communist sapper team even breaches the walls of the U.S. embassy before they are stopped by military police. American losses for the first nine days of the offensive total 546 dead and 6,000 wounded while Communist casualties are estimated as much higher, around 20,000. The offensive ends in a costly defeat for the Communists, but a corner has been turned in public opinion and the American public begins turning against continued American involvement.

February 1

AVIATION: During the assault on Hue, South Vietnam, helicopters of HMM-165 provide airlift for South Vietnamese forces attacking the Citadel.

MARINES: In Hue, South Vietnam, the 1st Battalion, 1st Marines and 2nd Battalion, 5th Marine maneuver to retake the city back from Communist forces. Their immediate objective is to storm the area south of the Perfume River while the ARVN 1st Division attacks the Citadel on the north bank of the river.

February 2–24

MILITARY: In the III Corps tactical zone, South Vietnam, the old imperial capital of Hue, is the site of intense battling by army troops and marines to wrest it back from the Viet Cong. Elements of the 2nd Brigade, 101st Airborne Division are involved south of the city while the 7th and 12th Cavalry Regiments sweep in from the north and west. After an intense struggle, Communist supply lines are closed down and the city is retaken. Before departing, the Viet Cong line up and execute 5,000 political opponents in the war's single biggest atrocity.

February 3

AVIATION: In Tullahoma, Tennessee, air force engineers at the Arnold Engineering Development Center photograph high-velocity aircraft and missile models with a laser beam. This is the first time a laser has been utilized as a light source.

February 5

MARINES: At Khe Sanh, I Corps zone, marines rely upon ground sensors to detect the approach of enemy units and disrupt their concentration with an artillery barrage. Meanwhile, Company E, 2nd Battalion, 26th Marines successfully defends Hill 861A from a North Vietnamese attack.

February 6

MARINES: In Hue, South Vietnam, savage house-to-house fighting results in marines retaking the provincial headquarters, whereupon the Communist flag is taken down and the Stars and Stripes are run up.

- Aviation facilities at Da Nang suffer from another round of artillery and rocket bombardments, but marines defeat several attempt by sappers to penetrate the base.

February 7

MILITARY: The Special Forces camp at Lang Vei, near Khe Sanh, is overrun by North Vietnamese army troops employing Soviet-made PT-76 tanks for the first time.

February 8

MARINES: In a sharp firefight, Company A, 1st Battalion, 9th Marines defeats a Communist attack on one of its outposts.

February 10

MARINES: In Hue, South Vietnam, the 1st Battalion, 1st Marines and 2nd Battalion, 5th Marines complete mopping-up operations along the south bank of the Perfume River. The first phase of the city's reconquest costs the marines 38 dead and 320 wounded. Communist losses are estimated at over 1,000. Reinforcements also arrive in the form of the 1st Battalion, 5th Marines.

February 13

MARINES: In Hue, South Vietnam, the 1st Battalion, 5th Marines begins its assault on the Communist-held Citadel and they are joined in due course by two battalions of South Vietnamese marines.

February 14

AVIATION: Transports of the Military Airlift Command (MAC) begin conveying elements of the 82nd Airborne Division and 3,000 marines to bases in Southeast Asia. The Continental Air Command also activates Air Force Reserve units to assist the MAC in more routine missions for the time being.

February 17

MARINES: At Camp Pendleton, California, the 27th Marines and the 2nd Battalion, 13th Marines are dispatched as reinforcements to help fight the Tet Offensive.

February 18

MILITARY: At Chu Lai, South Vietnam, the 3rd Brigade, 82nd Airborne Division, deploys to reinforce I Corps while attached to the 101st Airborne Division.

February 24

AVIATION: The 1st Marine Aviation Wing (1st MAW), in an attempt to cut down on high helicopter losses to enemy ground fire, originates the concept of the "Super Gaggle." This involves up to one KC-130 tanker aircraft and eight or more CH-46 helicopters carrying sling-loads beneath their bellies, and backed by the firepower of four A-4 Skyhawks and four UH-1 Huey helicopter gunships. The overall missions are coordinated by a TA-4 two-seater Skyhawk, with the back seat officer acting as director. Thus arranged, the attack planes would strafe and drop napalm along the sides of the flight path, then helicopters would swoop in and deliver their cargoes.

February 25

MARINES: In Hue, South Vietnam, the 1st Battalion, 5th Marines wipes out all final resistance at the Citadel, completing their reconquest of the city. Marine losses total 142 dead and 1,100 wounded to a Communist tally estimated between 1,000 and 5,000 killed, wounded, and missing.

February 27

AVIATION: The Ho Chi Minh Trail in Vietnam is attacked by AC-130A Hercules gunships for the first time.

- At Khe Sanh, I Corps tactical zone, Communist ground fire claims a CH-46 helicopter, killing 22 marine passengers.

February 28

AVIATION: At Tinker Air Force Base Oklahoma, the last C-141 Starlifter is delivered; a total of 284 have been acquired.

MARINES: At Khe Sanh, I Corps tactical zone, as two North Vietnamese battalions begin probing the sector held by the 37th Ranger Battalion, they are struck by heavy concentrations of artillery and air strikes before they can attack in force.

February 29

AVIATION: In light of new public laws removing restrictions from female promotions in the military, Colonels Jeanne Holm and Helen O'Day are made permanent colonels. Holm, for her part, continues as director of women in the air force while O'Day is billeted with the air force chief of staff.

- Transports of the Air Force Southern Command begin delivering humanitarian aid to flood victims in Bolivia.

February 29–March 2

NAVAL: Three North Vietnamese trawlers crammed with weapons and supplies for the Viet Cong are intercepted by Coast Guard vessels and sunk.

March 1

MILITARY: In Washington, D.C., Clark Clifford succeeds Robert F. McNamara as the ninth secretary of defense.

March 2

MILITARY: North of Tan San Nhut, South Vietnam, Company C, 4th Battalion, 9th Infantry (Manchu) stumbles into a heavy ambush and is nearly annihilated in minutes. American losses are 49 dead and 29 wounded and Specialist 4 Nicholas J. Cutinha wins a posthumous Medal of Honor for heroism under fire. This is one of the worst American setbacks of the entire war.

March 6

AVIATION: At Khe Sanh, South Vietnam, ground fire shoots down a Fairchild C-12 Provider transport plane, killing 43 marines and five crewmen.

March 10

MARINES: The Seventh Air Force assumes control of the 1st Marine Aviation Wing (1st MAW) to provide all tactical aviation with a single, guiding hand.

March 11

MILITARY: Having contained the Communist Tet Offensive, General William C. Westmoreland is determined to seize the strategic initiative by ordering II Field Force under Lieutenant General Frederick C. Weyand into action along the III Corps front. The first sweep, involving the 1st, 9th, and 25th Infantry Divisions, clears out numerous pockets of enemy troops, killing 2,658 Communists for a cost of 105 American and 193 dead South Vietnamese. A second consecutive sweep near Saigon kills an additional 3,542 enemy troops, clearing the Saigon region of Viet Cong.

March 13

GENERAL: An accidental U.S. Army nerve gas leak from the Dugway Proving Grounds, Utah, results in the deaths of 6,400 sheep.

March 16

MILITARY: In Quang Ngai province, South Vietnam, Company C, 1st Battalion, 20th Infantry under Captain Ernest Medina occupies the village of My Lai. The Americans come under sniper fire and take several casualties from mines, at which point the 1st Platoon under Lieutenant William L. Calley goes on a rampage, killing men, women, and children. The killing continues until Warrant Officer Hugh Thompson steps in between Calley and the fleeing civilians. My Lai subsequently serves as a rallying point for the vocal antiwar movement around the globe.

March 19

AVIATION: At England Air Force Base, Louisiana, the first class of 12 South Vietnamese pilots begins training to operate Cessna A-37 Dragonflies.

March 22

AVIATION: The Marine Aviation Cadet program, which enables noncollege graduates to gain their wings, is terminated.

MILITARY: General William C. Westmoreland is appointed army chief of staff by President Lyndon B. Johnson, although he does receive a replacement in South Vietnam for the next three months.

March 25

AVIATION: At Norton Air Force Base, California, the 944th Military Airlift Group (Associate) is activated as the first Air Force Reserve unit assigned to fly and maintain aircraft assigned to an associated regular unit.

- Operation Combat Lancer commences as General Dynamics F-111s are committed to bombing raids over North Vietnam for the first time. By carrying highly sophisticated terrain-following radar (TFR), they can strike the more mountainous regions that were heretofore untouchable.

March 27

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, a patrol from the 2nd Division turns the tables on a group of North Korean infiltrators, killing three.

March 30

MARINES: At Khe Sanh, I Corps tactical zone, Company B, 1st Battalion, 9th Marines launches a dawn attack against enemy trenches and bunkers, inflicting heavy losses. At this juncture the Viet Cong and North Vietnamese army abandon the siege and begin drawing back into the jungle. The successful defense of Khe Sanh costs the marines 208 dead and 1,668 wounded. Communist losses are 1,602 confirmed dead with total estimates running as high as 10,000.

March 31

AVIATION: President Lyndon B. Johnson, having declared that he will not seek reelection to the presidency, also declares a partial bombing halt of North Vietnam, above the 20th parallel, in an attempt to spur peace talks.

April 1

MARINES: The 1st Marine Division, acting in conjunction with the 1st Air Cavalry Division, commences Operation Pegasus to open a ground link to the garrison at Khe Sanh.

April 1–15

MILITARY: As a large force of marines is besieged at Khe Sanh near the Laotian border, the 1st Cavalry under Major General John J. Tolson is ordered to relieve them. Operation Pegasus commences with 20,000 American troops, the 26th Marines, and ARVN allies in a concerted drive against two North Vietnamese divisions. Tolson's fast and hard-hitting attacks scatter all opposition and Khe Sanh is relieved by April 15.

April 3

DIPLOMACY: Radio Hanoi announces that its government is willing to discuss conditions for holding peace talks with the United States.

April 5

MILITARY: In the wake of inner-city riots caused by the assassination of civil rights leader Dr. Martin Luther King, Jr., army units and National Guard troops are called in to restore order.

MARINES: Detachments from Quantico, Virginia, and the Washington Barracks are ordered onto the street to restore order in Washington, D.C., following the assassination of civil rights leader Dr. Martin Luther King, Jr.

April 6

NAVAL: The battleship *New Jersey* is recommissioned and heads for service in Southeast Asia.

April 10

AVIATION: At Kadena Air Base, Okinawa, the 9th Strategic Reconnaissance Wing begins flying SR-71 missions over North Vietnam.

- The navy bids farewell to its propeller-driven Douglas A-1 Skyraiders, the first models of which joined the fleet in 1945.

April 14

MILITARY: Elements of the 1st Air Cavalry Division establish contact with the defenders of Khe Sanh, I Corps zone during Operation Pegasus/Lam Som 207, formally ending the siege. Marines losses are 208 dead and 1,668 wounded. The North Vietnamese are calculated to have lost 10,000 men killed, wounded, and missing in this failed attempt to repeat their victory of Dien Bien Phu over the French.

April 15

MARINES: In Quang Tri Province, South Vietnam, the 3rd Marine Division conducts Operation Scotland, a major search-and-destroy mission, that kills 3,034 Communists for a loss of 463 dead and 2,553 wounded.

April 16

AVIATION: At Quang Tri Province, South Vietnam, Marine Air Group 39 (MAG-39) arrives as part of the 1st Marine Air Wing (1st MAW).

April 18

MARINES: At Khe Sanh, I Corps tactical zone, the 1st Marines arrive to relieve the exhausted 26th Marines, who are subsequently redeployed to Dong Ha and Camp Carroll to rest and refit.

April 19–May 17

MILITARY: General William C. Westmoreland determines to shut down the major infiltration route through the A Shau Valley through Operation Delaware. The 1st Cavalry Division commits the 1st and 5th Battalions, 7th Cavalry into an air assault that loses 10 helicopters to severe antiaircraft fire. The survivors begin working their way southward.

April 21

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, a company from the 31st Infantry conducts a fire-fight with a similar-sized unit of North Korean infiltrators.

April 24–May 3

MILITARY: In the A Shau Valley, South Vietnam, the 1st Brigade, 1st Cavalry Division under Colonel John E. Stannard, air assaults into the southern entrance of the valley, meeting stiff resistance, but the Americans carve out a logistics foothold that can supply additional sorties farther up the valley.

April 28

AVIATION: At La Toma, Ecuador, C-130 transports of the Air Force Southern Command convey 92,000 pounds of food to assist victims of drought.

April 29–May 17

MILITARY: In the A Shau Valley, South Vietnam, men of the 101st Airborne Division and some ARVN troops engage in several firefights, but within two weeks most enemy units have deserted the area, leaving behind valuable caches of food, supplies, and weapons.

April 30–May 3

MARINES: At Dai Do, South Vietnam, the 2nd Battalion, 4th Marines attacks entrenched North Vietnamese units dug in along the Cua Vier River. The marines prevail after stiff fighting with losses of 81 dead and 300 wounded; enemy casualties are estimated to exceed 500.

May 3

AVIATION: At Buckley Air National Guard Base, Colorado, the 120th Tactical Fighter Squadron is activated and begins deploying to South Vietnam. This is also the first Air National Guard (ANG) unit called to active duty in the war.

DIPLOMACY: Radio Hanoi announces that the government agrees to preliminary peace talks in Paris, France.

NAVAL: In Norfolk, Virginia, headquarters of the new Naval Safety Center is founded.

May 4–August 23

MARINES: South of Da Nang, South Vietnam, the 7th Marines begin Operation Allen Brook to root out Communist units lurking there. By the time the maneuver ends, 1,017 Communists are accounted for while the marines lose 172 dead and 1,124 wounded.

May 5

MILITARY: Communist units stage a miniature Tet Offensive by striking 199 towns and cities with rocket and mortar fire.

May 11–12

AVIATION: At Kham Duc, South Vietnam, air force C-130s and C-124s race in under heavy enemy fire to evacuate American Special Forces and South Vietnamese troops. Eight aircraft are lost, including one C-130 that is hit by a mortar round and explodes, killing 150 people. Air force personnel involved win four Air Force Crosses and Lieutenant Colonel Daryl D. Cole also receives the Mackay Trophy for his efforts.

- At Kham Duc, South Vietnam, a C-123 Provider piloted by Lieutenant Colonel Joe M. Jackson braves intense Communist ground fire to land and rescue a three-man Combat Control Team; he wins a Medal of Honor for his actions.

MILITARY: The sole remaining Special Forces camp in I Corps, Kham Duc, Quang Tin Province, South Vietnam, is attacked by a strong force of North Vietnamese regulars. The 1,500 defenders, including elements of the 196th Infantry Brigade and South Vietnamese irregulars, are evacuated by helicopter before it falls. American losses are 24 killed, 112 wounded, and 26 missing in action.

May 13

AVIATION: In light of the Tet Offensive, President Lyndon B. Johnson mobilizes 22,000 military reservists, including 1,333 members of the Air National Guard. Seven Air Force Reserve units are also called up.

DIPLOMACY: In Paris, France, peace talks between the United States, South Vietnam, and North Vietnam begin.

May 16

AVIATION: Military Airlift Command (MAC) transports begin carrying 88.5 tons of food to flood victims in Ethiopia.

NAVAL: In Quang Tri Province, South Vietnam, Hospital Corpsman Third Class Donald E. Ballard is treating a wounded marine when an Viet Cong grenade lands nearby. Ballard selflessly throws himself upon it to shield his comrade, but it fails to explode. He wins a Medal of Honor for bravery under fire.

May 17

MILITARY: In Thua Thien Province, South Vietnam, Operation Nevada Eagle unfolds as the 101st Airborne Division sweeps through the mountains of central I Corps. It is undertaken to keep the road network open and protect the rice harvest. The Communists dodge the offensive, preferring to snipe at helicopters.

May 18–October 23

MARINES: In Quang Nam Province, Operation Mameluke Thrust unfolds as the 1st Marine Division conducts extensive search-and-destroy missions west and south of Da Nang. It concludes with marine losses of 269 dead and 1,730 wounded and estimated Communist casualties of 2,728.

June 5

NAVAL: The nuclear attack submarine *Scorpion* under Commander Francis A. Slattery is reported missing off the Azores with its crew of 99 officers and men. The official navy report blames the accident on a systems malfunction while diving. On October 30, the oceanographic research vessel *Mizar* locates the wreckage 10,000 feet below the surface and 400 miles southwest of the Azores. It has since been deduced that this vessel was deliberately sunk by a Soviet submarine in retaliation for the accidental ramming and sinking of one of their missile-carrying submersibles in the Pacific six months earlier. This remains a major cold war coverup.

May 21–30

MARINES: At Dong Ha, I Corps zone, a North Vietnamese division presses on through the Demilitarized Zone (DMZ) in an attempt to infiltrate. The 3rd and 9th Marines counter by tackling them head-on, and sending them back across the

border with 770 dead and 61 captured. Marine and ARVN losses are 112 dead and 446 wounded.

May 22

AVIATION: The 1st Marine Aviation Wing deploys its first North American/Rockwell OV-10A Broncos, a light observation craft that can be rigged for COIN (counterinsurgency) purposes.

May 25

AVIATION: The Grumman EA-6B Prowler prototype makes its maiden flight; it enters service as a carrier-based electronic countermeasure aircraft, which is still active service today.

May 28

MARINES: In Khe Sanh, I Corps tactical zone, skirmishing in the immediate region continues as a North Vietnamese army force attempts to capture a hill along Route 9. They are driven back with a loss of 230 men; marine casualties are 13 dead and 44 wounded.

June 1

AVIATION: Over Go Noi Island, Operation Allen Brook commences as nine C-130s drop 31,000 gallons of gasoline in an attempt to burn away the island's intense jungle foliage.

June 10

MILITARY: General Creighton W. Abrams replaces General William C. Westmoreland as commander of U.S. forces in South Vietnam, a move reflecting dissatisfaction with the latter's conduct of the war.

NAVAL: The South Vietnamese navy assumes responsibility for minesweeping operations along the Long Tau River channel to Saigon. To that end, the U.S. Navy turns over 14 riverine warfare vessels to their allies.

June 13

AVIATION: At Cape Kennedy, Florida, a Titan IIIC launch booster carries eight military communications satellites into space to augment the first Defense Satellite Communications System.

June 16

AVIATION: Off the South Vietnamese coast, air force aircraft accidentally bomb the cruiser *Boston* and the Australian missile destroyer *Hobart*; they manage to sink patrol boat *PCF-19*.

June 17

AVIATION: At Long Beach, California, the first McDonnell Douglas C-9 Nightingale aeromedical evacuation aircraft is unveiled to the public.

June 19

AVIATION: A quick-drying cement that hardens in only 30 minutes is field-tested in South Vietnam. Developed by the Aero Propulsion Laboratory at Wright-Patterson Air Force Base, Ohio, it is intended for helicopter landing pads.

- Over North Vietnam, a UH-2 Seasprite helicopter piloted by Lieutenant Clyde E. Lassen braves enemy fire and dense foliage to rescue the downed crew of a

**Abrams, Creighton W. (1914–1974)***Army general*

Creighton Williams Abrams was born in Springfield, Massachusetts, on September 15, 1914, and he passed through the U.S. Military Academy in 1940 with an undistinguished record. He served briefly in the cavalry before transferring to the newly created Armor Force as part of the embryonic 4th Armored Division. He rose to major in 1942 and subsequently commanded the 37th Tank Battalion throughout World War II. He distinguished himself during General George S. Patton's dash across northern France in 1944, wearing out seven tanks in the process. He capped his wartime career by breaking through German siege lines in the Battle of the Bulge and relieving the 101st Airborne Division at Bastogne. Abrams consequently received two Distinguished Service Crosses and two Silver Stars. After the war he was one of a handful of promising officers selected to attend the Command and General Staff School at Fort Leavenworth, and throughout the Korean War he served as chief of staff with the I, X, and XI Corps. He rose to brigadier general in 1956 and major general in charge of the 3rd Armored Division in 1960. He faced off against Soviet armor during the tense Berlin crisis of 1962. Later that year he faced a crisis of a different sort when he was directed to quell civil unrest arising from the admission of African-American James Meredith to the University of Mississippi. He also handled integration problems at Birmingham, Alabama, with similar success and received accolades from Secretary of the

Army Cyrus Vance and U.S. attorney general Robert F. Kennedy.

In 1967 Abrams fulfilled his most daunting task, that of commanding the U.S. Military Assistance Command, Vietnam (MACV), where he trained and equipped thousands of South Vietnamese soldiers for their struggle with Communist North Vietnam. In February 1968 Abrams also orchestrated the recapture of Hue from the Viet Cong during the infamous Tet Offensive, and, the following July, he succeeded General William C. Westmoreland as supreme commander in Vietnam. Abrams introduced a shift from search-and-destroy missions to aggressive small unit operations, while also accelerating the process of Vietnamization to compel the South Vietnamese to fight their own war. Having addressed military concerns, Abrams turned to nation-building pacification programs, which were designed to enhance the educational, medical, transportation, and agricultural systems of South Vietnam. He oversaw the reduction of American forces until July 1972, before reporting back to Washington, D.C., as the new army chief of staff. Abrams then began a remedial program to shake the military free of drug use and racial problems, and also oversaw the transition from draftees to an all-volunteer force. Abrams died in Washington, D.C., on September 4, 1974, a highly talented combat commander and military administrator. In light of his sterling contributions, the army christened its latest, turbine-powered tank the M-1 tank Abrams.

Phantom II jet. Disregarding the danger, he fires flares and turns on his lights to find the airmen, rescue them, and reaches his vessel with only five minutes of fuel remaining. Lassen wins a Medal of Honor.

June 23

MILITARY: As of this day, the conflict in Vietnam has become America's longest-running war.

June 26

AVIATION: Over North Vietnam, three F-8 Crusaders from the carrier *Bon Homme Richard* tangle with two MiG-21s; one Communist jet is downed by an air-to-air missile.

DIPLOMACY: The island of Iwo Jima, Japan, which figured so prominently in Marine Corps legacy, is returned to Japanese civilian control.

June 27

MARINES: At Khe Sanh, I Corps tactical zone, the marines begin dismantling their defenses in preparation for abandoning the base. New operational plans are afoot for the northern reaches of I Corps.

June 30

AVIATION: Lockheed rolls out its mammoth C-5A *Galaxy* for its initial flight; it is then the world's largest airplane. The Military Airlift Command (MAC) eventually obtains 81 of the giant craft.

MARINES: At this stage of the war, marine manpower levels are 24,555 officers and 282,697 enlisted men.

July 1–7

MILITARY: Operation Thor commences as combined air force, artillery, and naval surface units hammer away at targets in Cap Mui Lay, North Vietnam, just over the Demilitarized Zone (DMZ). Its purpose is to destroy or silence Communist long-range artillery units in the region.

July 3

MILITARY: In Washington, D.C., General William C. Westmoreland takes over as the 25th army chief of staff while General Creighton W. Abrams succeeds him as head of MACV in South Vietnam.

July 5

MARINES: In the I Corps tactical zone, the base at Khe Sanh is abandoned by the marines who so desperately defended it.

July 6

AVIATION: The Marine Corps begins operating North American OV-10 Broncos at Da Nang, South Vietnam.

July 9

NAVAL: On the Co Chen River, South Vietnam, the army-navy Mobile Riverine Force commences operations against Viet Cong units in the region. This is the only tributary of the Mekong River that has not been patrolled before.

July 12

AVIATION: At Patuxent Naval Air Station, Maryland, the last Martin P-5 Marlin seaplane is dropped from the inventory. Flying boats were among the first aircraft operated by the navy and predate World War I.

July 20

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, patrols from the 2nd and 7th Infantry Divisions are fired upon by North Koreans on the other side; no casualties are reported.

NAVAL: In Annapolis, Maryland, Rear Admiral James F. Calvert gains appointment as the 46th superintendent of the Naval Academy.

July 22

AVIATION: Commander Samuel R. Chessman, VA-195, carrier *Ticonderoga*, flies a record 306 missions over North Vietnam. The previous record holder, Commander Charles Hathaway of the same squadron, flew 305 as of April 1967.

July 25

MILITARY: At Fort Carson, Colorado, the 1st Brigade, 5th Infantry Division (Mechanized) is activated prior to being dispatched to Quang Tri, South Vietnam. Once there it is intended to patrol the Demilitarized Zone (DMZ) separating North and South Vietnam.

July 28

NAVAL: In Quang Nam Province, South Vietnam, Hospital Corpsman Third Class Wayne M. Caron assists several wounded marines while under heavy fire. While crawling to assist his third patient, he is struck by enemy fire and killed; he wins a posthumous Medal of Honor.

July 29

AVIATION: Northwest of Vinh, North Vietnam, four F-8 Crusaders from the carrier *Bon Homme Richard* engage four MiG-17s in a twisting, five-minute dogfight; one Communist jet is downed.

NAVAL: In an attempt to throttle ongoing Communist supply and infiltration efforts, Operation Game Warden is enlarged to cover the entire Mekong Delta region, from the South China Sea to Cambodia.

July 31

AVIATION: The Air Force Southern Command dispatches two UH-1F helicopters to Costa Rica during an eruption by Mount Arenal.

August 1

AVIATION: At Robbins Air Force Base, Georgia, the Continental Air Command disbands and is replaced by the Headquarters, Air Force Reserves. Meanwhile, the Air Force Reserve Personnel Center becomes a separate operating agency at Denver, Colorado.

- Transports of the Air Force Southern Command convey 13,000 pounds of relief supplies to San José, Costa Rica, in the wake of Mount Arenal's recent eruption.
- In Saigon, South Vietnam, General George S. Brown gains appointment as head of the Seventh Air Force.

August 5

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, North Koreans fire upon a patrol from the 38th Infantry.

August 8

AVIATION: In Turkey, two Air Force medics die when their helicopter crashes while performing rescue operations.

- At Long Beach, California, the first C-9 Nightingale medivac aircraft performs its maiden flight.

August 16

AVIATION: At Cape Kennedy, Florida, the first Minuteman III intercontinental ballistic missile (ICBM) is test-launched for the first time. This version is capable of carrying three, independently targeted reentry vehicles.

August 17

NAVAL: The navy commissions the *Dolphin*, its sole diesel-electric, deep-diving, research submarine. Crammed with modern electronics, this vessel performs missions as varied as acoustic deep water and littoral research, ocean bottom surveys, weapon launches, sensor trials, and engineering evaluations. The technically multifaceted *Dolphin* remains in commission today.

August 21–15

AVIATION: In northeastern Nicaragua, an air force UH-1F helicopter rescues 260 flood victims while also bringing in 52,000 pounds of food and relief supplies.

August 25

AVIATION: In South Vietnam, the air force begins a 90-day evaluation of the North American/Rockwell OV-10 Bronco as a forward air controller aircraft.

August 28

MILITARY: In Chicago, Illinois, U.S. Army and National Guard troops are called in to quell street violence arising from the Democratic National Convention taking place there.

August 29

MILITARY: At Long Binh, South Vietnam, inmates at the U.S. Army, Vietnam, Installation Stockade riot, beating several guards before order can be restored. This facility is known to house some of the most violent criminals in the military.

August 29–September 9

MARINES: At Da Nang, South Vietnam, Operation Sussex Bay unfolds as the 5th and 7th Marines deploy to scour the region for Communist forces who have attacked the airfield recently. The campaign ends with an estimated 2,000 North Vietnamese and Viet Cong dead.

September 1

AVIATION: Near Quang Binh Province, South Vietnam, an A-1H Skyraider flown by Lieutenant Colonel William A. Jones, 602nd Special Operations Squadron, swoops in and lands to rescue a downed air force pilot while under heavy Communist fire. Jones is severely wounded but his heroic actions result in a Medal of Honor.

MILITARY: Brigadier General Frederic M. Davison becomes the first African-American general to command a combat brigade when he assumes control of the 199th Infantry Brigade. He replaces Brigadier General Franklin M. Davis.

September 5

MARINES: Military operations in the I Corps zone cease for two days following the onset of Typhoon Bess, whose driving rains wash out many defensive positions.

September 10

MARINES: The 27th Marines are the first unit to depart Vietnam for Camp Pendleton, California, on a nonrotational basis.

September 13

MILITARY: Major General Keith L. Ware, 1st Infantry Division, is killed in a helicopter crash and is succeeded by Major General Orwin C. Talbot.

September 16

MARINES: In the I Corps tactical zone, the command headquarters of the 2nd Battalion, 26th Marines are suddenly struck by an accurate Communist mortar barrage that kills 22 marines and wounds 146.

September 18

NAVAL: In Quang Tin Province, South Vietnam, a slashing attack by *PCF-21* destroys 44 Viet Cong junks and sampans.

September 19

AVIATION: Northwest of Vinh, North Vietnam, an F-8 Crusader from the carrier *Intrepid* downs a MiG-21; this is the navy's 29th kill and the last accredited to an F-8.

U.S. battleship *New Jersey* off the coast of Vietnam (Texas Tech University Vietnam Archive)

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, a detachment of North Korean infiltrators is ambushed and wiped out by American troops.

September 25

MILITARY: In Tay Ninh Province, South Vietnam, artillery attached to the 25th Infantry Division, armed with new motion-detection equipment, begins firing shells in an attempt to interdict North Vietnamese infiltration movements. As the war continues, harassment and interdiction missions constitute half of all artillery fired and 70 percent of ammunition expended.

September 26

AVIATION: The LTV A-7D Corsair II fighter bomber performs its maiden flight.

September 29

NAVAL: Off the I Corps tactical zone, South Vietnam, the newly refurbished and recommissioned battleship *New Jersey* unleashes its nine 16-inch guns against Communist targets northwest of Con Thien near the Demilitarized Zone (DMZ).

- Vice Admiral Elmo R. Zumwalt replaces Rear Admiral Kenneth L. Veth as commander, U.S. Naval Forces, Vietnam.

September 30

MILITARY: In Vietnam, Special Forces personnel reach an all-time high of 3,542 officers and men deployed.

October 1

MARINES: More than 8,000 enlisted marines have become officers since the battlefield commission program was initiated in June 1965.

October 3

MARINES: In Washington, D.C., the Department of Defense declares that the Marine Corps is slated to receive 2,500 men of the 17,500 who will be drafted in December. This is the first time since May that the marines have accepted draftees.

October 5

MILITARY: At this point in the war, American military personnel totals 540,000 from all four services; 84,000 of these are marines.

October 6–19

MARINES: In Thuong Duc, South Vietnam, a Special Forces camp is relieved by a thrust by the 7th Marines, which kills 202 Communists. Marine losses are 28 dead and 143 wounded.

- Near An Hoa, South Vietnam, Operation Maui Peak unfolds as battalions of the 1st Marine Division, assisted by the ARVN 51st Regiment, sweep the region clean of Communist forces, killing 350 enemy troops.

October 11–22

AVIATION: At Cape Kennedy, Florida, a Saturn 1B launch vehicle launches the *Apollo 7* space capsule into orbit for the first time. Among the three astronauts is an air force officer, Major Donn F. Eisele.

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, a patrol from the 2nd Infantry Division ambushes a detachment of Communist infiltrators, killing two.

October 15

NAVAL: The new SEALORDS program (Southeast Asia Lake, Ocean, River, and Delta Strategy), as envisioned by Admiral Elmo R. Zumwalt, Jr., commences in an attempt to cut all Communist supply lines from Cambodia. This requires the participation of army, navy, and South Vietnamese units and is considered the start of the “Brown Water Navy.”

October 23–December 6

MARINES: South of Da Nang, South Vietnam, Operation Henderson Hill commences as the 5th Marines begins a series of search-and-destroy missions. They account for 700 enemy dead at a cost of 35 killed and 272 wounded.

October 27–November 9

MILITARY: In light of upcoming troop reductions, General Creighton W. Abrams shifts the 1st Cavalry Division from I Corps to III Corps in Saigon, where it will screen the border to prevent enemy infiltration of the capital region. To accomplish this, air force C-130s fly 437 sorties and transport 11,550 troops and 4,000 tons of cargo while navy vessels convey a further 4,370 men and 16,600 tons of cargo.

October 29

NAVAL: In the Cua-Lon-Bo De River region, South Vietnam, a force of 242 Viet Cong watercraft and 167 structures are destroyed by navy patrol boats, South Vietnamese A-1 Skyraiders, the landing ship *Washoe County*, and the Coast Guard cutter *Wachusett*. The Americans suffer five wounded.

October 31

AVIATION: Operation Rolling Thunder, the first prolonged aerial bombardment campaign against North Vietnam, concludes. A day later, President Lyndon B. Johnson suspends all air attacks on North Vietnam to promote peace talks.

November 1

AVIATION: Operation Commando Hunt, a prolonged bombardment campaign of suspected Communist positions in Laos, begins and runs until March 30, 1972.

November 1–30

NAVAL: In a month of routine work, the battleship *New Jersey*’s 16-inch guns destroy 182 enemy bunkers, 15 cave complexes, nine sampans, and 800 other structures.

November 16

AVIATION: In Quang Ngai Province, South Vietnam, a UH-1H helicopter crashes, injuring Major General Charles M. Gettys. He is dragged to safety by Major Colin Powell, who himself has suffered a broken ankle.

November 19

MILITARY: Snipers attached to the 9th Infantry Division score their first confirmed kill. The program had been initiated by Major General Julian J. Ewell the

previous June and one of his men, Sergeant Adelbert F. Waldron, ends the war with 109 kills and two Distinguished Service Crosses.

November 20–December 9

MARINES: Below Da Nang, South Vietnam, the 1st Marines embark on Operation Meade River to cordon off and pacify the area known as Dodge City. This is a 36-square-mile farming area and ultimately consumes the energies of seven marine battalions. For a loss of 108 marine dead and 510 wounded, 1,023 Communists are slain and 123 taken prisoner.

November 23

MARINES: In the I Corps zone, the search-and-destroy mission entitled Operation Lancaster II concludes with marine losses of 359 dead and 2,101 wounded. An estimated 1,800 Communists troops have been killed.

November 26

AVIATION: Near Duc Co, South Vietnam, a UH-1F Huey helicopter piloted by Lieutenant James O. Fleming, 20th Special Operations Squadron, makes a dangerous and daring rescue mission under fire. Fleming successfully retrieves a six-man Studies and Observations Group (SOG) team, earning a Medal of Honor for bravery in combat.

December 1

MILITARY: In the northern Mekong Delta, South Vietnam, the 9th Infantry Division commences Operation Speedy Express to halt Viet Cong infiltration. This entails using air mobility to land troops in the vicinity of enemy sightings as quickly as possible. The Americans lose 267 men and claim 10,899 killed, but only 748 weapons are captured.

December 6

NAVAL: Operation Giant Slingshot unfolds as navy patrol boats begin scouting up the Vam Co Dong and Vam Co Tay Rivers west of Saigon, South Vietnam, to cut Communist supplies infiltrating from the Parrot's Beak region of Cambodia. Within a year they account for 1,894 Communist dead and 517 tons of supplies.

December 7–March 8, 1969

MARINES: West of An Hoa, South Vietnam, Operation Taylor Common commences. The 1st Marine Division conducts an extensive search-and-destroy sweep through the region, killing 1,398 enemy troops. Marine losses are 151 dead and 1,324 wounded.

December 9

MARINES: In northeast Quang Tri Province, Operation Napoleon/Saline concludes as the 3rd Marines end a 13-month long search-and-destroy operation. Marine losses are 395 dead and 2,135 wounded to an enemy tally of 3,495 killed.

December 21–27

AVIATION: At Cape Kennedy, Florida, the three-man *Apollo 8* spacecraft under Navy Commander James A. Lovell leaves Earth orbit, accompanied by U.S. Air

Force colonels Frank Borman and William Anders. This is the first time that a manned space vehicle slips from Earth orbit, circles the moon, and safely returns.

December 23

NAVAL: In An Xuyen Province, South Vietnam, four patrol boats, backed by army helicopters, sink 167 Viet Cong sampans and also destroy 125 structures and eight bunkers.

- In North Korea, Commander Lloyd Bucher and 82 crewmen of the *Pueblo* are released after being held in captivity for 11 months.

December 28

MARINES: In the I Corps tactical zone, the marines abandon Camp Carroll, which served as an important combat base for the past two years.

December 31

AVIATION: During the year, the 1st Marine Air Wing (1st MAW) flew 47,436 combat missions, the majority in close support, and 639,194 helicopter sorties.

MARINES: In the course of this pivotal year, the III Marine Amphibious Force is thought to have inflicted 31,691 casualties on North Vietnamese and Viet Cong units for a loss of 4,634 dead and 28,319 wounded.

1969

JANUARY: Army troop strength peaks at 359,800 officers and men, but politically motivated troop withdrawals begin under the aegis of President Richard M. Nixon. Hereafter, the Americans place increasing reliance on “Vietnamization” to make the Army of the Republic of South Vietnam (ARVN) shoulder a greater burden of fighting.

January 1

AVIATION: The 71st Special Operations Squadron, flying AC-119 Shadow gunships, begins flying in South Vietnam. This is also the first Air Force Reserve unit committed to combat operations.

January 1–August 31

MILITARY: In the Mekong Delta, South Vietnam, Operation Rice Farmer is launched by the 9th Infantry Division to ferret out local Viet Cong operatives and units; by the time it ends, the Americans claim 1,861 Communists killed.

January 3

AVIATION: At Naval Air Station North Island, California, the navy founds Attack Squadron Light 4 (VAL-4), equipped with OV-10 Bronco counterinsurgency aircraft. They will be deployed in concert with river patrol craft.

January 7

AVIATION: The air force accepts delivery of its 1,000th Northrop T-38 Talon jet trainer.

January 9

AVIATION: The National Aeronautics and Space Administration (NASA) announces that the first team of men to land on the moon will be civilian Neil

Armstrong, U.S. Air Force colonel Edwin E. Aldrin, and U.S. Air Force lieutenant colonel Michael Collins.

January 13–July 21

MILITARY: In Quang Ngai Province, South Vietnam, two Americal Division battalions and two Marine Corps battalions advance into the Batangan Peninsula to clear out any remaining Viet Cong and weapons caches. By the time it concludes, army losses to mines and booby traps are 56 dead and 268 wounded.

NAVAL: On the Batangan Peninsula, South Vietnam, the Seventh Ready Group conducts its largest amphibious assault to date by landing marines and soldiers ashore to root out Viet Cong units in the region. The movement is backed by the firepower of the newly recommissioned battleship *New Jersey*.

MARINES: Operation Bold Mariner unfolds as 2,500 marines of the Seventh Fleet Amphibious Force come ashore on the Batangan Peninsula, 10 miles south of Quang Ngai City.

January 14

NAVAL: At Pearl Harbor, Hawaii, a fire and explosions sweep the nuclear-powered carrier *Enterprise* after a rocket accidentally ignites on the flight deck, killing 28 sailors and injuring 65.

January 22

MILITARY: In Washington, D.C., Melvin R. Laird gains appointment as the 10th secretary of defense.

MARINES: In the A Shau Valley, Quang Tri Province, South Vietnam, the 9th Marines under Colonel Robert H. Barrow are helicoptered in to commence Operation Dewey Canyon, supported by heavy artillery fire. This is a major search-and-destroy mission that accounts for 1,600 enemy dead.

January 23

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, outposts belonging to the 2nd Infantry Division are attacked by North Korean infiltrators, but each is repulsed.

January 25

DIPLOMACY: In Paris, France, representatives from the United States, South Vietnam, and North Vietnam begin formal peace negotiations.

January 31

NAVAL: In Washington, D.C., John H. Chaffee gains appointment as the 60th secretary of the navy.

February 1

NAVAL: In the Mekong Delta, South Vietnam, the U.S. Navy hands over 25 river gunboats to the South Vietnamese navy, who are now entrusted with riverine security for the region.

MARINES: At Yuma, Arizona, the 5th Light Antiaircraft Missile Battalion (LAAM) is disbanded after the 2nd LAAM Battalion rotates back from Southeast Asia.

February 4

AVIATION: Impressive but hopelessly out of date, the remaining XB-70 Valkyrie is flown from Edwards Air Force Base, California, to Wright-Patterson Air Force Base, Ohio, where it is put on permanent display at the National Museum of the U.S. Air Force.

February 9

AVIATION: In a major development for military communications, a Titan IIIC launches the TACSAT 1 satellite into geosynchronous Earth orbit. Its purpose is to relay signals between land, sea, or airborne unit in any tactical station.

February 15

MILITARY: The army's newest light tank, the M551 Sheridan, deploys in South Vietnam for the first time with the 3rd Squadron, 4th Cavalry. It is armed with a 152mm main gun/rocket launcher and designed as a lighter alternative to the heavier M-48 Patton tanks already in service.

February 24

AVIATION: Over Bien Hoa Province, South Vietnam, an AC-47 "Spooky" gunship of the 3rd Special Operations Squadron is struck by a mortar round that ignites an onboard magnesium flare. Airman First Class John L. Levitow, the aircraft loadmaster, throws himself on the flare and tosses it outside. On November 8, 2000, Levitow is the only enlisted man awarded a Medal of Honor in this conflict when a previous award for the deed is upgraded.

February 28

MARINES: In the triangular region of Cam Lo, Dong Ha, and Con Thien, the 3rd Marine Division ends Operation Kentucky, a search and cordon operation that killed an estimated 3,921 Communist troops. Marine losses since the operation began on November 1, 1967, are 52 dead and 3,079 wounded.

- The 3rd Division also terminates Operation Scotland II, a search-and-destroy endeavor in the vicinity of Khe San, which began on April 14, 1968. For the loss of 461 dead and 2,555 wounded, the marines killed 3,311 Communist troops.

March

MARINES: At Headquarters Marine Corps, plans are made to create a law enforcement branch to oversee training and other facets related to military police functions.

March 1–April 14

MILITARY: In Kontum Province, South Vietnam, Operation Wayne Gray, an aggressive patrolling by the 4th Infantry Division, results in 608 dead Communist soldiers.

March 1–May 8

MILITARY: In the A Shau Valley, Central Highlands, South Vietnam, the 101st Airborne Division moves in to cut a vital infiltration route and encounters stiff resistance. Nonetheless, by May the paratroopers have driven out the defenders and uncovered several large caches of weapons and supplies.

March 2

POLITICS: Village elections transpire throughout South Vietnam without serious interference from Communist forces.

March 3

AVIATION: The Marine Corps unveils their new Sikorsky CH-53D Sea Stallion, a heavy lift helicopter that performs yeoman work for the rest of the war.

March 3–13

AVIATION: At Cape Kennedy, the *Apollo 9* space capsule is shot into orbit with Colonels James A. McDivitt and David R. Scott and civilian Russell L. Schweickart on board. During this mission, the Lunar Extension Module (LEM) is detached and maneuvered in space for the first time.

March 4

MILITARY: The Department of Defense announces regular shipments of nerve gas by rail, and an annual budget of \$350 a year on such exotic weaponry.

March 5

NAVAL: The carrier *Ticonderoga* becomes the first carrier to begin a fifth tour of duty at Yankee Station in the Gulf of Tonkin.

March 9

MARINES: Southwest of An Hoa, South Vietnam, the marines conclude Operation Taylor Common, which began on December 7, 1967, as a search-and-destroy mission. They killed an estimated 1,398 Communist troops and captured 610, while losing 156 dead and 1,327 wounded.

March 10

MARINES: In Washington, D.C., Secretary of Defense Melvin Laird admits some aspects of Operation Dewey Canyon involved crossing the border into Laos.

March 13

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, North Korean infiltrators attack army working parties repairing the southern fence, but they are repulsed without doing any harm.

March 14

MILITARY: President Richard M. Nixon announces his plans to substitute the earlier “Sentinel” antiballistic missile system (ABM) with the more advanced “Safeguard” plan, which is designed to stop an incoming attack from either Communist China or the Soviet Union.

NAVAL: In Nha Trang Bay, South Vietnam, a SEAL team assault an island used by the Viet Cong as a supply base. Lieutenant Joseph R. Kerrey is wounded by an enemy grenade, but he nonetheless manages the operations, calls in fire support, and leads his team to safety. He wins a Medal of Honor.

March 15

MARINES: At this point in the war, only 5.4 percent of Marine Corps volunteers are high school graduates, who also make up 71.5 percent of draftees. At least 1,071 enlisted marines hold college degrees.

March 15–May 2

MARINES: Six miles south of Khe Sanh, South Vietnam, the 3rd Marines, 3rd Marine Division begin a major search-and-destroy operation, which kills 157 Viet Cong, secures 52 suspects, and seizes 465 weapons. Marine losses are 17 dead and 104 wounded.

March 18

AVIATION: At Vandenberg Air Force Base, California, three satellites are launched, which contain 17 experiments related to the Orbiting Vehicle Program. This is undertaken under the aegis of the Office of Aerospace Research.

- In an attempt to break North Vietnamese and Communist Khmer Rouge strength in Cambodia, Air Force B-52s begin flying a protracted series of secret bombing missions under the code names Breakfast, Lunch, Dinner, and Snack. These so-called Menu operations continue without interruption until May 1970.

March 18–April 2

MILITARY: In the II Corps, South Vietnam, Operation Atlas Wedge is conducted by the 1st Division and the 11th Cavalry to interdict traffic along Highway 13 near the Michelin plantation. The 11th Cavalry under Colonel George S. Patton, Jr. is closely engaged, killing more than 400 North Vietnamese at a cost of 20 killed and 100 wounded.

MARINES: In the A Shau Valley, South Vietnam, the 9th Marines conclude Operation Dewey Canyon after killing 1,617 Communist troops. This is also the largest haul of captured equipment during the war, amounting to two 122mm howitzers, 66 trucks, 14 bulldozers, and several million rounds of ammunition.

March 19

NAVAL: In Quang Nam Province, South Vietnam, Hospital Corpsman Second Class David R. Ray administers to wounded marines while attached to a howitzer battery. He selflessly covers one wounded Leatherneck with his own body to shield him from a grenade explosion, sacrificing himself; Ray wins a posthumous Medal of Honor.

March 25

AVIATION: Navy Light Attack Squadron 4 (VAL-4), flying new OV-10A Broncos, are assigned to support the River Patrol Force while based at Vung Tau and Binh Thuy, South Vietnam.

March 26

MARINES: In the I Corps tactical zone, Lieutenant General Herman Nickerson, Jr., is appointed the new commander of III Marine Amphibious Force. His predecessor, General Cushman, is appointed deputy director of the Central Intelligence Agency (CIA).

March 27

NAVAL: Near Phan Thiet, II Corps tactical zone, the battleship *New Jersey* destroys or damages 72 enemy bunkers in a single day's work.

March 30

MARINES: In the I Corps tactical zone, marine engineers and naval construction personnel erect the so-called Liberty bridge across the wide Thu Bon River.

March 31

NAVAL: The battleship *New Jersey* concludes a productive six month's tour off Vietnam and departs on leave.

March 31–May 29

MARINES: Southwest of Da Nang, South Vietnam, Operation Oklahoma Hills commences as the 7th Marines begin a major search-and-destroy operation. The Viet Cong lose 596 dead to a marine tally of 53 killed and 482 wounded.

April

AVIATION: In Vietnam, VMO-2 becomes the first Marine helicopter squadron equipped with Bell AH-1G attack helicopters. These are the first such machines in the Marine Corps arsenal.

April 3

MILITARY: Combat deaths in Vietnam stand at 33,641, slightly higher than the toll extracted by the Korean War (33,629).

April 4–10

AVIATION: At Holloman Air Force Base, New Mexico, the 49th Tactical Fighter Wing begins transferring its 72 F-4D Phantom IIs to Spangdahlem Air Base, West Germany, which they accomplish with 504 aerial refuelings. This smooth and trouble-free redeployment garners the unit a Mackay Trophy.

April 7–20

MARINES: Near An Hoa, the 5th Marines conduct Operation Muskogee Meadows to secure the yearly rice harvest from Communist interference. They kill 162 enemy troops in exchange for 16 marines dead and 121 wounded.

April 11

AVIATION: At Vandenberg Air Force Base, California, a Strategic Air Command (SAC) missile crew launches an operation Minuteman III intercontinental ballistic missile (ICBM) for the first time.

April 14

AVIATION: North Korean jets shoot down an unarmed EC-121M Warning Star electronic surveillance aircraft from Fleet Air Reconnaissance Squadron 1 over the Sea of Japan, killing all 31 crew members. The navy begins assembling Task Force 71, which includes four carriers, as a show of force in the Yellow Sea.

April 17

AVIATION: At Edwards Air Force Base, California, a B-52 carries the X-24A gliding body, piloted by Major Jerauld Gentry, on its first glide test. This is undertaken to test the possibility of reusable and maneuverable space craft for reentry purposes; the outgrowth of this effort is the space shuttle.

MARINES: In a major upgrade, the marines in South Vietnam deploy their first 175mm self-propelled howitzers to replace their older 155mm models.

April 18

NAVAL: The carrier *Bon Homme Richard* commences its fifth tour of duty at Yankee Station in the Gulf of Tonkin.

April 20–26

NAVAL: Task Force 71 sails under the command of Rear Admiral Malcolm W. Cagle as a show of force in the Sea of Japan. The sailing comes in response to North Korea's destruction of a navy EC-121 aircraft six days earlier and it is deactivated shortly afterward. The Communists are apparently unimpressed.

April 22

MARINES: In Washington, D.C., the Senate passes legislation mandating four-star rank for future assistant commandants of the Marine Corps provided that manpower levels are in excess of 200,000 men.

April 24

AVIATION: Eight-engined B-52 jet bombers unload their heaviest concentration of ordnance to date by dropping 3,000 tons of ordnance on Communist positions along the Cambodian border.

April 25

MARINES: At Vieques, Puerto Rico, American and Brazilian marines train in an amphibious landing, the largest joint maneuver between the two nations since World War II.

April 27

MARINES: At Da Nang, South Vietnam, a grassfire ignites an ammunition storehouse, igniting it. In the ensuing inferno, 38,000 tons of ammunition and 20,000 drums of fuel are consumed; one marine is killed fighting the fire.

Helicopters of the 170th and 189th Helicopter Assault Companies await the loading of troops in the Central Highlands, April 1969. (*National Archives*)

April 30

MILITARY: The combined U.S. military presence in South Vietnam levels off at 543,482, its highest numerical strength with army troops numbering 365,600 officers and men.

May 2

MARINES: South of Khe Sanh, I Corps tactical zone, the 3rd Marines conclude Operation Maine Crag to sweep the region free of North Vietnamese units. Begun on March 15, it accounts for 157 enemy dead in exchange for 21 marines killed and 134 wounded.

May 3

NAVAL: At Groton, Connecticut, the *Triton*, the first submarine to circumnavigate the globe while submerged, and also the largest nuclear-powered submarine constructed to date, is decommissioned.

May 5–20

MARINES: South of Da Nang, South Vietnam, Operation Daring Rebel unfolds as the Marine Battalion Landing Team (1st Battalion, 26th Marines), assisted by Vietnamese and South Korean forces, lands on the coast and sweeps the region all the way to Barrier Island. The Viet Cong lose 105 dead at a cost of two marines killed and 51 wounded.

May 6

MILITARY: Landing Zone Carolyn, War Zone C, astride the Cambodian border is attacked on two fronts by superior North Vietnamese forces. The 442 defenders, consisting of Company C, 2nd Battalion, 8th Cavalry, Battery A, 2nd Battalion, 19th Artillery, and Battery B, 1st Battalion, 21st Artillery, fight back desperately and call in support from AH-1G Cobra helicopter gunships. At length the Communists draw off, leaving 172 dead on the ground; American losses total 10 killed and 80 injured.

NAVAL: Secretary of the Navy John Chaffee overrules a naval court of inquiry and orders none of the newly freed members of the *Pueblo* to face disciplinary action. Commander Lloyd M. Bucher is thus spared the ignominy of a court-martial.

MARINES: Today is the fourth anniversary of III Marine Amphibious Force, presently occupying the I Corps region of South Vietnam. It currently commands the 1st and 3rd Marine Divisions, the Army XXIV Corps headquarters, the American Division, and the 1st Brigade of the 5th Infantry Division. The last time the marines fielded such a large force was the Tenth Army on Okinawa during World War II.

May 8

MARINES: In the northwest reaches of Quang Tri Province, South Vietnam, Operation Purple Martin unfolds as the 4th Marines sweep the area free of North Vietnamese forces. For a loss of 79 dead and 268 wounded, the marines account for 252 Communists.

May 9–12

MARINES: Northwest of An Hoa, South Vietnam, the 5th Marines embark on Arizona Territory, a search-and-destroy mission, which accounts for 230 Communist troops killed.

May 10–June 7

MILITARY: General Creighton Abrams orders another sortie into the A Shau Valley, Central Highlands, South Vietnam, under the guise of Operation Apache Snow. The 3rd Battalion, 187th Infantry, 101st Airborne Division under Lieutenant Colonel Weldon Honeycutt engages two North Vietnamese battalions on Ap Bia Mountain—soon to be dubbed Hamburger Hill—and drives them off after a bloody, 10-day struggle. At length the paratroopers are joined by the 1st Battalion, 501st Infantry and the 2nd Battalion, 506th Infantry, plus a South Vietnamese battalion, and the Communists slink off in the direction of Laos. Victory costs Americans 56 dead and 300 wounded, a toll so steep that the entire action is investigated by Congress.

May 14

AVIATION: In Ecuador, Operation Combat Mosquito commences as two C-141 Starlifters arrive with 50 tons of insecticide, which is then sprayed over affected regions by two UC-123s. Within a month mosquito problems have been eradicated.

May 15

NAVAL: In a major accident at the San Francisco Bay Naval Shipyard, the nuclear submarine *Guitarro*, then under construction, accidentally sinks in 35 feet of water. A subsequent report by the Special House Armed Service Committee found shipyard workers guilty of “culpable neglect.”

May 16

NAVAL: The Coast Guard cutters *Point Garnet* and *Point League* are the first such vessels transferred over to the South Vietnamese navy.

May 16–August 13

MILITARY: In Quang Tin Province, South Vietnam, Operation Lamar Plain commences as elements of the 101st Airborne Division and the Americal Division run a sweep through southern I Corps to root out any lingering Communist presence; 542 dead enemy soldiers are claimed.

May 18–26

AVIATION: At Cape Kennedy, Florida, *Apollo 10*, piloted by Captain John W. Young, Commander Eugene Cernan, and Colonel Thomas P. Stafford, blasts into Earth orbit and circles the moon; the lunar landing module (LEM) also detaches and makes a trial descent to within 5.5 miles of the surface before recoupling and returning home safely.

May 21

AVIATION: A giant Lockheed C-5A Galaxy lifts off with a gross weight of 728,100 pounds, achieving a new world record.

May 29

MARINES: South of Da Nang, South Vietnam, Operation Oklahoma Hills commences as the 7th Marines conduct search-and-destroy operations that kill 596 enemy troops over the next two months. Marine losses are 53 dead and 487 wounded.

June 1

MILITARY: A series of joint operations entitled Dong Tien ("Progress Together") is enacted on a broad scale between U.S. and ARVN units in an attempt to hone the tactical proficiencies of the latter. This instruction continues until the last army units are withdrawn.

NAVAL: As an indication of the progress of Vietnamization, the South Vietnamese navy assumes control of all patrolling operations in the Fourth Coastal Zone, which stretches into the Gulf of Siam and the South China Sea.

June 2

NAVAL: In the South China Sea, the destroyer *Frank E. Evans* is rammed and sunk by the Australian carrier *Melbourne* during Southeast Asia Treaty Organization (SEATO) maneuvers, killing 74 sailors. The destroyer captain and his deck officer are court-martialed and reprimanded.

MARINES: In Washington, D.C., General Lewis W. Walt becomes the first assistant commandant of the Marine Corps with a four-star rank. This marks the first time in history that both senior marines wear four stars.

June 4

AVIATION: The Air Force Thunderbirds demonstration squadron begins performing with their new F-4C Phantom II jets. They dazzle the crowd at the U.S. Air Force Academy graduating ceremony.

June 5

AVIATION: In light of the lack of progress in commencing peace negotiations, air force aircraft begin striking targets in North Vietnam for the first time since November 1968. The Communists have put this eight-month lapse to good use by strengthening their antiaircraft defenses and expanding their infiltration routes through Laos and Cambodia into South Vietnam.

June 5-7

MILITARY: At Firebase Crook, South Vietnam, the garrison is alerted by seismic detectors that a large enemy force is massing nearby, apparently getting ready to strike. Over the next two nights, two companies of the 3rd Battalion, 22nd Infantry, handily repel the attackers with deadly beehive rounds fired at point-blank range. The Americans suffer one killed and seven injured.

June 7-12

MARINES: Near An Hoa, South Vietnam, Operation Arizona Territory continues as the 1st Battalion, 5th Marines, destroys a North Vietnamese command group, killing over 300 enemy soldiers.

June 8

DIPLOMACY: On Midway Island, President Richard M. Nixon declares that the United States will withdraw 25,000 troops from Southeast Asia no later than August 31. He is conferring with South Vietnamese president Nguyen Van Thieu. American military strength at the time is 540,000 men and women.

MILITARY: At Chu Lai, Vietnam, Lieutenant Sharon A. Lane is the first army nurse killed in action when a Communist missile strikes the 312th Evacuation Hospital; she receives a posthumous Bronze Star. By war's end 7,465 women

will have served in Vietnam, the vast majority as nurses; a total of eight die from various causes.

June 10

AVIATION: In Washington, D.C., Secretary of the Air Force R. C. Seamans, Jr., presents X-15 No. 1 to the Smithsonian Institution.

June 15

NAVAL: On the Ong Muong Canal, South Vietnam, a naval patrol led by Lieutenant Thomas G. Kelley runs into problems when one of its craft develops engine trouble during a Viet Cong attack. Kelley interposes his own craft between the stricken vessel and the enemy's fire, suffers serious injuries, but carries the operation through to completion. Kelley receives a Medal of Honor for bravery under fire.

MARINES: In South Vietnam, the 1st Amphibious Tractor Battalion packs up and departs for a new billet on Okinawa.

June 19

MILITARY: The Defense Department announces its decision to develop and procure multiple independently targeted reentry vehicles (MIRVs) in order to pack more nuclear warheads on existing missile stocks.

June 20

MILITARY: After Special Forces troops murder a Vietnamese informant on suspicion that he is a double agent, Colonel Robert B. Rheault, commanding the 5th Special Forces Group, is relieved of command by General Creighton W. Abrams on July 21. He is succeeded by Colonel Alexander Lemberes.

June 23

MARINES: Southeast of Khe Sanh, I Corps tactical area, Operation Cedar Falls commences as the 9th Marines begin a concentrated search-and-destroy mission of the region. Over the next three weeks, 120 Communist troops are slain at a cost of 24 marine dead and 137 wounded.

June 30

MARINES: At this juncture, Marine Corps personnel levels reach 25,698 officers and 284,073 enlisted ranks—the highest totals since the end of World War II. Presently, 84,000 marines are in South Vietnam. This probably accounts for the fact that reenlistment rates among volunteers and draftees are at their lowest level since before the war began.

July 1

AVIATION: By this date, the U.S. Air Force Air Rescue and Recovery Service (ARRS) has retrieved its 2,500th downed pilot from Southeast Asia.

MILITARY: Starting today, the Department of Defense begins using Social Security numbers as identification numbers, replacing the numerical system that has been in place since World War I.

NAVAL: The U.S. Navy presently operates 886 vessels of varying sizes; their average age is 17 years.

July 8–August 31

AVIATION: Air Force C-141 Starlifters transport 25,000 troops from South Vietnam to McChord Air Force Base, Washington, as part of the first wave of troop withdrawals.

MILITARY: The army's personnel drawdown from Vietnam commences with Increment I, or Operation Keystone Eagle, which removes two brigades of the 9th infantry Division, totaling 15,700 officers and men. The 3rd Brigade remains behind as part of the Saigon garrison for the time being.

July 9

MARINES: Southwest of Khe Sanh, I Corps area, Operation Utah Mesa, a joint army-marine operation, which began on June 12, concludes with 309 Communist soldiers killed. The marines have lost 19 dead and 91 wounded while army casualties are put at 94.

July 10

AVIATION: In the Gulf of Thailand, OV-10A Broncos of the River Patrol Force attack and sink six Viet Cong boats off Kien Giang Province.

July 14

MARINES: As part of the overall drawdown of U.S. forces in South Vietnam, the 9th Marines are embarked on ships for redeployment on Okinawa.

July 16

AVIATION: At Cape Kennedy, Florida, a Saturn V rocket launcher hurls the *Apollo II* space capsule out from Earth orbit and into a lunar trajectory. This is the first attempt to place human beings on the moon.

MARINES: In the I Corps zone, the 3rd Marines concludes Operation Virginia Ridge, a search-and-destroy mission near an area known as the "Rockpile." Since May 1, the marines have killed 560 Communist troops while losing 108 dead and 490 wounded.

- Northeast of Khe Sanh, I Corps tactical zone, Operation Herkimer Mountain ceases after the 4th Marines complete sweeps that had begun on May 1. Their losses are 25 dead and 219 wounded to an enemy tally of 137 slain.

July 17

AVIATION: Responsibility for resupplying the T-3 research station on Fletcher's Ice Island is assumed by the Alaskan Air Command.

July 19

AVIATION: The Air Force Southern Command dispatches transports to carry food supplies and other materials to assist a cease-fire in the Honduras–El Salvador border war.

July 20

AVIATION: The *Apollo II* lunar orbiter safely lands on the moon's surface, at which point Astronaut Neil Armstrong, a former naval aviator, becomes the first man to walk on an extraterrestrial body. "That's one small step for [a] man, one giant leap for mankind," he declares. He is soon after joined by Edwin E. "Buzz" Aldrin, and the two complete a total of two hours and 32 minutes walking on the moon.

MARINES: Racial groups battle at Camp Lejeune, North Carolina, resulting in the death of one marine.

July 24

AVIATION: Marine helicopter squadron HMX-1 conveys President Richard M. Nixon to the carrier *Forrestal*, where he greets the returning *Apollo 11* astronauts in person. The three astronauts also returned with 50 pounds of lunar rocks and soil samples.

July 31

MARINES: Sergeant Major Joseph W. Daily becomes the fifth sergeant major of the Marine Corps.

August 1

AVIATION: In Washington, D.C., General John D. Ryan is appointed the U.S. Air Force Chief of Staff.

- Donald L. Harlow was made the new chief master sergeant of the U.S. Air Force.

MARINES: Brigadier General Duane L. Faw and Colonel Ralph K. Culver join seven navy officers and three civilians to form the new Navy Court of Military Review. They do so in accordance with the Military Justice Act of 1968.

August 5

NAVAL: The North Vietnamese, five years after taking their first prisoners, release three American pilots held captive, Captain Wesley L. Rumble, Lieutenant Robert F. Frishman, and Seaman Douglas B. Hegdahl, who were washed overboard from the cruiser *Canberra*. The men report the use of torture and abuse at the hands of their captors.

August 13

AVIATION: At Marble Mountain, South Vietnam, helicopters of HMM-165 fly off to the amphibious assault vessel *Valley Forge*, becoming the first unit of the 1st Marine Aviation Wing (1st MAW) to depart the country. Concurrently, the 1st Light Antiaircraft Missile Battalion (LAAM) departs Da Nang for new billets at Twenty-Nine Palms, California.

August 17

MILITARY: Near the Demilitarized Zone (DMZ), South Korea, a helicopter from the 59th Aviation Company accidentally strays into North Korea and is shot down; three Americans are taken prisoner.

August 18

AVIATION: In South Vietnam, marine helicopter squadron HMM-362 is ordered back home. It is also the last unit to be operating the venerable Sikorsky UH-34D and are scheduled to be reequipped with brand-new CH-53 Sea Stallions.

August 19–September 16

AVIATION: Once Hurricane Camille devastates large tracts of southern Mississippi, six types of air force transports begin ferrying 6,000 tons of supplies in one of the largest major humanitarian relief efforts of its kind.

**Armstrong, Neil A. (1930–)***Navy officer, astronaut*

Neil Alden Armstrong was born near Wapakoneta, Ohio, the son of a state bureaucrat. He developed an interest in flying at an early age and received his pilot's license at the age of 16. Armstrong subsequently entered Purdue University on a U.S. Navy scholarship in 1947, where he studied aeronautical engineering. However, he was called to active duty in 1949 and became qualified as a jet pilot at the Pensacola Naval Air Station, Florida, and, in 1950, he was the youngest officer flying with Fighter

Squadron VF-51. Armstrong completed 78 combat missions piloting Grumman F9F Panthers in Korea, where he was shot down once and received three Air Medals. After the war he returned to Purdue to complete his degree and subsequently found work as a test pilot with the National Advisory Committee for Aeronautics (NACA) in Cleveland, Ohio. Shortly afterward, Armstrong transferred to Edwards Air Force

(continues)

Neil Armstrong with the X-15 aircraft (NASA)

(continued)

Base, California, where he tested some of the latest jets and research craft available. They included the North American X-15, a highly experimental rocket-propelled airplane, in which he set a world speed record of 207,500 feet at a speed of 6,615 miles per hour in 1961. But, despite this close proximity to space, Armstrong displayed no real interest in the ongoing astronaut program. Instead, he chose to pilot the new DynaSoar craft that was expected to leave the atmosphere, glide through space, then return like a conventional aircraft following reentry. However, once this program was cancelled by the government in 1962, Armstrong belatedly joined the next group of astronauts in training, hailed in the press as the “New Nine,” which followed the original “Mercury Seven.”

Armstrong successfully completed his space training and, on September 20, 1965, he rocketed into orbit commanding the *Gemini 8* craft with pilot David Scott. His technical expertise saved the mission when their capsule began mysteriously tumbling

due to a faulty maneuvering thruster, which he promptly disconnected, and he brought the ship safely home within one mile of the anticipated landing zone. Armstrong’s cool demeanor and technical expertise made him the natural choice to command the *Apollo 11* moon mission, destined to land the first human being on a celestial body. On July 16, 1969, accompanied by astronauts Buzz Aldrin and Michael Collins, Armstrong launched from Cape Kennedy, Florida, and four days later he successfully guided his Lunar Excursion Module (LEM) named *Eagle* to the lunar surface. “That’s one small step for [a] man, one giant leap for mankind,” he exclaimed upon taking man’s first footsteps on the moon. He and the crew of *Apollo 11* returned safely to Earth on July 24, 1969, where they were fêted as national heroes and toured the globe. Armstrong retired from active duty soon after and spent several years as a top NASA administrator until 1971, when he joined the faculty of the University of Cincinnati. Armstrong, the first man on the moon, currently lives in retirement in Lebanon, Ohio.

August 21

NAVAL: In Washington, D.C., Secretary of Defense Melvin R. Laird declares that \$3 billion will be removed from defense spending in fiscal year 1970, forcing the navy to deactivate more than 100 vessels, including the battleship *New Jersey*.

August 25

AVIATION: The Lockheed C-5A Galaxy is refueled aurally for the first time by Military Airlift Command (MAC) crews.

August 27

MILITARY: In South Vietnam, General Creighton W. Abrams orders that the CIDG program be terminated. This places thousands of Montagnard soldiers under direct South Vietnamese control in the form of 38 light infantry battalions.

September 3

POLITICS: Ho Chi Minh, the driving force behind North Vietnam's Communist-inspired unification with South Vietnam, dies in Hanoi.

September 5

MILITARY: At Fort Benning, Georgia, Lieutenant William Calley is charged with murder in conjunction with events at the My Lai Massacre on March 16, 1968. His ensuing court-martial is politically charged and serves as a rallying point for opposing viewpoints on the war.

September 16

MILITARY: In Washington, D.C., President Richard M. Nixon declares that an additional 35,000 troops will be removed from Vietnam no later than December 15, including 5,200 sailors and 18,500 marines.

September 17

MARINES: It is decided that 1,400 men of the October draft are slated to serve with the Marine Corps; this year 11,878 draftees have been accepted.

September 18–December 15

MILITARY: The army conducts Increment II (Keystone Cardinal) of the phased withdrawal from Vietnam by removing the 3rd Brigade, 82nd Airborne Division, back home.

MARINES: MACV declares that the bulk of marine forces withdrawn from South Vietnam will come mainly from the 3rd Marine Division. Moreover, marines with time still left on their tour will be transferred to other units that are remaining behind.

September 21

MARINES: In Washington, D.C., Secretary of Defense Melvin Laird declares that the 5th Marine Division is slated for deactivation with the exception of the 26th Marines, then deployed in South Vietnam.

September 27

MARINES: Southwest of Con Thien, I Corps tactical zone, Operation Idaho Canyon concludes after the 3rd Marines finish a search-and-destroy effort that has been ongoing since July 17. They accounted for 565 Communists killed at a cost of 95 dead and 450 wounded.

September 29

MARINES: Headquarters Marine Corps announces a 20,300-man reduction in its active duty roster.

October 1

MARINES: As the Marine Corps readjusts to a peacetime establishment, reenlistment standards are tightened, especially with regard to disciplinary behavior.

October 5

AVIATION: A Cuban defector effortlessly flies his MiG-17 past U.S. aerial defenses and lands at Homestead Air Force Base, Miami, Florida. President Richard M. Nixon was there onboard Air Force One when it happened.

October 8–14

AVIATION: At Wheelus Air Force Base, Libya, the air force dispatches three HH-53 helicopters from the 58th Aerospace Rescue and Recovery Squadron to aid in relief efforts for flood victims in nearby Tunisia; over 2,400 people are rescued from rising waters.

October 10

NAVAL: The navy hands over 80 river patrol boats (RPBs) to the South Vietnamese navy in the largest transfer of assets to date. Since June 1968 the total number of vessels transferred is 229.

MARINES: In an attempt to continue attracting recruits, unaccompanied tours in Japan and Okinawa are reduced from 13 months to 12.

October 15

MARINES: With the exception of divisional headquarters, the entire 5th Marine Division is deactivated.

October 18

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, a jeep from the 7th Division is ambushed by North Koreans; four Americans are killed.

October 26

NAVAL: The carrier *Coral Sea* begins its fifth tour on Yankee Station in the Gulf of Tonkin.

October 27

NAVAL: The navy commissions *NR-1*, its first deep-water submersible designed expressly for working under the crushing pressures of oceanic depths.

October 29

AVIATION: The Strategic Air Command (SAC) declares the phaseout of all B-58 Hustler strategic bombers; this speedy craft first entered the U.S. Air Force inventory in August 1960.

November 6

AVIATION: At Holloman Air Force Base, New Mexico, a 34-cubic foot balloon towering 1,000-feet tall is launched with a record 13,000-pound payload. This is the largest craft of its type ever constructed.

MILITARY: Congress passes a military appropriations bill that includes funding for the Safeguard ABM system.

November 7

MARINES: In the Dodge City and Go Noi Island areas below Da Nang, South Vietnam, the 1st Marine Division concludes Operation Pipestone Canyon, which has been underway since May 26. The marines kill 488 Communist troops at a cost of 54 killed and 540 wounded.

- Final elements of the 3rd Marine Division embark and sail for their new home on Okinawa.
- On Okinawa, the I Marine Expeditionary Force is created to command all Fleet Marine Force units on that island and Japan.

Soldiers carry a wounded comrade through a swampy area in Vietnam, 1969.
(National Archives)

November 11–15

MILITARY: In Washington, D.C., U.S. Army and National Guard units are braced for possible unrest as the capital braces for two large antiwar protests.

November 14–24

AVIATION: The *Apollo 12* space capsule, which features the all-navy crew of Commanders Charles C. Conrad and Richard F. Gordon, and Lieutenant Commander Alan Bean, makes a second successful landing on the moon, remaining on the surface for seven and a half hours.

November 19

MILITARY: Congress, at the behest of President Richard M. Nixon, changes the draft into a lottery system based on birth dates, effective December 1.

November 25

MILITARY: President Richard M. Nixon orders American germ warfare stockpiles destroyed in an attempt to induce a similar gesture from the Soviet Union. He also asks the Senate to approve a 1925 Geneva Protocol prohibiting both biological and chemical warfare and declares that the United States will never deploy such weapons first.

November 26

MILITARY: President Richard M. Nixon signs legislation establishing a lottery for the selective service, based on birth days, which commences on December 1.

November 29

NAVAL: In the Mekong Delta, South Vietnam, the navy turns over My Tho naval base to the Vietnamese navy. This is the first such facility transferred.

December 1

MILITARY: A new draft lottery commences in selecting 19 year olds for military service based upon their birthday. It replaces the earlier blanket military obligation in an attempt to quell antiwar sentiments.

December 15

MILITARY: In Washington, D.C., President Richard M. Nixon announces that American troop strength in Vietnam will be cut to 434,000 by April, representing a total withdrawal of 110,000 combat soldiers since he took office.

December 17

AVIATION: The air force terminates Project Blue Book, dealing with investigating unidentified flying objects. It concludes that phenomena such as alien spacecraft simply do not exist.

NAVAL: At Bremerton, Washington, the refurbished battleship *New Jersey* is decommissioned and returned to mothballs at the Naval Inactive Ship Maintenance Facility.

December 18

AVIATION: At the Air Force Missile Development Center, air crews begin testing the television-guided Maverick (AGM-65) surface-to-ground missile. This is the first aerial weapon capable of tracking targets in motion on the ground.

December 23

AVIATION: The air force declares McDonnell Douglas as prime contractor for the new F-15 air superiority fighter. This high-performance aircraft is capable of 920 miles per hour with a ferry range of 3,450 nautical miles.

December 30

NAVAL: A navy river patrol boat (RPB) catches a body of Viet Cong crossing the Saigon River and attacks, killing 27 Communists at no loss to themselves.

December 31

AVIATION: The 1st Marine Aviation Wing (1st MAW) continues performing yeoman work in 1969 with fixed-wing sorties and 547,965 helicopter missions flown. Losses are 44 helicopters, 34 fixed-wing aircraft, 92 marines killed, 514 wounded, and 20 missing.

MARINES: From a total strength of 201,675, no less than 54,559 marines are still serving in Vietnam. In 1969 they suffered 2,258 dead and 16,567 wounded.

1970

January

MILITARY: Total army strength in South Vietnam is 330,300, with 6,710 killed in action during the previous 12 months.

January 1

NAVAL: On the Saigon River, navy and South Vietnamese riverine vessels battle Viet Cong swimmers attempting to capture a sunken Vietnamese river boat. They kill 12 enemy soldiers and subsequently salvage the disabled craft.

January 2

MILITARY: The Department of Defense reveals that 1,403 military personnel have deserted since July 1, 1966.

January 5

AVIATION: At Fortuna Air Force Station, North Dakota, the Backup Intercept Control (BUIC) III radar is activated with the 80th Air Defense Group, Aerospace Defense Command. This is designed to back up the existing SAGE system and relay information regarding air threats to North America.

January 6

MARINES: In the Que Son Valley, South Vietnam, Fire Support Base Ross is attacked by mortar fire and sappers attempting to break in, but men of the 1st Battalion, 7th Marines drive them off with 39 dead left on the ground. Marine losses are 13 dead and 63 wounded.

January 8

MARINES: In the I Corps tactical zone, South Vietnam, III Marine Amphibious Force institutes the new Combined Unit Pacification Program, whereby rifle squads deployed to villages receive no special training and, moreover, they remain attached to the parent formations.

January 9

AVIATION: In Tay Ninh Province, South Vietnam, a Sealords patrol engages a battalion-sized enemy force and calls in air support. Navy helicopter gunships and OV-10A Broncos sweep in and attack, killing 32 Viet Cong.

January 10

AVIATION: At Kirtland Air Force Base, New Mexico, air force engineers devise a portable water treatment plant capable of filtering 4,000 gallons of drinking water per day from sewage.

January 16

AVIATION: At Grissom Air Force Base, Indiana, the last operational B-58 Hustlers depart for Davis Monthan Air Force Base, Arizona, for decommissioning.

January 17

AVIATION: In New Orleans, Louisiana, Reserve transports airlift crews of carpenters and painters to assist repair efforts in the wake of Hurricane Camille.

January 18–25

MARINES: At Camp Drum, New York, the 2nd Reconnaissance Battalion initiates Operation Snowfer for cold weather training.

January 19

MARINES: In the Caribbean, naval and marine elements from Brazil, Canada, Colombia, the Netherlands, the United Kingdom, and the United States participate in Operation Springboard. This is a three-month training exercise involving 110 vessels and 260 aircraft. It is initially based at San Juan, Puerto Rico.

January 19–23

MARINES: On Okinawa, the Military Employees Labor Union strikes for five days with a major confrontation and has little effect on the flow of Marine Corps activities there.

January 24

MARINES: As more marines are pulled from Southeast Asia, the Marine Corps begins extending the training period of recruits from eight to nine weeks.

January 27

AVIATION: To further assist the South Vietnamese air force master the intricacies of aviation maintenance and repair, the Air Training Command deploys the first element of its 64-man training team.

January 28

MILITARY: The Department of Defense announces a third wave of withdrawals from South Vietnam involving 50,000 military personnel from all four branches, including 12,900 marines. All are to depart no later than April 19.

NAVAL: Near Vung Tau, III Corps tactical zone, the destroyer *Mansfield* provides supporting fire for the 1st Australian Task Force.

January 30

AVIATION: The air force turns over operational control of the *Skynet* satellite to English operators; this vehicle had been placed in orbit by the Space and Missile Systems Organization on January 8.

January 31

MILITARY: This month, military analysts deduce that North Vietnamese truck and other traffic along the infamous Ho Chi Minh Trail has actually increased 10 times over what it had been the past fall.

February 1

MARINES: Headquarters Marine Corps reveals its expanded early-out program for Vietnam veterans in the ranks. Applying here can release individuals from active service by as much as 14 months earlier than stipulated in enlistment contracts.

February 1–April 15

MILITARY: Operation Keystone Bluejay removes the 1st Infantry Division from the III Corps and the 3rd Brigade, 4th Infantry Division departs soon afterward.

February 3

AVIATION: At Yokota Air Base, Japan, helicopters of the 36th Aerospace Rescue and Recovery Squadron (ARRS) swing into action by rescuing 44 seamen from the sinking commercial vessels *Antonious Demades* and *California Maru*.

February 14

NAVAL: The Coast Guard turns over three 82-foot cutters to the South Vietnamese navy.

February 17

AVIATION: Communist troop concentrations and supply dumps in northern Laos are struck by B-52 bombers for the first time; the public is not made aware of this activity until March 6.

MILITARY: In Washington, D.C., President Richard M. Nixon declares that the process of Vietnamization, namely, turning over the bulk of combat operations to South Vietnamese units, is proceeding on schedule.

February 18

AVIATION: An HL-10 experimental lifting body flown by Major Peter C. Hoag is released by a B-52 bomber and glides at Mach 1.86 to an altitude of 65,000 feet.

February 19

MARINES: On Mount Suribachi, Iwo Jima, representatives from the United States and Japan attend a combined ceremony marking the 25th anniversary of the bloody battle. The Marine Corps is represented by Major General William K. Jones, commander of the 3rd Marine Division.

February 23

MARINES: To effectively end the draft and enhance the success of an all-volunteer military, the Gates Commission recommends pay increases for all ranks and other reforms. It is hoped that the draft, a source of considerable resentment among the nation's youth, will be ended by June 30, 1971.

February 24–27

AVIATION: A Tactical Employment conference is sponsored by the Marine Corps to evaluate the best methods of employing the new Hawker Siddeley AV-8A Harrier. This is a radical new jet aircraft that can rise vertically off the ground like a helicopter, then fly like a conventional jet.

February 27

AVIATION: Pratt and Whitney is selected by the Department of Defense to manufacture new engines for the air force F-15 Eagle and the navy F-14B Tomcat.

- At Edwards Air Force Base, California, the F-111E prototype is delivered for flight testing.

February 28

NAVAL: At Da Nang, South Vietnam, the navy turns over 11 swift boats to the Vietnamese navy, which is now responsible for patrolling the waters of all five northern provinces.

March 4

MILITARY: Secretary of Defense Melvin R. Laird announces that 371 military bases are to be closed down in an economizing move that will save the taxpayers \$914 million.

March 7

NAVAL: In the IV Corps tactical zone, the South Vietnamese navy takes charge of Operation Tran Hung Dao I to interdict the infiltration of enemy supplies and personnel from Cambodia.

March 9

MARINES: In the I Corps tactical zone, South Vietnam, III Marine Amphibious Force surrenders tactical control of most of its remaining units to the Army XXIV Corps, which now constitutes the majority of units in the region. However, III MAF still controls the 1st Marine Division and the 1st Marine Air Wing (1st MAW) to preserve its traditional air-to-ground links.

- Lieutenant General Keith B. McCutcheon succeeds to command of the III MAF.

March 13

MARINES: Marine Corps basic school is extended from 21 weeks to 26.

March 14

MILITARY: At Fort Benning, Georgia, Lieutenant General William Peers files a preliminary report on the My Lai massacre. The Army Judge Advocate General, mindful that the statute of limitations runs out on the next day, files charges against 11 officers, including Major General Samuel W. Koster, Americal Division. The charge is subsequently dismissed.

MEDICAL: At Da Nang, the hospital ship *Repose* departs South Vietnam after four years of continuous service.

March 15

AVIATION: Work on the automatic voice network to connect all U.S. military bases by telephone is finished. This system is known as "Autovon."

March 16

NAVAL: At Da Nang, South Vietnam, the navy transfers four support ships and two more Coast Guard cutters to the South Vietnamese navy.

March 18

MILITARY: Air Force B-52s begin a protracted series of strikes against Communist troop concentrations and supply dumps in Cambodia. Over the next eight weeks they deliver 120,000 tons of ordnance in 4,300 sorties.

- In southern I Corps, Americal Division commander Major General Lloyd B. Ramsey is injured after his helicopter crashes during a survey mission. His replacement is Major General Albert E. Milloy.

POLITICS: In Cambodia, the leftist regime of Prince Sihanouk is overthrown by General Lon Nol, a staunch anticommunist who solicits aid from the administration of President Richard M. Nixon.

March 19

AVIATION: Over Edwards Air Force Base, California, the HL-10 lifting body performs its first powered flight with Major Jerauld R. Gentry at the controls.

March 20

AVIATION: At Cape Kennedy, Florida, a Thors-Delta rocket booster places the first two NATO communications satellites into orbit.

March 23

MILITARY: In New York City, U.S. Army National Guard troops are sent in to quell a labor dispute and restore order.

MARINES: Marine Reserve units are activated by President Richard M. Nixon for the purpose of assisting the U.S. Postal Department during a labor strike.

March 24

AVIATION: At Tyndall Air Force Base, Florida, a Bomarc B guided missile is launched for the first time using the new BUIC (Backup Intercept Control) III computerized command and control equipment.

March 25

MARINES: In Brooklyn, New York, 300 Marine Corps Reservists are assigned to assist at the main post office, although the labor situation is resolved the following day.

March 28

AVIATION: Over Thanh Hoa, North Vietnam, an F-4 Phantom II from the *Constellation* downs a MiG-21; this is the navy's first aerial victory in 16 months.

March 28–April 3

NAVAL: Off Rach Gia, IV Corps tactical zone, South Vietnam, the destroyer *Orleck* provides close supporting fire to the South Vietnamese 21st Infantry Division going ashore, destroying 44 enemy structures. At length it is joined by destroyers of the Seventh Fleet and Coast Guard cutters *Chase* and *Dallas*, and proceeds to destroy a further 48 bunkers and 28 sampans.

March 30

AVIATION: Transport aircraft are dispatched by the U.S. Air Force Europe (USAFE) to bring medical and relief supplies to victims of a destructive earthquake at Gediz, Turkey.

March 31

AVIATION: The final operation Mace tactical missiles are placed in storage at Davis Monthan Air Force Base, Arizona, for possible use as a subsonic target drone.

April 1

AVIATION: The Strategic Air Command (SAC) reorganizes and redistributes its post-nuclear attack command-and-control system at Offutt Air Force Base, Nebraska, Grissom Air Force Base, Indiana, and Ellsworth Air Force Base, North Dakota.

MILITARY: In Tay Ninh Province, South Vietnam, Firebase Illingsworth—only three miles from the Cambodian border—is attacked by a Viet Cong regiment. The garrison under Lieutenant Colonel Michael J. Conrad's 2nd Battalion, 8th Cavalry, and several field batteries, fights off their antagonists. The Communists leave 75 dead on the ground before departing; American casualties are 24 killed and 54 wounded.

- In Binh Tuy Province, South Vietnam, Brigadier General William R. Bond, commander, 199th Infantry Brigade, is killed by enemy fire while accompanying a resupply convoy. He is succeeded by Colonel Joseph E. Collins.

MARINES: At Camp Pendleton, California, training responsibility for all Marine Corps Reserve ground forces is handed off to headquarters, 4th Marine Division. Such instruction was formerly reserved for the senior officer of each Marine Corps district.

April 2

MARINES: In South Vietnam, the level of marines present dips to 43,600.

April 10

AVIATION: In South Vietnam, Project Pacer Bravo continues as the Air Training Command finishes the transfer of 872 training personnel to support the South Vietnamese air force modernization program.

- Marine Lieutenant Larry Parsons, a helicopter pilot shot down near the Lao-tian border and believed to be killed, miraculously walks out of the jungle and back to friendly lines after 20 days in the jungle.

April 11

AVIATION: The 146th Tactical Airlift Wing, California Air National Guard, becomes the first unit of its kind transferred to the Tactical Air Command (TAC).

- Transports from the Air Force Southern Command begin flying in food and humanitarian relief to victims of recent flooding in Costa Rica and Panama.

April 11–17

AVIATION: The *Apollo 13* space capsule, piloted by Captain James A. Lovell, Jr., experiences an onboard fuel tank explosion only 56 hours into its moon mission. Engineers from the National Aeronautics and Space Administration (NASA) assist the astronauts to remain alive, and they pilot their crippled ship safely back to Earth six days later.

April 14

AVIATION: At Hill Air Force Base, Utah, a Minuteman III intercontinental ballistic missile (ICBM) is loaded onboard a C-141 Starlifter and flown to Minot Air Force Base, North Dakota. This is the first time a Minuteman III has been relocated by air.

MARINES: At Yang Po Ri, South Korea, the 11th Marine Expeditionary Brigade is slated to participate in Exercise Golden Dragon with the South Korean Marine Corps.

April 16

DIPLOMACY: In Vienna, Austria, the Strategic Arms Limitation Talks (SALT) commence between the United States and the Soviet Union. Talks are undertaken in an attempt to limit the size of nuclear arsenals, and reduce the chances of an accidental war.

April 17

AVIATION: At Minot Air Force Base, South Dakota, the 741st Strategic Missile Squadron places the first operational Minuteman III in its silo; the entire unit becomes operational by the end of the year.

April 20

DIPLOMACY: In Washington, D.C., President Richard M. Nixon accelerates the trend of Vietnamization by announcing the withdrawal of 150,000 from Southeast Asia by year's end. American deaths in combat now average 25 per week, down from 280 in 1968.

April 22

MARINES: A military mutiny on the island of Trinidad results in 2,000 marines being mobilized and sent to the area as a precaution in the event the evacuation of American civilians becomes necessary.

April 23–28

MARINES: At San Juan, Puerto Rico, the 3rd Battalion, 2nd Marines and helicopters of HMM-261 depart for possible service on the island of Trinidad. However, they soon after stand down and resume normal operations.

April 26

MILITARY: In the II Corps tactical area, Lieutenant General Michael S. Davidson alerts the 1st Cavalry Division that they must be prepared to invade the Fishhook region of Cambodia within 72 hours. This region is headquarters for the Communist Central Office for South Vietnam (COSVN) and responsible for all Viet Cong operations in the southern parts of the country.

April 27

MARINES: No Marine Corps casualties are reported this day, a first for 1970.

April 29–June 30

MILITARY: President Richard M. Nixon authorizes American forces to attack six Communist sanctuaries in Cambodia; while much damage is incurred by the enemy, most simply slip deeper into the interior to escape and wait for the storm to pass.

- South Vietnamese forces, backed by American air power and some Army units, commence Operation Toan Thang 42 (“Total Victory”) with an advance into the Parrot’s Beak region of Cambodia.

MARINES: A handful of marine advisers assist the South Vietnamese Marine Corps during its invasion of Cambodia.

April 30

MARINES: At Naval Air Station Quonset Point, Rhode Island, some battalions of the 6th and 8th Marines are placed on alert to assist authorities to quell civil unrest in New Haven, Connecticut, but they are not deployed.

- At Camp Pendleton, California, the 26th Marines and the 1st Battalion, 13th Marines are deactivated.

May 1

MILITARY: American forces begin their Cambodian incursion by advancing into the so-called Fishhook region. Operation Rockcrusher is spearheaded by the 1st Cavalry Division under Brigadier General Robert M. Shoemaker, assisted by the 11th Armored Cavalry and 5,000 South Vietnamese troops. Opposition is light and the town of Snoul is captured easily.

MARINES: Albert Schoepper becomes the first director of the Marine Corps Band to reach the rank of colonel in the 172-year history of that organization.

May 3–4

MILITARY: The 1st Squadron, 9th Cavalry, forges ahead of the 1st Cavalry Division and uncovers an enemy supply dump spanning nearly a square mile in length. Communist forces melt into the jungle before them.

May 4

AVIATION: At RAF Station Marham, England, four B-52 bombers from the Strategic Air Command compete in the Royal Air Force Strike Command bombing and navigation competition, winning the coveted Blue Steel Trophy.

MILITARY: At Kent State University, Ohio, National Guard troops fire upon rioting student demonstrators, killing four and wounding nine. In light of the deaths, antiwar protests are noticeably smaller and better behaved.

May 4–16

MILITARY: In the III Corps tactical area, the 4th Division under Major General Glen D. Walker and the 22nd South Vietnamese Division commence Operation Binh Tay (“Tame the West”) by crossing the border into Cambodia. The force intends to wipe out enemy bases within their reach, although resistance throughout their advance is light. Thick jungles and foreboding terrain notwithstanding, a North Vietnamese hospital complex is overrun and the Americans withdraw.

May 5

AVIATION: At colleges across the country, Air Reserve Officer Training Corps (AFROTC) is opened to women candidates for the first time.

NAVAL: Along the Vam Go Dong and Van Vo Nay Rivers north of Saigon, South Vietnam, Vietnamese riverine forces take control of Operation Giant Slingshot, a patrolling action run by the Americans since December 1968. In that time, the river boats had fought in 1,200 actions and killed an estimated 2,400 Viet Cong.

May 6–8

NAVAL: A force of 40 navy patrol craft enters Cambodia by way of the Kham Span River and are attacked by Viet Cong forces 65 miles northwest of Saigon, South Vietnam. Two days later an additional 100 patrol craft sail up the Mekong River and enter that supposedly neutral nation. However, their penetration is limited to 2.17 miles.

May 6–14

MILITARY: West of Tay Ninh Province, South Vietnam, the 1st and 3rd Brigades, 25th Infantry Division push farther into Cambodia and enter the region known as the Dog’s Head. Meanwhile, the 3rd Brigade, 9th Division, strikes at the Parrot’s Beak.

May 8

AVIATION: During an attack against the Ho Chi Minh Trail, Vietnam, an AC-119K Shadow gunship piloted by Captain Alan D. Milacek loses 15 feet of right wing to enemy ground fire. Milacek continues destroying enemy trucks then gingerly nurses his crippled airplane back to base, winning a Mackay Trophy.

May 9–24

MILITARY: In the Mekong Delta, South Vietnam, the Vietnamese 9th and 21st Divisions scour the river banks for Viet Cong units and open up a river path to Phnom Penh, Cambodia. They are assisted by a large body of American advisers.

May 10

MARINES: In Washington, D.C., the 6th Marines are placed on alert in the event of civil unrest arising from a large antiwar demonstration. Other formations at Quantico, Virginia, are also activated.

May 12

NAVAL: Navy and South Vietnamese navy vessels form a blockade of the Cambodian coast reaching from the South Vietnam border to the city of Sihanoukville.

This is a concerted attempt to throttle Communist supply routes from extending from that region.

May 14

MARINES: Along the North Carolina coast, the 3rd Marine Division participates in Exotic Dancer III, a three-week combined-service operation involving 60,000 men.

May 28

MILITARY: The army, stung by its handling of the My Lai massacre, issues Regulation 350-216 regarding the issue of war crimes, illegal orders, and the responsibility of individual soldiers under such circumstances.

May 31

MARINES: A severe earthquake in Peru, South America, prompts the dispatch of the helicopter assault ship *Guam*, which carries a company of the 1st Battalion, 2nd Marines and helicopters of HHM-365. They spend 11 days providing emergency relief to the victims.

June 2

AVIATION: After earthquakes devastate large sections of Peru, a large humanitarian mission is mounted by the U.S. Air Force Southern Command. Transports deliver 750 tons of supplies and 3,000 passengers while lifting out 500 medical patients. All this is accomplished from rudimentary airstrips 1,500 miles from home base.

June 5

AVIATION: The air force selects North American Rockwell to build its next generation of strategic bombers, the B-1A, while General Electric is chosen to design and build the engines. This aircraft is intended to replace the aging fleet of Boeing B-52s, although the latter displays remarkable longevity as a combat aircraft.

June 6

AVIATION: The first operational C-5A Galaxy transport is delivered to the Military Airlift Command (MAC). It is personally accepted by General Jack J. Catton, who presides over ceremonies.

June 11

MILITARY: History is made when Colonel Anna M. Hayes, chief of the Army Nurse Corps, and Colonel Elizabeth P. Hoisington, director of WAC, become the army's first female brigadier generals.

MARINES: Throughout South Vietnam, Communist forces launch their biggest offensive since Tet, aimed largely at Marine Corp Combined Action Program units in villages of the I Corps tactical zone. Many civilians are killed in consequence.

June 15

MILITARY: The U.S. Supreme Court decides the case of *Welsh v. United States*, ruling that conscientious objector status on moral—not religious—grounds is constitutional.

June 18

AVIATION: The Blue Angels precision flying demonstration team is joined by a Marine Corps KC-130 tanker aircraft.

June 19

AVIATION: At Minot Air Force Base, North Dakota, the first Minuteman III intercontinental ballistic missiles (ICBMs) are declared operational.

June 22

AVIATION: At Chanute Air Force Base, Illinois, the Base Engineer Emergency Force (BEEF) is deployed to nearby Crescent City to restore the water system following a devastating series of explosions and fires.

June 23

NAVAL: The navy turns over an additional 273 river patrol boats to the South Vietnamese navy, raising the total number to 525. The remaining 125 still operated by the Americans are slated for eventual transfer in December.

June 24

POLITICS: In Washington, D.C., the Senate votes to repeal the 1964 Gulf of Tonkin Resolution, 81 to 10. This act gave the chief executive unbridled authority to deploy military units in a war zone.

June 25

MARINES: The Marine Barracks at Argentia, Newfoundland, founded in 1941, is formally deactivated.

June 30

MILITARY: The Cambodian incursion, which involves 30,000 American and 48,000 South Vietnamese troops, draws to a close as the forces withdraw. American losses are 338 dead and 1,525 wounded while the Vietnamese lose 638 dead and 4,009 wounded. The Communists are believed to have lost over 11,000 dead and 2,328 captured, along with mounds of equipment and supplies.

MARINES: Manpower levels in the Marine Corps have declined to 24,941 officers and 234,796 enlisted men.

- The first six months of 1970 result in the 1st Marine Division engaging in relatively few major clashes with Communist units in the field. Nonetheless, marines have accounted for 3,955 of the enemy at a cost of 283 dead and 2,537 wounded.

July 1

NAVAL: In Washington, D.C., Admiral Elmo R. Zumwalt, Jr., is appointed the new chief of naval operations. He is both the youngest officer promoted to four stars and also the youngest to occupy that office. In time, Zumwalt also becomes one of the most controversial reformers in navy history.

July 1–23

MILITARY: In Thua Thien Province, South Vietnam, Firebase Ripcord, west of Hue, is attacked by superior numbers of North Vietnamese. The defenders, consisting of two companies of the 2nd Battalion, 506th infantry, and the 2nd Battalion, 319th Artillery, stand their ground until July 18 when a helicopter crash ignites the base ammunition dump. At this juncture, Major General John J. Hennessey, 101st Airborne Division, decides to evacuate the firebase altogether, which is successfully accomplished by airlift while under heavy fire. American losses are 61 dead and 325 wounded.

July 1–December 31

MILITARY: Increments IV and V of the army drawdown are implemented, resulting in the removal of brigades from the 4th, 9th, and 25th Infantry Divisions, a total of 57,000 men.

July 3

MARINES: South of Quang Tri City, South Vietnam, militia units, backed by Marine Combined Action Program units, helicopter gunships, and artillery support, drive off North Vietnamese forces from several villages. Enemy losses amount to 135 dead, while the militia loses only 16 killed and six missing.

July 5

AVIATION: The air force contracts with the Boeing Company to design and construct its first airborne warning and control systems (AWACS) aircraft. These sophisticated machines will serve as aerial combat direction centers within the Aerospace Defense Command.

July 7

MILITARY: Major George W. Casey, newly appointed commander of the 1st Cavalry Division, dies when his helicopter crashes, and he is replaced by Major General George W. Putnam.

July 9

MARINES: During this fourth round of troop withdrawals, a total of 17,021 marines are ordered stateside. They include the 7th Marines, Marine Air Group 13 (MAG-13), and several squadrons.

July 14

AVIATION: C-5A Galaxies undergo their first transpacific flight of 21,500 miles by landing at Hickham Air Force Base, Hawaii, Andersen Air Base, Guam, Clark Air Base, Philippines, and Kadena Air Base, Okinawa.

July 15–27

AVIATION: As 5,000 ARVN troops sweep the region west of Da Nang for Communist units, they are transported on marine helicopters and assisted by marine advisers.

MARINES: West of Da Nang, South Vietnam, the 5th Marines commence Operation Barren Green to protect the local corn harvest from Communist interference. They manage to kill 18 enemy soldiers and burn 10,000 pounds of grain.

July 16–August 24

MARINES: Southwest of Da Nang, South Vietnam, the 7th Marines conduct Operation Pickens Forest to drive out Communist unit and confiscate their food caches. By the time the operation ends, the marines have killed 99 Communists soldiers at a price of four dead and 51 wounded.

July 20

AVIATION: The Compass Link photo relays system developed by the Electronics Systems Division, Hanscom Air Field, Massachusetts, is adopted by the Air Force Communications Service. This novel system employs three ground stations and two satellites, which speedily transmit film from Southeast Asia to the Pentagon through electronic signals and laser beams. This is a precursor to “real time” military intelligence.

**Zumwalt, Elmo R. (1920–2000)***Admiral*

Elmo Russell Zumwalt was born in San Francisco, California, on November 29, 1920, and he graduated from the U.S. Naval Academy in 1943. He saw service in World War II onboard destroyers and won a Bronze Star for gallantry during the Battle of Leyte Gulf. Zumwalt commanded a destroyer during the Korean War, advanced to captain, and attended the National War College before serving as senior aide to Secretary of the Navy Paul Nitze. He made history in July 1965 by becoming the navy's youngest rear admiral at the age of 44. Three years later his career took a dramatic turn when he was appointed commander of all U.S. naval forces in Southeast Asia with a rank of vice admiral. Zumwalt determined that the navy should have a higher profile in that conflict, which he achieved through creation of the so-called Brown Water Navy. This was an extensive force of swift boats, light ships, and hovercraft that patrolled the innumerable waterways of the Mekong

Delta to interdict Viet Cong supplies and movement. More controversial was the use of the Defoliant Agent Orange, which was used to strip away the thick jungle coverage used by the enemy. By 1969 Zumwalt's efforts had greatly impeded Communist infiltration in the region but, that same year, the process of Vietnamization began and Zumwalt's responsibilities were turned over to the South Vietnamese navy.

In July 1970 Zumwalt again made history when President Richard M. Nixon appointed him chief of naval operations; at 49, he remains the youngest officer to hold that post. Acting upon his Vietnam experiences and a disastrous decline in enlistment rates, Zumwalt began the most controversial phase of his career. He began issuing a series of 120 "Z-grams," which granted permission for beards, relaxed clothing standards, and dispensed with numerous traditional duties. The Navy also abolished all vestiges of discrimination against

July 22

NAVAL: In a sign of mounting Vietnamization, a class of 60 South Vietnamese naval officers graduates from the Officer Candidate School, Newport, Rhode Island. They are to be commissioned into active service once home.

July 31

AVIATION: At Keesler Air Force Base, Mississippi, the first class of Vietnamese exchange pilots graduates from the pilot training program. Their presence here is also part of the ongoing Vietnamization process.

August

AVIATION: In Washington, D.C., Secretary of Defense Melvin Laird advances the Total Force Concept for all armed services to bring Regular, Reserve, and National Guard elements into a closer, more efficient relationship, especially with respect to planning and budgeting functions.

minorities, and women were allowed to sail onboard ships at sea. Zumwalt faced an even greater challenge posed by the Soviet navy, which was undergoing a dramatic expansion and modernization. In light of tight, Congressional budgeting, he adopted the “High-Low” strategy of mothballing marginally obsolete vessels and investing the savings in numerous, smaller vessels. Defense critics protested as the number of commissioned vessels dropped from 769 to 512, but Zumwalt insisted this was the most cost-effective way to counter the Soviet threat. He retired from the navy in July 1974 and waged an unsuccessful bid to become U.S. senator from West Virginia. Zumwalt also published a noted memoir entitled *On Watch* (1976), in which he criticized attempts to achieve détente with the Soviet Union through arms control agreements. Sadly, Zumwalt’s own son, who had been exposed to Agent Orange in Vietnam, died from cancer in 1988. Zumwalt died in Durham, North Carolina, on January 2, 2000, possibly the most controversial reformer in U.S. navy history.

Elmo Zumwalt receives a Distinguished Service Medal. (U.S. Army)

August 1

NAVAL: The Military Sea Transportation Service is redesignated the Military Sealift Command, although it remains under the control of the navy.

August 3

AVIATION: Off Cape Canaveral, Florida, the ballistic missile submarine *James Madison* conducts the first submerged test launch of the Poseidon C-3 missile. This new weapon features greater range than the Polaris missiles it is intending to replace, and it also carries multiple warheads.

August 6

DIPLOMACY: The United States and Spain conclude a five-year agreement that allows the Americans to use four Spanish military bases in exchange for assisting in continuing modernization of Spanish military forces.

August 8–13

MARINES: At Quantico, Virginia, 12 of 17 scheduled events from the 9th Annual Interservice Rifle Championships are won by marine marksmen.

August 17

MARINES: At Camp Pendleton, California, the 4th Marine Division, the 4th Marine Air Group (4th MAW), and 10,000 reservists wage Exercise Hugh Desert over the next two weeks.

August 20

MILITARY: As a sign of mounting disciplinary problems, the Department of Defense estimates that around 30 percent of U.S. military personnel have experimented with marijuana or other illegal drugs.

August 21

MILITARY: In Washington, D.C., Secretary of Defense Melvin Laird introduces the Total Force Concept for the armed services, whereby the Reserves and National Guard are to be the first recourse for augmenting active forces, rather than relying on a draft.

August 22

MARINES: At Camp Perry, Ohio, marine marksmen and team shooters win 20 out of 24 matches at the National Rifle and Pistol Championships. This is also the first time that the marines win the National Trophy Rifle and the National Trophy Pistol matches.

August 24

AVIATION: Two Air Force HH-53 helicopters make the first nonstop transpacific crossing by arriving at Da Nang Air Base, South Vietnam. They had originally departed from Eglin Air Force Base, Florida, a distance of 9,000 miles.

August 31

MARINES: In the Que Son Mountain region, the 11th Marines unleash one of their biggest bombardments of the war. For six hours commencing at midnight, 13,488 rounds rain down on 53 selected bases, followed by an additional two hours of air strikes. The 7th Marines then move in to conduct mop-up operations.

September 1

AVIATION: In Saigon, South Vietnam, General Lucius D. Clay, Jr., is appointed head of the Seventh Air Force.

September 5–October 8

MILITARY: In Thua Thien Province, South Vietnam, Operation Jefferson Glen is launched by the 101st Airborne Division. It is designed to protect the government's programs in the countryside and accounts for 2,026 Communist dead over the next 399 days.

September 6

TERRORISM: After radical Palestinians hijack three airliners and force them to fly to the Middle East, C-130s and F-4Cs are deployed at Incirlik Air Base, Turkey, to mount a possible rescue attempt; the operation is called off once all passengers are released.

September 10

MARINES: At Camp Pendleton, California, the Marine Corps Tactical System Support Activity commences to evaluate all tactical systems and related equipment within the Marine Corps.

September 11

NAVAL: In the eastern Mediterranean, the Sixth Fleet goes on alert for a potential evacuation of passengers from an airliner that was hijacked to Jordan.

September 13

MILITARY: In Washington, D.C., President Richard M. Nixon orders 800 military personnel from all four branches to provide security for international passenger flights originating in the United States. The code name is Operation Grid Square.

September 15

MARINES: A recruiting station in the Bronx, New York, is damaged by a bomb allegedly set off by the radical Weather Underground group.

September 17

NAVAL: In the latest cost-cutting measure, the navy declares that an additional 38 vessels are slated for deactivation, including the carrier *Shangri-La*. Since January 1969, 286 older vessels have been mothballed.

September 17–October 28

AVIATION: Operation Fig Hill commences as transports from the Military Airlift Command (MAC) and the U.S. Air Force Europe (USAFE) begin flying in relief supplies and heavy equipment to Jordan in the wake of escalating violence with Palestinian refugees.

September 18–21

AVIATION: A force of 76 marine helicopters transport 14 artillery pieces belonging to the 11th Marines to a remote mountain top outside Da Nang to create Fire Base Dagger. However, Operation Catawba Falls is intended as a ruse to convince Communist units that a ground assault is pending.

MARINES: At Da Nang, while Operation Catawba Falls unfolds, marine units redeploy without enemy interference. The enemy are apparently taken in by the ruse.

September 19

MARINES: In the eastern Mediterranean, once Jordanian forces begin removing armed Palestinians from their territory, the 8th Marine Amphibious Brigade is dispatched to the Sixth Fleet as reinforcements. There it joins the 2nd Battalion, 2nd Marines as a possible landing force, if needed.

September 21

MARINES: In the I Corps tactical zone, South Vietnam, the Marine Combined Action Force headquarters is deactivated. Only the 600 men of the 2nd Combined Action Group remain active in Quang Nam Province.

September 28–November 31

AVIATION: The Air Force commences Operation Fig Hill to assist the Kingdom of Jordan with casualties incurred during bloody battles with Palestinian radicals.

Over 200 army and air force medical personnel are flown in, who perform 1,200 medical procedures before returning to bases in western Europe. Air Force transports also deliver 186 tons of medicine, equipment, and other relief supplies.

October 1

MARINES: The number of marines serving in South Vietnam is only 29,600.

October 2

AVIATION: At Hurlburt Field, Florida, Bell deploys its twin-engine UH-1N Twin Huey helicopter for trial runs with the Special Operations Center. Ultimately, 79 of these rugged machines are acquired for air force use.

October 7

MILITARY: In Washington, D.C., a special House Armed Services Subcommittee is informed by the Department of the Navy that over 7,000 sailors and marines will be dishonorably discharged for drug violations this year.

MARINES: The fire base at Chu Lai, South Vietnam, is turned over to army units.

October 15

MARINES: The former marine base at Ah Hoa, South Vietnam, is turned over to ARVN units.

October 15–30

MARINES: In the Philippines, U.S. and Philippine marines execute a training exercise called Fortress Light.

October 21

AVIATION: At Edwards Air Force Base, California, the X-24A lifting body performs its first supersonic speed flight for the Flight Test Center.

- In the wake of Typhoon Joan, helicopters of HMM-64 arrive in the Philippines to conduct relief-and-rescue operations.

October 29

NAVAL: In Washington, D.C., Secretary of the Navy John H. Chaffee announces that, as of July 1971, the navy will consist of less than 700 vessels. At that time, no less than 234 will have been either deactivated or decommissioned, but he considers greater reductions as dangerous to national security.

October 30

MARINES: In a cost-cutting measure, the Marine Corps disbands the 4th Armored Artillery Company, the only remaining formation of its kind, which had been in service since 1952.

November 1

MEDICAL: At Wurtsmith Air Force Base, Michigan, air force physicians begin treating Chippewa tribesmen as part of the Domestic Action Program.

- A host of bare-base mobility equipment is tested at North Field, South Carolina, by the 336th Tactical Fighter Squadron. Among the items scrutinized are expendable shelters, hangars, control towers, and water systems.

November 13

MEDICAL: Air force medical technicians begin receiving specialized clinical training to allow them to perform many tasks, such as suturing wounds, and applying or removing casts, previously performed by doctors.

November 17–December 16

AVIATION: At Dacca, East Pakistan, C-141 Starlifters from the Military Airlift Command (MAC) begin conveying supplies and equipment to help victims of recent tidal waves along the coast. The transports fly in 140 tons of relief supplies, sometimes from as far away as 10,000 miles.

November 18

AVIATION: Near Da Nang, South Vietnam, a CH-46 Skyknight helicopter slams into a mountainside, killing 15 marines.

November 19

MARINES: At Quantico, Virginia, the Marine Corps announces that it is resuming annual rifle squad competition commencing next fall. The practice was stopped in 1965 due to Vietnam War commitments.

November 20

AVIATION: On the 30th anniversary of the Air Force Southern Command, transports and personnel are dispatched to Colombia to assist the victims of heavy flooding.

November 21

AVIATION: U.S. Air Force brigadier general Leroy J. Manor leads several CH-53 helicopters in a daring commando raid on the Son Tay prison camp, 23 miles west of Hanoi, North Vietnam.

- During the commando raid at Son Tay prison camp, North Vietnam, F-105 Thunderchiefs drop bombs as a diversion for the attack while direct support is provided by five A-1 Skyraiders. The commandos are also escorted to and from the area by a Lockheed C-130E Combat Talon aircraft.

- Carrier aircraft from the *Hancock*, *Oriskany*, and *Ranger* assist air force jets in attacking missile and antiaircraft artillery sites below the 19th parallel. This move is undertaken in response to recent attacks upon American reconnaissance planes.

MILITARY: Helicopter-borne Special Forces under Colonel Arthur “Bull” Simons mount Operation Kingpin, a daring helicopter-borne raid against Son Tay prison camp, 23 miles west of Hanoi. The raiders kill 25 North Vietnamese without loss and storm the camp, only to find it abandoned. The commandos return home empty-handed. The assault was covered by a seven-hour bombing raid against Hanoi to remind the Communists of America’s military presence.

MARINES: In the Mediterranean, the Seventh Fleet’s Landing Force Alpha is renamed the 31st Marine Amphibious Unit (MAU). This designation now refers to any unit built up around a landing battalion and a helicopter squadron.

December 1

MILITARY: The Atomic Energy Commission reports that 24 underground nuclear tests have been conducted in the course of the year at Nevada test sites.

December 5

AVIATION: At Hill Air Force Base, Utah, the 945th Military Airlift Group, Air Force Reserve, supports the Domestic Action Program by delivering 40,000 pounds of food and clothing to Navajo Indians across four western states.

December 15

NAVAL: The United States announces that it is constructing a \$10 million naval facility on the island of Diego Garcia, Indian Ocean. This is presently a British possession and close enough to the Persian Gulf to allow a strategic presence there.

December 16

AVIATION: At Pease Air Force Base, New Hampshire, the first FB-111 strategic bombers are delivered to the 509th Bombardment Wing.

December 21

AVIATION: The new Grumman F-14 Tomcat air superiority fighter flies the first time; it becomes the standard navy interceptor over the next three decades.

MILITARY: The Nixon administration announces a speedy phase out of defoliation operations in Southeast Asia.

December 22

MILITARY: Congress places restrictions on the presence of U.S. forces or advisers in either Laos or Cambodia.

December 24

MARINES: In I Corps tactical zone, South Vietnam, Lieutenant General Donn J. Robertson is appointed the new commander of the III Marine Amphibious Force.

December 31

MARINES: Marine Corps personnel levels have dipped to 231,667 of which 25,394 are still in Vietnam. Losses for the year are 535 killed and 4,278 wounded.

- In the I Corps tactical zone, the 1st Marine Division conducts Operation Imperial Lake, which results in the death of 196 Communist troops at a cost of 22 dead and 158 wounded.

1971

January

MILITARY: Army manpower levels in South Vietnam continue to decrease to 250,700, although the force is further smitten by poor morale, drug use, and mounting insubordination. U.S. Army Chief of Staff general William C. Westmoreland also commissions the Board for Dynamic Training under Colonel Paul F. Gorman, to find ways of enhancing combat arms training.

January 1

MILITARY: Operation Keystone Robbin removes the 1st and 2nd Brigades of the 1st Cavalry Division from South Vietnam, along with the 11th Armored Cavalry Regiment, and the 2nd Brigade, 25th Infantry Division.

January 4

MARINES: In Washington, D.C., Commandant Chapman declares that the Marines Corps is going to adhere more closely than ever to traditions of strict discipline and good conduct. Nor will it relax its appearance standards.

January 6

AVIATION: The first group of AV-8A Harrier jump jets is delivered to Marine Corps units. This revolutionary British design is capable of vertical takeoffs and landings (VTOL) through use of adjustable nozzles on the wingtips and fuselage.

MILITARY: In Washington, D.C., Secretary of War Melvin Laird declares that the process of Vietnamization is advancing ahead of schedule and that all combat missions for U.S. troops will end by midsummer.

January 6–26

MARINES: The 31st Marine Amphibious Unit deploys in the Gulf of Thailand after Malaysia is battered by over 100 inches of rainfall and experiences severe flooding. They remain on station, if needed, over the next three weeks.

January 8

AVIATION: At Minot Air Force Base, North Dakota, the final deployment of Minuteman missiles renders the tactical squadron in charge of them operational. At this juncture, a squadron consists of 50 unmanned silo launchers connected to five manned launch-control centers.

January 11–March 29

MARINES: Around Da Nang, South Vietnam, the 1st Battalion, 1st Marines and various reconnaissance units scour the countryside looking for North Vietnamese rocket units who have been attacking the airfield lately. Little contact with the enemy results.

January 13

MARINES: In South Vietnam, the sixth round of troop removals includes 12,988 marines, including headquarter units of the 1st Marine Division and 1st Marine Aviation Wing (1st MAW), the 5th Marines, parts of the 11th Marines, and several squadrons.

January 14

MILITARY: In Washington, D.C., President Richard M. Nixon signs a congressional bill repealing the 1964 Tonkin Gulf Resolution.

January 19

MARINES: South of Hoi An, South Vietnam, Company G, 2nd Battalion, 5th Marines, repels an attack on its outpost, killing 12 enemy soldiers.

January 20

NAVAL: The Navy Department announces that the number of new helicopter assault ships (LHA) is being reduced from nine to five.

January 20–21

AVIATION: The Department of Defense candidly admits that marine helicopters on the *Iwo Jima* and *Cleveland* have been supporting South Vietnamese forces in Cambodia.

MARINES: During Operation Upsher Stream, Company B, 1st Battalion, 1st Marines suffers 11 casualties to booby traps. Subsequently, a CH-46 Skyknight helicopter attempting to medivac the wounded is shot down and crashes, killing four marines and wounding 16.

January 22–February 8

AVIATION: Commander Donald H. Lilienthal pilots a Lockheed P-3 Orion a record 15,963 miles from Naval Air Station Atsugi, Japan, to Naval Air Station Patuxent River, Maryland.

January 28

AVIATION: In South Vietnam, UC-123B sprayer aircraft conduct their final Operation Ranch Hand defoliation mission.

MILITARY: In Washington, D.C., President Richard M. Nixon seeks a two-year extension of the draft while also pushing a 50 percent pay raise for new recruits. He aspires to have an all-volunteer force in place by the middle of the decade.

January 30–February 7

MILITARY: In the I Corps, Operation Lam Son 719/Dewey Canyon II unfolds as the 1st Brigade, 5th infantry Division moves west along Route 9 toward the old Marine Corps base at Khe Sanh, while the 101st Airborne Division prepares to move back into the A Shau Valley. Both moves are actually a strategic distraction from the impending South Vietnamese thrust into Laos.

January 31–February 9

AVIATION: Captain Alan B. Shepard is the seventh man to walk on the moon's surface, a decade after his initial suborbital flight in a Mercury space capsule. He is also the first astronaut to hit a golf ball 400 yards while using an improvised club.

February 2

NAVAL: The Sixth Fleet departs Izmir, Turkey, after a round of anti-American demonstrations erupt.

February 3

MARINES: In light of upcoming budget cuts, the Marine Corps convenes a board to select those lieutenant colonels, majors, and captains to be released from active duty.

February 8–March 6

AVIATION: Operation Lam Son 719 in Laos receives active support from marine helicopters of HMH-463 and HML-367, along with several marine aviation air strikes. A CH-53 helicopter is shot down during 2,992 sorties.

MILITARY: Operation Lam Son 719 continues as a force of 16,000 South Vietnamese troops, backed by heavy American air power, moves along Route 9 and attacks Communist sanctuaries in neighboring Laos. Lieutenant General James W. Sutherland directs the movements of XXIV Corps, which operates 700 helicopters supporting ARVN units. However, the thrust eventually bogs down as the North Vietnamese rush additional troops into the region.

February 11

DIPLOMACY: The United States and the Soviet Union conclude a treaty prohibiting the deployment of nuclear weapons on the ocean floor.

NAVAL: In Washington, D.C., Chief of National Operations admiral Elmo Zumwalt ends the traditional practice of hiring Filipinos to serve as mess stewards.

February 12–March 6

MARINES: Off North Vietnam, the 31st Marine Amphibious Unit is stationed 50 miles east of the coast to provide a diversion while Operation Lam Son 719 unfolds in Laos.

February 16

MARINES: At Quantico, Virginia, the Staff NCO Academy officially opens.

February 18

AVIATION: Northeast of Phu Bai, a CH-53D Sea Stallion explodes in flight, killing all seven marines onboard.

- Marine Corps MHL-367 receives its first four Bell AH-1J Sea Cobras for testing under combat conditions.

February 21–25

AVIATION: After six states in the Midwest are hit by snowstorms and tornadoes, aircraft of the Air National Guard provide disaster relief missions to the afflicted areas.

February 27

AVIATION: Air force transports begin Operation Haylift to assist farmers in snow-bound Kansas in feeding their stranded cattle. They air drop 35,000 bales of hay to feed a quarter of a million head of cattle.

- In Laos, three A-4 Skyhawks of VMF-311 knock out three Soviet-made PT-76 tanks that were attacking a South Vietnamese outpost.

March

AVIATION: Marine Corps aircraft and helicopters fly 20,435 sorties this month, including 160 over North Vietnam.

March 1

MILITARY: The 5th Special Forces Group departs South Vietnam, although some personnel remain behind as instructors with the Special Advisory Group.

March 2

AVIATION: The air force begins a policy of allowing female personnel who become pregnant the option of remaining on duty or being temporarily discharged for 12 months, then resuming active service.

March 4–April 6

MILITARY: In Laos, South Vietnamese forces capture an enemy command center at Tchepone, then declare victory and commence a hurried withdrawal. North Vietnamese units harry them every step of the way and many have to be evacuated by air. By the time the incursion ends, 108 helicopters have been downed with a further 618 damaged. The Americans lose 215 dead from a total casualty list of 1,402 casualties.

March 5

MILITARY: In light of recent tensions, Secretary of Defense Melvin Laird announces that all recruits entering military service receive classes in race relations.

NAVAL: In Washington, D.C., Chief of Naval Operations admiral Elmo R. Zumwalt champions creation of new offices for the deputy chief of naval operations for air warfare, surface, and submarines.

March 10

AVIATION: Southwest of Kadena Air Base, Okinawa, air force helicopters rescue 10 Japanese fishermen who have been shipwrecked on a coral reef.

March 15

MILITARY: At Bien Hoa, South Vietnam, two lieutenants are killed after an African-American soldier rolls a grenade into an officers' barracks. Racial altercations and attacks against officers ("fraggings") are on the rise, which results in 86 deaths and 788 injuries during the war.

March 16

AVIATION: The Kaman SH-2D Seasprite Light Airborne Multipurpose System helicopter flies for the first time. This craft, fitted with advanced sensors and processors that are linked by computer to surface vessels, greatly extends the range through which surfaced or submerged targets can be detected and destroyed.

March 17

AVIATION: At Auburn University, Alabama, Jane Leslie Holley becomes the first woman tended a second lieutenant's commission through the U.S. Air Force ROTC program.

March 18

AVIATION: Captain Marcelite C. Jordon is the first female officer to successfully graduate from the Aircraft Maintenance Officer School.

NAVAL: In Washington, D.C., Secretary of the Navy John H. Chaffee testifies before a Senate committee and candidly admits that there exists a pervasive drug problem along with growing racial tensions in the U.S. Navy and Marine Corps.

March 28

MILITARY: In Quang Tin Province, South Vietnam, Firebase Mary Ann is attacked by Viet Cong sappers in the early morning hours. The 231 defenders from Company C, 1st Battalion, 46th Infantry, backed by some artillery, are caught off guard and their defense is poorly mounted. By the time the Communists withdraw, 30 Americans are killed and 82 injured. Consequently, American Division commander Major General James L. Baldwin and 196th Brigade commander Colonel William S. Hathaway are relieved of duty.

March 29

MILITARY: At Fort Benning, Georgia, a military court finds Lieutenant William Calley guilty of murdering 22 Vietnamese at My Lai; he is sentenced to life imprisonment at hard labor, but the term is reduced to 10 years before he is pardoned in November 1974 by Secretary of the Army Howard Callaway.

March 30

MARINES: Having raised \$4.7 million to assist the South Vietnamese people, the Marine Corps Reserve Civic Action Fund closes.

March 31

NAVAL: At Charleston, South Carolina, the fleet ballistic missile submarine *James Madison* departs on its first deterrence patrol armed with Poseidon C-3 missiles. Moreover, the navy establishes an office to develop the newer, more capable Undersea Long-Range Missile System, or Trident.

April 1

AVIATION: At Naval Air Station Norfolk, Virginia, the Helicopter Mine Countermeasures Squadron 12 (HM-12) is established, being the first units of its kind in naval aviation.

April 7

AVIATION: At Kelly Air Force Base, Texas, Lieutenant Susanne M. Ocobock is the first female air force civil engineer.

- The marines receive their first twin-engine UH-1N Huey helicopter for evaluation.

MILITARY: In Washington, D.C., President Richard M. Nixon declares that a further 100,000 troops will be withdrawn from Southeast Asia over the course of the year.

April 8

MILITARY: Operation Lam Son 719 is formally concluded. The performance of South Vietnamese troops in Laos was adequate at first, but discipline fell apart during the chaotic withdrawal and much valuable equipment was abandoned.

April 11

AVIATION: In Washington, D.C., *Apollo II* astronaut Michael Collins is appointed the first director of the National Air and Space Museum, Smithsonian Institution.

April 12

NAVAL: Off the southernmost coast of South Vietnam, U.S. Navy and South Vietnamese gunboats intercept and sink a 160-foot North Vietnamese trawler attempting to pass through their surveillance line.

April 13

MILITARY: In Washington, D.C., Secretary of Defense Melvin Laird reiterates that combat roles for the U.S. Army and Marine Corps will end by summer, but that navy and air force units would remain on station until further notice.

The SR-71 Blackbird aircraft (National Archives)

April 14

MARINES: At Camp Pendleton, California, the 5th Marine Amphibious Brigade disbands while the 1st Marine Division assumes control of all ground forces stationed there.

- The 3rd Marine Amphibious Brigade is activated at Da Nang, South Vietnam, once III Marine Amphibious Force is relocated to Okinawa. Its purpose is to service marines still operating in South Vietnam and consists of the 1st Marines, the 1st Battalion, 11th Marines, and Marine Air Groups 11 and 16.

April 16

AVIATION: At Beaufort, South Carolina, the first three AV-8A Harrier jump jets are assigned to VMA-513, which becomes the first Harrier squadron in the service.

April 23

MARINES: A large detachment heads to sea from Camp Lejeune, North Carolina, in a show of force to squelch any Cuban ambitions on the island of Haiti following the death of dictator François Duvalier.

April 26

AVIATION: An SR-71 Blackbird piloted by Lieutenant Colonel Thomas B. Estes and Lieutenant Colonel Dewain C. Vick, 9th Strategic Reconnaissance Wing, completes a world speed record by traveling 15,000 miles in 10 hours and 30 minutes nonstop. They receive the Mackay Trophy for their achievement.

April 28

NAVAL: Captain Samuel L. Gravely, Jr., becomes the first African-American rear admiral in navy history thanks to Chief of Naval Operations Elmo R. Zumwalt. Gravely is one of 49 officers elevated to that rank this year.

April 30

MILITARY: As most American combat units have been withdrawn, I and II Field Forces are replaced by the Second and Third Regional Assistance Commands (SRAC, TRAC) while the Mekong Delta receives the new Delta Regional Assistance Command (DRAC). All are staffed by U.S. advisers.

May 1

MEDICAL: The hospital ship *Sanctuary* leaves South Vietnam after four years of continuous service.

May 1–7

MARINES: Detachments from Quantico, Virginia, Marine Barracks 8th and I, and Camp Lejeune, North Carolina, are deployed near Washington, D.C., to counter any violence arising from antiwar demonstrations.

May 1–November 30

MILITARY: Keystone Oriole unfolds with the Americal Division, the 173rd Airborne Brigade, and other units totaling 71,000 men departing South Vietnam.

May 7

MARINES: In South Vietnam, the 3rd Marine Amphibious Brigade ceases all ground and fixed wing combat operations prior to shipping back to the United States.

May 11

MARINES: In South Vietnam, the 2nd Combined Action group disbands, bringing an end to the CAP program.

June 14

AVIATION: The super secret KH-9 Big Bird spy satellite is launched into orbit.

June 16

AVIATION: The onset of civil war in East Pakistan (now Bangladesh), results in Operation Bonny Jack to airlift 23,000 refugees from Tripura to Gauhati, India. Other transports bring in 2,000 tons of food and medicine to assist the refugees, along with over 1 million doses of anticholera vaccine.

June 26

AVIATION: At Phan Rang Air Base, South Vietnam, the 35th Tactical Fighter Wing phases out its F-100 Super Sabres from front-line operational duties.

June 27

MARINES: In South Vietnam, the 3rd Marine Amphibious Brigade is deactivated and shipped back to the United States. Only 547 marines remain behind in advisory capacities.

June 30

MARINES: At this stage of the war, Marine Corps personnel levels stand at 21,765 officers and 190,604 enlisted men.

July 1

AVIATION: Historic Selfridge Air Force Base, Michigan, is the first such facility turned over to the Air National Guard by the Aerospace Defense Command.

MILITARY: In Washington, D.C., Robert F. Froehlke becomes the tenth secretary of the army; during his tenure he oversees the final departure of American troops from Vietnam and implements the new all-volunteer army plan.

July 9

NAVAL: In Washington, D.C., Secretary of the Navy John H. Chaffee exempts sailors and marines who voluntarily disclose illegal drug use from disciplinary action and dishonorable discharge.

July 9–10

MARINES: In Arizona, the Navaho Code Talkers of World War II fame hold their first reunion.

July 11–22

AVIATION: Over southeastern Texas, seven UC-123K Providers and eight C-47 Skyraiders commence Operation Combat Vee by spraying insecticide over mosquito breeding grounds to halt an onset of Equine Encephalomyelitis. This actions proceeds under the direction of the Department of Agriculture and 2.5 million acres are covered.

July 12

AVIATION: In Washington, D.C., President Richard M. Nixon appoints former air force general Benjamin O. Davis to serve as assistant secretary of transportation. Davis is also the first African American who is an air force major general.

July 16

AVIATION: In Washington, D.C., Colonel Jeanne M. Holm, director of Women of the Air Force (WAF), becomes the first female general officer in the air force by being promoted to brigadier general.

July 20

MARINES: A report in the newspaper *Cleveland Plain Dealer* claims that the Marine Corps has the highest rates of desertion in the U.S. military, 59.6 men per 1,000.

July 23

AVIATION: The Department of Defense signs a \$70 million contract with the Hughes Aircraft Company to construct 2,000 AGM-65A Maverick, television-guided air-to-surface missiles. These weapons are destined for use on F-4E Phantom II and A-7 Corsair II aircraft.

July 26–August 7

AVIATION: At Cape Kennedy, Florida, the *Apollo 15* mission is launched into lunar orbit with an all-air force flight crew. They carry the unique Lunar Roving Vehicle (LRV) to enhance exploration of the moon's surface. Their lunar jaunts in this vehicle are televised in color for millions of viewers back on Earth.

July 29

AVIATION: The National Aeronautics and Space Administration (NASA) terminates the X-24A lifting body program after it has yielded tremendous amounts of data, which will be applied to the forthcoming space shuttle program.

August 1

AVIATION: In Saigon, South Vietnam, General John D. Lavelle assumes command of the Seventh Air Force.

August 6

MARINES: To help ease racial tensions in the Marine Corps, the Advisory Committee for Minority Affairs holds its first meeting.

August 7

MILITARY: In Quang Tri Province, a small reconnaissance team led by Lieutenant Loren D. Hagen is pinned down by North Vietnamese forces. The Americans fight back fiercely, but, when several are wounded, Hagen crawls on the ground to rescue them. He is killed during the process, winning the final Medal of Honor from this war.

August 7–12

MARINES: At the Interservice Rifle Team Match, marines win 12 of 13 contests as well as the 1,000-yard team match at the 10th Annual Interservice Rifle Championships.

August 11

MARINES: In Washington, D.C., Secretary of the Navy John H. Chaffee instructs base commanders to inform local government leaders that any violations of fair housing practices would factor largely in future base closings.

August 13

AVIATION: The Marine Corps Night Observation Gunship System, consisting of a pair of specially rigged OV-10 Broncos, finishes the last of 207 missions to test a 20mm cannon with an infrared target acquisition system.

August 19

NAVAL: Off South Vietnam, ships of the Seventh Fleet shell Communist rocket and mortar positions below the Demilitarized Zone (DMZ).

August 26

NAVY: Alan B. Shepard, a naval officer and America's first man into suborbital space, is promoted to rear admiral.

MARINES: The first LVTP-7 assault amphibian vehicle is delivered; it is capable of hauling 25 fully armed troops ashore and is partly propelled by a water-jet drive pushing it through the surf at 8.4 miles per hour.

August 28

MARINES: In San Diego, the Marine Recruiting Depot and the Naval Training Center declare that all new recruits will be subject to testing for drug use.

September 10

AVIATION: At Tan Son Nhut Air Base, South Vietnam, the 17th Special Operations Squadron flies its last mission before turning the last of its AC-119G Shadow gunships over to the South Vietnamese air force.

September 12–16

AVIATION: In the wake of Hurricane Edith, air force transports convey humanitarian and relief supplies to thousands of victims in Nicaragua. A radio jeep also arrives to coordinate the activities of rescue helicopters that arrive subsequently.

September 14

AVIATION: At McClellan Air Force Base, California, a flight of 15 C-7 Caribou aircraft arrive after completing an 8,000-mile return flight from Cam Rahn Bay, South Vietnam. This Canadian-built aircraft proved invaluable by flying food, ammunition, and other supplies to troops from primitive airstrips.

September 19

MARINES: At Parris Island, South Carolina, two recruits die during unrelated training exercises.

September 21

AVIATION: Over Dong Hoi, North Vietnam, a strike force of 200 tactical fighters employing Loran (long-range aid to navigation), conducts the first all-instrument air strike of the war by hitting and destroying oil and fuel storage areas. An estimated 350,000 gallons of fuel are destroyed.

September 22

MARINES: To smooth out interpersonal relations among members, the Marine Corps Human Relations Instructors School is created. Hereafter, all marines will receive human relations training.

September 25–29

AVIATION: On Okinawa, aircraft of the 1st Marine Aviation Wing (1st MAW) rush medicine and supplies to the southern Ryukyu Islands in the wake of Typhoon Bess.

October 1

AVIATION: Richard D. Kisling is appointed the new chief master sergeant of the air force.

NAVAL: At San Diego, California, the carrier *Constellation* departs to begin a sixth tour on Yankee Station in the Gulf of Tonkin.

October 9–22

MARINES: In Turkey, NATO Exercise Deep Furrow commences as marines from the United States join forces from Great Britain and Italy in a series of amphibious landings.

October 11

MARINES: At Hampton, Virginia, Lieutenant General Lewis B. “Chesty” Puller dies, still very much a Marine Corps icon.

October 28

AVIATION: In Washington, D.C., Michael Collins, director of the National Air and Space Museum, announces that spending for the new museum has been slashed from \$70 million to \$40 million owing to Vietnam War expenditures.

November 3

AVIATION: Jets of VMA-214 qualify on the carrier *Hancock*; this is the first time that a marine squadron has operated on a flattop since the start of the Vietnam War.

November 7–8

AVIATION: The MiG airfields at Dong Hoi, Vinh, and Quan Lang, North Vietnam, are struck by air force fighter bombers.

November 12

MILITARY: In Washington, D.C., President Richard M. Nixon declares that another 45,000 combat troops will be withdrawn from Vietnam by February 1, 1972, continuing his policy of Vietnamization. Accordingly, combat-related deaths for the year total 1,302 as opposed to 14,592 for the same period in 1968.

December 1

MILITARY: Operation Keystone Mallard unfolds as the 101st Airborne Division, the famed “Screaming Eagles,” withdraws from Vietnam and redeploys back to Fort Campbell, Kentucky. They spent a total of 1,573 days in the field.

December 10

NAVY: The onset of war between Pakistan and India results in a task force formed around the carrier *Enterprise* being dispatched to the Bay of Bengal to evacuate citizens and foreigners, if necessary.

MARINES: Units of the Seventh Fleet, including the 31st Marine Amphibious Unit, are dispatched from Vietnam to the Indian Ocean in response to a war between India and Pakistan. They remain in the area through July 1972 in the event American civilians will have to be evacuated.

**Howard, Robert L. (1939–2009)***Army officer*

Robert L. Howard was born in Opelika, Alabama, on July 11, 1939, and he enlisted in the U.S. Army in July 1956. An excellent soldier, Howard served as a paratrooper, rose steadily to sergeant, and he also received an associate's degree in business from the University of Maryland in 1962. By this time that the United States was becoming increasingly embroiled in the Vietnam conflict and Howard transferred from the 82nd Airborne Division to the 3rd Special Force Group, the elite Green Berets. Howard performed five tours of duty with the top-secret Military Assistance Command Vietnam Studies and Observations Group (MAC-SOG), which was heavily engaged in clandestine reconnaissance missions in North Vietnam, Laos, and Cambodia. He formed part of an understrength, 60-man reconnaissance company based at Kontum, which, with five Medal of Honor recipients, was the army's most highly decorated unit of the Vietnam War. For his part, Howard was wounded 14 times over a 54-month period, and he received eight Purple Hearts. He was also nominated three times for the Medal of Honor in three separate actions over a 13-month period. The first two nominations were downgraded to two Distinguished Service Crosses owing to the classified nature of his missions. It was after the third time, while serving on a top-secret mission to rescue a fellow soldier in Cambodia, that he finally received the coveted award.

On December 30, 1968, Howard's platoon was helicoptered in deep behind

enemy lines and was almost immediately attacked by two companies of North Vietnamese. He was wounded in the first attack, yet he rushed forward under heavy fire to rescue his superior officer. Howard then rallied the survivors into a coherent defensive perimeter and withstood repeated enemy attacks for three-and-a-half hours until helicopters could be called in. Ignoring his own grievous wounds, Howard was literally the last man to be evacuated and spent several months in the hospital recuperating. In addition to the Medal of Honor, which was presented to him in 1971 by President Richard Nixon, he was also commissioned from master sergeant to first lieutenant. He also received the Distinguished Service Cross, the nation's second highest honor, and a Silver Star, the nation's third highest award. After the war, Howard returned to Fort Benning, Georgia, to serve as an airborne instructor at the Infantry School and he also served several years as a company commander in the 2nd Battalion, 75th Rangers. On September 29, 1992, he retired from active duty as a colonel, concluding a distinguished 36 years of service, of which 33 were spent on airborne status. Howard died on December 23, 2009, in Waco, Texas, the most heavily decorated soldier of the Vietnam War whose medal count exceeds that of World War II's famous soldier, Audie Murphy. Unlike Murphy, Howard was never touted as a national hero and his deeds are little known outside military circles.

December 14

AVIATION: Jets of Marine Corps VMA(AW)-224 deploy on the carrier *Coral Sea* for possible action over North Vietnam.

December 20

AVIATION: A helicopter launched from the assault ship *Tripoli* crashes into the Bay of Bengal off Libya; four marines are killed.

December 21

MARINES: The Civilian Pilot Training Program begins to attract more qualified candidates into marine aviation units for the Platoon Leader Class commissioning program.

December 26–30

AVIATION: American warplanes engage in their heaviest-ever bombardment of North Vietnam once air offensives resume.

DIPLOMACY: To push North Vietnam back to the negotiating table in Paris, France, President Richard M. Nixon orders a resumption of full-scale bombing in North Vietnam below the 20th parallel. These are the largest aerial attacks mounted since 1968, totaling more than 1,000 sorties.

MILITARY: As of this date, there are 156,800 Americans in South Vietnam.

December 31

NAVAL: Another bit of navy tradition falls by the wayside after the rope works at the Boston Naval Shipyard, Massachusetts, closes. This unit has provided the navy with all its rope since the administration of President Andrew Jackson. Henceforth, rope supplies will be handled by private companies.

MARINES: In Washington, D.C., General Robert E. Cushman gains appointment as the 25th commandant of the Marine Corps to replace General Chapman, who is recently deceased.

- In South Vietnam, marine casualties for the year total 41 dead and 476 wounded. There are presently only 175,000 American servicemen in all of South-east Asia.

1972

January

MILITARY: Army troop strength is down to 109,000 men, all volunteer advisers. Despite the continuing drawdown, General Creighton W. Abrams sees mounting evidence of a massive Communist offensive in the offing.

January 1

MARINES: Headquarters Marine Corps raises reenlistment standards to include a high school diploma or equivalent.

January 5

AVIATION: In Washington, D.C., President Richard M. Nixon declares that \$5.5 billion will be appropriated for the new space shuttle program.

January 5–February 28

AVIATION: Near Tucson, Arizona, Marine Air Control Unit 7 is directed to operate a radar site to support the Bureau of Customs' Operation Grasscatcher, a concerted attempt to curtail illegal air traffic crossings from Mexico.

January 12

AVIATION: At Beaufort, South Carolina, VMA-542 is reactivated and fully equipped with AV-8A Harrier jump jets.

January 13

MILITARY: In Washington, D.C., President Richard M. Nixon announces the withdrawal of an additional 70,000 American combat troops by the end of the year, which will reduce overall remaining troop strength to 69,000.

January 14

MARINES: In Washington, D.C., the Department of Defense releases manpower cuts that will drop overall military manpower to its lowest levels since 1951. For the marines, this entails a decline to 193,000 men and women.

January 17–27

MARINES: At Reid State Park, Maine, Operation Snowy Beach unfolds as elements of the 2nd Marine Division and the 2nd Marine Air Wing (2nd MAW) stage cold-weather landings in conjunction with the Atlantic Fleet.

January 19

AVIATION: Over North Vietnam, an F-4 from the carrier *Constellation* shoots down a MIG-21 in the navy's first aerial victory since March 1970.

January 21

AVIATION: The prototype of the Lockheed S-3 Viking, the navy's first jet-propelled antisubmarine aircraft, makes its maiden flight.

January 31

AVIATION: At Palmdale, California, the last production T-38 Talon jet trainer is accepted by the Air Training Command.

February 8

AVIATION: In Washington, D.C., the Joint Chiefs of Staff (JCS) authorizes up to 1,200 B-52 sorties per month over Southeast Asia.

- AV-8A Harriers of VMA-513 undergo operational evaluation onboard the helicopter assault ship *Guam*.

February 17

AVIATION: At Andrews Air Force Base, Maryland, President Richard M. Nixon boards a Boeing VC-137 (a highly modified 707) belonging to the 89th Military Airlift Wing, and departs for Beijing, China. Nixon is about to make history as the first chief executive to visit China, where he negotiates with Mao Zedong and Chou En-lai. This is the first official contact between national leaders since 1949.

February 20

AVIATION: An air force HC-130H, flying nonstop from Taiwan to Illinois, sets a new world record for unrefueled turboprop flight.

March 10

MILITARY: Final elements of the 101st Airborne Division are the last remaining army combat troops to leave South Vietnam.

March 19

MILITARY: In South Vietnam, responsibility for the five northernmost provinces falls to Major General Frederick J. Kroesen, Jr., head of the newly created First Regional Assistance Command (FRAC).

March 23

DIPLOMACY: In Paris, France, the United States suspends peace talks in the face of Communist intransigence.

March 28

AVIATION: Over North Vietnam, two F-4 Phantom IIs from the carrier *Coral Sea* share credit for downing a MiG-17.

March 30

AVIATION: After North Vietnamese troops attack across the Demilitarized Zone (DMZ) and penetrate deeply into South Vietnam, President Richard M. Nixon orders a full-scale resumption of bombing in North Vietnam. Consequently, the Joint Chiefs of Staff authorizes up to 1,800 B-52 sorties per month throughout Southeast Asia.

MILITARY: The North Vietnamese Army launches its “Easter Offensive,” the largest conventional attack of the war by attacking Quang Tri near the Demilitarized Zone (DMZ), Kontum in the Central Highlands, and An Loc north of Saigon. They employ the services of no less than 14 divisions and 26 separate regiments totaling 140,000 men, backed by ample heavy artillery and 1,200 tanks and armored vehicles. The only U.S. troops involved are advisers posted with combat units and air cavalry gunships.

March 30–May 1

MILITARY: North Vietnamese forces pour across the Demilitarized Zone (DMZ) into Quang Tri Province and besiege the capital at Quang Tri. The South Vietnamese 3rd Division is all but destroyed and Team 155 under Colonel Donald J. Metcalf, the largest advisory team of the war, is evacuated by helicopter. This becomes the first provincial capital to fall to the Communists since Hue in 1968.

April 1

AVIATION: In light of the Communist Easter Offensive, the Military Air Command (MAC) commences Operation Constant Guard, which transports the entire 49th Tactical Fighter wing—3,195 airmen and 1,600 tons of cargo—from Holloman Air Force Base, New Mexico, to Takhil, Thailand, in only nine days.

- The navy withdraws Attack Squadron Light 4 (VAL-4) from operations in-country, a day after the North Vietnamese commence their Easter Offensive.
- At Randolph Air Force Base, Texas, the Air Training Command establishes the Community College of the Air Force.

MARINES: Off South Vietnam, the 31st Marine Amphibious Group and the 1st Battalion, 9th Marines are positioned to evacuate American military advisers and civilians if the need arises.

April 2

MARINES: Outside Dong Ha, South Vietnam, a North Vietnamese tank thrust down Route 1 stalls after Captain John W. Ripley, a Marine adviser, blows up a bridge over the Cua Viet River.

April 5–May 12

MILITARY: In Binh Long Province, South Vietnam, the city of An Loc is mobbed by thousands of North Vietnamese regulars, backed by Soviet-made PT-76 and T-45 tanks. To rescue the single South Vietnamese division present, Major General James F. Hollingsworth orders in major air strikes and sweeps by AH-1G Cobra helicopter gunships. The Communists are decimated by American air power and forced back into the jungle.

April 6

AVIATION: Over North Vietnam, aerial bombing north of the Demilitarized Zone (DMZ) resumes for the first time since October 1968. For navy carriers, this entails launching an average of 191 combat sorties per day over the ensuing week.

- At Da Nang, South Vietnam, reinforcements arrive in the form of Marine Air Group 15 (MAG-15) and F-4 Phantom IIs of VMFA-115 and 232. They are there to provide close air support to hard-pressed ARVN units.

NAVAL: In light of the Communist Easter Offensive, navy surface vessels loose 117,000 artillery rounds along coastal targets in both North and South Vietnam.

April 7

AVIATION: In Saigon, South Vietnam, General John W. Vogt, Jr., takes charge of the Seventh Air Force.

April 7–May 13

AVIATION: The air force commences Operation Constant Guard by shuttling 200 aircraft from the United States to South Vietnam to help blunt the Communist Easter Offensive there.

April 8

MARINES: In the Gulf of Tonkin off Vietnam, the headquarters of the 9th Marine Amphibious Brigade deploys to take command of all marine amphibious forces still in theater.

April 10

AVIATION: Over North Vietnam, B-52 bombers resume air raids for the first time since October 1968.

April 10–13

NAVAL: Over a four-day period, SEAL Lieutenant Thomas R. Norris, assisted by a few South Vietnamese, drops behind enemy lines to rescue two downed American airmen. He wins a Medal of Honor.

April 11

MARINES: Off Vietnam, the 33rd Marine Amphibious Unit joins the 31st MAU to form one of the largest amphibious forces deployed since the Korean War.

April 14

AVIATION: At Da Nang, South Vietnam, a dozen F-4 Phantom II jets of VMFA-212 arrive from Kaneohe, Hawaii.

April 16–27

AVIATION: The *Apollo 16* space capsule piloted by Captain John W. Young, Lieutenant Commander Thomas K. Mattingly, and Lieutenant Commander Charles F. Duke, land on the moon for an extended walk of 71 hours, then return to Earth safely.

DIPLOMACY: In Paris, France, peace talks between the United States, South Vietnam, and North Vietnam resume but no progress is made before they are broken off again on May 4.

April 17

AVIATION: Operation Linebacker I commences as B-52 bombers begin pounding targets in North Vietnam above the 20th parallel for the first time since March 1968.

April 21

AVIATION: In response to the use of Soviet tanks by North Vietnamese forces, the army rushes in supplies of tube-launched, optically tracked antimissiles (TOWs) for use on helicopter gunships of the 1st Aviation Brigade at Tan Son Nhut Air Base.

April 25

NAVAL: In Washington, D.C., John W. Warner gains appointment as the 61st secretary of the navy.

April 27

AVIATION: In North Vietnam, air force fighter bombers using 2,000-pound Paveway I laser-guided bombs drop several spans of the Thanh Hoa Bridge, something that had not been accomplished in 871 previous sorties. This is also the combat debut of precision-guided munitions.

NAVAL: Captain Alene B. Duerck, Nurse Corps, become the first female rear admiral in navy history.

April 30

MILITARY: In South Vietnam, the Studies and Observations Group (SOG) responsible for clandestine operations in Cambodia, Laos, and North Vietnam, is disbanded and replaced by Advisory Group 158 to support South Vietnamese SOF efforts.

May

AVIATION: This month the last remaining Martin B-57 Canberras are phased out from active duty and return to the United States for internment.

- Navy pilots enjoy their best month over North Vietnam by bagging a total of 16 MiGs. The cruiser *Chicago* also shoots down an unidentified aircraft at extreme range with a Talos missile.

May 1

MILITARY: In the northernmost province of South Vietnam, Quang Tri City falls to the North Vietnamese onslaught.

May 1–June 30

MILITARY: Increment XII (Operation Pheasant) results in the removal of the final major combat units from South Vietnam: the 3rd Brigade, 1st Cavalry Division, and the 19th Infantry Brigade.

May 5

TECHNOLOGY: The Pave Phased Array Warning System (PAWS) to detect sea-launched ballistic missiles is declared operationally ready.

May 6

AVIATION: Over North Vietnam, F-4 Phantom II jet fighters from VF-111 and VF 57 (*Coral Sea*) and VF-114 (*Kitty Hawk*) shoot down two MiG-17s and two MiG-21s.

May 8

AVIATION: Over Haiphong, North Vietnam, Operation Pocket Money commences as A-7 Corsair II and Marine Corps A-6 Intruders begin dropping 36 Mk-52-2 magnetic/acoustic sea mines in the harbor. The ports of Hong Gai, Cam Pha, Than Hoa, Vinh Quang Ki, and Dong Hoi are similarly treated. Over the next eight months over 11,000 mines are sown in Communist waters.

- Over North Vietnam, an F-4 Phantom II flown by Lieutenants Randall J. Cunningham and William Driscoll shoot down their second MiG-17 with a Side-winder missile.

An A-4F Skyhawk aircraft preparing to launch from the flight deck of the attack aircraft carrier USS Hancock (U.S. Navy)

NAVY: Rear Admiral Rembrandt C. Robinson, commanding Destroyer Flotilla 11, dies when his helicopter crashes in the Gulf of Tonkin. He is the first flag officer to die in the war.

May 10

AVIATION: The Fairchild YA-10 prototype performs its maiden flight. This is a ground-attack aircraft designed to withstand intense antiaircraft fire.

- Navy fighters enjoy a banner day over North Vietnam when they down 10 Soviet built MiGs; five are claimed by two F-4 Phantom II crews from VF-96 (*Constellation*). Three of these fall to Lieutenants Randall Cunningham and William P. Driscoll, making a total of five kills for the duo; they are the navy's only aces of the Vietnam War and receive the Navy Cross.

May 10–October 23

AVIATION: Air force fighter bombers commence Operation Linebacker I, the latest round of sustained aerial bombing against North Vietnam. F-4 Phantom IIs of the 8th Tactical Fighter Wing severely damage the Paul Doumer Bridge, Hanoi, with new laser-guided munitions.

May 12

AVIATION: A C-130 from U.S. Air Force Europe (USAFE) delivers 5,000 pounds of medical equipment from Stuttgart, Germany, to a new medical facility in Sile, Turkey.

- Near Hue City, South Vietnam, helicopters of HMM-164 transport Vietnamese marines into combat during a raid behind Communist lines.

May 13

AVIATION: Over North Vietnam, air force F-4 Phantom IIs perform a follow-up raid against the Paul Doumer Bridge, Hanoi, finally dropping one of its bridge spans through a combination of laser-guided and conventional bombs. It remains out of commission for the remainder of the year.

May 14

MILITARY: In Kontum, Central Highlands, Vietnam, North Vietnamese units make a third determined thrust at the provincial capital, which is defended by the South Vietnamese 23rd Division. The garrison, amply assisted by American air power and a group of seasoned advisers under John Paul Vann, a former officer turned civilian operative, drives them back.

May 15

DIPLOMACY: Civilian administration of the Ryukyu Islands, including Okinawa, reverts back to Japan after a 27-year period of American control.

May 16–25

MARINES: Along the Carolina coasts, Operation Exotic Dancer V commences among 50,000 personnel of the II Marine Amphibious Force, the 2nd Marine Division, and the 2nd Marine Air Wing (2nd MAW).

May 17

AVIATION: A large force of marine aircraft, including 32 A-4 Skyhawks from VMA-211 and 311, deploy at Bien Hoa Air Base, Saigon, South Vietnam, from Iwakuni, Japan.

May 23

AVIATION: Over North Vietnam, an F-4 Phantom II jet piloted by Lieutenant Commander Ronald E. McKeown and Lieutenant John C. Ensich of VF-161 (*Midway*), shoot down two MiG-17s. This concludes a winning streak of 17 kills for the month.

May 25

DIPLOMACY: In Moscow, Soviet Union, Secretary of the Navy John W. Warner and Soviet admiral of the fleet Sergei G. Gorshkov sign the Incidents at Sea Agreement to reduce the chances of hostile incidents on the high seas.

May 26

DIPLOMACY: In Vienna, Austria, President Richard M. Nixon and General Secretary Leonid I. Brezhnev conclude the Strategic Arms Limitation Treaty (SALT) to limit the construction of antiballistic missile (ABMs) systems, as well as land-based and submarine-launched nuclear missiles. These limitations are imposed for five years only.

June

MARINES: In the Wyoming Valley, Pennsylvania, marine reserve unit render humanitarian assistance for survivors of flooding occasioned by Hurricane Agnes.

June 1

MILITARY: In Washington, D.C., Secretary of Defense Melvin Laird announces that recruits joining a U.S. Army or Marine Corps combat arm would receive a \$1,500 bonus and a four-year enlistment. This is a temporary expedient to test the appeal of an all-volunteer force.

June 9

MILITARY: Senior military adviser John Paul Vann dies when his helicopter crashes while surveying the battle scene at Kontum, Central Highlands, South Vietnam. A civilian with the equivalent rank of major general, he is the highest-ranking American fatality of the Vietnam War.

June 11

AVIATION: Over Hanoi, North Vietnam, B-52 bombers destroy a hydroelectric power plant using laser-guided bombs.

June 16

AVIATION: At Nam Phong, Thailand, a force of marine F-4 Phantom IIs belonging to VMFA-115 deploys for the first time. Combat sorties begin immediately.

NAVAL: At Annapolis, Maryland, Vice Admiral William P. Mack gains appointment as the 47th superintendent of the U.S. Naval Academy.

June 20

AVIATION: At Nam Phong, Thailand, marine A-6 Intruders of VMA-533 arrive from Iwakuni, Japan.

June 22

AVIATION: At Kontum, Central Highlands, South Vietnam, TOW-armed helicopter gunships of the 1st Aviation Brigade have accounted for two dozen tanks, four armored personnel carriers, seven trucks, and two artillery pieces.

- Marine HMA-369 arrives off South Vietnam with the first seven Bell AH-1J Sea Cobras. They are to perform reconnaissance and interdiction missions along the North Vietnamese coast.

June 25

MILITARY: In the III Corps tactical zone, South Vietnamese troops break the siege of An Loc without the help of American ground forces. Victory here signals the end of the Communist Easter Offensive.

June 27

AVIATION: The air force begins transferring all its Fairchild C-123 Provider aircraft to the South Vietnamese air force.

MARINES: North of the Cua Viet River, South Vietnam, the 31st and 33rd Marine Amphibious Units make several feints along the coast to distract North Vietnamese forces from attacking south.

June 28

MILITARY: In the former I Corps tactical zone, South Vietnamese forces begin a concerted counterattack to drive North Vietnamese units out of the region.

June 29

AVIATION: Helicopters of the 9th Military Amphibious Brigade convey two Vietnamese battalions behind enemy lines south of Quang Tri City, South Vietnam.

- Over Quang Tri Province, an OV-10A Bronco flown by Captain Steven L. Bennett, 20th Tactical Air Support Squadron, makes an impromptu strafing attack on Communist forces about to attack an allied unit. His plane is hit by anti-aircraft fire that cripples his aircraft and destroys his observer's parachute. Refusing to abandon his crewman, Bennett elects to ditch in the Gulf of Tonkin and drowns. Bennett wins a posthumous Medal of Honor for saving his observer's life.

MILITARY: In Saigon, South Vietnam, MACV commander General Creighton W. Abrams is replaced by General Frederick C. Weyand.

- The 196th Infantry Brigade, the final army combat unit in South Vietnam, departs.

June 30

MILITARY: In Washington, D.C., General Bruce Palmer, Jr., replaces General William C. Westmoreland as the new army chief of staff.

NAVAL: The Senate approves the nomination of Admiral Thomas Moorer to serve a second two-year term as chairman of the Joint Chiefs of Staff (JCS).

MARINES: At this juncture, Marine Corps personnel levels are 19,842 officers and 178,395 enlisted men.

July 8

MARINES: In Florida, the 2nd Battalion, 6th Marines deploys at Homestead Air Force Base in the event they are needed to restore order at the Democratic National Convention.

July 9

MILITARY: At An Loc, South Vietnam, Brigadier General Richard Tallman is killed by enemy mortar fire as he surveys the battle scene.

July 11

AVIATION: As part of the National Aeronautics and Space Administration's Viking Project to land a space probe safely on Mars, the air force test launches a 962-foot-tall balloon system.

July 14

AVIATION: The carrier *America* arrives off South Vietnam, and VMFA-333 is one of a few marine squadrons to conduct bombing missions from a carrier deck.

July 21–August 15

AVIATION: Operation Saklolo unfolds as transports of the Pacific Air Forces (PACAF) convey 2,000 tons of medicine, relief supplies, and disaster relief teams to Luzon, Philippines, in the wake of heavy flooding.

July 22

MARINES: In the Philippines, units from the 9th Marine Amphibious Brigade perform humanitarian operations for flood survivors.

July 24

MARINES: At Norfolk, Virginia, the headquarters, 4th Marine Amphibious brigade is activated as a command element for any contingency force raised between an MAU and a Marine Amphibian Force (MAF) in size.

July 26

AVIATION: The National Aeronautics and Space Administration (NASA) announces that Rockwell International has been selected as the prime manufacturer of the new space shuttle.

- Transports of the Pacific Air Forces (PACAF) begin delivering 4 million pounds of food and medical supplies to victims of recent flooding in the Philippines.

NAVAL: In Washington, D.C., Congress votes to fund a fourth nuclear-powered carrier.

July 27

AVIATION: At Edwards Air Force Base, California, the McDonnell-Douglas YF-15A Eagle air superiority fighter prototype successfully completes its maiden flight.

July 31

MARINES: In Washington, D.C., Commandant Cushman ends the practice of "voluntary segregation" in Marine Corps living quarters, be they on land or at sea.

August 10

AVIATION: In Washington, D.C., the Army announces that it is cancelling its new and expensive Cheyenne attack helicopter because of cost concerns. However, it is moving ahead with its new Advanced Attack Helicopter concept for the near distant future.

August 11

AVIATION: At Edwards Air Force Base, Aviation, the prototype Northrop F-5E Tiger II lightweight fighter performs its maiden flight; it is designed for the export market.

NAVAL: Ensign Rosemary E. Nelson and Lieutenant Ann Kerr are the first women assigned to go to sea onboard the hospital ship *Sanctuary*, who are not part of the Nurse Corps. They serve as the supply officer and personnel officer, respectively.

August 11–26

MILITARY: Task Force Gimlet under Lieutenant Colonel Rocco Negris, consisting of the 3rd Battalion, 21st Infantry and assorted units, becomes the last combat unit withdrawn from South Vietnam. Those military personnel still present are advisers attached to South Vietnamese combat units.

August 12

AVIATION: Northeast of Hanoi, North Vietnam, marine captain Larry G. Richard, an exchange pilot flying with the Air Force 58th Tactical Fighter Squadron, shoots down a Communist MiG-21. He is the second marine aviator to score a kill in this war.

MILITARY: True to his pledge, President Richard M. Nixon announces that the last American ground forces have been withdrawn from South Vietnam.

August 19

MARINES: The 2nd Battalion, 6th Marines, is mobilized to prevent civil disturbances during the Republican National Convention.

August 19–20

AVIATION: Flood conditions along the Han River, South Korea, prompt air force HH-3 Jolly Green Giant and HH-43 Huskie helicopters to rescue 763 civilians from danger.

August 22

MARINES: At Da Nang, South Vietnam, Communist forces resort to ground assaults and mortar barrages in an attempt to disrupt the airfield, but they all are driven off before serious damage ensues.

August 26

AVIATION: Southwest of Hanoi, North Vietnam, an F-4J Phantom II belonging to VMFA-232 is shot down by a Communist MiG fighter.

August 27

NAVAL: Admiral James L. Holloway III directs four vessels of the Seventh Fleet on a nighttime bombardment of Haiphong, North Vietnam. Two Communist torpedo boats that sortie are sunk without loss to the Americans.

August 28

AVIATION: Over North Vietnam, Captain Richard S. Ritchie and his weapons officer, Captain Charles B. DeBellevue, shoot down their fifth MiG-21 to become the first ace of the war.

MILITARY: In Washington, D.C., President Richard M. Nixon declares that all draft calls will cease after June 30, 1972.

September 9

AVIATION: Over North Vietnam and flying in a different F-4 Phantom II, weapons officer Captain Charles B. DeBellevue shoots down his sixth MiG-21, becoming the top scorer of the Vietnam War.

September 11

AVIATION: Air force fighter bombers armed with laser-guided bombs destroy the Long Bien Bridge in downtown Hanoi, North Vietnam.

- Over North Vietnam, a Marine Corps F-4 Phantom II flown by Major Lee Lasseter and Captain John Cummings shoots down a Communist MiG-21 and damages another. They are the third marine team to score an aerial kill.

September 11–30

MARINES: In Norway, marine reservists are present during the NATO exercise Strong Express, during which the new LVTP-7 amphibian assault vehicle debuts.

September 15

AVIATION: At Loring Air Force Base, Maine, B-52s of the 42nd Bombardment Wing are the first aircraft equipped with short-range attack missiles.

September 16

AVIATION: A Department of Defense report notes that naval and marine aviators have recorded their lowest accident rates in history this year.

MILITARY: In South Vietnam, Vietnamese marines recapture Quang Tri City from Communist forces after they had occupied it for 138 days.

September 22

AVIATION: In the Gulf of Tonkin, Commander Dennis R. Weichmann sets a naval aviation record after returning from his 501st combat sortie over North Vietnam.

October 2

AVIATION: At Vandenberg, California, an Atlas-Burner two-stage rocket launcher hurls two satellites into Earth orbit. The *Space Test Program 72-1* will measure radiation effects on spacecraft while *Radcat* serves as a passive radar and optical calibration target.

October 11

NAVAL: Off the Vietnam coast, a turret explosion onboard the cruiser *Newport News* kills 19 men and injures nine more.

October 12

MILITARY: In Washington, D.C., General Creighton Abrams becomes the 27th chief of staff of the army. He faces a huge task of rebuilding a demoralized force suffering from poor discipline and drug use, along with lower defense appropriations and antimilitary sentiment.

NAVAL: Off the coast of North Vietnam, a racial brawl develops on the carrier *Kitty Hawk* between black and white sailors; 60 men are injured before order is restored.

October 13

AVIATION: Over North Vietnam, weapons officer Captain Jeffrey S. Feinstein, flying in an F-4 Phantom II, becomes the sixth and final air force ace by downing his fifth Communist MiG-21.

- The three air force aces of the war, Captains Richard S. Ritchie, Charles B. DeBellevue, and Jeffrey S. Feinstein receive the Mackay Trophy for outstanding airmanship.

October 16

NAVAL: At Subic Bay, Philippines, 12 African-American sailors refuse to sail with their vessel, the fleet oiler *Hassayampa*. A brawl later breaks out between white and black sailors, and marines are sent onboard to restore order.

October 17

AVIATION: The versatile Harpoon antiship missile is test-fired for the first time. This weapon possesses a range of over 60 miles and can be launched from ships, submarines, or airplanes.

October 23

DIPLOMACY: In Washington, D.C., President Richard M. Nixon orders a halt to bombing North Vietnam above the 20th parallel to encourage progress at the Paris peace talks.

October 26

DIPLOMACY: In Paris, France, Secretary of State Henry Kissinger declares that “peace is at hand” with North Vietnamese negotiators. He announces that any remaining differences between the United States and North Vietnam can be resolved in a few more negotiating sessions.

October 31

AVIATION: At Langley Air Force Base, Virginia, the 22nd Air Defense Missile Squadron, is inactivated. It is the last unit armed with Bomarc surface-to-air missiles.

NAVAL: In North Vietnam, a SEAL team comes under fire and its lieutenant is injured. Engineman Second Class Michael E. Thornton dashes forward, kills several enemy soldiers, rescues his unconscious leader, pulls him through water for two hours until picked up, and brings him to safety. Thornton wins a Medal of Honor.

November 10

NAVAL: Admiral Elmo R. Zumwalt, chief of naval operations, reprimands 90 naval officers for recent racial unrest on the carriers *Kitty Hawk* and *Constellation* and outlaws all racist behavior in the service.

November 22

AVIATION: Over North Vietnam, an air force B-52 is struck by an SA-2 Guideline missile and severely damaged. The crippled bomber hobbles its way back as far as Thailand, where it crashes, and the crew safely ejects. This is the first Strato-fortress lost in combat.

December 1

AVIATION: Forty-two-year-old Colonel Thomas P. Stafford, a veteran of *Gemini 6*, *Gemini 9*, and *Apollo 10*, becomes the youngest brigadier general in the air force.

MILITARY: For the first time since January 1965, MACV is able to announce that no American servicemen have died in Vietnam during the week.

December 7–19

AVIATION: *Apollo 17*, piloted by Captain Eugene A. Cernan, Commander Ronald E. Evans, and geologist Harrison H. Schmidt, circles the moon, makes a final

touch down on the lunar surface for the last time, and returns safely to Earth. This flight concludes the successful Apollo moon program; of seven missions, six were commanded by former naval aviators.

December 18

DIPLOMACY: In Paris, France, North Vietnamese negotiators inexplicably walk out of peace talks, prompting President Richard Nixon to take swift and decisive action to force them back.

December 18–29

AVIATION: President Richard M. Nixon orders Operation Linebacker II, a maximum effort against North Vietnam. Massed B-52 bombers strike the cities of Hanoi and Haiphong for the first time. Nixon's goal is to convince the Communists to return to peace talks in Paris or face annihilation from the air. To this end B-52 bombers fly 741 sorties while 769 defense suppression, combat air patrol, and chaff sorties are also executed. Air force and navy losses during this period amount to 15 B-52s, two F-111s, three F-4s, two A-7s, two A-6s, one EB-66, one HH-53, and one RA-5C.

- On December 18, Staff Sergeant Samuel O. Turner becomes the first B-52 tail gunner to shoot down a MiG-21 with a 20mm Vulcan tail gun.
- Throughout Operation Linebacker II, more than 1,300 refueling sorties are successfully performed by KC-135 Startotankers.

December 20

AVIATION: Over North Vietnam, Communist surface-to-air missiles shoot down six B-52 bombers in one day. Air force authorities blame the loss on repetitive routing to targets coupled with the lack of SAM-jammers on half of the B-52Gs. Consequently, the rest of Operation Linebacker II is performed with adequately equipped B-52Ds, and losses drop to acceptable levels.

December 24

AVIATION: Over North Vietnam, Airman First Class Albert E. Moore, a B-52 tail gunner, becomes the second and final person to shoot down a MiG-21 in this manner.

MILITARY: In Saigon, South Vietnam, legendary comedian Bob Hope gives his ninth and final Christmas show for the remaining American personnel there.

December 25

MILITARY: Army strength in South Vietnam shrinks by 700 officers and men to 16,100, its lowest level since 1965. This year there were 172 combat-related fatalities.

December 27

MARINES: In Washington, D.C., the Commandant's House and the Marine Barracks at 8th and I are listed with the National Register of Historic Places.

December 30

DIPLOMACY: In light of the fact that Communist negotiators agrees to resume the Paris Peace talks on January 8, 1973, President Richard M. Nixon halts all bombing north of the 20th parallel.

December 31

MILITARY: American troop strength in South Vietnam stands at 24,200 officers and enlisted men.

1973

January

MILITARY: As part of an overall rehabilitation effort, the army opens its Sergeant Major Academy to the first class. Hereafter, increasing emphasis is placed on better education and schools for junior NCOs.

- In South Vietnam, Operation Enhance unfolds as the army turns over 70,767 guns, 383 artillery pieces, 622 tracked vehicles, and 2,035 wheeled vehicles to its ARVN allies. A handful of American military advisers also remain in Phnom Penh, Cambodia, to oversee the transfer of arms there.

January 3

DIPLOMACY: In Paris, France, the North Vietnamese delegation signals its readiness to resume diplomatic negotiations.

January 4

MILITARY: In Washington, D.C., Secretary of Defense Melvin Laird, giving heed to a recent Supreme Court decision, ends all compulsory religious attendance in all military academies and armed services.

January 5

DIPLOMACY: In Washington, D.C., President Richard M. Nixon writes President Thieu of South Vietnam and pledges that the United States will retaliate swiftly and severely should the Communists violate terms of the peace accord.

January 8

AVIATION: Over North Vietnam, an F-4D Phantom II flown by Captain Paul D. Howman and Lieutenant Lawrence W. Kullman shoot down a Communist MiG with a radar-guided AIM-7 Sparrow missile. This is the last air force victory of the war.

January 12

NAVAL: Over the Tonkin Gulf, North Vietnam, an F-4 Phantom II piloted by Lieutenants Walter Kovalseki and James Wise of VF-161 (*Midway*) shoots down a Communist MiG-17 fighter with Sidewinder missiles. This is also the last of 59 enemy planes downed by naval aviators in this war.

January 15

MARINES: In Washington, D.C., President Richard M. Nixon, generally pleased by the resumption of peace talks in Paris, ends all bombing, mining, and shelling of targets in North Vietnam.

January 18

AVIATION: The Fairchild Republic Company contracts with the Department of Defense to manufacture the new A-X ground support aircraft for the air force. It enters service as the A-10 Thunderbolt II.

January 19

MARINES: At Naval Air Station Anacostia, D.C., a battalion of marines from Camp Lejeune, North Carolina, deploys as a precaution against political unrest during presidential inaugural ceremonies.

January 23

DIPLOMACY: In Washington, D.C., President Richard M. Nixon announces that a peace agreement has been reached with North Vietnam to end the war “and bring peace with honor to Vietnam.”

January 23–February 3

MILITARY: North Vietnamese troops attack selected targets in an attempt to enlarge their holdings while South Vietnamese forces hold onto what they can before the cease-fire occurs.

January 27

AVIATION: Over South Vietnam, an F-4D Phantom II piloted by Commander Harley H. Hall of VF-143 (*Enterprise*) is shot down; his radar officer is rescued but Hall is declared missing in action and eventually declared dead. He is the final naval aviator lost in this war.

DIPLOMACY: Secretary of State Henry Kissinger signs a peace treaty in Paris along with representatives of North Vietnam, the Viet Cong, and South Vietnam, which puts in place an immediate cease-fire and the release of all American captives, coupled with the removal of all remaining U.S. forces from South Vietnam within 60 days.

MILITARY: In Washington, D.C., Secretary of Defense Melvin Laird declares the military draft over and a new volunteer force begins at once. Lieutenant Colonel William B. Nolde, an army adviser, becomes the final American soldier killed in South Vietnam when he is struck by fragments from an artillery round. His death comes only 11 hours before the cease-fire.

January 28

AVIATION: Carrier aircraft from the *Ranger* and *Enterprise* conduct air raids against Communist positions in Laos, despite the recent cease-fire. B-52s perform their final Arc Light mission of the war by dumping hundreds of tons of bombs on suspected Communist positions in South Vietnam. Arc Lights have been continuously employed since 1965.

MILITARY: To oversee the closing down of remaining American facilities in South Vietnam, the Defense Attaché Office (DAO) is created under Major General John E. Murray. It currently employs 50 soldiers and 1,200 civilian operatives.

MARINES: The recent Easter Offensive in South Vietnam has claimed the lives of 18 marines, while 68 were wounded and 21 are missing.

January 30

AVIATION: Marine Air Group 12 (MAG-12) flies from Bien Hoa, South Vietnam, and redeploys at Iwakuni, Japan.

MILITARY: In Washington, D.C., Elliot L. Richardson gains appointment as the 11th secretary of defense.

January 31

MARINES: Sergeant Major Clinton A. Puckett is appointed the sixth sergeant major of the Marine Corps.

February 1

AVIATION: The program to employ naval aviators in Marine Corps aviation, which stretches back to 1923, concludes with the retirement of the last four navy pilots.

American prisoners of war, most of them downed pilots, were released from North Vietnam prison camps beginning on February 12, 1973, two weeks after the signing of a cease-fire agreement. (*United States Army*)

MILITARY: In Washington, D.C., the Department of Defense announces that it is tightening military disability standards to cut back on the number of officers retiring from active duty with disabilities.

February 9

MARINES: The 9th Marine Amphibious Brigade is deactivated with the exception of its headquarters. This is maintained to serve as a viable command element within III Marine Amphibious Force.

February 12

AVIATION: Operation Homecoming begins at Clark Air Force Base, the Philippines, as the North Vietnamese begin releasing the first of their acknowledged 591 prisoners of war. They are flown in air force C-141 Starlifters of the Military Airlift Command (MAC). Army captives released total 117 out of 164 known captured. Four marines are also released of the 26 thought to be held. For its efforts, MAC aircrews receive the Mackay Trophy.

February 16

MARINES: In Quang Tri City, the marines stop advising their Vietnamese counterparts and the last two advisers depart.

February 22

DIPLOMACY: Once Laos arranges a cease-fire between Communist and noncommunist factions, the United States declares its intention to cease all military activities, clandestine or otherwise in that nation. However, Communist violation results in a resumption of B-52 strikes, which continue over the next two months.

February 24–July 18

AVIATION: In the Gulf of Tonkin, 31 CH-53 Sea Stallion helicopters begin mine-sweeping operations as part of Operation End Sweep.

NAVAL: In waters off Haiphong, North Vietnam, Operation End Sweep commences as the Seventh Fleet's Mine Countermeasure Force (Task Force 78) mine sweeper begins removing thousands of mines laid during the war years. Once finished, Task Force 78 is the last American unit to leave North Vietnamese territorial waters.

February 25

AVIATION: In Cambodia, jets of Marine Air Group 15 (MAG-15) continue flying tactical sorties against Khmer Rouge Communists.

March 4

MILITARY: In accordance with the Paris peace accords, Hanoi releases a second group of American prisoners of war.

March 14

MARINES: Sub Unit One, which has been providing support to South Vietnamese forces, becomes the last marine detachment to vacate the country.

March 16

MILITARY: Army Captain Floyd J. Thompson, who has been a captive of the Viet Cong for nine years, is released. He is the longest-held American captive of the war.

March 18

AVIATION: In Haiphong Harbor, North Vietnam, a CH-53D of HMM-463 crashes into the bay during minesweeping operations; all the crew are rescued.

March 20

AVIATION: American aircraft cover a supply convoy of eight vessels that ventures up the Mekong River to the Cambodian capital of Phnom Penh.

March 21

AVIATION: Over the Mediterranean, two C-130 Hercules transports, reportedly flying a reconnaissance mission, are attacked by two Libyan Mirage jet fighters. The aircraft evade their attackers and land safely in Greece.

March 28

AVIATION: As the final air force warplanes depart South Vietnam, many are redeployed to nearby Nakhon Phanom Air Base, Thailand, with the U.S. Support Activities Group.

- The highly effective 1st Aviation Brigade, U.S. Army, which helped pioneer the concept of helicopter gunships in combat, is deactivated and departs South Vietnam.

March 29

MILITARY: In Saigon, MACV finally closes down after a decade in operation. However, General Frederic C. Weyand warns Congress that the survival of South Vietnam depends on the continuance of American economic and military aid. The Defense Attaché Office handles the few remaining military functions extant. North Vietnam also releases the final group of American prisoners of war.

- In Long Binh, the 18th Military Police Brigade is withdrawn from Vietnam, the last sizable army unit to depart. At the war's height no less than 30,000 military police were deployed throughout the country.

March 29–31

AVIATION: In Tunis, Tunisia, helicopters of HMH-362 perform disaster relief operations.

April

MARINES: In Managua, Nicaragua, the U.S. embassy is destroyed by a severe earthquake and six marine guards on station aid in rescue efforts.

April 5

MARINES: In Rome, Italy, a bomb demolishes the living quarters of marines guarding the U.S. embassy; there are no casualties.

April 10

AVIATION: The Boeing T-43A navigation trainer, a highly modified 737 airliner, performs its maiden flight.

- American aircraft begin airlifting gasoline and oil into the besieged capital of Phnom Penh, Cambodia.

April 13

AVIATION: Responsibility for training the shah of Iran's pilots in F-4 Phantom II operations is delegated to the U.S. Air Force Europe (USAFE).

April 16–17

AVIATION: Guam-based B-52s perform their final bombing missions in Southeast Asia by striking Communist targets in Laos after the latter violated cease-fire terms by overrunning villages in the Plaine des Jarres.

April 26

MILITARY: In Washington, D.C., the Department of Defense raises the combat arms enlistment bonus from \$1,500 to \$2,500. It applies only to the U.S. Army and Marine Corps.

May 14

AVIATION: At Cape Kennedy, the unmanned *Skylab 1* orbiting space station is launched, although it loses a meteoroid shield and one of two solar panels. New procedures will be developed for manning and operating the crippled station with a crew onboard.

MILITARY: In Washington, D.C., Howard H. Callaway gains appointment as the 11th secretary of the army. He completes the phase out of the military draft and also takes measures to reform the army command and staff structure.

- A Supreme Court decision rules that female members of the armed services are entitled to the same dependency benefits for their husbands as male servicemen have traditionally enjoyed for their spouses.

May 15

AVIATION: Operation Authentic Assistance unfolds as 19 C-130 transports begin delivering 9,250 tons of food and supplies to drought victims in Chad, Mali, and Mauritania, Africa.

May 18

AVIATION: The 81st and final C-5A Galaxy is delivered to the U.S. Air Force.

May 25–June 22

AVIATION: In Earth orbit, an astronaut crew comprised of Captain Charles C. Conrad, Commander Joseph P. Kerwin, and Commander Paul J. Weitz occupy the new *Skylab 2* and conduct experiments in space over the next 28 days. They also perform ongoing repairs to the damaged solar shield.

May 29

MARINES: When five soldiers and four marines are charged with misconduct while they were prisoners of war, the secretary of the navy dismisses all charges against them.

June 1

AVIATION: In Washington, D.C., Jeanne M. Holm, who was the first female brigadier general in the air force, receives her second star to major general.

June 13

AVIATION: The Boeing E-4A advanced airborne command post performs its maiden flight.

June 19

MILITARY: In Washington, D.C., Congress passes the Case-Church Amendment, which outlaws any military appropriations for Southeast Asia without congressional approval. Many critics have argued this signaled to the North Vietnamese that they could attack the South without fear of American intervention.

June 25

NAVAL: Former prisoner Rear Admiral James Stockdale files charges against a navy captain and a Marine Corps lieutenant colonel who were also captives. The secretary of the navy dismisses the charges, but issues letters of reprimand and forces them into retirement.

June 26

MARINES: The United States, having opened a liaison office in Beijing, China, marines are on hand to raise the American flag over the premises.

June 27

AVIATION: President Richard M. Nixon vetoes a congressional bill that would have stopped funding for aerial bombardment of Communist Khmer Rouge forces Cambodia. He later agrees to a cut-off date of August 15 for all such operations.

MILITARY: The cease-fire signed in Paris takes effect; the South Vietnamese army controls 75 percent of its territory and 85 percent of its population. Moreover,

the force is well-equipped with modern weaponry and the Americans promise additional aid if needed.

June 29

POLITICS: In Washington, D.C., the Democratic-controlled Congress passes a resolution halting all American air power in Cambodia after August 15. This makes possible a victory by the bloody Khmer Rouge Communists.

June 30

MARINES: Manpower levels in the Marine Corps stand at 19,282 officers and 176,816 enlisted men.

July 1

MILITARY: Conscription (draft) in the United States ends but the Selective Service still registers young men of military age.

July 3

MILITARY: In Washington, D.C., James R. Schlesinger gains appointment as the 12th secretary of defense.

July 15

AVIATION: Over South Vietnam, an A-7D Corsair II of the 354th Tactical Reconnaissance Wing completes the final combat mission of the Vietnam conflict. Since 1964 the air force has flown 5.25 million sorties over Southeast Asia at a cost of 1,737 aircraft lost in combat and a further 514 through accidents.

July 16

POLITICS: The Senate Armed Services Committee begins hearings on secret bombing raids made by the U.S. Air Force against Cambodian Communists in 1969 and 1970. Secretary of Defense James L. Schlesinger subsequently testifies that such actions were necessary for the protection of U.S. ground forces then in South Vietnam.

July 28–September 25

AVIATION: At Cape Kennedy, Florida, a crew of astronauts composed of Captain Alan Bean, Major Jack Lousma, and Dr. Owen Garriott lifts off into orbit to man the *Skylab 3* orbiting space station; they remain for a record 59 days.

July 31

AVIATION: At Naval Air Station Imperial Beach, California, Light Helicopter Antisubmarine Squadron 33 (HSL-33) is established. This is also the first Light Airborne Multi-Purpose squadron.

- At Cherry Point, North Carolina, VMA-231 is reactivated and equipped with AV-8A Harrier jump jets.

MARINES: At Guantánamo Bay, Cuba, the 2nd Battalion, 8th Marines is relieved by a company-sized formation. This constitutes the first reduction in garrison forces since the 1960s.

August

MILITARY: In South Korea, Lieutenant Colonel Colin Powell takes charge of a battalion within the 2nd Infantry Division. His commander, Major General Henry Emerson, has instituted a rigorous regimen for increasing morale and discipline in his division.

August 15

AVIATION: In accordance with congressional action, the air force halts bombing operations against the Communist Khmer Rouge forces in Cambodia, the final act of American involvement in Southeast Asia. Marine air operations originating from Nam Phong, Thailand, are also suspended. This concludes eight years of continuous raids by B-52 bombers and nine years by fighter bombers.

- From a base at Korat, Thailand, a Lockheed EC-121 performs the final aerial mission of the Vietnam War. Since February 1962, over 5.25 million missions have been flown over Southeast Asia, with more than 1,700 aircraft shot down.

August 20

AVIATION: Recent flooding victims in Pakistan are the object of transports from the Military Airlift Command (MAC), Tactical Air Command (TAC), and the Air Force Reserve (USAFR), which deliver over 2,400 tons of food, medicine, and supplies.

September

MARINES: The Marine Corps Enlisted Commissioning Education Program enrolls its first selectees. Male candidates study at The Citadel, Charleston, South Carolina, while female candidates study at the University of Seattle, Washington.

September 5

AVIATION: On *Skylab 3*, in Earth orbit, Captain Alan L. Bean sets a new record by remaining over 49 days in space. This breaks a previous record held by Captain Charles P. Conrad.

September 6

AVIATION: At Korat Royal Thai Air Base, Thailand, F-105 Thunderchiefs of the 561st Tactical Fighter Squadron depart for George Air Force Base, California.

September 10–21

MARINES: In the Hawaiian Islands, Marines join forces from Australia, Canada, and New Zealand in RimPac-73, a large combined naval exercise.

September 25

AVIATION: In Earth orbit, Marine lieutenant colonel Jack R. Lousma sets a record 59 days in space while working on the *Skylab 3* space station.

October

AVIATION: At Elmendorf Air Force Base, Alaska, the Air Weather Service employs a ground-based liquid propane system for dispersing fog. In this manner, more air traffic is possible during bouts of inclement weather.

October 1

AVIATION: Thomas N. Barnes is appointed the new chief master sergeant of the air force.

October 5

NAVAL: The aircraft carrier *Midway* is the first such vessel homeported at Yokosuka, Japan. At least one, forward-based carrier operates from this port today.

October 6

NAVAL: In the Sinai Peninsula, the Egyptian attack upon Israeli defenses signals the start of the brief but bloody Yom Kippur War. The Sixth Fleet is placed on alert in the event of Soviet intervention.

October 12–April 6

AVIATION: As the Yom Kippur War continues, SR-71 Blackbirds fly a total of nine reconnaissance missions during Operation Giant Reach. As the name implies, all the aircraft involved are dispatched from bases in the United States.

October 14–November 14

AVIATION: The United States announces that it is beginning a major airlift of military supplies and equipment to Israel to counter recent Soviet support of Egypt and Syria in the Yom Kippur War. Operation Nickle Grass involves air force C-5A Galaxy and C-141 Starlifter aircraft, which ultimately deliver 22,000 tons of equipment. This breaks down into 145 C-5A sorties with 10,000 tons and 421 C-141 sorties with 11,600 tons. This influx of military hardware enables the Israelis to rebuff Arab attacks and strengthen their overall position.

October 17

DIPLOMACY: Several Arab nations announce an oil embargo against any nation supporting Israel during the recent conflict; this is directed mainly against the United States.

October 24

MILITARY: According to U.S. military intelligence, North Vietnam has used the cease-fire to enlarge its troop strength in South Vietnam by 70,000 men, 400 tanks, and 200 artillery pieces. A number of airfields and all-weather roads have been constructed from Quang Tri Province in the north to the Mekong Delta in the south.

October 25

MARINES: In light of Arab-Israeli violence, the 4th Marine Amphibious Unit and helicopters of HMM-201 are placed on alert in the eastern Mediterranean.

October 28

AVIATION: At Mather Air Force Base, California, the first production T-43 trainer aircraft is delivered.

November 7

MILITARY: In Washington, D.C., Congress passes the War Powers Act to curtail future military adventurism. It stipulates that the president must notify Congress within 48 hours of committing American forces into combat. Moreover, such forces must be withdrawn within 60 days unless Congress authorizes an extension.

November 9

MILITARY: In Washington, D.C., the Department of Defense announces severe fuel economy measures due to shortages arising from the Arab oil embargo.

November 14

TECHNOLOGY: The M203 40mm grenade launcher is adopted by the Marine Corps as a standard infantry weapon. It affixes directly onto the barrel of an M16 rifle, greatly enhancing unit firepower.

November 16–February

AVIATION: At Cape Canaveral, Florida, a Saturn 1B rocket carries the new *Sky-Lab 4* team aloft. The team is commanded by Marine Corps lieutenant colonel

Gerald P. Carr over the next 84 days. A major activity onboard *Skylab* at this time is photographing the oncoming comet Kohoutek.

November 19

NAVAL: Vice Admiral Hyman G. Rickover (Retired), the father of the American nuclear navy, is promoted to full (four-star) admiral.

December 1

NAVAL: The navy launches the *Tarawa*, the first in a new series of general purpose amphibious assault ships. It can disembark marine detachments by landing craft, amphibious tracked vehicles, or helicopters.

December 5

MARINE: Another gender barrier falls after the marines adopt regulations allowing women to command units primarily made up of men.

December 13

AVIATION: At Fort Worth, Texas, General Dynamics rolls out its prototype YF-16 lightweight fighter. This is the first fighter craft to feature advanced “Fly-by-wire” computer technology to enhance pilot performance at high speed. It enters service as the F-16 Fighting Falcon, which still serves today.

December 19

AVIATION: The air force approves the purchase of 51 Fairchild/Republic A-10 Thunderbolt II ground attack aircraft, armed with a 30mm GAU-8A gatling gun.

December 20

MEDICAL: Lieutenants Jane O. McWilliams and Victoria M. Voge are the first women to become naval flight surgeons.

1974

January

MILITARY: As part of its rebuilding program, the army activates the 75th Infantry Regiment (Ranger) of three battalions. In Vietnam, the only remaining military personnel serve in the Defense Attaché Organization under Major General John E. Murray, who has little to do but watch South Vietnam crumble under hammer blows delivered by Communist forces.

January 16–19

AVIATION: Near Pinehurst, Idaho, the 48th Air Rescue and Recovery Squadron evacuates 93 people from flooded areas.

February 2

AVIATION: At Edwards Air Force Base, California, the General Dynamics F-16 Fighting Falcon lightweight fighter completes its initial flight; this is the first fighter craft to employ fly-by-wire (computer-assisted) technology.

February 11

MARINES: In Washington, D.C., Commandant Cushman declares that the Marines Corps will allow reservists to keep long hair, provided they wear a short-hair wig while drilling on weekends. As unsavory as it sounded, he was keeping military policy in line with recent Supreme Court decisions.

February 14

MARINES: At Quantico, Virginia, and Camp Butler, Okinawa, marines begin training on the Small Arms Remote Target System (SMARTS), an innovative rifle range system.

February 22

AVIATION: Lieutenant Barbara Ann Allen is the first woman to complete navy flight training and earn her golden wings as a naval aviator.

March 1

AVIATION: The Sikorsky CH-53E Sea Stallion heavy lift helicopter makes its initial flight. Designed expressly for the Marine Corps, this three-engined behemoth has twice the lifting capacity of the CH-53D.

MARINES: Female marines are now allowed to have billets on previously all-male bases, and rear-echelon billets with the Fleet Marine Force. The first 13 candidates are lodged with the 2nd Marine Air Wing (2nd MAW), Cherry Point, North Carolina, and the 1st Marine Division, Camp Pendleton, California.

March 7

NAVAL: A team of underwater archaeologists reports finding the wreckage of the famous Union warship *Monitor*, which sank off Hatteras, North Carolina, in 1862.

March 26

AVIATION: The Department of Defense announces that, owing to spare parts shortages and overdue maintenance, nearly 5,000 air force, navy, and marine aircraft are not operationally ready.

April 10

AVIATION: Minesweeping operations in the Suez Canal are begun by ships and aircraft of the United States, Great Britain, and France as per provisions of the Camp David Peace Accords. Air force C-130s are called in to support communications efforts as part of Operation Nimbus Star.

April 22–June 3

AVIATION: In the Suez Canal, Egypt, marine RH-53 Sea Stallion helicopters of HM-12 arrive and participate in Operation Nimbus Star by sweeping that waterway free of mines planted there in the 1973 Yom Kippur War.

May

AVIATION: At Myrtle Beach, South Carolina, the 354th Tactical Fighter Wing finishes its redeployment from distant Korat, Thailand.

June 4

AVIATION: At Fort Rucker, Alabama, Lieutenant Sally W. Murphy graduates from army flight school and becomes its first female helicopter pilot.

June 9

AVIATION: At Edwards Air Force Base, California, the Northrop YF-17 prototype performs its maiden flight. Although it lost the air force fighter competition to the General Dynamics YF-16, it is eventually acquired by the navy as the F/A-18 Hornet.

June 20

NAVAL: In Washington, D.C., J. William Middendorf gains appointment as the 62nd secretary of the navy.

June 30

MARINES: Because the Naval Disciplinary Command, Portsmouth, New Hampshire, is being disbanded, Marine Corps prisoners serving exceptionally long sentences are transferred to army detention facilities at Fort Leavenworth, Kansas.

- In Saigon, South Vietnam, the Marine Security Guard at the U.S. embassy is lowered from 174 to 157 men.

July

MARINES: In Australia, the 33rd Marine Amphibious Unit begins the largest-ever peacetime training exercises held with Australian forces. The exercise includes troops from the United States, Australia, New Zealand, and Great Britain.

July 1

AVIATION: In Washington, D.C., General David C. Jones gains appointment as U.S. air force chief of staff.

NAVAL: In Washington, D.C., Admiral James L. Holloway becomes the 20th chief of naval operations.

- The Boston Navy Yard, Massachusetts, closes its gates as a cost-cutting measure, ending a rich and varied 174-year history. Many historic vessels were constructed here since the 1790s, including the famous frigate *Constitution*.

MILITARY: In Washington, D.C., U.S. Air Force general George S. Brown gains appointment as chairman of the Joint Chiefs of Staff (JCS).

MARINES: A new aptitude test, the Armed Services Vocational Aptitude Battery, is adopted by the Marine Corps for all recruits.

July 5

AVIATION: At Luke Air Force Base, Arizona, personnel of the 555th Tactical Fighter Squadron arrive from Udorn Royal Thai Air Base, Thailand, to become the first squadron equipped with F-15 Eagles.

July 22

AVIATION: On the disputed island of Cyprus in the eastern Mediterranean, helicopters of HMM-262 evacuate American citizens and foreign nationals during an invasion by Turkish forces. They depart the British base at Dhekelia for the helicopter assault ship *Coronado* offshore, which takes them, in turn, to Beirut, Lebanon, for safekeeping.

July 25

AVIATION: In the wake of a Turkish invasion of the island of Cyprus, C-130 transports are dispatched from western Europe to deliver 10,000 blankets, 7,500 cots, 600 tents, and two water trailers for use by refugees.

NAVAL: The Department of Defense contracts with the General Dynamics Corporation to design and construct the new generation of Trident fleet ballistic missile submarines.

July 27

AVIATION: During an airshow at Milwaukee, Wisconsin, a marine AV-8A Harrier jump jet crashes and burns during its demonstration; the pilot ejects and is unharmed.

LGM-30G Minuteman III missile being inspected inside a silo near Grand Forks Air Force Base, North Dakota (*Department of Defense*)

July 29

AVIATION: In Washington, D.C., Secretary of Defense James R. Schlesinger authorizes the U.S. Air Force to consolidate all military airlift aircraft under itself as a single manager.

August 9

MILITARY: In light of the resignation of Richard M. Nixon from the presidency, Gerald R. Ford succeeds him as the new chief executive and commander in chief.

August 13

AVIATION: At Iwakuni, Japan, VMA-513 deploys as the first Harrier-equipped jet attack squadron in the western Pacific.

August 17

AVIATION: Operation Compass Cope unfolds as the U.S. Air Force begins testing of its Teledyne remote piloted vehicle (RPV).

August 19

MARINES: On Cyprus, American ambassador Roger P. Davies dies in a riot despite the presence of a 15-man Marine Security Guard.

August 21–28

AVIATION: In the Philippines, helicopters from the 31st Marine Amphibious Unit assist survivors of recent heavy rains and flooding.

August 30

AVIATION: At Clark Air Base, Philippines, a C-5A Galaxy completes its first trans-pacific flight with refueling by landing after a flight of 21 hours, 30 minutes. The 10,600-mile mission originated at Dover Air Force Base, Delaware.

- At Kwangju, South Korea, helicopters of the 41st Air Rescue and Recovery Wing save 36 civilians from rising floodwaters.

September 1

AVIATION: In a record-breaking flight, an SR-71 piloted by Majors James V. Sullivan and Noel Widdifield fly from New York to London, England, in 1 hour and 54 minutes, averaging 1,800 miles per hour.

September 3

AVIATION: At Warren Air Force Base, Wyoming, the last operational Minuteman I intercontinental ballistic missile (ICBM) of the 90th Strategic Missile Wing is replaced by a new Minuteman III.

September 13

AVIATION: In another world record flight, Captains Buck Adams and William Machorek fly their SR-71 Blackbird from London, England, to Los Angeles, Cali-

fornia, in three hours, 47 minutes, and 39 seconds; they averaged 1,436 mile per hour.

September 16

AVIATION: The 8th Tactical Fighter Wing finishes its redeployment from Ubon Airfield, Thailand, to Kunsan Air Base, South Korea.

MILITARY: In another gesture at national healing, President Gerald R. Ford declares a limited amnesty for Vietnam War draft dodgers. The process involves taking a loyalty oath and two years of community service, but veterans groups are quick to criticize the measure.

October 3

MILITARY: In Washington, D.C., General Frederic C. Weyand succeeds the late general Creighton W. Abrams as the 28th chief of staff of the army. He will address problems associated with enlarging the volunteer force as well as enhancing troop readiness.

October 24

AVIATION: A C-5A Galaxy hoists a Minuteman I missile to 19,500 feet, whereupon it is released by parachute above the Pacific Ocean, then ignites and successfully launches.

November 24

DIPLOMACY: President Gerald R. Ford and Soviet general secretary Leonid Brezhnev conclude the Vladivostok Strategic Arms Limitation Treaty to limit development of strategic delivery vehicles and multiple, independently targeted reentry vehicles (MIRVs).

NAVAL: The carrier *Constellation* enters the Persian Gulf, the first time an American warship has deployed there since 1948. This remains a region of increasing strategic and economic concern over the next three decades and sees increasing American military involvement.

December

AVIATION: At Cudjoe, Florida, the air force begins operating a balloon-borne radar called Seek Skyhook to monitor the Florida Strait separating Cuba and the United States.

December 1

AVIATION: All transport assets in the Tactical Air Command (TAC) are now transferred to the Military Airlift Command (MAC).

December 2

AVIATION: In Washington, D.C., the Department of Defense approves the joint air force-navy NAVSTAR global positioning satellite system intended to revolutionize global navigation and weapons delivery.

December 23

AVIATION: The Rockwell B-1A variable-geometry bomber performs its maiden flight by relocating from the factory at Palmdale, California, to Edwards Air Force Base.

1975

AVIATION: This year the army conducts intense testing of prototypes for its new advanced attack helicopter, a choice that ultimately falls upon Hughes Aircraft AH-64 Apache.

January

MILITARY: As Communist forces continue to violate the Paris peace accords and attack South Vietnam, there is very little that the handful of advisers still extant can do except watch the country die.

January 11

AVIATION: As Phnom Penh, Cambodia, is surrounded and cut off by Communist Khmer Rouge forces, air force transports begin an emergency airlift to bring in needed supplies and ammunition to the defenders.

January 13

AVIATION: In Washington, D.C., Secretary of the Air Force Dr. John L. Lucas agrees to purchase a fleet of new, lightweight, and highly sophisticated General Dynamics F-16 jet fighters.

January 16–February 1

AVIATION: The F-15 Streak Eagle, a stripped-down pre-production aircraft flown by three different test pilots, sets eight world time-to-climb records, including 98,425 feet in only three minutes and 28 seconds. Consequently, Majors Roger J. Smith, David W. Peterson, and Willard R. MacFarlane all win the Mackay Trophy.

January 15

MARINES: In Washington, D.C., the Supreme Court overturns the ruling of a lower court and upholds a law mandating retirement of all male officers who have been twice passed over for promotion.

January 27

MILITARY: In Cambodia, the Communist Khmer Rouge forces of Pol Pot are poised to storm the capital of Phnom Penh as government defenses wilt.

NAVAL: In Corfu, Greece, anti-American agitation and mob attacks against two officers require the destroyer *Richard E. Byrd* to hoist anchor and depart.

February 1

AVIATION: A McDonnell Douglas F-15 fighter jet dubbed *Streak Eagle* sets several world speed records in the time-to-climb category.

MARINES: In an attempt to raise enlistment standards, the Marine Corps begins emphasizing the general-technical score of the new Armed Services Vocational Aptitude Battery.

- At Marine Air Station Corps, Cherry Point, North Carolina, Sergeant Major Eleanor L. Judge is appointed the first woman to hold the top enlisted slot in the Headquarters Squadron.

February 7

AVIATION: An LTV Corsair II fitted with the DIGITAC (digital flight control system) begins flight testing. This computerized fly-by-wire system is intended

**Weyand, Frederick C. (1916–)***Army general*

Frederick Carleton Weyand was born in Arbuckle, California, on September 15, 1916, and, after graduating from the University of California, Berkeley, in 1939, he joined the Coast Artillery Reserve as a lieutenant. During World War II he served as an intelligence officer in Burma under General Joseph W. Stilwell, and remained in the Pacific for several years until 1949, when he enrolled in the Infantry School at Fort Benning, Georgia. Weyand proved himself a competent officer and he also passed through the Armed Forces Staff College in 1957 and the National War College in 1958. After serving with the Berlin garrison as a temporary brigadier general in 1960, he became a major general in November 1962 and assumed command of the 25th Infantry Division in Hawaii (1964–66). Weyand arrived in South Vietnam with his division in March 1966 and was posted with the III Corps tactical zone, whose troops were responsible for the security of Saigon. He fought in Operations Cedar Falls and Junction City with distinction. The following year he was appointed commander of the II Field Force, a corps-size formation. In January 1968 he performed exceptionally well during the infamous Tet Offensive. Weyand grew suspicious of the volume of Communist radio traffic he was receiving and convinced General William C. Westmoreland to transfer the bulk of his battalions from the Cambodian border to the Saigon region. The Americans, thus strengthened, were able to quickly recapture the city of

Hue and severely punish the Viet Cong when they emerged.

Weyand departed South Vietnam in August 1968 and proceeded to Paris, France, to serve as the American military adviser during peace talks there. He returned in September 1970 as deputy commander of the Military Assistance Command, Vietnam (MACV), and, in June 1972, he succeeded General Creighton Abrams as commander. Weyand was preoccupied with the dangerous task of winding down the American military presence in Southeast Asia while providing military supplies to the South Vietnamese army. On March 29, 1973, he departed Vietnam to serve as commander in chief, U.S. Army, Pacific, and army chief of staff in October 1974, becoming the first non-West Point graduate to hold that office. In March 1975 President Gerald Ford dispatched him back to Vietnam to assess the mounting crisis, and Weyand advised him that the government there needed drastic American aid if it were to survive the ongoing Communist onslaught. He also personally informed President Nguyen Van Thieu that the United States would not intervene militarily on his behalf. When such aid was not forthcoming from Congress, South Vietnam fell a month later. Weyand concluded his 36-year military career by retiring from active duty in October 1976 as a full general. For the six years he served in South Vietnam, he was regarded as one of America's most capable and experienced combat commanders.

to allow inherently unstable aircraft designs such as the F-117 Nighthawk to fly stable.

February 16

AVIATION: At Fairchild Air Force Base, Washington, Brigadier General Eugene D. Scott becomes the first navigator (nonpilot) to command an aerial unit when he takes charge of the 47th Air Division.

February 23

MARINES: In Washington, D.C., the Department of Defense announces the end of two-year enlistments by the end of the current fiscal year. Afterward, the shortest enlistment term is a three-year hitch.

February 28

MARINES: In the Gulf of Thailand, recent gains by the Communist Khmer Rouge results in the 31st Marine Amphibious Unit (2nd Battalion, 4th Marines and helicopters of HMH-462) being deployed for possible evacuation services.

March

MARINES: In an attempt to identify and possibly rehabilitate drug abusers in the ranks, the Marine Corps resumes urinalysis testing as per a new Department of Defense policy.

March 3

NAVAL: The Navy Department reveals that its strength will slip to 490 ships as of June 30, 1976.

March 5

AVIATION: At March Air Force Base, California, the last T-29 navigation training sortie is performed by students.

MILITARY: Throughout South Vietnam, reconstituted North Vietnamese Army (NVA) units begin an all-out spring offensive in the Central Highlands region.

MARINES: A recent spate of rocket attacks on the national airport in Phnom Penh, Cambodia, forces navy and marine helicopters to begin evacuating American civilians to a helicopter carrier offshore.

March 17

MILITARY: In South Vietnam, ARVN forces abandon the central provinces of Kontum, Pleiku, and Darlac to advancing Communists.

March 18

NAVAL: Word is leaked of a 1974 CIA attempt to raise a sunken Soviet missile submarine with the salvage vessel *Glomar Explorer*. Over \$250 million is spent but only the front third of the Russian vessel is recovered.

March 21

AVIATION: A C-141 Starlifter crashes into the Olympic Mountains, Washington, with no survivors. Given the remoteness of the location, Air Rescue and Recovery Service personnel spend the next four months retrieving bodies and equipment.

March 22

AVIATION: At Kaneohe, Hawaii, helicopters of HMH-463 are ordered on to the carrier *Hancock* for immediate departure for Southeast Asia.

March 25

AVIATION: With Communist forces closing in on Da Nang, South Vietnam, the Military Airlift Command (MAC) becomes the single coordinating body for a massive aerial evacuation of civilians. They evacuate 10,000 people a day for several days.

MILITARY: The ancient capital of Hue, South Vietnam, falls a second and final time to Communist forces.

- U.S. Army Chief of Staff general Frederick C. Weyand arrives in South Vietnam to evaluate the developing military crisis there.

March 27

MILITARY: U.S. Army Chief of Staff general Frederick C. Weyand ventures to Saigon, South Vietnam, for a high-level conference with government officials. He is convinced that the country cannot survive without continuing military assistance from the United States, especially air power.

MARINES: In light of South Vietnam's impending collapse, the Amphibious Evacuation Support Group (1st Battalion, 4th Marines, and helicopters of HMM-165) are ordered to sail from Okinawa to Southeast Asia.

March 29

AVIATION: Air force transports begin emergency airlifts of military supplies and other vital equipment directly into Saigon, South Vietnam.

MARINES: At Da Nang, South Vietnam, the Marine Security Guard begins the seaborne evacuation of American nationals and foreign nationals before the city falls to Communist forces.

March 31

AVIATION: The transport assets of the Pacific Air Forces (PACAF), Alaskan Air Command, and U.S. Air Forces in Europe are all transferred to the Military Airlift Command (MAC). This consolidates all military airlift equipment into a single, unified command.

MILITARY: The conditional amnesty program for draft dodgers initiated by President Gerald R. Ford ends today after only 22,500 men come forth to accept it out of 124,400 eligible.

April 1

DIPLOMACY: One step ahead of the Communist triumph, General Lon Nol departs Phnom Penh, Cambodia, for a new home in Indonesia.

MARINES: At Nha Trang, South Vietnam, the Marine Security Guard is helicoptered to Saigon ahead of Communist forces.

April 2

MARINES: The Military Sealift Command has chartered four civilian merchant ships to evacuate 4,000 South Vietnamese refugees, one vessel is crammed with 16,000 people. Marine security forces are onboard to maintain order.

April 4

AVIATION: A Lockheed C-5A Galaxy transport crashes after takeoff from Saigon, South Vietnam, killing 176 civilian refugees, mostly orphaned children. This accident concludes Operation Baby Lift.

- The air force details several C-130 transports to begin the evacuation of refugees from Phnom Penh before the city falls to Khmer Rouge Communists.

MARINES: In Cam Ranh Bay, South Vietnam, the Amphibious Evacuation Support Group assists thousands of refugees fleeing the Communist onslaught.

April 5

MILITARY: In Cambodia, as Communist Khmer Rouge forces close in on the capital of Phnom Penh, Operation Eagle Pull prepares to evacuate all remaining army personnel and advisers under Brigadier General William Palmer. They will be airlifted out by helicopter.

April 7

MARINES: In the Philippines, the 33rd Marine Amphibious Unit (1st Battalion, 9th Marine and helicopters of HMM-165) are activated for possible deployment in Vietnam.

April 8

MILITARY: In Washington, D.C., U.S. Army Chief of Staff general Frederick C. Weyand informs Congress that the fall of South Vietnam is imminent without major American military assistance. No such assistance is forthcoming.

April 9

MILITARY: Communist forces penetrate the outer defenses of Saigon, South Vietnam, placing them only 37 miles away from the city.

April 10

AVIATION: The B-1A Lancer achieves supersonic flight for the first time.

April 11

NAVAL: The carrier *Hancock* and helicopters of HMH-463 deploy off the Cambodian coast.

April 12

AVIATION: Marine CH-53 Sea Stallion helicopters of HMH-462 and 463 continue Operation Eagle Pull by evacuating a further 287 people from Phnom Penh, Cambodia.

NAVAL: In light of surging Communist Khmer Rouge forces in Cambodia, Operation Eagle Pull continues in the Gulf of Siam to safely evacuate Americans and other nationals from the capital of Phnom Penh. The amphibious assault ship *Okinawa* and the carrier *Hancock* deploy helicopters to remove 276 people, including Ambassador John G. Dean and Cambodian president Saukhm Khoy. A horrid fate awaits those who cannot escape vengeful Khmer Rouge soldiers under the fanatical Pol Pot.

MARINES: As helicopters evacuate Americans and foreign nationals at Phnom Penh, Cambodia, the 2nd Battalion, 4th Marines deploys around the airport under heavy fire to provide security.

April 17

MILITARY: Phnom Penh, capital of Cambodia, falls to communist Khmer Rouge forces under Pol Pot. What follows is a holocaust when one-half of the country's population is slaughtered in what becomes known as the "Killing Fields."

April 18

AVIATION: All Strategic Air Command (SAC) air refueling wings are transferred to the Air Force Reserve and Air National Guard, which are now required to support SAC alert operations.

April 19

AVIATION: Marine Air Group 39 (MAG-39) is activated onboard the command vessel *Blue Ridge* to direct evacuation activities of HMH-462 and 463, HMM-165, HML-367, and HMA-369.

MARINES: The 31st, 33rd, and 35th Marine Amphibious Units are consolidated into the 9th Marine Amphibious Brigade for the purpose of evacuating refugees from South Vietnam.

April 20

NAVAL: The carrier *Hancock* deploys off South Vietnam with helicopters of HMH-463 onboard.

April 21

AVIATION: The B-1A Lancer completes its first successful aerial refueling.

DIPLOMACY: In Saigon, President Thieu makes an emotional televised address in which he resigns from office and also denounces the United States for abandoning the nation.

MARINES: On Guam, the Marine Barracks begins setting up camp facilities for an influx of South Vietnamese refugees.

April 28–October 31

MARINES: At Camp Pendleton, California, Marine Air Group 13 (MAG-13) is tasked with constructing holding facilities for the first wave of an expected 130,000 South Vietnamese refugees.

April 29–30

AVIATION: In Saigon, South Vietnam, as North Vietnamese forces close in upon the capital, Operation Frequent Wind commences as 68 marine and 10 air force helicopters evacuate 6,978 Americans and foreign nationals to the carrier *Midway* offshore. This is the largest such aerial operation in history and lasts 17 hours. Two Marines die when their CH-46 Skyknight and AH-1J Sea Cobra helicopters crash. This is also the combat debut of the F-14A Tomcat jet fighter, which flies top cover throughout the evacuation.

- In Saigon, South Vietnam, Operation New Life commences as C-130s and C-141s of the Military Airlift Command (MAC) pull another 45,000 people from danger, including 5,600 American citizens.

- Aircraft of the South Vietnamese air force, including C-130s, F-5s, and AT-37s are evacuated to bases in Thailand to prevent their capture.

NAVAL: In the South China Sea, the Seventh Fleet's Task Force 76 commences Operation Frequent Wind to evacuate all American military and civilian person-

nel from impending capture by advancing Communist forces, including Ambassador Graham Martin. Vessels of the Military Sealift Command also take on several thousand refugees fleeing the country by sea.

- The conflict in Southeast Asia reaches its ignominious conclusion in a decisive Communist victory. The United States has lost 6,598 officers, 1,276 warrant officers, and 50,274 enlisted men attempting to stem the tide; a total of 58,148.

MARINES: In South Vietnam, Communist forces rocket Tan Son Nhut Airfield in Saigon, killing two marines and destroying a C-130 transport. Meanwhile, the 9th Marine Amphibious Brigade commences Operation Frequent Wind to assist the removal of several thousand refugees to safety.

- The U.S. presence in South Vietnam ends as the last 10 marine security guards depart the American embassy at 8:35 A.M.

April 29–September 16

AVIATION: Operation New Arrivals unfolds as C-130s, C-141s, and commercial airliners transport 121,562 Indochinese refugees to new lives in the United States from staging areas throughout the Pacific.

April 30

MILITARY: Saigon, South Vietnam, falls to Communist forces, completing the conquest and reunification of that nation by force. General Duong Van Minh, who succeeded President Thieu, declares the country's unconditional surrender.

May 2

AVIATION: The Northrop YF-17 prototype is selected by the navy as its new fighter/bomber and it enters service as the F/A-18 Hornet. This remains the tactical mainstay of naval aviation to present times.

May 3

NAVAL: The navy commissions the 81,600-ton *Nimitz*, the nation's second nuclear-powered aircraft carrier. This vessel carries 100 aircraft and has a top speed of 30 knots.

May 7

NAVAL: In a period of cold war thaw, the frigate *Leahy* and destroyer *Tatnall* make a goodwill visit to the Soviet port city of Leningrad (St. Petersburg) while Soviet destroyers *Boykiy* and *Zhguchiy* visit Boston, Massachusetts.

May 12

AVIATION: In response to the Khmer Rouge seizure of the SS *Mayaguez*, transports of the Military Airlift Command (MAC) carry Marines and their equipment from the Philippines and Okinawa to Thailand.

NAVAL: In the Gulf of Thailand, Communist Khmer Rouge forces capture the U.S. merchant vessel SS *Mayaguez*. President Gerald R. Ford warns them to release the vessel and its 40-man crew immediately or face the consequences.

May 14–15

AVIATION: Eight helicopters of the 3rd Aerospace Rescue and Recovery Group and the 21st Special Operations Squadron transport 230 Marines to Kho Tang Island to look for the SS *Mayaguez* crew. Instead, they encounter strong resistance from dug-in Khmer Rouge forces, who shoot down three helicopters and

damage two more. The marines are pinned by heavy fire until assisted by air force A-7s, F-4s, OV-10s, and AC-130s, then they are successfully extracted. Several Air Force Crosses are awarded for heroism and Major Robert W. Undorf also win a Mackay Trophy.

NAVAL: President Gerald R. Ford orders air, sea, and land elements into action to rescue the American cargo vessel SS *Mayaguez* after it is captured by Khmer Rouge guerrillas off Cambodia. Military operations are supported by carrier aircraft launched from the *Coral Sea* and the vessel itself is towed to freedom by the destroyer *Harold E. Holt*. Congress and the American people laud the action as a blow against international piracy.

MARINES: Company D, 1st Battalion, 4th Marines, swings into action and boards the SS *Mayaguez*, since abandoned by Khmer Rouge forces, and it is quickly secured. Meanwhile, air force helicopters drop elements of the 2nd Battalion, 9th Marines on nearby Koh Tang Island to look for the crew and a stiff firefight ensues. The captives are not on the island, but they are subsequently released and rejoin the *Mayaguez* by fishing boat. American losses are three helicopters downed, 15 men killed, 50 wounded, and three missing.

May 29

MARINES: Sergeant Major Henry H. Black becomes the seventh sergeant major of the Marine Corps.

June 5

NAVAL: At Suez, Egypt, the guided cruiser *Little Rock* is the first foreign vessel to transit through the Suez Canal once that waterway has been cleared of mines and other obstructions.

The Vietnam War saw the introduction of the gunship, modified C-47s and C-130s, capable of pouring concentrated fire onto ground positions. Pictured is an AC-130. (U.S. Air Force)

June 6

AVIATION: At U-Tapao, Thailand, the final 16 B-52 Stratofortresses begin redeploying back to the United States.

June 15

AVIATION: In Thailand, the final F-111 departs for a new billet back in the United States.

June 17

AVIATION: In Montana, helicopters from the 37th Air and Rescue Squadron save 131 victims of heavy flooding throughout that state.

June 30

MARINES: In Washington, D.C., General Louis H. Wilson, Jr., who won a Medal of Honor on Guam in 1944, gains appointment as the 26th commandant of the Marine Corps.

July 1

AVIATION: Air National Guard KC-135s begin supporting Strategic Air Command (SAC) operations for the first time. The ANG and Air Force Reserve continue transitioning to jet tankers over the next four years.

July 15–24

AVIATION: Three American astronauts rendezvous with two Soviet cosmonauts and link up with their *Soyuz* spacecraft. The combined crews carry out a number of scientific experiments before returning safely to Earth.

July 31

AVIATION: After 18 years of useful service, the Air National Guard (ANG) retires its last F-104 Starfighters.

August 1

NAVAL: At Annapolis, Maryland, Rear Admiral Kinnaird R. McKee is appointed the 48th superintendent of the U.S. Naval Academy.

August 5

MILITARY: In Washington, D.C., Martin R. Hoffman becomes the 12th secretary of the army. His main preoccupation will be rebuilding the military in the wake of Vietnam.

August 7

AVIATION: At Ramstein Air Base, West Germany, two C-141 Starlifters depart for Bucharest, Romania, to assist victims of extensive flooding along the Danube River.

August 8–15

AVIATION: In California, C-130 transports of the Air Force Reserve and Air National Guard drop 1,400 tons of retardant on several forest fires.

August 23

MILITARY: The Communist Pathet Lao completes the conquest of Laos; all the states of Indochina are now ruled by Communist dictatorships.

August 27

MILITARY: Governor James Rhodes of Ohio and 27 National Guardsmen are cleared of all charges stemming from the shooting of 13 students at Kent State University in May 1970.

September 1

AVIATION: Major General Daniel “Chappie” James is promoted to full general, becoming the first African-American officer to wear four stars.

September 20

NAVAL: At Pascagoula, Mississippi, the new 7,50-ton destroyer *Spruance* is commissioned, being the navy’s first class of warships powered by a gas turbine; no less than 30 ships are built.

October

MARINES: Marine detachments conduct amphibious operations along the coast of northern Germany as part of the NATO Exercise Autumn Forge. This is the first time marines have trained in Germany since 1918.

October 7

MILITARY: In Washington, D.C., President Gerald R. Ford signs legislation that allows women to enroll at all four service academies and receive regular commissions.

October 8

MILITARY: The army declares that, commencing next year, the U.S. Military Academy will accept applications from women.

October 22

MILITARY: Sergeant Leonard Matlovich is discharged from the military after revealing his homosexuality. His discharge is subsequently upgraded to honorable, owing to his status as a decorated Vietnam veteran.

October 29

AVIATION: At Nellis Air Force Base, Nevada, the air force accepts delivery of the first Northrop F-5E Tiger II jet fighter. It is destined to play a central role in future “Red Flag” pilot training maneuvers.

October 31

AVIATION: The revolutionary Boeing E-3A Sentry, an advanced aerial command and control center, performs its maiden flight.

November

AVIATION: The air force reveals the existence of its Have Blue Project, which is developing the first radar-resistant, or stealth, warplane.

November 10

MARINES: The Marine Corps celebrates the 200th anniversary of the founding of the Continental Marines in 1775.

November 20

MILITARY: In Washington, D.C., Donald H. Rumsfeld is appointed the 13th secretary of defense.

November 22

NAVAL: During night maneuvers in the Mediterranean, the guided missile frigate *Belknap* collides with the carrier *John F. Kennedy*; the frigate loses seven killed and 47 injured while the carrier has one sailor missing.

November 29

AVIATION: Stung by the mediocre results of air force crewmen during Vietnam era dogfights, the first new Red Flag training program is unveiled at Nellis Air Force Base, Nevada. Its purpose is to provide realistic air-to-air combat training for prospective fighter pilots. They are pitted against crack instructor crews whose F-5E Tiger IIs closely mimic Soviet-style tactics and aircraft. The program runs annually today and has trained over 500,000 pilots from all four services and 23 allied nations.

December 6

AVIATION: In light of tactical lessons learn in Vietnam, the new F-4G Wild Weasel aircraft performs its maiden flight. The air force acquires 116 such aircraft for the express purpose of surface-to-air missile (SAM) suppression.

**James, Daniel (1920–1978)**

Air Force general

Daniel James was born in Pensacola, Florida, on February 11, 1920, the youngest of 17 children. His mother, a schoolteacher, imbued in him an abiding sense that excellence could surmount any obstacle, including racial hostility. James was fascinated by airplanes at Pensacola Naval Air Station but, because the navy did not allow African Americans to serve as pilots, he attended the Tuskegee Institute from 1937 to 1942, then earned his wings through the Civilian Pilot Training Program. During World War II James flew P-40s and P-51s with the famed Tuskegee Airmen under Colonel Benjamin O. Davis. In April 1945 he was arrested by participating in one of the first civil rights sit-ins at Freeman Field, Indiana, where he met and befriended the great civil rights attorney Thurgood Marshall, a future Supreme Court justice. The armed forces were ordered integrated by President

Harry S. Truman in 1947, and James continued advancing due to his determination and skill as a leader. During the Korean War he flew over 100 missions as head of the 12th Fighter Bomber Squadron, then reported to Otis Air Force Base, Massachusetts, to command the 58th Fighter Interceptor Squadron. Dynamic and gregarious, James's outsized personality and community activism led to an award as Outstanding Man of the Year by the Massachusetts Junior Chamber of Commerce. During the Vietnam War James commanded the Eighth Tactical Fighter Wing, operating out of Udon, Thailand, and he flew an additional 78 combat missions in F-4 Phantom II jet fighters. On January 2, 1967, he led the "Bolo MiG-Sweep" over North Vietnam, which accounted for seven MiG-21s, the highest total of enemy aircraft claimed in a single day.

1976

JANUARY: Army personnel stands at 779,412 officers and men arrayed in 16 active divisions. The service still grapples with problems arising from apathy, drug use, and lingering racism.

January 9

AVIATION: At Langley Air Force Base, Virginia, the first McDonnell Douglas F-15 Eagle air superiority fighter arrives to join the 1st Tactical Fighter Wing. This is the first jet fighter in history to possess greater thrust than its overall weight, allowing it to literally climb straight up.

January 19

AVIATION: At Nellis Air Force Base, Nevada, the 180th Tactical Fighter Group is the first Air National Guard unit to cycle through the Red Flag program.

January 31

AVIATION: At Udorn Air Base, Thailand, the air force prepares to turn all its facilities over to the Royal Thai Air Force as the Americans continue pulling out of Southeast Asia. The Americans have run the facility since October 1964.

James returned home in 1967 and used his oratorical skills and commanding persona to rigorously defend the Vietnam War against political opponents. In 1969 he took command of Wheelus Air Force Base, Libya, and he handled the withdrawal of American forces there with diplomacy and tact. He then served at the Pentagon and Military Airlift Command (MAC), rising successively to brigadier general in 1970, major general in 1972, and lieutenant general in 1973. On September 1, 1975, James made history by becoming the first African American of any service branch to reach four-star rank. He assumed command of the North American Air Defense Command (NORAD), which was responsible for defending the United States against a surprise nuclear attack from the Soviet Union. As such, he was the only other person, besides the president of the United States, who could authorize a nuclear strike. "Chappie" James concluded 35 years of distinguished service by retiring in Febru-

Daniel James meets with two government officials in the Pentagon. (U.S. Army)

ary 1978. Unfortunately, he died of a heart attack in Colorado Springs, Colorado, on February 25, 1978, prior to delivering one of his trademark speeches about individualism and personal doggedness. The F4C Phantom II he flew in Vietnam presently stands guard outside Tuskegee University, Alabama.

February 5–March 3

AVIATION: A devastating earthquake in Guatemala leads to Project Earthquake, during which Military Airlift Command (MAC) transports deliver 1,000 tons of food and medical supplies, along with 700 personnel, to the region.

February 12

NAVAL: Captain Fran McKee is the first female naval officer selected for promotion to rear admiral.

March 1

AVIATION: On Taiwan, the U.S. Air Force ceases all operations at Taipei Air Station, concluding a two-decade presence there.

March 5

AVIATION: The United States tests its new long-range Air Launch Cruise Missile (ALCM), which gives added punch and penetration power to its aging fleet of jet bombers.

March 13

MARINES: After a mentally deficient recruit dies of injuries received in a late 1975 pugil stick bout, Congress opens an investigation into marine recruit training.

March 15

AVIATION: A Titan IIIC rocket launcher hurls *Les-8* and *Les-9*, two nuclear-powered communications satellites, into Earth orbit.

March 22

AVIATION: The Fairchild/Republic A-10 begins its operational and test evaluations at Davis Monthan Air Force Base, Arizona. Though straight-winged, this aircraft is both heavily armed and armored for a close support role, and it sports a tank-killing 30mm GAU gatling gun in the nose firing heavy, depleted uranium rounds.

- The Strategic Air Command (SAC) ends its presence in Southeast Asia by withdrawing the final U-2 aircraft from U-Tapao Air Field, Thailand.

March 22–June 9

AVIATION: After destructive typhoons ravage Guam and the Philippines, C-130s, C-141s, and C-5As of the Military Airlift Command (MAC) arrive to provide relief and rescue over 700 survivors.

March 26

AVIATION: At Edwards Air Force Base, California, the NASA Flight Research Center is renamed after the agency's former deputy administrator, Hugh L. Dryden.

March 28

AVIATION: Off the California coast, an A-6 Intruder fires the first Tomahawk cruise missile. This is a second-generation guided missile with an extremely accurate terrain-following radar.

April 1

AVIATION: At RAF Alconbury, England, the 527th Tactical Fighter Aggressor Squadron is activated by U.S. Air Force in Europe (USAFE) to provide fighter and reconnaissance pilots with advanced training.

April 2

AVIATION: The last Douglas C-118A Liftmaster is flown to the “bone yard” at Davis Monthan Air Force Base for storage and ultimate disposal.

April 28–May 15

AVIATION: At Twenthe Air Base, the Netherlands, air crews from the U.S. Air Force in Europe (USAFE) participate in the first Allied Air Forces Central Europe Tactical Weapons meet.

May 6–June 5

AVIATION: At Aviano Air Base, Italy, air force personnel are called upon to assist the victims of destructive earthquakes that struck the Friuli region to the northeast.

May 7

MILITARY: At South Dakota State University, Martha Hahn becomes the first female lieutenant commissioned through ROTC. The ceremony is conducted by General William E. DuPuy, head of U.S. Army Training and Doctrine Command (TRADOC), who is also an alumnus of South Dakota State, class of 1941.

May 13–June 9

AVIATION: In the wake of Typhoons Olga and Pamela, which ravaged portions of Guam and the Philippine Islands, Air Rescue and Recovery helicopters are called into save 734 survivors. Military Airlift Command (MAC) transports also fly in 2,652 tons of relief and medical supplies.

May 21

AVIATION: The new Surface-to-Air Missile D, which has been in development since the 1960s, enters the service as the Patriot.

May 29

NAVAL: The navy commissions the *Tarawa*, the first multipurpose helicopter assault ship with a flight deck for handling helicopters and new AV-8A Harrier jump jets. It can also carry 1,900 fully equipped marines.

June 5

AVIATION: Over the White Sands Missile Range, New Mexico, an A-6 Intruder successfully launches a fully guided Tomahawk cruise missile for the first time. This remains a standard offensive weapon in navy arsenals today.

June 7–24

AVIATION: In South Korea, Operation Team Spirit unfolds over the next three weeks in a major test of that nation’s tactical air control system. Several bases are involved in what becomes one of the largest such tactical exercises in the world.

June 20

NAVAL: In Beirut, Lebanon, elements of the Sixth Fleet evacuate civilians and foreign nationals in the wake of factional violence.

June 27

AVIATION: At Vandenberg Air Force Base, California, a Titan II intercontinental ballistic missile (ICBM) is launched for the first time with a universal space guidance system in place.

June 28

AVIATION: In Colorado Springs, Colorado, the first woman cadet, Joan Olsen, is admitted to the U.S. Air Force Academy.

July 1

MILITARY: In Washington, D.C., the National Air and Space Museum, Smithsonian Institution, is opened to the public. It hosts over 20 million visitors in only two years, a benchmark making it the most visited museum in the world.

- At Fort Monroe, Virginia, the new Field Manual FM-100-5 is issued at the behest of General William E. DuPuy, the head of TRADOC. Unlike earlier editions, the new version emphasizes aggressive, small unit tactics coupled with rigorous training and heavy fire power. The new tactics are specifically designed to wear down numerically superior Warsaw Pact units in a European conflict. This is also the conceptual beginning of the “AirLand Battle,” which closely integrates air power and ground forces to overpower an enemy.

July 7

MILITARY: At the U.S. Military Academy, West Point, New York, the first female cadets are enrolled in the class of 1980. Ultimately, 119 are accepted.

July 12

MILITARY: In Washington, D.C., Secretary of the Army Martin R. Hoffman overturns an earlier decision to eliminate the Chemical Corps after learning that the Soviet Union is placing renewed emphasis on chemical and biological warfare.

July 15

AVIATION: At Mather Air Force Base, California, U.S. Navy and Marine Corps navigators report for training alongside their U.S. Air Force counterparts. This is the first time such instruction has been consolidated for all three services.

July 20

AVIATION: The *Viking 1* probe makes a soft landing on Mars and beams back the first televised images from the Red Planet. This is also the seventh anniversary of man’s first walk on the moon.

July 27

NAVAL: Off Beirut, Lebanon, the amphibious transport dock *Coronado* evacuates 160 Americans and 148 foreign nationals during a period of civil war. The operation is covered by jets from the carriers *America* and *Nimitz*.

MARINES: Civil war in Beirut, Lebanon, prompts the 32nd Marine Amphibious Unit to go ashore to rescue American citizens.

July 27–28

AVIATION: Over Edwards Air Force Base, California, an SR-71 Blackbird flown by Majors Adolphus Bledsoe and John T. Fuller establishes three world records: an absolute speed record of 2,092 miles per hour with a 2,200 pound payload, an absolute jet speed record of 2,193 miles per hour over a 15–25 kilometer course, and an absolute sustained altitude in level flight of 85,069 feet.

July 28

AVIATION: A Lockheed SR-71 Blackbird flown by Captain Eldon W. Joersz and Major George T. Morgan sets new speed and altitude records of 2,193 miles per

hour at 85,069 feet over a 15–25 kilometer straight course. Another Blackbird flown by Captain Robert C. Helt and Major Lang A. Elliot reaches an altitude of 85,069 feet, both absolute and jet records for altitude in horizontal flight.

August 1–2

AVIATION: In Big Thompson Canyon, Colorado, two air force UH-1 helicopters are dispatched to save 81 people stranded by flash floods.

August 18

MILITARY: At Panmunjom, Korea, Captain Arthur Bonifas and Lieutenant Mark Barrett are attacked and killed by North Koreans as they prune a tree obstructing surveillance of the Demilitarized Zone (DMZ) between North and South Korea. Four other soldiers are injured in the fracas and American forces are placed on full alert in consequence.

August 20

AVIATION: Following the murder of two American officers by North Koreans, C-5A Galaxy and C-141 Starlifter transports convey air and ground crewmen to various air bases throughout South Korea.

August 21

MILITARY: Operation Paul Bunyon, a show of force that includes fully armed soldiers, helicopter gunships, and B-52 bombers, unfolds as American soldiers return to the Demilitarized Zone (DMZ) in South Korea, and prune several trees under North Korean noses. The late Arthur Bonifas is also posthumously promoted to major and the UN compound at Panmunjom is renamed Camp Bonifas.

August 23

MILITARY: In Washington, D.C., Secretary of the Army Martin R. Hoffman announces that the 149 West Point cadets implicated in a cheating scandal can regain admittance following a one-year probationary period for “reflection.” The decision is criticized by several ranking officers, including Brigadier General Walter R. Ulmer, the academy commandant.

August 28

NAVAL: In the Ionian Sea, the frigate *Voge* collides with a Soviet Echo II guided-missile submarine, with both vessels suffering damage.

September 1

MARINES: The old sateen (green) uniform gives way to a new, camouflage utility design.

September 6

AVIATION: On Hokkaido, Japan, Soviet pilot Lieutenant Vicktor Belenko defects with his top-secret MiG-25 Foxbat fighter; the craft is closely examined by air force authorities before being returned to the Russians on November 15. The craft provides valuable insights into Soviet aircraft construction and electronics, which prove to be a deft combination of brilliant and primitive.

September 9

AVIATION: At the White Sands Missile Range, New Mexico, testing of the new air-launched cruise missile (ALCM) begins as it guides itself along preset coordinates.

September 14

NAVAL: In the Atlantic Ocean north of Scotland, the carrier *John F. Kennedy* and the destroyer *Bordelon* collide; the latter loses six killed and is damaged beyond repair. This is the *Kennedy's* second major accident in only 10 months.

September 16

DIPLOMACY: Eniwetok Atoll, site of the first American hydrogen bomb detonation, is returned to the original inhabitants after several decades of cleaning up residue radioactivity.

September 29

AVIATION: Another gender barrier falls at Williams Air Force Base, Arizona, when 10 women enter undergraduate pilot training for the first time since World War II.

September 30

NAVAL: The navy decommissions the *Oriskany*, the last-surviving *Essex*-class carrier and a veteran of the Korean War and the Vietnam War.

October 1

MILITARY: In Washington, D.C., General Bernard W. Rogers gains appointment as the 28th army chief of staff. He is also the last World War II veteran to hold this position.

October 7

NAVAL: In a new organization scheme, the 12 Navy Commands in the continental United States are consolidated into only four, with headquarters at Seattle, Washington; Great Lakes, Illinois; Philadelphia, Pennsylvania; and Washington, D.C.

November 13

NAVAL: The navy commissions the *Los Angeles*, the first in an entirely new generation of nuclear attack submarines. With a length of 360 feet and a submerged speed of 30 knots, these are the largest vessels of their class ever built. Moreover, they are armed with Tomahawk, Sub-Harpoon, and SUBROC missiles.

November 23

MILITARY: At Fort Rucker, Alabama, the Silver Eagles precision-flying helicopter team is disbanded for budgetary reasons. In their four-year existence, they operated OH-6A Cayuse and OH-58A Kiowa helicopters.

November 29

AVIATION: After an earthquake devastates parts of Turkey, C-141 Starlifters of the Military Airlift Command (MAC) begin flying in medical and relief supplies to Incirlik Air Base, Turkey.

December 8

AVIATION: At Fort Worth, Texas, the first production General Dynamics F-16 Fighting Falcon successfully performs its maiden flight.

December 15

MILITARY: The Borman Commission, headed by former astronaut Frank Borman, releases its final report relative to the West Point cheating scandal. Its several recommendations include allowing accused students to be readmitted, halting

further investigations, and placing greater emphasis on the Cadet Honor Code. The army accepts most of these recommendations.

December 19

AVIATION: The new KH-11 Kennan reconnaissance satellite is launched, being the first capable of relaying real-time, digitally enhanced images back to Earth.

1977

January 1

AVIATION: At Holloman Air Force Base, New Mexico, the 479th Tactical Training Wing is formed with three squadrons of Northrop T-38 Talon aircraft. These have been modified to carry gunsights and practice bomb dispensers. The 479th also constitutes the backbone of the Fighter Lead-in School for future combat pilots.

MILITARY: At Arlington Hall, Virginia, army intelligence activities are consolidated through creation of the new U.S. Army Intelligence and Security Command (INSCOM) under Brigadier General William I. Rolya.

January 8

AVIATION: At Marietta, Georgia, Lockheed unveils the first stretched YC-141B Starlifter, which is 23 feet longer than the original model and, being equipped with an aerial fueling receptacle, has both increased cargo capacity and unlimited range.

January 10

AVIATION: In Washington, D.C., Chief of Naval Operations admiral Arleigh Burke receives the Medal of Freedom, the nation's highest civilian decoration.

January 16

NAVAL: In Barcelona, Spain, the amphibious transport dock *Trenton* collides with the Spanish merchant vessel *Urlea*, killing 49 sailors and marines.

January 18

AVIATION: Off Cape Canaveral, Florida, the new C-4 Trident ballistic missile is successfully test-launched for the first time. These large weapons, possessing a range of 4,350 miles, are designed for the new *Ohio*-class ballistic submarines, which are due to arrive soon.

January 20

MILITARY: In Washington, D.C. Jimmy Carter is sworn in as the 39th president and commander in chief.

January 21

MILITARY: President Jimmy Carter grants unconditional amnesty to all remaining draft dodgers from the Vietnam War. An estimated 13,000 are still residing in Canada.

January 31–February 11

AVIATION: In the wake of a massive winter storm that blankets and paralyzes much of western New York and Pennsylvania, transports of the Military Airlift Command (MAC) deliver 1,160 tons of snow removal equipment and 495 operating personnel to Buffalo and Pittsburgh.

February 14

MILITARY: In Washington, D.C., Clifford Irving becomes the first African American appointed as the 13th secretary of the army.

NAVAL: W. Graham Clayton, Jr., gains appointment as the 63rd secretary of the navy.

February 18

AVIATION: The space shuttle *Enterprise* makes its first captive flight atop a specially modified Boeing 747.

March 1

AVIATION: At RAF Lakenheath, England, the 48th Tactical Fighter Wing receives its first F-111F strike fighters.

March 9

MILITARY: President Jimmy Carter declares that all U.S. military personnel will be withdrawn from South Korea within five years.

March 10

AVIATION: Another gender barrier falls when the first women navigator candidates arrive at Mather Air Force Base, California, for undergraduate navigation instruction.

March 17

MARINES: In Barcelona Harbor, Spain, a merchant vessel strikes a landing craft carrying a liberty party from the 34th Marine Amphibious Unit; 24 marines and 25 sailors are drowned.

March 23

AVIATION: At Tinker Air Force Base, Oklahoma, the first Boeing E-3A Sentinel is deployed with the Tactical Air Command (TAC). This highly sophisticated aircraft is instantly recognizable due to the large rotating antenna disc on the top of its fuselage. Thus, the U.S. Air Force initiates a revolution in command and combat functions by air fielding the first fleet of Airborne Warning and Control System (AWACS), which can monitor and direct several warplanes in combat simultaneously.

March 24

AVIATION: The stretched YC-141B Starlifter performs its maiden flight for the first time.

March 26–April 11

AVIATION: In South Korea, Exercise Team Spirit '77 involves 548 air force, navy, and Marine Corps aircraft, which fly a total of 6,400 sorties.

March 27–30

AVIATION: The worst aviation disaster in aviation history occurs when two Boeing 747 Jumbojets from Pan Am and KLM collide on Tenerife, Canary Islands, killing 500 people. Air force C-130s are immediately dispatched to the scene with medical personnel and equipment and fly crash victims to nearby Las Palmas, where C-141 Starlifters take them to the United States for treatment.

March 31

MARINES: Sergeant Major John R. Massaro becomes the eighth Sergeant Major of the Marine Corps.

April 14

AVIATION: A pair of Soviet Tu-95 Bear maritime reconnaissance aircraft suddenly appear on the radar scopes off Charleston, South Carolina, then slip below radar coverage and reappear off Jacksonville, Florida. No serious harm results other than a major embarrassment to air force air defenses.

April 28

MILITARY: Christopher J. Boyce and Andrew Lee are convicted of selling the Soviets top-secret American satellite information; Boyce is sentenced to 40 years in jail, Lee to life.

May

AVIATION: In Colorado, the U.S. Air Force Academy selects the DeHaviland DHC-6 Twin Otter for its parachute jump program. It receives the new designation UV-18B and operates from nearby Peterson Air Force Base.

May 2

AVIATION: A major gender barrier falls as Lieutenant Christine E. Schott becomes the first female undergraduate pilot to solo in a T-38 Talon jet training aircraft.

May 17

MARINES: In the Washington Navy Yard, D.C., the Marine Corps Historical Center opens for research.

May 19

AVIATION: A B-52 bomber flown by instructor pilot Captain James A. Yule experiences a severe inflight emergency, but Yule manages to keep his craft flying and lands safely. He wins a Mackay Trophy for his achievement.

May 26

MARINES: Males and females graduate from the Marine Corps Basic School for the first time.

June 10

MILITARY: In Washington, D.C., Secretary of the Army Clifford Alexander restores to Dr. Mary Walker her Medal of Honor, which she received for distinguished service during the Civil War. It was rescinded in 1917 in an attempt to correct errors in the issuance of medals. Walker remains the only female recipient.

June 19

AVIATION: A C-5A Galaxy flown by Captain David M. Sprinkel of the 436th Military Airlift Wing lands at Sheremetyevo Airport in Moscow, Soviet Union, bringing a huge, superconducting electromagnet and supporting equipment in a scientific energy research exchange. The 5,124-mile flight originated in Chicago, Illinois, and required two in-flight refuelings to complete. Sprinkel's crew wins a Mackay Trophy for their efforts.

June 30

AVIATION: Fulfilling a campaign promise, President Jimmy Carter cancels production of the new Rockwell B-1A strategic jet bomber, although he allows four prototypes to continue flying for testing purposes.

MARINES: Headquarters Marine Corps abolishes the director of women marines as female marines no longer exist as a separate category.

- At this point in the cold war, marine manpower levels are 18,650 officers and 176,057 enlisted men.

July 12

MILITARY: In Washington, D.C., President Jimmy Carter requests funding to build enhanced radiation weapons, the so-called neutron bomb, which features a lower yield and smaller blast results. The weapon is slated for deployment with Lance missiles and 155mm howitzer units, but it goes no further than the developmental stage.

July 14

AVIATION: Along the Demilitarized Zone (DMZ), South Korea, an army CH-47 Chinook transport helicopter strays into North Korean airspace and is shot down. Three Americans are killed and one wounded; all are returned to Panmunjom within days.

August 3

AVIATION: At Colorado Springs, Colorado, Cadet Colonel Edward A. Rice becomes the first African American to serve as cadet wing commander, the highest cadet leadership position on campus.

August 4

AVIATION: At Davis Monthan Air Force Base, the last operational Lockheed T-33 jet trainer, the beloved "T-Bird," flies in for a rendezvous with the Bone Yard.

August 12

AVIATION: At Edwards Air Force Base, California, the Space Shuttle *Enterprise* is released from a specially modified Boeing 747 and successfully performs its first unpowered glide flight from 22,800 feet. It is flown by two air force veterans, Fred Haise and C. Gordon Fullerton, whose landing is observed by a crowd estimated at 80,000 people.

August 15

AVIATION: Over California, two C-130B Hercules aircraft make a total of 38 fire-retardant drops on several major forest fires.

September 1

AVIATION: At Kaneohe, Hawaii, HMM-265 is reactivated after seven years in hiatus.

September 2

AVIATION: Another gender barrier falls when the first female air force pilots receive their wings at Williams Air Force Base.

September 3

AVIATION: The air force incinerates its last remaining stocks of the defoliant Agent Orange at sea, west of Johnson Island in the Pacific. This substance has been implicated in outbreaks of cancer associated among those working with it.

September 7

DIPLOMACY: In Washington, D.C., President Jimmy Carter and Panamanian strongman Omar Torrijos conclude a treaty that will turn over the Panama Canal zone to Panama by 2000. A second agreement insures the neutrality of the canal zone in the event of war.

September 28

MILITARY: At Fort McClellan, Alabama, the Women's Army Corps graduates its last class of 129 attendees of the Officers Orientation Course.

September 30

AVIATION: At Charleston, South Carolina, a C-141 Starlifter takes off without navigation equipment and flies directly to the Rota Naval Air Station, Spain, using a Delco internal navigation system.

October 1

AVIATION: At Howard Air Force Base, Panama Canal Zone, Operation Volant Oak commences as Air Force Reserve and Air National Guard C-130 aircraft and crews begin quarterly deployments.

October 12

AVIATION: At Mather Air Force Base, the first five women graduates from undergraduate navigator training (UNT); three of the women end up with the Military Airlift Command (MAC).

October 21

AVIATION: Over Mindoro Island, the Philippines, a marine CH-53D helicopter crashes, killing 23 marines and injuring 13.

November 17

MARINES: At Camp Pendleton, California, the 1st Battalion, 4th Marines arrives as part of a new unit deployment plan (UDP) that rotates units to the Far East for six months to maintain unit cohesion and hone combat skills.

November 18

MILITARY: At the White Sands Missile Range, New Mexico, the first flight tests of the new Pershing II ballistic missile are successfully conducted. This new battlefield nuclear weapon is designed to counter a threat posed by the Soviet SS-20 missile.

November 21

MILITARY: At Fort Bragg, North Carolina, the 1st Special Forces Operational Detachment-Delta (1st SFOD-D) is created under Colonel Charles "Chargin' Charlie" Beckwith. In contrast to existing Special Forces, which are largely instructional and reconnaissance units, Delta Force is a counterterrorist unit specializing in hostage rescues. Its field operations remain highly classified and the army continues to disavow its existence.

November 30

AVIATION: In Japan, the air force returns control of Tachikawa Air Base to the government for the first time since 1945.

December 6

AVIATION: At Hahn Air Base, West Germany, the first contingency launch and recovery airfields are constructed as part of the overall survivability program instituted by the U.S. Air Force in Europe (USAFE).

December 17

NAVAL: The navy commissions the frigate *Oliver Hazard Perry*, the first of 51 vessels comprising this class.

December 20

MILITARY: In Washington, D.C., Secretary of the Army Clifford Alexander announces that while many positions within the army are open to women, they remain excluded from combat arms, including infantry, armor, engineers, and air-defense units.

1978

January

AVIATION: A C-141 Starlifter is dispatched by the Military Airlift Command (MAC) to Alberta, Canada, with Department of Energy personnel and equipment after a nuclear-powered Soviet satellite breaks up over the Canadian wilderness.

MILITARY: After the Midwest and Northeast are struck by a massive blizzard that dumps 30 inches of snow, thousands of National Guard, reservists, and regular army troops are mobilized to assist stranded civilians.

January 24

AVIATION: In their first operational deployment to the Western Pacific, eight F-15 Eagles fly from Langley Air Force Base, Virginia, to Osan Air Base, South Korea.

MILITARY: The 761st Tank Battalion, comprised mostly of African Americans, receives a Presidential Unit Citation, 33 years after World War II. It fought exceptionally well during the dash across northern France in 1944.

February 1

AVIATION: Off the California coast, a Tomahawk missile is successfully fired underwater for the first time by the submarine *Barb*.

February 8–17

AVIATION: Operation Snow Blow II unfolds as air force C-5As, C-130s, and C-141s convey over 2,300 tons of snow-removal equipment and over 1,000 passengers to heavily hit parts of southern New England.

February 9

AVIATION: The navy initiates the revolutionary Fleet Satellite Communications System, which provides improved command and control functions for the fleet, anywhere in the world.

MILITARY: The army adopts a new kelvar helmet, strongly reminiscent of the German helmets of World Wars I and II, to replace the old M1 “steelpot.” New and more effective kelvar body armor is also taken into service.

February 22

AVIATION: An Atlas F booster rocket hurls NAVSTAR 1 (Navigation System with Timing and Range), the first Global Positioning System (GPS), into Earth orbit. This is the first of 24 such devices intended to revolutionize both navigation and weapons accuracy. The final element does not reach space until 1994.

February 25–26

AVIATION: A C-141 Starlifter is dispatched by the Military Airlift Command to convey 12 burn specialists from Newark, New Jersey, to Waverly, Tennessee, following a propane-filled railway tank car explosion.

March 11

NAVAL: A navy milestone is reached when the fleet ballistic submarine *Abraham Lincoln* becomes the first vessel of its class to complete 50 operational patrols. This translates into 8½ years submerged and a distance of 420,000 miles.

March 19

AVIATION: The U.S. Air Force in Europe (USAFE) arranges for air force F-15 Eagles and navy F-14 Tomcats to begin joint training operations against each other.

March 23

AVIATION: Captain Sandra M. Scott becomes the first female tanker aircraft commander to conduct KC-135 refueling operations for the Strategic Air Command (SAC).

April 7

MILITARY: President Jimmy Carter decides to postpone development of the so-called neutron bomb, which utilizes high radiation bursts to kill people while inflicting relatively little damage on property or surroundings.

April 9–11

MARINES: At Twenty-Nine Palms, California, the 5th Marine Amphibious Brigade wages Palm Tree 5-78, a live-fire exercise involving 6,000 troops. This is the largest maneuver of its kind held at Twenty-Nine Palms.

May 6

MARINES: At Quantico, Virginia, the Marine Corps Aviation Museum is opened at Brown Field.

May 11

MARINES: Colonel Margaret A. Brewer becomes the first female marine to reach the grade of brigadier general.

May 20–23

AVIATION: Two C-5A Galaxies piloted by Captains Robert F. Schultz and Todd H. Hohberger endure crew fatigue and other hardships while conveying French and Belgian troops to Africa during Operation Zaire I. Once there they help evacuate European citizens threatened by a revolt by Katanga rebels. For their actions, Schultz and Hohberger win the Mackay Trophy.

May 31–June 16

AVIATION: Continuing strife in Zaire results in Operation Zaire II, during which Air Force transports convey 1,600 tons of supplies and 1,225 peacekeeping troops in 72 sorties.

July 1

NAVAL: In Washington, D.C., Admiral Thomas B. Hayward gains appointment as the 21st chief of naval operations.

July 6

MARINES: At Camp Lejeune, North Carolina, Force Troops are renamed the 2nd Force Service Support Group; Force Troops at Camp Pendleton, California, and on Okinawa are also redesignated.

July 12

AVIATION: The last Boeing KC-97L Stratofreighter is dropped from the air force inventory following a quarter century of distinguished service.

July 27

AVIATION: At Bentwaters/Woodbridge RAF air bases, England, the 81st Tactical Fighter Wing deploys, bringing with them the first operational Fairchild/Republic A-10 Thunderbolt IIs. This aircraft is covered by so many protuberances that it acquires the affectionate name "Warthog."

August 14–16

AVIATION: In Khartoum, Sudan, air force C-141s arrive with 26 tons of food and medical supplies for victims of recent flooding.

August 17

AVIATION: At Fort Worth, Texas, the first production model General Dynamics F-16 Fighting Falcon is delivered to air force authorities.

NAVAL: After President Jimmy Carter vetoes a defense appropriations bill that included funding for a new carrier that he felt was unnecessary, Admiral James L. Holloway III testifies before Congress and convinces them to override Carter's veto.

August 18

AVIATION: At McConnell Air Force Base, Kansas, Airman First Class Tina M. Ponzer becomes the first female to perform missile maintenance with the 381st Strategic Missile Wing.

August 21

MARINES: At Twenty-Nine Palms, California, 2,000 reserve marines join the first Combined Arms Exercise (CAX), a challenging, air-ground live-fire operation that becomes a fixture of modern Marine Corps training.

August 24

AVIATION: Tragedy strikes the 381st Strategic Missile Wing at McConnell Air Force Base, Kansas, when escaping oxidizer from a Titan II launch complex kills two people and damages a silo.

- At RAF Bentwaters/Woodbridge, the first three A-10 Thunderbolt IIs deploy with the 81st Tactical Fighter Wing. These are also the first aircraft of their kind assigned to the U.S. Air Force in Europe, where they are expected to play a significant role in breaking up any Soviet armored attacks.

August 26

AVIATION: In a breakthrough gesture, the Communist government of Laos returns the remains of four U.S. servicemen killed in the Vietnam conflict.

August 28

NAVAL: At Annapolis, Maryland, Rear Admiral William P. Lawrence gains appointment as the 49th superintendent of the U.S. Naval Academy.

September 16

AVIATION: At McConnell Air Force Base, Kansas, Lieutenant Patricia M. Fornes of the 381st Strategic Missile Wing is the first female officer to stand Titan II alert.

September 25

MILITARY: At the Redstone Arsenal, Alabama, the Hellfire AGM-114 laser-guided missile is successfully tested against ground targets. This particularly lethal device is intended for use in helicopter gunships.

October 17

MILITARY: Near the Demilitarized Zone (DMZ), South Korea, American and Korean troops uncover a North Korean tunnel dug four miles from Panmunjom. The tunnel runs along the traditional invasion route to Seoul and can accommodate several thousand heavily armed troops.

October 20

MILITARY: In Washington, D.C., President Jimmy Carter abolishes the Women's Army Corps (WAC) as a separate entity within the U.S. Army. Henceforth, all female personnel will be directly integrated into standing, noncombat army formations.

- At Fort McClellan, Alabama, Brigadier General Mary E. Clarke of the Army Military Police and Chemical Schools becomes the first female major general in army history. Previously, she was the last WAC director.

NAVAL: In Chesapeake Bay, the Coast Guard training cutter *Cuyahoga* accidentally collides with the Argentine freighter *Santa Cruz II* and sinks with a loss of 11 men.

MARINES: President Jimmy Carter signs legislation elevating the commandant of the Marine Corps to a full-fledged member of the Joint Chiefs of Staff (JCS).

October 23

AVIATION: The 24th Composite Wing dispatches two UH-1N Iroquois helicopters and one O-2A aircraft to Costa Rica to fly flood-assistance missions.

November

AVIATION: The air force orders its first stealth aircraft, the Lockheed F-117 Night Hawk, into production. It possesses the world's first radar-absorbing design.

November 1

MILITARY: At Fort McClellan, Alabama; Fort Jackson, South Carolina; Fort Dix, New Jersey; and Fort Leonard Wood, Missouri; male and female recruits are integrated into the same basic training units.

NAVAL: Nine female ensigns, recently graduated from the U.S. Naval Academy, are the first women assigned to serve in ships other than hospital vessels and transports.

November 18

AVIATION: The revamped Northrop F-18 prototype makes its maiden flight and enters service as the Hornet.

November 22–29

AVIATION: HH-53 Jolly Green Giant helicopters of the 55th Aerospace Rescue and Recovery Squadron (ARRS) help transport 900 bodies from Jonestown, Guyana,

to makeshift morgues in nearby Georgetown. They are fueled between stations by HC-130 aircraft. These people died in a bizarre mass suicide.

- At Boston, Massachusetts, the air force dispatches a C-141 Starlifter with six medical specialists and their equipment to Algiers, Algeria, to attend the critically ill president.

November 28

AVIATION: A C-141 Starlifter conveys 911 bodies of a mass suicide at Jonestown, Guyana, to Dover Air Force Base for identification and burial.

November 30

AVIATION: At Hill Air Force Base, Utah, the final Boeing Minuteman II intercontinental ballistic missile (ICBM) is delivered.

December 8–9

AVIATION: In Tehran, Iran, air force C-5A Galaxies and C-141 Starlifters hastily evacuate 900 citizens as the shah's regime begins collapsing.

December 16

MARINES: The announcement of normalized relations between the United States and the People's Republic of China leads to anti-American riots in Taipei, Taiwan. Marine security guards are forced to drive off protestors with tear gas and nightsticks.

December 27

NAVAL: Responding to a rising tide of internal strife in Iran, the carrier *Constellation* positions itself off Singapore in the event it is needed in the Persian Gulf region.

1979

January

MILITARY: Army manpower levels drop to 758,852, their lowest level since 1950.

January 1

MILITARY: In light of increasing use of unauthorized headgear worn by soldiers, U.S. Army Chief of Staff Bernard W. Rogers issues a directive allowing berets to be worn by Rangers (black) and Green Berets (green).

January 6

AVIATION: At Hill Air Force Base, Utah, the 388th Tactical Fighter Wing receives the first operational F-16 Falcon. This multirole aircraft is capable of performing air superiority and close support missions.

January 16

DIPLOMACY: A rising tide of Islamic extremism forces the shah of Iran to abdicate and flee the country, and threatens to roil the entire Persian Gulf region with anti-Western unrest.

January 26

AVIATION: The first F-16 Fighting Falcons are turned over to the Belgian air force.

January 29

AVIATION: All E-3A Sentry AWACS aircraft accept responsibilities as part of the continental air defense mission.

February 6

NAVAL: At the ports of Bandar Abbas and Char Bahar, Iran, 200 Americans and 240 foreign nationals are evacuated by the command ship *La Salle*, the destroyers *Blandy*, *Decatur*, *Hoel*, and *Kincaid*, and the frigate *Talbot*.

February 14

MARINES: In Tehran, Iran, Muslim fanatics attack the U.S. embassy, taking several marine guards prisoner for a week.

February 27

AVIATION: At St. Louis, Missouri, the improved F-15C Eagle performs its maiden flight.

March 9

AVIATION: Operation Flying Star unfolds as two E-3A AWACS aircraft are dispatched to Saudi Arabia following perceived threats from revolutionary Iran.

March 31

AVIATION: Over the Yellow Sea, an H-3 helicopter flown by Major James E. McArdle, Jr., rescues 28 Taiwanese seamen whose ship had run aground. For his efforts he wins the Mackay Trophy.

- The nuclear accident at Three Mile Island, Pennsylvania, results in C-5 Galaxy, C-141 Starlifter, and C-130 Hercules transports flying in lead-shielding and testing equipment to the afflicted area.

April

AVIATION: At Fort Rucker, Alabama, the army receives its first Sikorsky UH-60 Black Hawk transport helicopters that will replace the aging Bell UH-1 Hueys. This new vehicle is faster, carries more troops, and is more crash-survivable than older machines.

April 3–5

AVIATION: At Nandi International Airport, Fiji, two C-141s deliver 20 tons of food and supplies in the wake of Typhoon Meli.

April 10

AVIATION: Off Cape Canaveral, Florida, the first submerged launching of a C-4 Trident ballistic missile is made by the submarine *Francis Scott Key*; within a month, this vessel makes the first deterrence cruise entirely armed with Trident missiles.

April 13

AVIATION: The Military Airlift Command (MAC) dispatches a C-141 Starlifter with 20 tons of vegetable seed to assist famished inhabitants of Kamina, Zaire.

April 19–20

AVIATION: After earthquakes ravage Adriatic coastal regions, transports of the Military Airlift Command (MAC) deliver 139 tons of humanitarian supplies to Titograd International Airport, Yugoslavia.

May

AVIATION: At Sembach Air Base, West Germany, the first forward operating Base (FOB) for A-10 Thunderbolt IIs is activated. This is a new phase in tactical planning that will allow air force jets to operate closer to the front in the event of a Soviet invasion.

May 2–3

AVIATION: In Central Europe, two E-3A Sentry AWACS aircraft begin their first overseas training mission.

June–July

MARINES: At Managua, Nicaragua, the marine guard helps evacuate 1,423 U.S. citizens and foreign nationals while Communist Sandinista forces overthrow the Somoza regime.

June 1

AVIATION: At Lackland Air Force Base, Texas, the Air Force Community College departs for a new home as part of the Air University, Maxwell Air Force Base, Alabama.

- RAF Fairford, England, is activated as a base to support ongoing Strategic Air Command (SAC) tanker operations.

June 5

AVIATION: In Washington, D.C., President Jimmy Carter authorizes development of the new MX intercontinental ballistic missile (ICBM).

June 20

AVIATION: Lieutenant Donna A. Spruill becomes the first woman to qualify in a fixed wing airplane; to do so she was required to make several landings in a Grumman C-1 Trader onboard the carrier *Independence*.

June 22

MILITARY: In Washington, D.C., General Edward C. Meyer is appointed the 29th secretary of the army. His tenure is spent in determining ways to make the army more easily and quickly deployable overseas.

June 25

TERRORISM: In Belgium, General Alexander Haig, supreme allied NATO commander, narrowly escapes an assassination attempt when a bomb explodes near his motorcade. The device has apparently been placed by the Red Army Faction, an ultra-Left terrorist group.

July 1

MARINES: In Washington, D.C., General Robert H. Barrows becomes the 27th commandant of the Marine Corps.

July 8–16

AVIATION: To test the Single Integrated Operational Plan (SIOP), Operation Global Shield '79, which involves 100,000 members of the Strategic Air Command (SAC), commences. This intricate nuclear war plan exercise also involves hundreds of bombers, tankers, and missiles being placed on alert or dispersed to various locations. Hereafter, Global Shield remains an annual SAC exercise for the remaining cold war years.

July 9

AVIATION: The *Voyager 2* space probe reaches the giant planet Jupiter and begins sending back incredible televised images of various Jovian moons and the planet's storm-swept surface.

July 19

NAVAL: As thousands of Vietnamese "boat people" flee Communist oppression and tyranny at home, President Jimmy Carter instructs the Seventh Fleet to begin rescuing them. A total of 1,800 are taken aboard this year, but many more perish at sea.

July 26

AVIATION: At Vandenberg Air Force Base, California, the air force test-launches its 400th Minuteman missile.

August 15

MARINES: Sergeant Major Leland D. Crawford becomes the ninth sergeant major of the Marine Corps.

August 31–November 21

AVIATION: Throughout the Caribbean, Military Airlift Command (MAC) cargo planes begin delivering 2,900 tons of relief supplies to islands devastated by Hurricanes David and Frederic.

September 1

MILITARY: Colonel Hazel W. Johnson, chief, U.S. Army Nurse Corps, becomes the first female African American promoted to brigadier general.

September 12

AVIATION: At RAF Fairford, England, the first two KC-135 Stratotankers deploy to assist Strategic Air Command (SAC) refueling operations.

September 15–22

AVIATION: Over Southern California, Air Force Reserve and Air National Guard C-130s fly 250 sorties, dropping 732,000 gallons of water and flame retardant in a massive firefighting operation.

October 1

AVIATION: The air force begins phasing out the Air Defense command by parceling out its responsibilities to the Strategic Air Command (SAC) and the Tactical Air Command (TAC).

MILITARY: In Washington, D.C., Secretary of the Army Clifford Alexander orders that enlistment qualifications between men and women be made identical.

October 17

MARINES: Responding to news that the Soviets have deployed a combat brigade for training purposes in Cuba, President Jimmy Carter orders the amphibious assault ship *Nassau* to land 1,800 marines at Guantánamo Bay.

October 19

AVIATION: At Yokota Air Base Japan, specially equipped C-141 Starlifters transport 38 severely burned marines back to Kelly Air Force Base, Texas, for treatment.

MARINES: At Camp Fuji, Japan, 13 marines of the 2nd Battalion, 4th Marines, are killed when Typhoon Tip punctures a 5,000-gallon fuel bladder and the gasoline ignites a barracks.

October 25

NAVAL: In Washington, D.C., Edward Hidalgo gains appointment as the 64th secretary of the navy; he is also the first Hispanic to hold that office.

October 26

AVIATION: At St. Louis, Missouri, McDonnell Douglas terminates production of its legendary F-4 Phantom II after a run of 5,000 machines.

October 30

MARINES: In San Salvador, El Salvador, the marine security detachment beats back an assault by 200 armed leftists until local authorities can restore order; two marines are injured.

November

MILITARY: The army adopts the camouflage Battle Dress Uniform (BDU), presently worn by paratroopers, rangers, and Special Forces as its standard field uniform. This replaces the standard green fatigues.

November 4

TERRORISM: In Tehran, Iran, militants storm the U.S. embassy, seizing 52 hostages. Among them are Colonel Charles W. Scott and Master Sergeant Regis Ragan of the U.S. Military Assistance Advisory Group, who are held for the next 444 days. The marine security detachment, numbering 13 men, is also taken and held. President Jimmy Carter, however, seeks a peaceful, diplomatic end to the crisis.

November 20

TERRORISM: The U.S. embassy in Islamabad, Pakistan, is besieged by a hostile mob while seven marine security guards hold them off; one marine is killed.

November 21

MARINES: In Karachi, Pakistan, a hostile mob surrounds the U.S. consulate and they are restrained by marine security guards. However, because this detachment had two women present, the pilot program to integrate female personnel into embassy detachments is ended.

December

MARINES: In Washington, D.C., the secretary of defense announces a new doctrine, which requires the Marine Corps to establish a Maritime Prepositioning Force (MPF) of three squadrons, each consisting of five cargo ships with sufficient equipment and supplies to supply a Marine Amphibious brigade for 30 days.

December 2–21

AVIATION: After Typhoon Abby ravages the Majuro Atoll, Marshall Islands, Military Airlift Command (MAC) transports begin delivering 650 tons of relief supplies and 250 medical personnel to assist survivors.

December 3

TERRORISM: Near San Juan, Puerto Rico, terrorists fire upon a bus carrying naval personnel to Sabana Seca Naval Communications Center; two sailors are killed and 10 are wounded.

December 7

MILITARY: Near the Demilitarized Zone (DMZ), South Korea, a patrol from the 2nd Division wanders into a North Korean minefield, killing one soldier and wounding two others.

December 12

AVIATION: The prototype SH-60 Seahawk, a navalized version of the army's UH-60 Blackhawk, flies for the first time; it remains a standard helicopter design with the fleet today.

December 14

MILITARY: In light of increasing Soviet strides in chemical and biological warfare, the U.S. Army chemical School reopens its doors at Fort McClellan, Alabama.

December 20

AVIATION: An Advanced Maneuvering Reentry Vehicle (AMARV) is launched onboard a Minuteman I Missile for the first time. This device employs a fully autonomous navigation system to avoid enemy antimissile weapons launched at it.

December 27

MILITARY: In Kabul, Afghanistan, Soviet special forces help spark a coup that brings down the current regime and installs a Communist puppet state. The Red Air Force begins airlifting thousands of troops into the country.

1980**January**

MILITARY: The Soviet invasion of Afghanistan and the Iranian hostage situation leads to upswings in army recruitment, which boosts overall strength to 777,036 officers and men.

January 2–4

AVIATION: During a rather busy period, Military Airlift Command (MAC) transports deliver relief supplies to earthquake victims on Terceira Island, Azores. Two C-141s from the 437th Military Airlift Wing deliver 700 tents and 1,000 blankets. A C-141 from the 86th Military Airlift Squadron conveys 17 tons of humanitarian relief supplies for victims of Cyclone Claudette on the Indian Ocean island of Mauritius.

January 8

AVIATION: The government reveals that 300 air force personnel had taken part in military exercises in Egypt December last, a sign of growing rapprochement with that Arab nation.

January 10

NAVAL: Ensign Roberta McIntyre, serving onboard the submarine tender *Dixon*, becomes the first female naval officer to qualify in surface warfare.

January 14

NAVAL: In light of tensions with Iran, the carriers *Nimitz* and *Kitty Hawk* are ordered to join the *Midway* in the Persian Gulf with their respective battlegroups.

Grumman F-14A *Tomcat* flying alongside a Soviet TU-95RT *Bear D* maritime patrol aircraft. (U.S. Navy)

January 28

NAVAL: The Coast Guard buoy tender *Blackthorn* accidentally strikes the oil tanker *Capricorn* near the Skyway Bridge in Tampa Bay, Florida, killing 23 sailors.

February 5

NAVAL: In Washington, D.C., John F. Lehman, Jr., is appointed the 65th secretary of the navy. The centerpiece of his tenure is acquiring a 600-ship navy to ensure American national security.

February 25–28

AVIATION: Over the Philippines, F-15 Eagles launched from Clark Air Base intercept four Soviet Tu-95 Bear reconnaissance aircraft attempting to penetrate the local air defense zone.

February 28

MILITARY: The army deploys its first turbine-powered M1 Abrams tanks, which are still among the world's greatest fighting vehicles. These replace the older M60

Patton tanks, even though both are armed with the same 105mm main gun. The M1A1, which arrives in 1985, boasts a more powerful, German-designed 120mm cannon.

March 1

MILITARY: President Jimmy Carter authorizes deployment of the new Rapid Deployment Joint Task Force (RDF), consisting mostly of members of the 82nd Airborne Division with Special Forces and Rangers units attached as needed.

NAVAL: The repair ship *Vulcan* completes the first six-month deployment of a U.S. Navy vessel with 57 women as part of its crew.

MARINES: The Rapid Deployment Joint Task Force (RDJTF) is established at Tampa, Florida, under Lieutenant General Paul X. Kelley. This is a headquarters unit intended to quickly assert control of amphibious and airborne quick-response units in times of crisis. Its initial focus is the Middle East.

March 12–14

AVIATION: Two B-52 bombers from the 644th Bombardment Squadron are ordered to fly around the world in order to locate Soviet warships in the Arabian Sea. The planes cover 22,000 miles in 43 hours at an average speed of 488 miles per hour. This is the third time since 1949 and 1957 that Strategic Air Command (SAC) bombers have circumnavigated the globe nonstop; the crews involved win a Mackay Trophy.

March 31

AVIATION: The air force turns over control of Naha Air Base, Okinawa, to the government of Japan for the first time since 1945.

April 2

MILITARY: In Washington, D.C., Secretary of Defense Harold Brown announces that members of the Women's Army Auxiliary Corps (WAAC) of World War II are to be considered military personnel for laws pertaining to the Veterans Administration.

April 6

AVIATION: At Beale Air Force Base, California, the C-141B Stratolifter performs its first operational mission by flying to RAF Mildenhall, England, which it completes in 11 hours and 12 minutes. One inflight refueling is also necessary.

April 7

AVIATION: In light of rising tensions between the United States and Iran, all Iranian military personnel currently attending military schools are ordered out of the country within four days. Several are forced to depart the Air Training Command.

DIPLOMACY: Five months into the hostage crisis, President Jimmy Carter orders diplomatic relations with Iran severed.

April 18

AVIATION: At Vandenberg Air Force Base, California, a \$3 million Data Transfer System is constructed to assist space shuttle, missile testing, and global positioning system (GPS) satellite network.

April 22

AVIATION: Elements of the 33rd Aerospace Rescue and Recovery Squadron attempt to rescue 900 passengers from a ferry that sank 150 miles southeast of Manila, Philippines.

April 24

TERRORISM: After several months of failed negotiations to secure American hostages held in Tehran, Iran, by military students, President Jimmy Carter authorizes Operation Eagle Claw, a helicopter-borne commando mission to rescue them by force. This consists of a rescue team comprised of Delta Force operatives, Rangers, and Special Forces under Colonel Charles Beckwith. They are conveyed inland in eight RH-53 helicopters launched from the carrier *Nimitz*. At least three of the helicopters suffer from mechanical malfunctions as a result of encountering a dust storm and abort, at which point Beckwith cancels the attempt. However, the mission comes to grief at a landing zone christened Desert One, when an EC-130 transport and a helicopter collide in a sand storm, killing eight Americans and wounding five. Failure here occasions the rise of the U.S. Central Command (CENTCOM) to better orchestrate military operations in this theater.

May

AVIATION: Lieutenant Mary L. Wittick becomes the first female to attend air force helicopter flight training.

May 18–June 5

AVIATION: The powerful eruption of Mount St. Helens results in aircraft from the Aerospace Rescue Service (ARRS), Military Airlift Command (MAC), and the 9th Strategic Reconnaissance Wing to fly humanitarian and rescue missions to afflicted persons throughout the region. SR-71 Blackbirds also fly photographic sorties to assist ground rescue teams.

May 25

AVIATION: Radar-equipped OV-1 Mohawk reconnaissance aircraft operated by the Oregon National Guard are called in to survey the condition of Mount St. Helens following its violent eruption.

MILITARY: In the wake of the destructive Mount St. Helens eruption, National Guard troops are mobilized to search for survivors.

May 28

MILITARY: The service academies graduate their first women officers, with 61 from West Point, 55 from Annapolis, and 97 from the Air Force Academy.

June

MILITARY: Army chow, never exactly gourmet fare, takes a decided turn for the better when the new Meals-Ready-to-Eat (MREs) are adopted as standard field rations. The lowly C-rations have been replaced by dehydrated foods in airtight pouches, packing much higher nutritional content.

June 27

MILITARY: In another belated response to the Soviet invasion of Afghanistan, President Jimmy Carter signs legislation reactivating draft registration for 19- and 20-year-old men.

June 30

MARINES: Presently, Marine Corps manpower levels stand at 18,198 officers and 170,271 enlisted men and women.

July

MARINES: At Twenty-Nine Palms, California, the 7th Marine Amphibious Brigade headquarters is activated as the first Marine Prepositioning Force (MPF). Once fully organized, it is ready to deploy by air to any port where an MPF squadron is located.

July 8

AVIATION: The McDonnell Douglas FSD F-15B (F-15E Strike Eagle) performs its maiden flight. This is a two-seat version with a Weapons Systems Officer (WSO) and is modified for ground strike roles.

NAVAL: Off Cuba, a force of 11 navy vessels and some P-3 maritime patrol craft assist 115,000 refugees fleeing from the Communist dictatorship of Fidel Castro. This goes down in history as the Mariel Boat Lift.

July 10–October 3

AVIATION: At Moody Air Force Base, Georgia, 12 F-4E Phantom IIs deploy to Egypt during Operation Proud Phantom. This is a training exercise to help the Egyptian air force, which recently acquired Phantom IIs of their own, to properly operate their aircraft.

July 28–30

AVIATION: At Clark Air Force Base, Philippines, the 3rd Tactical Fighter Wing dispatches four F-4E Phantom IIs to Tengah Air Base, Singapore. This is the first goodwill mission mounted by the air force since Singapore gained its independence in 1965.

July 30–August 1

AVIATION: Three C-130s dispatched from the 146th and 433rd Tactical Airlift Wings drop 10,500 gallons of fire retardant on raging forest fires in the San Bernardino National Forest, California.

August 7–16

AVIATION: After Hurricane Allen ravages Haiti and St. Lucia in the Caribbean, the Air Force Southern Command deploys transports to deliver 61 tons of relief supplies and a 107-person cleanup crew.

August 14

AVIATION: At Dobbins Air Force Base, Georgia, the first C-5A with modified wings makes its maiden flight. All 77 of these aircraft in service will be similarly modified to extend their service life into the 21st century.

August 22

NAVAL: At Annapolis, Maryland, Vice Admiral Edwin C. Waller III gains appointment as the 50th superintendent of the U.S. Naval Academy.

September 2

AVIATION: The air force provides an Air Weather Service detachment to assist NASA operations at the Johnson Space Center, Houston, Texas.

September 10

AVIATION: In the wake of Typhoon Orchid, an HH-3E Jolly Green Giant helicopter is dispatched from Osan Air Base, South Korea, to rescue 229 people struggling in the Sea of Japan.

MILITARY: At Fort Lewis, Washington, the 9th Infantry Division begins experimenting with a smaller, lighter formation of 17,773, with the approval of U.S. Army Chief of Staff general Edward C. Meyer. Two years later the focus of divisional activities shifts to that of a more “motorized” organization.

September 16

AVIATION: Off Libya, a Libyan MiG-23 fighter attacks an air force RC-135 electronic surveillance aircraft, which employs drastic maneuvering to avoid being hit. Recently, the United States has stepped up electronic intelligence missions along Libya’s coast.

September 18

MILITARY: At Little Rock Air Force Base, Arkansas, a Titan II missile of the 308th Strategic Missile Wing explodes in its silo, killing one airman and injuring 21.

September 20

AVIATION: The Pacific Air Forces (PACAF) dispatches two F-15s and an E-3A on goodwill trips to New Zealand, Malaysia, Singapore, and Thailand.

September 30

NAVAL: The Service Life Extension Program commences with the carrier *Saratoga*. It is designed to increase the longevity of warships in active service.

October 1

AVIATION: As the bloody Iran-Iraq War continues, Operation Elf One places E-3A AWACS aircraft and KC-135 tankers in Saudi Arabia to closely monitor military communications. They remain in place over the next eight years.

NAVAL: In Washington, D.C., the Office of Naval Warfare replaces the earlier designation of Office of Antisubmarine Warfare and Ocean Surveillance.

October 3

AVIATION: Over the Pacific Ocean, an HH-3 Jolly Green Giant helicopter piloted by Captain John J. Walters rescues 61 passengers from the Dutch cruise ship *Prinsendam* after it catches fire 120 mile south of Yakutat, Alaska. Captain Walters receives a Mackay Trophy for his efforts.

October 11

NAVAL: In light of continuing tensions with Iran and concerns over Saudi Arabian security, the guided-missile cruiser *Leahy* is ordered to the Persian Gulf to assist air force E-3 Airborne Warning and Control Systems (AWACS) aircraft already there.

October 12–23

AVIATION: Transports of the Military Airlift Command (MAC) begin transporting 400 tons of relief supplies and medical personnel to El Asnam, Algeria, following a destructive earthquake that kills 6,000 people.

October 16

MILITARY: At Fort Irwin, California, the new National Training Center (NTC) opens for service. This unique facility covers 1,000-square miles of the Mojave Desert, is highly automated with computers and laser equipment, and becomes the army's premier testing and training grounds for large-scale maneuvers.

October 17

AVIATION: In Washington, D.C., the secretary of defense orders the army to take control of Wheeler Air Force Base. That branch has been the principal user of the base since it was reactivated in 1952.

October 18

NAVAL: The guided missile cruiser *Arkansas* is commissioned, being the last nuclear-powered vessel acquired by the U.S. Navy; a total of eight are now in service.

October 20–23

AVIATION: The Southern Air Division routes transport aircraft to Nicaragua and conveys 40 tons of food and relief supplies in the aftermath of recent flooding there.

November 5

MILITARY: In light of budgetary restrictions, a new freeze in army civilian employee hiring requires soldiers to undertake tasks usually performed by civilians.

November 12–14

AVIATION: At Hahn Air Base, West Germany, the 50th Tactical Fighter Wing is ordered by U.S. Air Force in Europe (USAFE) to carry out its wartime mission in a simulated chemical warfare environment.

November 12–25

AVIATION: In Egypt, Rapid Deployment Force elements of the U.S. Air Force in Europe (USAFE) participate in Operation Bright Star, the first joint exercise held with Egyptian forces.

November 13

NAVAL: The Navy Department announces that 81-year-old Admiral Hyman Rickover will be retiring after his current extension expires on January 31, 1982. He has been in the forefront of the American nuclear navy for over three decades.

November 20

AVIATION: At RAF Lakenheath, the 48th Tactical Fighter Wing receives the first operational Pave Tack F-111. The Pave Tack system allows bombing missions under 24-hour, high- and low-altitude bomb runs.

November 21

AVIATION: Over Las Vegas, Nevada, helicopters from Nellis Air Force Base swoop in to rescue 310 guests from the burning 26-story MGM Grand Hotel.

November 23–December 2

AVIATION: Severe earthquakes around Naples, Italy, prompt the U.S. Air Force in Europe (USAFE) to dispatch transports with 300 tons of blankets, tents, and medical supplies for the survivors.

November 25

AVIATION: In England, the 26h Tactical Fighter Training Aggressor Squadron flies T-38 Talons for the last time. These aircraft are returned to the Air Training Command and replaced by F-5E Tiger II jets.

November 25–29

AVIATION: East of Los Angeles, California, transports of the Military Airlift Command (MAC) and the Air Force Airlift Readiness Center drop five tons of retardant on 11 fires raging in four different counties.

December 10

AVIATION: As the Iran-Iraq War rages in full fury, four additional Boeing E-3A AWACS aircraft are deployed to Ramstein Air Base, West Germany, to help monitor military events throughout the Middle East. An additional four E-3As are deployed to Europe to keep tabs on the ongoing crisis in Poland.

December 12

AVIATION: At Maxwell Air Force Base, Alabama, the Community College of the Air Force is accredited by the Commission on Colleges of the Southern Association. The degree program in question is an associate in applied science.

December 22

NAVAL: At Norfolk, Virginia, the carrier battle group consisting of the carrier *Dwight D. Eisenhower* and cruisers *South Carolina* and *Virginia* return to home port after 251 days at sea; this is the longest deployment of naval vessels since the end of World War II.

1981

January

MILITARY: In an attempt to boost recruiting, the U.S. Army Recruiting Command unveils its “Be all that you can be” campaign. This proves to be one of the most successful advertising efforts of the 20th century and brings in numerous high-quality recruits.

MARINES: The United States concludes an agreement with Norway to allow prepositioning supplies to be stored in special caves for possible use by Marine Corps forces in the event of a Soviet attack.

January–June

AVIATION: Military Airlift Command (MAC) transports based at Corpus Christi, Texas, and Little Rock, Arkansas, deliver 500 tons of military supplies to the government of El Salvador to help stave off a Communist insurgency supported by neighboring Nicaragua.

January 10–11

AVIATION: At Griffiss Air Force Base, New York, the first two Boeing air-launched cruise missiles (ALCMs) are delivered to the 416th Bombardment Wing for testing and maintenance training purposes. These revolutionary weapons possess a 1,500-mile range, carry nuclear or conventional warheads, and navigate through a precise terrain-contour matching system that allows high-speed ingress at low altitude.

January 12

TERRORISM: In Puerto Rico, nine A-7D Corsair II aircraft belonging to the 156th Tactical Fighter Group, Air National Guard, are destroyed by terrorists.

January 20

MILITARY: In Washington, D.C., Caspar Weinberger is appointed the 15th secretary of defense.

- In Washington, D.C., Ronald W. Reagan is sworn in as the 40th president of the United States and commander in chief.

TERRORISM: As if on cue, the Iran Islamic regime releases all American hostages following 444 days of captivity; apparently they decline seeking confrontation with a new, more assertive American government. The hostages are flown to Rhein-Mein Air Base, West Germany, on two Military Airlift Command (MAC) C-9 Nightingales.

January 22

MILITARY: In Washington, D.C., former U.S. Army general Alexander M. Haig is appointed the new secretary of state. He is only the second soldier to hold that position after George C. Marshall.

January 23

AVIATION: The 6594th Test Group dispatches two helicopters, which perform a hoist pickup of an injured seaman from a merchant vessel 240 miles west of Honolulu, Hawaii.

January 25

AVIATION: An air force VC-137 transport flies 52 former American hostages from Wiesbaden, West Germany, to the United States and freedom.

January 29

MILITARY: In Washington, D.C., John O. Marsh, Jr., gains appointment as the 14th secretary of the army. In time he becomes the longest serving secretary.

February 5

NAVAL: In Washington, D.C., John F. Lehman, Jr., a former staffer on the National Security Council, gains appointment as the 65th secretary of the navy. His quest to obtain a 600-ship navy becomes a centerpiece of the Reagan administration's defense buildup.

February 10

AVIATION: In Las Vegas, Nevada, three U-1 helicopters dispatched by the 57th Fighter Weapons Wing rescue nine guests trapped on the roof of the 30-story Las Vegas Hilton. The flames are partially extinguished by firefighters from Nellis Air Force base.

February 24

MILITARY: In Washington, D.C., President Ronald W. Reagan awards Special Forces Master Sergeant Ray Benavidez a Medal of Honor 13 years after his display of heroism on the battlefield in Vietnam. Originally, he received a Distinguished Service Cross for rescuing several Special Forces members under fire.

February 26–March 6

AVIATION: In the wake of severe earthquakes in central Greece, the 7206th Air Base Group, Hellenikon Air Base, assist relief efforts with supplies and equipment.

February 27

MILITARY: The army begins deploying its new Stinger, second-generation, shoulder-launched, surface-to arm missile to infantry units in Europe. It replaces the earlier and less capable Redeye missile system.

March 1

AVIATION: Marine HMH-464 is equipped with Sikorsky CH-53E Super Stallion helicopters, capable of inflight refueling and carrying twice the payload of earlier versions.

March 4

NAVAL: In Washington, D.C., Secretary of Defense Caspar Weinberger states that the battleships *Iowa* and *New Jersey*, and the carrier *Oriskany*, are slated for reactivation.

March 12

AVIATION: Peterson Air Force Base, Colorado, is chosen by the Aerospace Defense Command as the backup facility for the North American Aerospace Defense Command (NORAD) in the event of a peacetime technical failure.

March 17

AVIATION: The Strategic Air Command (SAC) takes delivery of its first McDonnell Douglas KC-10 Extender, which carries more fuel and cargo than the current KC-135 aircraft it will replace.

March 18

AVIATION: The 18th Tactical Fighter Wing accepts delivery of 80 F-15 Eagles and transfers its 79 F-4 Phantoms to other commands. This completes the conversion of the Pacific Air Forces to F-15 standards.

April 1

AVIATION: Ever concerned with honing the skills of its fighter pilots, the air force deploys the 527th Tactical Fighter Training Aggressor Squadron to RAF Alconbury, England. It is equipped with Northrop F-5E Tiger IIs, which simulate Soviet fighters during air-to-air combat drills.

April 3

MILITARY: Colonel Harry G. Summers publishes his seminal text *On Strategy: The Vietnam War in Context*. In it, the author maintains that the United States should have waged a conventional war against the Viet Cong and North Vietnamese, instead of gradually escalating guerrilla conflict that allowed the enemy time to adapt. This document is a product of the Strategic Studies Institute of the Army War College.

April 8

MILITARY: In New York City, General Omar N. Bradley dies; at the time he is the army's senior officer and last five-star general.

**Haig, Alexander M. (1924–2010)***Army general, secretary of state*

Alexander Meigs Haig was born in Philadelphia, Pennsylvania, on December 2, 1924, and he gained admittance to the U.S. Military Academy in 1944. He was commissioned a second lieutenant four years later and served with distinction with the X Corps in Korea under General Edward M. Almond. Haig rose to captain in 1950 and held routine assignments over the next 15 years and also obtained a master's degree in international relations at Georgetown University in 1961. He subsequently served as assistant to Secretary of the Army Cyrus Vance before returning to active duty in Vietnam. In 1966 Haig helped to win the Battle of Ap Gu while leading the 26th Infantry Regiment, and he returned to the United States as a colonel and part of President Richard M. Nixon's inner circle. He helped to craft Nixon's successful visit to China in 1972, and, that September, Nixon promoted him two grades to full general over the heads of 240 officers with more seniority. Haig served the next president, Gerald Ford, with an appointment as NATO supreme allied commander, and was largely responsible for upgrading nuclear forces, training, and strategy. However, he disagreed with President Jimmy Carter's vacillating policy toward the Soviet Union and resigned his commission in July 1979.

In 1980 Haig's outspoken criticism of Carter came to the attention of President Ronald W. Reagan, who appointed him the new secretary of state. Haig crafted a deliberately confrontational strategy toward the Soviet Union and its Commu-

nist allies, which included sending military aid to Afghan freedom fighters and arming the Nicaraguan contra rebels in their struggle against the Communist Sandinistas. He also persuaded the administration to deploy new Pershing II and cruise missiles in Western Europe to counter the Soviet buildup of nuclear SS-20 missiles in the East. However, he clashed strongly with Vice President George H. W. Bush and Secretary of Defense Caspar Weinberger, who felt that clandestinely arming the contras against the congressional will was illegal. Haig was also embarrassed and frustrated by his inability to prevent two nominal allies, Great Britain and Argentina, from going to war over the Falkland Islands in 1982. Afterwards, he sided with the British and provided them logistical support, which won him few friends in Latin America. He also made a major misstep following the attempted assassination of President Reagan in March 1981 by declaring himself "in charge of the White House." Feeling that his presence in the administration was counterproductive to President Reagan, Haig tended his resignation in June 1982. He resided in Washington, D.C., and made an unsuccessful bid for the Republican Party presidential nomination in 1988. He continued to serve as a political commentator on television until his death on February 20, 2010. Haig's legacy as one of the most effective secretaries of state, whose policies helped defeat communist regimes in Russia, Afghanistan, and Nicaragua, is secure.

April 9

NAVAL: South of Sasebo, Japan, the fleet ballistic missile submarine *George Washington* collides with the Japanese merchantman *Nissho Maru* while surfacing, killing two crewmen from the latter. The submarine captain is relieved of duty and receives a letter of official reprimand.

April 12–14

AVIATION: At Cape Canaveral, Florida, the space shuttle *Columbia* is launched for the first time with an all-navy crew consisting of Captain John W. Young and Captain Robert L. Crippen. This milestone flight involves taking off like a rocket and then returning to Earth as a conventional airplane. Communication with the shuttle in space is also facilitated by the Aerospace Defense Command and the Air Force Communications Command.

April 13

AVIATION: Two Marine Corps Harrier jump jet squadrons are deployed on an assault vessel to test how well they augment fixed-wing elements in the fleet during a contingency.

April 21

DIPLOMACY: The United States agrees to sell Saudi Arabia \$1 billion worth of advanced military equipment, including five sophisticated AWACS electronic aircraft, despite protests from Israel.

April 24

MILITARY: The government announces that a new military command will be created for protecting American interests in the Persian Gulf region.

May 2

AVIATION: At White Sands Missile Range, New Mexico, an aerial target drone is successfully shot down by the Airborne Laser Laboratory (ALL) aircraft. This is a modified KC-135 carrying a carbon dioxide laser.

May 28

AVIATION: Off the Florida coast, a Marine EA-6B Prowler crashes on the carrier *Nimitz* during a night landing; all four marines onboard are killed, along with 10 sailors. A further 48 men are injured and 20 aircraft are damaged or destroyed.

June 14

AVIATION: The 32nd and 36th Tactical Fighter Wings, U.S. Air Force in Europe (USAFE) contribute a total of seven F-15s to the Tactical Air Command's Red Flag exercise.

June 17

NAVAL: At Charleston, South Carolina, the fleet ballistic missile submarine *James K. Polk* returns to port, concluding the 2,000th cold war deterrent patrol made by navy vessels.

June 18

AVIATION: At Tonopah Test Range, Nevada, the revolutionary Lockheed F-117 Night Hawk stealth aircraft makes its first successful flight at night. Extreme secrecy surrounds the test program until 1988.

June 25

MILITARY: The U.S. Supreme Court rules that draft registration can exclude women without violating the U.S. Constitution.

June 27

NAVAL: The fleet ballistic submarine *James K. Polk* completes the navy's 2,000th deterrence patrol.

July

AVIATION: South of Osan Air Base, South Korea, helicopters of the 33rd Aerospace Rescue and Recovery Squadron (ARRS) assist 118 people from rising floodwaters.

July 1

NAVAL: In Washington, D.C., Admiral James D. Watkins gains appointment as the 22nd chief of naval operations.

July 27

NAVAL: The destroyer *Kidd* is commissioned by the navy; this vessel was originally intended for service with the Iranian navy but has since been retained in American service. It differs from other *Spruance*-class destroyers in being armed with missiles.

August 3

AVIATION: Once civilian air traffic controllers stage an illegal strike, air force controllers are called in to fill in the gaps and allow commercial air travel to continue safely.

August 10

MILITARY: President Ronald W. Reagan, determined to increase pressure on the Soviet Union, authorizes production of the new neutron warhead for missiles and artillery.

August 15

AVIATION: At Griffiss Air Force Base, New York, the first B-52G bomber outfitted to carry air-launched cruise missiles (ACLMs) is deployed. This adds new and potentially lethal capabilities to the aging aircraft.

August 19

AVIATION: VF-41 F-14 Tomcats from the carrier *Nimitz* down two Libyan Su-22 jets over the Gulf of Sidra, 60 miles from the Libyan coast, after they fired on the Americans in international airspace. Previously, Libyan dictator Moammar Qaddafi had proclaimed a "line of death" that any American vessel would face should it cross.

August 22

NAVAL: In Annapolis, Maryland, Vice Admiral Edwin C. Waller III gains appointment as superintendent of the U.S. Naval Academy.

September 14

AVIATION: At Kunsan Air Base, South Korea, the first operational F-16 Falcons from the Pacific Air Forces (PACAF) are deployed.

September 15

AVIATION: The Strategic Air Command (SAC) accepts delivery of its first Lockheed TR-1A strategic reconnaissance aircraft; this is the latest version of the venerable U-2 spyplane and can perform all-weather operations from altitudes of 70,000 feet.

- At RAF Lakenheath, the 494th Tactical Fighter Squadron deploys; this is the first unit equipped with Pave Tack laser-guided weapons systems mounted on their F-111s.

TERRORISM: In West Germany, a car driven by General Frederick J. Koersen is attacked by terrorists firing a rocket-propelled grenade (RPG) launcher. However, he and his wife emerge unscathed. This is the latest attack by the Red Army Faction terror outfit.

September 21

AVIATION: At Clark Air Force Base, Philippines, helicopters of the Aerospace Rescue and Recovery Squadrons (ARRS) rescue members of the grounded Philippine destroyer *Datu Kalantiao*; in the past 35 years, the ARRS has rescued 20,000 people.

October

AVIATION: At Sheppard Air Force Base, the Euro-NATO Joint Jet Pilot Training Program commences.

October 1

AVIATION: At Mather Air Force Base, California, the Air Training Command initiates a program to train German weapons systems officers for service in the European Tornado fighter-bomber.

NAVAL: The fleet ballistic missile submarine *Robert E. Lee* completes the final cold war deterrent cruise while armed with aging Polaris A-3 missiles.

October 2

MILITARY: In Washington, D.C., President Ronald Reagan rises to the challenge of an aggressive Soviet Union by articulating a five-point buildup of American military strength. This includes production of 100 Rockwell B-1B Lancer strategic bombers, deployment of 100 new MX Peacekeeper missiles in existing super-hardened silos, and resumed development of the neutron bomb intended to wipe out Soviet tank columns without destroying Western Europe.

- Secretary of Defense Frank P. Carlucci orders the Titan II intercontinental ballistic missiles in service with the Strategic Air Command (SAC) inactivated. These obsolete, liquid-fueled weapon are to be replaced by the solid-fuel MX.

October 14

AVIATION: Following the assassination of Egyptian president Anwar Sadat, the Tactical Air Command (TAC) deploys two E-3A Sentry aircraft to monitor regional events in the Middle East.

October 20

MILITARY: At Fort Myer, Virginia, the army officially christens its new armored personnel carrier the M2/3 Bradley.

October 21

AVIATION: At Sheppard Air Force Base, Texas, the Euro-North Atlantic Treaty Organization Joint Jet Pilot Training Program begins training candidates from NATO members. It is run along lines conducted by the German air force since 1966.

October 28

DIPLOMACY: President Ronald Reagan, determined to cement the strategic country of Saudi Arabia as an ally in the struggle with global communism and Islamic militarists in Iran, convinces Congress to sell the Saudis advanced F-15 Eagle fighter jets and sophisticated Airborne Warning and Control Systems (AWACS).

November 5

AVIATION: At Mountain Home, Idaho, the 388th Electronic Combat Squadron (ECS) deploys the first EF-111A Raven. Popularly known as the "Spark Vark," it is intended to replace all EB-66 and EB-57 aircraft in electronic warfare and defense suppression.

November 11

NAVAL: At Groton, Connecticut, the 18,700-ton fleet ballistic missile submarine *Ohio* is commissioned, being especially designed to carry 24 Trident missiles; 18 vessels are constructed in this class.

November 13

NAVAL: In Washington, D.C., 81-year-old Admiral Hyman Rickover is eased from active duty when his service extension is not renewed. As a sop, he gains appointment as a presidential adviser on nuclear science.

November 18

MEDIA: President Ronald W. Reagan give a televised address, broadcast live throughout Europe, outlining his decision to deploy medium-range Pershing II and cruise missiles if the Soviet Union does not dismantle all of its offensive weaponry in Eastern Europe.

November 23

AVIATION: Operation Bright Star '82 unfolds as eight B-52 bombers fly 15,000 miles from North Dakota to Egypt to drop training bombs on a practice airfield target. This is the longest B-52 bombing mission to date and concludes in 31 hours and three air refuelings.

December

MARINES: This month the 10th Marines, an artillery unit, is equipped with new M198 155mm howitzers.

December 1

MARINES: In Washington, D.C., Commandant Barrow institutes a stepped-up war against drug use in the Marine Corps through increased urinalysis.

December 17

TERRORISM: In Verona, Italy, the Italian terrorist Red Brigade kidnaps General James L. Dozier from his apartment.

December 31

AVIATION: At Hahn Air Base, West Germany, the first operational F-16s assigned to the U.S. Air Force in Europe (USAFE) are deployed with the 50th Tactical Fighter Wing.

1982

January

MILITARY: The 82nd Airborne Division is assigned the duty as UN Multinational Force and Observers (MFO) in the Sinai Peninsula between Egypt and Israel. It remains the army's longest-running peacekeeping mission.

January 13

AVIATION: In Washington, D.C., Air Florida Flight 90 crashes into the icy Potomac River after takeoff, prompting soldiers of the Military District of Washington to assist in the recovery of victims and wreckage.

January 17

AVIATION: Off Cape Kennedy, Florida, the fleet ballistic missile submarine *Ohio* fires a submerged Trident missile for the first time. Each Trident carries 14 independently targeted reentry warheads and has a range of 4,000 miles.

January 18

AVIATION: At Indian Springs, Nevada, four T-38 Talons belonging to the Thunderbirds demonstration team crash into the desert floor, killing four pilots. Accidents in the previous May and September also took the lives of two pilots.

TERRORISM: In Paris, France, Lieutenant Colonel Charles R. Ray, a military attaché at the American embassy, is assassinated by an unknown gunman.

January 26

AVIATION: At Edwards Air Force Base, California, major general and former astronaut Michael Collins flies his final flight in an F-16, then retires from active duty.

January 28

AVIATION: The first C-5A Galaxy transport to receive new wings is delivered to the Lockheed-Georgia plant. The cost of modifying 76 transports will set the taxpayers back \$1.4 billion over the next few years.

TERRORISM: In Italy, Italian antiterrorist police, assisted by Delta Force commandos, rescue General James L. Dozier from captivity.

February 5

AVIATION: The Tacit Blue stealth technology demonstrator makes its first secret flight. The so-called Whale, built by Northrop, makes a total of 135 clandestine flights to evaluate radar cross-reduction techniques.

February 13

AVIATION: F-14 Tomcats of VF-84, flying from the carrier *Nimitz*, complete the first missions to employ the new Tactical Air Reconnaissance Photographic System (TARPS) to provide low-to-medium altitude photographic capabilities for the fleet.

February 24

AVIATION: At Geilenkirchen Air Base, West Germany, the first of 18 Boeing E-3A Sentry AWACS aircraft assigned to NATO arrives.

March 1

NAVAL: An era in submarine warfare ends when the *Robert E. Lee*, the navy's last Polaris ballistic missile submarine in service, is redesignated an attack submarine. The Polaris submarines served with distinction for 21 years.

March 3

AVIATION: At Suwon Air Base, South Korea, the first six A-10 Thunderbolt IIs arrive to participate in Project Commando.

March 13

NAVAL: The supercarrier *Carl Vinson* is commissioned, bringing the total number of carriers in service to 14.

March 16

NAVAL: In Washington, D.C., Vice President George H. W. Bush announces that the navy will join the campaign to curb the influx of illegal drugs from outside the country. To that end, several Grumman E-2 Hawkeye airborne early warning aircraft, along with several Coast Guard vessels, will be earmarked for that vital mission.

March 24

AVIATION: The U.S. Air Force in Europe (USAFE) assigns Comiso Air Base, Sicily, as a storage/launching site for new cruise missiles.

May 3

MILITARY: After a three-year experiment, the army abandons same-sex basic training units and reverts back to segregating them by gender.

May 4–8

AVIATION: The air force deploys an E-3A Sentry AWACS plane to Turkey for the first time.

May 16

TERRORISM: At San Juan, Puerto Rico, one sailor is killed and three wounded in a terrorist attack; the victims are from the amphibious vessel *Pensacola*.

May 30

DIPLOMACY: Spain, which has long-hosted American military bases, formally joins NATO.

June 10

AVIATION: At Castle Air Force Base, California, a KC-135 aircraft belonging to the 924th Air Refueling Squadron, Strategic Air Command (SAC), flies for the first time with an all-female crew. Their five-hour training mission includes a midair refueling with a B-52 bomber.

June 14

AVIATION: At Hahn Air Force Base, West Germany, the 313th Tactical Fighter Squadron becomes the first operational F-16 Falcon unit in the U.S. Air Force in Europe (USAFE).

June 18

MILITARY: In Washington, D.C., General John W. Vessey, the army vice chief of staff, gains appointment as the 10th chairman of the Joint Chiefs of Staff. He is also the fifth army general to serve as chairman.

June 20

NAVAL: In the South China Sea, an unidentified vessel fires a machine gun at the guided-missile cruiser *Sterett*, and destroyers *Lynde McCormick* and *Turner Joy*; warning shots are fired at the intruder, whose identity is never learned.

June 21

AVIATION: Over Antarctica, a Strategic Air Command (SAC) KC-10 Extender delivers 67,400 pounds of aviation fuel in support of Military Airlift Command (MAC) resupply operations. This occurs only 750 miles from the South Pole, making it the southernmost inflight refueling by an American aircraft.

June 24–25

NAVAL: At Juniyah, Lebanon, the amphibious ships *Nashville* and *Heritage* evacuate 600 Americans and foreign nationals seeking to escape from fighting that results from Israel's invasion of that battered nation.

MARINES: The 32nd Marine Amphibious Unit goes ashore at Juniyah, Lebanon, to help evacuate American citizens trapped there in the wake of the Israeli invasion.

June 26

MARINES: In Washington, D.C., General Paul X. Kelley gains appointment as the 28th commandant of the Marine Corps.

June 30

MARINES: At present, Marine Corps manpower levels are 18,975 men and 173,405 enlisted men and women.

July 1

AVIATION: At RAF Greenham Common, England, the 501st Tactical Missile Wing deploys as the first ground-launched cruise missile (GLCM) wing in Europe. A total of six Gryphon-equipped missile wings will be deployed there.

NAVAL: In Washington, D.C., Admiral James D. Watkins gains appointment as the 22nd chief of naval operations and the third successive submariner to do so.

July 2

AVIATION: At Davis Monthan Air Force Base, the 570th Strategic Missile Squadron deactivates its final Titan II intercontinental ballistic missile (ICBM).

July 6

DIPLOMACY: In Washington, D.C., President Ronald W. Reagan announces that marines currently deployed in Lebanon will become part of a Multinational Peacekeeping Force. Moreover, they will safeguard the evacuation of Palestinian Liberation Organization (PLO) members once a cease-fire has been achieved.

July 6–13

AVIATION: To assist refugees from the civil war in Chad, Africa, a C-130 Hercules transport conveys 113 tons of food supplies.

July 15

AVIATION: At Vandenberg Air Force Base, California, the 1,500th missile test is launched by the Strategic Air Command (SAC).

August 4

AVIATION: To extend the life and performance of the venerable KC-135 tanker aircraft, the first one retrofitted with CFM-56 turbofan engines performs its maiden flight. These new power plants will extend the life of the KC-135 well into the 21st century.

August 5

POLITICS: In a major victory for President Ronald W. Reagan, the Democratic-controlled House of Representatives rejects a bill that would freeze American and Soviet nuclear arsenals at current levels.

August 25–September 10

NAVAL: Vessels of the Sixth Fleet land the 32nd Marine Amphibious Unit at Beirut, Lebanon, as part of an international peacekeeping force. They also supervise the evacuation of 12,000 Palestinians onto merchant vessels during a major relocation of refugees. They depart when the last refugees are removed.

MARINES: At the request of the Lebanese government, the 32nd Marine Amphibious Units go ashore and occupy Beirut to help restore order as part of a multinational force. Once the evacuation of Palestinians is complete, the mission terminates.

August 30

AVIATION: At Edwards Air Force Base, California, the Northrop F-20 Tigershark, a lightweight air superiority fighter, performs its maiden flight.

MILITARY: In Japan, Lieutenant General Roscoe Robinson, Jr., becomes the first African American promoted to full (four-star) general.

August 31

NAVAL: At Annapolis, Maryland, Rear Admiral Charles R. Larson is appointed the 51st superintendent of the U.S. Naval Academy.

September 1

AVIATION: At Peterson Air Force Base, Colorado, the Air Force Space Command is activated.

September 2

AVIATION: At Farnborough, England, B-1B prototype no. 4 lands following an 14-hour nonstop flight from Edwards Air Force Base, California. This is also the first overseas deployment of any B-1B.

September 16

AVIATION: A B-52 flown by Captain Ronald L. Cavendish survives a crippling inflight emergency and manages to land safely through superior airmanship. Cavendish and his crew receive the Mackay Trophy for their efforts.

September 21

AVIATION: At Griffiss Air Force Base, New York, a B-52G from the 416th Bombardment Wing fires a cruise missile in its first operational test. An ongoing

program is modifying 16 B-52s at this base to carry six cruise missiles (ALCMs) under each wing.

September 29

NAVAL: Vessels of the Sixth Fleet embark the 1,200 men of the 32nd Marine Amphibious Unit at Beirut, Lebanon, and join French, British, Italian, and Australian troops as part of an international peacekeeping force. The marines are positioned at Beirut International Airport.

September 30

MILITARY: One marine is killed and three others wounded while trying to diffuse a bomb in Beirut, Lebanon.

October 1

NAVAL: At Bangor, Washington, the fleet ballistic submarine *Ohio* embarks on its first cold war deterrence cruise, armed with Trident missiles.

October 18

MARINES: Plans are announced to accept deliveries of the new High Mobility Multipurpose Wheeled Vehicle (HMMWV—or Hummer) to replace the beloved jeep.

October 22

MARINES: As soon as stocks of old C rations are depleted, marines will be victualled by the new meals-ready-to-eat (MRE) rations.

October 30

MARINES: In Beirut, Lebanon, the 24th Marine Amphibious Unit lands to relieve the 32nd MAU.

November 9

MARINES: In Washington, D.C., the commandant announces deliveries of the new M16A2 rifle, which will replace the older M16 variant.

- At Wahibah, Oman, the 31st Marine Amphibious Unit conducts Jade Tiger 83, a four-day exercise, in concert with Omani forces.

November 13

MILITARY: In a move of iconic importance, the Vietnam Veterans Memorial is dedicated in Washington, D.C. The names of all 59,800 servicemen and women killed in that conflict are etched in the memorial walls. Jan Scruggs, formerly of the 199th Light Infantry brigade, led the effort to raise funding for the shrine.

November 14–19

AVIATION: At Eskisehir Air Base, Turkey, the 527th Tactical Fighter Training Aggressor Squadron deploys three F-5E Tigers to help train the Turkish air force with Soviet-style tactics.

November 16

AVIATION: At Edwards Air Force Base, California, the space Shuttle *Columbia* lands safely; this is the first occasion on which a space vehicle orbits Earth with four crewmen.

November 22

MILITARY: President Ronald Reagan proposes constructing 100 MX Peacekeeper missiles with multiple warheads and deploying them in dense-pack silos, which are held easier to defend. Total costs are projected at \$26 billion.

November 23

NAVAL: The guided-missile cruiser *Mississippi*, assisted by a Coast Guard boarding party, is the first U.S. Navy vessel to help seize a drug-smuggling vessel at sea.

December 7

MARINES: In Washington, D.C., President Ronald Reagan replaces the Rapid Deployment Joint Task Force (RDJTF) with the Central Command, a unified, all-service headquarters whose primary responsibility is the Middle East, Southwest Asia, and the Indian Ocean.

December 16

AVIATION: At Griffiss Air Force Base, New York, the 416th Bombardment places its first air-launched cruise missile (ACLM) on alert.

December 24–30

AVIATION: A severe earthquake in the Yemen Arab Republic prompts the Military Airlift Command (MAC) to convey 87 tons of supplies and equipment to assist survivors.

December 28

NAVAL: The World War II–vintage battleship *New Jersey* is pressed into service a third time as part of President Ronald W. Reagan’s efforts to strengthen and enlarge the U.S. Navy. The vessel is now outfitted with 16 Harpoon antiship missiles and 32 Tomahawk cruise missiles.

1983

January 1

MILITARY: The Rapid Deployment Joint Task Force (RDF) is redesignated the U.S. Central Command (CENTCOM) at MacDill Air Force Base, Florida. This unified command coordinates military operations in over 25 countries, worldwide, and is initially headed by Lieutenant General Robert C. Kingston.

January 7

AVIATION: The new McDonnell Douglas F/A-18 Hornet, which is intended to replace the venerable A-4 Skyhawks and F-4H Phantom IIs, debuts with marine squadron VMFA-3124.

January 22

NAVAL: The new guided-missile cruiser *Ticonderoga* is commissioned, being the first vessel equipped with a highly automated Aegis weapon system; it is also the lead ship in a class that ultimately contains 27 vessels.

February

AVIATION: At Lagos, Nigeria, a C-141 Starlifter conveys 15 tons of communications equipment to replace a telecommunication center that has burned down.

MARINES: Following the U.S. Army’s lead, the Marine Corps adopts the new Kevlar helmet to replace the old M1 steel “pot.”

February 1

AVIATION: In a show of solidarity against regional Communist-inspired insurgencies, air force units visit Honduras to participate in Operation Ahus Tara

I with forces from Central American countries. Specifically, it is aimed at the Communist dictatorship in Nicaragua, which has been fomenting guerrilla wars throughout the region.

- At Davis Monthan Air Force Base, Arizona, the 868th Tactical Missile Training Squadron begins training with ground-launched cruise missiles (GLCMs) intended to be deployed in Europe.

February 2

AVIATION: At Luke Air Force Base, Arizona, the air force begins training pilots to fly the new F-16 Fighting Falcons.

MARINES: In Lebanon, a squad of Israeli tanks, attempting to pass through a U.S. checkpoint, is halted by Captain Charles B. Johnson when he steps in front of them, armed only with a .45-caliber pistol.

February 3

AVIATION: The entire force of Minuteman III intercontinental ballistic missiles is retrofitted with new reentry systems designed to enhance their retaliatory capabilities.

February 15

MARINES: In Beirut, Lebanon, the 24th Marine Amphibious Unit is relieved by the 22nd MAU.

March

AVIATION: At Langley Air Force Base, Virginia, the Air Force Thunderbirds demonstration team flies for the first time in their new F-16 fighters.

March 1

AVIATION: At Scott Air Force Base, Illinois, the Twenty-Third Air Force is organized as a diverse command capable of executing missions involving combat rescue, weather reconnaissance, missile site security, and aircrew special operations training.

- Once the 1st Special Operations Wing transfers to Hurlburt Field, Florida, that facility is reassigned from the Tactical Air Command (TAC) to the Military Airlift Command (MAC).

March 7

AVIATION: In South Korea, Team Spirit '83 commences as three wings of B-52Gs simulate minelaying operations off the coast.

March 15–28

AVIATION: At the Pacific Missile Test Range, Kwajalein, a B-52 successfully fires three navy AGM-Harpoon antiship missiles as the Strategic Air Command (SAC) seeks ways of performing sea interdiction missions.

March 22

MILITARY: After a seven-year period of intense testing, the U.S. Army Tank-Automotive and Armaments Command awards a contract to obtain 55,000 High-Mobility Multipurpose Wheeled Vehicles (HMMWV, or Hum-Vees) to replace the standard M551 utility "Jeep." Several versions are planned, including those armed with TOW antitank missiles.

March 31

MILITARY: At Fort Riley, Kansas, the first battery of M270 Multiple Launch Rocket Systems (MLRS) deploys with the 1st Infantry Division. Each battery can fire 12 M26 rockets, laden with smaller submunitions, over a distance of 19 miles. It is also the first multiple-rocket system acquired by the army since the Korean War.

April

MILITARY: The army assigns its first Bradley armored fighting vehicles (AFVs) to various cavalry and mechanized infantry units. These are heavily armed and armored, and capable of firing TOW antitank weapons, along with a 25mm chain gun (cannon) and several machine guns. Moreover, each Bradley can carry a squad of infantry in comparative safety throughout a modern combat environment.

April 1

AVIATION: The Strategic Air Command (SAC) yields four installations and 31 operational units to Space Command, as the majority of these are concerned with missile warning and space surveillance missions.

April 1–8

AVIATION: Flooding in Panama and earthquakes in Colombia prompt a C-130 Hercules aircraft to transport 34 tons of shelters, medical supplies, and electric generators to assist the survivors.

April 5–10

AVIATION: With southeastern Louisiana severely flooded by torrential rains, air force C-141 Starlifters convey 83 tons of food and medicine to victims.

April 11

MILITARY: A presidential panel recommends that the United States acquire 100 new MX Peacekeeper missiles and install them inside existing silos in Wyoming and Nevada.

April 12

AVIATION: For the first time since World War II, the army establishes a separate aviation branch to facilitate the deployment and development of helicopters and light aircraft.

April 18

TERRORISM: In Beirut, Lebanon, the U.S. embassy is destroyed by a bomb blast that kills 61 people, including 17 Americans (of whom three are soldiers and one a marine).

April 26

AVIATION: At Davis Monthan Air Force Base, the first ground-launched cruise missile (GLCMs) training crews are graduated and assigned to a tactical missile wing in Europe.

May 1

AVIATION: In the Caribbean, air force aircraft commence surveillance missions over the Bahamas to assist law-enforcement agencies in suppressing drug smuggling from offshore.

May 24

MILITARY: Congress authorizes \$625 million for the first batch of MX (Peacekeeper) missiles after President Ronald W. Reagan promises the Democrats to be more flexible in dealing with the Soviet Union during scheduled arms control talks.

May 30

MARINES: At Beirut, Lebanon, the 24th Marine Amphibious Brigade arrives to replace the 22nd MAU.

June

MILITARY: At Fort Leavenworth, Kansas, the School of Advanced Military Studies (SAMS) opens, which teaches its pupils military theory, history, and execution-based practical exercises.

June 4

AVIATION: At Hill Air Force Base, Utah, the few remaining F-105s in the Air Force Reserve stage a final flyby before being retired from active service.

June 10

AVIATION: At the U.S. Naval Test Pilot School, Patuxent River, Maryland, Colleen Norris becomes the first female naval aviator to graduate.

June 17

AVIATION: At Vandenberg Air Force Base, California, an MX (Peacekeeper) missile is launched for the first time with multiple dummy warheads that splash down in the Kwajalein test range.

June 18

AVIATION: At Cape Canaveral, Florida, scientist Sally J. Ride is the first American woman in space when she accompanies the *Challenger* space shuttle into orbit.

June 23

MILITARY: In Washington, D.C., General John A. Wickham is appointed the army's 30th chief of staff. He continues the policies of his predecessor in rendering the army more easily transported to trouble spots around the world.

June 26

AVIATION: The Military Airlift Command dispatches three C-130 Hercules aircraft to northwestern Peru to provide relief supplies to victims of flooding.

June 28

MARINES: Sergeant Major Robert E. Cleary is appointed the 10th sergeant major of the Marine Corps.

June 30

MARINES: At this date, Marine Corps personnel stands at 19,983 officers and 174,106 enlisted men and women.

July 1

AVIATION: In light of the ongoing Iran-Iraq War, the air force deploys a provisional support squadron at Riyadh Air Base, Saudi Arabia. The oil-rich region of the Persian Gulf remains an area of vital strategic interest to the United States and the West.

July 7

AVIATION: At McEntire Air National Guard Base, South Carolina, the first F-16As delivered to a National Guard unit arrive at the home of the 169th Tactical Fighter Group.

- General Dynamics completes its 1,000th F-16 Falcon of the 2,165 ordered by the air force.

July 24–August 6

AVIATION: The air force dispatches two UH-1 helicopters to deliver medical supplies and personnel to flood victims in western Ecuador.

July 26

MARINES: At Camp Lejeune, North Carolina, the 6th Amphibious Marine Brigade activates as the latest headquarters dedicated to the Marine Prepositioning Force (MPF) mission.

July 26–September 12

NAVAL: At various times the carriers *Ranger* and *Coral Sea*, and the battleship *New Jersey*, deploy off the coasts of Central and South America in a show of force against a number of Communist insurgencies there.

August

AVIATION: The 907th Tactical Airlift Group dispatches three C-123 Providers to spray insecticide over 11 Minnesota counties to fight an encephalitis epidemic.

August 1

AVIATION: At Andrews Air Force Base, Maryland, a microburst packing 120 mile-per-hour winds inflicts \$465,000 in damages.

August 7

TERRORISM: At Hahn Air Base, Germany, a bomb, presumably planted by anti-nuclear activists, explodes at the officer's club.

August 10

AVIATION: In Washington, D.C., Secretary of Defense Caspar W. Weinberger announces that the air force will deploy 100 MX (Peacekeeper) missiles in existing Minuteman silos.

August 15–September 15

AVIATION: In support of an ongoing security assistance program, the air force dispatches 12 Starlifters to convey 185 tons of cargo to the African nation of Chad.

August 28

MARINES: An outpost comes under fire from one of many hostile factions in Beirut, Lebanon, and marines receive permission to fire back in self defense.

August 29

MARINES: At Beirut Airport, Lebanon, marine positions are heavily shelled by militant factions; two marines are killed and 14 wounded. Thereafter, marine artillery is ordered to provide counterbattery fire wherever possible and repeated exchanges grow more common.

August 30

AVIATION: On the space shuttle *Challenger*, Lieutenant Colonel Guion S. Bluford becomes the first African American to ride in space.

August 31

NAVAL: In Annapolis, Maryland, Rear Admiral Charles R. Larson gains appointment as the 51st superintendent of the U.S. Naval Academy.

September 1

AVIATION: A Korean Airlines 747 is shot down by Soviet fighters after it strays over Sakhalin Island and air force HC130 transports of the 33rd Aerospace Rescue and Recovery Squadron are deployed from Kadena Air Base, Okinawa, to comb the waters for survivors; all 269 passengers perish.

MILITARY: The first MLRS rocket battery deploys to Germany as part of the 8th Infantry Division.

NAVAL: Off the Kamchatka Peninsula, Soviet Union, U.S. Navy vessels assist the search for wreckage and survivors from Korean Air Lines Flight 007, which was shot down by the Soviets after it strayed into their airspace.

MARINES: A force of 2,000 marines is dispatched to war-torn Lebanon as part of an international peacekeeping force.

September 3–25

AVIATION: To support American marines in Lebanon, the Military Airlift Command (MAC) commences Operation Rubber Wall, and delivers 4,000 tons of supplies in 100 heavy-lift missions. The effort involves 85 C-141 Starlifters, 24 C-5 Galaxies, and four C-130 Hercules sorties.

September 5

AVIATION: A Strategic Air Command (SAC) KC-135 piloted by Captain Robert J. Goodman refuels an F-4E Phantom II jet four times over water and even tows it along with the refueling boom until it lands safely. Goodman and his crew receive the Mackay Trophy for their efforts.

September 8

NAVAL: In Beirut, Lebanon, the frigate *Bowen* supplies close support fire to assist marines deployed there as an international peacekeeping force. Her 5-inch guns are trained on Druze militiamen who had been firing on the Marines with small arms and mortars.

September 12

MARINES: At Beirut, Lebanon, the 31st Marine Amphibious Brigade arrives off the coast from the Indian Ocean and remains there until October 1.

September 13

MILITARY: In light of attacks by Muslim extremists, President Ronald W. Reagan authorizes U.S. Marine contingents deployed in Lebanon to call for naval support fire and air strikes to protect themselves.

September 15

MILITARY: Reversing itself after the Soviet downing of Flight 007, the Democratic-controlled House of Representatives votes to approve a \$187.5 billion defense

bill that includes funding for both the MX Peacekeeper missile and B-1B Lancer bomber, along with a new generation of chemical weapons.

September 19

NAVAL: Off the Lebanese coast, the guided-missile cruiser *Virginia* and the destroyer *John Rodgers* unleash 338 5-inch rounds near the approaches of Sug el-Gharb village to support the Lebanese army there. This marks a shift in American policy; heretofore warships fired only in defense of marine positions.

September 25

NAVAL: In a sign of the seriousness of American involvement in Lebanese affairs, the battleship *New Jersey* arrives off the coast of that wartorn nation.

September 26

MARINES: At Beirut, Lebanon, a cease-fire is called between the marines and several militant factions, but sniping persists on both sides.

September 28

AVIATION: The EF-111A Raven electronic warfare aircraft become operational after extensive testing. Pilots dub it the "Spark Vark" because of its extensive electronic suite.

September 30

AVIATION: The first production batch of Hughes AH-64A Apache attack helicopters roll out of the factory.

October 1

AVIATION: At Davis Monthan Air Force Base, Arizona, the last operational B-52D is retired to the "bone yard."

MILITARY: At Fort Gillem, Georgia, the 2nd U.S. Army is activated to oversee Reserve units in Kentucky, Tennessee, North Carolina, South Carolina, Mississippi, Alabama, and Georgia.

NAVAL: The Naval Space Command is organized under Captain Richard Truly, a former astronaut. This consolidates several space services into one centrally administered unit.

October 4–5

AVIATION: The 30th Special Operations Squadron sends four CH-3 helicopters to Maricopa, Arizona, to rescue 57 civilians trapped by floodwaters.

October 6

AVIATION: The Strategic Air Command (SAC) modifies three of its B-52Gs to carry and fire the AGM-Harpoon antiship missile. These aircraft are intended to perform maritime interdiction missions.

October 13

AVIATION: In Washington, D.C., the National Air and Space Museum, Smithsonian Institution, announces that it is building a large annex at Dulles International Airport to house the Concorde, the space shuttle *Enterprise*, and the B-29 *Enola Gay*.

October 19

MARINES: The 22nd Marine Amphibious Brigade is en route to Beirut, Lebanon, when a Communist coup on the island of Grenada forces it to change course for

the Caribbean. Apparently, 1,000 American citizens, mostly students at the St. George Medical School, stand to be held hostage.

October 22

DIPLOMACY: The Organization of Eastern Caribbean States, fearful that Grenada will become a Soviet outpost for exporting revolutionary activities, asks the United States to intervene on that island.

October 23

AVIATION: Transports of the Military Airlift Command (MAC) convey 239 dead and 95 wounded marines from Beirut, Lebanon, to European and American hospitals for treatment or burial.

TERRORISM: An explosive-laden truck driven by suicide jihadists explodes in the 24th Marine Amphibious Unit compound at Beirut, Lebanon, killing 241 and wounding 71 men of the 1st Battalion, 8th Marines. This is the highest one-day death toll of marines since World War II. Minutes later, a second truck bomb also kills 58 French soldiers of a peacekeeping force. This murderous act prompts President Ronald Reagan to reevaluate the marines' role in the peacekeeping mission there.

October 25–30

AVIATION: Transports of the Military Airlift Command (MAC) and the Air Force Reserve fly 11,389 passengers and 7,709 tons of cargo during Operation Urgent Fury in Grenada. A total of 496 sorties are flown by C-141 Starlifters, C-5 Galaxies, and C-130 Hercules aircraft.

A Sikorsky CH-53D Sea Stallion helicopter hovers above the ground during Operation Urgent Fury in Grenada. (*Department of Defense*)

- Over Grenada, a flight of MC-130s drops paratroopers on Point Salines, Grenada, and Lieutenant Colonel James J. Hobson, Jr., manages to keep his aircraft under control despite intense antiaircraft fire, guiding the mission to success. For this he wins a Mackay Trophy.

MILITARY: In response to the takeover of the Caribbean island nation of Grenada by Marxist revolutionaries, who killed prime minister Maurice Bishop and took over 1,100 American medical students hostage, President Ronald W. Reagan unleashes Operation Urgent Fury to rescue them. U.S. Air Force, Marine Corps, Army Rangers, the 82nd Airborne Division, and U.S. Navy SEALs all come ashore and crush an armed force bolstered by Cuban soldiers, taking the whole captive. The attack begins at dawn with a low-altitude parachute assault by the 2nd Ranger Battalion, 75th Infantry, against the unfinished Soviet airstrip at Port Salines. They overcome stiff resistance by Cuban and Grenadian forces and secure their objective by 8:50 A.M.

NAVAL: Overall command of Operation Urgent Fury is entrusted to Vice Admiral Joseph Metcalf III. It commences before dawn when a U.S. Navy SEAL team infiltrates the capital of St. George's and captures Government House. Governor General Sir Paul Scoon is released from captivity, although Communist forces besiege the liberators.

MARINES: A force of 400 men from the 22nd Marine Amphibious Brigade are helicoptered from the assault ship *Guam* to Pearls Airport, the island's only operational airfield. The balance of the brigade lands subsequently at Grand Mal Bay; three marine aviators are killed in action.

October 26

AVIATION: At the Tonopah Test Range, the initial batch of five F-117 Nighthawks reaches initial operational capability. Meanwhile, the activity of 18 A-7 Corsair IIs provide a convenient cover for ongoing operations.

- On Grenada, Governor General Sir Paul Scoon is helicoptered to the assault ship *Guam* for his own safety, while hundreds of American students are airlifted from the Point Salines airstrip.

MARINES: The first deliveries of the LAV-25, the first wheeled light-armored vehicle in Marine Corps history, are completed.

- Men of the 22nd Marine Amphibious Unit (SOC) relieve U.S. Navy SEALs besieged at Government House, Grenada.

October 27

AVIATION: In Spain, B-52 Stratofortresses deploy at air bases for the first time.

MILITARY: American forces on Grenada round up 638 Cuban prisoners, who have suffered 24 killed and 59 wounded. An additional 45 Grenadian soldiers are slain in combat. American losses are 18 dead and 166 wounded, mostly through friendly fire. The Soviet diplomatic delegation on the island is also placed on an American transport plane and removed to Cuba at once.

November 1

NAVAL: In Washington, D.C., retired admiral Hyman G. Rickover is awarded a second congressional gold medal, a distinction he shares only with general and president Zachary Taylor.

- In the Arabian Sea, a fire breaks out in the engine room of the carrier *Ranger*, which kills six sailors and injures 35.

November 1–5

AVIATION: A severe earthquake rattles northern Turkey, so the Military Airlift Command (MAC) dispatches four C-141 Starlifters and six C-130s Hercules transports to convey 234 tons of relief supplies to the survivors.

November 8

NAVAL: In Washington, D.C., 76-year-old Captain Grace M. Hopper, who was partly responsible for inventing computer-programming languages, is promoted to commodore.

November 11

MILITARY: The United States deploys the first of 160 cruise missiles in Great Britain, much to the consternation of the Soviet Union and the European peace movement. All told, the Americans deploy 571 medium-range missiles to counter similar Soviet weapons.

November 17

NAVAL: In the Arabian Sea, the destroyer *Fife* collides with the Soviet missile frigate *Razyashchiy* as it attempts to approach close to the carrier *Ranger*; the collision results in minor damage and no casualties.

November 19

MARINES: In Beirut, Lebanon, the 22nd Marine Amphibious Unit comes ashore to relieve the 24th MAU.

November 23

AVIATION: In Bonn, West Germany, the parliament ignore the protests of the Greens and pro-Communist radicals and approves deployment of air force ground-launched cruise missiles (GLCMs) and U.S. Army Pershing II ballistic missiles.

December

MILITARY: The bulk of American forces involved in Operation Urgent Fury are gradually withdrawn from the Caribbean island of Grenada. This small but successful action witnessed the combat debut of UH-60 Black Hawk helicopters and over 100 female military personnel.

December 3

AVIATION: The Strategic Air Command (SAC) begins disbanding its Titan II inter-continental ballistic missiles (ICBMs) by inactivating the 571st Strategic Missile Squadron.

December 4

AVIATION: A force of 28 navy warplanes from the carriers *Independence* and *John F. Kennedy* attack Syrian antiaircraft and missile batteries near Beirut, Lebanon. Good results are achieved but an A-6 flown by Lieutenant Mark A. Lange is shot down; Lange is killed and his navigator, Robert O. Goodman, is captured. An A-7 flown by Commander Edward K. Andrews is also lost, although the pilot is rescued.

MARINES: A heavy bombardment of marine positions near Beirut, Lebanon, results in eight dead and two wounded. Prolonged exchanges of firepower with Druze militiamen resume.

December 6

AVIATION: At Langley Air Force Base, Virginia, the new National Transonic Wind Tunnel is dedicated; this new device is expressly intended for research on the faster jets being designed or under construction.

December 14

NAVAL: East of Beirut, Lebanon, the battleship *New Jersey* unleashes its 16-inch guns against militant Druze extremists for the first time.

TERRORISM: The U.S. embassy in Kuwait is struck by a truck bomb, killing dozens of innocent bystanders. Marine security guards protect the smoldering remnants.

December 15

AVIATION: Despite the pleas of antinuclear protestors, the 56th Field Artillery Brigade is the first NATO unit to deploy new Pershing II tactical nuclear missiles. This weapon has a range of over 1,000 miles, enhanced accuracy, and carries a warhead ranging from five to 50 kilotons in yield.

December 23

AVIATION: The 390th Electronic Combat Squadron becomes the first operational unit with General Dynamics EF-11A Ravens.

1984

January

MILITARY: Although army manpower levels are basically stabilized, the force is increasingly capable owing to the mass deployment of several new and advanced weapons systems. Plans are also being drawn up to convert the 7th Infantry Division into a highly mobile "light" formation.

January 1

AVIATION: The new Global Positioning System (GPS) is taken over by the Space Command.

January 3

DIPLOMACY: After the Reverend Jesse Jackson meets Syrian president Hafez al-Assad in Damascus, Syria, Lieutenant Robert O. Jackson, who was shot down on December 4, 1983, is released.

January 12

AVIATION: At Cherry Point, North Carolina, the 2nd Marine Air Wing (2nd MAW) accepts its first deliveries of improved AV-8B Harrier jump jets.

January 21

MILITARY: The American antisatellite missile system completes its first test in being launched by an F-15 fighter and positing a dummy miniature-vehicle emulator.

January 26

AVIATION: At the Army Aviation Center, Fort Rucker, Alabama, the first Hughes Aircraft AH-64 Apache attack helicopters are deployed. This aircraft is destined

to replace the 20-year-old Bell AH-1 Cobra and is equipped with a powerful 30mm chain gun and highly accurate Hellfire laser-guided missiles.

January 28

AVIATION: At Hill Air Force Base, Utah, the 419th Tactical Fighter Wing trades its aging F-105 Thunderchiefs for new F-16 Falcons. They are also the first Air Force Reserve unit so equipped.

January 31

AVIATION: The new AGM-81A Firebolt target vehicle hits Mach 1.4 at 104,000 feet, breaking world records for speed and altitude.

February 1

MARINES: Rather than lose more men to internecine civil strife, President Ronald W. Reagan orders marine detachments stationed at Beirut, Lebanon, withdrawn.

February 3

AVIATION: At RAF Upper Heyford, England, the 20th Tactical Fighter Wing becomes the first EF-111A Raven unit deployed with the U.S. Air Force in Europe (USAFE).

February 3–11

AVIATION: Lieutenant Colonel Robert L. Stewart becomes the first soldier astronaut to accompany a space shuttle into orbit when he rides the *Challenger* into orbit.

February 4

AVIATION: The HH-60 Night Hawk, a combat rescue version of the Black Hawk helicopter, performs its maiden flight. However, funding for construction is not forthcoming and the project is cancelled.

February 7

AVIATION: In Earth orbit, Captain Bruce McCandless makes the first untethered space walk from the space shuttle *Challenger* while operating a manned maneuvering unit.

DIPLOMACY: In Washington, D.C., President Ronald W. Reagan announces his decision to withdraw marines from the multinational peacekeeping force in Beirut, Lebanon.

February 8

NAVAL: In light of continuing tensions in Lebanon, the battleship *New Jersey* fires 288 16-inch shells upon Syrian and Druze positions in the Bekaa Valley, wiping out eight artillery batteries and killing the Syrian general in charge of Lebanon.

February 9

NAVAL: Off Lebanon, destroyers *Caron* and *Moosbrugger* fire 400 5-inch rounds against hostile positions along the shore. This is also the heaviest American bombardment of the Lebanese civil war.

February 10–11

AVIATION: With the situation in Lebanon spiraling out of control, navy and marine helicopters evacuate several hundred American citizens and foreign nationals from Beirut.

February 14

NAVAL: The guided-missile destroyer *Claude V. Ricketts* shells Syrian-held positions east of Beirut.

February 21–26

MARINES: The 22nd Marine Amphibious Brigade withdraws from Beirut, Lebanon, and redeploys on vessels of the Sixth Fleet offshore. The only marines remaining are those posted as embassy guards.

February 23

AVIATION: The F-15C Eagle officially replaces the aging F-4 Phantom II in the Tactical Air Command (TAC) as its standard air-superiority fighter.

February 24

AVIATION: The air force chooses the McDonnell Douglas F-15E Strike Eagle over the delta-wing General Dynamics F-16XL as its next dual role fighter bomber; almost 400 are acquired and are still in service today.

- Two C-141 Starlifters land at Cherry Point, North Carolina, in support of withdrawing U.S. Marines from Larnaca, Cyprus, and Lebanon.

March 6

AVIATION: Over Canada's Northern Test Range, a B-52G from the 319th Bombardment Wing test launches an air-launched cruise missile (ALCM) for the first time.

March 19–April 9

AVIATION: Recent threats against Egypt and Sudan by Libya result in an E-3A Sentry aircraft being dispatched to the region. This is joined by 17 C-141 Starlifter and 28 C-5 Galaxy missions to convey military supplies to the Egyptians.

March 21

NAVAL: In the Sea of Japan, the carrier *Kitty Hawk* collides with a Soviet Victor I-class nuclear attack submarine that surfaces in its path; the latter is so heavily damaged that it has to be towed to a Soviet naval base at Vladivostok.

March 24

AVIATION: In South Korea, a CH-53 crashes during Ream Spirit 84 exercises, killing 18 U.S. Marines and 11 Republic of Korea (ROK) Marines.

April 2

NAVAL: In the South China Sea, the frigate *Harold E. Holt* is struck by three signal flares fired at it by the Soviet aircraft carrier *Minsk* as it passed to within 300 yards, but no damage results.

April 4

MARINES: At Camp Lejeune, North Carolina, the LAV-25 equipped 2nd Light Armored Vehicle Battalion is organized.

April 6

AVIATION: Astronauts from the space shuttle *Challenger* conduct the first satellite repair program by using the Canadian-built "arm" to grasp an ailing satellite, repair it, and then restore it to orbit.

USS *Iowa* fires a full broadside during a target exercise near Vieques Island, Puerto Rico. (*Department of Defense*)

- The 375th Aeromedical Airlift Wing acquires the first of 80 Learjet C-21A aircraft, which gradually replace its older Cessna CT-39 Sabreliners.

April 11

AVIATION: The 375th Aeromedical Airlift Wing receives its first Beech C-12F operational support aircraft; a total of 40 are purchased.

April 15

TERRORISM: At Oshakati, Namibia, a land mine planted by Marxist guerrillas kills an American diplomat and the army attaché.

April 19

AVIATION: At Robins Air Force Base, Georgia, construction begins on the phased array, sea-launched ballistic missile warning system.

April 28

NAVAL: The World War II-vintage battleship *Iowa* is recommissioned into active service.

May 2

NAVAL: In New Orleans, Louisiana, the new Bell Aerospace Textron landing craft air-cushion (LCAC) debuts. It is hoped this new hovercraft design will bring better speed and range to amphibious operations.

May 16

AVIATION: Afghan refugees at Peshawar, Pakistan, receive 22 tons of medical supplies from C-141 Starlifters dispatched by the Military Airlift Command (MAC).

May 25

AVIATION: The Vietnam War's unknown soldier returns home aboard a C-141 Starlifter for internment at Arlington National Cemetery. He is subsequently identified as U.S. Air Force lieutenant Michael J. Blassie and reburied in his hometown of St. Louis, Missouri.

May 28

MILITARY: This Memorial Day, President Ronald Reagan offers a tribute to the only unidentified serviceman killed in Vietnam.

June

AVIATION: A Schweizer TG-7A motor glider is delivered to the U.S. Air Force Academy for airmanship programs and is relegated to the 94th Air Training Squadron.

June 10

MILITARY: The army experimental antiballistic missile system fired from Vandenberg Air Force Base, California, scores a direct hit on a target missile launched from Kwajalein Atoll in the Pacific. This is the equivalent of hitting a bullet with a bullet.

June 15

AVIATION: At Dyess Air Force Base, Texas, a C-130 Hercules from the Military Airlift Command (MAC) flies to Kansas City, Missouri, with 4.5 tons of pumping equipment to assist efforts to fight floods in that part of the state.

- At Vandenberg Air Force Base, California, an MX (Peacekeeper) missile is flight-tested with a Mark-21 test reentry vehicle for the first time.

June 16

AVIATION: At Fort Worth, Texas, the improved F-16C Falcon performs its maiden flight. This new design is equipped with improved Heads up Display (HUD) instrumentation and improved multimode radar.

June 20

AVIATION: The 384th Air Refueling Wing, Strategic Air Command (SAC), receives its first KC-135R Stratotanker aircraft. This version is equipped with new CFM-56 fan jet engines, which possess higher thrust and lower fuel consumption.

June 21

AVIATION: A Military Airlift Command (MAC) C-141 Starlifter loaded with supplies for U.S. Antarctic bases at McMurdo Sound is refueled en route by a KC-10 Extender from the 22nd Air Refueling Wing flying out of Christchurch International Airport, New Zealand.

June 25–26

AVIATION: In the Gulf of Sidra off Libya, F-14 Tomcats launched from the carrier *Saratoga* fly to demonstrate American rejection of that nation's claim to international waters.

June 30

AVIATION: The air force closes Hancock Field, New York, after 32 years of operations.

MARINES: At this time, Marine Corps manpower levels stand at 20,366 officers and 175,848 enlisted men and women.

July

AVIATION: At Loring Air Force Base, Maine, the first deliveries of AGM-84 Harpoon antiship missiles are accepted by the 69th Bombardment Squadron. These are to be carried on B-52 bombers for shipping interdiction at sea.

July 14

NAVAL: In Maryland, the *Corporal Louis J. Hauge, Jr.*, the first vessel expressly designed for the Marine Prepositioning Force, is launched.

July 31

AVIATION: At Davis Monthan Air Force Base, Arizona, the 390th Strategic Missile Wing is the first Titan II unit to be deactivated.

August

MILITARY: The army continues with plans to lighten several existing formations to make them more mobile, including the 6th and 25th Infantry Divisions, and the famous 10th Mountain Division.

August 7–October 2

AVIATION: Operation Intense Look unfolds as the United States begins mine-sweeping efforts in the Red Sea at the request of Egypt and Saudi Arabia after several commercial vessels mysteriously exploded and sank. In support of this effort, air force transports convey 1,300 tons of cargo and 1,000 military personnel to the region.

August 8

AVIATION: In Europe, the first C-23 Sherpa begins operating as a small cargo/liason aircraft that flies between airfields and depot centers.

August 17

AVIATION: In the Gulf of Suez, Helicopter Mine Countermeasure Squadron 14 (HM-14), operating from the amphibious transport dock *Shreveport*, begins a 22-day operation clearing mines from that strategic waterway.

August 19–20

AVIATION: The 22nd Air Force dispatches two C-141 Starlifters to evacuate 382 American military and civilian personnel from Johnson Island, 715 miles from Hawaii, as Typhoon Kell approaches.

August 28

AVIATION: In a significant political and military development, a C-5 Galaxy touches down at Florennes Air Base, Belgium, with the first supply of ground-launched cruise missiles (GLCMs). The noisy and KGB-orchestrated antimissile movement throughout Europe, sensing the futility of their efforts, begins disbanding.

August 29

AVIATION: At Sembach Air Base, Germany, the last OV-10 Broncos depart after performing for a decade with the U.S. Air Force Europe (USAFE).

September 2–3

AVIATION: In South Korea, helicopters of the 38th Aerospace Rescue and Recovery Squadron (Arrs) save 148 stranded civilians in a recent flood.

September 4

AVIATION: At Palmdale, California, the first production B-1B Lancer intercontinental strategic bomber is rolled out of the factory for flight testing.

September 10

MILITARY: The School of the Americas is relocated from Fort Gulick, Panama Canal Zone, to Fort Benning, Georgia, in accordance with provisions of the 1977 Panama Canal Treaty. The school serves as a training agency to foster close cooperation between the U.S. Army and those of Latin American nations.

September 14–18

AVIATION: Retired air force colonel and aeronaut Joe Kittinger, Jr., flies a balloon nonstop from Caribou, Maine, to Savona, Italy, a 3,550-mile journey covered in 84 hours. He also establishes a new balloon distance record.

September 20

TERRORISM: In Beirut, Lebanon, the U.S. embassy annex is bombed and 23 people are killed. The dead include Petty Officer Michael R. Wagner, while two sailors and four marine guards are wounded. U.S. ambassador Reginald Bartholomew is also killed.

September 28

AVIATION: After a hiatus of 13 years, marine helicopter squadron HMM-364 is resurrected at Kaneohe Bay, Hawaii.

October 1

MILITARY: At Fort Sheridan, Illinois, the 4th U.S. Army is activated to oversee Army Reserve units in Ohio, Michigan, Illinois, Indiana, Iowa, Minnesota, and Wisconsin.

October 11–14

AVIATION: In San Juan, Puerto Rico, transports of the Military Airlift Command (MAC) convey Secret Service vehicles for use by Pope John Paul II during his visit to the island.

October 18

AVIATION: At Palmdale, California, the first operational B-1B, christened *Star of Abilene*, performs its maiden flight ahead of schedule.

October 18–20

AVIATION: After Colorado and New Mexico are struck by heavy snowstorms, the Air Force Rescue Coordination Center directs search-and-rescue operations that save 47 lives.

October 23–24

AVIATION: During a sentimental tour of the Philippines by General Douglas MacArthur's veterans, a fire breaks out at the Pines Hotel in Baguio. An H-3 helicopter from the 31st Aerospace Rescue and Recovery Squadron (ARRS) lifts nine people trapped on the roof to safety. A C-130 Hercules transport also carries 48 injured people to Clark Air Base for treatment.

October 25

AVIATION: At Salto di Quirra, Sardinia, F-4Es of the 86th Tactical Fighter Wings participate in live missile fire exercises with U.S. Navy units.

November 2

AVIATION: At McConnell Air Force Base, Kansas, a fire erupts as a Titan II missile is being drained of liquid fuel; the incident threatens to delay deactivation of this system.

November 19

AVIATION: At Bogotá, Colombia, two C-141 Starlifters from the Military Airlift Command deliver vehicles, small arms, and ammunition to the U.S. embassy after it is threatened by drug lords.

November 20

AVIATION: In Washington, D.C., President Ronald W. Reagan approves creation of a new, unified United States Space Command.

November 23

MILITARY: Along the Demilitarized Zone (DMZ), South Korea, a Communist defector suddenly breaks for American lines, triggering a huge fire fight near the Panmunjom Truce Compound; one American is injured.

November 30

NAVAL: After the Cuban government refuses an American request to allow a Coast Guard vessel to rescue a disabled American ship that had drifted into Cuban waters, the *Nimitz* battle group deploys offshore and the Cuban government allows the vessel to be towed.

December 1

AVIATION: At Kelly Air Force Base, Texas, the first C-5A Galaxy is delivered to the Air Force Reserve.

December 2–4

AVIATION: When the *Carl Vinson* and *Midway* carrier battle groups sail to within 50 miles of Vladivostok, Russia, the Soviets respond by dispatching over 100 aircraft and vessels in their direction.

December 11–12

AVIATION: Survivors and two wounded victims of a hijacked Kuwaiti airliner are flown by C-141 Starlifters to Rhein-Main Air Base, West Germany, and thence to the United States.

December 20

AVIATION: In the aftermath of a collapsed tunnel in Huntington, Utah, two C-130 Hercules aircraft convey 23.8 tons of emergency equipment to help rescue the 27

coal miners trapped there. Although the equipment allows rescue parties to reach the miners, all had died from smoke inhalation beforehand.

December 22

MILITARY: At Pontiac, Michigan, the U.S. Military Academy wins its first post-season football bowl game by defeating the University of Michigan at the Cherry Bowl.

December 22–March 1985

AVIATION: Ongoing famine in the Sahel region of Africa results in eight Military Airlift Command (MAC) C-141 Starlifters being dispatched with 200 tons of food and medical supplies to Kassala, Sudan.

1985

January

AVIATION: Headquarters, Strategic Air Command (SAC) determines that the recent leak of a Titan II ICBM at McConnell Air Force Base could have been prevented with better procedures. The continuing deactivation of Titan IIs continues ahead as scheduled.

January 1

AVIATION: Having spent 13 hours of flight time attempting to lower the nose gear, Colonel David E. Faught, 97th Bombardment Wing, makes a successful nose gear-up landing without serious damage to the aircraft, a KC-135. He wins a Mackay Trophy for his efforts.

January 4

AVIATION: Major Patricia M. Young is appointed commander of Detachment 1, 20th Missile Warning Squadron. She is the first female to lead an Air Force Space Command unit.

January 5

AVIATION: After an Eastern Airlines Boeing 727 crashes in the Andes Mountains, the Military Airlift Command (MAC) dispatches a C-141 Starlifter carrying a Sikorsky S-70 helicopter to look for the wreckage and any possible survivors.

January 18–23

AVIATION: The Military Airlift Command (MAC) orders C-141 Starlifter flights to the Sudan to assist ongoing relief efforts there; 62 tons of food are delivered.

January 19–21

AVIATION: After Typhoon Eric devastates Viti Levu, Fiji, the 75th and 312th Military Airlift Squadrons send two C-5 Galaxies and one C-141 Starlifter with 186 tons of relief supplies to assist the survivors.

January 24–27

AVIATION: At Cape Canaveral, Florida, the space shuttle *Discovery* blasts off under Colonel Loren J. Shriver on its first all-military mission. This is also one of the shortest shuttle missions, lasting only 73 hours, 33 minutes.

January 28

AVIATION: At Kunsan Air Base, South Korea, two H-3 Jolly Green Giant helicopters return after rescuing 10 shipwrecked Korean fishermen.

January 31

MILITARY: Another military icon falls to the wayside as the army decides to replace its famous M1911A1 .45 caliber automatic pistol, in service since 1911, with the smaller Beretta M9 9mm pistol.

February 2

DIPLOMACY: At the conclusion of ANZUS Exercise Sea Eagle, the government of New Zealand denies permission for the destroyer *Buchanan* to dock there, citing its undesirability as a nuclear-armed or nuclear-powered vessel. However, both the United States and Great Britain conform to their policy of neither admitting nor denying the presence of nuclear weapons onboard their warships.

February 3

AVIATION: At Howard Air Force Base, Panama, C-141 Starlifters of the Military Airlift Command (MAC) are sent to Argentina after a devastating earthquake to aid 12,000 refugees.

February 4

AVIATION: The Strategic Air Command (SAC) institutes the practice of gender-specific missile launch crews (either male or female) for Minuteman and Peacekeeper facilities. Previously, women were restricted to Titan II launch sites.

February 18

GENERAL: Former general and Vietnam commander William Westmoreland and CBS network reach an out-of-court settlement in the former's \$120 million libel suit against the network. The general asserts that CBS falsely accused him of misrepresenting Communist manpower and strength.

March

MILITARY: Due to budgetary constraints, the army ceases its support for athletes training for the modern Olympic pentathlon, which includes running, swimming, fencing, shooting, and horseback riding.

March 5–9

AVIATION: Air force transports complete four famine-relief missions by flying in 123 tons of food to victims in Sudan, Niger, and Mali.

March 8

AVIATION: In the Bahamas, police and U.S. Drug Enforcement Agency officials bust a \$320 million cocaine smuggling effort with the help of helicopters provided by the Military Airlift Command. Joint drug interception campaigns continue the following month.

March 15

AVIATION: In Chile, a Military Airlift Command C-5 Galaxy arrives with 1,000 rolls of plastic sheeting to shelter victims of a devastating earthquake that struck in February.

March 24

MILITARY: In Ludwigslust, East Germany, a Soviet sentry shoots and kills Major Arthur D. Nicholson of the U.S. Military Liaison Mission. He is considered the last American killed in the cold war and receives a posthumous Purple Heart and the Legion of Merit.

March 25

AVIATION: The air force relaxes its prohibitions against allowing women to serve in combat conditions by allowing them to serve as forward air controllers (FAC) and as crew members on C-130 transports and gunships.

April 4

AVIATION: Retired air force leader James H. Doolittle is elevated to full general, four-star rank. He is the first Air Force Reserve officer so honored.

April 5

AVIATION: When a large fire devastates 7,000 acres across six counties in drought-stricken western North Carolina, two C-141 Starlifters and a C-130 Hercules arrive with 10 tons of fire-fighting equipment, 21,000 gallons of fire retardant, and 190 firefighters to assist.

April 20

AVIATION: By this date, the first B-52 crews completely trained in Harpoon anti-ship missile operations are graduated.

April 29–May 17

AVIATION: At Spangdahlem Air Base, West Germany, U.S. Air Force in Europe sponsors Salty Demo, a basewide exercise to gauge that facility's ability to defend itself against an attack and presumed combat operations.

April 30

GENERAL: On the 10th anniversary of the fall of Saigon to Communist North Vietnamese forces, hundreds of people attend ceremonies at the Vietnam War Memorial in Washington, D.C. This long, black wall lists the names of all 58,022 men and women who perished in that conflict, now viewed by a majority of Americans to have been a mistake.

May 6

AVIATION: Over the Sea of Japan, a CH-53D crashes into the ocean, killing 17 marines.

May 20

NAVAL: U.S. Navy chief warrant officer John A. Walker, Jr., is arrested by the FBI for espionage and charged with providing top-secret information to the Soviet Union since 1967, including information on American surface and submarine operations and keys to deciphering encrypted radio transmissions; the damage Walker inflicted on the navy is regarded as incalculable.

May 24

MARINES: According to revised Marine Corps orders, female marines are subject to increased amounts of combat-related training, especially in the fields of marksmanship and defensive tactics.

May 31

MARINES: At Camp Pendleton, California, the 1st Light Armored Vehicle Battalion is organized.

June 14

MARINES: In Washington, D.C., Commandant Kelley institutes a pilot program to familiarize Marine Amphibious Units with certain special operations.

June 14–30

TERRORISM: Shiite extremists seize Trans World Airlines Flight 847 midway on a flight between Athens and Rome, and force it to land at Beirut, Lebanon. U.S. Navy steelworker second class Robert D. Walker is murdered by the hijackers, but subsequent negotiations free the 39 hostages on June 30.

June 19

TERRORISM: In El Salvador, Communists open fire at an outdoor café, killing 13 people; four off-duty marine embassy guards are among those slain.

June 21–July 25

AVIATION: In southern Idaho, a severe locust infestation prompts the dispatch of three C-123K Providers for aerial spraying purposes. They cover 795,000 acres in 73 sorties.

June 29

AVIATION: The air force accepts delivery of its first Rockwell B-1B Lancer strategic bomber; only 100 are scheduled for acquisition owing to their considerable expense.

- At Andersen Air Force Base, the 60th Bombardment Squadron becomes the second B-52G unit equipped and trained to fire Harpoon antiship missiles.
- At Naval Air Station New Orleans, Louisiana, the 159th Tactical Fighter Group is the first Air National Guard unit equipped with F-15 Eagles.

June 30

AVIATION: At Vandenberg Air Force Base, California, the final MX (Peacekeeper) test is conducted by the Air Force Space Command.

July 1

AVIATION: At Carswell Air Force Base, Texas, the 7th Bombardment Wing is the first B-52H unit equipped to operate air-launched cruise missiles (ACLMs).

- A C-141 Starlifter from the 438th Military Airlift Wing transports 39 passengers from TWA Flight 847, which had been hijacked and flown to Lebanon, to Rhein-Main Air Base, West Germany. They are greeted upon arrival by Vice President George H. W. Bush.

July 2–10

AVIATION: A series of huge forest fires in California and Idaho results in C-141 Starlifters flying 285 firefighters to staging areas, while C-130s complete 200 sorties spreading 450 tons of flame retardant across 1.5 million acres.

July 7

AVIATION: At Dyess Air Force Base, Texas, the 96th Bombardment Wing, Strategic Air Command (SAC) receives the first operational B-1B Lancer.

July 10

NAVAL: In Washington, D.C., Admiral William J. Crowe is nominated to serve as the 11th chairman of the Joint Chiefs of Staff.

July 15

AVIATION: During the United States Atlantic Command exercise Readex '85-2, two B-52Gs from the 42nd Bombardment Wing simulate Harpoon missile launches for test and evaluation purposes.

July 30

AVIATION: The Bomarc aerial target drone (CQM-10B) program is officially terminated.

August 12–15

AVIATION: A C-5 Galaxy of the 436th Military Airlift Wing responds to a request from the State Department by delivering 35 tons of food and equipment to famine victims in western Sudan.

August 23

AVIATION: At Vandenberg Air Force Base, California, a Minuteman missile is “cold launched” out of its silo using compressed air. The missile ignites once it is airborne, resulting in less damage to the silo and a quicker reload time.

August 27

MILITARY: In Washington, D.C., Secretary of Defense Casper Weinberger halts production and development of the controversial M988 Sergeant York anti-aircraft system, following a trouble-plagued past. Total cost to the taxpayers: \$1.8 billion.

September 10

AVIATION: The Lockheed C-5B Galaxy performs its maiden flight; the air force acquires 50 of these giant transports by April 1989.

September 13

AVIATION: The orbiting satellite Defense Department P78-1 is destroyed by a Vought ASM-135 antisatellite missile fired by an F-15 Eagle while 290 miles above the Earth. This is also the first-ever successful satellite interception.

September 21–30

AVIATION: Air force transports deliver over 360 tons of food and medicine to survivors of a devastating earthquake in Mexico City, Mexico.

September 23

AVIATION: A transport from the 89th Military Airlift Wing conveys the first lady, Nancy Reagan, to Mexico City, Mexico, to express official U.S. condolences and present the government with a check for \$1 million.

October 1

MILITARY: In Washington, D.C., Admiral William J. Crowe is appointed chairman of the Joint Chiefs of Staff (JCS).

- The ranks of Specialist Five and Specialist Six, in service since 1958, are eliminated by the army because they have performed work more in line with noncommissioned officers.

October 7–10

TERRORISM: In the Mediterranean Sea, Palestinian terrorists hijack the Italian ocean liner *Achille Lauro*, killing Leon Klinghoffer, an elderly American tourist. Subsequent negotiations allow the terrorists to depart, and they leave on an Egyptian Air Boeing 737.

October 11

AVIATION: An Egyptian airliner carrying terrorists responsible for the hijacking of the Italian cruise ship *Achille Lauro* is intercepted by navy F-14 Tomcat fighters from the carrier *Saratoga* and forced to fly to Italy for internment. President Ronald W. Reagan exclaims to terrorists everywhere that, “You can run but you can’t hide.” However, the Italians release the terrorists.

- A C-141 Starlifter from the 438th Military Airlift Wing transports 11 American hostages from the *Achille Lauro* from Egypt to Newark, New Jersey.

October 12

MILITARY: At Fort Drum, New York, the 10th Mountain Division is activated while the National Guard 29th Division (Maryland and Virginia) is reorganized as a light infantry division capable of deploying in terrain deemed impractical for armor and mechanized forces.

October 15

AVIATION: Off Camp Lejeune, North Carolina, a CH-46 Skyknight crashes into the ocean, killing 14 marines and a navy chaplain.

- At Edwards Air Force Base the first flight of the T-46A next generation trainer occurs.

October 16

AVIATION: The crew of the shipwrecked Philippine vessel *Marcos Faberes* is rescued by two air force H-3 Jolly Green Giant helicopters.

October 18

AVIATION: A General Dynamics F-111A, fitted with a mission adaptive wing (MAW), performs its maiden flight.

November 1

AVIATION: Ignoring protests from antinuclear groups and KGB-orchestrated peace movements, the Dutch government approves the deployment of air force ground-launched cruise missiles at Woensdrecht, the Netherlands.

November 4

AVIATION: In the Shenandoah Valley, Virginia, helicopter missions orchestrated by the Air Force Rescue Coordination Center save 47 lives from rapid floodwaters.

November 8

MILITARY: In Washington, D.C., the new Defense Authorization Act creates the new Prisoner of War Medal for all U.S. service members. All former POWs taken from April 5, 1917, to the present are eligible, although none of the armed forces request it.

NAVAL: The rank of commodore is changed to rear admiral.

November 15–18

AVIATION: Air force transports lift 50 tons of food and supplies to Colombia in the wake of a severe volcanic eruption.

November 21

NAVAL: Jonathan Jay Pollard, a U.S. naval intelligence analyst, is arrested and charged with spying for Israel, along with his wife. Tried and convicted, he is currently serving a life sentence in a military prison.

November 27

MARINES: At Tampa, Florida, General George B. Crist assumes control of the Central Command; he is the first marine officer to head a unified command.

December

MARINES: Following a period of intense training, the 26th Marine Amphibious Brigade is declared special operations capable (SOC).

December 6

AVIATION: At Barksdale Air Force Base, Louisiana, the arrival of the 19th KC-10 Extender aircraft completes the first fully operational tanker squadron employing that aircraft.

December 12

AVIATION: A chartered Arrow Air airliner crashes near Gander, Newfoundland, Canada, killing 248 members of the 3rd Battalion, 502nd Infantry, 101st Airborne Division as they are returning from peacekeeping activities in the Sinai Peninsula. Eight civilians onboard also perish. Air force C-141s and C-130s are required to airlift all the bodies back to the United States, along with 125 tons of cargo necessary for the cleanup. This remains the worst-ever military aviation disaster.

December 18

AVIATION: Off Lubang, Philippines, 78 passengers from the sinking ship *Asuncion Cinco* are rescued by helicopters dispatched by the Western Pacific Rescue Coordination Center.

December 31

AVIATION: The air force awards a contract to McDonnell Douglas to build the new C-17A long-range, heavy-lift cargo transport. This aircraft will possess the lifting capability of the C-5A Galaxy with the short field landing abilities of the C-130 Hercules.

1986**January 8**

AVIATION: At Altus Air Force Base, Oklahoma, the first improved C-5B Galaxy transport aircraft is delivered to the Military Airlift Command (MAC).

- At Eielson Air Force Base, Alaska, the air force installs the first overseas meteorological data system circuit to replace obsolete weather teletype systems in place.

January 28

AVIATION: At Cape Canaveral, Florida, tragedy strikes when the space shuttle *Challenger* explodes shortly after liftoff. U.S. Navy commander Michael Smith

Crowe, William J. (1925–2007)

Admiral

William James Crowe was born in La Grange, Kentucky, on January 2, 1925, and raised in Oklahoma City. He entered the U.S. Naval Academy in 1946 under a war-accelerated course of study, graduated in 1947, and qualified for submarine service in 1950. Crowe handled his affairs competently, rose steadily through the ranks and, while serving in Washington, D.C., as assistant to the naval aide of President Dwight D. Eisenhower, he enrolled in night classes at the Washington University Law School. Crowe continued honing his scholarly bent by obtaining a master's degree in personnel administration from Stanford University in 1956 and a doctorate in political science from Princeton University in 1965. To obtain the latter, he reputedly turned down Admiral Hyman G. Rickover's invitation to serve in the nuclear-powered submarine force. Two more years of work commanding Submarine Division 31 at San Diego, California, followed, and, after a lengthy stint

with the Plans and Policy Deputy's Office in Washington, D.C., Crowe volunteered for service in Vietnam as a naval adviser to the Vietnamese Riverine Force. He became a rear admiral in 1973, served several tours in the Pentagon, and obtained his fourth star to rear admiral in 1980. It was while serving as commander in chief of the Pacific Command that he met President Ronald W. Reagan, who was so impressed with Crowe's command of global affairs that he appointed him the new chairman of the Joint Chiefs of Staff. Crowe was also the first chairman to benefit from the Goldwater-Nichols Act of 1986, under which he served as the senior military adviser to the chief executive and the senior military commander of all military branches.

As chairman, Crowe confronted a world engaged in rising terrorism. In 1986 he advocated several sharp actions against Libyan strongman Muammar Qaddafi, which induced a lessening of Libyan terrorist activ-

is among those killed, along with air force pilots Francis R. Scobee, Gregory B. Jarvis, Ellison S. Onizuka, civilians Judith A. Resnick and Michael J. Smith, and schoolteacher Christa McAuliffe. Modifications are subsequently made to the "O-rings" on each booster rocket, but regular shuttle missions do not resume until September 1988.

NAVAL: The nuclear-powered submersible *NR-1* proves instrumental in retrieving many pieces of the wrecked *Challenger* shuttle from the ocean floor.

February 3

MILITARY: At Fort Benning, Georgia, the 75th Ranger Regiment is organized from the 75th Infantry Regiment. It consists of three battalions under the command of Colonel Wayne A. Downing and is assigned to the 1st Special Operations Command.

February 18–22

AVIATION: Along the Russian and Yuba Rivers, northern California, air force H-3s, HH-53s, and C-130s of the 49th and 129th Aerospace Rescue and Recovery

ities. He also supported reflagging neutral tankers in the Persian Gulf, which led to several harsh blows dealt to Iranian naval forces. But Crowe, a consummate diplomat, also engaged his Soviet opposites cordially by inviting Marshal Sergei Akhromeyev to the Pentagon to sign the Intermediate Nuclear Forces (INF) Treaty. In June 1989, he and Soviet general Mikhail Moiseyev concluded the Agreement on the Prevention of Dangerous Military Activities to lower tensions in the last years of the cold war. Crowe resigned from active duty in September 1989 and was replaced by General Colin Powell. He published his memoirs, *The Line of Fire*, in 1993 and, the following year, President Bill Clinton appointed him U.S. ambassador to Great Britain. He served in this office until 1997, and then returned to hold corporate positions while teaching international security at the Naval Academy, Princeton University, and George Washington University. Crowe died on October 18, 2007, in Bethesda, Maryland, one of the most astute sailor-diplomats of his generation.

Admiral William Crowe, former chairman of the Joint Chiefs of Staff (*Department of Defense*)

Groups help evacuate over 500 civilians stranded by severe flooding. A total of 3,000 sandbags are also delivered to army troops on the ground.

February 25–26

AVIATION: In the wake of a disputed election in the Philippines, five H-3 Jolly Green Giant helicopters from the 31st Aerospace Rescue and Recovery Squadron (ARRS) convey President Ferdinand Marcos and 51 people in his entourage to Clark Air Base for ultimate removal to Hawaii.

March 3

AVIATION: At Shaw Air Force Base, South Carolina, the reconnaissance OT-38 Talon replaces the Cessna O-2 aircraft.

March 4

AVIATION: Exercise Bright Star unfolds as aircraft from the United States and Egypt conduct their first joint exercise. This is also the first time that foreign aircraft have been refueled in midair by air force tankers.

March 5

AVIATION: An emergency situation during Operation Coronet East requires a KC-10 Extender to be launched in zero visibility weather. Once over the Atlantic, this aircraft, piloted by Captain Marc C. Felman, refuels a KC-10 and three navy A-4 Skyhawks that were nearly out of fuel. Felman and his crew win a Mackay Trophy for their efforts.

- In accordance with the 1986 McCollum Amendment, the air force begins transporting Afghan refugees and patients from the Soviet invasion from Pakistan to the United States.

March 22

NAVAL: Off Midway Atoll, the ballistic submarine *Georgia* collides with the ocean-going tug *Secota* during a routine crew transfer, resulting in two deaths.

March 23–24

AVIATION: In the Gulf of Sidra, Libyan anti-aircraft batteries fire missiles at navy warplanes belonging to the *Coral Sea* and miss. On the following day, Operation Prairie Fire unfolds as six A-6 aircraft from the carrier *America* attack and sink two Libyan patrol boats and a guided missile corvette with Harpoon antiship missiles. Freedom of navigation in the gulf has been deftly underscored.

March 25

AVIATION: At Whiteman Air Force Base, Missouri, the 351st Strategic Missile Wing activates the first all-women Minuteman missile crew on alert.

March 27

AVIATION: The first Bell Textron AH-1W Super Cobra is delivered to the Marine Corps.

March 29

AVIATION: Lieutenant Commander Donnie L. Cochran is the first African-American pilot chosen to fly with the navy's Blue Angels precision flying team.

April 1

AVIATION: The Marine Corps begins reorganizing three attack helicopter and three light helicopter squadrons into six light attack squadrons (HLMA), equipped with UH-1 Hueys and AH-1 Cobras.

April 5

TERRORISM: An American sergeant is killed and 60 others wounded when a bomb explodes at a discotheque in West Germany. The American government suspects Libyan agents are behind the blast and prepares to act accordingly.

April 5–6

AVIATION: At Osan Air Base, South Korea, four C-141 Starlifters and one H-3 Jolly Green Giant helicopter from the 63rd Airlift Wing convey fire-suppressant foam to extinguish a large jet fuel tank fire. Burn victims are also conveyed to medical facilities in Seoul for treatment.

April 14–15

AVIATION: Operation El Dorado Canyon unfolds as a strike force of 24F-111F bombers from the Statue of Liberty Squadron, 48th Tactical Fighter Wing,

launches from Great Britain and performs a retaliatory strike against Tripoli, Libya. To get there, these aircraft, lacking overflight permission from Spain and France, fly a 5,500-mile round trip around continental Europe. Nonetheless, the attackers inflict heavy damage on the Jumahiriya Military Barracks and Benina Military Airfield. The attack is joined by carrier strike craft launched from the *America* and *Saratoga*, including jets from VMFA-314 and 323. One F-111 is lost in action, presumably to a surface-to-air missile.

- No less than 28 KC-10 Extenders and KC-135 Stratotankers are employed during Operation El Dorado Canyon, and they refuel the F-111 strike force six times in complete radio silence.

MILITARY: At Fort Monroe, Virginia, Major General Robert E. Wagner is appointed to head the new U.S. Army ROTC Cadet Command. It is assigned as part of the Training and Doctrine Command (TRADOC) and oversees ROTC programs at more than 400 colleges and universities and also 800 high schools with Junior ROTC programs. The army currently obtains more than 70 percent of its commissioned officers from ROTC.

April 15

TERRORISM: At Yokota Air Base, Japan, a rocket bomb lands inside the perimeter fence causing minor damage.

April 18

AVIATION: At Vandenberg Air Force Base, California, a Titan 3D rocket booster explodes on liftoff; Space Launch Complex Four sustains damage and does not become operative again until August 15.

April 28–May 7

AVIATION: In the wake of a nuclear reactor accident at Chernobyl, Soviet Union, the Air Weather Service launches several WC-130s to track and analyze the radioactive fallout with air samples.

May 6

NAVAL: In an impressive show of force, the nuclear-powered submarines *Archerfish*, *Hawkbill*, and *Ray* all surface at the North Pole for the first time.

May 10

NAVAL: The historic battleship *Missouri*, upon which the ceremonies ending World War II took place, is recommissioned into active service.

June 17

AVIATION: The air force retires its final UC-133K Provider from spraying activities.

July

AVIATION: The first C-141 Starlifters are delivered to units of the Air Force Reserve and Air National Guard.

July 1

NAVAL: In Washington, D.C., Admiral Carlisle A. H. Trost gains appointment as the 23rd chief of naval operations.

July 19

AVIATION: In Europe, Rapier surface-to-air missile units are declared operational by the U.S. Air Force in Europe (USAFE).

July 19–28

AVIATION: Severe drought conditions across the southwestern United States result in Operation Southern Haylift as 24 C-141s and eight C-130s carrying 19,000 bales (536 tons) of hay to livestock farmers living in the afflicted areas.

July 27

AVIATION: In Damascus, Syria, an air force C-9 Nightingale transports Father Lawrence Jenco, recently released by Muslim extremists, to medical facilities at Rhein-Main Air Base, West Germany.

August 27–29

AVIATION: In Cameroon, West Africa, a C-130 Hercules of the 50th Tactical Airlift Squadron delivers 250 tents to villagers fleeing toxic volcanic fumes escaping from Lake Nyos.

August 29

AVIATION: In Norway, a CH-46 Skyknight helicopter crashes, killing eight marines and injuring 13 more.

September 1

AVIATION: At Davis Monthan Air Force Base, Arizona, the last operational Cessna O-2 Bird Dog is retired and sent to the “bone yard.”

September 5

AVIATION: At Karachi Airport, Pakistan, a C-141 Starlifter transports Americans injured during a hijacking attempt to medical facilities in Frankfurt, West Germany.

September 11

MARINES: At Twenty-Nine Palms, California, the 3rd Light Armored Vehicle Battalion is organized.

September 18–20

AVIATION: At Luzon, Philippines, two C-5 Galaxies of the 436th Military Airlift Wing convey 93 tons of food and medical supplies under terms of the Foreign Assistance Act of 1985.

September 20

NAVAL: In a nod to tradition, Secretary of the Navy John F. Lehman orders brown shoes reinstituted as part of the uniforms of naval officers and chief petty officers assigned to aviation units.

September 22

MARINES: A new directive from the commandant of the Marine Corps mandates that senior NCOs replace all officers at the SNCO Academies at Quantico, Virginia; Camp Lejeune, North Carolina; and El Toro, California.

October 1

MILITARY: In Washington, D.C., the Goldwater-Nichols Act is signed into law by President Ronald W. Reagan. A significant reform, it centralizes all operational authority through the chairman of the Joint Chiefs of Staff, who now serves as the president’s senior military adviser. The act streamlines the chain

of command from the president to the secretary of defense to respective theater commanders. The position of vice chairman of the Joint Chiefs of Staff is also created.

October 10

AVIATION: The LGM-118A, or Peacekeeper, intercontinental ballistic missile is placed on operational alert for the first time. It is capable of attacking up to 10 different targets with a multiple independent reentry vehicle (MIRV) warhead.

October 11–16

AVIATION: San Salvador, capital of El Salvador, is destroyed by an earthquake, prompting air force transports to begin delivering food and relief supplies to survivors.

November 5

NAVAL: In China, the cruiser *Reeves*, the destroyer *Oldendorf*, and the frigate *Rentz* become the first U.S. Navy warships to make a friendly port call in 37 years.

December 4

MILITARY: In the Panama Canal Zone, U.S. Army South is activated to coordinate the multiservice U.S. Southern Command through a single army headquarters. Major General James R. Taylor is the first commander from his headquarters at Fort Clayton in the Panama Canal Zone.

December 7

AVIATION: In the wake of Typhoon Kim, a WC-130 Hercules of the 54th Weather Reconnaissance Squadron lands on Saipan, Mariana Islands, to deliver seven tons of relief supplies, food, and Christmas toys for the children.

December 10

AVIATION: Several miles off Destin, Florida, air force helicopters rescue 19 members of the Norwegian research ship *Geco Alpha* after it caught fire. Casualties are flown to Eglin Air Force base for treatment.

December 14–23

AVIATION: At Edwards Air Force Base, California, the experimental *Voyager* aircraft, piloted by Richard G. Rutan and Jeana L. Yeager, lifts off and flies 25,000 miles, nonstop and unrefueled, around the world. Rutan wins a Collier Trophy for his record, nine-day flight.

December 18

AVIATION: In the South China Sea, two H-3 Jolly Green Giant helicopters of the 31st Aerospace Rescue and Recovery Squadron (ARRS) hoist up 13 survivors from a sinking Filipino vessel. Casualties are delivered to medical facilities at Cubi Air Station, Philippines, for treatment.

The controversial MX or Peacekeeper missile (U.S. Air Force)

December 22

AVIATION: At F. E. Warren Air Base, the deployment of a 10th Peacekeeper inter-continental ballistic missile (ICBM) leads to all weapons being placed on operational status.

December 31

AVIATION: In San Juan, Puerto Rico, H-3 Sea King helicopters of Composite Squadron 8 (VC-8) rescue 75 people stranded on the roof of the Dupont Plaza Hotel during a fire.

1987

January

MILITARY: Although the number of army personnel is stable, the number of active divisions has risen to 18, the largest number in service at the height of the Vietnam War in 1968.

January 10

MARINES: Sergeant Clayton J. Lonetree is arrested and charged with trading national secrets in exchange for sex while he served in the U.S. embassy guard detail in Moscow, Soviet Union. He is the first member of the Marine Corps ever charged with disloyalty and receives a 30-year sentence and a \$5,000 fine.

January 16

AVIATION: At the Tonopoh Test Range, Nevada, a B-1B Lancer fires a short-range attack missile (SRAM) for the first time.

February 3

AVIATION: At Eglin Air Force Base, Florida, the 55th Aerospace Rescue and Recovery Squadron receives the first Sikorsky UH-60A Black Hawk helicopters. These machines are to be retrofitted with Pace Low III infrared systems to facilitate long-range search-and-rescue missions.

February 13–15

AVIATION: On Vanuatu, New Hebrides, two C-141 Starlifters and two C-130 Hercules transport 64 tons of tents and plastic sheeting to survivors of Typhoon Uma.

February 16

AVIATION: In San Antonio, Texas, the Joint Military Medical Command is activated; it is staffed by both army and air force personnel.

March 7

NAVAL: The so-called tanker war begins in the Persian Gulf as Iran and Iraq begin attacking oil tankers sailing with each other's oil. President Ronald W. Reagan, anxious to keep the flow of petroleum to the West unimpeded, announces that 11 Kuwaiti tankers will be reflagged with American colors to protect them from Iranian attack.

March 31

MILITARY: In El Paraiso, El Salvador, Special Forces Sergeant Gregory Frontius is killed in a shoot-out with FMLN Marxist guerrillas, currently receiving military aid from Communists in Nicaragua.

April 9

MILITARY: In light of prevailing world realities, the Special Forces Branch is established as a basic branch of the U.S. Army. The military is placing renewed emphasis on special operations around the world in the fight against communism and terrorism.

April 10

NAVAL: In Washington, D.C., James H. Webb gains appointment as the 66th secretary of the navy.

April 14

AVIATION: A B-1B Lancer flying out of Dyess Air Force Base, Texas, flies 9,400 miles in 21 hours and 40 minutes while utilizing five inflight refuelings. This is also the type's longest flight to date.

April 15

MILITARY: The navy initiates the Special Operations Command (SOCOM), which brings the special forces of all four branches of the armed services under a unified command.

April 16

MARINES: At Norfolk, Virginia, the Marine Corps Security Force Battalion, Atlantic is organized while restructuring various detachments at sea and the Marine Barracks.

April 21

NAVAL: Off the Virginia coast, the frigate *Richard L. Page* collides with the fishing boat *Chickadee* in foggy weather, sinking it.

May 5

AVIATION: At Little Rock Air Force Base, Arkansas, the last liquid-fueled Titan II intercontinental ballistic missile (ICBM) is retired from active service. This was the largest ballistic missile ever fielded by the United States during the cold war years.

POLITICS: Lieutenant Colonel Oliver L. North and Rear Admiral John M. Poindexter are charged with misbehavior during the so-called Iran-Contra scandal. In televised congressional hearings, North gains national notoriety as "the marine who took the hill" during a spirited defense of his actions.

May 6

AVIATION: At Sembach Air Base, West Germany, the first EC-130H Compass Call aircraft is delivered to the 43rd Electronics Combat Squadron.

May 14

AVIATION: In the Persian Gulf, the destroyer *Coontz* prepares to engage an Iraqi Mirage F-1 fighter that approaches to within 10 miles of it, then turns around.

May 17

AVIATION: In the Persian Gulf, the frigate *Stark* is struck by a pair of French-made Exocet missiles fired by an Iraqi F-1 Mirage; 37 sailors are killed and the vessel is badly damaged. The vessel's defensive measures were not operational at the time of the attack, despite the element of danger present, so the captain and the tactical action officer receive letters of reprimand and resign.

May 19

DIPLOMACY: The Iraqi government of Saddam Hussein acknowledges responsibility in launching the missile that struck the *Stark* but declares the incident will not alter relations between the two countries; President Ronald W. Reagan announces his decision to fly the American flag on Kuwaiti oil tankers in the Persian Gulf to protect them as the Iraq-Iran War rages.

June 1

AVIATION: The air force establishes its Special Operations Command.

June 10

AVIATION: At the Paris Air Show, France, the B1-B Lancer makes its European debut.

June 23

MILITARY: In Washington, D.C., Major General Carl E. Vuono gains appointment as the 31st army chief of staff.

June 26

MARINES: Sergeant Major David W. Somers is appointed the 11th sergeant major of the Marine Corps.

June 30

MARINES: Manpower levels of the Marine Corps peak at 20,047 officers and 179,478 enlisted men and women. This is the highest level since the end of the Vietnam War.

July 1

MARINES: In Washington, D.C., General Alfred M. Gray gains appointments as the 39th commandant of the Marine Corps.

July 4–September 17

AVIATION: A Rockwell B-1B Lancer flown by Lieutenant Robert Chamberlain establishes 12 new world records for speed and payload combinations. Another B-1B flown by Major Brent A. Hedgpeth sets another nine speed records. Consequently, the B-1B System Program Office, Air Force Systems Command, wins a Mackay Trophy.

July 15–22

POLITICS: Admiral John Poindexter testifies before the House Foreign Affairs Committee to determine responsibility in the Iran/contra arms for hostages swap.

July 17

AVIATION: At Hurlburt Field, Florida, the first Sikorsky MH-53J Pave Low helicopter is delivered by the Air Force Logistics Command and begins operational service within a year. This machine is equipped for poor weather/ nighttime operations and becomes closely associated with Special Forces.

July 22–December 21

AVIATION: With the Iran-Iraq War now spilling over into the Persian Gulf, Operation Earnest Will unfolds as air force E-3A Sentry aircraft begin routine patrols. C-5A Galaxy and C-141 Starlifter transports also convey minesweeping equip-

ment into the region while air force tankers support navy aircraft patrolling the gulf waters.

July 24

AVIATION: After the tanker *Bridgeton* strikes a mine in the Persian Gulf, eight RH-53D helicopters begin minesweeping operations to secure the safe passage of neutral shipping.

NAVAL: The United States commences Operation Earnest Will by providing protection to reflagged Kuwaiti oil tankers in the Persian Gulf.

MARINES: The 24th Marine Amphibious Unit deploys to the Persian Gulf once the *Bridgeton*, an American-flagged tanker, strikes a mine laid by the Iranians. They are there to assist the navy in keeping that valuable waterway open to commercial traffic.

July 27

AVIATION: Helicopter mine countermeasure squadron HM-14 arrives in the Persian Gulf after an Iranian mine damages the reflagged tanker *Bridgeton* on July 24.

August 4

NAVAL: At Pascagoula, Mississippi, the amphibious assault ship *Wasp* is launched; this vessel is intended to replace the earlier *Iwo Jima* class of helicopter carriers.

August 8

AVIATION: To counter Iranian mine-laying operations in the strategic Persian Gulf, Special Force MH-6 Little Bird helicopters begin patrolling the waters at night. They are under orders to stop any Iranian vessels threatening the free transit of any merchant ships and tankers through the gulf.

August 24

NAVAL: In a sign of rising tension throughout the Persian Gulf, when the destroyer *Kidd* is approached by two Iranian dhows, warning shots are fired to force them back. The frigate *Jarrett* also interposes his vessel between a convoy he is escorting and an Iranian warship.

MARINES: A military court convicts Sergeant Clayton J. Lonetree of espionage on behalf of the Soviet embassy while serving as a marine security guard at the U.S. embassies in Vienna and Moscow.

August 31–September 9

AVIATION: Across the coastal regions of Oregon and northern California, C-130 and C-141 aircraft deliver 2,511 tons of fire retardant and a crew of firefighters to combat a fire blazing across 970 square miles.

September 10

NAVAL: The battleship *Iowa* is assigned VC-6, Detachment One, which is the first squadron of Pioneer remotely controlled vehicles.

September 17

AVIATION: A Rockwell B-1B Lancer flown by Major Brent A. Hedgpeth establishes nine new world records in a single five-hour sortie by carrying 66,140 pounds for 3,107 miles and at a speed of 655 miles per hour.

September 21

NAVAL: An army MH-6 Little Bird helicopter launched from the frigate *Jarrett* attacks and damages the Iranian landing craft *Iran Air* after it is caught deploying mines in the Persian Gulf. The vessel is then stormed by SEALs and taken under tow. The crew of 26 Iranians is released shortly afterward.

September 24

AVIATION: Over Beijing, China, the Air Force Thunderbirds demonstration squadron performs before a crowd of 20,000 spectators.

September 28

AVIATION: The first B-1B crashes during a training mission after a severe bird strike.

October 1

AVIATION: The Space Command assumes control over Onizuka Air Force Station, California, and the Air Force Satellite Control Network, a set of worldwide remote-tracking stations.

- At Hickham Air Force Base, Hawaii, and Clark Air Base, Philippines, the Pacific Air Forces retire all their venerable T-33 jet trainers after 32 years.

October 8

AVIATION: In the Persian Gulf, An army MH-6 Little Bird helicopter attacks a group of four Iranian speedboats after one of their number shot at them. One boat is sunk, two are captured; two Iranians die of their wounds.

MARINES: The Marine Amphibious Group Task Force (MAGTF) 1-88 sails onboard the *Okinawa* in order to relieve the 24th Marine Amphibious Unit then on duty in the Persian Gulf.

October 9

MARINES: At Portsmouth, New Hampshire, the Marine Barracks closes in a cost-cutting measure. This is the second-oldest marine post in the nation, dating to 1813.

October 16

NAVAL: In the Persian Gulf, an Iranian battery on the Fao Peninsula fires a Chinese-built Silkworm missile at the reflagged Kuwaiti tanker *Sea Isle City*, damaging it.

October 19

NAVAL: In the Persian Gulf, the guided-missile destroyers *Hoel* and *Kidd*, and the destroyers *John Young* and *Leftwich*, shoot up two older Iranian oil platforms in retaliation for missile attacks against neutral shipping. No casualties are reported. The platforms had been used for military purposes and were singled-out for destruction.

November 1

MILITARY: At Fort Benning, Georgia, the army establishes the Ranger Training Brigade along with four Ranger Training Battalions. This is to impart meaningful training on Ranger and Long-Range Surveillance officers.

November 19

AVIATION: The Northrop Corporation contracts with the air force to design and construct the B-2, the next generation of stealth aircraft.

November 24

AVIATION: A B-1B Lancer successfully deploys an air-launched cruise missile (ACLM) for the first time.

MILITARY: In Washington, D.C., Frank C. Carlucci gains appointment as the 16th secretary of defense.

December 5

AVIATION: Luzon, Philippines, still reeling from the effects of Typhoon Nina, is assisted by six C1-30 Hercules transports from the 374th Tactical Airlift Squadron, which bring in 34 tons of supplies, clothing, and rice to assist the victims.

December 6

MARINES: In San Diego, California, a restructuring of marine security forces leads to the closing of the Sea School, which has operated there since 1923.

December 8

AVIATION: The recently signed Intermediate-Range Nuclear Forces Treaty (INF) between the United States and the Soviet Union calls for the removal of all Pershing II, ground-launched cruise missiles, and SS-20 missiles from Europe by 1991. Presidents Ronald W. Reagan and Mikhail S. Gorbachev are the signatories. This results in the deactivation and removal of six air force tactical missile wings (TMW) throughout Europe.

December 12

NAVAL: In the Persian Gulf, the destroyer *Chandler* deploys its helicopters to evacuate 11 crewmen from the sinking Cypriot tanker *Pivot* after it is attacked by Iranian speedboats.

December 25

NAVAL: In the Persian Gulf, the frigates *Elrod* and HMS *Scylla* use helicopters to rescue 20 crewmen from the South Korean-flagged tanker *Hyundai* after it was attacked by an Iranian frigate.

December 27

TERRORISM: In Barcelona, Spain, a terrorist attack upon a United Services Organization club kills one sailor and injures five others.

1988**January**

MARINES: In Washington, D.C., Secretary James Webb, a former marine, orders that Naval Academy midshipmen seeking a Marine Corps commission will have to pass through the Officer Candidate School at Quantico, Virginia, first.

January 1

AVIATION: The Strategic Air Command (SAC) allows mixed male/female teams to serve as Minuteman and Peacekeeper strategic missile crews for the first time.

January 20

AVIATION: At Palmdale, California, the 100th and final Rockwell B-1B Lancer strategic bomber rolls off the assembly line.

January 25–28

AVIATION: Two C-5 Galaxy transports from the 60th Military Airlift Wing arrive in Manila, Philippines, bringing 102 tons of medical supplies to refresh the stocks of AmeriCares, a private relief organization.

February 5

MARINES: As of this date the name of all marine amphibious groupings will add the title “expeditionary” to their titles, a reflection of the wider capabilities they project.

February 12

NAVAL: In the Black Sea, the guided-missile cruiser *Yorktown* and the destroyer *Caron* are challenged by two Soviet patrol frigates who bump into them. Other than a flurry of diplomatic protests, no action results.

February 17

TERRORISM: Along the Israel-Lebanon border, marine lieutenant colonel William R. Higgins, on station as a UN observer, is kidnaped and subsequently killed by militants.

February 19–22

AVIATION: After Typhoon Roy batters the Marshall Islands, a C-141 of the 86th Military Airlift Wing conveys 50 tons of construction materials to repair housing.

February 22

NAVAL: In Washington, D.C., Secretary of the Navy James H. Webb vocally resigns from office after accusing Secretary of Defense Frank Carlucci of failing to support a 600-ship navy.

March 16

CRIME: Admiral John Poindexter, Lieutenant Colonel Oliver North, and two other individuals are indicted by a federal grand jury for their roles in the illegal Iran-contra scandal.

March 16–28

AVIATION: In Honduras, air force transports convey 3,200 army troops during Operation Golden Pheasant to counter Sandinista threats to the region.

MILITARY: In response to Nicaraguan Sandinista (Communist) incursions into Honduras, President Ronald W. Reagan announces the temporary deployment of 3,200 army troops under the title of Operation Golden Pheasant. The units involved are the 1st and 2nd Battalions, 504th Infantry, 82nd Airborne Division, and 7th Infantry Division (Light). Their presence is sufficient to deter Nicaraguan activities and they are eventually withdrawn without incident.

March 24

NAVAL: In Washington, D.C., William L. Ball gains appointment as the 68th secretary of the navy.

April

AVIATION: When political instability threatens the safety of Americans living in Panama, eight C-5 Galaxies and 22 C-141 Starlifters from the Military Airlift Command (MAC) convey 1,300 security specialists there as a precaution.

April 14

DIPLOMACY: The Soviet Union, having invaded Afghanistan in December 1979 and having been thwarted by Afghani freedom fighters bolstered by U.S. military aid, signs an agreement with the United States, Pakistan, and Afghanistan to remove all its troops from the region. This is a major victory for the United States and its allies, although it portends ill for subsequent events there.

NAVAL: In the Persian Gulf, the frigate *Samuel B. Roberts* strikes an Iranian mine, causing a 21-foot-long hole in its hull and extensive damage. Ten sailors are injured.

April 17–July 23

AVIATION: A C-5A Galaxy piloted by Captain Michael Eastman of the 436th Military Airlift Wing delivers nuclear-test monitoring equipment to the Soviet Republic of Kazakhstan to support joint verification experiments. They land near the site where the first Soviet atomic weapon was detonated in 1949; Eastman and his crew win the Mackay Trophy for the efforts.

April 18

AVIATION: Air force tankers are actively engaged refueling navy aircraft in a confrontation with Iranian forces.

- During Operation Preying Mantis, a Marine Sea Cobra helicopter is downed, possibly by an Iranian missile; its crew of two is killed.

NAVAL: In the Persian Gulf, Operation Preying Mantis unfolds as U.S. Navy warships and jet bombers conduct a retaliatory action for the recent mine strike on the frigate *Samuel B. Roberts*. Initially, the destroyer *Merrill* shells and destroys an oil platform employed as command-and-control center for attacks on neutral shipping. A second platform is eliminated by the guided-missile cruiser *Wainwright*, and frigates *Simpson* and *Bagley*. Meanwhile, A-6 Intruders launched from the carrier *Enterprise* fire Harpoon missiles that sink the fast patrol boat *Joshan* and the frigate *Sahand*. Finally, the destroyer *Joseph Strauss* joins A-6 and A-7 aircraft in pummeling the Iranian frigate *Sabalan*, which is allowed to return to port in severely damaged condition upon the orders of the president.

MARINES: In the Persian Gulf, Contingency MAGTF 2-88 swings into action in storming the Iranian oil platform *Sassan*, which had been used for gathering military intelligence.

April 24

NAVAL: Off Cape Kennedy, Florida, the elderly diesel-electric submarine *Bonefish* has a battery explosion that kills three of its crew. The vessel is towed to Charleston, South Carolina, and decommissioned.

April 26

AVIATION: At the White Sands Missile Range, New Mexico, the army successfully fires its first Army Tactical Missile System (ATACMS). This weapon is designed for penetrating hardened targets and some variants eventually boast a range of over 100 miles.

April 29

NAVAL: In Washington, D.C., Secretary of Defense Frank Carlucci announces that the navy will protect all friendly, neutral shipping in the Persian Gulf.

April 30

AVIATION: At McConnell Air Force Base, Kansas, the 100th and final Rockwell B-1B Lancer is delivered to the 384th Bombardment Squadron.

May

AVIATION: This month C-5 Galaxy transports convey 73 tons of relief supplies from Kadena Air Base, Okinawa, to Islamabad, Pakistan, for refugees fleeing the onset of civil war in neighboring Afghanistan.

MARINES: Female marines are allowed to serve as embassy security personnel for the first time since the 1970s.

May 23

AVIATION: At Arlington, Texas, the Bell Textron V-22 Osprey, an airplane/helicopter hybrid machine, debuts for the first time. This revolutionary craft will eventually replace aging CH-46 Skyknight helicopters in the Marine Corps.

June 1

MILITARY: The Army Engineering School at Fort Belvoir, Virginia, is relocated to Fort Leonard Wood, Missouri, after 68 years at the former locale. It is soon joined by the Chemical School and the Military Police School.

June 2–August 11

AVIATION: The outbreak of sectarian warfare in southern Sudan results in thousands of refugees and prompts transports of the 60th and 436th Military Airlift Wings to convey 70 tons of plastic sheeting for shelters, along with food and medical supplies.

June 28

TERRORISM: In Athens, Greece, naval attaché Captain William E. Nordeen is killed by a car bomb planted in his automobile.

July 2

NAVAL: In the Persian Gulf, an Iranian speedboat fires on a Danish supertanker and is driven off by warning shots from the frigate *Elmer B. Montgomery*.

July 3

AVIATION: In the Persian Gulf, Iranian speedboats have fired on American helicopters working in that region. Hours later, the guided-missile cruiser *Vincennes* picks up a radar contact with a large aircraft approaching them. This turns out to be an Iranian A-300 Airbus, and it is mistaken at long range for an Iranian F-14 fighter. The craft is shot down over the Strait of Hormuz by the *Vincennes*, killing all 290 passengers and crew. In fairness to the commander, the aircraft had been warned repeatedly as it approached, but it refused to respond. Rather than risk a potential suicide attack on his vessel, the captain ordered the aircraft downed. Regardless, President Ronald W. Reagan issues a formal apology to the Iranian people and offers compensation to families of the deceased. A navy investigation concludes that Captain Will C. Rodgers acted responsibly, given the information he had at his disposal.

July 7

AVIATION: After three decades of distinguished service, the last F-106 Delta Darts are ordered dropped from the air force inventory.

August 1

AVIATION: The last three F-106 Delta Darts are retired from active service by the 177th Fighter Group. Many surviving aircraft end up as remote-controlled target drones.

August 15–28

AVIATION: Air force C-5 Galaxies from the Military Airlift Command (MAC) fly in 500 UN peacekeepers to maintain and monitor a cease-fire between Turkey and Iraq.

August 18

NAVAL: At Annapolis, Maryland, Rear Admiral Virgil L. Hill, Jr., gains appointment as the 53rd superintendent of the U.S. Naval Academy.

August 22–October 6

AVIATION: As forest fires devastate Yellowstone National Park, the Military Airlift Command (MAC) flies in 4,000 firefighters and 2,500 tons of equipment directly into the disaster zone. Other transports are fitted with spraying equipment and apply flame retardant over thousands of acres.

August 25–31

AVIATION: Once the onset of civil war creates an acute refugee problem in Somalia, a C-141 Starlifter belonging to the 41st Military Airlift Squadron delivers a 200-bed emergency hospital weighing 200 tons.

August 28

AVIATION: A C-141 Starlifter from the 20th Military Airlift Squadron delivers 29 tons of medical supplies and hospital equipment to medical facilities on the island of São Tomé off the west coast of Africa.

September

AVIATION: To deter any North Korean aggression during the Olympics held in Seoul, South Korea, an Air Force E-3A Sentry aircraft, escorted by fighters, patrols the airspace above the peninsula.

September 9

AVIATION: At Karnack, Texas, and in accordance with the recent INF Treaty, the army begins destroying the first of its Pershing II missiles. The devices are static fired and then crushed flat by hydraulic presses. Half a world away, Soviet SS-20 missiles are slated for the same fate.

September 10–15

AVIATION: Catastrophic flooding in Bangladesh leaves 28 million people homeless so no less than four Airlift Wings—the 60th, 62nd, 63rd, and 436th—are employed bringing 100 million tons of humanitarian supplies to the victims.

September 28

NAVAL: The newly passed 1989 Defense Authorization Act brings the Department of Defense into the War on Drugs as a detection and monitoring agency. Apprehension of violators, however, will remain with the Coast Guard.

The Boeing B-2 Spirit is the USAF's only strategic stealth bomber. (U.S. Air Force)

September 29

AVIATION: Two and a half years after the *Challenger* space shuttle disaster, the stand down ends when *Discovery* is launched into orbit under U.S. Air Force colonel Richard O. Covey.

October 22

NAVAL: The World War II-era battleship *Wisconsin* is recommissioned, marking the first time that all four *Iowa*-class battleships are in service again.

October 25

AVIATION: Severe flooding at Marikina, Philippines, results in two HH-3 Jolly Green Giant helicopters from the 31st Aerospace Rescue and Recovery Squadron (ASSR) assisting 27 stranded residents over an eight-hour period.

November 9

AVIATION: The 709th Military Airlift Squadron dispatches a C-5 Galaxy with a mobile dental clinic and two ambulances to Niamey, Niger, at the behest of the U.S. State Department.

November 10

AVIATION: The air force reveals the existence of the Lockheed F-117A Nighthawk to the public. A stealthy light bomber, it employs the smallest radar cross-section of any aircraft at the time and is virtually invisible to radar. The air force acquires 59 F-117s at a cost of \$42.6 million apiece.

November 16–30

AVIATION: At Dakar, Senegal, aircraft of the 60th, 63rd, 437th, and 438th Military Airlift Wings deliver tons of insecticide to help thwart a major locust infestation.

November 22

AVIATION: At Palmdale, California, the new Northrop B-2 Spirit bomber is publicly revealed for the first time; it is reputedly invisible to radar and also costs a whopping \$1 billion per aircraft. The air force aspires to order 132 such aircraft as its new front-line bomber.

November 29

AVIATION: The air force accepts delivery of its 60th and final KC-10 Extender. This particular model employs wing-mounted refueling pods to complement its centerline boom.

December

NAVAL: With the end of the Iran-Iraq War, tensions in the Persian Gulf decline to the point where the role of the navy is reduced to monitoring U.S. flag vessels.

December 9

AVIATION: A destructive earthquake ravages Yerevan, Armenia—then part of the Soviet Union—and Party Secretary Mikhail Gorbachev permits Military Airlift

Command (MAC) transports to enter Russian airspace unimpeded and deliver 300 tons of relief aid.

December 12

AVIATION: In the Pacific Ocean between the Philippines and Japan, a helicopter from the 33rd Aerospace Rescue and Recovery Squadron (ARRS) saves 11 passengers on a life raft once their vessel, *Selina*, sinks. They are taken to Clark Air Base for treatment, then released.

December 22

AVIATION: The Grumman Company begins modifying the second E-8A JSTARS command-and-control aircraft; the two E-8As will be deployed during Operation Desert Storm while still in their developmental stage.

1989

January 4

AVIATION: Several navy F-14 Tomcats of VF-32 from the carrier *John F. Kennedy* shoot down two Libyan MiG-23 jets over the Gulf of Sidra after a tense standoff. They had apparently approached the American jets in a hostile manner before the incident.

January 7

AVIATION: At Camp Pendleton, California, helicopter squadron HMA-775 is activated as part of the 4th Marine Air Wing (4th MAW).

January 7–20

AVIATION: To support Medfly '89, a joint-service humanitarian effort, two C-130 Hercules from the 167th Tactical Airlift Group arrive at Monrovia, Liberia, to deliver medical supplies and personnel.

January 10

AVIATION: A B-52 bomber test launches the AGM-136 Tacit Rainbow missile for the first time. This advanced weapon is designed to fly to specific coordinates and then loiter in the area until radar energy is detected and identified, whereupon the missile hones in and destroys the target.

January 20

MILITARY: In Washington, D.C., George H. W. Bush is sworn in as the 41st president of the United States and commander in chief.

February

AVIATION: The 63rd Military Airlift Wing dispatches two C-141 Starlifters to Dakar, Senegal, with 20 tons of insecticide to control swarming locusts.

February 16

AVIATION: The T-38 Talon production line is closed by Northrop after manufacturing its 3,806th supersonic jet trainer.

March

MARINES: The Fleet Marine Manual 1, *Warfighting*, is issued at the behest of its staunchest advocate, General Al Gray. It advocates battle based on maneuver instead of traditional attrition, and it becomes required reading for all officers and staff NCOs.

March 3

MARINES: Force restructuring results in the 2nd Battalion, 6th Marines and 3rd Battalion, 1st Marines being accorded cadre status. However, all 24 remaining active-duty battalions are enlarged with the addition of a fourth rifle company.

March 20

AVIATION: In South Korea, the crashes of a CH-46 and a CH-53D helicopter during the Team Spirit '89 exercise kill 17 marines and one navy corpsman.

March 21

MILITARY: In Washington, D.C., Richard B. Cheney is appointed the 17th secretary of defense.

NAVAL: Off Cape Kennedy, Florida, the fleet ballistic submarine *Tennessee* launches the Trident II D-5 missile underwater for the first time. The result is a spectacular failure that cartwheels through the sky and has to be destroyed in midflight.

March 27

AVIATION: In Alaska, Military Airlift Command (MAC) transports convey over 1,000 tons of cleanup equipment after the *Exxon Valdez* tanker spills 10 million gallons of oil along the coastline.

April

AVIATION: The 436th Military Airlift Wing delivers 32 pallets of relief supplies to undernourished inhabitants of Gambia, Equatorial Guinea, and Chad.

April 17

AVIATION: Over Saudi Arabia, the Boeing E-3A Sentry aircraft christened Elf One returns to Tinker Air Force Base, Oklahoma, after serving eight years on station.

- The 50th and final Lockheed C-5B Galaxy transport is delivered to the U.S. Air Force.

April 19

NAVAL: While conducting a firing test of its main battery off Puerto Rico, the battleship *Iowa* suffers from a catastrophic turret explosion that kills 47 sailors. Quick flooding of the powder magazine below the turret prevents a catastrophic explosion. Several official investigations of the mishap are undertaken.

April 21

MILITARY: In Quezon City, the Philippines, Marxist guerrillas assassinate Colonel James N. Rowe of the Joint United States Military Advisory Group (JUSMAG). The Americans are presently providing advanced counterinsurgency training to Filipino units.

May 11

DIPLOMACY: The refusal of Panamanian dictator Manuel Noriega to allow free elections results in increased tension with the United States. Consequently, additional military forces are dispatched to the Panama Canal Zone.

May 13–18

AVIATION: Operation Nimrod Dancer unfolds as air force transports fly in 2,600 marines into Panama, along with 3,000 tons of equipment, in response to recent threats to U.S. military personnel.

May 15

NAVAL: In Washington, D.C., H. Lawrence Garrett III, gains appointment as the 68th secretary of the navy.

May 16–June 29

AVIATION: Continuing political unrest in Panama results in Operation Blade Jewel, during which air force transports evacuate 6,000 nonessential personnel from the region.

May 30

AVIATION: A CH-46 Skyknight helicopter belonging to the amphibious transport *Denver* crashes at sea, killing 13 marines and a navy corpsman.

June 9–11

AVIATION: The Military Airlift Command (MAC) sends several transports to the Soviet Union with humanitarian supplies for victims of a terrible train wreck near Ufa of the Trans-Siberian Railroad, resulting in 850 casualties.

June 10

AVIATION: At Edwards Air Force Base, California, Captain Jacquelyn S. Parker is the first woman to graduate from the Air Force Test Pilot School.

June 14

AVIATION: At Cape Canaveral, Florida, the new Titan IV heavy-lift rocket booster, almost 20 stories tall, is launched for the first time and carries a Department of Defense satellite into orbit.

NAVAL: Off the California coast, the nuclear submarine *Houston* snares a tow bale dangling from the commercial tugboat *Barcelona*, and drags the vessel underwater. One civilian dies in consequence.

July 6

AVIATION: In Washington, D.C., President George H. W. Bush awards noted aviator James H. Doolittle the Presidential Medal of Freedom. Significantly, Doolittle is the only American to receive this medal and a Medal of Honor, the nation's two highest awards.

- The final Pershing II ballistic missile is destroyed in accordance with the Intermediate Range Nuclear Force Treaty.

July 11

MARINES: In Washington, D.C., the commandant, always seeking to upgrade the professional horizons of the corps, establishes the Marine Corps Professional Reading Program for all NCOs, SNCOs, and officers.

July 17

AVIATION: At Edwards Air Force Base, California, the new Northrop-Grumman B-2 Spirit stealth bomber completes its first flight; with a price tag of nearly \$1 billion apiece these are the most expensive aircraft ever constructed and flown.

July 21–August 8

NAVAL: A thaw in the cold war occurs when the Soviet missile cruiser *Marshal Ustinov*, the missile destroyer *Otlichny*, and the oiler *Genrikh Gasanov* pay a friendly visit to Norfolk, Virginia. Concurrently, the guided-missile cruiser *Thomas*

Gates and the guided-missile frigate *Kauffman* make a port visit to Sevastopol in the Crimea.

August 1

MARINES: To further enhance the educational prospects of marines, the Marine Corps University is established to oversee various programs. This institution includes the Basic and Amphibious Warfare Schools, the Command and General Staff, and 17 noncommissioned officer schools.

August 14

MILITARY: In Washington, D.C., Michael P. Stone gains appointment as the 15th secretary of the army. He is also the first foreign-born secretary, having served in the Royal Navy during World War II.

August 16

AVIATION: The Pacific Air Forces hosts the first Pacific Air Chiefs Conference, which is attended by ranking airmen from Australia, Japan, the Philippines, Singapore, Malaysia, and Brunei. The top issues discussed are promoting regional cooperation and security through air power.

September 7

NAVAL: An accident investigation concludes that the turret accident onboard the battleship *Iowa* was the result of a suicidal act of sabotage by a sailor, Gunner's Mate Second Class Clayton Hartwig.

September 19–21

AVIATION: After Hurricane Hugo ravages the coast of South Carolina, Military Airlift Command (MAC) transports convey 4,300 tons of humanitarian supplies while RF-4C Phantom II reconnaissance aircraft, operating from nearby Shaw Air Force Base, provide photo coverage of the storm's path to National Guard troops conducting rescue operations.

October 1

AVIATION: General Hansford T. Johnson becomes the first U.S. Air Force Academy graduate to wear four stars.

MILITARY: General Colin Powell is selected by President George H. W. Bush as the sixth chairman of the Joint Chiefs of Staff; he is the first African American so honored and, aged 52 years, also the youngest.

October 3

AVIATION: Lockheed delivers its last production U-2R spyplane to the air force, which now operates a fleet of nine U-2Rs, 26 TR-1As, and two TR-1Bs.

October 4

AVIATION: Captain Jeffrey K. Beene, flying a B-1B Lancer, of the 96th Bombardment Wing manages to make a nose-wheel-up landing without seriously damaging the aircraft; he and his crew win the Mackay Trophy.

- At McMurdo Station, Antarctica, a C-5 Galaxy from the 60th Military Airlift Wing lands for the first time without skids and unloads two UH-1N Huey helicopters, 84 tons of supplies, and 72 passengers.

Powell, Colin L. (1937–)

Army general, secretary of state

Colin Luther Powell was born in the Harlem district, New York City, on April 5, 1937, a son of Jamaican immigrants. He enrolled in the local ROTC program while attending the City College of New York and was commissioned a second lieutenant in the U.S. Army in 1958. Powell served actively over the next four decades, including two tours in Vietnam in which he was wounded and highly decorated. Back home, he accepted a number of high-profile political positions within the Office of Management and Budget and the Department of Energy. He rose to brigadier general in 1979, served as a National Security Advisor under President Ronald Reagan, and, in 1989, made history when President George H. W. Bush appointed him the nation's first African-American chairman of the Joint Chiefs of Staff, the nation's highest military post. In this office he was responsible for helping to orchestrate Operation Desert Shield and Desert Storm in response to the 1991 Iraqi invasion of Kuwait. He worked closely with General H. Norman Schwarzkopf during the run-up to the ensuing Gulf War, and he became a familiar national figure by appearing nightly on national television. His reassuring presence, smooth persona, and high popularity ratings gave rise to speculation about a potential run for the presidency. Powell was reappointed to the JCS in 1991 after President Bush awarded him a Presidential Medal of Freedom for his services. However, he disagreed strongly with cuts in military spending proposed by President Bill Clinton and resigned from office in September 1993. The following year he served with

General Colin L. Powell (*Library of Congress*)

an American delegation to Haiti, which convinced the ruling junta to restore the country to democracy without bloodshed.

Powell continued as a private citizen for several years and, in 1995, he published his best-selling memoir, *My American Journey*. He briefly considered running for president as a Republican but, as an exponent of affirmative action for minorities, felt his

(continues)

(continued)

chances were unrealistic and he withdrew from consideration in December 1995. However, in 2001 President George W. Bush appointed him the nation's first African-American secretary of state, responsible for the nation's diplomacy. His task grew increasingly complex in the wake of the September 11, 2001, attacks upon the World Trade Center in New York and the Pentagon in Washington, D.C., followed by Bush's policy to invade Iraq and rid that

country of dictator Saddam Hussein. It was Powell's task to lay out the American position to a skeptical United Nations, which he did with verve and style, although the American claim of Iraqi weapons of mass destruction (WMD) has since been discounted. Powell was stung by criticism that he failed to garner sufficient international backing for Operation Iraqi Freedom, and he concluded half a century of service to the nation by retiring in January 2005. He was replaced by another African American, Condoleezza Rice.

October 11

NAVAL: On the amphibious assault ship *Iwo Jima*, an officer and a seaman are killed when struck accidentally by rounds fired from a Phalanx onboard the cargo ship *El Paso*.

October 17

AVIATION: San Francisco, California, is heavily damaged by an earthquake, and transports from the Military Airlift Command (MAC) fly in 250 tons of supplies.

October 29

AVIATION: In the Gulf of Mexico, a T-2 Buckeye training craft crashes onto the flight deck of the training carrier *Lexington*, killing the pilot and four deck crewmen.

October 30

AVIATION: During a bombing exercise in the Indian Ocean, an F/A-18 Hornet accidentally drops a 500-pound bomb of the guided-missile cruiser *Reeves*, injuring five sailors.

November 9

POLITICS: In an act of historic significance, citizens of East and West Berlin begin tearing down the Berlin Wall, the very symbol of Communist oppression, while bemused East German security forces look on passively. The cold war has ended in a decisive victory for the United States and its Western allies.

November 14

NAVAL: In light of the recent spate of accidents on naval vessels, U.S. Chief of Naval Operations admiral Carlisle Trost orders the fleet to stand down for a review of basic safety procedures. Two days later, he testifies before Congress that 67 major mishaps have cost \$1 million, although he finds the rate still too high.

December 2

NAVAL: The guided-missile cruiser *Belknap* arrives off Malta to serve as a meeting place for talks between Presidents George H. W. Bush and Mikhail S. Gorbachev, but stormy weather prevents their meeting onboard.

December 7

NAVAL: In the Persian Gulf, the battleship *New Jersey* arrives on a five-day goodwill cruise to Bahrain and the United Arab Emirates. This is also the first battleship to visit these waters.

December 11

EXPLORATION: A report issued by the National Geographic Society claims that Admiral Robert E. Peary did not reach the North Pole on April 6, 1909, and he based his claim on either falsified data or simple human error.

December 14

AVIATION: Women make their entry as combat crew members by serving in C-130 and C-141 airdrop missions for the first time.

December 16

MILITARY: As tensions increase between Panama and the United States, U.S. Marine Corps lieutenant Robert Paz is killed by Panamanian guards at a roadblock.

NAVAL: In Panama City, Panama, a navy officer and his wife are taken into custody and physically abused by Panamanian guards after witnessing an incident in which armed guards fired on a car driven by four American officers.

Marines of Company D, 2nd Light Armored Infantry Battalion, with their LAV-25 light armored vehicles during Operation Just Cause in Panama, 1989. (Department of Defense)

December 20–24

AVIATION: Six F-117s of the 37th Tactical Fighter Wing and special operations AC-130H aircraft from Air Force Special Operations Command participate in the opening phases of Operation Just Cause, Panama. Military Airlift Command (MAC) transports also fly in 9,500 troops from Pope Air Force Base, North Carolina, and help execute the biggest nighttime combat airdrop since World War II. Air Force Reserve aircraft fly in 6,000 passengers and 3,700 tons of supplies into the region as hostilities unfold.

- The AC-130H named *Air Papa 06* from the 16th Special Operations Squadron distinguishes itself in combat during Operation Just Cause by destroying numerous barracks and antiaircraft gun emplacements at La Comandancia (Panamanian Defense Force headquarters) without inflicting collateral damage to civilian buildings nearby. They win a Mackay Trophy for their mission.

MILITARY: President George H. W. Bush responds to Panamanian aggression by unleashing Operation Just Cause, a concerted invasion by U.S. armed forces under General Maxwell R. Thurman, which quickly overrun General Manuel Noriega's self-defense forces. The units involved include the XVIII Airborne Corps, 7th Infantry Division (Light), 193rd Infantry Brigade, 75th Ranger Regiment, Special Forces, and part of the 82nd Airborne Division. Significantly, Captain Linda Bray, leading the 988th Military Police Company, is the first woman to direct American troops into action.

NAVAL: In Panama, several SEAL teams participate in Operation Just Cause by disabling a boat and a car used by dictator Manuel Noriega, preventing his escape. SEALs are also engaged in a heavy fire fight with Panamanian security forces at Patilla Airport; four navy personnel are killed and nine wounded in various actions.

MARINES: During Operation Just Cause, a platoon of marines from the Fleet Antiterrorism Security Team (FAST), the Marine Corps Security Force Company, and units from the infantry and armored infantry engage Panamanian defense forces; one marine is killed.

December 29–31

AVIATION: In the wake of a bloody anticommunist uprising in Bucharest, Romania, two C-130 Hercules from the Military Airlift Command (MAC) fly in 30 tons of medical supplies to treat the victims.

1990**January 3**

AVIATION: In Panama, dictator Manuel Noriega takes refuge in the Vatican diplomatic mission until he is coaxed into surrendering. The former dictator is then packed onto an air force C-30 and extradited back to the United States to face drug trafficking charges in Miami, Florida.

- American losses in Operation Just Cause are 23 killed and 322 wounded, mostly by friendly fire, while Panamanian casualties total 314 dead and 124 wounded. The AH-64 Apache attack helicopter successfully debuts in this action, as does the lethal Hellfire laser-guided missile.

January 25

NAVAL: As a cost-cutting expedient, Secretary of Defense Dick Cheney announces the retirement of 54 warships, including two battleships and five nuclear attack submarines.

January 31

AVIATION: The decade-old Operation Coronet Cove, which rotated Air National Guard units into the Panama Canal Zone, is terminated after 13,000 sorties.

February

AVIATION: Aircraft from the 436th Military Airlift Wing and the 463rd Tactical Airlift Wing fly to Monrovia, Liberia, with 30 tons of relief supplies for refugees fleeing an ongoing civil war.

February–March

AVIATION: Transports belonging to the 60th and 63rd Military Airlift Wing deliver 410 tons of relief supplies to Western and American Samoa in the wake of Typhoon Ofa.

February 21

MILITARY: In Colón Province, Panama, a crash between two helicopters in a driving rainstorm kills 11 soldiers of the 7th Infantry Division.

February 23

AVIATION: Aircraft of the 435th Tactical Airlift Wing convey 11 tons of food, medical supplies, and 60 medics to combat an ongoing epidemic in Senegal.

February 26

AVIATION: The legendary Lockheed SR-71 Blackbird is retired from active service owing to extreme operating costs and improvements in satellite photography.

February 27

NAVAL: In Washington, D.C., Admiral David E. Jeremiah gains appointment as the second vice chairman of the Joint Chiefs of Staff.

March 1

MILITARY: In the Fulda Gap between East and West Germany, the 11th Armored Cavalry performs the last border patrol of the cold war.

March 6

AVIATION: A Lockheed SR-71 Blackbird sets four transcontinental air speed records by flying 2,124 miles per hour on a transcontinental crossing. Once parked at Dulles International Airport, Washington, D.C., it is handed over to the National Air and Space Museum, Smithsonian Institution, to be put on permanent display.

March 9

NAVAL: The Department of Defense reports that it will be spending \$877 million on the war on drugs in fiscal year 1990 and \$1.2 billion for FY 1991. These activities include increased surveillance activities and completion of the aerostat radar screen across the southern border.

March 29–April 23

NAVAL: The fleet ballistic submarine *Tennessee* is the first submersible to make a deterrent patrol carrying the new Trident D-5 missiles.

April 4

AVIATION: The 60th and final KC-10 Extender tanker/cargo aircraft is delivered to the air force.

April 11

AVIATION: In Europe, a C-5 Galaxy is loaded with the first Pershing II missiles destined to be destroyed under provisions of the recent INF Treaty between the United States and the Soviet Union.

April 21

AVIATION: At Nellis Air Force Base, Nevada, the Lockheed F-117 Nighthawk is put on public display for the first time and is viewed by an estimated 100,000 visitors.

April 24

AVIATION: At Cape Canaveral, Florida, the seminal Hubble Space Telescope is placed into orbit by the space shuttle *Discovery*. In time, this device provides the most detailed photographic images of the universe collected to date.

April 30

NAVAL: At Norfolk, Virginia, the aircraft carrier *Coral Sea* is decommissioned after 42 years of service. This lowers to 14 the number of carrier battle groups in service.

May 4

AVIATION: The air force approves the use of the AIM-120A advanced medium-range air-to-air missile (AMRAAM) on fighter craft.

May 8

NAVAL: Off Norfolk, Virginia, the guided-missile destroyer *Conyngham* experiences a fire in its boiler room, killing one sailor and injuring 18; this vessel is decommissioned later this year.

May 22

AVIATION: The Special Operations Command (SOC) is created from the Twenty-Third Air Force.

June 15

AVIATION: In Washington, D.C., Secretary of the Air Force Donald B. Rice releases the post-cold war study *Global Reach–Global Power*, which provides a transitional strategic blueprint for the post-cold war air force.

June 20

NAVAL: Off Japan, the carrier *Midway* has a fire in a storeroom, which kills two sailors and injures 16.

June 27–29

NAVAL: The guided-missile carrier *Yarnell* and the guided-missile frigate *Kaufman* drop anchor at Gdańsk, Poland, on a goodwill tour; they are the first American warships to visit that port in 45 years.

June 29

NAVAL: In Washington, D.C., Admiral Frank B. Kelso is appointed the 24th chief of naval operations.

June 30

MARINES: Presently, Marine Corps personnel levels stand at 19,958 officers and 176,694 enlisted men and women.

July 1

AVIATION: In Washington, D.C., General Michael J. Dugan gains appointment as U.S. Air Force chief of staff.

July 12

AVIATION: Lockheed delivers the final production F-117 Nighthawk to the air force; 59 have been acquired in all.

NAVAL: Commander Rosemary B. Mariner becomes the first woman to head an operational aircraft squadron when she officially takes control of Tactical Electronics Warfare Squadron 34 (VAQ-34).

July 17

AVIATION: The city of Baguio, Philippines, is destroyed by a severe earthquake and the air force beings flying in 600 tons of relief equipment to look for survivors. An additional 2,475 passengers are also flown to medical facilities for treatment. Personnel from nearby Clark Air Base are also on hand to assist refugees.

DIPLOMACY: In an ominous televised speech, Saddam Hussein of Iraq demands that Kuwait reduce its oil production from Rumalia Field, which extends under Iraqi territory, and settle ongoing border disputes. Failing this, he intends to invade, a threat that few take seriously at the time.

July 24

AVIATION: An important benchmark occurs when the EC-135 Looking Glass aircraft, intended to control and coordinate nuclear command posts in the event of a nuclear war, stands down. In three decades of service and hundreds of thousands of flying hours, the aircraft never experienced a single accident.

July 30

DIPLOMACY: In Jeddah, Saudi Arabia, representatives from that nation, Kuwait and Iraq meet to arrange reconciliation, but no progress is made.

MILITARY: The Central Intelligence Agency deduces that at least 100,000 Iraqi troops are poised on the borders of Kuwait as an invasion looms.

August–September

AVIATION: The first space system infrastructure capable of directly supporting a military conflict is initiated by the Air Force Space Command (AFSPACCOM). Its many functions include relaying communications, navigation, and meteorological information, along with detecting short-range ballistic missile launches.

August 2

DIPLOMACY: Resolution 660 is quickly passed by the UN Security Council, which calls for the immediate withdrawal of Iraqi forces from Kuwait. Hussein defiantly refuses to relinquish the country, which he is reclaiming as an oil-rich province.

MILITARY: In one of the gravest military miscalculations of the 20th century, Iraqi dictator Saddam Hussein orders his forces to invade and occupy Kuwait, an American ally and major oil exporter. President George H. W. Bush issues several executive orders declaring a national emergency while the Joint Chiefs of Staff review CENTCOM Operations Plan 1002-90, a highly classified contingency plan for transferring major American forces into the region over a period of three to four months.

August 4

MILITARY: In New York City, General H. Norman Schwarzkopf briefs the National Security Council about the military options available for Kuwait. He maintains that it will take a minimum of 17 weeks to build up sufficient military forces in theater to drive the Iraqis out. The possibility that Saddam Hussein will use chemical weapons is also discussed. At Fort Benning, Georgia, the Army Central Command (ARCENT) under Lieutenant General John Yeosock begins preliminary planning for action in the Persian Gulf region. He is assisted by Major General William G. Pagonis, director of logistics, and other high-ranking staff officers.

August 5

NAVAL: Operation Sharp Edge unfolds off the coast of wartorn Liberia, as the amphibious assault ship *Saipan* helps evacuate 2,609 American and foreign nationals from the capital of Monrovia by the time the operation concludes on December 3.

MARINES: Off Monrovia, Liberia, units from the 22nd Marine Expeditionary Unit come ashore to assist in the evacuation of citizens and foreign nationals.

August 6–7

MILITARY: The U.S. Army kicks into high gear as several divisions receive their deployment orders to Saudi Arabia. They include the 82nd Airborne Division and the 24th Infantry Division. Within 24 hours the 1st Cavalry Division, the 1st Brigade, 2nd Armored Division, the 101st Airborne Division, and the 3rd Armored Cavalry Regiment are ordered to ship out under the operation entitled Desert Shield. General H. Norman Schwarzkopf, who has a particular expertise in this region, is chosen as commander. The Americans are under an extreme urgency to secure the Saudi oil fields from a potential Iraqi attack.

August 7

AVIATION: At Langley Air Force Base, Virginia, the 71st Tactical Fighter Squadron (TFS), 1st Tactical Fighter Wing, begins deploying 24 F-15C Eagles on an 8,000-mile flight to Dhahran, Saudi Arabia. The flight is made in 15 hours with the help of 12 inflight refuelings.

DIPLOMACY: In Washington, D.C., President George H. W. Bush insists that Iraqi aggression against Kuwait “will not stand” and formally orders a buildup of American military forces in the region to drive Saddam Hussein out of that strategic oil-producing country.

MILITARY: The U.S. Army begins gearing up for Operation Desert Shield to protect Saudi Arabia and its oil fields from a possible Iraqi attack.

NAVAL: The carrier *Dwight D. Eisenhower* passes through the Suez Canal and enters the Red Sea, where it joins the carrier *Independence* in the Gulf of Oman. Their combined air wings are presently the only coalition aircraft available for immediate use in the Persian Gulf region.

August 8

AVIATION: At Dhahran, Saudi Arabia, the first Air Force Reserve C-141 Starlifter lands, becoming the first American aircraft to deploy in the theater. They are joined shortly afterward by F-15Cs from the 1st Tactical Fighter Wing as additional AWACS aircraft to assist Saudi AWACS already flying over the kingdom. In response to a request from General H. Norman Schwarzkopf, U.S. Air Force vice chief of staff Lieutenant General Mike Loh orders the Air Staff Planning Group (Checkmate) under Colonel John Warden to initiate plans for conducting a strategic air war against Iraqi forces.

MILITARY: At Savannah, Georgia, the 2nd Brigade, 24th Infantry Division boards transports for a rapid transit to Saudi Arabia. The entire division is assembled there by September 12.

August 8–9

MILITARY: In Dhahran, Saudi Arabia, the 2nd Brigade, 82nd Airborne Division, under Colonel Richard Rokosz is the first large American unit airlifted into the theater. Shortly after, they are joined by staff officers of the soon-to-arrive XVIII Airborne Corps.

August 9

AVIATION: The new Eleventh Air Force is created from the old Alaskan Air Command and is assigned to the Pacific Air Forces (PACAF).

August 10

AVIATION: At Central Command (CENTCOM), MacDill Air Force Base, Florida, Colonel John Warren of Air Staff presents a preliminary draft for air operations in the Persian Gulf to General H. Norman Schwarzkopf. General Charles Horner also begins drawing up contingency plans for air power in the event that Iraqi forces attack Saudi Arabia before the Americans can deploy there in force.

- Detachments of F-16s from Shaw Air Force Base, South Carolina, and C-130s from Pope Air Force Base, North Carolina, begin filtering into Saudi Arabia.

MARINES: In accordance with Operation Desert Shield, the 7th Marine Expeditionary Brigade begins airlifting from the United States to Al Jubayl, Saudi Arabia. Once there it will join up with its assigned Marine Prepositioning Force (MPF) squadron.

August 11

MILITARY: In Saudi Arabia, Colonel David Whately and the 7th Transportation Group arrive from Fort Eustis, Virginia. They are tasked with managing the huge influx of men and materiel en route to the theater.

August 12

AVIATION: At Dhahran, Saudi Arabia, the first 32 KC-135 tanker aircraft begins deploying, the first of over 300 Kc-135s and KC-10s scheduled to arrive. These

Schwarzkopf, H. Norman (1934–)

Army general

Herbert Norman Schwarzkopf was born in Trenton, New Jersey, on August 22, 1934, the son of an army officer. He traveled abroad with his father on a year-long visit to Iran in the 1940s and was indelibly impressed by this youthful encounter with Islamic religion and culture. Schwarzkopf subsequently attended the U.S. Military Academy, receiving his lieutenant's commission in 1956. After gaining his airborne wings, he served with the elite 101st Airborne Division before becoming a member of the army's elite Berlin brigade. In 1964 he left the military briefly to obtain a master's degree in missile engineering from the University of Southern California. Schwarzkopf then fulfilled several tours of duty in Vietnam, where he was decorated for bravery with his third Silver Star before rising to brigadier general in 1978 and major general in 1982. The following year he served as ground force commander during Operation Urgent Fury, the U.S.-sponsored liberation of Grenada from Marxist revolutionaries.

Afterwards, he wrote a scathing critique of operations that generated badly needed reforms. Schwarzkopf received his fourth Silver Star in 1988 and spent a year at the Pentagon as deputy chief of staff. He then transferred as head of the United States Central Command (CENTCOM), headquartered at Tampa, Florida, tasked with providing security for American interests throughout the Middle East. In the spring of 1990, mindful of the declining Soviet threat to the region, he conducted hypothetical war games that substituted Iraq's dictator Saddam Hussein as a potential aggressor. The following August Hussein actually invaded neighboring Kuwait and President George H. W. Bush authorized Schwarzkopf to initiate appropriate measures for his eviction.

Using his existing Iraq plan, Schwarzkopf spent the ensuing six months assembling a 27-nation coalition to oust the Iraqis from Kuwait. Many Arab nations proved willing to assist, and Schwarzkopf,

are shortly joined by MH-53J Pave Low helicopters from the 1st Special Operations Wing.

NAVAL: To enforce a United Nations embargo of Iraq, U.S. Navy vessels begin a naval quarantine of the Persian Gulf region.

August 12–14

MILITARY: In Saudi Arabia, Operations Dragon I and II unfold as the 82nd Airborne Division forms a defensive perimeter around the ports of al-Jubayl, Dhahran, and ad-Damman. They have on hand 4,575 soldiers, a company of M551 Sheridan light tanks, and a battalion of 105mm howitzers.

August 13

MILITARY: In light of the fact that the Iraqi army employs hundreds of Scud Soviet-made ballistic missiles, the army deploys its first PAC-2 Patriot surface-to-air missile unit, Battery B, 2nd Battalion, 7th Air Defense Artillery.

by dint of his training in Middle Eastern affairs, melded this awkward assemblage of Western and Middle Eastern armies into a formidable military force of 500,000 men. Operation Desert Shield, the buildup of forces in the Gulf region, succeeded without any serious problems. Thus, when Hussein refused a United Nations order to leave Kuwait, Schwarzkopf commenced Operation Desert Storm to drive them out in January 1991. He began the Gulf War with a month-long aerial bombardment of Iraqi defenses and anti-aircraft sites, which left their ground forces vulnerable to assault. When this failed to induce Hussein to depart, he enacted a well-executed flanking movement that routed the Iraqis, inflicted 100,000 casualties in little over 100 hours of fighting, and effectively liberated Kuwait. Schwarzkopf retired from the military in 1991 and published his memoir entitled *It Doesn't Take a Hero* (1992). He was also made an honorary private first class in the French Foreign Legion, the only American so honored. Today Schwarzkopf lives in Florida, where he frequently serves as a TV military commentator and analyst.

General H. Norman Schwarzkopf, here receiving Kuwait's highest decoration. (U.S. Air Force)

August 14

AVIATION: In Washington, D.C., the Department of Defense announces the presence of E-3 AWACS, KC-10s, KC-135s, and RC-135s in the Persian Gulf theater.

DIPLOMACY: Ships from the Soviet Union join the naval quarantine against Iraq.

MILITARY: In Saudi Arabia, deployment of the XVIII Airborne Corps is assisted by photo intelligence provided by an army satellite.

August 15

AVIATION: Top-secret F-117 stealth aircraft belonging to the 37th Tactical Fighter Wing (TFW) deploy from Tonopah, Nevada, and they are soon joined by F-4G Wild Weasels flying in from George Air Force Base, California.

MILITARY: In Saudi Arabia, the 1st and 3rd Brigades, 82nd Airborne Division, deploy for battle.

August 16

AVIATION: At Myrtle Beach Air Force Base, California, the first wave of Fairchild A-10 Thunderbolt IIs departs for service in Saudi Arabia.

August 17

AVIATION: In Washington, D.C., President George H. W. Bush mobilizes the Civil Reserve Air Fleet for the first time since 1952. These aircraft are pressed into service as troop carriers to accelerate the buildup of forces in the Persian Gulf.

- Once General H. Norman Schwarzkopf approves the initial air campaign strategy, Colonel John Warden is dispatched to Saudi Arabia to personally brief General Charles Horner on it.
- The Defense Satellite Communications Systems (DSCS) is established by the Air Force Space Command to facilitate command links to Operation Desert Storm.

MILITARY: Iraqi forces occupying Kuwait are heavily reinforced and begin constructing defensive structures, or sand berms, along the Saudi border.

- The military buildup in Saudi Arabia continues as a brigade of the 101st Airborne Division deploys from Fort Campbell, Kentucky. The remaining two brigades are embarking on ships at Jacksonville, Florida, and all three will assemble with their equipment by September 22.

MARINES: In accordance with Operation Desert Shield, the 4th Marine Expeditionary Brigade begins embarking on vessels at Morehead City, North Carolina, for the Persian Gulf.

August 18

NAVAL: In the Persian Gulf, the guided-missile frigate *Reid* and frigate *Bradley* fire warning shots across the bows of two Iraqi tankers attempting to leave. The guided-missile cruiser *England* and the guided-missile destroyer *Scott* also divert freighters from docking in the Persian Gulf and northern Red Sea.

August 19

AVIATION: A force of 18 F-117s Nighthawks from the 415th Tactical Fighter Squadron arrives at Mushait Air Base, Saudi Arabia, for service during Operation Desert Shield.

MARINES: On Okinawa, the 1st Battalion, 6th Marines begins embarking for service in Operation Desert Shield.

August 20

AVIATION: In Saudi Arabia, General Charles Horner declares that there is sufficient American air power in Saudi Arabia to defend it against any Iraqi attack. At this time he is also briefed by Colonel John Warden as to the overarching campaign for waging a strategic air war.

MARINES: In Saudi Arabia, Lieutenant General Walter E. Boomer arrives to take charge of I Marine Expeditionary Force. He is ordered to command all marine units in Operation Desert Shield except those still afloat.

**Horner, Charles A. (1936–)***Air Force general*

Charles A. Horner was born in Davenport, Iowa, on October 19, 1936, and he attended the University of Iowa while pursuing a bachelor of arts degree. He was also commissioned a second lieutenant through the ROTC program on campus and reported for flight training at Laredo Air Force Base, Texas. Horner earned his wings as an F-100 pilot in 1960 and flew three years with the 492nd Tactical Fighter Squadron at RAF Lakenheath, England. In December 1963 he switched to flying F-105s with the 4th Tactical Fighter Wing at Seymour Johnson Air Force Base, North Carolina, and, two years later, he served in the Vietnam War at Korat Royal Thai Air Base in Thailand. At this post Horner completed 41 combat missions over North Vietnam as a fighter bomber. Between 1966 and 1967 he rotated back to Nellis Air Force Base, Nevada, to serve as an F-105 instructor, then returned to Thailand in May 1967 to fly an additional 70 combat missions as a Wild Weasel pilot, deliberately luring out Communist air defenses so that they could be identified and destroyed. In 1972 he also attended William and Mary College to obtain a master's in business administration. Horner handled his affairs capably and in July 1985 he became a major general and deputy chief of staff for Plans, Headquarters, Tactical Air Command, Langley Air Force Base, Virginia. In March 1987 he served as commander, 9th U.S. Air Force and U.S. Central Command Air Forces based at Shaw Air Force Base, South Carolina.

Horner's greatest test came in August 1991 after Saddam Hussein invaded Kuwait with a massive army. He was appointed commander in chief-Forward, U.S. Central Command and directed the opening phases of Operation Desert Shield while General H. Norman Schwarzkopf was still stateside. He oversaw the buildup of several hundred aircraft and supporting units from the U.S. Air Force and its coalition partners. When Operation Desert Storm commenced the following January, Horner had at his disposal 2,700 warplanes from 14 nations, and these planes flew over 100,000 missions prior to the ground phase of the campaign. Their accurate bombing gutted Iraqi air defenses and armored formations, allowing the main attack to conclude after only 100 hours of fighting with extremely light losses. For his part, Horner was promoted to full general on July 1, 1992, and appointed to head the North American Aerospace Defense Command and the U.S. Space Command. Horner was responsible for the utilization of space for national purposes through a large network of satellites in orbit and ground stations around the globe. This assignment was followed by a stint as commander of the Air Force Space Command at Peterson Air Force Base, Colorado, after which he retired from active service on September 30, 1994. He currently resides in Fort Walton Beach, Florida, and serves on the board of directors for the U.S. Institute of Peace. During his tenure in the Persian Gulf, military air power was never more effective and decisive in battle.

- Off Liberia, units belonging to the 26th Marine Expeditionary Unit arrive to replace the 22nd MEU as part of Operation Sharp Edge.

August 21

AVIATION: By this date, the U.S. Air Force has deployed A-10s, C-130s, E-3 AWACS, F-4Gs, F-15s, F-15Es, F-16s, F-117s, KC-135, KC-10s and RC-135s in theater. This is the largest concentration of military aircraft outside the United States since the Vietnam War.

- When the air force requests the services of 6,000 reservists, no less than 15,000 volunteer to serve with Operation Desert Shield.

August 22

AVIATION: By this date, Air Force Reserve personnel have flown 8,000 soldiers and 7 million tons of military cargo into Saudi Arabia for service in Operation Desert Storm. Moreover, 20,000 reservists and 12,000 Air National Guardsmen will be called up for service in the Persian Gulf.

MILITARY: In Washington, D.C., Executive Order 12727 is signed by President George H. W. Bush to mobilize 200,000 army reservists for six months of active service. This is the largest activation of reservists since the Korean War.

- In Saudi Arabia, a brigade of the 82nd Airborne Division is redeployed to advance positions in the desert (Forward Operating Base Essex) to help blunt any possible Iraqi attacks. Operating temperatures at the time exceed 100 degrees Fahrenheit.

MARINES: President George H. W. Bush orders 31,000 marine Reservists mobilized for active duty in Operation Desert Shield.

August 23

AVIATION: At Andrews Air Force Base, Maryland, the first of two VC-25a (highly modified Boeing 747s) deploy with the 89th Military Airlift Wing. Once a president is onboard, the aircraft in question receives the call sign *Air Force One*.

- In Washington, D.C., Secretary of Defense Dick Cheney authorizes the air force to mobilize its Reserve components for service in the Persian Gulf; 20,000 are called to the colors to serve in the Persian Gulf crisis.

August 24

AVIATION: At Birmingham, Alabama, the 117th Tactical Reconnaissance Wing dispatches six of its RF-4C Phantom II aircraft to the Persian Gulf region, to be joined by similar aircraft sent by the 67th Tactical Reconnaissance Wing, Bergstrom Air Force Base, Texas.

August 25

MARINES: In Hawaii, men of the 1st Marine Expeditionary Brigade begin flying out to al-Jubayl, Saudi Arabia, where ships of its MPF await.

August 28

AVIATION: At Torrejon, Spain, F-16 fighters are sent in a new deployment to airfields in Qatar, another Persian Gulf ally.

DIPLOMACY: The Iraqi government declares that Kuwait is its 19th province.

POLITICS: In Washington, D.C., President George H. W. Bush meets with 170 congressional members and delineates U.S. objectives in Kuwait: the unconditional withdrawal of all Iraqi forces and restoration of the legitimate Kuwaiti government. Security for the Persian Gulf region and the protection of Americans abroad are also highlighted.

August 29

AVIATION: At Ramstein Air Base, West Germany, a C-5 Galaxy, laden with military supplies for the Persian Gulf, crashes on takeoff, killing 13 people. Staff Sergeant Lorenzo Galvin, Jr., wins the Airman's Medal for heroic efforts to assist crash victims.

August 31

MILITARY: Colonel Jesse Johnson leads the 5th Special Forces Group to Saudi Arabia to train various Arab coalition armies. In time, they are joined by the 3rd and 10th Special Forces Group and some Delta Force contingents.

NAVAL: In the Persian Gulf, the guided-missile cruiser *Biddle* stops and searches the Iraqi freighter *Al Karamah*; it is found to be empty and allowed to proceed to Jordan.

September 1

MILITARY: At Forward Operating Base Essex, Saudi Arabia, men of the 82nd Airborne Division are relieved by the 101st Airborne Division, who promptly rename the position Forward Operating Base Bastogne.

September 2

MARINES: Once in theater, the 7th Marine Expeditionary Brigade is disbanded and incorporated into the I Marine Expeditionary Force, which now consists of the 1st Marine Division and 1st Marine Air Wing (1st MAW).

September 3

MILITARY: In the Saudi Arabian desert, Operation Desert Dragon II unfolds as the 101st Airborne Division erects two addition Forward Operating Bases called FOB Normandy and FOB Carentan to the west of FOB Bastogne.

September 5

AVIATION: Five C-130 units from the Air National Guard (ANG) begin arriving in Saudi Arabia.

NAVAL: In San Diego, California, the fleet tender *Acadia* departs with a crew of 1,260, including 360 women. This is the first wartime test of a combined sex crew in wartime.

September 6

AVIATION: Lieutenant General Claire L. Chennault, who commanded the famous "Flying Tigers" of World War II, is commemorated when the U.S. Post Office issues a 40-cent stamp with his portrait.

September 7

MILITARY: In the Saudi Arabian desert, the 1st and 2nd Brigades of the 24th Infantry Division deploy, and they are soon joined by the 12th Aviation Brigade.

MARINES: The special operations capable 13th Marine Expeditionary Unit (SOC) deploys in the Persian Gulf, where it will remain under navy control.

September 8

AVIATION: Colonel Marcelite Jordan Harris becomes the first African-American woman to make brigadier general in the U.S. Air Force. In this post she becomes director of Air Training Command's technical training.

- The first wave of AC-130H gunships from the 16th Special Operations Squadron arrive in Saudi Arabia.

**Boomer, Walter E. (1938–)***Marine Corps general*

Walter E. Boomer was born in Rich Square, North Carolina, on September 22, 1938, and he received a second lieutenant's commission in the Marine Corps while pursuing his bachelor's degree from Duke University in 1960. He rose to captain in 1965 and saw service in Vietnam from 1966 to 1967 as a company officer, winning a Silver Star for valor. After passing through the Amphibious Warfare School at Quantico, Virginia, Boomer returned to Southeast Asia in 1971 as an adviser to South Vietnamese marines, and he was under fire throughout the Communist Easter Offensive the following year. After additional study at the American University, he taught management at the U.S. Naval Academy as the Management Department chairman, and rose to lieutenant colonel in 1976. Boomer served several years in various posts, rising to brigadier general in April 1986 and took command of the 4th Marine Division, Fleet Marine Force, New Orleans. Boomer rose to major

general on March 14, 1989, and lieutenant general on August 8, 1990, around the same time that Iraqi dictator Saddam Hussein launched his invasion of Kuwait. On August 15, 1990, Boomer arrived in Saudi Arabia as commanding general, U.S. Marine Forces Central Command and I Marine Expeditionary Force. In time this consisted of the 1st and 2nd Marine Divisions, the 3rd Marine Air Wing, and the U.S. Army Tiger Brigade from the 2nd Armored Division. The unit gave marines the added punch of ultramodern army M1 Abrams tanks to supplement their older M60 Pattons.

As Operation Desert Shield gave way to Desert Storm, Boomer favored a direct amphibious assault on the port of Ash-Shu'yabah, 20 miles south of Kuwait City, to provide the I MEF with a supply base before pushing north. Such a move would also preempt any Iraqi counterattacks against the main overland thrust. How-

September 13

AVIATION: In Riyadh, Saudi Arabia, U.S. Air Force brigadier general Buster Glos-son, deputy commander, Joint Task Force Middle East, briefs General H. Norman Schwarzkopf and Colin Powell on the completed operational air war plan that will follow Operation Desert Shield.

September 14

MILITARY: The 197th Infantry Brigade makes its appearance in the Saudi Arabian desert, having shipped in from Fort Benning, Georgia. It is attached to the 24th Infantry Division until that formation's 48th Infantry Brigade can deploy on November 30.

- Camps Red, Gold, and White are founded by the 82nd Airborne Division at Ab Qaiq, Saudia Arabia.

ever, he deferred to Coalition Commanding General H. Norman Schwarzkopf to cancel any landings on the coast for fear that they would prove too costly and would delay the overland offensive. In return, Schwarzkopf approved Boomer's request to delay the attack from February 22, 1991, to February 24, to allow the marines more time to redeploy. Kuwait City was liberated during the so-called 100 hours campaign by marines, who had no trouble dealing with dug-in Iraqi infantry. After the Gulf War, Boomer arrived at Camp Pendleton, California, as commanding general, I Expeditionary Force/commanding general, Marine Corps Base, where he remained until September 1991. He subsequently served as the commanding general, Marine Corps Combat Development Command, rose to full general as of September 1, 1992, and performed his final duty as assistant commandant of the Marine Corps in Washington, D.C. Boomer retired from the marines on September 1, 1994, and presently serves as chairman and CEO of the Rogers Corporation. Among his numer-

General Walter E. Boomer (U.S. Marine Corps)

ous awards are the Distinguished Service Medal, two Silver Stars, two Bronze Stars, and the Legion of Merit.

September 16

MILITARY: At Fort Hood, Texas, the 1st Cavalry Division begins shipping out men and equipment under the aegis of Brigadier General John Tilleli. Once deployed, it is joined by the 1st Brigade, 2nd Armor Division, until the 155th Armored Brigade is ready for service overseas.

NAVAL: In the Persian Gulf, the Bahamian-rigged tanker *Daimon* is intercepted by the destroyer *O'Brien*, becoming the 1,000th vessel to be stopped and searched.

September 17

AVIATION: In Washington, D.C., Secretary of Defense Dick Cheney relieves U.S. Air Force chief of staff Michael J. Dugan for unauthorized comments made to the media relative to Operation Desert Shield.

MARINES: Final elements of the 4th Marine Expeditionary Brigade deploy in the Persian Gulf and are retained under navy command.

September 18–28

AVIATION: Transports of the 436th and 438th Military Airlift Wings deliver tons of blankets, tents, cots, and other equipment for the 100,000 foreign workers fleeing Kuwait for Jordan.

September 20

DIPLOMACY: In Baghdad, Iraq, the Revolutionary Command Council announces that a withdrawal from Kuwait is impossible and that the “mother of all battles” is shaping up.

September 27

NAVAL: In the Gulf of Aqaba, Jordan, the Iraqi tanker *Tadmur* is intercepted by the frigate *Elmer B. Montgomery*, which places a crew onboard after firing shots across the bow.

September 29

AVIATION: The new Lockheed/General Dynamics YF-22A Raptor air superiority/stealth fighter prototype makes its initial flight on a ferry flight to Edwards Air Force Base, California.

October 1

AVIATION: The Air Force Space Command assumes control of Patrick Air Force Base, Florida, from the Air Force Systems Command.

October 1–4

NAVAL: The carrier *Independence* passes through the Straits of Hormuz and enters the Persian Gulf, marking the first time a vessel of this kind has operated in such cramped waters since 1974. The visit is deemed successful and the vessel departs three days later.

October 10

AVIATION: In the Persian Gulf, air force fighter and fighter bomber units begin training exercise to familiarize themselves with desert warfare. To underscore that point, F-15Cs are already performing combat air patrols (CAP).

October 30

AVIATION: In Washington, D.C., General Merrill A. McPeak gains appointment as the new air force chief of staff.

- To expedite the shipment of certain crucial items to the Persian Gulf, air force transports commence Operation Desert Express.

NAVAL: In the Persian Gulf, the amphibious assault ship *Iwo Jima* experiences a steam leak in its fire room, which kills 10 sailors.

November 3

AVIATION: Over Edwards Air Force Base, California, the prototype YF-22A Advanced Technology Fighter (ATF), which employs two General Electric YF120 turbofan engines, becomes the first jet aircraft to achieve supersonic speed with the use of afterburners through a process known as “supercruise” at 40,000 feet.

November 6

MILITARY: The army begins replacing its M1 Abrams tanks with the newer, more powerfully armed M1A1s, which sport a German-made 120mm cannon.

November 8

MILITARY: Gearing up for an inevitable showdown with Iraqi dictator Saddam Hussein, President George H. W. Bush orders an increase in American and allied forces in the Persian Gulf to 430,000 men. Part of this entails shipping the VII Corps under Lieutenant General Frederick M. Franks from Germany to Saudi Arabia. A total of 200,000 men, 6,000 tracked vehicles, and 59,000 wheeled vehicles are relocated by mid-February 1991.

- At Fort Riley, Kansas, the 1st Infantry Division (Mechanized) under Major General Thomas G. Rhame is ordered to prepare for deployment overseas. Because only two brigades can be organized in time, the third brigade will be supplied by the 2nd Armored Division.

MARINES: As part of a general buildup in the Persian Gulf, the 2nd Marine Division, 5th Marine Expeditionary Brigade, and 2nd Marine Air Wing (2nd MAW) are ordered deployed with I Marine Expeditionary Force.

November 13–14

MILITARY: In Washington, D.C., President George H. W. Bush extends the service term for reservists in Operation Desert Shield by an additional 180 days. Within hours, Secretary of Defense Dick Cheney mobilizes an additional 80,000 reservists and National Guard troops.

November 17

AVIATION: To enhance Desert Shield communications, a DSCS II satellite is placed above the Indian Ocean by the Air Force Space Command.

November 21

AVIATION: A-10 Thunderbolt IIs from Davis Monthan Air Force Base deploy to Saudi Arabia.

November 27

MILITARY: At Fort Bragg, North Carolina, the 1st Special Operations Command is reorganized and redesignated the U.S. Army Special Operations Command (Airborne). The U.S. Army Reserve Special Operations Command is also retitled the U.S. Civil Affairs and Psychological Operations Command.

November 29

DIPLOMACY: Resolution 678, authorizing the use of force against Iraqi forces occupying Kuwait, passes the United Nations Security Council. It also grants Saddam Hussein a grace period, one last chance to pull out, but he ignores it.

December 1

MILITARY: In Washington, D.C., Secretary of Defense Dick Cheney enlarges the reservist call up to 115,000 men and women.

MARINES: In California, the 5th Marine Expeditionary Brigade and the special operations capable 11th Marine Expeditionary Unit (SOC) set sail for the Persian Gulf.

December 1–2

AVIATION: At Osan Air Base, South Korea, two MH-60 Pave Hawk helicopters of the 38th Air Rescue Squadron save 22 shipwrecked sailors from a grounded Panamanian vessel six miles offshore.

December 5

AVIATION: The 152nd Tactical Reconnaissance Group dispatches its RF-4Cs to airfields in Saudi Arabia.

December 18

MARINES: The first M1A1 Abrams tanks accepted into the Marine Corps are delivered to the 2nd Tank Battalion.

December 22

MILITARY: In Saudi Arabia, the first unit of the VII Corps, the 2nd Armored Cavalry Regiment under Colonel Don Holder, arrives from Germany.

December 26

NAVAL: In the Arabian Sea, an international flotilla, including the destroyers *Fife* and *Oldendorf*, the guided-missile frigate *Trenton*, and the amphibious transport dock *Shreveport* intercept and board the so-called peace ship *Ibn Khaldoon*. Tense moments result after the crew on the latter attempt to grab weapons from the boarding crew, and warning shots are fired in the air. The vessel is found to be carrying contraband cargo and redirected into a port.

December 27

MILITARY: In Riyadh, Saudi Arabia, General Colin Powell and Secretary of Defense Dick Cheney are briefed by General H. Norman Schwarzkopf as to his forthcoming strategy. He intends to launch a vast flanking movement by the VII Corps and XVIII Airborne Corps from the western desert that will decisively turn the Iraqi right flank before they can react to it.

December 29

AVIATION: The 169th Tactical Fighter Group becomes the first Air National Guard (ANG) unit deployed in the Persian Gulf for active duty.

1991

January

MILITARY: At this critical juncture, the army consists of 710,821 officers and men in 18 divisions, with 200,000 deployed in the Arabian desert.

January 1

MILITARY: At Tactical Assembly Area (TAA) Thompson, northwest of King Khalid Military City, Saudi Arabia, elements of the 1st Armored Division, VII Corps, arrive and deploy under Major General Ronald H. Griffin. As the men settle into TAA Thompson, they begin an extensive set of drills and maneuvers with live gunnery.

MARINES: The 24th Marines are deployed to al-Jubayl, Saudi Arabia, where they will provide rear-area security throughout the I Marine Expeditionary Force area.

January 2

AVIATION: In Saudi Arabia, the 4th Tactical Fighter Wing (Provisional) is cobbled together from Air National Guard F-16s of the 174th Tactical Fighter Wing and the 169th Tactical Fighter Group.

MILITARY: On this day, the Central Command (CENTCOM) reveals U.S. military strength in the Persian Gulf to be 325,000 with more on the way.

MARINES: The outbreak of civil war in Mogadishu, Somalia, results in units of the 4th Marine Expeditionary Brigade being diverted from the Persian Gulf for service off the African coast. Their primary concern is the safety of U.S. embassy personnel trapped by the fighting.

January 2–5

AVIATION: Operation Eastern Exit commences off Somalia as helicopters from the amphibious assault ship *Guam* and the amphibious transport dock *Trenton* evacuate 65 American citizens caught up in civil strife there. Meanwhile, two CH-53Es, with a security force, are launched 466 miles from Mogadishu and conduct a long-range rescue mission under the noses of various armed militias. In two trips nearly 300 people are airlifted to safety, including the Soviet embassy staff.

January 3

DIPLOMACY: In Washington, D.C., President George H. W. Bush, seeking to avert the outbreak of hostilities, proposes that Secretary of State James Baker and Iraqi foreign minister Tariq Aziz meet in Geneva for a last chance at negotiated settlement.

January 4

NAVAL: A Spanish naval vessel halts the Soviet freighter *Dmitri Firmanov* in the Red Sea. The vessel is then boarded by Spanish and U.S. naval personnel, who uncover military equipment not listed on the cargo manifest. The vessel is detained in consequence.

January 5

AVIATION: Two CH-53E Sea Stallion helicopters depart from the amphibious landing dock *Trenton* and fly 460 miles to Mogadishu, Somalia, and land at the U.S. embassy compound there. En route they are refueled twice by KC-130 Hercules tankers.

NAVAL: Following the outbreak of civil war in Somalia, the amphibious assault ship *Guam* and the amphibious transport dock *Trenton* are detached from Operation Desert Shield and dispatched there.

January 6

AVIATION: Four waves of five CH-46 Skyknight helicopters are launched from the amphibious assault ship *Guam* and land in Mogadishu to assist in the evacuation of 200 citizens and foreign nationals.

January 7

AVIATION: The Defense Department announces cancellation of the McDonnell Douglas/General Dynamics A-12 Avenger stealth attack plane for the navy, already 16 months behind schedule and \$2.7 billion over budget. With a projected total cost of \$52 billion, this is the largest weapons program ever terminated.

MILITARY: According to the U.S. Central Command's (CENTCOM) intelligence section, Saddam Hussein has deployed 452,000 Iraqi troops (35 divisions), bolstered by 4,300 tanks and 3,100 artillery pieces.

January 8

MILITARY: At Riyadh, Saudi Arabia, Operation Quick Silver unfolds as the 3rd Brigade, 82nd Airborne Division deploys in response to a terrorist threat to the capital.

POLITICS: In Washington, D.C., President George H. W. Bush asks Congress for authorization to commit American forces to combat in the Persian Gulf if Iraq refuses to relinquish Kuwait.

January 9

DIPLOMACY: In Geneva, Switzerland, Secretary of State James Baker and Iraqi foreign minister Tariq Aziz discuss the Persian Gulf crisis for six and a half hours without resolution.

January 10

MILITARY: The 1st Brigade, 2nd Armored Division ("Tiger Brigade") under Colonel John B. Sylvester, is removed from the 1st Cavalry Division and reassigned to the 2nd Marine Division, I Marine Expeditionary Force, to provide them with enhanced firepower. At the time the marines are still saddled with M60A3 Patton tanks instead of more modern M1A1 Abrams tanks. Meanwhile, the British 7th Armoured Brigade rejoins the British 1st Armoured Division, then part of VII Corps.

January 11

AVIATION: At Riyadh, Saudi Arabia, the two pre-production E-8A JSTARS aircraft are deployed for eventual use against Iraq. This highly advanced reconnaissance platform is capable of real-time surveillance over a battlefield situation.

January 11–12

MARINES: The I Marine Expeditionary Force is reinforced by the II MEF and the 5th Marine Expeditionary Brigade. This assemblage constitutes one of the largest amphibious task forces since the Inchon operation of 1950.

POLITICS: In Washington, D.C., Congress hotly debates authority for U.S. military action against Iraq, although, as commander in chief, President George H. W. Bush does not need their permission to engage. Nonetheless, the House of Representatives votes 250–183 and the Senate votes 52–47 to implement UN Resolution 678.

January 12

DIPLOMACY: In Washington, D.C., Congress votes to authorize President George H. W. Bush to use force against Iraq.

January 14

MILITARY: The 1st Armored Division under Major General Ronald H. Griffin makes a reconnaissance of terrain west of the Saudi-Iraqi border, concluding it is passable for tanks and other tracked vehicles. This information, plus that subsequently obtained by U-2 overflights of enemy positions, allows the 1st and 3rd Armored Divisions to deploy farther west to avoid troop congestion on the ground.

January 15

AVIATION: Vandenberg Air Force Base, California, passes from the Strategic Air Command (SAC) to the Air Force Space Command.

DIPLOMACY: The deadline for Iraqi forces to evacuate Kuwait as per UN Resolution 678 expires.

MILITARY: In light of the threat of chemical warfare used against coalition forces by Saddam Hussein, men of the XVIII Airborne Corps begin taking antinerve agent pills as a precaution.

January 16

AVIATION: The first aerial mission of Operation Desert Storm commences as seven B-52Gs of the 2nd Bomb Wing launch from Barksdale Air Force Base, Louisiana, carrying the new AGM-86C conventional air-launched cruise missiles (ALCMs). With 35 hours of flight time ahead of them, round trip, this is also history's longest bombing mission.

MILITARY: On the eve of hostilities, Central Command (CENTCOM) declares that 425,000 U.S. troops are in the Persian Gulf region, along with forces of 19 nations and naval forces of 14 nations.

- In Saudi Arabia, convoys begin transporting men and equipment of the VII Corps and XVIII Airborne Corps down the Tapline Road, gradually stretching in length to 120 miles. Operation Desert Shield is about to give way to Operation Desert Storm.

January 17

AVIATION: With the UN deadline for evacuating Kuwait having passed, American and coalition aircraft begin a concerted bombardment of Iraqi military targets, missile sites, communications facilities, and other targets deemed useful to Saddam Hussein's occupying forces. On the first day alone the air force and coalition warplanes mount 750 attack sorties while carrier aircraft contribute a further 228. The aerial campaign continues relentlessly for the next 38 days with devastating results and relatively light losses.

- Among the first wave of aircraft to go in are AH-64A Apache helicopter gunships from the 1st Battalion, 101st Aviation Regiment, 101st Airborne Division under Lieutenant Colonel Richard A. Cody. Early shots fired by the laser-guided Hellfire missiles destroy two Iraqi early warning radar sites, paving the way for additional coalition aircraft to begin launching strikes. The army crews are guided in to their targets by air force MH-53 Special Operations helicopters.

- Seven B-52Gs from Barksdale Air Force Base, Louisiana, unleash a salvo of 35 super accurate cruise missiles against communications and radar targets in Iraq.

- F-117 light bombers steal past Iraqi radar defenses and begin bombing strategic targets throughout Baghdad while intense anti-aircraft fire lights up the darkness. They account for 31 percent of all targets struck on the first day.

- As General H. Norman Schwarzkopf begins his "Hail Mary maneuver," a massive outflanking movement, air force C-130 transports deliver 14,000 troops and 9,000 tons of cargo belonging to the army's XVIII Airborne Corps. This forward deployment suddenly places them on the Iraqi right flank.

- An F-16C flown by Captain Jon K. Kelk, 3rd Tactical Fighter Wing (TFW) gains the distinction of bagging the first Iraqi MiG-29 jet fighter.

DIPLOMACY: After some hesitation, the Turkish government votes to allow air force warplanes stationed at Incirlik Air Base to be used against targets in northern Iraq.

January 17

AVIATION: Aircraft from six carriers launch strikes against targets in Kuwait and Iraq as part of Operation Desert Storm. One F/A-18 Hornet flown by Lieutenant Commander Michael S. Speicher of VFA-81 (*Saratoga*) is shot down and the pilot is declared killed in action. This status is revised in time to missing/captured, although his body is not recovered until 2009.

MILITARY: The 2nd Battalion, 34th Armor (1st Division) begins rehearsing attacks on Iraqi earthen positions using plows and armored combat earthmovers.

NAVAL: Within hours of the decision to go to war, navy vessels in and around the Persian Gulf fire off 122 precision-guided Tomahawk cruise missiles. The honor of firing the first missile goes to the cruiser *San Jacinto* serving in the Red Sea.

January 17–February 28

AVIATION: The Air Force Reserve is extremely active during Operation Desert Storm. C-130 transports of the 1650th Tactical Airlift Wing complete 3,200 combat sorties while A-10 Thunderbolt IIs from the 706th Tactical Fighter Squadron fly 1,000 sorties against enemy targets. Despite this level of involvement, no Reserve aircraft are lost and no personnel are killed.

January 18

AVIATION: In a series of air battles over Iraq, coalition aircraft shoot down eight Iraqi MiG-29 and Mirage F-1 fighters, with the first two falling to a pair of F/A-18s piloted by Commander Mark I. Fox and Lieutenant Nick Mongillo of VFA-81 (*Saratoga*).

- Air force jets flying from Incirlik Air Base, Turkey, strike at military targets in northern Iraq to prevent forces there from concentrating against forces moving up from Saudi Arabia.
- Over Dhahran, Saudi Arabia, Patriot missiles fired by Battery A, 2nd Battalion, 7th Air Defense Artillery shoot down a Scud ballistic missile fired by Iraqi forces. Several other Scuds strike Tel Aviv, Israel, as the Patriot battalions there are not yet operational. When the government requests additional defenses against missiles, the army dispatches Task Force Patriot Defender, consisting of two battalions from the 10th Air Defense Brigade, from Germany.
- Battery A, 1st battalion, 27th Field Artillery, fires the first Army Tactical Missile System (ATACMS) rockets at Iraqi targets in occupied Kuwait, destroying an SA-1 missile battery. This event marks the debut of the multiple-launch rocket system (MLRS) in combat.

MILITARY: In Washington, D.C., President George H. W. Bush signs an executive order extending the tour of army reservists beyond 180 days. He also authorizes the call-up of 1 million reservists as needed.

NAVAL: In the Persian Gulf, the destroyer *Moosbrugger* dispatches a SEAL team that boards the Sudanese vessel *El Obeid*; this is the first vessel apprehended since the commencement of hostilities.

USS *John F. Kennedy* taking on fuel and ammunition from the USS *Joshua Humphreys* in the Red Sea during the Persian Gulf War (U.S. Air Force)

- In the Persian Gulf, the guide-missile frigate *Nicholas*, assisted by Helicopter Anti-submarine Squadron (Light) (HSL-44) and a Kuwaiti patrol boat, neutralize several Iraqi oil platforms with enemy troops firing shoulder-launched missiles at coalition aircraft. Five Iraqis are killed, eight are wounded, and 23 are taken captive.

January 19

AVIATION: Over Iraq, A-6 Intruder and A-7 Corsair II aircraft from the carriers *John F. Kennedy* and *Saratoga* fire new Standoff Land Attack Missiles against military targets for the first time.

- Iraqi surface-to-air missiles shoot down two F-16Cs belonging to the 614th Tactical Fighter Squadron and the pilots are captured. Along with six other coalition airmen, they are paraded before television.
- The Iraqis launch 10 Scud missiles into Israeli territory, injuring 10 civilians.

NAVAL: In the Red Sea, the submarine *Louisville* fires the first submerged Tomahawk cruise missile in history against targets in Iraq.

January 20

AVIATION: Over Dhahran, Saudi Arabia, several Iraqi Scud missiles are downed by Patriots fired by Batteries A and B, 2nd Battalion, 7th Air Defense Artillery.

MARINES: Artillery units attached to the I Marine Expeditionary Force commence bombarding Iraqi units on Kuwaiti soil.

January 21

AVIATION: An A-10 Thunderbolt II flown by Captain Paul T. Johnson braves intense anti-aircraft fire to destroy an Iraqi vehicle threatening a downed navy F-14 pilot; he wins the Air Force Cross. Meanwhile, an MH-53J Pave Low helicopter piloted by Captain Thomas J. Trask, 20th Special Operations Squadron, flies in under fire to extract the pilot. Trask and his crew win the Mackay Trophy for their efforts.

January 22

AVIATION: Over Iraq, an F-15E flown by Colonel David W. Eberly and Lieutenant Colonel Tom Griffith are shot down in combat; Eberly and Griffith evade capture for the next three days but are finally taken near the Syrian border.

- Over the Persian Gulf, A-6 Intruder aircraft attack and disable an Iraqi T-43 class vessel, which have a mine laying capability.

MILITARY: Six Iraqi prisoners are taken in a sweep by the 3rd Armored Cavalry Regiment.

January 22–27

AVIATION: MiG aircraft sequestered in hardened aircraft shelters at Al Asad Air Base, Iraq, are hammered by F-111F “Aardvarks” using laser-guided “smart” bombs. Many grounded aircraft are destroyed in this fashion.

January 23

AVIATION: General Colin Powell, chairman of the Joint Chiefs of Staff, declares that air superiority has been achieved over Iraq. Enemy positions are being bombed with virtual impunity.

- In the Persian Gulf, A-6 Intruders attack an Iraqi *Al Qaddisiyah*-class tanker that was apparently collecting military intelligence, and disable it. An enemy hovercraft and patrol ship moored alongside are also sunk.
- A week of intense coalition aerial attacks leaves Iraq with only five air bases still functioning. Their surviving aircraft are reduced to 40 sorties per day.

MILITARY: Near Objective Falcon, Saudi Arabia, scouts of the 1st Battalion, 325th Infantry, 82nd Airborne Division begin nightly reconnaissance sorties to observe enemy positions.

- In Kuwait, Iraqi forces begin dumping millions of gallons of Kuwaiti oil into the Persian Gulf waters and torching hundreds of captured oil wells.

January 24

AVIATION: In the Persian Gulf, A-6 Intruder aircraft sink an Iraqi minelayer and minesweeper and 22 survivors are airlifted to safety by an SH-60 Seahawk helicopter from the guided-missile frigate *Curts*.

- Over the Persian Gulf a Saudi F-15C shoots down two Iraqi Mirage F-1 fighters armed with Exocet antishipping missiles.
- Today coalition air forces mount 2,570 sorties; over the past eight days the number is a staggering 14,750.

NAVAL: A SEAL team lands on a small island in the Persian Gulf and captures 51 Iraqi who had been shooting at coalition aircraft. All are evacuated by helicopters

from the destroyer *Leftwich* and the guided-missile frigate *Nicholas*. This is also the first portion of Kuwaiti territory to be liberated.

January 25

AVIATION: Air force fighter bombers begin employing new I-2000 bombs against hardened Iraqi aircraft shelters, destroying several MiG-29s sequestered inside.

January 26

AVIATION: With the Iraqi air force effectively neutralized, coalition forces begin concentrating their attacks on enemy ground forces in Kuwait.

January 27

AVIATION: Coalition forces acknowledge their air supremacy over Iraqi after 10 days of combat, freeing their aircraft to attack enemy targets at will. F-111s also hit oil pumping manifolds in Kuwait's main terminal at al-Ahmadi with guided GBU-15 bombs to halt the flow of crude oil into the Persian Gulf. This is the worst deliberately set oil spill ever.

January 28

MILITARY: Over Kwajalein Atoll in the Pacific, an army exoatmospheric reentry interceptor system (ERIS) successfully intercepts a dummy warhead launched at Vandenberg Air Force Base, California. The target is destroyed 160 miles above the ground after traveling 4,200 miles.

January 29

AVIATION: Over Al Khafji, Saudi Arabia, an AC-130H gunship is shot down with a loss of all 14 crew members but other air force planes pound the Iraqi forces and hold them in place for a counterattack.

- In the Persian Gulf, helicopters from the amphibious assault ship *Okinawa* attack Iraqi small craft around Umm al Maradum Island, sinking four.

MARINES: Detachments from the amphibious assault ship *Okinawa* seize Umm al Maradum Island in the Persian Gulf; this is the second small portion of Kuwaiti territory liberated by coalition forces.

- Inexplicably, Saddam Hussein orders three brigade-sized night attacks across the Kuwaiti border, one of which captures the Saudi town of Al Khafji. A total of 11 marines are killed by friendly fire.

January 31

MILITARY: In Iraq, two American soldiers from the 233rd Transportation Company, including Specialist Melissa A. Rathbun-Nealy, stray into Iraqi territory and are taken prisoner. Rathbun-Nealy is also the first female prisoner of the conflict.

- In order to prevent further Scud attacks upon Saudi Arabia and Israel, Major General Wayne A. Dowding of the Joint Special Operations Task Force (JSOTF) is ordered to hunt down Scud launchers and either destroy them or point them to coalition air forces. On hand are two squadrons from Delta Force, a company from the 1st Battalion, 75th Rangers, some Navy SEALs, and elements of the army 160th Special Operations Aviation Regiment (SOAR) or "Night Stalkers." The endeavor is moderately successful as Scud launchers are mobile and difficult to track down.

February 1

MILITARY: Along Phase Blue Line, Saudi Arabia, a 15-minute fire fight erupts between Iraqi forces and men from the 4th Battalion, 325th Infantry, 82nd Airborne Division. No losses are incurred by either side.

MARINES: In Saudi Arabia, Saudi and Qatari troops take the village of Al Khafji from Iraqi forces, backed by marine air, artillery, and observer support.

February 2

AVIATION: Over the Indian Ocean, a B-52 bomber based on Diego Garcia experiences electrical problems while returning for a bombing mission over Iraq and crashes. Three crew members are rescued but three are lost.

February 3

MILITARY: By this date, Operation Desert Shield is concluding as most allied ground units have completed their deployment to assigned assembly areas. Foremost among these are the VII Corps and the XVIII Airborne Corps in northwestern Saudi Arabia, which will figure prominently in Operation Desert Storm.

Fairchild A-10A Thunderbolt IIs, affectionately dubbed the “Warthog.” This ground-support aircraft played a key role in Operation Desert Storm. (*San Diego Aerospace Museum*)

February 4

AVIATION: A remote-controlled Pioneer vehicle is used to spot artillery targets for the battleship *Missouri* for the first time.

NAVAL: In the Persian Gulf, the battleship *Missouri* fires its 16-inch guns in anger for the first time since World War II. Accurate shelling destroys several Iraqi command-and-control bunkers.

February 6

AVIATION: An A-10 Thunderbolt II flown by Captain Robert R. Swain, Jr., shoots down an Iraqi Gazelle helicopter with his 30mm cannon. This is the first aerial victory attributed to a “Warthog.” Over Iraq, an F-14 Tomcat from VF-1 (*Ranger*) shoots down an Iraqi Mi-8 helicopter.

MILITARY: Final elements of the 3rd Armored Division under Major General Paul E. Funk arrive in Saudi Arabia and begin deploying. This is the final unit belonging to VII Corps.

MARINES: Marines of the Direct Support Command begin constructing a new forward logistics base dubbed Al Khanjar, which is fully operational within six days.

February 7

MILITARY: Along the Kuwaiti-Iraqi border, the first artillery raids of Desert Storm are conducted by the VII Corps and 1st Cavalry Division. These actions also mark the debut of the laser-guided Copperhead missile, which knocks out an enemy observation tower. These harassment attacks convince the Iraqi high command that coalition forces are planning a major push through the Wadi al-Batin, and they reinforce the area ahead of time.

February 9

AVIATION: Iraqi Scud missiles continue raining down on Israel, wounding 26 civilians.

- A-10 Thunderbolt IIs begin the process of “tank plinking” or destroying individual targets with precision-guided munitions, or “smart weapons.” At this juncture, roughly 600 enemy tanks and armored vehicles have been destroyed, representing 15 percent of Saddam Hussein’s overall military strength.

MILITARY: Coalition commander General H. Norman Schwarzkopf suggests that the opening phase of Operation Desert Storm commence between February 21 and 25, and President George H. W. Bush agrees.

February 11

AVIATION: This day coalition forces mount 2,900 strike sorties. A grand total of 61,862 have been completed for the 26-day period.

February 12

AVIATION: Over Baghdad, Iraq, air force fighter bombers use “smart bombs” to bring down the Martyr’s Bridge, the Republic Bridge, and the July 14 Bridge.

February 13

AVIATION: Acting upon a tip from military intelligence, F-117s bomb the Al Firdos bunker in downtown Baghdad, Iraq, suspected of housing Saddam Hus-

sein. The building, a civilian communications center, is flattened with the loss of several hundred dead, but the elusive dictator was not there. Thereafter, coalition air authorities more closely supervise combat strikes in the capital city.

MILITARY: Another large artillery raid commences as three MLRS missile batteries from the 42nd Field Artillery Brigade and the 1st Cavalry Division fire 216 rounds at Iraqi artillery positions. These, in turn, drop 140,000 “bomblets” upon exposed enemy positions.

February 14

AVIATION: An air force EF-111A “Spark Vark” crashes in Saudi Arabia after a bombing mission over Iraq; the two-man crew ejects but is apparently killed upon landing.

MILITARY: The 1st Armored Division, 9,000 vehicles strong, rumbles toward its Tactical Assembly Area (TAA) Garcia, just below the 2nd Armored Cavalry’s position. Concurrently, the 3rd Armored Division positions itself to the west of this armored concentration.

February 15

DIPLOMACY: In Baghdad, Iraq, the five-man Revolutionary Council declares that they are willing to consider the UN resolution requiring Iraq to withdraw from Kuwait.

MILITARY: Coalition commander General H. Norman Schwarzkopf is briefed on the condition and morale of Iraqi prisoners. He learns that the Iraqi are tired of incessant warfare and would surrender readily except for minefields in their path, possible execution by the Republican Guard, and threats against family members. Many are of the opinion that the bulk of Iraqis will surrender the moment serious fighting starts.

February 16

AVIATION: This evening an AH-64A Apache helicopter gunship from the 1st Infantry Division accidentally fires Hellfire missiles at American personnel carriers as they worked their way through a sand berm along the Iraqi border. Two soldiers are killed and six others wounded in the first of several “friendly fire” episodes that follow.

February 17

AVIATION: By this time, coalition force aircraft have accounted for 1,300 of Saddam Hussein’s 4,240 tanks and 1,100 of his 3,110 artillery pieces.

- A wave of AH-64A Apaches from the 2nd Battalion, 229th Aviation Regiment (101st Airborne Division) begin attacking and reducing Iraqi bunker complexes near the projected Main Supply Route New Market. They are joined by additional Apaches from Company C, 3rd Battalion, 502nd Infantry; around 40 Iraqis from the 45th Infantry Division surrender.

MILITARY: The VII Corps unleashes its largest bombardment to date with five battalions of artillery that smash various Iraqi air defenses. This allows AH-64A Apaches of the 2nd Squadron, 6th Cavalry (11th Aviation Brigade) to slip into enemy lines unopposed, and they destroy several communication facilities.

February 18

AVIATION: The XVIII Airborne Corps swings into action as helicopters from the 1st Battalion, 82nd Aviation Regiment (82nd Airborne Division) conduct a reconnaissance in force over Objective Rochambeau while other Apaches belonging to the 12th Aviation Brigade maul Iraqi troops at Objective White.

- An MH-60 Black Hawk from the 3rd Battalion, 160th Special Operations Battalion swoops in and rescues a downed F-16 pilot 40 miles north of the Iraqi border.

NAVAL: In the Persian Gulf, the amphibious assault ship *Tripoli* and the guided-missile cruiser *Princeton* strike mines and suffer damage. A total of seven crewmen are injured.

February 19

AVIATION: Baghdad, Iraq, is struck by a combination of F-4Gs and F-16s launched from Turkish air space. Today coalition forces mount a record 3,000 sorties for a total of 83,000 since the war began.

MILITARY: The 24th Infantry Division (Mechanized) rumbles forward to engage Iraqi troops while its attached aviation brigade provides support. An Iraqi border post is also eliminated by a direct hit from a Copperhead missile courtesy of Battery B, 4th Battalion, 41st Field Artillery.

February 20

AVIATION: Attack helicopters from the 82nd and 101st Airborne Division ravage nearby Iraqi positions near the Saudi border, inducing more than 400 of them to surrender. Meanwhile, the Iraqi 45th Infantry Division becomes an object of unwelcome attention by the 1st Battalion, 201st Field Artillery.

MILITARY: At Wadi al-Batin, Kuwait, the 1st Battalion, 5th Cavalry, 1st Cavalry Division forces its way through the Iraqi sand berm and begins fanning out into the desert, looking for enemy positions. They are subsequently attacked by Iraqi artillery and antitank guns before pulling back with three killed and nine injured.

February 21

AVIATION: At Freetown, Sierra Leone, a C-141 Starlifter from the 438th Military Airlift Wing arrives bearing 55 tons of food and medicine for victims of hardships there.

February 23

AVIATION: Air force B-52Gs continue pounding the Iraqi Republican Guard positions as other Iraqi troops continue setting Kuwaiti oil wells on fire.

MILITARY: In Washington, D.C., President George H. W. Bush declares to the world that the liberation of Kuwait is at hand and that fighting will continue until the last Iraqi unit is forcibly ejected from that captured nation.

- Teams of Special Forces fan out in the Euphrates River valley, Iraq, seeking intelligence as to Iraqi troop movements. The three-man team headed by Master Sergeant Jeffrey Sims is discovered and battles superior enemy forces for several hours until MH-60 Black Hawks of the 160th Special Operations Aviation Regiment (SOAR) swoop in to rescue them.

- In Kuwait, General H. Norman Schwarzkopf decides that Iraqi positions have been sufficiently “softened up” and the moment of decision to launch an all-out ground offensive is at hand.

MARINES: In Norway, reservists of the 2nd Marine Expeditionary Brigade conducts Exercise Battle Griffin 91 as part of a test of the Norway Airlanded MEB (NALMEB), as per the 1981 agreement to store prepositioned equipment and supplies.

February 24

AVIATION: Over the next three days, coalition aircraft are responsible for flying 3,000 combat sorties, including reconnaissance, close air support, and interdiction.

MILITARY: At 4:00 A.M., American and coalition ground forces under General H. Norman Schwarzkopf unleash their long-anticipated ground offensive against Iraqi forces holding Kuwait. The XVIII Airborne Corps under Lieutenant General Gary E. Luck, supported by the 82nd Airborne Division and the French 6th Light Armored Division, moves forward almost unopposed and easily takes its objectives. Simultaneously, the 101st Airborne Division employs 66 UH-60 Black Hawk and 39 CH-47 Chinook helicopters to air assault their way deep inside Iraqi territory and establish Forward Operating Base Cobra; 340 prisoners are seized in the process.

- As the flanking movement continues, General H. Norman Schwarzkopf orders his main strike force, VII Corps under Lieutenant General Tommy Franks, directly into the fray. Spearheaded by the 2nd Armored Cavalry Regiment, and preceded by a massive bombardment of 11,000 artillery rounds and 414 MLRS rockets, tanks and infantry of the 1st Infantry Regiment surge forward and breach Iraqi defenses. The only resistance comes from a handful of Iraqi T-55 tanks that are quickly dispatched by the 2nd Armored Cavalry. VII Corps seizes all its objectives in only two hours instead of the 18 hours anticipated.

MARINES: The I Marine Expeditionary Force, numbering 84,515 men, steps over the line during Operation Desert Storm. Here the 1st and 2nd Marine Divisions, assisted by armor of the Tiger Brigade, penetrate numerous belts of Iraqi defenses while advancing upon Kuwait City. Simultaneously, the 5th Marine Expeditionary Brigade disembarks to serve as the I Marine Expeditionary Force reserve. Other Marine units remain afloat in the Persian Gulf to act as a deception.

February 25

AVIATION: As Iraqi forces surround and prepare to attack an Army Special Forces team, they are struck by Air Force F-16Cs while a UH-60 Black Hawk helicopter swoops in to rescue the Americans.

- In Dhahran, Saudi Arabia, an Iraqi Scud missile slams into a warehouse occupied by the 14th Quartermaster Detachment, killing 28 soldiers (including the first enlisted female soldier to die in combat) and wounds 97. Nearby Patriot missile batteries were experiencing a software problem and proved unable to deal with incoming missiles.

MILITARY: As the VII Corps marches forward, General H. Norman Schwarzkopf grows concerned that the elite Iraqi Republican Guard is trying to escape. He orders Lieutenant General Franks to turn all units eastward and cut them off.

- Saddam Hussein takes to the air waves over Baghdad radio and orders his remaining forces out of Kuwait.

February 25–26

MILITARY: Colonel Robert Clark leads the 3rd Brigade, 101st Airborne Division, on a 150-mile penetration of Iraqi territory. This is not only the longest air assault in history, but it also severs Highway 8 and cuts off all enemy supplies and reinforcements below it.

February 26

AVIATION: The Iraqi Adnan Division is attacked by Lieutenant Colonel William Hatch and AH-64A Apaches of the 3rd Battalion, 1st Aviation Regiment. In a one-sided engagement, the Americans account for 38 T-72 tanks, 14 BMP fighting vehicles, and 70 trucks.

- As the bulk of surviving Iraqi forces abandons Kuwait, they are savaged by coalition force warplanes, killing thousands along what becomes known as the “Highway of Death.” The four-lane passage is literally gutted by the wreckage of tanks, personnel carriers, trucks, and looted civilian automobiles. The aerial attack stops on the orders of President George H. W. Bush.

MILITARY: At a region denoted as 73 Eastling, M1A1 Abrams tanks of the 2nd Armored Cavalry Regiment engage the Republican Guard Tawakalna Division in a stand-up fight; the Americans destroy 28 Russian-built T-72 tanks and 16 other armored vehicles at a cost of three dead. This encounter demonstrates in stark relief just how superior American armor is over its Soviet counterparts.

- At As Salman Airfield, Iraq, the 1st Platoon, Company A, 27th Engineering battalion suffers seven dead while clearing unexploded cluster bomb submunitions off a runway.

February 26–27

MILITARY: The Battle of Objective Norfolk unfolds as the 1st and 3rd Brigades, 1st Infantry Division, race through the 2nd Armored Cavalry Regiment and engage the Republican Guard Tawakalna Division and the 37th Brigade of the 12th Armored Division head on. The swirling engagement results in the destruction of both Iraqi brigades and scores of tanks, and hundreds are killed and injured. The Americans lose six dead along with a handful of Abrams and Bradleys, all through friendly fire.

February 27

AVIATION: The air force successfully delivers two 4,700-pound GPU-28 bombs that demolish the so-called impregnable Iraqi command bunker at Al Taji. Total air sorties mounted this day top 3,500—a new record.

- A UH-60 Black Hawk helicopter from the 2nd Battalion, 229th Aviation Regiment, en route to rescue a pilot downed behind enemy lines, is itself bagged by Iraqi forces. Five Americans die in the crash and three are captured; among the latter is Major Rhonda Cornum, flight surgeon, the second female prisoner of the war.

MILITARY: Along Medinah Ridge, the biggest tank fight of the war erupts as the 1st Armored Division rolls forward to engage the Republican Guard’s Medinah Division and the remnants of the 12th Armored Division. Supported by artillery and helicopter fire, the Americans devastate their opponents, destroying more than 300 Iraqi vehicles; one American is killed and a handful of vehicles are damaged.

- Major General Barry R. McCaffrey leads the 24th Infantry Division (Mechanized) on a jaunt into Iraqi territory near Basrah, capturing Jalibah Air Base and destroying several MiG-29 fighters on the ground. They then dash down Highway 8, capturing several supply depots and sweeping aside resistance from remnants of the al-Faw, Nebuchadnezzar, and Hammurabi Divisions.

February 28

AVIATION: With the terminus of Operation Desert Storm at 8 A.M., the air force has flown 59 percent of all coalition force sorties, while its 2,000 aircraft represent 75 percent of all machines involved. For all their media celebrity, only 10 percent of ordnance dropped or fired were precision-guided “smart bombs.” However, the elusive F-117s account for 40 percent of all Iraqi strategic targets knocked out by flying 1,270 combat sorties and dropping 2,041 tons of bombs. This is also the first “space war” judging from the extensive use of satellite technology involved.

- Jets, aircraft, and helicopters of the 3rd Marine Air Wing (3rd MAW) fly several hundred missions, mostly ground support. Their losses total four AV-8B Harriers and two OV10 Broncos shot down; five marine aviators are also captured and released within days.

- During the 100 hours of Desert Storm, the Air Force Space Command (AFSPACCOM) satellite systems were extremely active in relaying meteorological information to combat headquarters along with alerts of short-range ballistic missile launches.

MILITARY: With Kuwait completely free of Iraqi units, President George H. W. Bush declares a unilateral cease-fire after only 100 hours of fighting. Considering the devastation wrought on Iraqi forces since January 17, the toll is astonishingly light: 98 dead (21 through friendly fire) and 352 wounded. A further 126 died in noncombat-related accidents. In sum, the army deployed 227,800 men in theater, of which 35,158 were from the Army Reserve and 37,692 came from National Guard formations.

MARINES: Operation Desert Storm concludes just as the I Marine Expeditionary Force recaptures Kuwait City along with 22,000 prisoners. Marine losses in the 100-hour campaign are 24 dead and 92 wounded.

March 1

AVIATION: C-5 Galaxies from the Military Airlift Command (MAC) carry 150 tons of relief supplies to Bucharest, Romania, to help restore order at a time of violent street confrontations and shortages.

March 2

MILITARY: As elements of the Hammurabi Division flee inland, they fire upon the 24th Infantry Division, whose return fire through tanks, artillery, and helicopters bags an additional 185 Iraqi armored vehicles, 400 trucks, and 34 pieces of artillery.

March 3

MILITARY: At Safwan, Iraq, General H. Norman Schwarzkopf and coalition leaders under Lieutenant General Khalid ibn Sukltan meet with their Iraqi counterparts to hammer out cease-fire terms, including immediate repatriation of all captives. Once concluded, U.S. Army civil affairs units swing into action, pro-

viding food, medicine, and shelter to thousands of Iraqi and Kuwaiti refugees while Engineer and Explosive Ordnance Disposal units begin the arduous task of disarming thousands of mines and unexploded ordnance still littered about the desert.

- At this juncture, Central Command (CENTCOM) estimates that coalition forces have accounted for 3,300 tanks, 2,100 armored vehicles, and 2,200 artillery pieces. A total of 80,000 Iraqi prisoners have also been taken although the death toll is less precise and looms upward of 100,000.

March 4

MILITARY: The Iraqis release 10 coalition prisoners.

March 4–12

MILITARY: At Khamisiyah, Iraq, engineers from the 82nd Airborne Division discover and destroy a huge Iraqi bunker complex/weapon cache. They are unaware that chemical weapons and nerve agents are present, exposing many soldiers to low-level doses. This is the origin of what becomes known as Gulf War Syndrome, which ultimately affects 100,000 service personnel.

March 5

MILITARY: Iraqi authorities release 35 coalition prisoners, including two female captives.

March 8

AVIATION: At Vandenberg Air Force Base, California, the first Martin Marietta, two-stage Titan IV heavy-lift booster is successfully launched for the first time.

MILITARY: With Operation Desert Storm successfully concluded, the first wave of army units slated for a return to the United States departs.

March 8–December

AVIATION: The Military Airlift Command (MAC) again demonstrates its strategic flexibility by flying a host of supplies, personnel, and even environmental cleanup equipment into the Persian Gulf region. Accordingly, 42 C-5 Galaxies and three C-141 Starlifters of the 60th and 436th Military Airlift Wings fly in over 1,000 tons of firefighting equipment and crews necessary to extinguish 517 oil wells set alight by retreating Iraqi forces. They also deliver 7,000 tons of relief supplies to Kurdish refugees in southeastern Turkey.

March 9

MARINES: The first units of the I Marine Expeditionary Force begin withdrawing to the United States; all have departed by August 27.

March 10

AVIATION: The Iraqis release a further 21 prisoners, including eight air force members.

- At Andrews Air Force Base, Maryland, returning POWs are personally greeted by Defense Secretary Dick Cheney and several thousand well-wishers.

March 12

MILITARY: In Washington, D.C., President George H. W. Bush authorizes the Southwest Asia Service Medal for any military personnel participating in Operations Desert Shield or Desert Storm.

March 18

NAVAL: At Norfolk, Virginia, the combat stores ship *Sylvania* is the first vessel supporting Operation Desert Storm to return to port. During a seven-month tour, it delivered 20,500 tons of supplies 31,000 piles of mail, and its helicopters performed 10 medical evacuations.

March 20

AVIATION: Over Iraq, an Su-22 caught violating the cease-fire agreement is promptly shot down by an F-16C.

March 31

MILITARY: In accordance with the 1987 IMF Treaty between the United States and the Soviet Union, the last of the Pershing II missiles are removed from Europe and sent home for destruction.

April

AVIATION: Two C-5 Galaxies from the 436th Military Airlift Wing convey 200 tons of medical supplies to Lima, Peru, in order to stave off a cholera epidemic afflicting 150,000 people.

April 6–July 24

MILITARY: In northern Iraq, Operation Provide Comfort is executed to bring humanitarian assistance to thousands of Kurdish refugees. Joint Task Force Provide Comfort consequently is created at Incirlik Air Base, Turkey, where elements of the 3rd Infantry Division (Mechanized) distribute food, water, and shelter. By the time the operation concludes, over 17,000 tons of relief supplies have been distributed.

April 7

AVIATION: U.S. warplanes commence Operation Provide Comfort to assist the Kurds in northern Iraq; part of this effort entails enforcing a no-fly zone above the 36th parallel.

April 11

DIPLOMACY: In New York, the United Nations Security Council declares a cease-fire ending the Persian Gulf War.

NAVAL: U.S. Navy vessels have destroyed 533 mines, intercepted 8,770 merchant ships, and boarded 590 suspected vessels.

April 12

AVIATION: Off the Alaskan coast, forward-deployed F-15 Eagles stationed at Galena Airport intercept a Soviet AN-74 Coaler transport aircraft for the first time.

April 15–July 19

AVIATION: Helicopters of Marine HMM-264 fly in elements of the 24th Marine Expeditionary Unit (SOC) to northern Iraq to assist Kurdish refugees.

April 18

AVIATION: At Vandenberg Air Force Base, California, the air force test launches a Martin Marietta/Boeing MGM-134A intercontinental ballistic missile for the first time. The vehicle splashes down 4,000 miles away near the Kwajalein Missile Range.

April 23

MILITARY: In light of the decisive nature of Operation Desert Storm, which does much to revive America's military spirits since the Vietnam War, Congress votes to award Generals Colin Powell and H. Norman Schwarzkopf a special gold medal.

April 24

MILITARY: President George H. W. Bush posthumously awards a Medal of Honor to Corporal Freddie Stowers, 371st Infantry, who was killed while leading a squad on September 28, 1918. He is the first African American of either world war to be so recognized.

May 10–June 13

AVIATION: After a tropical cyclone batters the coast of Bangladesh with 150-mile per hour winds, transports of the Military Airlift Command (MAC) begin Operation Sea Angel in carrying 3,000 tons of relief supplies to the city of Dacca.

May 15–May 28

MARINES: With Bangladesh still reeling from a violent cyclone two weeks earlier, the 5th Marine Expeditionary Brigade is diverted to the Indian Ocean to provide emergency relief. Operation Sea Angel continues over the next two weeks as part of an international relief effort.

May 16

MILITARY: In Germany, the 11th Armored Cavalry Regiment received orders to ship out to Kuwait as part of Operation Positive Force, the high-profile continuing presence of U.S. forces there.

May 20

GENERAL: Queen Elizabeth II grants General H. Norman Schwarzkopf an honorary knighthood for his command of coalition forces in the Gulf War.

May 31

AVIATION: At RAF Greenham Common, England, the Air Force inactivates the 501st Tactical Missile Wing, the final unit entirely armed with cruise missiles. Ironically, this was also the first GLCM unit deployed and activated in Europe.

June–September

AVIATION: Throughout this period, Military Airlift Command (MAC) transports fly 19 humanitarian missions to Addis Ababa, Ethiopia, to help mitigate the effect of a severe drought.

June 8

MILITARY: In Washington, D.C., a victory parade of thousands of sailors, soldiers, airmen, and marines who fought in Desert Storm is led by their commander, General H. Norman Schwarzkopf. The scene is repeated again two days later in New York City.

June 8–July 2

AVIATION: Clark Air Base, Philippines, is nearly destroyed by the eruption of nearby Mount Pinatubo. Operation Fiery Vigil is drawn up to evacuate 15,000 people from the disaster zone and bring in 2,000 tons of humanitarian relief.

This becomes the largest emergency evacuation since the fall of South Vietnam in 1975.

June 12

MARINES: In the Philippines, Operation Fiery Vigil unfolds as elements of the III Marine Expeditionary Force arrive to assist survivors of a major volcanic eruption at Mount Pinatubo. The destruction to American naval facilities at Subic Bay results in the abandonment of that post, first used in 1898. Over 19,000 people are evacuated.

June 13

MILITARY: In Kuwait, the 11th Armored Cavalry Regiment relieves the 1st Brigade, 3rd Armored Division, and assumes responsibility for the defense of that nation.

June 15

NAVAL: At Annapolis, Maryland, Rear Admiral Thomas C. Lynch gains appointment as the 54th superintendent of the U.S. Naval Academy.

June 21

MILITARY: In Washington, D.C., General Gordon R. Sullivan gains appointment as the 32nd chief of staff, U.S. Army.

June 25

AVIATION: Ongoing drought conditions in Kenya results in 60 tons of food and other supplies being delivered to Nairobi by transports of the 60th Military Airlift Wing.

June 28

MARINES: Sergeant Major Harold G. Overstreet is appointed the 12th sergeant major of the Marine Corps.

June 30

MARINES: At this time, marine personnel levels stand at 19,753 officers and 174,287 enlisted men and women.

July 1

MARINES: In Washington, D.C., General Carl E. Mundy, Jr., gains appointment as the 30th commandant of the Marine Corps.

July 3

MILITARY: In Washington, D.C., President George H. W. Bush awards the Presidential Medal of Freedom to Generals Colin Powell and H. Norman Schwarzkopf for outstanding military leadership during recent events in Kuwait.

July 4

NAVAL: At Norfolk, Virginia, the navy commissions the *Arleigh Burke*, the first of a new class of Aegis guided-missile destroyers of the same name, in honor of an accomplished destroyer commander. In an unusual mark of respect, the honor is conferred while Admiral Burke is still living.

July 7

AVIATION: Drought conditions, exacerbated by civil war, result in a 70-ton food delivery to N'Djamena, Chad, by transports of the 436th Military Airlift Wing.

July 10

AVIATION: At Plattsburgh Air Force Base, New York, the last remaining FB-111A nuclear strike aircraft are retired and flown to desert storage at Davis Monthan Air Force Base, Arizona.

July 22

AVIATION: In a first for the U.S. Air Force, transports of the 730th Military Airlift Squadron and 445th Military Airlift Wing carry 20 tons of medical supplies to Ulan Batar, Mongolia, to assist in a time of acute shortages.

July 30

DIPLOMACY: In a major development, UN arms inspector Rolf Ekeus reports uncovering four times as many chemical and biological weapons than Iraq had previously declared owning.

MILITARY: Congress approves a bill to close 44 military bases in a cost-cutting measure that eliminates 80,000 military and 37,000 civilian positions.

July 31

AVIATION: In Washington, D.C., Congress amends the 1992 defense appropriations bill to allow women to fly combat missions in air force, navy, and marine warplanes.

DIPLOMACY: In Moscow, Soviet Union, President George H. W. Bush and President Mikhail Gorbachev sign the Strategic Arms Reduction Treaty (START I), which mandates a 25 to 30 percent reduction in their respective nuclear arsenals. Hereafter, both countries are entitled to 1,600 strategic nuclear delivery systems and 6,000 warheads. Provisions are also made for vigorous, on-site inspections.

August

MARINES: The cold war having ended, the Marine Corps begins a troop draw-down by eliminating the fourth rifle company of each battalion.

August 6–9

AVIATION: Transports of the Military Airlift Command carry 75 tons of blankets and medical supplies to Shanghai, China, in the wake of severe flooding throughout the interior regions.

August 22

AVIATION: The Gulf War Air Power Survey (GWAPS) is commenced by the air force to correctly evaluate its overall impact during recent hostilities.

September 6

MARINES: A formalized screening process is adopted by the Marine Corps to choose lieutenant colonels and colonels selected for command positions.

September 8

NAVAL: In Las Vegas, Nevada, the 35th annual Tailhook Convention of naval aviators goes amok when several women, including some active duty officers, are sexually harassed or groped. An investigation results in 69 officers being reprimanded. Moreover, the incident highlights the need for increased sexual sensitivity training in the armed forces.

September 11

NAVAL: At Yokosuka, Japan, the carrier *Midway* is replaced by the *Independence*; this becomes the navy's only forward-deployed carrier.

September 15

AVIATION: At Long Beach, California, the new Boeing C-17A Globemaster III performs its maiden flight by flying to Edwards Air Force Base. This aircraft is designed to replace the C-141s and C-5s, and can transport oversized cargo loads of the C-5 Galaxy to remote and primitive landing zones like the C-130 Hercules.

- At Edwards Air Force Base, California, the prototype Beech T-1A Jayhawk makes its maiden flight; in 1993 it becomes a standardized trainer for prospective tanker and transport pilots.

September 16

DIPLOMACY: In Manila, the Philippine senate declines to renew the U.S. lease of the Subic Bay Naval Facility despite the entreaties of President Corazon Aquino. The Americans have maintained a presence there since 1898.

MARINES: All charges are dropped against Lieutenant Colonel Oliver L. North for his role in the Iran-contra scandal.

September 27

AVIATION: In a symbolic move to suggest that the cold war is winding down, President George H. W. Bush orders the long-standing Strategic Air Command (SAC) alert discontinued. This has been a standard American military fixture since October 1957.

NAVAL: In Washington, D.C., President George H. W. Bush declares that the United States will unilaterally reduce its stock of nuclear weapons at sea, including air-launched munitions on aircraft carriers.

October–November

AVIATION: Once the former Soviet Union begins unraveling, air force transports begin delivering food and medical supplies to the needy in Russia, Armenia, and Byelorussia.

- The formerly Communist government of Angola, having concluded a bloody, 16-year civil war, accepts aid from the United States for the first time. Transports from the 436th Military Airlift Wing carry in 275 ton of relief supplies to the capital of Luanda.

October 2

AVIATION: Transports of the 834th Airlift Division fly an additional 15 pallets of medical supplies and eight ambulances into Ulan Bator, Mongolia, to thwart ongoing shortages caused by the collapse of the Soviet Union.

October 17

NAVAL: The navy, having conducted further investigations, exonerates sailor Clayton Hartwig for the accidental explosion onboard the battleship *Iowa* and apologizes to his family for an earlier accusation.

October 23

AVIATION: Air force transports deliver 146 tons of medical supplies and relief cargo to Kiev, Ukraine, after its economy collapses with the fall of the Soviet Union.

November

AVIATION: The Military Airlift Command (MAC) performs its 100th humanitarian flight by assisting Afghan refugees fleeing to camps in Pakistan. Since March 1986, air force transports have delivered over 1,000 tons of aid to the region.

November 1

AVIATION: A C-5 Galaxy from the Twenty Second Air Force flies to Thule, Greenland, with a 36-member search-and-rescue team and two MH-60G Pave Hawks. Once landed, the helicopters rescue the 13-man crew of a Canadian C-130 Hercules that crashed 300 miles from the North Pole.

November 14

AVIATION: The 436th Military Airlift Wing dispatches a C-5 Galaxy with 50 tons of medical and relief supplies to mitigate ongoing food shortages in Freetown, Sierra Leone.

November 15

NAVAL: All charges against Rear Admiral John M. Poindexter for his role in the Iran-contra scandal are ordered dropped by a U.S. federal appeals court.

November 22

MARINES: At Guantánamo Bay, Cuba, units from the II Marine Expeditionary Force prepare to assist displaced refugees on the island of Haiti, then in the throes of its latest political coup.

November 24

NAVAL: After the Philippine government refuses to renew its lease, the navy relinquishes Subic Bay and all its naval facilities. This ends an American naval presence in the islands going back to 1898.

November 26

AVIATION: The air force closes Clark Air Base, Philippines, ending a 90-year American military presence there. This was the largest overseas air force base while it operated.

December 6

AVIATION: Six C-130s of the 834th Airlift Division arrive at Kwajalein Atoll with humanitarian relief supplies, after Typhoon Zelda thoroughly battered its facilities.

December 8

NAVAL: At the Naval Air Station, Pensacola, Florida, the venerable training carrier *Lexington*, the last of the World War II *Essex*-class carriers, is decommissioned. It ends up as a floating museum in Corpus Christi, Texas.

December 8–21

DIPLOMACY: The Soviet Union, one of the world's most oppressive governments, collapses under the weight of its own tyranny and incompetence. A new entity, the Commonwealth of Independent States (CIS), takes the place of the Soviet Union.

December 17–22

AVIATION: In another sign that the cold war has ended, transports of the 436th, 438th, and 439th Airlift Wings deliver 238 tons of food and relief supplies to

Moscow and Saint Petersburg, Russia, Minsk in Byelorussia, and Yerevan in Armenia. Severe economic hardships are an indelible aftereffect of the Soviet Union's collapse.

December 21

AVIATION: The prototype Rockwell AC-130U gunship performs its maiden flight. This new aircraft possesses updated sensors, increased firepower, and enhanced ability to locate ground targets.

December 25

DIPLOMACY: After the Soviet Union votes itself out of existence, President Mikhail S. Gorbachev resigns from office and declares the cold war over. Hopes are high for a "new world order."

1992

January

MILITARY: With the cold war over, army personnel drops to 610,450 in 18 active service divisions.

January 17

AVIATION: The air force, desiring to upgrade its fleet of training aircraft, accepts delivery of the first production model T-1A Jayhawk.

January 20–25

AVIATION: Continuing medical shortages in Mongolia result in another C-5 Galaxy from the 60th Airlift Wing delivering 56 tons of supplies to Mongolia. They do so at the behest of the U.S. State Department to curry good relations with this former Soviet state.

January 30

AVIATION: In the latest consolidation move, control of all Department of Defense satellites and management of the Air Force Satellite Control Network are handed to the Air Force Space Command (AFSPACECOM).

February

MARINES: As a cost-cutting measure, the Marine Corps begins disbanding six permanent Marine Expeditionary Brigade headquarters.

February 1

DIPLOMACY: In Washington, D.C., President George H. W. Bush and Russian president Boris Yeltsin declare the cold war over, which ended in a decisive victory for the United States.

February 6

AVIATION: The 435th Tactical Airlift Wing provides four C-130 Hercules transports, which carry food and medical supplies to the former Soviet state of Lithuania.

February 10–29

AVIATION: The air force embarks upon Provide Hope I, a mass humanitarian mission delivering thousands of tons of food and medical supplies to the new Commonwealth of Independent States, which replaced the now defunct Soviet Union. C-5 Galaxies and C-141 Starlifters fly 65 missions to that end.

February 12

NAVAL: Off Wake Atoll in the mid-Pacific, the salvage vessel *Salvor* makes the deepest-known recovery by recovering parts of a helicopter from 17,250 feet.

February 29

AVIATION: Operation Provide Hope II commences as air force transports continue flying food and medicine into struggling former states of the defunct Soviet Union. Both the army and the navy also deliver cargo by sea and over land.

March 4

AVIATION: For the first time since World War II, American bombers are welcomed in Russia when two B-52s land on a friendship mission.

March 15

AVIATION: In the wake of a severe earthquake that rattles eastern Turkey, C-5 Galaxy and C-130 Hercules aircraft transport over 165 tons of medicine, blankets, clothing, and other relief supplies to the victims.

March 19

AVIATION: Alaska-based F-15s intercept two Russian Tu-95 Bears aircraft for the first time since the demise of the Soviet Union.

March 24

AVIATION: The Open Skies Treaty is signed by 24 nations to allow unarmed reconnaissance flights over their territory.

- In Spain, the final air force fighter units depart for home, ending a 26-year tenure there.

March 31

AVIATION: Lieutenant Commander Wendy B. Lawrence, a navy helicopter pilot, is the first female line officer selected to receive astronaut training.

April

AVIATION: After severe oil rig fires break out in Uzbekistan, five C-141 Starlifters are assigned to deliver several tons of fire-fighting equipment.

April 1

AVIATION: A C-141 Starlifter from the 437th Airlift Wing delivers 155 barrels of aviation fuel by parachute to a joint U.S.-Russian ice station in Antarctica for use by their helicopters.

April 7

DIPLOMACY: After the United States recognizes the former Yugoslavian states of Croatia and Slovenia, resident Serb populations rebel and internecine civil strife ensues.

April 17

AVIATION: After the United States recognized the former Yugoslavian states of Croatia and Slovenia as independent countries, C-141 Starlifters begin flying in humanitarian aid as regional centralized economies constrict.

April 24

AVIATION: Peruvian Su-22 jet fighters attack an air force C-130H Hercules of the 310th Airlift Squadron in international air space, injuring six crewmen and killing one, who was sucked out of the cabin at 14,500 feet. The surviving crew manage to make an emergency landing in the damaged plane, winning a Mackay Trophy.

May 1–10

AVIATION: Transports of the Military Airlift Command (MAC) fly in troops and police to help quell an outbreak of racial violence in Los Angeles, California.

MILITARY: Severe rioting breaks out in Los Angeles due to the acquittal of police charged with the beating of Rodney King; consequently, the 7th Infantry Division (Light) and the National Guard 40th Infantry (Mechanized) are sent in to restore order. The toll is staggering: 54 dead, 2,383 injured, and damages estimated at \$700 million.

MARINES: In the wake of riots occasioned by the acquittal of four police officers charged with beating a motorist, 1,500 marines are rushed to Los Angeles, California, from Camp Pendleton.

May 3–4

AVIATION: A coup in Sierra Leone prompts the deployment of C-141 Starlifters and C-130 aircraft to evacuate 350 citizens and foreign nationals from that West African nation.

May 7–8

AVIATION: In another sign of growing détente, the Air Force Reserve Command Band marches in a Moscow military parade.

May 12

AVIATION: Lockheed delivers its 2,000th C-130 Hercules, making it one of the most widely produced and successful air transports in history.

June 1

AVIATION: In a major organizational overhaul, the Strategic Air Command (SAC), the Tactical Air Command (TAC), and the Military Airlift Command (MAC) are discontinued and replaced by the new Air Combat Command (ACC), which operates SAC's bombers and missiles and TAC's fighters, and Air Mobility Command (AMC), which inherits MAC's transports and SAC's tanker aircraft.

- The Department of Defense creates the United States Strategic Command (USSTRATCOM) as the nation's newest unified command, to oversee U.S. nuclear forces and their long-range delivery systems. General George L. Butler, the final SAC commander, is appointed to take charge.

June 22

NAVAL: In Washington, D.C., Secretary of the Navy H. Lawrence Garrett III resigns due to vocal criticism of his handling of the so-called Tailhook scandal.

June 30

AVIATION: In accordance with President George H. W. Bush's Nuclear Forces Initiative, transports of the Air Mobility Command (AMC) withdraw all remaining stocks of nuclear artillery shells, Lance missile warheads, and nuclear depth charges from Europe.

July 1

AVIATION: The new Air Force Materiel Command (AFMC) is created from a consolidation of the former Air Force Logistics Command (AFLC) and Air Force Systems Command (AFSC).

July 1–March 15, 1996

AVIATION: In Sarajevo, Bosnia-Herzegovina, Operation Provide Promise unfolds as Air Mobility Command (AMC) transports continue delivering tens of thousands of tons of medicine and food to that impoverished region.

July 10

POLITICS: In Miami, Florida, a U.S. federal court sentences former Panamanian dictator Manuel Noriega, whose provocations precipitated Operation Just Cause in January 1990, to 40 years in jail for drug smuggling, money laundering, and racketeering.

July 20

AVIATION: Near Quantico, Virginia, a Bell/Textron V-22 Osprey crashes, killing three marines and four civilians. Flight testing of this revolutionary hybrid aircraft is suspended until an accident investigation concludes.

July 22

NAVAL: In Washington, D.C., a major reorganization scheme is announced when the office of the Assistant Chiefs of Naval Operations for Surface, Submarine, Air, and Naval Warfare are consolidated under the office of the Deputy Chief of Naval Operations for Resources, Warfare, Requirements, and Assessment.

July 24

NAVAL: In light of ethnic unrest in the former Yugoslavian state of Bosnia-Herzegovina, the carrier *Saratoga* becomes the first such vessel to conduct operations in the Adriatic Sea.

August–October

MILITARY: In the wake of Hurricane Andrew, troops from the 82nd Airborne and 10th Mountain Divisions are sent in to assist National Guard troops in disaster relief operations.

August 2–20

AVIATION: In Kuwait, Operation Intrinsic Action unfolds as transports of the Air Mobility Command (AMC) arrive with army reinforcements. The move is made in response to recent threats made to Kuwait by Iraq.

August 12

AVIATION: In Angola, the end of civil war prompts Air Mobility Command (AMC) transports to conduct Operation Provide Transition. These aircraft begin flying thousands of demobilized soldiers home to participate in that nation's first democratic elections.

August 21–December 9

AVIATION: Following the overthrow of General Mohamed Siad Barre, Operation Provide Relief commences as transports of the Air Mobility Command (AMC) begin flying food, medicine, and other relief supplies to Somalia, wracked by civil

wars, drought, and famine. By February 28, 1993, over 3,000 missions have been flown, which deliver over 23,000 tons of cargo. The overall effort is commanded by Marine Brigadier General Frank Libutti.

August 25–October 28

AVIATION: After Hurricane Andrew ravages southern Florida, Homestead Air Force Base is so severely damaged that it is abandoned. Damage in the Miami area is so severe that the Air Mobility Command (AMC) dispatches 13,500 relief workers and 21,000 tons of equipment and supplies in 724 transport missions.

August 26

AVIATION: Over Iraq, coalition aircraft commence Operation Southern Watch to enforce a no-fly zone to keep the Iraqi air force from flying below the 32nd parallel. Naval aircraft involved are also operating from the carrier *Independence*. This is undertaken to prevent Saddam Hussein from attacking the large Shiite community residing in the southern marshes of Iraq.

August 28

AVIATION: Air force RF-4C Phantom II operations conclude when the 67th Reconnaissance Squadron is deactivated at Bergstrom Air Force Base, Texas.

MILITARY: Typhoon Omar hits the U.S. territory of Guam in the Pacific, heavily damaging military installations there; damages are estimated at \$250 million.

August 31

AVIATION: An Air Mobility Command (AMC) C-141 Starlifter transports 70 children stricken by cancer from the Chernobyl nuclear accident from Minsk, Byelorussia, to Brussels, Belgium, for treatment.

September 1–25

AVIATION: Transports of the Air Mobility Command (AMC) convey 750 relief workers and 2,000 tons of supplies to the island of Guam, still reeling from the effects of Typhoon Omar.

September 12–October 18

AVIATION: After Typhoon Iniki ravages Kauai, Hawaii, Air Mobility Command (AMC) and Air National Guard transports perform 600 missions to fly in 9,200 tons of relief supplies and 8,600 passengers.

September 13–29

AVIATION: Operation Impressive Lift unfolds as transports of the Air Mobility Command (AMC) convey UN peacekeeping forces from Pakistan to Somalia, delivering 974 soldiers and 1,168 tons of equipment.

September 23–25

AVIATION: Two C-130 Hercules aircraft evacuate 96 Americans from Liberia in the face of civil strife.

September 24

NAVAL: An official inquiry into the so-called Tailhook scandal reveals that several high-ranking officers tried to cover up the affair to avoid adverse publicity about the U.S. Navy. Consequently, two admirals are forced into retirement and one is reassigned.

September 28

NAVAL: In Washington, D.C., a policy statement entitled “. . . From the Sea” is drawn up to address pressing post-cold war requirements for the navy and marine corps. It is signed by the secretary of the navy and the commandant of the Marine Corps.

October 1

NAVAL: In the Mediterranean, a Sea Sparrow missile accidentally launched from the aircraft carrier *Saratoga* strikes the bridge of the Turkish destroyer *Muavenet*, killing five sailors, including the ship’s captain.

October 2

NAVAL: In Washington, D.C., Sean O’Keefe gains appointment as the 69th secretary of the navy.

October 25

AVIATION: A spate of civil unrest in the former Soviet Republic of Tajikistan prompts the arrival of an Air Mobility Command (AMC) C-141 Starlifter to evacuate U.S. citizens and foreign nationals.

November 4–11

AVIATION: The Air Mobility Command (AMC) dispatches five C-5 Galaxies and one C-141 Starlifter to Armenia with 236 tons of flour to help relieve food shortages there.

November 10

MARINES: On Guam, the Marine Barracks, which has seen continuous occupation since 1899, is disestablished.

November 24

MARINES: Following the transfer of Subic Bay to the control of the Philippines, the few remaining marine units depart.

November 30

AVIATION: Disaster strikes when two C-141 Starlifters of the 62nd Airlift Wing collide during a nighttime air refueling mission over Montana.

December 3

MILITARY: The 10th Mountain Division (Light) under Major General Steven L. Arnold is ordered to Somalia to participate in Operation Restore Hope to assist that war-ravaged, famine-stricken nation.

December 4

AVIATION: Air Mobility Command (AMC) transports commence Operation Restore Hope by performing the first of 1,000 airlift missions to Somalia while Air Force Reserve crews perform an additional 190 sorties. Over all, a total of 50,000 passengers and 40,000 short tons of cargo are conveyed to the region.

December 6–20

AVIATION: The Air Mobility Command (AMC) dispatches six C-5 Galaxies to Islamabad, Pakistan, with 415 tons of engineering vehicles and supplies to combat recent floods.

December 9–10

AVIATION: Operation Restore Hope necessitates Air Mobility Command (AMC) transports to conduct over 1,000 sorties while carrying 50,000 passengers and 40,000 tons of cargo. Air Force Reserve crews also contribute to the relief effort by flying 190 sorties, carrying 1,076 passengers and 1,500 tons of cargo.

NAVAL: In Mogadishu, Somalia, land phases of Operation Restore Hope commences as SEAL and marine reconnaissance teams go ashore to facilitate the transfer of humanitarian aid to a starving, war-ravaged population. The efforts are guided offshore by the carrier *Ranger* and the supply vessel *Tripoli*, which also guide and monitor all air traffic in and out of the capital. These forces maintain a visible presence until the operation concludes in March 1994.

MARINES: The 24th Marine Expeditionary Unit (SOC) goes ashore at Mogadishu, Somalia, to secure ports and landing facilities for relief operations. Lieutenant General Robert B. Johnson of the I Marine Expeditionary Force takes command of all operations on land, which ultimately number 30,000 marines.

December 15

AVIATION: As a cost-cutting measure, England Air Force Base, Eaker Air Force Base, and George Air Force Base are ordered closed.

December 16

AVIATION: The new McDonnell-Douglas C-17 Globemaster III jet transport sets several altitude records with payload.

- A B-52 flown by Captain Jeffrey R. Swegel, 668th Bomb Squadron experiences a severe inflight emergency that knocks out all four engines of its left wing. By means of adroit flying and repairs, two engines are restarted and the bomber makes a safe emergency landing. Swegel and his crew win the Mackay Trophy for their efforts.

December 27

AVIATION: Over Iraq, an F-16C shoots down an Iraqi MiG-25 Foxbat that had violated the United Nations no-fly zone. This is also the first aircraft destroyed by the new AIM-120 AMRAAM air-to-air missile, or “Slammer,” a weapon greatly extending the reach of F-16s and enhancing their lethality.

1993**January**

MILITARY: Army personnel declines sharply to 572,423 officers and men while force structure dwindles from 18 to 16 divisions.

January 1

AVIATION: At Falcon Air Force Base, Colorado, the 7th Space Operations Squadron becomes the first Reserve space unit to be activated.

January 3

AVIATION: The second Strategic Arms Reduction Treaty (START II) is signed by President George H. W. Bush and President Boris Yeltsin of Russia. This new agreement eliminates all multiple, independently targeted reentry vehicles (MIRV) and also reduces the number of nuclear weapons bombers can carry.

January 12

MARINES: Near Mogadishu International Airport, Somalia, a local gang ambushes a marine patrol, killing Private First Class Domingo Arroya. He is the first American serviceman killed there.

January 13

AVIATION: Air Mobility Command (AMC) transports fly in forces to support Southern Watch II, the no-fly zone in southern Iraq near the border with Kuwait and Saudi Arabia.

- A force of 100 American, British, and French warplanes attack 32 Iraqi anti-aircraft missile sites discovered south of the 32-degree north latitude line. Thirty-five of these are launched from the carrier *Kitty Hawk*.
- Another gender barrier falls when U.S. Air Force major Susan J. Helms becomes the first U.S. military female in space when she blasts aloft in the space shuttle *Endeavor*.

January 15

MILITARY: In Baledogle, Somalia, heavily armed militiamen engage in a firefight with Company E, 2nd Battalion, 87th Infantry (10th Mountain Division), losing six members; the Americans incur no losses.

January 15–November 26, 1994

NAVAL: Operation Able Manner unfolds as U.S. Coast Guard vessels intercept 40,000 Haitian economic migrants attempting to flee to the United States, most of whom are returned to Haiti.

January 17

AVIATION: Over Iraq, an F-16 tasked with covering a F-4G Wild Weasel mission against Iraqi anti-aircraft sites, detects a MiG-23 and destroys it with an AIM-210 “Slammer” missile.

NAVAL: In the Persian Gulf, the destroyers *Caron*, *Hewitt*, and *Stump* launch 45 Tomahawk cruise missiles against the Iraqi Zaafaraniyah nuclear fabrication plant in Baghdad.

January 18

AVIATION: In separate actions, F-4G Wild Weasels return fire on an Iraqi missile site that fired upon them while F-16s bomb an airfield whose anti-aircraft had fired upon them. They are joined by British and French aircraft.

- In Zagreb, Croatia, a joint air operations cell is established for coordinating the airlift of supplies by aircraft of the United States, the United Kingdom, Germany, France, and Canada.

January 20

MILITARY: In Washington, D.C., William J. Clinton is sworn in as the 42nd president of the United States and commander in chief.

January 21

MILITARY: In Washington, D.C., Les Aspin gains appointment as the 18th secretary of defense.

January 25

AVIATION: In Kismaayo, Somalia, AH-1 Cobra attack helicopters belonging to the 3rd Squadron, 17th Cavalry, attack six armed pickup trucks that belong to the local militia, or “Technicals,” killing eight.

February 2

AVIATION: As ethnic fighting in the former states of Yugoslavia intensifies, air force transports deliver medical and humanitarian aid to Zagreb, Croatia. Within a few weeks, Operation Provide Promise expands this effort by providing direct air drops to Muslims fleeing a Serbian advance.

February 13–March 9

AVIATION: Air Mobility Command (AMC) transports commence Operation Provide Refuge by flying supplies from Hawaii to Kwajalein Atoll to support 535 Chinese sailors who sought political asylum after their vessel broke down.

February 19

AVIATION: The new T-1A Jayhawk trainer is introduced to student pilots by the 64th Flying Training Wing.

February 24–26

MILITARY: In Kismaayo, Somalia, a firefight erupts between local militia and the 2nd Battalion, 87th Infantry (10th Mountain Division), and 23 Somalis are slain. No American casualties result.

February 28

AVIATION: Over eastern Bosnia, Operation Provide Promise unfolds as transports from the 435th Airlift Wing begin airdrop missions for refugees fleeing Serb forces.

March 12

NAVAL: In Norfolk, Virginia, the Naval Doctrine Command is founded.

March 13–14

AVIATION: In Florida, helicopters of the 301st Rescue Squadron save 93 victims of heavy flooding brought on by a recent blizzard that blanketed the Gulf Coast region.

March 26

DIPLOMACY: In New York, the UN Security Council passes Resolution 814, which transforms the role of peacekeepers in Somalia by instructing them to begin disarming the numerous warlords and private armies in the region.

March 31

AVIATION: Operation Deny Flight, a no-fly zone over Bosnia, is established by the United Nations. It becomes effective on April 5 and is aimed at limiting Serbian use of airplanes in the Bosnian civil war.

April 12–December 1995

AVIATION: Over Bosnia-Herzegovina, the NATO-sponsored Operation Deny Flight commences to enforce a no-fly zone against Serbian aircraft. The carrier *Theodore Roosevelt* transfers 12 F/A-18 Hornets to NATO command as part of the operation.

April 19–24

AVIATION: In Siberia, elements of the Russian and U.S. Air Forces conduct joint rescue operations for the first time.

April 24

MARINES: The last remaining Marine Corps elements still at Mogadishu, Somalia, are withdrawn.

April 28

MILITARY: In Washington, D.C., Secretary of Defense Les Aspin announces a new policy allowing servicewomen more latitude in choosing occupational specialties, including the opportunity to serve as combat pilots and as crews of combat aircraft and warships.

May 4

MILITARY: In Somalia, army forces under Major General Thomas M. Montgomery carry out Operation Continue Hope, which assists local authorities in taking control of international relief and humanitarian missions. The Americans also enforce their peacekeeping mission with a Quick Reaction Force, 60 aircraft/helicopters, and 1,000 aviation personnel.

MARINES: In Somalia, the American role in Operation Restore Hope declines after Lieutenant General Robert B. Johnson turns over control to Turkish general Cevik Bir. The I Marine Expeditionary Force also departs the region.

May 17–29

AVIATION: The Air Mobility Command (AMC) C-5s and C-151 fly 24 missions while conveying UN troops to Cambodia to help supervise the first free elections since 1970.

May 20

AVIATION: At Camp Pendleton, California, the marines begin phasing out the Vietnam-era OV-10 Bronco light attack aircraft by deactivating VMO-2.

June 5

DIPLOMACY: After followers of General Mohamed Farrah Aidid ambush and kill 24 members of the Pakistani peacekeeping force, the UN Security Council passes Resolution 837, which calls on UN forces to apprehend those responsible for their deaths. The ensuing hunt for Aidid falls upon elite army troops requested by U.S. special envoy Jonathan Howe.

June 11

AVIATION: Over Somalia, AC-130 Spectre gunships participate in Operation Continue Hope by raiding outposts of Somali warlords who had attacked UN ground forces on June 5.

June 14

AVIATION: At Charleston Air Force Base, South Carolina, the 437th Airlift Wing accepts delivery of its first C-17A Globemaster III. This is the first air force transport capable of hauling oversized cargo loads to relatively short, unprepared runways.

June 15

NAVAL: In the Adriatic Sea, navy vessels embark on NATO's Operation Sharp Guard to enforce economic sanctions against Croatia, Serbia, and the Republic

of Yugoslavia. They are occupied with maritime intercept and airborne warning and control activities until the operation concludes on June 19, 1996, at which time 73,000 vessels have been challenged and 7,200 searched.

June 17

AVIATION: At Minot Air Force Base, North Dakota, Lieutenant Colonel Patricia Fornes is the first woman to command a combat missile unit when she assumes control of the 740th Missile Squadron.

June 21

AVIATION: At Cape Canaveral, Florida, Major Nancy Currie becomes the first female army astronaut in space when she lifts off onboard the space shuttle *Endeavor*.

June 24

MARINES: In light of increasing tension and hostility from local Somali warlords, the 24th Marine Expeditionary Unit arrives at Mogadishu to back up UN peace-keeping forces.

June 26

AVIATION: Navy vessels unleash 23 Tomahawk cruise missiles at the headquarters building of Iraqi intelligence in Baghdad, Iraq, killing eight persons and wounding a dozen. The strike comes in retaliation for an Iraqi plot to kill President George H.W. Bush while he visited Kuwait the previous April.

June 29

AVIATION: At Wright-Patterson Air Force Base, Ohio, the prototype OC-135B aircraft flies its maiden flight. This vehicle is designed to serve in nations that have signed the Open Skies Treaty.

July 1

AVIATION: The Air Training Command (ATC) and the Air University (AU) are incorporated into the new Air Education and Training Command (AETC).

A 53rd Fighter Squadron F-15C Eagle aircraft takes off on a mission during Operation Deny Flight over Bosnia and Herzegovina. (Department of Defense)

- The Air Force Space Command (AFSPACCOM) accepts responsibility for the Twentieth Air Force, which controls and monitors daily operations of the intercontinental ballistic missile force.
- At Vandenberg Air Force Base, California, the Fourteenth Air Force assumes missile warning and space surveillance missions under the aegis of the Air Force Space Command (AFSPACCOM).

July 5–12

AVIATION: Transports of the Air Mobility Command (AMC) begin transporting Army troops and their equipment from Germany to Macedonia to bolster UN peacekeeping forces there.

July 11–August 1

AVIATION: A flood in the American Midwest inundates eight states along the Mississippi and Missouri Rivers. Air Force C-5 and C-141 transports respond by delivering 800 tons of relief equipment, including 1 million empty sandbags.

July 19

AVIATION: Marine aircraft of VMFA(AW)-533 begin patrolling the no-fly zone established in Bosnia as part of Operation Deny Flight. This operation aims to curb Serbian aggression against ethnic and religious minorities.

MILITARY: In a controversial move, President Bill Clinton removes a 50-year ban on homosexuals in the military and substitutes a “don’t ask, don’t tell” policy. This politically inspired move strains his relations with the military establishment.

July 22

NAVAL: In Washington, D.C., John H. Dalton gains appointment as the 70th secretary of the navy.

July 29

AVIATION: Over southern Iraq, Navy EA-6B Prowlers unleash HARM missiles at Iraqi antiaircraft sites after their radar locked onto them.

August 6

AVIATION: In Washington, D.C., another gender barrier falls when Dr. Sheila E. Widnall gains appointment as the secretary of the air force.

August 8

MILITARY: In Medina, Somalia, an army humvee strikes a mine, killing four soldiers.

August 11–15

AVIATION: The 436th Airlift Wing dispatches three C-5 Galaxies to Nepal after floodwaters wash out several bridges. They are carrying 190 tons of bridge components made in England.

August 18

AVIATION: At White Sands Missile Range, New Mexico, Air Force Space and Missile Center (SMC) personnel are present during the first launch of the Delta Clipper Experimental (DC-X) vertical takeoff and landing rocket.

August 28

MILITARY: In a major escalation, President William J. Clinton changes the mission of army troops in Somalia from peacekeeping to capturing senior Somali militia leader Mohamed Farrah Aidid. To this end, Task Force Ranger, consisting of Company B, 3rd Battalion, 75th Ranger Regiment, Delta Force members, the 160th SOAR, Navy SEALs, and Air Force Special Operations personnel are deployed there. However, Clinton refuses all requests to supply army units with tanks and other heavy equipment for fear of alienating the local population.

September 1

NAVAL: The navy releases its “Bottom Up Review,” which stipulates that, to wage two major regional conflicts and one low-intensity conflict at the same time, the fleet should consist of 346 ships, including 11 carrier battle groups, and one training/reserve carrier battle group.

MARINES: In Washington, D.C., the Department of Defense releases its “Bottom Up Review,” which calls for a standing establishment of 175,000 marines during the post-cold war drawdown. This is larger than the 159,000 originally projected.

September 11

NAVAL: At the Philadelphia Naval Yard, Pennsylvania, the first supercarrier *Forrestal*, which entered the service on October 1, 1955, is decommissioned.

September 20

MILITARY: In a cost-cutting measure, the Congressional Base Closure and Realignment Commission promulgates its plan to shut 130 bases and reduce 45 more nationwide.

September 26

AVIATION: In Mogadishu, Somalia, militants shoot down a UH-60 Blackhawk helicopter with an RPG-7 rocket-propelled grenade launcher. Three crewmen die in the crash and another three soldiers are wounded trying to rescue the survivors.

October 1

AVIATION: The new Joint Primary Aircraft Training Program begins with air force pilots going to Naval Air Station Whiting Field, Florida, and navy and marine pilots attending classes at Randolph Air Force Base, Texas.

- At Barksdale, Louisiana, the Air Force Reserve operates its first-ever B-52 bomber unit when the 93rd Bomber Squadron is activated.

October 2–4

AVIATION: The Air Mobility Command dispatches two C-5 Galaxies to Bombay, India, which carry 1,000 rolls of plastic sheeting, 950 tents, and nearly 19,000 five-gallon water containers for survivors of recent earthquakes.

October 3–4

AVIATION: Air force pararescueman Technical Sergeant Tim Wilkerson helps rescue and treat five wounded Rangers in Mogadishu, Somalia, winning an Air Force Cross.

MILITARY: In Mogadishu, Somalia, Task Force Ranger is launched after receiving a tip that one of Mohamed Farrah Aidid's lieutenants is at the Olympic Hotel

downtown. A mixed group of Delta Force soldiers and rangers flown in by MH-6 Little Bird and MH-60 Black Hawk helicopters apprehends their targets, who are placed in a humvee convoy and taken back to UN lines. However, they are fired upon by thousands of angry militiamen, who also down two Black Hawks with rocket-propelled grenades. Delta Force snipers Master Sergeant Gary Gordon and Sergeant First Class Randall Shugart arrive at the second crash site and fight off Somali militia until they are overwhelmed and killed, winning posthumous Medals of Honor. Chief Warrant officer Michael Durant is taken prisoner. Worse, although the convoy fights its way out, troops must be sent in to rescue the 100 rangers and Delta soldiers now trapped in the city. A rescue force made up of the 2nd Battalion, 14th Infantry, backed by Pakistani and Malaysian tanks, fights its way in and rescues them. American losses are 19 dead and 100 wounded; Somali casualties are estimated in the range of 1,000. Losses of such extent turn public opinion against further operations in Somalia, and, by the following March, all American forces have been withdrawn.

October 5–13

AVIATION: In Mogadishu, Somalia, Operation Restore Hope II unfolds as Air Mobility Command (AMC) C-5s and C-141 deliver 18 Abrams tanks, 44 Bradley fighting vehicles, and 1,300 troops to bolster the American presence there.

October 6

MILITARY: A mortar attack at Mogadishu Airport, Somalia, kills Special Forces Sergeant Matt Rierson; he is the last American soldier lost in Somalia.

October 7

DIPLOMACY: In the wake of heavy fighting and loss of life with Somali warlords, President Bill Clinton announces the withdrawal of all U.S. forces from Somalia by March 31, 1994.

MARINES: In light of recent American military deaths in Somalia, the government decides to deploy the 13th and 22nd Marine Expeditionary Units (SOC) to back up existing forces there.

October 8

AVIATION: Over Bosnia, Operation Provide Hope becomes the air force's longest, continuous airlift operation; only the Berlin airlift surpasses it in tonnage and sorties.

October 15

AVIATION: At the Naval Air Base Pensacola, Florida, the Officer Candidate School and the Aviation Officer Candidate School are consolidated. This results in the closure of the Officer Candidate School at Newport, Rhode Island.

NAVAL: Pentagon officials censor three admirals and 30 senior naval officers for failing to properly supervise the annual Tailhook Convention in Las Vegas, Nevada, during which a score of women officers were sexually groped and abused by naval aviators.

October 18

NAVAL: Navy and Coast Guard vessels of Task Force 120 begin enforcing United Nations sanctions against the military regime in Haiti by enacting Operation

Support Democracy and imposing an economic quarantine on the island nation. These sanctions will remain in place until the Haitian military accepts the return of President Aristide.

October 25

MILITARY: In Washington, D.C., General John M. Shalikashvili gains appointment as the 13th chairman, Joint Chiefs of Staff.

November

AVIATION: Lieutenant Colonel Betty Mullis becomes the first woman to command an Air Force Reserve unit when she takes control of the 336th Air Refueling Squadron.

November 22

MILITARY: In Washington, D.C., Togo West, Jr., is appointed the 16th secretary of the army.

November 30

NAVAL: In Washington, D.C., President William J. Clinton signs legislation allowing women to serve on navy combat vessels.

December 2–13

AVIATION: The space shuttle *Endeavor* blasts off from Cape Kennedy, Florida, under the command of U.S. Air Force colonel Richard O. Covey. Its mission is to repair the \$2 billion Hubble space telescope, which is in need of a “contact lens” to correct its malformed main lens. Another repair mission is necessary before the Hubble can provide spectacular images of the universe.

December 3

RELIGION: At the Pentagon, Imam Abdul Rasheed Muhammad becomes the first Muslim chaplain sworn into duty with the U.S. military.

December 7

AVIATION: At Barksdale Air Force Base, Louisiana, the 917th Bombardment Wing becomes the first Air Force Reserve unit to receive B-52 Stratofortresses.

December 8

AVIATION: The air force begins destroying the first of 450 Minuteman II missile silos in accordance with the 1991 Strategic Arms Reduction Treaty.

December 12

MILITARY: Secretary of Defense Les Aspin, angered by criticism over his handling of military affairs in Mogadishu, Somalia, tenders his resignation.

December 17

AVIATION: At Whiteman Air Force Base, Missouri, the first B-2 Spirit bomber, titled *The Spirit of Missouri*, is delivered to the 393rd Bomb Squadron.

1994

January

AVIATION: The former Communist nations of Romania, Hungary, and Bulgaria grant air force F-16 overfly rights as they deploy from Germany to Turkey, reducing their flight time by two hours.

MILITARY: Army personnel has stabilized at 541,343 officers and men although the number of active divisions declines from 18 to 16.

January 1

MILITARY: In Arlington, Virginia, the Army Historical Foundation is activated under retired colonel Raymond K. Bluhm, Jr., to preserve both the history and the heritage of the American soldier.

January 4

AVIATION: The 435th Airlift Wing at Rhein-Main Air Base, Germany, dispatches a C-130 Hercules with relief supplies to Bosnia. This particular unit is comprised of both Reserve and Air National Guard members.

January 10

AVIATION: Off the coast of Iceland, a pair of HH-60G Pave Hawk helicopters from the 56th Rescue Squadron save six sailors from a stranded tugboat amidst heavy seas and strong winds. The crews of Air Rescue 206 and 208 subsequently receive a Mackay Trophy for their efforts.

January 13

AVIATION: The last remaining F-15s of the 32nd Fighter Group depart Soesterberg Air Base, the Netherlands, ending a 40-year American presence there.

January 17–25

AVIATION: After parts of Southern California are struck by a powerful earthquake, C-5s and C-141s deliver 150 tons of relief supplies and 270 medical personnel to the afflicted regions.

January 25

AVIATION: An air force Titan II rocket launcher hurls the lunar probe *Clementine I* toward the moon; this is the first lunar mission since 1972.

February

AVIATION: For the first time, five KC-135 tanker aircraft working to support Operation Deny Flight in Bosnia receive permission to overfly French airspace for the first time in 20 years.

February 3

MILITARY: In Washington, D.C., William Perry is appointed the 19th secretary of defense.

February 5

AVIATION: A crew from the 317th Airlift Squadron, an Air Force Reserve unit, checks out in a new C-17 Globemaster III for the first time.

- After a Serbian mortar attack in Sarajevo kills 68 and injures 200, four C-130s are dispatched to fly the wounded to medical facilities in Germany.

February 7

AVIATION: An air force Titan IV/Centaur rocket hoists the first Military Strategic and Tactical Relay Satellite into Earth orbit. This is part of a new system designed to enhance ready, secure communications around the world in any conflict.

February 10

AVIATION: Lieutenant Jeannie Flynn becomes the air force's first F-15E-qualified fighter pilot.

February 18

AVIATION: The last remaining F-4G Wild Weasels depart Spangdahlem Air Base, Germany, for Nellis Air Force Base, Nevada.

February 25

AVIATION: As the air force begins closing Bitburg Air Base, Germany, it begins transferring F-15s of the 53rd Fighter Squadron over to Spangdahlem Air Base.

February 27

AVIATION: On the carrier *Dwight D. Eisenhower*, Lieutenant Shannon Workman becomes the first female pilot to carrier qualify by landing her EA-6B Prowler in the traps.

February 28

AVIATION: Over Bosnia-Herzegovina, U.S. warplanes conduct NATO's first-ever military action during Operation Deny Flight when an F-16 flown by Lieutenant Robert Wright, 526th Fighter Squadron, spots four Serbian J-1 Galeb attack aircraft violating the no-fly zone. In quick succession, he brings down all three with Sidewinder and AIM-120 Slammer missiles. Another pilot downs a final Jastreb, bringing the F-16s aerial record to 69 kills and no losses.

March

AVIATION: The T-41 Mescalero trainer, which has been in service with the air force since 1964, is ordered replaced by the newer T-3A flight screening aircraft.

- At Edwards Air Force Base, California, an F-16 fighter fires an AGM-84 Harpoon antiship missile for the first time.

March 7

NAVAL: The carrier *Dwight D. Eisenhower* becomes the first navy warship to receive a permanent female complement after 67 women are ordered to report for duty there.

March 8

MILITARY: The army announces Force XXI, an ambitious project intending to incorporate the latest digital technology into current weapons systems, and in every respect to modernize the army for the challenges of the 21st century.

March 12

MILITARY: The last army unit, 2nd Battalion, 22nd Infantry (10th Mountain Division), is withdrawn from Somalia following a failed two-year mission to attempt to restore stability to the wartorn nation. The cost was 27 American soldiers killed in action, four dead in accidents, and over 100 wounded.

March 13

AVIATION: At Vandenberg Air Force Base, a Taurus booster rocket places two military satellites into orbit for the first time.

March 18

AVIATION: Norton Air Force Base, California, which has served as an important aircraft repair depot for 52 years, is closed down.

March 24

MARINES: As U.S. peacekeeping forces are withdrawn from Somalia, they are covered offshore by the *Inchon* and *Peleliu* amphibious ready groups. A further 55 marines remain behind at the U.S. embassy until its closure the following September.

March 25

AVIATION: An air force C-5 Galaxy departs Somali airspace, ending Operation Restore Hope and removing the last American military personnel still there.

MARINES: In Mogadishu, Somalia, the last U.S. forces are withdrawn from that embattled country, guarded by the 24th Marine Expeditionary Unit (SOC). The Marine security guards at the embassy alone remain.

March 31

AVIATION: In view of ongoing aerial operations over Bosnia, two F-16s fighters arrive at Aviano Air Base, Italy, which is upgraded to become a NATO main operating base.

April

AVIATION: At Ellsworth Air Force Base, the final 150 Minuteman II missiles are removed in compliance with the 1992 Strategic Arms Reduction treaty.

April 6–12

AVIATION: In light of ethnic unrest in Rwanda, Operation Distant Runner commences as air force transports evacuate citizens and foreign nationals from Bujumbura, Burundi, to Nairobi, Kenya, and safety.

April 7–8

AVIATION: Operation Distant Runner unfolds as the amphibious assault craft *Peleliu*'s helicopters begin evacuating American and United Nations personnel from wartorn Rwanda, then in the throes of a genocidal civil war.

MARINES: A force of 330 marines from the 11th Marine Expeditionary Unit (SOC) flies 650 miles inland from the helicopter assault vessel *Peleliu* to Bujumbura, Burundi, to safeguard the evacuation of U.S. citizens and foreign nationals there. Some 230 people are assembled by the Marines for transportation by air force transports.

April 10

AVIATION: In retaliation for a Bosnian Serb attack on UN personnel, air force F-16s bomb a Serbian command post near Gorazde in NATO's first air-to-ground attack, and the first close support mission of Operation Deny Flight.

April 11

AVIATION: A pair of Marine Corps F/A-18 Hornets bomb Serbian targets in the Gorazde safe area in retaliation for continuing attacks on UN peacekeepers.

April 12

MARINES: In Rwanda, the 11th Marine Expeditionary Unit (SOC) is flown in to help evacuate 230 U.S. citizens and foreign nationals trapped by genocidal fighting between Hutu and Tutsi tribesmen.

April 14

AVIATION: In a major mishap over northern Iraq, air force F-15C fighters of the 53rd Fighter Squadron accidentally down two army UH-60 Black Hawk

helicopters in Iraq's northern no-fly zone, killing 15 Americans and 11 international observers. They were apparently misidentified as Russian-built Mi-24 Hind gunships of the Iraqi air force.

April 23

NAVAL: In Washington, D.C., Admiral Jeremy M. Boorda gains appointment as the 25th chief of naval operations. He is the first man to do so after rising from the enlisted ranks.

April 26

AVIATION: The marines phase out the last of their venerable OV-10D Broncos with the disbanding of VMO-4.

May 3

AVIATION: At Davis Monthan Air Force Base, Arizona, the last operational B-52G is retired. However, fan-jet powered B-52Hs continue to serve well into the 21st century.

May 6

AVIATION: At Tucson, Arizona, Lieutenant Leslie DeAnn Crosby becomes the first female Air Force Reserve fighter pilot after passing through the F-16 RTU.

May 7–9

AVIATION: The onset of civil war in Yemen prompts six Air Mobility Command (AMC) transports to evacuate 623 U.S. citizens and foreign nationals to safety.

May 8

AVIATION: The Air Mobility Command (MAC) dispatches five C-141 Starlifters from Germany to support Operation Provide Promise in Bosnia. By the time their participation ends on July 26, they will have delivered 7,000 tons of supplies.

May 11–17

AVIATION: In Turkey, Air Mobility Command (AMC) C-141 Starlifters convey 329 tons of relief supplies to the hundreds of thousands of refugees in Rwanda. Operation Provide Assistance ultimately delivers 10,000 rolls of plastic sheeting and 100,000 blankets.

May 20–February 8

MARINES: At Guantánamo Bay, Cuba, Operation Sea Signal unfolds as marines prepare a detention center for a mass Haitian exodus toward the United States. More than 40,000 people are processed and sent back to Haiti.

June–September

AVIATION: After raging forest fires consume 2 million acres in six western states, eight Air Force Reserve and Air National Guard C-130 aircraft begin dousing afflicted regions with 5 million gallons of fire retardant.

June 1

MARINES: In Washington, D.C., Brigadier General Carol A. Mutter becomes the first female marine promoted to major general.

June 15–23

MARINES: At Vladivostok, Russian Republic, Marine forces conduct landing exercises with their Russian counterparts for the first time.

June 22–30

AVIATION: In Germany, Air Mobility Command (AMC) dispatches C-5 Galaxies and C-141 Starlifters to Uganda to convey armored vehicles intended for UN peacekeeping forces in Rwanda.

June 24

AVIATION: The stealthy F-117 officially receives the designation “Nighthawk.” Previously, air crews had referred to it as the “Wobblin’ Goblin” and “Black Jet.”

June 26

AVIATION: A C-5 Galaxy of the 60th Military Airlift Wing carries a 34-ton magnetic resonance imaging system to the Ukraine to assist victims of the 1986 nuclear accident at Chernobyl.

June 30

AVIATION: In Berlin, Germany, the air force deactivates Detachment I, 435th Airlift Wing, 46 years after the famous Berlin airlift.

July

AVIATION: The air force accepts delivery of the last production F-15 Eagle.

- After the Georgia coastline is inundated by Tropical Storm Alberto, the 507th Air Refueling Group flies in 1,000 pounds of supplies to assist flood victims.

July 1

AVIATION: The 184th Bomb Group becomes the first Air National Guard (Kansas ANG) unit equipped with B-1B Lancers.

- The Air Force Space Command (AFSPACCOM) accepts responsibility for the nation’s nuclear ballistic missiles from the Air Combat Command (ACC), and now controls all missile warning, space surveillance, space launch, and satellite control functions.

July 21

AVIATION: Over Bosnia, a C-141 Starlifter is damaged by small arms fire from the ground and humanitarian operations are temporarily suspended. The aircraft returns to Rhein-Main Air Base, Germany, with 25 holes in its fuselage and wings.

- The Air Force concludes all fighter operations at Ramstein Air Base, Germany, in transferring F-16s of the 86th Fighter Wing to Aviano Air Base, Italy.

MARINES: On Okinawa, the 9th Marines are deactivated as part of the post-cold war drawdown.

July 24–October 6

AVIATION: Over Zaire, Air Mobility Command (AMC) transports commence Operation Support Hope to bring in humanitarian relief to thousands of Rwandan refugees. Aircraft from 22 airlift wings deliver a total of 3,660 tons of supplies.

MARINES: Elements of the 15th Marines Expeditionary Unit (SOC) are sent along with 2,000 other U.S. service personnel to assist a major refuge crisis in Rwanda.

July 31

AVIATION: Off the coast of California, Lieutenants Kara Hultgreen and Carey Dunai become the first women to qualify in the Grumman F-14 Tomcat by landing on the carrier *Constellation*.

August 1

NAVAL: In Annapolis, Maryland, Admiral Charles R. Larson gains appointment as the 55th superintendent of the U.S. Naval Academy, a post he also held between 1983 and 1986. Larson is the first individual to hold the position twice.

August 2

AVIATION: Two B-52s from the 2nd Bomb Wing fly a record world circumnavigation mission in 47 continuous hours and five aerial refuelings. They land in Kuwait on the fourth anniversary of the Iraqi invasion.

August 3

AVIATION: A Pegasus rocket launched by a B-52 at high altitude successfully places a satellite in Earth orbit.

August 4

AVIATION: Brigadier General Susan L. Pamerleau is the first female commander of the Air Force Reserve Officer Training Corps.

August 5

AVIATION: In Bosnia, two A-10 Thunderbolt IIs destroy a Serbian armored vehicle near Sarajevo after heavy weapons had been stolen from a UN compound.

August 19–24

NAVAL: Operation Able Vigil unfolds as Coast Guard vessels intercept 30,224 Cuban refugees attempting to escape Communist Cuba. The operation requires the active involvement of 38 cutters and nine naval vessels, making it the biggest Coast Guard operation since the Vietnam War.

August 24–25

AVIATION: Air force transports evacuate over 1,000 people from Johnston Island in the Pacific as a huge typhoon approaches.

August 25–31

AVIATION: The United States and Ukraine sponsor a joint Open Skies trial flight consistent with the Open Skies Agreement allowing unarmed reconnaissance flights.

August 31–September 6

MILITARY: In Berlin, Germany, American, British, French, and Russian forces are withdrawn from the city for the first time since the end of World War II.

August 31–September 10

AVIATION: Operation Safe Haven takes place as air force transports convey Cuban and Haitian refugees from crowded facilities at Guantánamo Bay to Panama.

September 8

MILITARY: In Berlin, Germany, the army's Berlin Brigade is disbanded; it had been on active service since 1945.

September 9

AVIATION: The space shuttle *Discovery* lifts off from Cape Kennedy, Florida, with a crew of six: four air force officers and two civilian technicians.

September 19

AVIATION: Air force transports supply logistical support throughout the life of Operation Uphold Democracy in Haiti.

DIPLOMACY: To avoid the onset of violence with the Haitian military, a deputation consisting of former president Jimmy Carter, retired general Colin Powell, and Senator Sam Nunn of Georgia convince Haitian strongman General Manuel Cedras to accept political exile in Panama.

MILITARY: Lieutenant General Henry H. Shelton leads a multinational force into Haiti during Operation Uphold Democracy, to restore a constitutionally elected government under President Jean-Bertrand Aristide. Units involved include the XVIII Airborne Corps, 10th Mountain Division (Light), 3rd Special Force Group, and the 25th Infantry Division, among others.

NAVAL: A total of 24 navy vessels are taped to participate in Operation Support Democracy, including the carriers *Dwight D. Eisenhower* and *America*, which have removed their usual air groups for several army helicopters.

September 20

MARINES: At Cap Haitien, Haiti, the Special Purpose Marine Amphibious Group Task Force Carib (2nd Battalion, 2nd Marines and helicopters of HMM-264) is landed to provide humanitarian relief during Operation Uphold Democracy and maintain order ashore.

September 24

MARINES: In Haiti, a marine rifle squad engages Haitian military personnel at a police station, killing 10 and wounding one. A sailor is wounded in the exchange.

September 26

AVIATION: At Poltava Air Base, Ukraine, a B-52 Stratofortress, a B-1B Lancer, and a KC-10 Extender pay a goodwill visit. This is the first appearance by American warplanes since the shuttle bombing missions of World War II.

October 4

AVIATION: The air force replaces its last F-4G Wild Weasel air defense suppression aircraft with F-16 Falcons.

October 8–December 22

NAVAL: In light of recent Iraqi maneuvers near the Kuwaiti border, the guided-missile cruiser *Leyte Gulf*, the *George Washington* carrier battle group, and the *Tripoli* amphibious ready group begin deploying in the Red Sea region.

MARINES: The 15th Marine Expeditionary Unit (SOC) positions itself off Kuwait City in the Persian Gulf in the event of hostilities with Iraq.

October 10

AVIATION: Air force warplanes begin arriving in Kuwait during Operation Vigilant Warrior to deter possible Iraqi aggression in the Persian Gulf region. Within days, the number of aircraft in the theater has increased from 77 to 270, including F-15s, F-16s, and A-10s.

MILITARY: In response to recent Iraqi movements toward the Kuwaiti border, President Bill Clinton orders the deployment of 36,000 American troops to the Persian Gulf, backed by warships and hundreds of aircraft. Meanwhile, elements of the 24th Infantry Division (Mechanized) deploy with Kuwaiti units as a precaution.

October 14–16

AVIATION: At Langley Air Force Base, Virginia, a pair of C-17 Globemaster IIIs fly their first logistical mission by conveying military supplies to Saudi Arabia.

October 25

AVIATION: Lieutenant Kara S. Hultgreen, the first woman to carrier qualify in an F-14 Tomcat, dies in a landing accident onboard the *Abraham Lincoln*.

October 26

AVIATION: In Washington, D.C., General Ronald R. Fogleman is appointed air force chief of staff; he is also the first Air Force Academy graduate to take charge of the force.

October 30

AVIATION: At Kadena Air Base, Japan, a C-141 Starlifter loaded with 20 tons of medical supplies, blankets, and tarpaulins lifts off for Vladivostok, Russia, to assist flood victims there.

October 31–November 1

AVIATION: At Ellsworth Air Force Base, North Dakota, a pair of B-1B Lancers fly nonstop for 25 hours to reach a bombing range in Kuwait. This mission also marks their operational debut in the Persian Gulf region.

November 6–8

AVIATION: Flash flooding in Egypt results in a pair of C-141 Starlifters being loaded with 37 tons of relief goods and dispatched to assist the victims.

November 15

AVIATION: Commander Donnie L. Cochran becomes the first African American to lead the navy's Blue Angels Flight Demonstration Squadron.

November 21–23

AVIATION: A Serb attack on Bihac, Bosnia, results in NATO and U.S. Air Force strikes against Serbian airfields and missile sites at Ubdina in occupied Croatia.

- Two C-5 Galaxies participate in Project Sapphire, which entails removing 1,300 pounds of enriched uranium from the Republic of Kazakhstan to the United States for safekeeping.

December 17–21

AVIATION: The 94th Air Lift Wing dispatches a C-130 Hercules loaded with five pallets of clothing, furniture, and beds to assist orphan shelters in Albania.

December 22

AVIATION: At Edwards Air Force Base, the first of three Lockheed SR-71 Blackbirds reactivated for research purposes with NASA arrives.

December 29

AVIATION: Off the coast of Ireland, helicopters from the 56th Rescue Squadron save eight Dutch sailors from a sinking vessel.

1995

January

MILITARY: Army personnel continues contracting to 508,559 officers and men while the number of active divisions drops by one for a total of 13.

January 12

NAVAL: The four mothballed *Iowa*-class battleships are stricken from the Naval Vessel Register, but these vessels will display a longevity that surprises many.

January 17

AVIATION: The 17th Airlift Squadron is the first Air Mobility Command (AMC) unit equipped with the C-17 Globemaster III for military service.

January 19

AVIATION: The 374th Airlift Wing at Yokota Air Base, Japan, begins humanitarian missions to assist earthquake victims in southwestern Japan.

February 1–20

AVIATION: Rioting at Cuban refugee camps in Panama leads to Operation Safe Passage, whereby C-5 Galaxy, C-141 Starlifter, and C-130 Hercules missions to transport 7,300 passengers back to Guantánamo Bay.

February 3

AVIATION: U.S. Air force colonel/astronaut Eileen M. Collins becomes the first female shuttle commander during her mission onboard the *Discovery*.

February 3–10

AVIATION: In Kathmandu, Nepal, eight C-141 Starlifters begin transporting 300 Nepalese troops to Haiti as part of UN peacekeeping efforts there.

February 27–March 3

NAVAL: Off Somalia, Operation United Shield unfolds as Marines from the *Essex* amphibious ready group and the Italian helicopter carrier *Garibaldi* cover UN forces as they withdraw. The overall commander is Lieutenant General Anthony C. Zinni and the evacuation goes off without major problems.

MARINES: In Somalia, Operation United Shield commences as the 13th Marine Amphibious Unit (SOC), assisted by Italian marines, participates withdrawing the last UN peacekeepers from that embattled nation.

March 2

AVIATION: At Cape Canaveral, Florida, Lieutenant Commander Wendy Lawrence becomes the first female naval aviator in space when she blasts off as part of the space shuttle *Endeavor* crew.

March 3

NAVAL: Off Mogadishu, Somalia, a multinational force, including the amphibious assault ship *Essex*, removes the last United Nations troops from that war-ravaged land.

MARINES: The final contingent of Marines is withdrawn from Mogadishu, Somalia, after failing in a two-year quest to restore order and stability to that fractious nation.

March 5

AVIATION: At Malmstrom Air Force Base, Montana, the first Russian arms inspectors arrive to monitor the disposal of Minuteman II intercontinental ballistic missiles (ICBMs). The visit is in accordance with the recent Strategic Arms Reduction Treaty (START II).

March 10

AVIATION: The 11th Space Warning Squadron becomes the first unit able to detect the launch of theater ballistic missiles and warn battlefield commanders of their approach.

March 16

AVIATION: At Keflavík, Iceland, an HH-60 Pave Hawk helicopter of the 56th Rescue Squadron saves three skiers caught in a sudden blizzard.

March 24

AVIATION: At Vandenberg Air Force Base, California, the last remaining Atlas E booster rocket hoists a satellite into polar orbit.

March 31

AVIATION: At Barksdale Air Force Base, Louisiana, Lieutenant Kelly Flinn commences training to be the first female bomber pilot in the U.S. Air Force.

April 8

AVIATION: Over Sarajevo, Bosnia, a C-130 transport flying for Operation Provide Promise is hit 12 times by small arms fire from the ground.

April 19

TERRORISM: In Oklahoma City, Oklahoma, a bomb explodes outside the Alfred P. Murrah Federal Building, killing and injuring hundreds; two marine recruiters are killed and four wounded by the blast. Air force search-and-rescue teams and medical personnel are flown in from across the country to assist survivors.

April 27

AVIATION: The Global Positioning System (GPS) is declared operational by the Air Force Space Command (AFSPACCOM). This device provides accurate geographical coordinates for both navigation and guided-bomb delivery.

May 8–11

AVIATION: A deluge of rain in Louisiana results in Air National Guard units rescuing thousands of flood victims over a two-day period.

May 10–17

AVIATION: In the wake of an outbreak of the deadly Ebola virus in Central Africa, transports of the 60th and 349th Airlift Wings deliver several tons of medical supplies to Kinshasa, Zaire, for distribution.

May 25–26

AVIATION: The NATO high command commits itself to aircraft strikes against Serbian artillery emplacements presently shelling Sarajevo, Bosnia, and F-16s drop precision-guided munitions on gun emplacements. Marine aircraft also participate in air strikes against Serbian ammunition dumps near the town of Pale.

June 1

DIPLOMACY: The United States and Portugal conclude a treaty that allows American military aircraft to use Lajes Field in the Azores, for the next five years. This serves as a major staging areas for forces deploying in the Middle East.

June 2–3

AVIATION: A pair of B-1B Lancers flown by Lieutenant Colonel Doug Raaberg and Captain Gerald Goodfellow fly around the world in 36 hours, 13 minutes, and 36 seconds. En route, the bombers refuel six times, and they drop bombs on three ranges on three continents in two hemispheres. This display of global air power wins both air crews the Mackay Trophy.

Captain Scott F. O'Grady speaks at a press conference. (U.S. Air Force)

June 2–7

AVIATION: An F-16C flown by Captain Scott O'Grady is shot down by Serbian anti-aircraft fire over Banja Luka, Bosnia. He spends the next six days evading capture.

June 8

MARINES: Two marine CH-53E Super Stallions launched from the amphibious assault ship *Kearsarge* fly into Bosnian airspace and rescue Captain Scott O'Grady, U.S. Air Force. The helicopters are carrying teams from the 24th Marine Expeditionary Unit (SOC).

June 20

MILITARY: In Washington, D.C., General Dennis J. Reimer gains appointment as the 33rd army chief of staff.

June 27–July 7

AVIATION: In Earth orbit, Captain Robert Gibson directs the space shuttle *Atlantis* as it docks with the Russian *Mir* space station for the first time.

- The first prototype of the Lockheed Martin F-22 Raptor, an advanced tactical fighter, is under construction.

June 30

MILITARY: Gene C. McKinney becomes the 10th sergeant major of the army; he is also the first African American so appointed.

MARINES: Sergeant Major Lewis G. Lee becomes the 13th sergeant major of the Marine Corps.

June 30–August 10

AVIATION: Operation Quick Lift unfolds as Air Mobility Command (AMC) C-5 Galaxies and C-141 Starlifters transport British and Dutch peacekeepers to Croatia.

July 1

NAVAL: The Fifth Fleet is established under the U.S. Central Command (CENT-COM) to exercise operational control of U.S. naval forces in the Persian Gulf and Indian Ocean region.

July 23

AVIATION: A C-5 Galaxy from the 433rd Airlift Wing conveys 20 tons of medical equipment, blankets, clothes, and other supplies to assist victims of economic deprivation in Belarus (Byelorussia).

July 27

MILITARY: In Washington, D.C., President William J. Clinton and Kim Young Sam attend ceremonies dedicating the new Korean War Memorial at the National Mall.

July 30

MARINES: In Washington, D.C., General Charles C. Krulak becomes the 31st commandant of the Marine Corps.

July 31

AVIATION: At Whiteman Air Force Base, Missouri, the final Minuteman II missile belonging to the 351st Missile Wing is deactivated.

August 4

AVIATION: A pair of EA-6B Prowlers from the carrier *Theodore Roosevelt* and two Marine Corps F/A-18 Hornets from Aviano, Italy, fire HARM missiles at Serbian mobile missile sites operating near Knin and Ubdina, Croatia.

August 13

AVIATION: A C-5 Galaxy of the 60th Air Mobility Wing delivers 75 tons of food from Germany to Croatia to feed victims of the recent civil disturbances there.

August 16

MARINES: In a nod toward greater physical fitness, female marines are now required to run the same three-mile distance as males during testing.

August 17

AVIATION: The E-8C joint surveillance target attack radar system (JSTARS) begins final flight testing to replace pre-production models that saw service during the 1991 Gulf War.

NAVAL: Threatening Iraqi troops movements along the Kuwaiti border result in deployment of the *Abraham Lincoln* and *Independence* carrier battle groups, assisted by the *New Orleans* amphibious ready group. The carrier *Theodore Roosevelt* is also put on alert in the eastern Mediterranean.

August 20–21

AVIATION: A C-5 Galaxy flies from Ramstein Air Base, Germany, to Zagreb, Croatia, to assist refugees of the civil disturbances there.

August 25–29

AVIATION: In their first major exercise as an operational unit, 11 new C-17 Globemaster IIIs of the 315th and 437th Airlift Wings haul 300 tons of troops and equipment to Kuwait.

August 30–September 21

AVIATION: In the Adriatic, Operation Deliberate Force commences as the carrier *Theodore Roosevelt* launches warplanes to bomb Serbian air defense missile sites, radar sites, and communication facilities. Air force fighter bombers begin hitting Serbian targets with precision-guided munitions at 2 A.M. The carrier *America* also contributes aircraft to the fracas, while on September 10 the guided-missile cruiser *Normandy* fires 13 Tomahawk cruise missiles. A total of 3,518 sorties are flown before the Serbs are cajoled into attending peace talks at Dayton, Ohio.

MARINES: VMFA(AW)-533 at Aviano, Italy, and VMFA-312 on the carrier *Theodore Roosevelt* attack Serbian formations in Bosnia as part of Operation Deliberate Force.

August 31

AVIATION: NATO warplanes continue hitting Serbian targets in and around Sarajevo, Bosnia, including air defense systems, ammunition dumps, and equipment storage facilities. However, a 24-hour suspension of aerial activities is imposed to support NATO peace negotiations with Serbian leaders.

September 1

AVIATION: The air force reactivates its remaining SR-71 Blackbird to resume strategic reconnaissance missions previously handled by satellites.

September 5

AVIATION: As peace negotiations between NATO and Serbian leaders break down, Operation Deliberate Force resumes in full fury against existing targets.

September 6

AVIATION: NATO warplanes, including Italian Tornados, strike at key bridges and chokepoints at the behest of theater commanders. At one point an air force F-16C from the 23rd Fighter Squadron detects a Serbian SA-6 radar site and destroys it with a combination HARM (High-Speed Anti-Radiation) Targeting Pod System and an AGM-88 missile.

September 7

AVIATION: NATO warplanes fly six strike packages against integrated targets, including six bridges and one chokepoint.

September 8

AVIATION: Operation Deliberate Force begins planning strike packages with stands of missiles against integrated air defense systems (IADS) in northwest Bosnia-Herzegovina.

September 9

AVIATION: Three strike packages are flown against Serb targets in Bosnia using HARM missiles and 2,000-pound GBU-15 precision-guided glide bombs.

September 10

AVIATION: American and NATO forces use Tomahawk Land Attack Missiles (TLAM), HARM, and related stand-off weapons to strike down Serbian anti-aircraft defenses in northwestern Bosnia. Other sorties are flown in support of UN positions near the Tuzla airport, which are being shelled.

September 11

AVIATION: Operation Deliberate Force continues as four strike packages are planned and delivered under favorable weather conditions. Reconnaissance efforts are also stepped up to provide accurate bomb damage assessments.

September 12

AVIATION: NATO warplanes strike ammunition dumps and other facilities in the Doboj region northwest of Tuzla, Bosnia, to good effect.

September 14

AVIATION: Once Serbian factions come to terms with UN negotiators, NATO commanders order a halt to all aerial offensive operations.

September 14–30

AVIATION: The Air Mobility Command (MAC) orders transports at Charleston Air Force Base, South Carolina, to deliver 30 tons of medical supplies to Hanoi, Vietnam. This is the first American visit to Vietnam since the war ended in 1975.

September 15–21

AVIATION: Air Force, Reserve, and National Guard transports are mobilized in the wake of Hurricane Marilyn to bring humanitarian aid throughout the eastern Caribbean. The C-17 Globemaster II flies for the first time in a disaster relief effort.

September 20

AVIATION: Operation Deliberate Force formally concludes, having forced tough and professional Serb forces out of Bosnia by air power alone.

September 22

AVIATION: An E-3B AWACS jet crashes on takeoff at Anchorage, Alaska, killing its crew of 22 Americans and two Canadians.

September 26

AVIATION: Lieutenant Sarah Deal qualifies to fly the CH-53E and joins HMH-466 as the Marine Corps's first female helicopter pilot.

September 30

AVIATION: Former Strategic Air Command (SAC) bases at Castle Air Force Base, California, and Plattsburgh Air Force Base, New York, are closed down. The 93rd Bombardment Group, the first air force unit to operate B-52 Stratofortresses, is also deactivated after 47 years of service.

October

AVIATION: At Marietta, Georgia, the first C-130J Hercules, an advanced technology version of the noted transport, rolls off the assembly line. It is recognizable by its six-bladed propellers.

October 1

AVIATION: Chief Master Sergeant Carol Smits becomes the first woman to serve as senior enlisted advisor in the Air Force Reserve.

MARINES: At Quantico, Virginia, the Marine Corps Warfighting Laboratory is created to develop and assess new tactics, concepts, and doctrines for possible adoption by the fleet Marine Force (FMF).

October 16–17

AVIATION: In the Gulf of Mexico, aircraft of the 53rd Weather Reconnaissance Squadron search for survivors of a Mexican pipe-laying barge that sank during Hurricane Roxanne. A single survivor floating on a raft is spotted and his location is relayed to the Coast Guard, who ultimately rescue 23 survivors.

October 28–December 18

AVIATION: In Bahrain, F-16Cs of the 20th and 357th Fighter Wings arrive as part of Operation Vigilant Sentinel. This is the first test of the air expeditionary force concept.

November 1

DIPLOMACY: At Wright-Patterson Air Force Base, Dayton, Ohio, representatives from Croatia, Bosnia, and Serbia, meet to hammer out a formal peace agreement between the former states of Yugoslavia.

November 13

TERRORISM: In Riyadh, Saudi Arabia, a bomb explodes outside a Saudi National Guard facility, killing a soldier and four civilians attached to the U.S. Army Materiel Command.

November 29

AVIATION: The navy's super-capable McDonnell-Douglas F/A-18E Super Hornet flies for the first time in St. Louis, Missouri.

December

AVIATION: In Washington, D.C., Dr. Gene McCall, Air Force Scientific Advisory Board (SAB), unveils the New World Vista, a forecast of air and space technology. Such a study was ordered by Secretary of the Air Force Dr. Sheila Widnall and U.S. Air Force chief of staff Ronald R. Fogleman.

December 6

AVIATION: In Bosnia, Air Mobility Command (AMC) transports commence Operation Joint Endeavor by delivering American peacekeeping troops and equipment in anticipation of a comprehensive peace treaty reached at Wright-Patterson Air Force Base.

December 14

MILITARY: In accordance with the Dayton Peace Accords, the 1st Armored Division deploys in Bosnia-Herzegovina as part of an international peacekeeping force under the aegis of Task Force Eagle. A total of 60,000 NATO troops, of which 20,000 are American, replace UN peacekeepers.

December 21

MILITARY: At Fort Bliss, Texas, the 2nd Battalion, 7th Air Defense Artillery receives the new patriot PAC-3 missiles, with enhanced capabilities against ballistic missiles such as the Soviet-built Scud.

December 29

MILITARY: The Defense Base Realignment and Closure Commission is terminated, having shut down 243 installations in a major belt-tightening measure.

December 31

MILITARY: In Bosnia-Herzegovina, engineers from the 1st Armored Division complete the world's longest pontoon bridge—620 meters—across the rain-swollen Sava River, prior to occupying its assigned peacekeeping region during Operation Joint Endeavor.

1996

January

MILITARY: Army personnel declines to 491,103 officers and men while the number of active divisions dwindles to only 12.

January 9

AVIATION: Over Bosnia-Herzegovina, Operation Provide Promise, the longest sustain humanitarian airlift in history, begins coming to an end. Air force transports have flown 4,597 sorties and delivered 62,000 metric tons of cargo to numerous refugees throughout the region.

January 17

MARINES: In Washington, D.C., the Commandant and Headquarters Marine Corps leave the navy's Pentagon Annex, where they have been stationed for five decades, and take up office space in the Pentagon itself.

January 22

NAVAL: A conundrum develops over the Department of Defense appropriations act signed on December 1, 1995, which expressly prohibits funds to restore any of the four *Iowa*-class battleships to the Naval Vessel Register as they are prohibitively expensive to maintain in mothballs. However, a defense appropriations act signed this day allows the navy to put the two best-preserved battleships back on the list. Naval authorities request clarification of the issue before proceeding further.

February 3

MILITARY: Near Gradacac, Bosnia-Herzegovina, a mine takes the life of Sergeant First Class Donald A. Dugan, Troop A, 1st Squadron, 1st Cavalry (1st Armored Division).

February 14

AVIATION: The E-8S JSTARS aircraft flies its 50th mission in support of Operation Joint Endeavor over former Yugoslavia. This is a highly advanced, joint surveillance and target attack radar aircraft.

February 24

AVIATION: Cuban MiG fighters shoot down two unharmed Cessna aircraft belonging to Miami-based Cuban exiles; President Bill Clinton subsequently suspends all air charter travel to that island.

NAVAL: Off the Cuban coast, the guided-missile cruiser *Mississippi* and the amphibious assault ship *Nassau* assist Coast Guard vessels in searching for survivors of two Cessna aircraft shot down by the Cuban air force.

March 5–24

NAVAL: Once the People's Republic of China closes part of the Taiwan Strait to conduct live-fire naval exercises on the eve of the Taiwan national election, the

Navy rushes the *Nimitz* and *Independence* carrier battle groups into the area as a sign of solidarity with the Nationalist regime.

March 19–20

AVIATION: The space shuttle *Endeavor*, commanded by U.S. Air Force colonel John R. Casper, complete a 10-day mission in orbit that includes several satellite rendezvous. It returns after 240 hours and 39 minutes in space and 160 Earth orbits.

March 23

NAVAL: In the China Sea, the *Nimitz* and *Independence* carrier battle groups hasten to the vicinity of Taiwan after the People's Republic of China conducts live-fire exercises nearby.

March 29

AVIATION: In Washington, D.C., Vice President Albert Gore declares that the United States will open up its GPS satellite navigation system to commercial interests.

- At Edwards Air Force Base, California, the *Tier II Minus Dark Star* unmanned aerial vehicle (UAV) performs its maiden flight. This is intended as a stealthy, jet-propelled reconnaissance system but only five are built before the program is cancelled.

April

MARINES: The Marine Corps creates its Chemical Biological Incident Response Force to deal with terrorists who may be handling biological or chemical weapons.

April 3

AVIATION: An air force CT-43 transport jet from the 76th Airlift Squadron crashes into a mountain outside Dubrovnik, Croatia, killing Secretary of Commerce Ron Brown and 34 other passengers.

April 9–25

AVIATION: In Monrovia, Liberia, Operation Assured Response commences as air force AC-130s, MC-130s, C-130s, and MH-53J Pave Low helicopters fly 94 missions while evacuating 2,000 U.S. citizens and foreign nationals.

NAVAL: SEALs and other Special Forces are flown into Monrovia, Liberia, to facilitate implementation of Operation Assured Response, a major evacuation effort.

April 15

AVIATION: For the first time, navy and air force navigator trainees will study in a single class at Randolph Air Force Base, Texas.

April 17

DIPLOMACY: On Haiti, Operation Uphold Democracy concludes after an 18-month duration; only one soldier has died as a result of hostile fire.

April 18

AVIATION: A pair of C-17 Globemaster IIIs convey a pair of MH-53J Pave Low helicopters from Sierra Leone, Africa, to England and at a considerable savings in time and expense had they flown there under their own power.

April 20

NAVAL: Off Monrovia, Liberia, Operation Assured Response continues as the amphibious assault ship *Guam*, the amphibious transport dock *Trenton*, the dock landing ship *Portland*, and the guided-missile destroyer *Conolly* begin evacuating 1,250 Americans and foreign nationals from that war-ravaged nation.

MARINES: Units of the 22nd Marine Expeditionary Unit (SOC) are helicoptered into Monrovia, Liberia, for the purpose of evacuating Americans and foreign nationals during a period of civil strife.

April 30

AVIATION: The top secret Tacit Blue aircraft, from which the B-2 Spirit was developed, is publicly revealed for the first time.

May 1

AVIATION: At Holloman Air Force Base, New Mexico, a German officer takes charge of the German tactical training center for the first time. This is the first time that a foreign officer commands a unit on a base within the United States.

May 9

POLITICS: Several geography experts, examining Admiral Richard E. Byrd's diary for the first time, determine that he falsified his claim to be the first person to fly over the North Pole on May 9, 1926.

May 10

AVIATION: Over Camp Lejeune, California, a CH-46E helicopter collides with an AH-1W gunship, resulting in the deaths of 12 marines, one sailor, and a soldier.

May 13

NAVAL: In Washington, D.C., President William J. Clinton nominates Vice Admiral Paul Reason as the navy's first four-star admiral of African-American descent.

May 15

MILITARY: President Bill Clinton declares that U.S. troops will remain on peace-keeping duties in Bosnia for an additional 18 months.

May 16

NAVAL: In Washington, D.C., Chief of Naval Operations admiral Jeremy M. Boorda commits suicide after being accused of wearing Vietnam War combat decorations for which he was not entitled.

May 21–June 22

AVIATION: Marine Aerial Refueler Transport Squadron 252 evacuates 208 American citizens and 240 foreign nationals from Bangui, Central African Republic, during a period of political upheaval.

MARINES: In Bangui, Central African Republic, Operation Quick Response unfolds as marine helicopters from the amphibious assault ship *Guam* fly in the 22nd Marine Expeditionary Unit (SOC) to evacuate personnel from the U.S. embassy there. By the time the maneuver concludes, 208 Americans and 240 foreign nationals have been removed to safety.

May 31

AVIATION: The air force signs a \$16.2 billion contract to secure an additional 80 C-17 Globemaster III transport jets to gradually phase out its aging C-141 Star-

lifters. This is also the most costly military order ever placed, bringing the total number of C-17s acquired to 120.

June 3

LAW: The U.S. Supreme Court rule 9–0 to uphold military death sentences.

June 4

AVIATION: In the Pacific, an A-6 Intruder from the carrier *Independence*, engaged in target towing activities, is accidentally shot down by the Japanese destroyer *Yuugiri*; both crewmen eject and are rescued.

June 6

AVIATION: Lieutenant Colonel Kai Lee Norwood becomes the first woman commander of a unit that maintains air force missiles when she assumes control of the 91st Logistic Group.

June 11

AVIATION: The first production Boeing E-8 JSTARS aircraft is delivered to the air force. Several pre-production models were active in Operations Desert Storm and Joint Endeavor.

June 13

MARINES: The Marine Corps contracts with the General Dynamics Corporation to develop a new Advanced Amphibious Assault Vehicle (AAAV) capable of 25 knots at sea or 50 miles per hour on hard road surfaces while carrying 18 marines. A total of 1,022 such vehicles will be procured through 2012.

June 21

AVIATION: Navy commander David J. Cheslak becomes the first naval officer to head up an air force squadron when he assumes control of the 562nd Flying Training Squadron at Randolph Air Force Base, Texas. This particular unit is responsible for training navigators for both services.

NAVAL: Congress, aghast that the highly capable *Seawolf* submarines cost \$2.1 billion apiece, scales back procurement plans from 28 to only three. Its designated adversary, the Soviet navy, no longer exists.

June 25

TERRORISM: The Khobar Towers, an American apartment complex in Dhahran, Saudi Arabia, is struck by a terrorist truck bomb that kills 19 air force personnel and wounds 300. Most of casualties were present in support of Operation Southern Watch.

July 1

AVIATION: On the carrier *Constellation*, an air force crew flies an EA-6B Prowler off a deck for the first time. This aircraft is intended to replace the EF-111 as that service's radar jamming aircraft.

July 10

NAVAL: Rear Admiral Patricia Tracey gains promotion to vice admiral, becoming the first three-star female officer of any military service.

July 11

NAVAL: At Naval Air Station Fallon, Nevada, the Naval Strike Warfare Center, Navy Fighter Weapons School, and Carrier Airborne Early Warning Weapons School are all consolidated into the new Naval Strike and Air Warfare Center.

July 17

NAVAL: Off the coast of New York, the Navy salvage ships *Grasp* and *Grapple*, assisted by the landing dock ship *Oak Hill*, comb the waters for wreckage from TWA Flight 800, which crashed shortly after takeoff.

July 23

MARINES: Major General Carol A. Mutter is the first female marine to gain promotion to lieutenant general, or three-star rank.

July 25

MARINES: Congress votes to increase flag officers in the armed services, so the Marine Corps acquires another 12 generals for a total of 80. This is one more than it possessed during World War II.

July 27

AVIATION: At Fort Worth, Texas, the air force retires the last of its General Dynamics F-111s from active duty at the same plant where the first model was accepted 30 years earlier. The last unit operating F-111s, the 524th Fighter Squadron at Cannon Air Force Base, New Mexico, drops them in favor of new F-16 Falcons. However, it remains a mainstay of the Royal Australian Air Force (RAAF) for several more years.

July 29

AVIATION: The 11th Reconnaissance Squadron is activated by the Air Combat Command (ACC), becoming the first unit to operate unmanned aerial vehicles (UAVs), in this instance, RQ-1B Predators.

July 30

MARINES: In an attempt to weed out weak recruits, Commandant Krulak increases Marine Corps basic training by introducing the Crucible. This is a 54-hour event near the end of boot camp that severely tests the mental and physical endurance of future marines.

August 5

NAVAL: In Washington, D.C., Admiral Jay L. Johnson, a former fighter pilot, gains appointment as the 26th chief of naval operations.

August 8

NAVAL: Lieutenant Manje Malak Abd Al Mut'a Ali Noe is commissioned as the first Muslim chaplain in the U.S. Navy.

August 22

MILITARY: The army begins destroying its stockpile of chemical weapons at a depot in Utah and the process is slated to take seven years.

September 3–4

AVIATION: Following the Iraqi seizure of the city of Ibril, two B-52Hs depart Guam on Operation Desert Strike, fly to the Middle East, and launch 13 cruise missiles against antiaircraft and command-and-control centers in Iraq. This action requires the assistance of 29 tanker aircraft and wins the crew of Duke 01 the Mackay Trophy. This is also the first combat mission of the B-52H.

- Reacting to an Iraqi occupation of Kurdish territory in northern Iraq, Operation Desert Storm commences as the guided-missile cruiser *Shiloh*, the guided-missile

destroyers *Laboon* and *Russell*, the destroyer *Hewitt*, and the nuclear-powered submarine *Jefferson City* fire 31 Tomahawk missiles against air defense targets.

September 3

AVIATION: In Bosnia-Herzegovina, the 11th Reconnaissance Squadron is the first air force unit to operate the new RQ-1 Predator unmanned aerial vehicle (UAV). It is there to enforce peace treaty arrangements.

September 4

AVIATION: In Washington, D.C., President William J. Clinton expands the northern no-fly zone in Iraq from the 32nd to the 33rd parallel. Great Britain agrees to the change but France protests and its aircraft will not patrol the new region.

- The 305th Air Mobility Wing dispatches a C-141 Starlifter from McGuire Air Force base to Bujumbura, Burundi, to assist in the evacuation of 30 foreign nationals during a period of civil strife.

September 14

AVIATION: During free elections in Bosnia-Herzegovina, air force security personnel are on hand to help provide security.

September 15–19

AVIATION: In northern Iraq, air force transports begin Operation Pacific Haven by conveying 2,000 Kurdish refugees for processing at Anderson Air Force Base, Guam, prior to settlement in the United States.

September 30

AVIATION: An important benchmark is reached when the Seventeenth Air Force is inactivated after four decades of service in Europe.

MARINES: The combined officer and enlisted personnel levels are 174,049.

November 13

MILITARY: At Fort Stewart, Georgia, the army loses another active combat unit when the 24th Infantry Division (Mechanized) is inactivated. The army now stands at its lowest point in terms of active divisions (10) since before the Korean War.

November 21

AVIATION: The policy projection paper “Global Reach, Global Power” is released to the public by Secretary of the Air Force Dr. Sheila Widnall. This work conceptualizes air force power over the next century.

December 17

MILITARY: In Europe, NATO ministers approve an American plan for troops of 24 nations to continue peacekeeping forces in wartorn Bosnia.

December 23

MEDICAL: The army agrees to investigate the precise nature of sickness among Gulf War veterans, especially if there are bacteriological causes. It is determined that thousands of service men have been exposed to low levels of Iraqi nerve agent as stockpiles were being destroyed.

December 30

MARINES: Female marines are now allowed to attend Marine Combat Training, a post-boot camp program intending to extend infantry training to those recruits slated for noninfantry specialties.

1997

January

MILITARY: Army strength remains steady at 491,707 officers and men but the number of active divisions has declined to 10.

January 1

AVIATION: In northern Iraq, Operation Provide Comfort is superseded by Operation Northern Watch to enforce no-fly zone conditions north of the 36th north latitude line.

January 6

AVIATION: Abdullah Hamza Al-Mubarek is commissioned as the first U.S. Air Force Muslim chaplain.

January 18

AVIATION: The Northrop A/F-18F Super Hornet performs its carrier sea trials onboard the *John C. Stennis*. This new model is available in both one- and two-seat versions, is 25 percent larger than earlier Hornets, and enjoys greater range, payload, and combat survivability. Roughly 800–1,000 will be purchased over the next decade.

January 24

MILITARY: In Washington, D.C., William S. Cohen is appointed the 20th secretary of defense.

January 31

AVIATION: The 31st Air Expeditionary Wing is instituted as the first air force AEW unit and can be deployed or rotated worldwide with little delay.

February 17

AVIATION: Due to the increasing importance of the Air Force Reserve to American national security, it receives the status of a major command.

February 18–March 3

AVIATION: In Liberia, Operation Assured Lift commences as five C-130s of the 37th Airlift Squadron transport 1,160 peacekeepers and 450 tons of cargo from several neighboring African nations.

March 1–14

MARINES: At Twenty-Nine Palms, California, exercise Hunter Warrior unfolds at the newly opened Warfighting Lab, which is dedicated to testing futuristic tactics and weapons.

March 13–18

NAVAL: In the Adriatic Sea, Operation Silver Wake commences as the *Nassau* amphibious ready group begins evacuating American citizens and foreign nationals from the capital of Tirana, Albania. Ultimately, 877 people are moved to the amphibious transport dock *Nashville*.

MARINES: In Albania, the 26th Marine Expeditionary Unit is on hand to evacuate U.S. citizens and foreign nationals after the Communist regime there collapses.

March 14

AVIATION: In Tirana, Albania, a Marine Corps AH-1 Sea Cobra eliminates an Albanian who had been shooting at American helicopters with shoulder-fired surface-to-air missiles.

March 17

AVIATION: In Zaire, units of the Special Operations Command (SOC) and Air Mobility Command (MAC) commence Operation Guardian Retrieval to evacuate 532 individuals threatened by political infighting. The mission required 57 sorties and employed a wide variety of aircraft and helicopters.

March 18

AVIATION: In California, an F/A-18 Hornet fires the Standoff Land Attack Missile-Expanded Response for the first time.

March 21

AVIATION: At the Boeing facility in Mesa, Arizona, the army receives its first prototype of the new AH-64D Apache Longbow attack helicopter with enhanced sensors, bigger engines, and better avionics.

- At Naval Air Station Pensacola, Florida, Lieutenant Colonel Marcelyn A. Atwood becomes the first air force officer to command a navy squadron.

April 1

AVIATION: At Whiteman Air Force Base, Missouri, the 509th Bomb Wing becomes the first operational B-2 Spirit unit with six bombers.

- All C-130 transports deployed in the continental United States with the Air Combat Command (ACC) are hereafter assigned to the Air Mobility Command (AMC).

April 2

MILITARY: In Washington, D.C., Major General Claudia J. Kennedy advances to lieutenant general; she is the first female three-star general in army history and she serves as deputy chief of staff for intelligence.

April 9

AVIATION: At Marietta, Georgia, the first production Lockheed-Martin-Boeing F-22 Raptor is rolled out of the factory in front of an audience of 3,000 attendees. This aircraft reflects the change in air force thinking from air superiority to air dominance.

May 19

NAVAL: In Washington, D.C., Secretary of Defense William S. Cohen unveils the Quadrennial Defense Review. This program allows the navy to retain 12 carrier battle groups and 12 amphibious ready groups, but it reduces the surface fleet from 128 to 116 vessels and also cuts back the number of attack submarines from 73 to 50. While acquisition of the navy's planned Joint Strike Fighter (JCF) is kept alive, the number of F/A-18E/F purchases is cut back by a third to between 548 to 785 aircraft. Finally, active duty naval personnel will be reduced by 18,000 while the Naval Reserve will decline by 4,100.

May 29

MARINES: As fighting in Zaire verges on the brink of civil war, the 22nd Marine Expeditionary Unit is flown in to help evacuate American citizens and foreign nationals.

May 30–June 4

NAVAL: Off the coast of Sierra Leone, Operation Noble Obelisk unfolds as the *Kearsarge* amphibious ready group, 22nd Marine Amphibious Unit (SOC) begins evacuating 2,500 American citizens and foreign nationals from that war-torn nation.

June 10

AVIATION: The Air Force Special Operations Command directs that an MC-130H Combat Talon II from the 352nd Special Operations Squadron fly a European political survey crew into Brazzaville, Republic of Congo, then experiencing a period of political instability. They depart from RAF Mildenhall, Great Britain, and the flight lasts 13 hours, including three aerial refuelings, and covers 3,179 nautical miles. Braving ground fire from rebels, the aircraft lands, drops off the survey team, and takes 56 people to safety. For their efforts, the crew of Lieutenant Colonel Frank J. Kisner receives a Mackay Trophy.

June 28

AVIATION: At Fort Hood, Texas, the 1st Battalion, 227th Aviation Regiment is the first unit to deploy the new AH-64 D Apache Longbow attack helicopters.

July 21

NAVAL: In Boston Harbor, Massachusetts, the venerable frigate *Constitution*, still the world's oldest warship in commission, sets out on a one-hour voyage following a three-year, \$12 million restoration. This is the first time the vessel has put to sea in 116 years.

August 1

AVIATION: A significant aerospace merger occurs when McDonnell Douglas and Boeing become a single corporation employing over 220,000 people.

August 6

AVIATION: No sooner does Korean Air Lines Flight 802 crash after taking off from Guam than CH-53 helicopters fly to the jungle crash spot to rescue 30 remaining survivors.

September 1

AVIATION: In Washington, D.C., General Ralph Eberhart becomes temporary U.S. Air Force chief of staff to replace retiring general Ronald R. Fogleman.

- On the carrier *Nimitz*, the new Joint Stand Off Weapon (JSOW) deploys at sea for the first time.

September 7

AVIATION: At Dobbins Air Reserve Base, Georgia, the F-22 prototype makes its maiden flight with test pilot Paul Metz at the controls.

October 1

MILITARY: In Washington, D.C., General Hugh Shelton gains appointment as the 14th chairman, Joint Chiefs of Staff. He is also the third consecutive soldier to occupy that post.

- At Fort Hood, Texas, the 4th Infantry Division (Mechanized) becomes the first unit selected for conversion of all electronic equipment to a new, digital format.

MARINES: The Naval Air Station at Miramar, California, is acquired by the Marine Corps.

October 6

AVIATION: In Washington, D.C., General Michael E. Ryan gains appointment as chief of staff, U.S. Air Force.

October 12

AVIATION: Three C-130s of the 153rd Airlift Wing, Wyoming Air National Guard, are dispatched to Indonesia to help fight fires. They are equipped with the Modular Airborne Fire Fighting System, capable of dropping 3,000 gallons of water or flame retardant per sortie.

October 21

MILITARY: Robert E. Hall becomes the 11th sergeant major of the army.

December 27–January 4, 1998

AVIATION: In the wake of Typhoon Paka, Air Mobility Command (AMC) C-5s, C-141s, C-130s, and KC-135s transport 2.5 million pounds of relief supplies to Andersen Air Force Base, Guam.

1998

January 12

MILITARY: In response to Saddam Hussein's refusal to admit a UN weapons inspection team, over 27,000 American and British troops are rushed to the Persian Gulf for possible action against Iraq.

NAVAL: The Guam amphibious ready group, 24th Marines Expeditionary Unit (SOC), deploys in the Persian Gulf in response to Iraqi opposition to weapons inspections.

January 31

MARINES: In a major development, the Marine Corps starts deactivating the last of its traditional shipboard detachments.

February 3

AVIATION: In Cavalese, Italy, a Marine Corps EA-6B jet accidentally severs a ski lift cable in the Dolomite Mountains, killing all 20 passengers when it drops 370 feet. The pilot and navigator are subsequently charged with manslaughter.

February 11

AVIATION: At China Lake, California, A B-1B Lancer drops a Joint Direct Attack Munition (JDAM) for the first time. This is a conventional bomb fitted with a satellite guidance system.

February 12

NAVAL: The Department of Defense Authorization Bill of January 22, 1996, mandates that the battleships *Wisconsin* and *New Jersey* be restored to the Naval Vessel Register.

February 23

AVIATION: At Whiteman, Missouri, B-2 Spirit bombers are dispatched to Andersen Air Force Base, Guam, on their first overseas deployment.

February 26–April 3

MILITARY: All four armed services participate in Joint Task Force Kenya, Operation Noble Response, which delivers 800 tons of food and supplies to that flood-ravaged nation.

February 28

AVIATION: At Edwards Air Force Base, the Teledyne Ryan Aeronautical Company RQ-4 Global Hawk unmanned aerial vehicle (UAV) performs its maiden flight. This jet-propelled device is designed as a reconnaissance platform capable of performing from altitudes as high as 65,000 feet and photographing an area as large as Kentucky in under 24 hours.

April 3

NAVAL: The carrier *George Washington* comes to port and then discharges its 26-man marine complement; hereafter marines will no longer serve on aircraft carriers.

May 4

NAVAL: At Pearl Harbor, Hawaii, the battleship *Missouri* is transferred to the USS *Missouri* Memorial Association as part of battleship row.

May 27

AVIATION: Over Mount Torbert, Alaska, an Air National Guard HH-60 Pave Hawk helicopter from the 210th Rescue Squadron assists six surveyors trapped inside an airplane that has crashed on the glacier. Braving high winds and extreme temperatures, the helicopter safely picks up the passengers, winning a Mackay Trophy.

June

NAVAL: This month an important threshold is passed when the landing dock ships *Mount Vernon*, *Carter Hall*, and *Gunston Hall*, the tank landing ship *La Moure County*, and the guided-missile frigate *Jarrett* have female commanding officers.

June 6

MARINES: In Eritrea, Tarawa amphibious ready group, the 11th Marine Expeditionary Unit (SOC) dispatches KC-130 Hercules transports to evacuate civilians in the wake of border clashes with Ethiopia. These units remove 105 Americans and 67 foreign nationals from Asmara to safety.

June 12

AVIATION: At Cape Canaveral, Florida, the space shuttle *Discovery* makes the ninth and final rendezvous with the Russian space station *Mir*.

NAVAL: The navy contracts with the Bath Iron Works and Ingalls Shipbuilding to construct the futuristic DD 21 *Zumwalt*-class destroyer capable of fighting at sea or assisting landing forces from the littoral. These 32 vessels are intended to replace the existing *Perry*- and *Spruance*- class destroyers by 2010 and feature a 155mm Advanced Gun System that can hit targets 100 miles distant.

July 2

MILITARY: In Washington, D.C., Louis Caldera gains appointment as the 17th secretary of the army. He is an attorney and a 1978 graduate of the U.S. Military Academy.

July 18

NAVAL: In Yokosuka, Japan, the *Kitty Hawk* replaces the *Independence* as the nation's forward-deployed aircraft carrier.

August 7

TERRORISM: U.S. embassies in Nairobi, Kenya, and Dar es Salaam, Tanzania, are struck by truck bombs; 250 people are killed, including 11 Americans and one marine security guard. A further 1,100 are injured.

August 20

TERRORISM: The navy, reacting to a spate of terrorist bombings of American embassies in Kenya and Tanzania, launches 75 cruise missiles at suspected chemical weapons facilities at Khartoum, Sudan, and terrorist training camps in Afghanistan. Saudi terror leader Osama bin Laden is believed to be behind the actions.

September 4

NAVAL: The *South Carolina*, the navy's last operable nuclear-powered surface ship, is deactivated.

September 9

NAVAL: Off Nova Scotia, Canada, the salvage ship *Grapple* is called upon to help recover wreckage from crashed Swissair Flight 111.

September 22

AVIATION: In the wake of destructive Hurricane George, air force transports deliver food and medical supplies to victims on Puerto Rico and in the Dominican Republic and coastal Mississippi.

October 29

AVIATION: At Cape Kennedy, Florida, the space shuttle *Discovery* blasts off with former astronaut and now Ohio senator John H. Glenn. Glenn, at 76, is the oldest human to be placed in orbit, and he participates in experiments concerning the effects of zero gravity on the elderly.

November 6

AVIATION: Powerful Hurricane Mitch cuts a swath of destruction through Central America, leaving 10,000 dead. Air force transports begin a major airlift of 3,500 tons of relief supplies in 200 missions lasting until March 1999.

November 11

MILITARY: In Kuwait, Operation Desert Thunder unfolds as the 1st Brigade, 3rd Infantry Division deploys along the Iraq border to counter any threatening moves by Saddam Hussein.

November 14

AVIATION: In response to Iraqi refusal to allow further UN arms inspection teams into his country, the United States and Great Britain prepare to launch a wave of air strikes in retaliation. Only 20 minutes before the attacks begin, Saddam Hussein changes his mind and allows the teams in.

November 16

NAVAL: In Washington, D.C., Richard Danzig gains appointment as the 71st secretary of the navy.

December 4–15

AVIATION: At Cape Canaveral, Florida, the space shuttle *Endeavor* lifts several components for the future International Space Station into orbit. Over the next 11 days, the crew work to join the *Unity* module with its Russian counterpart, *Zarya*.

December 9

AVIATION: In Washington, D.C., Benjamin O. Davis attends ceremonies during which he receives his honorary fourth star while on the retired list.

December 16–20

AVIATION: Over Iraq, Operation Desert Fox commences in retaliation for Iraqi obstruction and deceit in connection with the UN arms inspection mission. Aircraft from the carrier *Enterprise*, assisted by 325 Tomahawk cruise missiles, strike at Iraqi nuclear, biological, and chemical weapons facilities. This is also the first time that female aviators fly combat missions. The Air Combat Command (ACC) contributes several B-1B Lancers to the operation, this being their combat debut in the Persian Gulf.

MARINES: The 31st Marine Expeditionary Force (SOC) and jets of VMFA-312 participate in Operation Desert Fox to coax Iraqi cooperation with UN nuclear inspectors. Considerable damage is inflicted, but Saddam Hussein still refuses to allow UN inspectors back into the country.

December 19

MARINES: In Damascus, Syria, marine guards use tear gas to disperse crowds protesting Operation Desert Fox against Iraq.

1999

January 4

NAVAL: The battleship *Iowa* replaces the *New Jersey* on the Naval Vessel Register as the latter vessel's guns were damaged by its demilitarization in 1995.

January 22

MILITARY: The Defense Department announces that it has discharged twice as many homosexuals from the military in 1998 than in 1993, before "don't ask, don't tell" was adopted.

January 24

AVIATION: Over Iraq, a navy EA-6B Prowler fires an AGM-154A standoff weapon (JSOW) at a hostile radar site near Mosul for the first time. After eight years of compliance, the regime of Saddam Hussein is beginning to challenge United Nations enforcement of Operation Northern Watch, a no-fly zone.

January 25

AVIATION: Operation Southern Watch commences over Iraq as U.S. and British warplanes continue pounding Iraqi antiaircraft missile sites near Basra. Navy F/A-18 Hornets of VFA-22 and VFA-94 launches the first AGM-154A Joint Standoff Weapons used in combat.

February 4

NAVAL: Off the Virginia coast, the destroyer *Arthur W. Radford* collides with a Saudi Arabian cargo vessel at night, suffering \$24 million in damage. Ten months elapse before it is back in commission.

February 7

AVIATION: At Cape Canaveral, Florida, the space probe *Stardust*, intended to rendezvous with a comet and return samples to Earth, is launched by a Delta II rocket.

February 17

AVIATION: At Keesler Air Force Base, Mississippi, the 403rd Wing accepts delivery of its first Lockheed C-130J, a high-tech version sporting six-bladed propellers.

NAVAL: The navy ends its presence in Antarctica with the departure of the Antarctic Development Squadron 6 (VXE-6), which had logged more than 200,000 hours since 1955.

February 24

AVIATION: At Naval Air Station Point Mugu, California, three navy LC-130R Hercules transports of Antarctic Development Squadron 6 (VXE-6) return to base after assisting the National Science Foundation's Operation Deep Freeze in Antarctica.

February 25

MILITARY: In Austria, the victims of a recent avalanche are attended to by army helicopters and personnel.

March 24–June 10

AVIATION: United States and NATO warplanes begin Operation Allied Force, a concerted air offensive against Serbian forces committing "ethnic cleansing" in Kosovo, formerly a part of Yugoslavia. The aviation segment, Operation Noble Anvil, is the largest aerial offensive in Europe since World War II and aims to stop the Serbs under President Slobodan Milošević from committing further atrocities. U.S. aircraft constitute 69 percent of aerial forces involved, or 723 out of 1,023 aircraft. This attack sees the combat debut of the B-2 Spirit bomber.

- Flying from Aviano, Istrana, and Gioia del Colle, Italy, marine F/A-18 Hornets and navy EA-6B Intruders attack radar sites, communication centers, and army installations throughout Yugoslavia.

- The cruiser *Philippine Sea*, destroyers *Gonzalez*, *Nicholson*, and *Thorn*, and submarines *Miami* and *Norfolk*, launch Tomahawk cruise missiles at various targets throughout Yugoslavia during Operation Allied Force.

- On the first day, an F-16C flown by Captain Jeffrey G. J. Hwang shoots down a pair of Serbian MiG-29s with AIM-120 AMRAAM missiles in a quick action, winning the Mackay Trophy.

MILITARY: The overall commander of Operation Allied Force is General Wesley K. Clark. This is also the first wartime action in NATO history.

MARINES: Harrier jump jets attached to the 24th Marine Expeditionary Unit participate in Operation Allied Force against Serbian forces in Kosovo.

March 26

AVIATION: A roving air force F-16C shoots down two Serbian MiG-29s over Bosnia-Herzegovina.

March 27

AVIATION: Serbian anti-aircraft missiles shoot down a Lockheed F-117 stealth fighter, but the pilot is rescued after being spotted by A-10 pilot Captain John A. Cherrey; Cherrey receives a Silver Star for his assistance.

Operation Sustain Hope in Tirana, Albania (Department of Defense)

March 31

MILITARY: Three American soldiers are taken prisoner by Serbian forces along the Macedonian-Serbian frontier; they are beaten and held in custody until May 2.

April 3

AVIATION: The carrier *Theodore Roosevelt* arrives in the Adriatic and its air wings go on to fly 4,270 sorties as part of Operation Allied Force against Serbia.

April 4

AVIATION: In Tirana, Albania, Operation Sustain Hope commences as Air Mobility Command (AMC) C-17 Globemaster III transports begin lifting the first of 3,000 tons of relief supplies from Dover Air Force Base, Delaware, to refugees in Kosovo.

April 11

AVIATION: Off Kukes, Albania, Operation Shining Hope unfolds as MH-53 Sea Dragon and H-46 Seaknight helicopters from the amphibious assault ship *Inchon* deliver food, medicine, and other humanitarian aide to the swelling ranks of refugees there.

April 17

AVIATION: Over Serbia, the unmanned RQ-1 Predator drone performs its first combat operation.

April 19

NAVAL: On Vieques Island, Puerto Rico, a bomb released by an F/A-18 Hornet during a live-fire exercise goes astray and kills a civilian security guard. Ensuing protests from the local population lead to a temporary halt in training there.

April 21

AVIATION: The Socialist Party headquarters building in Yugoslavia is struck by two NATO missiles and destroyed.

MILITARY: Task Force Hawk, consisting of 5,100 heavily armed soldiers using Special Forces equipment, deploys to Tirana, Albania, as part of Operation Allied Force. Despite an exceedingly dangerous military environment, they never fire a shot in anger.

April 23

AVIATION: The headquarters of Serbian state television is struck by NATO bombs.

DIPLOMACY: An offer by Slobodan Milošević to create an “international presence” in Kosovo is rejected by NATO leaders.

April 30

MARINES: In Albania, elements of the 26th Marine Expeditionary Unit (SOC) go ashore to provide security and assistance to refugees fleeing from the fighting in nearby Kosovo.

May 1

AVIATION: The Air Force Reserve Command mobilizes its first tanker wing for active duty; this is the first of five such wings to face activation over the next five months.

- In Kosovo, a Serbian bus carrying 47 passengers plunges off a bridge recently bombed by NATO aircraft; there are no survivors.

May 2

AVIATION: An air force F-16 is shot down by Serbian ground forces, although the pilot is rescued by an MH-60 helicopter. This is the second and final aircraft lost during Operational Allied Force.

May 3

NAVAL: At the North Pole, the nuclear-powered submarine *Hawkbill* surfaces through the ice in this, the final joint Navy–National Science Foundation Science Ice Expedition.

May 4

AVIATION: A F-16C pilot shoots down a MiG-29 over Kosovo; this is the final air force victory of Operation Allied Force.

May 5

MILITARY: In Albania, an AH-64 Apache helicopter attached to Task Force Hawk crashes on a training flight; the crew of two is killed.

May 6

DIPLOMACY: Ministers from the Group of Eight (G8) agree to a peace plan that calls for the return of all refugees to Kosovo plus the deployment of an international peacekeeping force.

May 8

AVIATION: In Belgrade, Serbia, NATO missiles accidentally strike the Chinese embassy, killing three. Massive demonstrations break out in China as a result.

May 14

AVIATION: The first operational Bell/Textron V-22 Osprey is delivered to Marine Corps units. It is intended to serve as a combat troop carrier to replace the aging CH-46 Skyknight and CH-53 Sea Stallion helicopters. A total of 360 Ospreys will be purchased by the Marine Corps to that end.

May 17–November 17

AVIATION: Continuous Iraqi violations result in no less than four air strikes against anti-aircraft positions and radar sites in the no-fly zone. The aircraft involved are navy F/A-18 Hornets and air force A-10 Thunderbolt IIs.

May 20

AVIATION: In Hungary, VMFA(AW)-332 and 533 commence flying operations in support of Operation Allied Force in Kosovo.

May 23

AVIATION: In Washington, D.C., President Bill Clinton cannot rule out a larger military intervention once Serb forces and Albanian police begin skirmishing along the borders.

May 26

MILITARY: NATO leaders agree that a future peacekeeping force in Kosovo must be no less than 45,000 troops in size.

May 30

DIPLOMACY: NATO leadership demands a clear and irrevocable statement from Slobodan Milošević that he accepts NATO peace terms before the air campaign is halted.

June 4–5

MILITARY: At Fort Carson, Colorado, the 7th Infantry Division becomes the first of two “integrated” divisions when several National Guard units are formally attached to it. It is followed by the 24th Infantry Division at Fort Riley, Kansas.

June 9

DIPLOMACY: NATO leaders and Serb military authorities conclude an agreement for the withdrawal of all Serb forces from Kosovo.

June 10–July 6

AVIATION: All NATO air raids are suspended in the wake of Serbian withdrawals from Kosovo. This is also the first war won by air power alone.

MARINES: Serbian forces begin withdrawing from Kosovo, bringing Operation Allied Force to a close. The 26th Marine Expeditionary Brigade is then sent ashore to enforce provisions of the peace agreement and assist refugees.

June 11

MILITARY: In Kosovo, Operation Joint Guardian unfolds as units of Task Force Falcon, comprising the 2nd Battalion, 505th Expeditionary Unit, and the 82nd Airborne Division occupy select positions in that war-torn region. They are joined shortly after by elements of the 1st Infantry Division (Mechanized).

June 16

AVIATION: In the southern no-fly zone of Iraq, Iraqi anti-aircraft fire prompts a sharp riposte by navy F/A-18 Hornets and British GR-1 Tornados against two radar sites and a missile battery.

June 21

MILITARY: In Washington, D.C., General Eric K. Shinseki gains appointment as the army's 34th chief of staff; he is also the first Japanese-American to hold that position.

June 28

MARINES: Sergeant Major Alfred L. McMichael becomes the 14th sergeant major of the Marine Corps.

July 1

MARINES: In Washington, D.C., General James Jones gains appointment as the 32nd commandant of the Marine Corps.

July 2

MARINES: Pursuant to post-cold war reductions, Marine Corps bases at El Toro and Tustin, California, are deactivated.

July 23

AVIATION: In Putumayo Province, Colombia, an RC-7 reconnaissance aircraft crashes into a mountainside, killing five soldiers of the 204th Military Intelligence Battalion.

July 23–27

WOMEN: U.S. Air Force colonel Eileen M. Collins becomes the first woman to command a space shuttle flight when she lifts off with the *Columbia* to orbit the Chandra X-Ray Observatory.

August 10

AVIATION: In Iraq, antiaircraft fire directed at coalition aircraft enforcing the southern no-fly zone provokes a retaliatory counterattack as F-14D Tomcats, F/A-18 Hornets, and F-16C Falcons knock out offending missile and radar sites.

August 13

MILITARY: As Panama prepares to assume control of the Panama Canal Zone at the end of 1999, the headquarters of U.S. army South transfers to Fort Buchanan, Puerto Rico. This concludes nearly a century of army occupation duties in this strategic region.

August 23–September 12

NAVAL: In response to a recent 7.4-magnitude earthquake in Turkey, which killed an estimated 24,000 people, the *Kearsarge* amphibious ready group begins ferrying the necessary aid to the stricken area by helicopter.

September 2

NAVAL: The keel of the *Virginia*, the navy's newest class of nuclear attack submarines, is laid. This vessel is nuclear-powered, capable of launching Tomahawk cruise missiles, and is the first of 30 such vessels comprising the class. They will gradually replace older *Los Angeles*-class attack submarines over the next 18 years.

September 20

AVIATION: Transports of the Air Mobility Command (AMC) begin transporting Australian peacekeeping forces to Dili, East Timor.

MARINES: Off East Timor, helicopters of the 31st Marine Expeditionary Unit convey Australian peacekeeping forces ashore in the wake of post-election violence.

October 1

AVIATION: Aerospace Expeditionary Force 1 is sent to Southwest Asia for the first time. This new system is designed to permit more effective deployments around the world while also rendering them more predictable to increase unit morale.

October 6

AVIATION: In eastern North Dakota, the destruction of 150 Minuteman III silos commences in accordance with the Strategic Arms Reduction Treaty (START II) with Russia.

October 7–26

NAVAL: Off East Timor, the *Belleau Wood* amphibious ready group, 31st Marine Expeditionary Unit (SOC), stations itself in support of Australian peacekeepers during a period of civil unrest.

October 10

AVIATION: The U.S. Central Command (USCENTCOM) initiates Exercise Bright Star 99/100, a large coalition military exercise held in Southwest Asia.

October 12

MILITARY: In Washington, D.C., General Eric K. Shinseki unveils a major reorganization scheme intended to transform the army from a heavy force to a lighter, faster, and more flexible strategic ground force. This change will require a new class of wheeled vehicles presently under development. Brigades within the 3rd and 25th Infantry Divisions are slated to undergo this conversion first.

October 26–November 26

NAVAL: Off East Timor, the *Peleliu* amphibious ready group relieves the *Belleau Wood* as peacekeeping efforts continue on that island.

MARINES: The 11th Marine Expeditionary Unit (SOC) goes ashore on East Timor to relieve Australian peacekeeping forces.

October 28

NAVAL: Cryptologic Technician First Class Daniel King is arrested and charged with espionage for passing classified materials to the Russian embassy in Washington, D.C.

October 31

NAVAL: Off Nantucket, Massachusetts, the amphibious transport dock *Austin* and the salvage ship *Grapple* comb the waters for wreckage and survivors from the crashed Egyptian Air Flight 900.

November 2

AVIATION: In the Panama Canal Zone, the United States formally turns over Howard Air Base to Panamanian authorities. It has been an active American base for the past 82 years.

November 17

AVIATION: An F/A-18 Hornet patrolling the southern no-fly zone is locked on by an Iraqi missile radar, and retaliates by firing HARM missiles at it.

December 3

NAVAL: On Puerto Rico, the government asks the navy to suspend live-fire exercises on the island of Vieques. It rejects the navy's suggestion to end such maneuvers five years hence.

December 20–28

AVIATION: In Venezuela, Air Mobility Command (AMC) C-5, C-141, and C-130 transports convey humanitarian aid supplies to 200,000 victims of severe flooding.

December 31

DIPLOMACY: The last remaining U.S. forces pull out of the Panama Canal Zone, as per the September 1977 treaty with that nation.

2000**January**

MILITARY: A present, army troop strength stands at 480,000, backed by 208,000 reservists and 232,000 army civilians.

January 21

MILITARY: In Washington, D.C., President William J. Clinton bestows the Medal of Honor on 21 Asian-American soldiers, mostly from the 442nd Regimental Combat Team. Daniel K. Inouye, presently a U.S. senator from Hawaii, is among those honored.

January 31

NAVAL: In Puerto Rico, civilian authorities agree to a compromise allowing the navy to continue exercises on Vieques Island for the next three years, although nonexplosive ammunition must be used.

- Off Point Mugu, California, the destroyer *Fife*, the guided-missile frigate *Jarrett*, and the amphibious transport dock *Cleveland* sortie to comb the waters following the crash of Alaska Airlines Flight 261.

February

MILITARY: In Bosnia, the 49th Armored Division (Texas) becomes the first National Guard unit deployed with Task Force Eagle.

March 2

AVIATION: In consequence of severe flooding in Mozambique, Operation Atlas Response unfolds as Air Mobility Command (AMC) transports deliver humanitarian relief and supplies from bases in Europe to southern Africa.

April

MILITARY: Exercise New Horizons unfolds in Nicaragua as National Guard troops from Mississippi, Ohio, California, and Alabama deploy to assist the victims of recent hurricanes.

April 8

AVIATION: A Bell/Textron MV-22 Osprey transport plane crashes at Marana, Arizona, killing all 19 marines onboard. All Ospreys currently in service are grounded pending a thorough investigation.

May 3

AVIATION: General Joseph W. Ralston becomes the first air force officer in 37 years to serve as supreme allied commander of the North Atlantic Treaty Organization (NATO).

May 6

NAVAL: At Vieques, Puerto Rico, the destroyer *Stump* is the first vessel to conduct live-fire exercises there since April 1999.

May 8

AVIATION: At Cape Canaveral, Florida, a Titan IVB launcher places a Defense Support Program (DSP) satellite in orbit. These are designed as an early warning missile launching detection system with global coverage.

May 23

AVIATION: At Randolph Air Force Base, Texas, the first production T-6A Texan II turboprop trainer arrives. This new machine is intended to replace the Cessna T-37 and Beech T-34 as a primary pilot training aircraft.

May 25

AVIATION: The Marine Corps authorizes the MV-22 Osprey to resume flight testing, although only with aircrews on board.

June 23

MILITARY: Jack L. Tilley is promoted the 12th sergeant major of the army.

July 2

MILITARY: The U.S. Central Command (CENTCOM) at MacDill Air Force Base receives a new commander in the person of General Tommy Franks.

July 5

NAVAL: In Washington, D.C., the post of assistant chief of naval operations for missile defense is created; it is responsible for defenses against both ballistic and cruise-type missiles.

July 13

NAVAL: West of Oahu, Hawaii, the amphibious transport dock *Denver* collides with the Military Sealift Command oiler *Yukon*, resulting in \$7 million in damages to both vessels.

July 15

AVIATION: At Whiteman Air Force Base, Missouri, the final production B-2 Spirit bomber deploys. The air force has no plans to add new heavy bombers to its inventory for the next 35 years (2035).

July 21

NAVAL: In Washington, D.C., Admiral Vern E. Clark gains appointment as the 27th chief of naval operations.

August 8

NAVAL: At Charleston Harbor, South Carolina, the Confederate submarine *H. L. Hunley* is raised from the bottom for the first time since 1864 and taken ashore to be restored as a historic exhibit.

August 27

NAVAL: Off the Virginia coast, the destroyer *Nicholson* and the combat support ship *Detroit* collide at night during a replenishment exercise. This being the sixth such mishap over the past 12 months, the chief of naval operations institutes a safety stand-down of all vessels.

September 18

AVIATION: At Edwards Air Force Base, California, the first air force CV-22 Osprey arrives for testing. This hybrid design takes off and lands like a helicopter, but it flies like a regular airplane.

October 12

AVIATION: At Cape Canaveral, Florida, the space shuttle *Discovery* goes aloft carrying parts and supplies for the international space station. The crew also completes four space walks to get everything assembled.

NAVAL: At Aden, Yemen, a terrorist attack on the guided-missile destroyer *Cole* kills 17 sailors and wounds 39. The ship itself is also seriously damaged by an inflatable speedboat laden with a half-ton of high explosives, which rips out a 40-foot hole in its port side. The *Cole* returns to the United States atop of the Norwegian commercial heavy-lift ship *Blue Marlin*, and it is repaired at Pascagoula, Mississippi. The vessel resumes active duty with the fleet on April 19, 2002. Surprisingly, no terrorist network claims responsibility for the attack, but American intelligence points to fugitive Saudi Osama bin Laden.

October 15

AVIATION: Aircraft from the 75th Airlift Squadron and the 86th Aeromedical Evacuation Squadron fly 28 victims of the *Cole* bombing from Yemen to medical facilities at Norfolk, Virginia, on a 6,000-mile trip. Their efforts result in a Mackay Trophy.

October 16

MILITARY: In Washington, D.C., U.S. Army chief of staff general Eric R. Shinseki announces that all ranks will be permitted to wear black berets as an esprit de corps-raising measure. Army Rangers, who already wear black berets, switch to tan to preserve their unique identity. Meanwhile, Green Berets will go on wearing green and Airborne forces will continue with maroon.

October 24

AVIATION: At Palmdale, California, the new Lockheed XF-35A Joint Strike Fighter, ostensibly the world's most sophisticated warplane, makes its initial flight to Edwards Air Force Base.

October 27

MILITARY: To correct a historic wrong, Lieutenant William Clark of the Lewis and Clark Expedition is posthumously promoted to captain almost two centuries after he quit the military.

October 30

POLITICS: A "Sense of Congress" resolution signed by President William J. Clinton rehabilitates the military reputations of Admiral Husband E. Kimmel and Lieutenant Walter C. Short, scapegoats for the Japanese attack on Pearl Harbor.

The resolution maintains that neither commander received adequate information about the impending attack to act properly. Consequently, the personnel files of Kimmel and Short are amended and they are allowed to retire posthumously at their highest rank.

October 31

AVIATION: At the Balkonur Cosmodrome, Kazakhstan, an American astronaut accompanies two Russian cosmonauts into space as first residents of the International Space Station.

November 22

AVIATION: At Edwards Air Force Base, California, Lieutenant Colonel Paul Smith flies the XF-35A Joint Strike Fighter (JSF) at supersonic speeds to 34,000 feet. Once back at Palmdale, the craft begins its conversion into the XF-35B short takeoff and landing (STOL) version.

November 29

MILITARY: On Johnston Atoll, Pacific, the army declares that it has destroyed the last of its chemical weapons stocks, including 400,000 mines, rockets, artillery rounds, bombs, and several tons of nerve and blister agents.

December 11

AVIATION: A Bell/Textron MV-22 Osprey, a hybrid design that is half airplane and half helicopter, crashes during a test flight near Jacksonville, North Carolina; the four marines onboard are killed. This is the second crash in one year and leads to a suspension of MV-22 flights until problems can be rectified.

December 16

AVIATION: The prototype of the Lockheed Martin X-35C Joint Strike Fighter (JCF) performs its maiden flight. This is the navy version.

2001

January

MILITARY: Army recruiting efforts, buoyed by reenlistment bonuses and education programs, manages to keep current personnel levels at 487,780. At this juncture, 114,000 troops, nearly a fourth of the army, are deployed overseas.

January 11

MILITARY: The Army Recruiting Command unveils a new campaign theme entitled "An Army of One."

January 13

AVIATION: In Puerto Rico, newly elected governor Sila Maria Calderón of the Popular Democratic Party reneges on a pledge to allow bombing practice at the Vieques firing range. President Bill Clinton is unable to resolve the issue.

January 16

MILITARY: In Washington, D.C., former president Theodore Roosevelt is awarded a Medal of Honor for his role in the Battle of San Juan Heights in 1898. His great-grandson accepts the medal on his behalf.

January 20

MILITARY: In Washington, D.C., President George W. Bush is inaugurated as the 43rd president of the United States and commander in chief.

- Colin Powell, former general and chairman, Joint Chiefs of Staff, is appointed secretary of state by President George W. Bush.

January 23

AVIATION: At Palmdale, California, Lieutenant Colonel Paul Smith flies the XF-35C naval version of the Joint Strike Fighter (JCF) on an aerial refueling qualification mission.

January 26

MILITARY: In Washington, D.C., Donald W. Rumsfeld is again to serve as the 21st secretary of defense. He had previously occupied the office from 1975 to 1977.

February 3

AVIATION: On Guam, Air Mobility Command (AMC) C-17 Globemaster IIIs transport relief supplies and food to victims of a recent earthquake in India. They are refueled en route by KC-135s while traversing the Pacific and Indian Oceans.

February 9

NAVAL: The nuclear submarine *Greeneville* surfaces rapidly nine miles from Pearl Harbor, Hawaii, inadvertently striking the Japanese 190-foot fishing trawler *Ehime Maru*, killing nine passengers. The navy issues a formal apology, agrees to recover the bodies of the deceased, and pays out \$11 million in restitution. A major investigation ensues.

February 16

AVIATION: Over Iraq, 24 aircraft from the carrier *Harry S. Truman* strike at radar sites and air-defense command centers in retaliation for a series of violations in the northern and southern no-fly zones. These improved sites were judged a potential menace to enforcing the no-fly zones; hence, they were neutralized.

February 21

AVIATION: At Nellis Air Force Base, Nevada, an RQ-1 Predator pilotless drone has been modified to carry a Hellfire missile, which it fires and destroys a target tank. This is the first unmanned aerial vehicle (UAV) to do so.

February 24

AVIATION: At March Air Force Base, California, Lieutenant Colonel Stayce D. Harris becomes the first African-American woman to command an air force squadron when she takes control of the 729th Airlift Squadron.

March 4

NAVAL: The new aircraft carrier *Ronald Reagan*, the first such vessel named after a living ex-president, is commissioned by former first lady Nancy Reagan.

March 12

AVIATION: In Kuwait, during Operation Desert Spring, a live-fire exercise at night, an F/A-18 Hornet from the carrier *Harry S. Truman* accidentally drops a

500-pound bomb on allied personnel, killing five Americans and a New Zealand army officer; an additional five Americans and two Kuwaitis are injured.

March 16

AVIATION: At Edwards Air Force Base, the prototype XF-35B STOVL begins testing over a specially designed hover pit to gauge lift forces at various power settings. This is the Marine Corps version.

April 1

AVIATION: Off Hainan Island, China, an EP-3E *Aries II* reconnaissance craft collides with a J-8 Chinese jet fighter that had been recklessly buzzing it over the South China Sea. The fighter pilot dies in the ensuing crash but Lieutenant Shane Osborne manages to safely land his bucking aircraft at Lingshui military airfield on Hainan Island, where the crew is detained for 11 days. Their aircraft is also boarded and ransacked by the Chinese, then dismantled and returned on a Russian transport on July 5. For the Communists, this proves a military intelligence windfall for many automated systems are recovered intact and closely analyzed.

April 4

NAVAL: The navy announces that it has destroyed its last remaining stocks of napalm bombs in the United States.

April 12

NAVAL: Ignoring protests, the navy declares its intention to resume live-fire training exercises on Vieques, Puerto Rico, for the first time since December 2000.

April 23

AVIATION: At Edwards Air Force Base, California, the RQ-4 Global Hawk flies to Edinburgh, Scotland, on the first transoceanic flight by an unmanned aerial vehicle (UAV). The RQ-4 covers the 7,500 miles journey in 23 hours, a new world's record.

NAVAL: An admiral's mast held by Admiral Thomas Fargo, commander in chief of the Pacific Fleet, finds Commander Scott Waddle of the submarine *Greeneville* guilty of neglect for his vessel's collision with a Japanese fishing trawler. Waddle receives a reprimand, a 50 percent reduction in pay, and is ordered to retire as of October 1.

April 24

DIPLOMACY: In a slap at Red China, most likely over its detention of an EP-3E reconnaissance aircraft, President George W. Bush announces his intention to sell the Nationalist regime on Taiwan conventional submarines and P-3 Orion maritime patrol aircraft for defensive purposes.

- In Puerto Rico, Governor Sila María Calderón files a lawsuit to stop the navy from conducting live-fire exercises on Vieques Island on grounds that it violates decibel level restrictions passed by the legislature. Again, the governor asks the navy and Department of Defense to postpone the exercises.

April 25

NAVAL: In Washington, D.C., Judge Gladys Kessler of the U.S. district court denies a request for a temporary restraining order by the governor of Puerto Rico to halt navy live-fire exercises at Vieques.

April 27–May 1

NAVAL: In Puerto Rico, anti-U.S. Navy demonstrators protest at Vieques to prevent a scheduled live-fire exercise held by the carrier *Enterprise* and the *Kearsarge* amphibious ready group. Security forces arrest 183 people and the demonstration ends.

May 1

AVIATION: At the National Defense University, Washington, D.C., President George W. Bush declares that the United States should build a viable antimissile defense system to protect itself from attack by rogue states (North Korea, Iran, Iraq). To that end, he is prepared to back out of the Anti-Ballistic Missile Treaty signed with the Soviet Union in 1972.

May 7

AVIATION: An RC-135 aircraft from Kadena Air Base, Okinawa, resumes intelligence flights in international air space off the Chinese coast.

May 8

AVIATION: In Washington, D.C., the secretary of defense declares that the air force is the sole executive agent for the Pentagon's activities in space.

May 24

NAVAL: In Washington, D.C., Gordon R. England gains appointment as the 72nd secretary of the navy.

May 31

MILITARY: In Washington, D.C., Thomas E. White gains appointment as the 18th secretary of the navy.

June 5

AVIATION: Major General James E. Sherrard, III, commander of the Air Force Reserve, gains his third star to lieutenant general. He espouses a "total force" concept, which closely integrates the Reserves into the regular U.S. Air Force.

June 12

NAVAL: In Washington, D.C., a panel on military effectiveness reports that the proposed *Zumwalt*-class DD 21 land-attack destroyer does not represent a substantial improvement of existing systems. The panel was appointed by Secretary of Defense Donald Rumsfeld and casts the future of the DD 21 in jeopardy.

June 15

NAVAL: In light of ongoing protests, Secretary of the Navy Gordon R. England announces that the navy will cease all training exercises on Vieques Island, Puerto Rico, as of May 1, 2003. This effectively negates a lawsuit filed by the island government against the navy and the Department of Defense.

June 24

AVIATION: At Edwards Air Force Base, California, test pilot Simon Hargreaves takes off vertically in the XF-35B to an altitude of 20 feet and hovers for 30 seconds for the first time.

MILITARY: This being the 226th birthday of the American army, all soldiers are authorized to wear the new black beret, unless their unit is authorized to wear other colors.

July 5

AVIATION: The navy EP-3 that was forced to land at Hainan Island, China, on April 1, is disassembled and loaded onboard a Russian AN-124 transport for a flight to Dobbins Air Reserve Base, Marietta, Georgia. The aircraft has since been reassembled and returned to active service.

July 12

NAVAL: The navy, acting in concert with a congressional resolution in the 2001 defense authorization act, places a document in the personnel record of Captain Charles B. McVay III, clearing him for the loss of the heavy cruiser *Indianapolis* in 1945.

July 13

AVIATION: Historic Kelly Air Force Base, Texas, one of the cradles of American military aviation, is closed due to budget cuts. McClellan Air Force Base, California, also shuts its doors.

July 16

NAVAL: Off Hatteras Island, North Carolina, the Navy–National Oceanic and Atmospheric Administration Team recovers the 30-ton steam engine from the Union ironclad *Monitor*, which sank there in a storm on December 31, 1862. The engine will be displayed at the Mariners' Museum in Newport News, Virginia.

August 6

AVIATION: Test pilot Tom Morgenfield flies the XF-35B from Edwards Air Force Base to Palmdale, California, signaling the end of another successful round of flight testing. En route, he reached an altitude of 34,000 feet at Mach 1.2 and sustained it for 3.7 hours, the longest flight of the test program so far.

August 10

AVIATION: Over Iraq, 50 F-14 and FA-18 aircraft launched from the carrier *Enterprise* join British jets in the latest round of punitive strikes against Iraqi anti-aircraft emplacements southeast of Baghdad. This is the 25th strike in retaliation for Iraqi violations of Operations Northern Watch and Southern Watch.

August 13

AVIATION: The National Aeronautics and Space Administration (NASA) flies Helios, a solar-powered remotely control experimental aircraft to an altitude of 96,000 feet over a 17-hour maiden flight.

August 24

AVIATION: A cold war milestone passes when the final Minuteman III missile silo, which formed the backbone of American nuclear deterrence for three decades, is destroyed at Minot Air Force Base, North Dakota.

September 6

AVIATION: In Washington, D.C., General John P. Jumper gains appointment as chief of staff, U.S. Air Force.

September 11

MILITARY: In Washington, D.C., a hijacked airliner flown by terrorists slams into the Pentagon, killing 125 military and civilian personnel. Among them is Lieuten-

Two days after the 9/11 terrorist attacks, fires still burn amidst the rubble and debris of the World Trade Center in New York City in the area known as Ground Zero. (*Department of Defense*)

ant General Timothy J. Maude, deputy chief of staff for personnel and the highest-ranking fatality since World War II.

NAVAL: In the wake of devastating terrorist attacks in New York City and Washington, D.C., several navy vessels sortie to patrol coastal waters. The attack on the Pentagon took the lives of 33 sailors and six civilians, while wounding four sailors and two navy civilians.

TERRORISM: A defining tragedy in American history unfolds as two hijacked airliners, commanded by Muslim fanatics, crash into New York's World Trade Center, collapsing both towers and killing 3,000 people. Another airliner crashes into the Pentagon Building in Washington, D.C., while a fourth crashes into a field in rural Pennsylvania as the passengers attempt to wrest control from their abductors. President George W. Bush immediately declares this terrorist act, the largest in human history, to be the work of Saudi fugitive Osama bin Laden and his al-Qaeda ("The Base") terrorist network.

September 12

DIPLOMACY: In New York, a United Nations resolution calls for all nations to collaborate in punishing those parties responsible for the 9/11 terrorist attack.

Aerial view of the Pentagon Building located in Washington, D.C., showing emergency crews responding to the destruction caused when a high-jacked commercial jetliner crashed into the southwest corner of the building, during the 9/11 terrorists attacks. (*Department of Defense*)

- In Washington, D.C., President George W. Bush addresses the nation on television to declare war on terrorism and all parties responsible for it.

September 14

MILITARY: In light of the recent terrorist attack, President George W. Bush calls up 50,000 reservists for active duty in the war on terror. Most of these are deployed in domestic security settings.

NAVAL: The hospital ship *Comfort* docks in New York City to lend medical assistance to survivors of the World Trade Center terrorist attacks.

September 15

MILITARY: In Washington, D.C., President George W. Bush authorizes Operation Noble Eagle, a partial mobilization of the National Guard. By December, roughly 17,000 men and women have been called to the colors to serve in various homeland security positions.

September 16

DIPLOMACY: In Washington, D.C., President George W. Bush addresses a joint session of Congress and issues an ultimatum to the Taliban in Afghanistan: either surrender fugitive terrorist Osama bin Laden or face war with the United States.

September 19

AVIATION: The air force contracts with Lockheed Martin to obtain an initial production batch of 10 ultramodern F-22 Raptors.

September 20–21

DIPLOMACY: In his address to a special session of Congress, President George W. Bush demands that the Taliban regime of Afghanistan surrender Osama bin Laden or face immediate military action. The Taliban refuse to comply, setting the stage for a major military response.

September 27

AVIATION: In Washington, D.C., Secretary of War Donald Rumsfeld declares that President George W. Bush has authorized military aircraft to shoot down commercial airliners hijacked in American air space.

September 28

MILITARY: In Tampa, Florida, U.S. Army Reserve colonel George Trofimoff is sentenced to life imprisonment following his conviction on charges that he spied for the Soviet Union over the past 25 years. He remains the highest-ranking soldier to face charges of espionage.

September 29

AVIATION: At the Kodiak Launch Complex, Alaska, the air force launches a space satellite for the first time. Previously, all space launches were either in Florida or in California.

September 30

NAVAL: In Washington, D.C., the 2001 Quadrennial Defense Review (QDR) stipulates that the navy should increase carrier battle groups in the Pacific and also home port surface vessels and submarines in that region. It also suggests developing new concepts of amphibious warfare and shifting more marines and their equipment to the Indian Ocean to deal with any crisis in the strategic Middle East. At this time, the navy can field 12 carrier battle groups, 12 amphibious ready groups, 108 surface combatants, 55 attack submarines, three marine divisions, and three marine air wings.

MARINES: Manpower levels at the onset of the war on terrorism are 18,057 officers and 154,878 enlisted men and women.

October

AVIATION: The air force and the CIA jointly begin operations against the Taliban with unmanned, remotely guided RQ-1 Predator aircraft, each armed with deadly and accurate Hellfire missiles.

October 1

AVIATION: In Washington, D.C., General Richard B. Meyers becomes the first air force officer to head up the Joint Chiefs of Staff (JCS) in almost 20 years.

- The Air Materiel Space and Missile System Center becomes subordinated to the Air Force Space Command (AFSPACECOM), which now monopolizes all air force space concerns.

October 2

DIPLOMACY: Lord Robertson, secretary-general of NATO, finds evidence, submitted by the United States, proving that al-Qaeda is responsible for the 9/11

terrorist attack that is “clear and compelling.” As a member nation that has been attacked, the United States requests military assistance against terrorist cells in Afghanistan and receives it.

October 7

AVIATION: U.S. and British warplanes begin Operation Enduring Freedom, a concerted aerial campaign to drive the Taliban and al-Qaeda from power in Afghanistan. The attacks are run in concert with the Northern Alliance, an anti-Taliban group, and they include aircraft from the carriers *Enterprise* and *Carl Vinson*; 50 Tomahawk cruise missiles are also launched from a variety of vessels. Lieutenant General Charles W. Wald serves as the Joint Force Air Component commander throughout this operation.

- B-2 Spirit bombers of the 509th Bomb Wing at Whiteman Air Force Base, Missouri, fly to Afghanistan and back on the longest bombing mission in aviation history.

- Marine squadrons VMFA-251 and 314, launching from the carriers *Theodore Roosevelt* and *John C. Stennis*, are joined by Harrier jump jets of the 15th Marine Expeditionary Unit (SOC) as part of Operation Enduring Freedom.

MILITARY: Special Forces teams arrive in northern Afghanistan to coordinate anti-Taliban efforts with the Tajiki-based Northern Alliance while also directing close support bombing missions.

- Elements of the 10th Mountain Division (Light) arrive in Uzbekistan to guard an airfield utilized by U.S. Special forces for search-and-rescue operations; this is the first American military unit deployed on territory of the former Soviet Union.

October 8

AVIATION: Over Afghanistan, C-17 Globemaster IIIs perform their first combat mission by air dropping pallets of humanitarian daily rations to territory controls by the Northern Alliance.

- Coalition aircraft begin around-the-clock air strikes against Taliban positions throughout Afghanistan. This enables the Northern Alliance to counterattack

October 9–May 16, 2002

AVIATION: Over the United States, NATO deploys seven AWACS aircraft to assist in security measures during Operation Eagle Assist. This is also NATO’s first deployment in the United States since 1949.

October 10

MARINES: The 4th Marine Expedition Brigade (Antiterrorism) is organized from the Marine Security Force Battalion, the Marine Security Guard Battalion, and a special antiterrorism battalion.

TERRORISM: Three journalists in Boca Raton, Florida, test positive for anthrax exposure, which leads to a government investigation. Results are judged inconclusive.

October 12

NAVAL: In the Arabian Sea, the carrier *Kitty Hawk* deploys to serve as a floating base for forthcoming Special Forces operations in Afghanistan. To accomplish this, most of its air assets have been transferred ashore.

October 20

MILITARY: Southwest of Kandahar, Afghanistan, 100 men of the 75th Ranger Regiment deploy onto a Taliban-held airfield, find it deserted, then search all adjoining buildings for possible military intelligence. Once reinforced by a Delta Force unit, the Rangers subsequently capture a house used by a noted Taliban leader.

October 26

AVIATION: The Department of Defense awards the Lockheed Martin Corporation with a contract to develop the new and highly advanced F-35 Joint Strike Fighter (JSF) while Pratt and Whitney will develop the engine. This new aircraft will be deployed by air force, navy, and marine units. However, the navy version is to be strengthened for carrier operations while the marine variant will be equipped for short takeoff/vertical landing operations. The Royal Air Force will also acquire a version of its own.

October 28–November 4

AVIATION: Beginning this week Coalition Aircraft switch from bombing fixed assets of the Taliban and al-Qaeda to striking front-line units opposing the Northern Alliance.

November 1

NAVAL: In Washington, D.C., the Navy Department announces that it is scrapping plans to build the new DD 21 *Zumwalt*-class destroyer to replace its *Arleigh Burke*-class vessels in the 21st century. Instead, it opts to acquire the very advanced and highly capable DDX, featuring a gun system that can strike targets over 100 miles away and will present a radar cross-section that is a fraction of most vessels. Moreover, the technology developed also forms the basis for the new CGX missile cruiser and LCS Littoral Combat Vessel.

MARINES: In Tampa, Florida, Task Force 58 is activated by the Central Command to take charge of the 15th and 26th Marine Expeditionary Brigades (SOC). They are destined to play a role in Operation Enduring Freedom in Afghanistan.

November 2

AVIATION: In Afghanistan, the crew of an MH-53J Pave Low helicopter of the 20th Special Operations Squadron braves hazardous weather flying behind enemy lines to rescue the crew of another MH-53 that crashed. They are awarded a Mackay Trophy.

November 5–18

MILITARY: In Afghanistan, the Northern Alliance, buttressed by coalition air power, begins an offensive that quickly overruns half the country. This represents problems of its own as the alliance, based mostly on Tajik, Uzbek, and Hazara tribesmen, have great antipathy for the Pashtun people who occupy the eastern third of Afghanistan. Fortunately, alliance leaders agree to form an inclusive government once the fighting stops.

November 13

MILITARY: Backed by coalition air power, troops and tanks of the Northern Alliance roll into the Afghanistan capital of Kabul, while Saudi fugitive Osama bin Laden disappears from view. Taliban forces are also in full retreat.

November 13–27

DIPLOMACY: Presidents George W. Bush and Vladimir Putin agree to reduce their nuclear arsenals by two-thirds, leaving the United States with 1,700 warheads and the Russian Republic with 2,200.

MILITARY: The last stand by Taliban, al-Qaeda, and 3,000 foreign zealot fighters (Arabs, Pakistanis, Chechens) at Konduz withers under a steady hail of coalition aircraft bombs. By the time the city falls, the Northern Alliance seizes 6,000 Taliban.

November 14–December 2

MILITARY: In southern Afghanistan, Pashtun tribes under Gul Agra Shirzai and Hamid Karzai drive the Taliban from their spiritual capital at Kandahar. Both columns receive coalition air support.

November 18

NAVAL: Petty Officer Vincent Parker and Petty Officer Third Class Benjamin Johnson die onboard an Iraqi tanker when the dangerously overloaded vessel suddenly sinks in heavy seas. Previously, it had been halted by the destroyer *Peterson* on the suspicion that it had been smuggling oil out of Iraq.

November 25

MARINES: In Afghanistan, the 15th Marine Expeditionary Unit (SOC) from the *Peleliu* amphibious ready group helicopters 400 miles inland and deploys at an abandoned airstrip christened Forward Operating Base Rhino. From there the Marines begin patrolling the region for Taliban and al-Qaeda fighters as reinforcements are airlifted in from the 26th Marine Expeditionary Unit (SOC) from the Bataan amphibious ready group.

November 25–28

MILITARY: During a prison uprising in Mazar-e-Sharif, Afghanistan, air force jets drop bombs that accidentally wound five Special Forces soldiers; they are immediately evacuated to medical facilities at Landstuhl, Germany. CIA operative Johnny “Mike” Spann also becomes the first American to die in combat during the uprising. Nearly all 600 Taliban captives involved die in the fighting.

November 26

AVIATION: F-14Ds from the carrier *Carl Vinson* wipe out a 15-vehicle Taliban convoy after being directed to it by Marine AH-1W Super Cobra helicopters operating from Camp Rhino.

November 28

AVIATION: Operation Swift Freedom unfolds as Air Mobility Command (AMC) C-17 Globemaster III transports carry army and Special Forces troops to an airstrip near Kandahar, Afghanistan.

MILITARY: At Mazar-e-Sharif, Afghanistan, the first elements of the 10th Mountain Division become the first regular army units to deploy in theater.

November 30

TERRORISM: Special Forces fighting in Mazare-e-Sharif Province, Afghanistan, capture 84 Taliban fighters, among them 20-year-old John Walker Lindh, an American citizen apparently fighting alongside them. Once returned to the United States, he faces possible treason charges.

These Afghan al-Qaeda members were captured from a battle in the Tora Bora mountains, 2001. (Corbis)

December 4

AVIATION: Coalition aircraft begin pounding the mountain refuge of Tora Bora, a heavily fortified cave complex 55 miles south of Jalalabad, which holds an estimated 2,000 al-Qaeda Arab fighters. Fugitive terrorist Osama bin Laden is thought to be among them.

December 5

AVIATION: In Afghanistan, a 2,000-pound bomb dropped by a B-52 accidentally strikes an American command post, killing three Special Forces soldiers and five Afghan allies. They are the first soldiers killed during Operation Enduring Freedom.

DIPLOMACY: The United States and Russia announce that they have reduced their respective nuclear arsenals to levels established by the START I Treaty.

MARINES: From Camp Rhino, Afghanistan, the 15th Marine Expeditionary Unit (SOC) conducts a motorized convoy of light armored vehicles below Kandahar to interdict any Taliban reinforcements entering the area.

December 6

POLITICS: At Königswinter, Germany, representatives from the four Afghan factions agree to an interim government headed by Pashtun leader Hamid Karzai for

the next six months. After that, a grand council (loya jirga) will convene to form a new administration to sponsor free elections within two years.

December 7

MILITARY: Taliban forces, mercilessly harassed by coalition air power and Northern Alliance ground forces, abandon their traditional stronghold of Kandahar and melt into the mountains along the Pakistan border. Their regime fell after only 62 days of fighting, mostly aerial bombardment.

MARINES: In Afghanistan, marine forces ambush a Taliban convoy, killing seven fighters and destroying three trucks. Marine aircraft also account for several more vehicles.

December 11

MARINES: In Kabul, Afghanistan, the long-abandoned U.S. embassy is reclaimed by the 26th Marine Expeditionary Unit (SOC). Shortly after, they are relieved by the 4th Marine Expeditionary Brigade (AT).

December 12

AVIATION: Off Diego Garcia in the Indian Ocean, the guided-missile destroyer *Russell* rescues the crew of an air force B-1B bomber, which ditched en route to targets in Afghanistan. This is also the first B-1B lost in combat and the first lost during Operation Enduring Freedom.

NAVAL: In Washington, D.C., the Navy Department postpones any action on Vieques, Puerto Rico, after the House and Senate Armed Service Committees pass a resolution forbidding the navy from abandoning the test range until a suitable replacement can be found.

December 13

DIPLOMACY: President George W. Bush informs the Russian Republic that the United States is withdrawing from the 1972 Anti-Ballistic Missile (ABM) Treaty in order to develop an antimissile defense system against terrorist attacks.

December 14

MARINES: In Afghanistan, troops from the 26th Marine Expeditionary Unit (SOC) travel overland from Camp Rhino to seize Kandahar airfield. Soon after, this location becomes an important detention facility for Taliban captives of interest to U.S. military intelligence.

December 15

AVIATION: The carrier *Enterprise* is relieved by the *John C. Stennis* after its air groups have flown 4,200 sorties and dropped 2 million pounds of bombs on Taliban targets in Afghanistan.

December 16

MILITARY: Men of the Pashtun-based Eastern Alliance clear out remaining al-Qaeda pockets at Tora Bora after killing 200 and capturing 11. American and British Special Forces begin combing through the caves over intervening weeks, but no trace of Osama bin Laden is found.

December 17

AVIATION: At Istres Air Base, France, Air Mobility Command (MAC) C-17 Globemaster IIIs begin airlifting French military forces to Afghanistan as part of Operation Enduring Freedom.

DIPLOMACY: In Kabul, Afghanistan, the U.S. embassy, which had been closed since the Soviet withdrawal from Afghanistan on January 31, 1989, is reopened for business.

December 22

MILITARY: In Kabul, Afghanistan, General Tommy Franks arrives to attend ceremonies marking the inauguration of a new, interim government under Hamid Karzai, the acting prime minister. He is installed only 78 days following the commencement of Operation Enduring Freedom.

December 26

AVIATION: In Washington, D.C., Undersecretary of War Pete Aldrich announces that the Pentagon has approved acquisition of the one-ton Joint Air-to-Surface Standoff Missile, a precision-guided weapon that can destroy targets at distances of 200 miles.

December 27

NAVAL: In Washington, D.C., the Department of Defense announces that Taliban and al-Qaeda captives seized in Afghanistan will be interred in special facilities at Guantánamo Bay, Cuba.

December 28

CRIME: The United States begins drawing up rules for military tribunals to try terrorist suspects, although they can face the firing squad only through a unanimous tribunal vote.

December 31

AVIATION: By this date, navy aircraft have accounted for 72 percent of all tactical air strikes and over half of all precision-guided weapon, launched against Taliban and al-Qaeda forces in Afghanistan.

2002

January

MILITARY: The army's personnel strength rises to 479,026 following a spate of enlistments, while active division strength remains at 10. This year another 17,000 soldiers will be drawn from the Reserves and activated.

January 3

MARINES: In Afghanistan, Forward Operating Base (FOB) Rhino closes once the 15th Marine Expeditionary Unit ships back to its vessels.

January 9

AVIATION: In Pakistan, a KC-130R from VMGR-352 crashes near Shamsi military airfield in Pakistan, killing seven marines.

January 10

MILITARY: In the Philippines, the army dispatches an advanced team of soldiers to assist the Philippine military in their struggle with the violent Abu Sayyaf, a Muslim group with ties to al-Qaeda. Over the ensuing months a total of 600 Americans arrive.

January 11

AVIATION: At Guantánamo Bay, Cuba, a C-17 Globemaster III arrives with the first 20 of 371 Taliban and al-Qaeda detainees.

MARINES: In Guantánamo Bay, Cuba, terrorist detainees begin arriving for interrogation. The facilities are guarded by the II Marine Expeditionary Force.

January 12

AVIATION: When the Marine Corps commandant is alerted by a letter that the investigation of the April 2000 crash of an MV-22 Osprey had been mishandled, he orders a completely new investigation of the Osprey program.

January 19–February 8

MARINES: At Kandahar airfield, Afghanistan, the 26th Marine Expeditionary Unit is replaced by the 101st Airborne Division and begins shipping back to the *Bataan*. During these proceedings, a CH-53E Super Stallion crashes on January 20, killing two marines and injuring five.

January 21

AVIATION: After Iraqi anti-aircraft weapons fire at coalition aircraft enforcing Operation Southern Watch, American and British jets retaliate by striking weapons emplacements at Tallil, 170 miles southeast of Baghdad.

January 29

DIPLOMACY: In Washington, D.C., President George W. Bush declares in his State of the Union address that rogue nations such as Iran, Iraq, and North Korea constitute an “axis of evil” in the world. Moreover, he pledges that none of them will be allowed to develop or possess nuclear weapons or other devices of mass destruction.

MILITARY: At Kandahar airfield, Afghanistan, the 3rd Brigade, 101st Airborne Division, deploys and replaces marines forces. Under the code name Task Force Rakkaan, it consists of three battalions of the 187th Infantry Regiment.

January 31

TERRORISM: In the southern Philippines, U.S. forces assist local troops in hunting down and fighting Abu Sayyaf, a Muslim terrorist group with links to al-Qaeda, which seeks to found an Islamic state of its own.

February 4

AVIATION: Over Afghanistan, an MQ-1B Predator unmanned aerial vehicle (UAV) fires a Hellfire missile at a group of senior al-Qaeda figures on the ground, killing them. This is the first combat missile launch by an UAV.

- Over Mosul, Iraq, Iraqi anti-aircraft weapons fire at coalition aircraft enforcing Operation Northern Watch and are, in turn, attacked by American and British jets.

POLITICS: In Washington, D.C., President George W. Bush submits a budget calling for \$379 billion to be spent on defense. This request, 14 percent higher than the 2001 budget request, is the largest hike in real defense spending since the Reagan administration.

February 21

MILITARY: At Basilan Island, Philippines, an MH-47E Chinook transport helicopter belonging to the 160th Special Operations Aviation regiment crashes, killing eight soldiers and two air force personnel. They had been assisting in joint U.S.-Philippine training exercises.

February 26

MARINES: In Tampa, Florida, Task Force 58, tasked with supervising the 15th and 26th Marine Expeditionary Groups, is deactivated.

February 27

MILITARY: At Fort Lauderdale, Florida, the army's new, wheeled, assault vehicle, the Stryker, is unveiled. Fast, heavily armed, and armored, they form the core of new Stryker Brigade Combat Teams (SBCT) and serve as the primary weapons platform. A total of five SBCTs are planned.

February 28

AVIATION: For the second time this year, Iraqi antiaircraft weapons at Mosul fire upon coalition aircraft enforcing Operation Northern Watch. U.S. and British jets counter by attacking air defense installations in the region.

March 1

AVIATION: At McGuire Air Force Base, New Jersey, Brigadier General Teresa M. Peterson becomes the first active female duty officer to command an operational flying wing when she assumes control of the 305th Air Mobility Wing.

- In Eastern Afghanistan, the aerial element of Operation Anaconda commences as air force B-52s, B-1Bs, AC-130s, A-10s, and F-15s support ground units attacking Muslim extremists near Gardez. Precision-guided weapons help keep civilian casualties to a minimum while thermobaric bombs are dropped in caves; these kill terrorists by depriving them of oxygen.

March 2–10

AVIATION: An air force AC-130 Spectre gunship is on hand to relieve a detachment of the 10th Mountain Division that was surrounded by enemy fighters. Afterward, two HH-60 Black Hawk helicopters rescue them from rough terrain. The AC-130 crew wins a Mackay Trophy for their timely support.

MILITARY: Approximately 1,200 army troops and Special Forces soldiers engage Taliban remnants in the Shah-i-Kot Valley, Afghanistan, and Operation Anaconda forces them from their strongpoint at Tora Bora. Present are the 1st Battalion, 87th Infantry (10th Mountain Division), the 3rd Brigade, 101st Airborne Division, and the 1st Battalion, 75th Ranger Regiment. The ensuing operation accounts for over 500 enemy dead at a cost of eight Americans killed and 40 wounded.

March 4

AVIATION: Near Gardenz, eastern Afghanistan, a helicopter assault on enemy troops results in the deaths of two airmen. They are the first air force combat losses during Operation Enduring Freedom.

NAVAL: During Operation Anaconda in eastern Afghanistan, Aviation Boatswain's Mate First Class Neil C. Roberts, a navy SEAL, is killed in action.

March 27

NAVAL: Near Kandahar, Afghanistan, Chief Hospital Corpsman Matthew J. Bourgeois, a Navy SEAL, is killed during a small unit training exercise.

April 1

NAVAL: Protests erupt in Puerto Rico once the *George Washington* carrier battle group resumes live-fire training exercises on Vieques Island offshore.

April 15

MILITARY: In Kandahar, Afghanistan, four Explosive Ordnance Disposal soldiers die when a cache of 107mm rockets, apparently booby-trapped, explodes.

April 18

AVIATION: At Hanscom Air Force Base, Massachusetts, the experimental MC2A-X performs its maiden flight. This vehicle is designed to provide electronic command and control over combat areas.

- In Afghanistan, an American warplane accidentally kills four Canadian soldiers and wounds eight others in an errant bomb drop south of Kandahar.

April 22

AVIATION: The air force resorts to a new organizational scheme for wings and bases it on four groups: operations, maintenance, mission support, and medical.

May 8

MILITARY: In Washington, D.C., Secretary of Defense Donald H. Rumsfeld cancels the army's new Crusader artillery system; it was an armored, self-propelled 155mm gun with its own resupply vehicle.

May 13

DIPLOMACY: The United States and Russia agree to a further two-thirds reduction in their nuclear arsenals.

May 21

NAVAL: Off San Diego, California, the research submarine *Dolphin* is engulfed by a fire and flooding. The guided-missile frigate *Thatch* arrives to assist the crew.

May 22

AVIATION: At Edwards Air Force Base, California, the X-45A unmanned combat aerial vehicle (UCAV) performs its maiden flight. While stealthy and capable, the program is terminated in 2006.

May 31

MILITARY: In Bagram, Afghanistan, Lieutenant General Dan K. McNeill assumes command of newly created Combine Joint Task Force 180; he is tasked with coordinating military moves by coalition forces in the country.

June 6

NAVAL: Off the North Carolina coast, the dock landing ship *Tortuga* runs aground at night but is refloated the following day.

TERRORISM: Secretary of Defense Donald Rumsfeld asks NATO members to change their prevailing defensive strategy to reflect present-day realities. He calls for a new, more aggressive approach involving preemptive war against terrorists and rogue nations possessing weapons of mass destruction.

June 12

NAVAL: At the Naval War College in Newport, Rhode Island, U.S. Chief of Naval Operations admiral Vern Clark announces "Sea Power 21," which articulates his vision for the U.S. Navy during the new century. He posits three central concepts: Sea Strike, the ability to project power anywhere in the world; Sea Shield, projecting defense of the nation and its assets; and Sea Basing, to project and maintain sovereignty abroad.

June 17

NAVAL: Off Oman, the guided-missile cruiser *Vicksburg* rescues 16 merchant sailors who had been adrift for 11 days.

July 22

AVIATION: At McConnell Air Force Base, Kansas, the prototype YAL-1A, or “Airborne Laser,” performs its maiden flight. This weapons system employs a concentrated light beam to destroy enemy ICBMs while they are still being launched into the atmosphere (boost phase).

July 24

AVIATION: The new and highly capable F/A-18E Super Hornet begins its operational deployment with Attack Squadron VFA-115 on the carrier *Abraham Lincoln*.

July 26

NAVAL: Following the collapse of a mineshaft in Somerset, Pennsylvania, lying 240 feet below the surface, eight medical and diving experts from various navy commands are dispatched to operate a portable recompression chamber.

July 30

AVIATION: A Scramjet engine (air-breathing supersonic combustion engine) is successfully ignited at high altitude for the first time. This futuristic technology has the potential for revolutionizing air transportation.

August 18–26

MILITARY: Southeastern Afghanistan is the scene of Operation Mountain Sweep, conducted by men of the 82nd Airborne Division, the 75th Rangers, and accompanying aviation units. Several Taliban weapons caches are captured, but the fighters evade contact.

August 21

AVIATION: At Cape Canaveral, Florida, the Lockheed Martin Atlas V undergoes its first launch. This is part of the air forces’s Evolved Expendable Launch Vehicle, which consists of a main rocket with strap-on boosters added as necessary for heavy payloads.

September 3

NAVAL: At Yokosuka, Japan, the captain of the forward-based carrier *Kitty Hawk* is relieved by the commander, Seventh Fleet.

September 4

NAVAL: During a live-fire training exercise on Vieques Island, Puerto Rico, by the *Harry S. Truman* carrier battle group, protestors pelt naval security personnel with rocks.

September 7–11

MILITARY: In the Bermel Valley, Afghanistan, 175 miles south of Kabul, the 1st Battalion, 504th Parachute Infantry (82nd Airborne Division) makes several ground sweeps, seizing suspected Taliban agents, weapons, and many documents.

September 8

NAVAL: In Washington, D.C., the secretary of the navy declares that the navy’s newest *San Antonio*-class amphibious transport dock will be christened the *New York* in honor of the victims of 9/11.

September 10–11

TERRORISM: Al-Qaeda agent Ramzi bin al-Shibh, the suspected coordinator of the 9/11 terrorist attacks, is arrested in Karachi, Pakistan, and secretly transported to an American military base for questioning.

September 11

NAVAL: In honor of the first anniversary of the 9/11 terrorist attack, the secretary of the navy instructs all vessels to fly the first navy jack of 1775, consisting of 13 red and white stripes with the motto “Don’t Tread on Me,” until the war against terrorism has concluded.

September 13

DIPLOMACY: In New York, President George W. Bush addresses the United Nations General Assembly in calling Iraqi dictator Saddam Hussein a “grave and gathering danger” to world peace. He insists that the body pass a resolution requiring Iraq to readmit weapons inspectors and mandating that Iraq continue disarming. Failing that, Bush warns that the United States will intervene unilaterally, if necessary, to secure Iraqi compliance.

September 29

MILITARY: In southeastern Afghanistan, Operation Alamo Sweep begins as part of the 82nd Airborne Division, the Rangers, and other units, are airlifted to the Afghan-Pakistan border to root out any Taliban or al-Qaeda fighters lurking there.

October 1

AVIATION: The U.S. Northern Command is activated under General Ralph Eberhart and is responsible for the military security of North America. It consists of elements from all four U.S. armed services.

- A historical benchmark is reached when General John P. Jumper orders the Peacekeeper ICBM system deactivated. This was the largest and most capable intercontinental ballistic missile deployed by the United States during the cold war years.

October 2

MILITARY: In central Afghanistan, Special Forces, acting on a tip, uncover a hidden Taliban cache of nearly 500,000 rounds of ammunition.

October 4

TERRORISM: John Lindh Walker, who apparently fought alongside Taliban forces in Afghanistan, is sentenced to 20 years’ imprisonment.

November 10

AVIATION: American warplanes begin a concerted series of attacks against Iraqi antiaircraft sites for violating UN-ordered no-fly zones.

November 13

NAVAL: In the mid-Atlantic, the nuclear attack submarine *Oklahoma City* collides with a Norwegian commercial vessel, suffering damage to its periscope and sail. The captain is subsequently relieved of command and reassigned.

November 17–18

AVIATION: Iraqi antiaircraft batteries fire on coalition aircraft patrolling the northern no-fly zone, which prompts a sharp response. Aircraft drop precision-guided

munitions on all the offending positions. This comes in the wake of a UN resolution authorizing strong action against Iraqi transgressions.

November 18

TERRORISM: A videotape of Saudi fugitive Osama bin Laden surfaces on the Arabic language Al-Jazeera Network in Qatar, affording the first proof that the wanted terrorist is still alive.

December 6

NAVAL: In the North Arabian Gulf, the guided-missile destroyer *Paul Hamilton* accidentally collides with a merchant vessel and receives some damage.

December 8

AVIATION: The Air Mobility Command (AMC) commences a bevy of C-5 Galaxys into Andersen Air Force Base, Guam, bringing 1,200 tons of relief supplies to survivors of Typhoon Pongsona.

NAVAL: After Guam is ravaged by Typhoon Pongsona, with winds of over 180 miles per hour, Naval Mobile Construction Battalion 74 spends the next several days restoring water supplies to the inhabitants. A total of \$4 million in relief supplies is also flown in.

December 9

NAVAL: In Washington, D.C., the secretary of the navy declares that the 10th *Nimitz*-class carrier will be named in honor of former president George H. W. Bush, a distinguished naval aviator of World War II.

December 12

AVIATION: By this time in their service life, F/A-18 Hornets have logged 5 million hours of flight time in navy and Marine Corps squadrons.

December 18

MILITARY: The United States begins deploying 50,000 additional troops in the Persian Gulf region in anticipation of a possible attack upon Iraq.

December 31

MILITARY: In an attempt to shore up Afghan civilian support for the war against terror, the army implements its first Provincial Reconstruction Team (PRT) as part of an ongoing civil-military effort to repair the nation's infrastructure. By broadening the reach of the central Afghan government, the PRTs also play a major role in enhancing national security.

2003

January

MILITARY: Army personnel hovers at 484,628 officers and men with 12 regular divisions activated, although two of these consist of National Guard brigades. The United States has also deployed 10,000 soldiers in the Persian Gulf in anticipation of renewed hostilities with Saddam Hussein in Iraq.

January 3

MILITARY: At Fort Stewart, Georgia, the remainder of 3rd Infantry Division is ordered to deploy to Kuwait and join the headquarters unit and 2nd Brigade already there. Live-fire exercises have already been completed there.

January 14

MILITARY: A detachment from the 5th Battalion, 7th Air Defense Artillery departs Hanau, Germany, for Israel for joint exercises testing air defense capacities.

January 16

MILITARY: In Colombia, South America, 60 members of the 7th Special Forces Group deploy to help train Colombian troops in antiterrorist tactics. They reinforce 10 Green Berets who are already instructing there.

January 20

MILITARY: At Fort Hood, Texas, the 4th infantry Division (Mechanized) is ordered to deploy to Turkey in anticipation of hostilities with Iraq. The division currently has three brigades at Fort Hood and another at Fort Carson, Colorado.

January 23

NAVAL: In Fremantle, Australia, the navy's Sea Swap Initiative begins, which allows three ship crews to rotate through a vessel to give it more time on station. The first participant is the destroyer *Fletcher*, which is re-crewed by personnel of the recently decommissioned *Kinkaid*.

January 24

NAVAL: In Washington, D.C., Gordon England relinquishes the post of secretary of the navy to serve as deputy secretary of the Department of Homeland Security. He is temporarily replaced by acting secretary of the navy Susan M. Livingston.

January 28

MILITARY: In Spin Boldak, Afghanistan, Special Forces and 82nd Airborne Division soldiers, backed by Afghan militia, begin clearing out caves in the Adi Gahr Mountains; 18 Al-Qaeda terrorists are slain without loss.

POLITICS: In his State of the Union address, President George W. Bush accuses Iraqi dictator Saddam Hussein of hiding biological and chemical weapons of mass destruction from United Nations inspectors. He also advises the United States to prepare for a possible conflict there to evict him, but gives no indication of the timetable.

February 1

AVIATION: The space shuttle *Columbia* breaks up in the atmosphere and disintegrates only 15 minutes from touchdown. All seven astronauts die, including Captain David M. Brown, Captain Laurel Clark, and Commander William C. McCool of the Navy and Lieutenant Colonel Michael Anderson and Colonel Rick Husband of the Air Force.

February 2

MILITARY: National Guard troops from Texas, Oklahoma, Arkansas, and Louisiana are mobilized in the search for fragments of the ill-fated *Columbia* space shuttle, which broke up during its descent from space a day earlier.

February 6

MILITARY: At Fort Campbell, Kentucky, the 101st Airborne Division is ordered to prepare to deploy abroad in the war against terrorism.

February 8

AVIATION: In anticipation of another war with Iraq, the Department of Defense begins contracting with commercial airlines to deliver troops and supplies to the Persian Gulf region. This also involves activation of the Civil Reserve Air Fleet (CRAF).

February 13

NAVAL: At Naval Station Mayport, Florida, President George W. Bush visits naval families and has lunch onboard the guided-missile cruiser *Philippine Sea*.

February 14

MILITARY: At Fort Carson, Colorado, the 3rd Armored Division is ordered to deploy to Kuwait.

February 16

MILITARY: At Daytona Beach, Florida, army recruiters enter the NASCAR business by sponsoring a racer sporting the motto "Army of One." This vehicle, driven by Jerry Nadeau, finishes 28th at the Daytona 500.

February 19–March 3

MILITARY: In the Baghran Valley, Afghanistan, soldiers from the 2nd Battalion, 504th Parachute Infantry, 82nd Airborne Division, air assault positions in the search for Taliban and al-Qaeda weapons caches. No resistance is encountered.

March 1

MILITARY: After the Turkish parliament denies the 4th Infantry Division access to Turkish territory for the purpose of invading Iraq, the unit is rerouted to Kuwait by 30 ships.

March 7

DIPLOMACY: After UN weapons inspector Hans Blix informs the Security Council that Iraqi disarmament will take several months, the U.S. and Great Britain present a draft resolution requiring Saddam Hussein to disarm by March 17 or face war.

March 10

NAVAL: In the Mediterranean, Operation Active Endeavor commences as the guided-missile cruiser *Halyburton* begins escorting civilian shipping through the Strait of Gibraltar. This activity is sponsored by NATO and includes maritime patrol aircraft from several member nations.

March 14

NAVAL: At Amphibious Naval Base Little Creek, Virginia, the Center for Naval Leadership is founded.

March 15

MILITARY: On the cusp of war with Iraq, the army deploys 57,500 men from the 3rd Infantry and 101st Airborne Divisions, while the 4th Infantry Division (Mechanized) is currently en route by water. The entire 3rd U.S. Army present in theater is commanded overall by Lieutenant General David D. McKiernan.

March 17

AVIATION: In Washington, D.C., President George W. Bush delivers an ultimatum requiring Saddam Hussein and his sons to depart from Iraq within 48 hours.

March 18–19

AVIATION: During the buildup to war, air force planes begin dropping informational leaflets on 20 civilian locations. An EC-130 Commando Solo aircraft also broadcasts messages to alert Iraqi citizens to take cover. Other aircraft begin bombing antiaircraft emplacements placed in violation of the southern no-fly zone.

March 19

AVIATION: In this first day of Operation Iraqi Freedom, naval vessels fire a total of 42 Tomahawk cruise missiles at various targets in Iraq. Several buildings thought to house Saddam Hussein, his two sons, and several ranking government officials are deliberately targeted. Air force F-117 Nighthawks also drop precision-guided munitions at communication and command centers. All told, coalition forces aircraft hit artillery, air defenses, and missile sites throughout the country.

MILITARY: Operation Iraqi Freedom begins as coalition forces, spearheaded by the United States, invade Iraq and topple the regime of dictator Saddam Hussein. Special Forces are already in theater to gather information and President George W. Bush declares that the goal of the war is the removal of Hussein from power, the destruction of all Iraqi weapons of mass destruction (WMDs), and the elimination of all terrorist elements within that country.

NAVAL: In the Persian Gulf, the guided-missile destroyers *Donald Cook* and *Milius*, the guided-missile cruisers *Cowpens* and *Bunker Hill*, and the attack submarines *Cheyenne* and *Montpelier* launch cruise missiles against Iraqi targets.

March 20

AVIATION: Approximately 500 coalition aircraft, mostly from Great Britain and the United States, begin swarming over Iraqi antiaircraft and missile radar defenses, along with command and control centers. All told, coalition air and sea forces unleash 1,000 Tomahawks and over 3,000 precision-guided munitions against Iraqi forces.

- In Kuwait, Patriot PAC-3 missiles fired by Battery D, 5th Battalion, 52nd Air Defense Artillery, shoots down two Iraqi Scud missiles headed toward 101st Airborne Division headquarters at Camp Thunder.

MILITARY: In Iraq, the 3rd Infantry Division under Major General Buford C. Blount III initiates the ground offensive by crossing into Iraq from Kuwait. Resistance is light and easily dispatched by AH-62 Apache gunships. That afternoon, the first enemy units are engaged by the 3rd Squadron, 7th Cavalry while the 3rd Battalion, 15th Infantry (3rd Division) neutralizes some enemy armored vehicles.

NAVAL: In the Persian Gulf, the guided-missile destroyer *John S. McCain* and the attack submarines *Columbia* and *Providence*, assisted by two British submarines, unleash an additional 50 Tomahawk missiles at select targets in Baghdad, Iraq. Teams of SEALs and Royal Marines are also helicoptered in for raids against the Kaabot and Mabot oil terminals.

March 20–March 27

MILITARY: In southern Afghanistan, men from the 2nd Battalion, 504th Parachute Infantry (82nd Airborne Division) under Lieutenant Colonel Charles A.

Flynn, conduct Operation Valiant Strike in the Sami Ghar Mountains. Resistance is slight and several weapons caches are seized.

March 21

AVIATION: Launching at night, aircraft from the carriers *Abraham Lincoln*, *Constellation*, *Harry S. Truman*, *Kitty Hawk*, and *Theodore Roosevelt* participate in the “shock and awe” campaign against the Iraqi capital of Baghdad. A further 320 Tomahawk cruise missiles are fired against various military targets.

- In the Arabian Gulf, an Iraqi fast attack patrol boat is detected and tracked by a Navy P-3 Orion of VP-46, then destroyed by an air force AC-130 Spectre gunship.

MILITARY: In southern Iraq, the 101st Airborne Division under Major General David H. Petraeus crosses the border in a mass of helicopters and ground vehicles.

- The 3rd Brigade, 3rd Infantry Division, having dashed over 100 miles into enemy territory, comes under attack at Nasiriya, Iraq. Their counterfire destroys the Iraqi 11th Infantry Division in short order and, once the 1st Brigade seizes Jalibah Airfield, it is handed over to the marines.

March 22

AVIATION: Coalition force aircraft launch over 1,000 sorties and a like number of cruise missiles at Iraqi military targets.

- Over the Arabian Gulf, two Royal Navy Sea King helicopters collide and crash; an exchange officer U.S. Navy lieutenant Thomas M. Adams, is among those killed.

MILITARY: In a news briefing, General Tommy R. Franks, commander, Central Command (CENTCOM), declares that Operation Iraqi Freedom will be waged as a campaign of “overwhelming force.”

March 23

AVIATION: In the eastern Mediterranean, the long reach of the Tomahawk cruise missile is amply displayed when the guided-missile cruisers *Cape. St. George* and *Anzio*, and the guided-missile destroyer *Winston S. Churchill* begin launching missiles against targets in Iraq.

- Over Karbala, Iraq, an AH-64 Apache Longbow from the 1st Battalion, 227th Aviation regiment, is badly damaged by heavy fire from Republican Guard units and crash lands; the crew of two is captured. Chief Warrant Officer David S. Williams and Chief Warrant Officer Ronald Young are subsequently paraded in front of television.
- Over Kuwait, a Patriot antimissile battery fires and accidentally downs a Royal Air Force GR4 Tornado jet bomber. An American F-16 also knocks out a Patriot battery after its radar locks on to it; no casualties occur.

MILITARY: At Camp Pennsylvania, Kuwait, a disgruntled soldier lobs a grenade into tents, killing an Air National Guard officer and an intelligence officer. The attack wounds 14 others; the soldier is charged with two counts of premeditated murder and faces the death penalty.

- Near Nasiriya, Iraq, an 18-vehicle convoy from the 507th Maintenance Battalion goes down the wrong road and is ambushed. Of 33 soldiers present, 11 are killed and six are captured.

March 24

AVIATION: Coalition force aircraft bombard Iraqi military targets near the oil-producing center of Kirkuk for a 24-hour period.

MILITARY: Near Najaf, Iraq, the 1st Brigade, 3rd Infantry Division severs Highway 9 as Iraqi irregulars launch waves of suicide attacks against them. These are repelled with heavy losses, although the soldiers expend so much ammunition that they have to employ captured enemy weapons.

NAVAL: In the Khor Abd Allah waterway, Iraq, coalition naval forces board four Iraqi vessels carrying nearly 100 mines. The units involved come from the U.S. Navy and Army, and Coast Guard unit from Australia and Kuwait.

March 25

AVIATION: Over Iraq, a Lockheed S-3 Viking from Sea Control Squadron 38 (VS-38) directs a raid by F/A-18 Hornets from VFA-151. This is the first time the 30-year-old Viking design has seen combat and also the first time it released

Franks, Tommy (1945–)

Army general

Tommy Ray Franks was born in Wynneville, Oklahoma, and raised in Midland, Texas. He attended the University of Texas, Austin, for two years, then dropped out to join the U.S. Army in 1965 as a private. After passing through the Artillery and Missile Officer Candidate School at Fort Sill, Oklahoma, Franks was commissioned a second lieutenant and assigned to the 9th Infantry Division in South Vietnam. He performed well under fire, winning three purple hearts, and, in 1968, he returned to Fort Sill to command an artillery battery. Franks subsequently acquired a degree in business administration from the University of Texas in 1971 and, following a three-year tour in West Germany with the 2nd Armored Cavalry Regiment, he attended the Armed Forces Staff College. In 1976 Franks served at the Pentagon as army inspector General, deployed again in Germany in 1981, and passed through the

Army War College while receiving a master's degree in public administration from Shippensburg University, Pennsylvania. In 1987 he was posted as chief of staff with the 1st Cavalry Division and subsequently accompanied his unit to Saudi Arabia in 1990, seeing active duty during Operations Desert Shield/Storm. In 1995 Franks received command of the 2nd Infantry Division in South Korea, and subsequently he became commander of the Third Army Forces Central Command in Atlanta, Georgia.

In June 2000 Franks's career took a dramatic turn when he was assigned as commander, U.S. Central Command, in Tampa Florida. Since the terrorist attack upon the World Trade Center on September 11, 2001, he has played central and successful roles in the war on terrorism. Commencing in October 2001, he orchestrated Operation Enduring Freedom, which drove the

a laser-guided missile. Carrier aircraft also attack and sink the Iraqi presidential yacht *Al Mansur*, sinking it.

MILITARY: As elements begin crossing the Euphrates River at Samawah, Iraq, they are beset by intense sandstorms that makes rapid movement impossible. The advance on Baghdad slowly necessarily, and intelligence is received that Iraqi forces might employ chemical weapons against coalition forces as they approach the city.

March 26

AVIATION: In northern Iraq, Operation Northern Delay commences as 15 C-17 Globemaster IIIs insert 990 paratroopers and 20 heavy platforms onto Bashur Airfield. This act effectively opens up a second front and is also the first time that parachutists have dropped from C-17s. The crew of the lead aircraft also wins a Mackay Trophy for orchestrating such an intricate maneuver.

MILITARY: The city of Najaf, Iraq, is surrounded by two brigades of the 3rd Infantry Division; American losses are two M1A1 Abrams tanks and one M2 Bradley

Taliban regime from Afghanistan in less than 90 days with very few losses. In the spring of 2003 he was also called upon to direct Operation Iraqi Freedom to dispose of the dangerous dictator Saddam Hussein. Franks, who had been limited to only 140,000 men, conducted a lightning-quick campaign that crushed Iraqi defenses and occupied a country the size of California in less than a month. A major challenge occurred when the government of Turkey would not allow the crack 4th Division to operate from its territory. It was forced to be transported to Kuwait by boat only after the fighting subsided. At that juncture Franks sought to resign his command but he was persuaded by Secretary of Defense Donald Rumsfeld to stay on. At this time, Iraq was convulsed by several sectarian-based insurgencies and al-Qaeda terrorists, which the coalition occupation troops had difficulty suppressing. The problem was still ongoing when Franks was replaced by Lieutenant General Ricardo Sanchez in June

General Tommy Franks speaks with the media during the invasion of Iraq. (*Department of Defense*)

2003. Reputedly, he had been offered to serve as chief of staff, U.S. Army, but Franks declined. He currently resides in Roosevelt, Oklahoma, and serves on the Board of Directors of Bank of America and several other institutions. In 2004 he also published a best-selling memoir, *American Soldier*.

disabled, with one crewman killed. In time, the advances are joined by truckloads of men from the 101st Airborne Division, although the still intense sandstorms have grounded all that unit's helicopters.

- The 173rd Airborne Brigade drops nearly 1,000 parachute infantry over Bashur Airfield, Iraq, in that unit's first combat jump since Vietnam. They are assisted by roughly 150 men of the 10th Special Force Group (Airborne) who are helping direct air strikes against nearby targets.

March 27

AVIATION: Over Kuwait, a Patriot missile successfully intercepts and destroys an Iraqi Scud missile.

MILITARY: Once the sandstorms subside, the 3rd Infantry Division resumes its advance on Karbala, Iraq, while Iraqi irregulars tie down other units in severe fighting near Najaf.

- The 2nd Battalion, 505th Parachute Infantry (82nd Airborne Division) commences Operation Desert Lion by sweeping through the Kohe Safi Mountains near Bagram Air Base. Resistance is minimal and the soldiers uncover a large cache of 107mm rockets and machine gun munitions.

March 28

AVIATION: In the Persian Gulf, minesweeping operations are maintained by helicopters of Mine Countermeasures Squadron 14 (HN-14) and the Commander Task Unit (CMU). Consequently, the Royal Navy landing ship *Sir Galahad* is able to dock at Umm Qasr with tons of humanitarian aid for the locals.

MILITARY: Around Karbala, Iraq, AH-64 Apache Longbow helicopters from the 101st Airborne Division attack tanks belonging to the Republican Guard Medina Division.

March 29

MILITARY: At Najaf, Iraq, five soldiers from the 1st Brigade, 3rd Division, die at the hands of a suicide bomber.

- As units of the 3rd Infantry Division give battle to the Republican Guard Medina Division outside Najaf, they are increasingly harassed by irregular fedayeen fighters, who fire at them from schools, hospitals, and mosques. The irregulars are also quick to employ women and children as human shields.

NAVAL: In the Persian Gulf, the *Nassau* amphibious ready group unloads the 24th Marine Expeditionary Unit. This is the first sizable troop reinforcement to land in theater.

March 30–31

MILITARY: The American advance on Baghdad, Iraq, continues as the 2nd Brigade, 3rd Infantry Division, seizes a bridge over the Euphrates at Al Handiyah, only 50 miles from the capital. Meanwhile, the 101st Airborne Division captures the airfield at Najaf, along with several tanks and prisoners. To the rear, the 82nd Airborne Division, which is tasked with keeping American lines of supply and communication open, destroys several Iraqi artillery batteries with effective counterfire.

March 31

AVIATION: At Webster Field, St. Inigoes, Maryland, an NP-3C Orion electronically controls an Aerolight unmanned aerial vehicle (UAV). This is the first time

that a fixed wing aircraft has utilized an auxiliary device for gathering military data during flight.

- Over northern Iraq, aircraft from the carrier *Theodore Roosevelt* bombard artillery emplacements, barracks, and surface-to-air missile installations.

MILITARY: In Washington, D.C., U.S. Army Chief of Staff general Eric K. Shinseki rejects proposed changes to the prevailing U.S. Army class A uniform, which has been in vogue since the late 1950s.

April

MILITARY: Throughout the United States, Operation Noble Eagle commences as National Guard and Army Reserve forces are mobilized and deployed at various sensitive areas and border regions to thwart possible terrorist attacks. This month 1.4 million soldiers have been called to the colors to keep the nation safe.

April 1

AVIATION: Over Iraq, a Patriot missile successfully shoots down an Iraqi Scud missile fired at American forces. This is also the first Patriot success outside of Kuwait.

MILITARY: A quick raid on the hospital at Nasiriya, Iraq, by Special Forces frees Private First Class Jessica Lynch, who had been wounded and captured when the 507th Maintenance Company was ambushed. A sweep of the hospital ground also uncovers the bodies of seven soldiers killed earlier.

NAVAL: The raid on the hospital at Nasiriya, Iraq, is assisted by Navy SEALs and Marine reconnaissance units.

April 2

AVIATION: Over Kuwait, a Patriot missile battery inadvertently locks onto a Navy F/A-18 Hornet jet fighter of VFA-195 (*Kitty Hawk*), killing the pilot. Apparently, a software error caused the radar to misidentify the aircraft as an incoming missile. Lieutenant Nathan White dies in consequence.

- Over Iraq, B-52s drop CBU-105 cluster bombs on Iraqi tank units. These are armor-piercing, sensor-fused weapons and deadly to massed tank formations.

MILITARY: In the latest friendly fire incident, three soldiers of the 1st Battalion, 39th Field Artillery are killed when an F-15C fighter bomber mistakes their MLRS missile launcher for a Soviet-designed Iraqi vehicle and directs a laser-guided GBU-12 to bomb to it.

April 3

MILITARY: The 1st Brigade, 3rd Infantry Division, rumbles through the Karaba Gap, seizes the Yasin al Khudayr bridge over the Euphrates River, and captures Saddam International Airport. Simultaneously, the 101st Airborne Division and the 2nd Brigade, 82nd Airborne Division, engage Iraqi irregular forces that have emerged in the 3rd Infantry Division's wake.

April 4

MILITARY: Men from the 1st Brigade, 3rd Infantry Division, attack and destroy members of the Special Republican Guards occupying Saddam International Airport. A 12-hour battle ensues during which the Americans lose one dead and eight wounded while enemy losses are estimated at 250.

- In the course of heavy fighting around Saddam International Airport, Sergeant First Class Paul R. Smith, Company B, 11th Engineer Battalion, is killed while manning a .50-caliber machine gun. However, he stopped several Republican Guard attacks while American wounded were being evacuated, and he is the only soldier from Operation Iraqi Freedom to be recommended for the Medal of Honor.

April 5

AVIATION: Off the California coast, the guided-missile destroyer *Stethem* launches the first Tactical Tomahawk, the navy's newest version of this potent weapon system.

MILITARY: The 3rd Infantry Division dispatches two battalions on a quick raid into downtown Baghdad, before withdrawing them to the west to join the 1st Brigade. Meanwhile, Central Command (CENTCOM) announces that 6,500 Iraqi prisoners are currently in their hands.

April 6

MILITARY: Near Ibril, northern Iraq, artillery attached to the 173rd Airborne Brigade silences Iraqi artillery positions in a short but deadly duel.

- On a plateau between Ibril and Makhmur, northern Iraq, a force of 31 Special Forces, reinforced by Kurdish guerrillas, repel attacks by Iraqi infantry and armor with Javelin missiles. Unfortunately, an errant bomb dropped by naval aircraft kills 19 Kurdish fighters and wounds 40.

April 7

AVIATION: Acting on a tip that Iraqi dictator Saddam Hussein and his two sons are lodged in a building in the Mansur district of Baghdad, Iraq, a B-1B Lancer from the 34th Bomb Squadron drops four GBU-31 satellite-guided joint direct attack munitions (JDAM) on the premises, destroying it. Hussein is not there but the attack kills several senior Iraqi leaders.

- A C-130 Hercules brings the first army troops into Baghdad International Airport under the cover of darkness.

MILITARY: In a ferocious fight, the 2nd Brigade, 3rd Infantry Division advances into the heart of central Baghdad and crushes all resistance from the Republican Guards along Highway 8. Four Americans die and 30 are wounded in exchange for an estimated 600 Iraqis killed. The Republican Palace, the actual seat of Saddam Hussein's regime, is also captured and occupied.

April 8

AVIATION: Iraqi ground fire brings down an A-10 Thunderbolt II over Baghdad, although the pilot escapes capture and is secured by coalition forces near the airport. However, a surface-to-air missile destroys an F-15E Strike Eagle, killing both crewmen.

MILITARY: The balance of the 3rd Division consolidates its grip on Baghdad, Iraq, by occupying the west bank of the Tigris River. The Iraqis subsequently attack these positions in a variety of trucks, tanks, and buses, but they are repelled by the Americans, backed by U.S. Air Force close air support, losing several hundred men. Two journalists also die when an M1A1 Abrams tank alerted that there are Iraqis firing from the Palestine Hotel, opens fire.

April 9

MILITARY: As marines advance into Baghdad, Iraq, and link up with elements of the 3rd Division, the city is considered fully occupied. Jubilant Iraqis also tear down a massive statue of Saddam Hussein. The image is broadcast around the world.

April 10

MILITARY: As organized Iraqi resistance collapses, American Special Forces and Kurdish fighters occupy the northern city of Kirkuk. They are soon joined by the 173rd Airborne Brigade, which secures several gas-oil separation plants and oil wells. The 82nd and 101st Airborne Division continue with mop-up operations around Samawah and Karbala, respectively.

April 11

AVIATION: At Peterson Air Force Base, Colorado, the army activates the 1st Space Brigade, the army's first-ever space unit.

- Over Iraq, a B-52 resorts to a Litening II advanced airborne targeting and navigation pod to strike Iraqi facilities at an airfield.

MILITARY: Army and marine forces begin active patrols to discourage widespread looting in Baghdad and Kirkuk, Iraq. Meanwhile, Special Forces teams arrange a truce between themselves and the Iraqi V Corps near Mosul, while an Iraqi colonel surrenders the border crossing at Highways 10 and 11 near Syria. An active hunt for weapons caches in the area ensues, which turns up several tons of ballistic missiles and heavy weapons.

NAVAL: At Naval Amphibious Base Little Creek, Virginia, the amphibious dock landing ship *Portland* is the first vessel to return from active duty during Operation Iraqi Freedom.

April 12

MILITARY: American efforts to restore law and order are thwarted by an epidemic of looting in Baghdad, Kirkuk, and Mosul, Iraq. General Amir Saadi is also captured, becoming the highest-ranking Iraqi captured, while the 3rd Infantry Division skirmishes with various militia groups.

April 13

MILITARY: Near Samarra, Iraq, several American captives have been released by the Iraqis and are found walking along a road until discovered by marines combing the area. They include the two Apache crewmen shot down on March 23.

April 14

MILITARY: CENTCOM leader General Tommy Franks declares that all organized resistance has ended in Iraq and that all major towns and cities are under coalition control. Army troops are occupied with searching for weapons of mass destruction while engineers begin the task of rebuilding the country's shattered infrastructure. As a bonus, Special Forces and 3rd Infantry Division soldiers capture Mohammed Abas (Abu Abbas) who had masterminded the highjacking of the Italian liner *Achille Lauro* and murdered American citizen Leon Klinghoffer.

- A rather tardy 4th Infantry Division under Major General Raymond T. Odierno crosses into Iraq from assembly areas in Kuwait. It subsequently forms the core of Task Force Iron Horse in concert with other armored units.

April 16

AVIATION: At Baghdad International Airport, Iraq, a P-3 Orion patrol plane of VP-46 is the first navy aircraft to land there. It is carrying the commander, U.S. Naval Forces Central Command, Vice Admiral Timothy Keating.

DIPLOMACY: In Washington, D.C., President George W. Bush calls upon the UN Security Council to end all sanctions imposed against Iraq.

MILITARY: General Tommy Franks, the senior American ground commander, enters Baghdad for the first time.

April 19

MILITARY: The 4th Division, advancing northward, encounters pockets of resistance from Iraqi paramilitaries between Taji and Samara; they destroy eight armed trucks and seize 30 prisoners. An unmanned surveillance drone also captures television images of fedayeen guerrillas loading ammunition stores onto trucks.

- In Baghdad, Iraq, soldiers from the 3rd Infantry Division uncover a stash of \$656 million in U.S. \$100 bills. The neighborhood in question is home to many high-ranking Iraqi officials.

April 20

MILITARY: With the Iraqi missile threat to Israel over, troops of the 5th battalion, 7th Air Defense Artillery begin rotating back to bases in Hanau, Germany.

April 22

NAVAL: In Hawaii, the guided-missile frigate *Crommelin* reports to home base after a six-month cruise during which it seized six tons of narcotics worth \$183 million, and also rescued 157 Ecuadorians from their sinking vessel and transported them home.

April 25

MILITARY: In Washington, D.C., Leslie Brownlee becomes acting secretary of the army to replace outgoing Thomas White, who has enjoyed stormy relations with Secretary of Defense Donald Rumsfeld.

April 30

NAVAL: On Puerto Rico, the navy transfers all its property on the eastern end of Vieques Island to the Department of the Interior, which intends to develop it into a wildlife refuge.

May

AVIATION: The air force declares its intention to lease 100 Boeing KC-767 tankers to replace its aging fleet of KC-135s.

May 1

AVIATION: Operation Northern Watch, begun as a no-fly zone over northern Iraq on January 1, 1997, ends.

NAVAL: President George W. Bush lands onboard the deck of the carrier *Abraham Lincoln* off the California coast and announces an end to all offensive military operations in Iraq. "Mission accomplished!" he declares to loud applause.

May 4

MILITARY: In the wake of tornadoes and flooding in Missouri, Kansas, Tennessee, and Alabama, National Guard troops are called into action to assist in disaster relief efforts.

May 6

NAVAL: At Bremerton, Washington, the carrier *Abraham Lincoln* returns to port after 10 months at sea, a record deployment for a nuclear-powered carrier. During this period the vessel and its aircrews participated in Operation Southern Watch, Enduring Freedom, and Iraqi Freedom—then capped efforts off by briefly hosting the commander in chief.

May 7

MILITARY: In Washington, D.C., Air Force Secretary James G. Roche is nominated to serve as the new secretary of the army.

May 13

MILITARY: The army makes public an incident along the Demilitarized Zone (DMS), South Korea, when a laser was flashed at pilots of a pair of AH-64 Apache helicopters on patrol. Military intelligence suggests that the device was Chinese in origin and specifically designed to injure human eyesight.

May 14

MILITARY: Redeployment of the 3rd Infantry Division is halted in the face of continuing unrest and violence throughout Baghdad, Iraq. Security of the city is the responsibility of the 1st Armored Division under Major General Ricardo S. Sanchez, but the 3rd Infantry will now assist with that task.

May 15

MILITARY: In northern Iraq, Operation Planet X is executed by the 1st Brigade, 4th Infantry Division, against a village 11 miles south of Tikrit. They seize 260 suspected Baath Party members along with General Mahdi Adil Abdallah, one of the coalition's most wanted.

June 1

MILITARY: Iranians seize four soldiers of the 1092nd Engineer Battalion as they cruised along the Shatt al Arab waterway separating Iran from Iraq. The men were blindfolded and interrogated, then released the following day.

June 3

MILITARY: In Baghdad, Iraq, army engineers begin searching a large bomb crater for any trace of Saddam Hussein's remains.

June 9–13

MILITARY: In Balad, Iraq, Operation Peninsula Strike unfolds as Task Force Iron Horse, including the 3rd Brigade, 4th Infantry Division, the 173rd Airborne Brigade, and the 3rd Squadron, 7th Cavalry (3rd Infantry Division), execute raids to seize any remaining Baath Party members. On the final day of operations, the 3rd Squadron engages a force of armed Iraqis, killing 20 in a one-sided firefight.

June 14

MILITARY: In Baghdad, Iraq, Major General Ricardo S. Sanchez, commanding the 1st Armored Division, gains promotion to lieutenant general in charge of V Corps. He also succeeds General Tommy Franks as head of the Multi-National Force–Iraq.

June 16

MILITARY: In Baghdad, Iraq, Brigadier General Martin E. Dempsey is appointed the new commander of the 1st Armored Division.

Thirty-foot tall bronze sculptures of former Iraqi dictator Saddam Hussein rest on the grounds of the Republican Palace, in the International Zone located in Central Baghdad, Iraq. The sculptures once capped the towers of the palace but have since been removed, following the overthrow of the Saddam Hussein regime. (*Department of Defense*)

June 18

MILITARY: North of Baghdad, Iraq, soldiers of the 4th Infantry Division raid two farmhouses and uncover \$8.5 million in U.S. dollars and \$400 million in Iraqi dinars. They also take into custody 20 men, including several of Saddam's personal body guard, and seize weapons and another \$1 million in jewelry.

June 29–July 7

MILITARY: In light of continuing insurgent attacks against American convoys on Highways 1 and 2 north of Baghdad, Operation Sidewinder is undertaken by the 4th Division to apprehend the transgressors. When the operation concludes, a total of 282 prisoners have been secured along with many weapons and tons of ammunition.

July 7

MILITARY: In Baghdad, Iraq, General Tommy Franks is replaced as CENTCOM commander by General John P. Abizaid, former deputy head of Combined Forces Command.

July 9

TERRORISM: The U.S. Court of Appeals upholds the president's right to designate American citizens captured in combat as "enemy combatants," and subject them to indefinite confinement without legal representation.

Sanchez, Ricardo (1951–)

Army general

Ricardo Sanchez was born at Fort Myer, Florida, in 1951 and raised in Rio Grande City, Texas, a son of Hispanic parents. He enrolled in the Reserve Officer Training Corps (ROTC) while attending the University of Texas–Kingsville, and he was commissioned a second lieutenant in 1973. While in school Sanchez was named a Distinguished Military Graduate, an honor reserved for the top 10 percent of all ROTC graduates. He initially served as a platoon leader in the elite 82nd Airborne Division although in 1977 he transferred to the armor branch. When Operation Desert Storm commenced in January 1991, Sanchez commanded the 197th Infantry Brigade (Mechanized), which assisted in the capture of the Iraqi port of Basra. Soon afterward he advanced to colonel in charge of the 2nd Brigade, 1st Infantry Division. Sanchez left field operations to accept a position within the U.S. Southern Command as deputy chief of staff and director of operations. He then rose to major general and accepted command of the elite 1st Armored Division as part of the V Corps in Germany. He served there for two years before assuming command of the entire V Corps. It was while acting at this post that he received the most daunting challenge of his career in June 2003: commander of the Multi-National Force–Iraq.

Iraq had been ruled by dictator Saddam Hussein, who quickly eliminated political or religious dissenters, whether they were Arab or Kurd, Shia or Sunni. After he was deposed following Operation Iraqi Freedom, these simmering resentments surfaced

General Ricardo Sanchez (U.S. Army)

in an intractable insurgency aimed at occupying forces and each other. The Americans, previously greeted as liberators, now found themselves under increasing attack. As commander, it was Sanchez's responsibility to maintain order and orchestrate reconstruction efforts, a task made doubly difficult by his strained relations with L. Paul Bremer, head of the Coalition Provisional Authority. Worse, news of American misconduct toward Iraqi prisoners held at the Abu Ghraib prison came to light and Sanchez, though he denied any culpability, was nonetheless in charge and held respon-

(continues)

(continued)

sible for it. The Americans scored some notable success against al-Qaeda operatives in Iraq, as well as capturing Saddam and killing his two sons, but Sanchez could not shake the stigma of Abu Ghraib. After relinquishing control to General George Casey in June 2004, he resumed commanding the V Corps in Germany, longer than any other incumbent, but he was denied his fourth star to full general. On September

6, 2006, he turned over the V Corps to a superior officer, rather than to a successor, and he ended a distinguished 33 years of military service by resigning. Sanchez presently resides in Texas. Sanchez afterward launched a personal campaign in which he lambasted the media for its “sensationalist tendencies.” In 2008 he also published his memoir, *Wiser In Battle: A Soldier's Story*, which excoriates President George W. Bush's policies and handling of affairs in Iraq.

July 12–17

MILITARY: In northern Iraq, Operation Soda Mountain is launched by the 4th Division, the 101st Infantry Division, and the 3rd Armored Cavalry to capture insurgents and their cadres. In 141 raids throughout the region, 600 prisoners are seized, including 62 former regime leaders, along with weapons and ammunition.

July 16

MILITARY: In Baghdad, Iraq, General John P. Abizaid declares that the Americans are now engaged in a guerrilla war with supporters of the previous regime, whose tactics and attacks are increasingly sophisticated. Fanatical Muslims fighting under the banner of al-Qaeda are also entering Iraq from abroad to commit acts of terrorism. In light of declining morale in the 3rd Infantry Division, the general also states that it will be rotating back to the United States by September.

July 22

MILITARY: Detachments from the 101st Airborne Division track down and kill Saddam Hussein's two brutal sons, Uday and Qusay, in Mosul, northern Iraq. They received an anonymous tip as to their whereabouts from the local populace.

August 3

MILITARY: In Washington, D.C., General Peter J. Schoomaker, previously commander of the U.S. Special Operations School, is appointed the new army chief of staff.

August 6

MILITARY: In Baghdad, Iraq, men of the 4th Infantry Division discover a large cache of rockets, mortar rounds, small arms, and ammunition.

August 18

MILITARY: At Fort Benning, Georgia, Specialist Liana Bombardier is the first woman to win the National Long-Range Rifle Championship in the century-old

history of the competition. She walks off with the prestigious Billy C. Atkins Trophy.

- In Baghdad, Iraq, men of the 2nd Brigade, 1st Armored Division, uncover a large weapons cache, including 20 pounds of C-4 plastic explosives, outside their lines.

August 22

MILITARY: The last elements of the 3rd Infantry Division return to Fort Stewart, Georgia, following a two-year deployment in the Middle East in the war against terrorism.

August 24

MILITARY: Near Missoula, Montana, men of the 82nd Field Artillery, 1st Cavalry Division, assist in the containment of a large wildfire.

August 26

MILITARY: In Khalis, Iraq, the 2nd Brigade, 4th Infantry Division under Colonel David Hogg commences Operation Ivy Needle to corral a gang of criminals who have been attacking coalition forces and Iraqi police; 24 members are rounded up.

August 29

AVIATION: The last of 14 Defense Satellite Communications System (DSCS III) satellites is placed in orbit, finishing a project that was begun in 1981.

August 31

MILITARY: At the Anniston Army Depot, Alabama, workers begin burning stocks of chemical weapons, especially the nerve agent Sarin, from 600 M55 rockets. This also marks the first time that the army has deactivated chemical weapons in a populated area.

September 10

MILITARY: At Guantánamo, Cuba, James Yee, a Muslim chaplain, is arrested and charged with espionage in connection with aiding Islamic terrorists in captivity and carrying classified information. Yee is a former West Point graduate. All charges against him are eventually dropped.

September 12

MILITARY: At Fort Stewart, Georgia, President George W. Bush awards a Presidential Unit Citation to the 3rd Infantry Division for its lengthy service in Iraq.

September 30

MILITARY: The headquarters of U.S. Army South transfers from Puerto Rico to Fort Sam Houston, Texas, where it also changes from a Major Army Command to a Major Subordinate Army Command within the U.S. Forces Command.

- In Bosnia-Herzegovina, a unit of 1,100 soldiers from the 34th Infantry Division, Minnesota National Guard, are deployed for service as part of NATO's Stabilization Force (SFOR). For the 34th Division, this is the largest single overseas deployment since World War II.

October 1

MILITARY: The army, responding to the new National Call to Service Act passed by Congress in 2002, initiates a pilot program allowing new recruits to sign on for only 15 months of active duty. They remain at liberty to enlist for the usual two, three, four, five, or six years.

**Abizaid, John P. (1951–)***Army general*

John Philip Abizaid was born in Coleville, California, on April 1, 1951, and he graduated from the U.S. Military Academy in 1973. He served as a second lieutenant in the 504th Parachute Infantry Regiment, rose to command a company, and distinguished himself during the U.S.-led invasion of Grenada in 1983. During the first Gulf War of 1991, Abizaid commanded a battalion in the 325th Airborne Regimental Combat Team stationed at Vicenza, Italy, and he subsequently served in northern Iraq while assisting the Kurds. Abizaid handled his affairs adroitly and commanded a brigade in the elite 82nd Airborne Division and also served as assistant commander of the 1st Armored Division in Bosnia-Herzegovina. In 1997 Abizaid returned to West Point as its 66th commandant, where he updated the curricula and clamped down on hazing abuses. He subsequently returned to Bosnia commanding the famous 1st Infantry Division,

parts of which deployed there as part of a UN-sponsored peacekeeping mission. At various times in his career, Abizaid studied at the Armed Forces Staff College, the U.S. Army War College, and he also received a master's degree in Middle Eastern studies from Harvard University. Abizaid is one of a handful of senior army officers to attain fluency in Arabic, having studied at the University of Jordan in Amman.

During the initial phases of Operation Iraqi Freedom in the spring of 2003, Abizaid served with the Deputy Command (Forward), Combined Forces Command, U.S. Central Command. On July 7, 2003, he gained promotion to full general and succeeded outgoing General Tommy Franks as commander of the Central Command. This command organization oversees the activities of 250,000 U.S. troops across a 27-nation arc stretching from the Horn of Africa, through the Arabian Peninsula, to South and Central Asia. It figures promi-

October 2

TERRORISM: David Kay, the chief U.S. weapons inspector, informs Congress that the Iraq Survey Group has yet to uncover demonstrable proof of weapons of mass destruction (WMD), be they biological, chemical, or nuclear.

October 2–5

MILITARY: The army's Total Personnel Command and the Reserve Personnel Command are joined as the new U.S. Army Human Resources Command; shortly afterward, the U.S. Army Civilian Human Resources Agency also is created.

October 31

MILITARY: A protracted insurgency rages in occupied Iraq, resulting in the deaths of 120 American personnel and 1,100 wounded by this date. The most insidious weapon used is the improvised explosive device (IED) placed alongside roadways and detonated when military columns pass by.

nently in military matters pertaining to the war on terror. No armchair general, Abizaid was a frequent visitor to Iraq and Afghanistan to help direct operations against Muslim extremists and terrorists operating in that region. For four years he helped to craft the strategy necessary to fight al-Qaeda in Iraq and the Taliban, based in Pakistan, with varying degrees of success. Like most senior American leaders, Abizaid was taken aback by the tenacity of the insurgents, who suffered heavy losses at the hands of coalition troops but were never quite eradicated. He expressed his unhappiness with the current affairs before the Senate Armed Services Committee in August 2006, and he admitted that civil war in Iraq seemed very likely. Concurrently, Abizaid also contended with a rising tide of Muslim piracy in the Persian Gulf and Red Sea regions, which further threatened to undermine regional security and stability. On December 20, 2006, Abizaid announced his retirement from Central Command. He was replaced by

General John Abizaid (U.S. Army)

Admiral William J. Fallon. He serves as a Fellow at the Hoover Institute at Stanford University, California.

November 2

AVIATION: Over Fallujah, Iraq, a shoulder-fired surface-to-air missile brings down an army CH-47 Chinook helicopter, killing 16 soldiers and injuring 26.

November 5

MILITARY: The army releases a new rotation plan to move troops stationed state-side and in Germany to Iraq and Afghanistan. These plans entail the services of 37,000 National Guard forces.

November 12

MILITARY: In Kuwait, the 3rd Brigade, 2nd Infantry Division arrives under the aegis of Colonel Michael E. Rounds. This is also the first organized Stryker brigade deployed abroad; in light of the Iraqi insurgency, many of the wheeled Strykers are equipped with slatted armor to protect them against rocket-propelled grenades.

November 15

AVIATION: Over Mosul, Iraq, a pair of UH-60 Black Hawk helicopters crash, killing 17 soldiers and injuring five. The reasons behind the accident are unexplained.

November 27

MILITARY: In Baghdad, Iraq, President George W. Bush makes a surprise Thanksgiving appearance at Baghdad International Airport, and he enjoys dinner with members of the 101st Airborne Division.

December 4

MILITARY: At Abu Gjurayb, Iraq, Operation Bulldog Mammoth unfolds as the 2nd Battalion, 70th Armor (4th Division), 1st Battalion, 325th Airborne Infantry (82nd Airborne Division) and the 70th Military Police Battalion raid apartment complexes northwest of Baghdad looking for terror suspects; 40 individuals are taken into custody along with numerous weapons.

December 6

MILITARY: In Philadelphia, Pennsylvania, the U.S. Military Academy football team completes its worst-ever season by losing to U.S. Navy 34-6, and ending the year 0-13.

December 8

MILITARY: In Ad Duluyiyah, Iraq, two soldiers from the 3rd Brigade, 2nd Infantry Division are killed when their Stryker vehicle accidentally rolls down an embankment and into a canal. While not combat-related, these are the 2nd Infantry Division's first fatalities.

December 13

MILITARY: Soldiers belonging to the 1st Brigade, 4th Division (Mechanized), commence Operation Red dawn by searching the village of Ad Dawr, southeast of Tikrit. They capture fugitive Iraqi president Saddam Hussein as he hides in his "spider hole."

December 15

AVIATION: In Washington, D.C., the Stephen F. Udar-Hazt Center is opened to the public by the National Air and Space Museum, Smithsonian Institution. Located near Dulles International Airport, it is destined to house 80 percent of the Smithsonian's aircraft collection.

December 17

MILITARY: At Camp Lemonier, Djibouti, Company B, 3rd Infantry, deploys as part of Combined Joint Task Force–Horn of Africa. This is the unit's first overseas hitch since the Vietnam War, and they are there to perform humanitarian aid work as well as to help defeat terrorist activities.

December 29

MILITARY: *Time* magazine votes "The American Soldier" as "Person of the Year." So far this year 450 Americans have been killed in combat operations in Iraq while 8,000 have been wounded in fighting a protracted Sunni-based insurgency.

2004

January

MILITARY: Army personnel rates are steady at 494,000 officers and men, although over 100,000 of these are deployed overseas. Iraq and Afghanistan remain the military's largest source of operations.

January 2

AVIATION: Near Fallujah, Iraq, ground fire downs an OH-58D Kiowa Warrior helicopter belonging to the 1st Battalion, 82nd Aviation Regiment. Captain and pilot Kimberly N. Hampton is the first female helicopter pilot to die in Operation Iraqi Freedom.

January 8

AVIATION: Over Fallujah, a medivac UH-60 Black Hawk helicopter of C Troop, 1st Squadron, 17th Cavalry goes down, apparently after being hit by a ground-launched missile; all nine occupants are killed.

January 12

MILITARY: The government announces a plan to provide Mauritania and Mali with \$100 million in military assistance. Within a month members of the 1st Battalion, 10th Special Forces, will deploy there as advisers.

January 15

MILITARY: Kenneth O. Preston becomes the army's 13th sergeant major of the army.

January 16

MILITARY: Negotiations between the United States and South Korea result in an agreement allowing the Americans to redeploy south of the Demilitarized Zone (DMZ) for the first time since 1953. Most army units will be concentrated outside of Seoul at Camp Humphreys.

January 19

MILITARY: At Fort Bragg, North Carolina, the 2nd Brigade, 82nd Airborne Division arrives home after a long tour of duty in Iraq.

January 28

MILITARY: In Washington, D.C. General Peter J. Shoolmaker explains the army's new organization plan to the House Armed Services Committee. Under this scheme, each of the 10 divisional headquarters will be retained but each division will now consist of four brigades, each with permanently assigned field artillery, signal, and engineering components.

January 29

MILITARY: In Gahzni, Afghanistan, seven soldiers die when a weapons cache accidentally explodes.

February

AVIATION: Over Edwards Air Force Base, California, an F/A-22 aircraft undergoes an icing test at altitude by being sprayed with water from a modified KC-135 tanker. This is the first aircraft employed for such testing.

February 1

MILITARY: In Würzburg, Germany, the first elements of the 1st Infantry Division begin departing for a tour in Iraq under Major General John R. S. Batiste. Most of the division's heavy equipment will remain behind as it will be utilizing armored hum-vees and small arms to combat the insurgency. These troops, in concert with the 2nd Brigade, 25th Infantry Division and the 30th Separate Heavy Brigade, will also form the core element of Task Force Iron Danger to replace Task Force Iron Horse.

February 6

MILITARY: In Washington, D.C., the Department of Defense creates a Korean Service Medal for all military personnel who served in Korea after the Korean conflict (1950–53).

February 12

MILITARY: At Fort Lewis, Washington, National Guard Specialist Ryan G. Anderson, Company A, 1st Battalion, 303rd Armor Regiment, is arrested for attempting to pass classified information to al-Qaeda.

- At Fallujah, Iraq, General John P. Abizaid comes under hostile rocket and small arms fire while visiting a civil defense post. Soldiers of the 82nd Airborne Division fire back, but no casualties are incurred.

February 14

AVIATION: At Elmendorf Air Force Base, Alaska, F-15 fighters and 150 ground support crews begin deploying to Gwalior Air Force Station, India, for training exercises with the Indian air force. This constitutes the first such joint venture between the two services in 40 years.

MILITARY: At Fort Campbell, Kentucky, the 101st Airborne Division under Major General David Petraeus rotates home after a lengthy tour of duty in Iraq; the division suffered 58 fatalities during Operation Iraqi Freedom.

February 16

MILITARY: At Fort Benning, Georgia, the prototype XM-8 rifle undergoes vigorous testing at the Infantry Center. The army is seeking a replacement for its M-16 rifle, which has seen steady service since the Vietnam War.

February 23

MILITARY: After 20 years in development and \$20 billion spent, General Peter J. Shoolmaker cancels the army's RAH-66 Comanche helicopter program, leaving the service to contend with existing AH-64 Apaches and OH-58D Kiowa Warriors.

February 26

MILITARY: In Washington, D.C., the War Department approves the Global War on Terrorism Expeditionary Medal for personnel deployed to Afghanistan or Iraq, and the Global War on Terrorism Service Medal for those who participated in any homeland security activities.

March 4

MILITARY: At Fort Stewart, Georgia, the 3rd Infantry Division returns after a lengthy tour of duty in Iraq. However, personnel are notified that they will be redeployed there commencing November 2004.

March 6

MILITARY: Near the Afghan-Pakistani border, nine Taliban fighters are killed after a group of 40 tries to overrun a Special Forces sniper outpost.

March 10

MILITARY: In Washington, D.C., James Roche, smarting over the fact that he has been kept waiting for Senate confirmation of his appointment as secretary of the army, withdraws his name from consideration.

March 10–23

MILITARY: In Athens, Greece, 400 Special Forces personnel participate in Operation Shield of Hercules to provide security during the 2004 Olympics there.

March 14

MILITARY: In northeastern Iraq, a patrol from the 4th Infantry Division exchanges fire with Iranian border guards; no casualties result.

March 26–April 10

MILITARY: At the National Training Center, Fort Urwin, California, the 2nd Brigade, 3rd Infantry Division becomes the first unit selected to be reorganized and tested under the new tactical structure. It is also slated for deployment in Iraq in the fall.

March 28

MILITARY: In Ghanzi, Afghanistan, men of the 10th Mountain Division uncover a cache of Taliban grenades, mines, and mortar rounds. Simultaneously, a detachment from the 3rd Battalion, 6th Field Artillery discovers 2,000 rifles and stores of ammunition while searching a house in Kandahar.

March 31

MILITARY: In Baghdad, Iraq, the advanced elements of the 1st Cavalry Division under Major General Peter W. Chiarelli arrive in Iraq to replace the 1st Armored Division. Meanwhile, the 1st Brigade, 1st Infantry Division, and the National Guard 81st Armored Brigade join the 1st Marine Expeditionary Force in a sweep against militant strongholds in Fallujah and Ramadi.

April 2

MILITARY: The army announces that its recruitment goals have been met for the previous year, despite the ongoing conflicts in Iraq and Afghanistan. Moreover, it is well on its way to meet the current year's goals as well.

April 4

MILITARY: In Baghdad, Iraq, men of the 1st Brigade, 1st Cavalry Division shoot it out with a large insurgent force in the downtown area; seven Americans die and 51 are injured. Enemy losses are unknown.

April 9

MILITARY: Two soldiers from the 724th Transportation Company are captured by Iraqi insurgents after an ambush; both are subsequently murdered in captivity.

- In Baghdad, Iraq, Specialist Michelle Witmer, 32nd Military Police Company (Wisconsin) is killed by an improvised explosive device; she is the first female National Guard soldier killed in army history and the first Wisconsin National Guard member to die since World War II.

April 15

MILITARY: An upsurge in violence throughout Iraq results in extended tours for 20,000 soldiers previously scheduled to be rotated home. All have their tours of duty extended by 90 days.

April 16

AVIATION: Near Kharbut, Iraq, two CH-47 Chinook helicopters crash in a sandstorm but the crew are rescued by MH-53Js. During the operation, the helicopters had to dodge surface-to-air missiles fired from below, along with blinding sand that reduced visibility to zero. The rescue crews win the Mackay Trophy.

April 22

MILITARY: At Fort Hood, Texas, the 4th Infantry Division (Mechanized) comes home after a tour of duty in Iraq; it lost 79 soldiers in combat operations.

Casey, George W. (1948–)

Army general

George William Casey, Jr., was born in Sendai, Japan, on July 22, 1948, during the U.S. occupation of that country. His father, George W. Casey, Sr., was a West Point graduate who rose to major general and died in Vietnam when his helicopter crashed in July 1970. Casey grew up in south Boston, Massachusetts, and enrolled in Reserve Officer Training Course (ROTC) while acquiring his bachelor's degree from Georgetown University. As a second lieutenant, he served the initial part of his career with the Mechanized Infantry, rising to brigadier general commanding the 3rd brigade of the 1st Cavalry Division. Casey subsequently served as the assistant division commander of the 1st Armored Division in Germany, and he deployed with his men in Bosnia-Herzegovina between July 1996 and August 1997 for peacekeeping duties. He rose to major general and assumed control of the 1st Armored Division in July 1999, performing

competently for the next two years. In July 2001 Casey transferred to the Pentagon to serve as director of strategic plans and policy with the Joint Chiefs of Staff. In January 2003 he joined the Joint Staff as its director, and he became the 30th vice chief of staff of the army in October 2003. He held that post until June 2004 when he received the challenging appointment to command the Multinational Force Iraq.

Casey replaced outgoing Lieutenant General Ricardo Sanchez in Baghdad and was compelled to grapple with the same problems as his predecessor. Warring ethnic and religious factions within Iraqi society were attacking each other while Sunni-based al-Qaeda terrorists attacked occupation troops and Shia-based terrorists, armed and agitated by Iran, were also active. Casey's sought to encourage Iraqis to shoulder increasing responsibility for their own security. To that end he focused on train-

April 29

MILITARY: In Washington, D.C., the National World War II Memorial opens at the National Mall. It was constructed at a cost of \$172 million and will be officially commemorated on May 29, during Memorial Day weekend.

June 7–16

AVIATION: In Alaska, over 9,000 airmen, sailors, marines, soldiers, and men of the coast Guard are mustered in to participate in Operation Northern Edge, that state's largest annual exercise.

June 23

AVIATION: At Cape Canaveral, a Delta II, three-stage launch vehicle places a replacement satellite for the Air Force Global Positioning System (GPS).

July 23

AVIATION: In the Caribbean, an HC-130 from the 38th Rescue Squadron airdrops two pararescue men who deploy a rubber boat and paddle to a Chinese fishing vessel to treat a crewman who had sustained a life-threatening chest injury.

ing the demoralized Iraqi military, and he kept U.S. forces in the background. He also publicly stated that the national elections of December 2005 held the potential to unify that nation and allow for an expedited withdrawal of American forces, but his expectations were dashed by increased sectarian violence. When President George W. Bush announced his plans for a troop "surge" to reinforce occupying forces in January 2007, Casey went on record opposing it, feeling that a heightened American visibility might actually fuel the insurgency. He was replaced as coalition commander on February 10, 2007, by General David H. Petraeus. Two days earlier, however, the Senate approved his appointment as the new chief of staff of the army in Washington, D.C., replacing General Peter Schoomaker. In September 2007, Casey raised political eyebrows again by stating that the concurrent deployments in Iraq and Afghanistan were wearing the army thin and taking a toll on military families, who were enduring 15-month tours of duty. As

General George Casey, Jr. (U.S. Army)

the army's top officer, he remains a blunt and outspoken advocate for that service and its members.

August 7–17

MARINES: Marines surround and attack supporters of Shiite leader Moktada al-Sadr in the holy city of Najaf, Iraq, killing nearly 600 fighters.

September 4–8

AVIATION: After a hurricane strikes Patrick Air Force Base, members of the 45th Space Wing response team begin surveying the damage.

September 14

AVIATION: During a Thunderbird exhibition at Mountain Home Air Force Base, Idaho, an F-16 suddenly bursts into flames and the pilot is forced to eject. None of the 60,000 spectators below are hurt.

September 15

AVIATION: In Washington, D.C., ground-breaking ceremonies are held for the site of the Air Force Memorial. It is located near the Potomac River, directly across from the Pentagon.

November 7–18

MILITARY: Army troops numbering upward of 15,000 surround the Sunni stronghold of Fallujah, Iraq, and attack, systematically killing 1,600 Muslim terrorists at a cost of 38 dead and 275 wounded. This action breaks the back of the armed insurgency in this region.

December 3

AVIATION: Over Edwards Air Force Base, California, the Airborne Laser (ABL) aircraft flies for the first time with an integrated battle management and Beam Control/Fire Control (BC/FC) systems in place. This aircraft is designed to shoot down missiles while they are still in the launch phase.

December 12

AVIATION: At Edwards Air Force Base, California, the Airborne Laser (ABL) team announces a successful series of tests with its high-energy beam weapon.

2005

January 1

NAVAL: The carrier *Abraham Lincoln* and its escort vessel arrive off Aceh Province, Indonesia, devastated by a tidal wave, to support humanitarian efforts. Onboard helicopters begin rushing medicine and supplies ashore.

January 3–8

AVIATION: In Sri Lanka, A C-17 Globemaster III aircraft delivers a pair of HH-60G Pave Hawk helicopters to facilitate rescue efforts following a destructive tsunami there. Concurrently, C-130s fly in from Japan to bring 145 tons of relief supplies.

January 12

MILITARY: The United States formally concludes its search for weapons of mass destruction (WMD) in Iraq, one of the main reasons for the American invasion there; none are ever found.

January 14

MILITARY: A court-martial at Fort Hood finds U.S. Army Reserve Specialist Charles Graner guilty of abusing Iraqi captives at Abu Ghraib prison and he draws a 10-years sentence of imprisonment along with a dishonorable discharge.

January 20

MILITARY: In Washington, D.C., George W. Bush is sworn in to serve a second term as president of the United States and commander in chief.

January 26

MARINES: A helicopter crashes near the border of Jordan in a sandstorm, killing 30 marines.

February 3–7

DIPLOMACY: Secretary of State Condoleezza Rice arrives in Europe to mend relations damaged by the recent war in Iraq, with additional stops in Turkey and Israel.

February 14

MILITARY: A test of the National Missile Defense (NMD) is unsuccessful when an intercepting rocket fails to hit its target due to software deficiencies.

March 25

DIPLOMACY: President George W. Bush announces that his administration will sell highly advanced General Dynamics F-16 fighters to Pakistan, a valuable ally in the war against terror.

April 28

MILITARY: In Fort Bragg, North Carolina, a military jury sentences U.S. Army sergeant Hasan Akbar, a Muslim American, to death for the murder of two fellow soldiers at Camp Pennsylvania, Kuwait, in March 2003.

May 12

AVIATION: At Langley Air Force Base, Virginia, the first operational F-22A Raptor is delivered to the 27th Fighter Squadron, 1st Fighter Wing. This aircraft remains the most advanced fighter plane in the world, incorporating such novel technologies as stealth and “super cruise.”

May 13

AVIATION: Over Charleston Air Force Base, South Carolina, a massed formation of C-17 Globemaster IIIs flies to Biggs Army Air Field, Texas. This is also the largest C-17 formation to ever fly cross-country.

MILITARY: The Pentagon releases a list of 33 bases it sought to close as a cost-cutting measure, although members of Congress resist any base closings in their peculiar state or district.

June 16

AVIATION: The Thunderbirds aerobatic team announces that Captain Nicole Malachowski is joining as the first female demonstration pilot of any U.S. military high-performance jet team.

June 22

AVIATION: Over Southwest Asia a U-2 aircraft from the 9th Reconnaissance Squadron experiences a catastrophic failure and crashes, killing the pilot.

June 28

MILITARY: An army helicopter attempting to rescue a stranded party of Navy SEALs in Afghanistan is shot down and crashes, killing all 19 service members onboard.

**Murphy, Michael P. (1976–2005)***Naval officer*

Michael Patrick Murphy was born in Smithtown, New York, on May 7, 1976, the son of a district attorney. He graduated from Pennsylvania State University in 1988 with degrees in political science and psychology and was considering law school, but he opted to attend SEAL (Sea/Air/Land) monitoring classes at the United States Merchant Marine Academy. SEALs are a small and highly elite force of combat specialists capable of deploying behind enemy lines by submarine, small boat, or parachute. Murphy proved himself adept in military matters so, in September 2000, he accepted a slot with the U.S. Navy Officer Candidate School at Pensacola, Florida. That December he received his ensign's commission and transferred to the Basic Underwater Demolition/SEAL school at Coronado, California, from which he graduated in January 2001. Murphy continued his quest to become an elite soldier by attending the Army Jump

School, the SEAL Qualification Training and SEAL Delivery Vehicle (SDV) school. Murphy survived this rigorous routine and earned his Trident as a Navy SEAL in July 2002. That fall he reported for duty at Pearl Harbor, Hawaii, and he saw routine tours of duty in Jordan, Qatar, and Djibouti as part of forces assigned to wage the war against terrorism.

In spring 2005 Murphy arrived in Afghanistan as assistant officer in charge of ALFA Platoon. He was here to support Operation Enduring Freedom, the ongoing campaign to rid that country of al-Qaeda and Taliban terrorists. The effort had been ongoing since the fall of the Taliban regime in the fall of 2001, and it proved frustratingly difficult because of the rough terrain of Afghanistan and relative porous borders of Pakistan, both of which afforded the terrorists ample cover. In June 2005 Murphy participated in Operation Red Wing, which

July 13

TERRORISM: U.S. Air Force general Randall Schmidt appears before the Senate Armed Services Committee and testifies that terrorist suspects (“detainees”) at Guantánamo, Cuba, are being held under safe and humane conditions.

July 29

AVIATION: In Rwanda, U.S. Air Force transports convey 1,200 soldiers to Sudan on a UN peacekeeping mission.

August 23–29

AVIATION: Hurricane Katrina causes massive damage along the Gulf of Mexico, and many air force bases in the region are evacuated in advance.

September 2

AVIATION: In Washington, D.C., General T. Michael Moseley gains appointment as chief of staff, U.S. Air Force.

was intended to locate and eliminate a noted Taliban leader called Ahmad Shah. His four-man reconnaissance team was helicoptered into the rugged mountains of Kunar Province, near Asadabad, along the Pakistani border to find their quarry. However, while performing their mission, they were discovered by hostile local tribesmen, who alerted nearby Taliban units of their presence. Murphy and his three men deployed in a rough section of terrain and engaged a force estimated at between 100 and 200 men for several hours, while calling for reinforcements. When it was discovered that their cell phone would not operate properly from behind cover, Murphy assumed a more exposed position and eventually contacted the relief team. However, he and three SEALs were mortally wounded in the firefight and several days passed before the lone survivor, Leading Petty Officer Marcus Luttrell, could be rescued. For heroically sacrificing himself to save his team, Murphy became the first

Navy SEALs in Afghanistan while participating in Operation Red Wing, June 28, 2005. Murphy is to the far right. (U.S. Navy)

American soldier to receive a Medal of Honor in Afghanistan. On May 7, 2008, Secretary of the Navy Donald C. Winter announced that an *Arleigh Burke*-class destroyer, DDG-112, would also be christened the *USS Michael Murphy* in his memory.

September 10

AVIATION: An all-female crew flies the first C-130 combat mission over Southwest Asia.

September 24

AVIATION: In the wake of Hurricane Rita, the Civil Air Patrol begins assessing damage in the Houston, Texas, area while flying new GA-8 Airvan aircraft.

October 1–7

MILITARY: A force of 1,000 U.S. Army troops commences Operation “Iron Fist” to attack and root out Iraqi terrorists in the town of Sadah, near the Syrian border, killing 50.

October 15–18

AVIATION: At Langley Air Force Base, Virginia, the 27th Fighter Squadron flies its F-22A Raptors to Hill Air Force Base, Utah, as part of Operation Combat Hammer. There they drop their first JDAMs on a target range.

October 16

MILITARY: An attack by U.S. forces on Iraqi insurgents handling artillery shells kills 20 guerrillas.

November 5

AVIATION: At Randolph Air Force Base, Texas, the first operational TH-1H Huey training helicopters are delivered.

November–January 2006

AVIATION: Air force C-130s support military exercises at Camp Lemonier, Africa, as part of the Combined Joint Task Force–Horn of Africa.

2006

January 8

MARINES: The *New York Times* reports that 80 percent of marines killed by torso wounds in Iraq might have been saved had they been equipped with proper body armor.

January 14

AVIATION: At the San Antonio Monster Jam, Texas, the air force enters a monster truck called *Afterburner* in a car-smashing contest; it loses to an equally huge competitor named *Grave Digger*.

January 15

AVIATION: A U.S. air strike in the Bajaur tribal region of northwest Pakistan, targeted at Ayman al-Zawahiri, the al-Qaeda second in command, kills several terrorists along with 18 civilians.

January 19

TERRORISM: Terrorist Osama bin Laden releases a video tape declaring his intention to attack the United States soon, but he also makes the offer of a truce.

January 29

AVIATION: An all-Iraqi air force crew flies a C-130E while carrying Minister of the Interior Bayan Jabr to a summit in Tunisia. This is one of three C-130s operated by the 23rd Transport Squadron, based at Tallil Air Base, which is jointly staffed by American personnel.

MILITARY: ABC reporter Bob Woodruff and cameraman Dick Vogel are injured when their vehicle is struck by a roadside bomb in northwest Baghdad.

February 3

AVIATION: At Al Kasik Training Station, Iraq, Captain LeeAnn Roberts becomes the first female instructor performing firearms instruction for Iraqi trainees.

February 8

AVIATION: At Hickham Air Force Base, Hawaii, the first C-17 Globemaster III deploys as part of the first operational C-17 unit based in that state.

February 22–25

AVIATION: Off Okinawa, Japan, four F-15s from the 18th Fighter Wing simultaneously target and fire at aerial decoys during a three-day aerial exercise there.

March 16

MILITARY: U.S. forces attack Iraqi insurgents near Samarra, utilizing the largest air strike employed since the beginning of the war.

March 22

AVIATION: At Davis Monthan Force Base, Arizona, A-10 Thunderbolt IIs arrive for their annual ground support exercise, "Hawgsmove 2006."

May 29

JOURNALISM: CBS reporters Paul Douglas and James Broman are killed by a roadside bomb in Baghdad while reporter Kimberly Dozier is badly injured.

June

AVIATION: Former astronaut Susan J. Helms gains promotion to brigadier general and takes command of the 45th Space Wing.

June 7

AVIATION: U.S. Special Forces direct an air strike by two air force F-16s that kills terrorist ring leader Abu Musab al-Zarqawi at his hiding place near Baqubah, Iraq. This removes a senior al-Qaeda figure from the fighting. He had earned the ire of senior leaders by his willingness to kill civilians, and they may have betrayed his location to the Americans.

June 16

POLITICS: By wide margins, the Senate and House reject calls for an Iraq timetable for withdrawing American forces.

June 19

MILITARY: Three soldiers are accused of murdering three Iraqi detainees and also of threatening a fourth soldier if he confessed to investigators.

July 3

MILITARY: The U.S. Army accuses former soldier Steven D. Green, previously dismissed for a "personality disorder," with the rape and murder of an Iraqi girl and her family in March 2006.

July 31

MILITARY: The United States formally transfers military control of Afghanistan to NATO, which is now responsible for fighting off Taliban extremists and local drug lords.

September 1

MILITARY: The Pentagon announces the successful test of the Missile Defense System; in this instance, an interceptor rocket shot from California destroys a target missile heading in from Alaska.

September 3

MILITARY: U.S. forces capture Hamid Juma Faris, a senior al-Qaeda operative, in Iraq. He is best known for orchestrating the deadly attack against the Shiite Askariya Shrine last February.

September 6

TERRORISM: President George W. Bush announces that 14 high-level terrorists have been transferred from abroad to detention pens at Guantánamo Bay, Cuba. He awaits congressional authorization to conduct military tribunals.

September 8

TERRORISM: A car bomb explodes outside the U.S. embassy in Kabul, Afghanistan, killing 16 people, including five Americans.

October 3

MILITARY: Eight American soldiers die in Iraq today, victims of roadside bombs.

October 17

TERRORISM: In Washington, D.C., President George W. Bush signs legislation under which rules for interrogating and prosecuting terrorists are differentiated from those that apply to criminals.

November 8

POLITICS: In Washington, D.C., Secretary of Defense Donald Rumsfeld resigns from office in the wake of unfavorable midterm elections for the Republicans. He is succeeded by former CIA director Robert Gates.

November 17

MILITARY: In Washington, D.C., General John Abizaid of the U.S. Central Command (CENTCOM) testifies before the Senate Armed Services Committee. He argues for an increase in American troop strength in Iraq and against a timetable for an American withdrawal.

November 25

MILITARY: North of Baghdad, Iraq, American troops, backed by Iraqi security forces, kill 22 insurgents.

December 6

MILITARY: In Washington, D.C., Robert M. Gates is confirmed by the U.S. Senate on a 95–2 vote to serve as the new Secretary of Defense. He had previously testified that, while the United States is not winning the struggle in Iraq, neither is it losing and he urges patience.

December 21

MARINES: The government accuses four marines of committing atrocities against civilians at Haditha, Iraq; they are to face court-martials for murder.

December 31

MILITARY: The government announces that the death toll for U.S. forces in Iraq has reached 3,000; the number of dead Iraqi civilians killed at the hands of numerous insurgent groups ranges from 30,000 to a high of 650,000.

2007

January 7

AVIATION: An air force AC-130H Spectre gunship attacks a suspected al-Qaeda training camp in Somalia.

January 10

MILITARY: In Washington, D.C., President George W. Bush announces the impending dispatch of 20,000 additional troops to Iraq in the hopes that this “surge” will lead to lessened outbreaks of violence there. Democrats who control Congress cannot muster sufficient votes to oppose him.

January 12

POLITICS: In Washington, D.C. Secretary of State Condoleezza Rice announces that President George W. Bush has authorized attacks on known Iranian agents operating in Iraq and training terrorists teams there.

January 18

AVIATION: The U.S. government announces that the Chinese have recently destroyed an old weather satellite with a new antisatellite weapon.

January 20

AVIATION: Over northern Baghdad, Iraq, a UH-60 Black Hawk helicopter crashes, possibly from insurgent fire; all 13 passengers are killed.

January 23

POLITICS: During his annual State of the Union address, President George W. Bush reiterates his plan to dispatch 20,000 additional troops to Iraq, confident that this “surge” will bring ongoing violence there to a halt.

January 24

AVIATION: Air force gunships conduct a second round of strikes against suspected al-Qaeda terrorist training camps in Somalia.

January 27

MILITARY: In Washington, D.C., the U.S. Senate unanimously approves Lieutenant General David H. Petraeus to serve as the new top commander of occupation forces in Iraq. He replaces General George W. Casey, Jr.

January 28

TERRORISM: Near Najaf, Iraq, U.S. troops and Iraqi ground forces battle a group of Sunni insurgents who are bent on attacking and killing Shiite religious pilgrims celebrating the festival of Ashura; an estimated 250 terrorists are slain.

February 6

MILITARY: In Washington, D.C., Secretary of Defense Robert M. Gates declares that the United States is establishing a new Africa Command by 2008. Presently, responsibility for that continent is shared by three other commands.

February 7

AVIATION: Near Baghdad, Iraq, a Marine Corps helicopter crashes, apparently after taking ground fire.

February 10

MILITARY: In Iraq, Lieutenant General David H. Petraeus replaces Lieutenant General George W. Casey, Jr., as head of coalition occupation forces.

February 11

MILITARY: In Baghdad, military authorities display evidence of Iranian involvement in terrorist activities throughout Iraq. They also state that recent raids by American forces in Baghdad have netted six members of the elite Iranian Revolutionary Guards. These have long been suspected of aiding and abetting unrest among the sizable Shiite population.

March 2

MILITARY: In Washington, D.C., Secretary of Defense Robert M. Gates relieves U.S. Army secretary Francis J. Harvey over allegations of poor conditions at Walter Reed Army Medical Center. General Kevin Kiley also loses his job as Army Surgeon General.

March 16

MILITARY: General John P. Abizaid is replaced by Admiral William J. Fallon as head of the U.S. Central Command (CENTCOM).

March 26

MILITARY: Four generals are rebuked by Pentagon officials for their role in covering up the friendly fire death of former football hero Pat Tillman in Afghanistan.

April 10

MILITARY: In Washington, D.C., General George W. Casey, Jr., is sworn in as the new chief of staff of the army.

April 11

MILITARY: In Washington, D.C., Secretary of Defense Robert M. Gates announces that military tours in Iraq and Afghanistan will be extended three months to a total of 15 months.

May 13

MILITARY: In Helmand Province, Afghanistan, U.S., NATO, and Afghan security forces kill Mullah Dadullah. He is one of the highest-ranking Taliban leaders to die in combat.

May 15

MILITARY: In Washington, D.C., President George W. Bush nominates Lieutenant General Douglas Lute to serve as “war czar” for coordinating military matters in Iraq and Afghanistan.

May 23

MARINES: The Japanese government agrees to pay the United States \$6 billion to relocate 6,000 marines from Okinawa to the island of Guam; the Americans will also contribute \$4 billion to the project.

May 24

MILITARY: In Washington, D.C., the Democratic-controlled Congress yields to the Republican administration of President George W. Bush by approving billions of dollars for the war there without attaching a timetable for withdrawal. Antiwar groups responsible for the Democratic victory cry foul and bemoan the decision.

June 15

MILITARY: In Washington, D.C., the Department of Defense announces that the 28,500-man “surge” in Iraq is now complete, boosting American strength in that country to 160,000 men and women.

September 3

DIPLOMACY: In Baghdad, Iraq, President George W. Bush makes a surprise visit to confer with Prime Minister Nouri al-Maliki and Sunni tribal leaders who wish to join coalition forces in the fight against insurgents.

September 11

MILITARY: In Washington, D.C., Lieutenant General David H. Petraeus testifies before a joint committee in Congress that the military “surge” of late has greatly reduced violence levels in Iraq.

Petraeus, David H. (1952–)

Army general

David Howell Petraeus was born in Cornwall-on-Hudson, New York, and he graduated from the U.S. Military Academy in 1974 with the top 5 percent of his class. His first assignment was with the 509th Airborne Battalion Combat Team in Vicenza, Italy, and he became closely identified with light infantry. Petraeus proved himself an adept officer, and, in 1981, he became aide-de-camp to the commanding general of the 24th Infantry Division (Mechanized). He also continued his education by attending the Command and General Staff College in 1983, graduating top in his class, and also received a doctorate in International Relations from Princeton University in 1987. In 1993 he served as the assistant chief of staff with the elite 101st Airborne Division, and he participated in several peacekeeping and nation-building ventures in Haiti and Bosnia during that decade. Petraeus commanded the 101st Airborne Division during Operation Iraqi Freedom, which overcame stiff enemy resistance and occupied the city of Mosul. He was successful at both counterinsurgency warfare and civic relations to isolate the insurgents from the greater population. In February 2004, Petraeus accompanied his men back to the United States and, the following June, he was promoted to lieutenant general commanding the Multi-National Security Transition Command Iraq.

Back in Iraq, Petraeus was tasked with rebuilding that nation's shattered military and security apparatus. His methodical methods made considerable progress, but at too slow a rate for many in Congress,

General David Petraeus (Department of Defense)

who wanted to withdraw from Iraq. To this end he testified before Congress several times and urged patience with the delicate task he was orchestrating. On January 27, 2007, Petraeus became a full general and replaced General George C. Casey as head of the Multi-National Force-Iraq. He employed an additional 20,000 soldiers sent to Iraq by President George W. Bush as a military "surge." Petraeus also placed greater responsibilities on the Iraqis for their own security while also securing tribal alliances against the al-Qaeda terror network. The results were spectacular

(continues)

(continued)

and terrorist violence declined nearly 80 percent from the previous year. However, Petraeus was under no illusions. He insisted that more work needed to be done before the Americans could withdraw. On September 16, 2008, he handed his responsibilities over to General Raymond T. Odierno and returned home. The following month, he accepted command of

the U.S. Central Command, headquartered in Tampa, Florida, where he is tasked with directing military operations in 20 nations stretching from Egypt to Pakistan, as well as the ongoing Operations Enduring Free in Afghanistan and Iraqi Freedom in Iraq. In the words of Secretary of Defense Robert Gates, "He is the preeminent soldier-scholar-statesman of our generation and precisely the man we need in this command at this time."

November

MILITARY: By mid-month, American combat fatalities in Afghanistan exceed 100, the highest annual total since the conflict began in October 2001.

November 6

MILITARY: The recent loss of six Americans makes 2007 the deadliest year for fighting in Iraq, bringing the total number of dead to 852.

November 18

TERRORISM: In Iraq, the monthly U.S. combat fatalities drop to 37, down from a high of 126 in May 2007. Thanks to the recent troop surge, the level of terrorist attacks against American troops has declined to its lowest level since January 2006.

November 24

MILITARY: In Diyala Province, Iraq, a brigade of 5,000 American soldiers is withdrawn and sent home, leaving overall troop strength at 157,000.

December 10

MILITARY: U.S., NATO, and Afghan forces recapture the Taliban stronghold of Musa Qala in Helmand Province. This town is one of the main poppy-growing regions in southern Afghanistan, and a major source of income from the drug trade.

December 29

MILITARY: In Iraq, Lieutenant General David H. Petraeus reports that car bombings and other terrorist attacks have fallen by 60 percent since the start of the military "surge" in June 2007. This translates into 899 killed, which, ironically, also makes this the deadliest year for American forces. Petraeus nonetheless considers al-Qaeda the greatest menace facing Iraqi stability and reconciliation.

December 31

MILITARY: The Associated Press reports that 100 American soldiers have died in Afghanistan this year, the highest number since Operation Enduring Freedom

began in October 2001. The war has also claimed an estimated 4,500 militants and 925 Afghan police.

2008

January 8

MILITARY: In Diyala Province, Iraq, U.S. and Iraqi forces conduct Operation Iron Harvest, which is aimed at eliminating final pockets of guerrillas from the region.

January 15

MARINES: In Washington, D.C., the Defense Department announces a one-time deployment of 3,200 marines to Afghanistan to help thwart any possibility of a spring offensive by the Taliban. This temporarily raises the total number of American troops there to 30,000; they are assisted by an additional 28,000 NATO troops.

January 29

AVIATION: A missile strike launched by an unmanned Predator drone kills wanted terrorist leader Abu Laith al-Libi in northwestern Pakistan.

February 20

AVIATION: It is announced that a U.S. missile successfully destroys a falling spy satellite in order to destroy its fuel tank before it might contaminate parts of the Earth.

March 19

POLITICS: In Washington, D.C., President George W. Bush marks the fifth anniversary of Operation Iraqi Freedom by reiterating that the war was correct and that it will continue until absolute victory is attained. To date American losses are over 4,000 dead and 29,600 wounded.

March 23

MILITARY: In Baghdad, Iraq, an improvised explosive device (IED) kills four U.S. soldiers, raising the total number of war-related fatalities to 4,000.

April 6

MILITARY: In Afghanistan, a team under Captain Kyle Walton from the 3rd Battalion, 3rd Special Forces Group engages 200 dug-in Taliban militants in the Shok Valley, a violent encounter that results in 10 Silver Stars being awarded.

April 8–9

POLITICS: In Washington, D.C., General David H. Petraeus testifies before Congress that significant progress continues to be made at reducing violence levels in Iraq but that success remains fragile. He therefore recommends that after the troop presence drops to its pre-surge level of 140,000 men, all future withdrawals be suspended for an additional 45 days.

May

MILITARY: In Iraq, American troop deaths are reported at 19, the lowest level since the war commenced in March 2003.

June

MILITARY: The Associated Press reports that 45 coalition troops, including 27 Americans, were killed in Afghanistan; this is the highest one month total since

Operation Enduring Freedom began in October 2001. This number also outstrips the number of troops killed in Iraq, which totals 31, including 29 Americans.

June 5

AVIATION: In a major shake-up, Secretary of Defense Robert Gates dismisses Secretary of the Air Force Michael W. Wynne and Air Force Chief of Staff T. Michael Moseley. They are relieved due to an August 2007 incident during which a B-52 bomber had accidentally flown with six nuclear-tipped cruise missiles from Minot Air Force Base, North Dakota, to Barksdale Air Force Base, Louisiana.

June 10

MILITARY: In Afghanistan, U.S. forces engage in a fight with Taliban militants just astride the Pakistani border. This is followed by an airstrike in that border region, which the Pakistani government claims killed 11 paramilitary soldiers.

Odierno, Raymond T. (1954–)

Army general

Raymond T. Odierno was raised in Rockaway, New Jersey, and he graduated from the U.S. Military Academy in June 1976. His first assignment was with the 41st Field Artillery and he became closely associated with that arm. In 1986 Odierno received a master's degree in nuclear effects engineering and, in 1990, he also successfully completed the staff course at the Naval War College. For many years thereafter Odierno held various ranks with the Seventh Army in Germany, and, between 1997 and 1998, he served as chief of staff to the V Corps. The following year he accompanied the 1st Armored Division to Albania as part of Operation Allied Force, and, in 1999, he relocated to the Pentagon for work in the Office of the Deputy Chief of Staff for Operations and Plans. In October 1991 he was made commanding officer of the 4th Infantry Division, (Mechanized) and, in this post, he was assigned to fight in Operation

Iraqi Freedom. His division was supposed to operate from Turkey and invade northern Iraq, but when the Turkish government refused, the force was shipped through the Suez Canal and entered Iraq from Kuwait. Consequently, Odierno saw no combat in the conquest of Iraq, but he received one of the toughest postwar occupations by being assigned to the so-called Sunni Triangle around Tikrit and Mosul.

The 4th Division dealt with its share of attacks while stationed in the north, but Odierno's tough and methodical approach to suppressing insurgents paid dividends when his men captured fugitive dictator Saddam Hussein in his hometown of Tikrit in December 2003. He was next reassigned to serve as special assistant to the vice chief of staff, U.S. Army, in Washington, D.C., in August 2004, and he also acted as military adviser to Secretary of State Condoleezza Rice until May 2006. In December of

June 12

POLITICS: In Washington, D.C., a ruling by the U.S. Supreme Court invalidates the Military Commissions Act of 2006, thereby allowing detainees kept at Guantánamo Bay, Cuba, to challenge their detention in federal court.

July

MILITARY: In Iraq, the monthly death toll of American troops falls to 13, the lowest since Operation Iraqi Freedom commenced in March 2003.

July 6

AVIATION: In Nangahar Province, Afghanistan, an American air strike kills several Taliban militants. However, Afghan government officials complain that 47 civilians at a nearby wedding party also died.

that year he returned to Iraq commanding the III Corps and, the following spring, he joined his superior, General David H. Petraeus, in cultivating the “Sunni awakening,” which turned many tribes and former insurgents against the fanatical al-Qaeda terrorists. This effort, in concert with the military “surge” of five additional combat brigades, greatly reduced levels of violence in heretofore unstable Anwar Province, and the trend continued throughout the countryside. Odierno left Iraq a second time in February 2008 to command the III Corps at Fort Hood Texas, but he returned that September and replaced Petraeus as commander, Multi-National Force–Iraq. He remains tasked with sustaining recent gains in security while preparing to reduce and ultimately end the coalition presence in that nation. To this end, he is continuing his predecessor’s policy of not only aggressively acting against insurgents, but also training and encouraging Iraqi military and police to look after their own matters. Odierno also works to protect the local population

General Raymond Odierno (U.S. Army)

from harm, and he encourages self-rule. Despite his success, Odierno cautions that Iran remains a destabilizing factor, a nation requiring constant monitoring.

July 13

MILITARY: A remote American outpost in southeast Afghanistan, along Pakistan's lawless border, is attacked by an estimated 200 Taliban fighters. The attack is repulsed but nine Americans are killed in the fighting.

August 22

AVIATION: In northern Iraq, an army UH-60 Black Hawk helicopter crashes, killing all 14 soldiers onboard; the accident is ascribed to mechanical failure.

- In western Herat Province, Afghanistan, an American air strike on the village of Azizabad kills several Taliban militants. However, Afghan government officials claim that 90 civilians also died in the attack.

August 25

DIPLOMACY: In Baghdad, Iraq, Prime Minister Nouri al-Maliki calls for the complete withdrawal of all occupation forces by 2011. Apparently, this deadline was reached in advance with American authorities.

September 1

MILITARY: In Anbar Province, Iraq, U.S. military authorities turn over control to the Iraqi military. This area was formerly a center of the Sunni insurgency, but the so-called Sunni awakening induced many tribes and former insurgents to take up arms against al-Qaeda terrorists.

September 16

MILITARY: In Iraq, Lieutenant General David H. Petraeus turns command of the Multi-National Force–Iraq over General Raymond T. Odierno.

October 5

MILITARY: In Mosul, Iraq, a raid by American troops acting on a tip from the locals leads to the death of Abu Qaswarah, a Moroccan who was also the second most important al-Qaeda leader; four other militants are also killed.

October 31

MILITARY: Lieutenant General David H. Petraeus is promoted to full general and placed in charge of the U.S. Central Command, Tampa, Florida. From here he will direct all military actions relative to Iraq, Afghanistan, and the Middle East.

November 14

MILITARY: In Washington, D.C., Major General Ann E. Dunwoody receives her fourth star to become the first American woman promoted to full general. She will command the U.S. Army Materiel Command.

December 20

MILITARY: The Associated Press reports that, since Operation Iraqi Freedom began in March 2003, 4,209 members of the U.S. military had been killed in combat. Of coalition forces, Britain has lost, 176; Italy, 33; Ukraine, 18; Poland, 21; Bulgaria, 13; Spain, 11, Denmark, seven; El Salvador, five; Latvia and Georgia, three apiece; Estonia, Netherlands, Thailand and Romania, two each; and Austria, Hungary, Kazakhstan and South Korea, one each.

December 29

AVIATION: A Marine Corps AV-8B Harrier jump jet crashes near Havelock, North Carolina, killing the pilot.

Dunwoody, Ann E. (1953–)

Army General

Ann E. Dunwoody was born at Fort Belvoir, Virginia, in 1953, the daughter of a career army officer. She comes from a family long active in the military, commencing with her great-grandfather, Brigadier General Henry C. Dunwoody, who graduated from West Point in 1862 and served in the Civil War and Spanish-American conflict. Her father and brother are also West Point graduates with distinguished combat records from World War II and Vietnam. Dunwoody attended the State University of New York College at Cortland, and, after graduating in 1975 with a degree in physical education, she commissioned into the Women's Army Corps as a second lieutenant. She subsequently held leadership positions in various maintenance companies and service battalions, at Fort Sill, Oklahoma, Fort Drum, New York, and Fort Bragg, North Carolina. Dunwoody proved herself to be a conscientious officer and she received staff assignments with the 82nd Airborne Division, which she accompanied to Saudi Arabia during Operations Desert Shield/Storm in 1990–91. During Operation Enduring Freedom in the fall of 2001, Dunwoody commanded the 1st Corps Support Command that was responsible for deploying logistics in Uzbekistan to support operations in neighboring Afghanistan. In the course of her career she has received numerous decorations, including the Distinguished Service Medal and the Defense Superior Service Medal.

Dunwoody's litany of firsts include the first female officer to command a battalion in the 82nd Airborne Division, Fort

Ann Dunwoody during the ceremony promoting her to a general, the first four-star female officer in the U.S. military. (*Department of Defense*)

Bragg's first female general officer in 2000, and the first female to command the Combined Arms Support Command at Fort Lee, Virginia, in 2004. In 2005 Dunwoody became the first woman general to achieve three-star rank since Lieutenant General Claudia Kennedy in 2000. At the time she served as the army's top-ranking woman leader and deputy chief of staff for logistics. On June 23, 2008, Dunwoody made American military history by becoming the first female officer nominated for four-star, full general rank. The Senate confirmed her promotion on November 13, 2008, and she received her fourth star at Fort Belvoir on November 14, 2008. The ceremony was

(continues)

(continued)

widely attended by ranking military figures, including Army Chief of Staff George W. Casey and Secretary of Defense Robert Gates. In an emotional speech to those gathered, Dunwoody modestly attributed her success to her father, an army brigadier general, who always taught her to set personal objectives, then never quit and never accept defeat. About her husband

of 19 years, retired U.S. Air Force colonel Craig Brotchie, she noted, "There is no one more surprised than I—except of course, my husband. You know what they say, 'Behind every successful woman there is an astonished man.'" As a full general, Dunwoody now leads the Army Materiel Command, numbering 130,000 service members at 150 locations around the world, which is tasked with equipping and arming American soldiers for battle.

2009

January 1

AVIATION: A missile launched from a U.S. Predator drone kills two senior al-Qaeda leaders, Usama al-Kini and Sheikh Salim Swedan at an undisclosed location.

MILITARY: The U.S. Army formally turns over the Green Zone in Baghdad, Iraq, to the Iraqi military as the United States makes another incremental step to restore that nation's sovereignty.

January 9

MILITARY: The U.S. Army Experience Center at Franklin Mills, Philadelphia, Pennsylvania, has so far recruited 33 full-time soldiers and five reservists. This is a \$12 million high-tech, arcade game-style recruiting center that uses state-of-the-art video games to lure in prospective recruits and, to date, its performance approximates those of traditional recruiting centers.

January 13

MILITARY: A military court charges Sergeant Joseph P. Mayo, 18th Infantry Regiment, with killing four Iraqi prisoners in the spring of 2007, then dumping their bodies in a canal. He is one of seven soldiers implicated in their deaths.

January 20

MILITARY: In Washington, D.C., Barack Obama is sworn in as the nation's 44th president and commander in chief. He previously pledged to change the focus of the war on terrorism by shifting thousands of troops from Iraq to Afghanistan.

January 23

AVIATION: At least five missiles fired in two U.S. Predator drone attacks kill 14 Taliban militants in North and South Waziristan, Pakistan. These are the first such attacks since President Barack Obama took office and he signaled that they will continue.

January 26

AVIATION: Two U.S. Army OH-58D Kiowa helicopters belonging to the 10th Mountain Division collide near Kirkuk, Iraq, killing all four crewmen. An investigation is launched to determine the cause.

January 29

MILITARY: The Pentagon recalls 16,000 sets of U.S. Army body armor out of concerns for wearers under combat conditions. Apparently the equipment was not properly tested for stopping bullets and other projectiles.

February 11

MILITARY: The U.S. Army Corps of Engineers has been put to work scouring Long Beach Island, New Jersey, for live munitions discarded there during World War I. It is feared that the ordnance, previously dumped overboard by naval vessels, then pumped ashore as part of a beach replenishment program, might pose a hazard to vacationers.

NAVAL: The guided missile cruiser *Vella Gulf* apprehends seven suspected pirates in the Gulf of Aden after a passing merchant ship sends out a distress signal that they were attempting to board it.

February 14

AVIATION: Two missiles by a U.S. Predator drone near the town of Makeen, South Waziristan, Pakistan, kills an estimated 30 Taliban militants.

February 16

AVIATION: Missiles fired by U.S. Predator drones kill an estimated 30 Taliban militants in the Kurram Valley, Pakistan.

February 27

AVIATION: The Army determines that hostile gunfire near Kirkuk, Iraq, caused the crash to two Army OH-58D Kiowa helicopters, which apparently collided while dodging the attack.

March 1

AVIATION: Missiles fired from U.S. Predator drones kill seven Taliban militants in Saraogha village, South Waziristan, Pakistan.

March 3

MARINES: Lance Corporal Patrick Malone is accidentally shot and killed by Corporal Mathew Nelson during a "confidence game" in Anbar Province, Afghanistan. The latter is arrested and charged with involuntary manslaughter.

March 8

NAVAL: The Naval survey ship *Impeccable*, dangling a sono buoy as part of a routine intelligence gathering mission, is harassed by several small Chinese vessels 75 miles off the South China coast. At one point, crew members of the *Impeccable* turned a water hose on a Chinese vessel passing with 25 feet of it.

March 12

AVIATION: Missiles fired from a U.S. Predator drone kill an estimated 24 Taliban militants in Berju, Kurram Agency, Pakistan.

March 15

AVIATION: Missiles fired from U.S. Predator drones kill four Taliban operatives at Jani Khel, North-West Frontier Province, Pakistan.

March 20

NAVAL: In the Persian Gulf, the 24,000-ton amphibious ship *New Orleans* collides with the nuclear submarine *Hartford* near the Straits of Hormuz, sustaining a ruptured fuel and ballast tank.

March 25

AVIATION: Over Edwards Air Force Base, California, an ultra-modern F-22A Raptor jet fighter crashes, killing the pilot.

- Missiles fired from a U.S. Predator drone kill seven Taliban militants riding in two vehicles near Makin, South Waziristan, Pakistan.

March 26

AVIATION: A missile fired from a U.S. Predator drone kills four Taliban militants in Essokhel, North Waziristan, Pakistan.

March 31

NAVAL: The privately-owned U.S. Naval Institute announces the existence of a Chinese “kill weapon” specifically designed to sink U.S. Navy carriers at a range of 1,240 miles. A Navy spokesman, while acknowledging the Chinese device, states that it can be defeated in flight by existing Aegis missile defense systems.

April 1

AVIATION: A missile strike by a U.S. Predator drone kills 14 Taliban militants in the Orakzai tribal area, Pakistan.

April 4

AVIATION: A missile launched from a U.S. Predator drone kills 13 suspected Taliban in North Waziristan, Pakistan.

April 8

AVIATION: A missile launched from a U.S. Predator drone kills four Taliban militants in a vehicle in Gangi Khel, South Waziristan, Pakistan.

April 9

NAVAL: Off Somalia, the destroyer *Bainbridge* responds to the hijacking of the freighter *Masersk Alabama* by positioning itself nearby. The latter’s captain, Richard Phillips, is being held hostage in a lifeboat by four Somali pirates.

April 12

NAVAL: On the destroyer *Bainbridge*, Snipers from SEAL Team Six shoot and kill three of four Somali pirates holding Captain Richard Phillips in a lifeboat, freeing him. A fourth pirate is taken into custody.

April 16

MILITARY: An Army court in Vilseck, Germany, sentences Sergeant John Haley to life imprisonment for the murder of four Iraqi civilians in 2007.

April 19

AVIATION: A missile launched from a U.S. Predator drone kills three suspected Taliban militants in South Waziristan, Pakistan.

April 20

MILITARY: In Iraq, 500 men of the 4th Engineer Battalion, who specialize in clearing roads of explosives, begin packing their equipment for a tour of duty in

Afghanistan. They are part of the 17,000 additional combat troops ordered there by President Barack Obama.

April 23

AVIATION: The U.S. Army begins testing its Autonomous Rotocraft Sniper System (ARSS), which is a remote-controlled Vigilante robot armed with a self-stabilizing turret and a 338-caliber high velocity gun.

April 25

NAVAL: In North Charleston, South Carolina, the new guided-missile destroyer *Truxtun* is commissioned at the Charleston Naval Weapons Station.

April 27

MILITARY: Word surfaces that the U.S. Army is researching a unique “Double Laser” system, literally a beam within a beam, that can destroy roadside bombs and explosive-laden vehicles at a distance.

April 29

AVIATION: A missile launched from a U.S. Predator drone kills six Taliban militants in Kanni Garam village, South Waziristan, Pakistan.

May 2

AVIATION: In Canberra, Australia, Prime Minister Kevin Rudd announces that his government will purchase 100 Lockheed F-35 Lightning II Joint Strike Fighters as part of an overall military buildup.

May 4–5

MILITARY: A fire fight between U.S., Afghan security forces, and Taliban insurgents in Farah Province, Afghanistan, results in the death of 26 civilians. President Hamid Karzai begin pressuring the United States to modify its rules of engagement to cut down on civilian losses.

May 5

NAVAL: The new high-tech warship *Freedom* is revealed to the public by the U.S. Navy for the first time. This sophisticated vessel is manned by only 40 sailors, yet can engage larger enemy fleets at speeds of up to 45 miles per hour. This is the first of a new generation of warships and is expected to perform effectively in the fight against international piracy.

May 9

AVIATION: A missile launched by a U.S. Predator drone kills six Taliban militants in Saraogha, South Waziristan, Pakistan.

May 11

AVIATION: The Marine Corps announces that it is deploying at least one of its new MV-22 tilt rotor transport squadrons to combat operations in Afghanistan. This hybrid helicopter/aircraft transport lifts off vertically and flies horizontally while carrying 24 fully equipped combat troops.

May 12

AVIATION: A missile launched from a U.S. Predator drone kills eight Taliban militants in Sra Khawra village, South Waziristan, Pakistan.

May 16

AVIATION: Missiles fired from a U.S. Predator drone kills 25 Taliban militants in the village of Sarkai Naki, North Waziristan, Pakistan.

May 17

MILITARY: Defense Secretary Robert Gates, upon being interviewed on CBS News, declares that it will require U.S. forces another two to four years to make Afghan security forces capable of defending their own country.

May 20

AVIATION: A Navy HH-60 Seahawk helicopter crashes 13 miles off San Diego; all five passengers are missing and presumed dead.

May 21

MILITARY: A bomb explosion in the Dora district of Baghdad, Iraq, takes the lives of three U.S. Army soldiers.

- U.S. and Afghan security forces storm into the village of Marjah, Helmand Province, Afghanistan, killing 34 Taliban insurgents and seizing 16.5 tons of illegal drugs.

May 22

AVIATION: An Air Force T-38 Talon jet trainer crashes at Edwards Air Force Base, California, killing the pilot.

May 25

MILITARY: In Mosul, Iraq, a suicide bomber attacks an American military convoy, killing one U.S. Army soldier. However, military spokesman Major General David Perkins declares to journalists that terrorist attacks against military and civilian targets are down 60 percent from a year ago.

May 26

MILITARY: In Washington, D.C., Army chief of staff General George Casey declares that the United States has to be ready to remain in Iraq for at least 10 years for the situation to fully stabilize itself. This is despite a recent agreement with that government to withdraw all military forces no later than 2012.

May 27

NAVAL: The former transport *General Hoyt S. Vandenberg*, which was employed by the U.S. Air Force for many years to track missile and spacecraft, is sunk off Key West, Florida, to serve as an artificial reef. It settles into 140 feet of water minutes after scuttling charges were detonated.

May 28

MILITARY: Fighting in Paktia Province, Afghanistan, between U.S. troops and Taliban guerrillas results in the death of at least 34 insurgents.

May 29

MILITARY: U.S. forces combing through Zabul Province, Afghanistan, manage to engage and kill 35 Taliban operatives after an Afghan security patrol was ambushed.

June 1

MILITARY: The government reports that four U.S. Army troops have been killed in Wardak Province, Afghanistan, by two Taliban roadside bombs that struck separate vehicles a mile apart.

June 4

AVIATION: The Air Force announces that its new Counter-Electronics High-Powered Microwave Advanced Missile Project could revolutionize electronic warfare. This new weapon is a cruise missile that emits focused bursts of high power microwaves (HMP) capable of frying enemy electronic without harming their operators. A working prototype, costing \$40 million, is expected to be operational within five years or less.

June 6

AVIATION: The Air Force reveals that its top secret X-37B unmanned space plane is being stored in a housing facility at Cape Canaveral, Florida, in anticipation of a January 2010 launch. The five-ton craft is only 27 feet long and 15 feet across, yet capable of performing a variety of classified missions and experiments.

NAVAL: The U.S. Navy is dispatching Towed Pinger Locators to help recover the black box flight recorders of an Air France jetliner that crashed in the North Atlantic after taking off from Brazil. If salvaged, it is hoped the black boxes will reveal the cause of Airbus 330-200's crash.

June 7

MILITARY: U.S., coalition, and Afghan security forces operating in Zabul Province, Afghanistan, engage and kill 30 Taliban insurgents.

June 8

MARINES: A Force of 7,000 newly deployed Marines begins sweeping through Helmand Province, Afghanistan. The troops are from the 2nd Marine Expeditionary Brigade and are the first of 21,000 troops to be added by President Barack Obama.

June 11

NAVAL: In the South China Sea, a Chinese submarine collides with a towed sonar array attached to the destroyer *John S. McCain*. This is part of a pattern of increasing incidents between U.S. and Chinese naval forces in the region.

June 12

MILITARY: In Washington, D.C., General David Petraeus admits that Taliban-style attacks are at an all-time high in Afghanistan, which attributes to the new strategy of rooting out enemy sanctuaries and safe havens.

June 14

AVIATION: Missiles fired from a U.S. Predator drone kill five Taliban militants in a vehicle in South Waziristan, Pakistan.

June 15

MILITARY: Newly appointed General Stanley McChrystal assumes command of all anti-insurgent operations in Afghanistan. Given his background in special warfare, he is expected to take an unconventional but effective approach at suppressing Taliban operatives.

June 17

MILITARY: At the U.S. Central Command in Tampa, Florida, General David Petraeus informs French journalists that "tough fighting" can be expected in Afghanistan over the next months.

June 18

AVIATION: A suspected U.S. missile strike in northwest Pakistan kills eight people at the villages of Gharlamal and Nandaran; most were apparently Taliban guerrillas but at least two dozen villagers may have been injured.

MILITARY: Throughout Iraq, U.S. Army troops are being withdrawn from cities and urban areas in order for their replacement by Iraqi security forces. Presently, 90 of 138 military sites have been turned over to the Iraqis.

June 21

MILITARY: A Taliban missile attack upon Bagram air base, 25 miles northeast of Kabul, Afghanistan, results in the deaths of two U.S. Army troops from the 82nd Airborne Division.

June 22

AVIATION: The Air Force announces that it has developed a new bomb rack for the B-2 stealth bomber which enables it to carry advanced MOP (Massive Ordnance Penetrator) weighing 30,000 pounds.

- A train crash near Washington, D.C., takes the life of General David F. Wherley, Jr., who commanded the district National Guard from 2003 to 2008. During the terrorist attack of September 11, 2001, he headed the 113th Fighter Wing at Andrews Air Force base and sent jets aloft to protect the capital after the attack.

MILITARY: In Afghanistan, commander General Stanley McChrystal announces new restriction on U.S. and NATO forces in an attempt to cut down on civilian casualties. Henceforth, fighting and aerial attacks will not be allowed near Afghan homes and villages, regardless if Taliban troops are active there.

June 23

AVIATION: In Makeen, South Waziristan, Pakistan, a U.S. Predator drone launches several missiles at a Taliban funeral for fallen leader Niaz Wali, killing 45 guerrillas in attendance. Another missile strike in Neej Narai also kills eight suspected Taliban militants.

June 24

MILITARY: In southern Afghanistan, U.S., coalition, and Afghan security force report killing 23 Taliban militants, including Mullah Ismail.

June 25

MILITARY: Throughout Iraq, a new wave of terrorist bombings takes the lives of nine U.S. Army troops; they died in two roadside attacks in eastern Baghdad.

June 28

MILITARY: In Baghdad, Iraq, General Ray Odierno accuses Iran of interfering with events in Iraq by training Shiite insurgents and paying surrogates to advance their interests. Despite the provocation, he insisted "I am not authorized to do anything outside the borders of Iraq."

June 29

AVIATION: The Air Force test launches a Minuteman 3 ICBM from Vandenberg Air Force Base, California, to collect data and check the weapon system's reliability and accuracy. The dummy warhead fell on the test range near Kwajalein Atoll in the Marshall Islands.

June 30

AVIATION: It is reported at U.S. airstrikes in Khost province, along the Afghan-Pakistani border, have killed 12 Taliban militants hiding in a bunker complex.

MILITARY: A roadside bomb in Baghdad, Iraq, takes the lives of four U.S. Army troops just as coalition forces are preparing to evacuate Iraqi cities to their own security forces.

July 1

MARINES: A force of 4,000 Marines commence an offensive along the Lower Helmand River Valley, Afghanistan, in an attempt to root out Taliban forces lurking there. The assault is code named Operation Khanjar (Strike of the Sword) and is conducted in concert with 650 Afghan security personnel and police.

July 2

MILITARY: The U.S. Army begins testing tethered blimps as a means of detecting incoming enemy cruise missiles, which travel low under the control of terrain-guiding radars. This is part of the \$1.4 billion Joint Land Attack Cruise Missile Defense Elevated Netted Sensor System (JLENS) being developed by Raytheon.

MARINES: In southern Afghanistan, gunfire erupts as 4,000 Marines continue with Operation Khanjar in Helmand Province, Afghanistan. This is a major Taliban stronghold and the world's largest opium poppy-producing region. One Marine is reported killed in action.

July 3

AVIATION: A U.S. Predator drone launches missiles at Taliban training facilities in Pakistan, killing 17 people and wounding 27 others. The facility was operated by Baitullah Mehsud, who is wanted by the Pakistani government for the assassination of former prime minister Benazir Bhutto.

July 4

AVIATION: The Air Force announces that it is upgrading all F-22 Raptor jet fighters for ground attack missions. This comes as a result of modifying the onboard AN/APG-77 radar to allow it to see realistic photo images on the ground.

MILITARY: Taliban forces bombard a U.S. Army base in Paktia Province, Afghanistan, killing two soldiers.

July 6

MILITARY: Two roadside bombs detonated in Kunduz Province, Afghanistan, kill 6 U.S. Army troops in their vehicles.

July 7

AVIATION: A U.S. Predator drone strike against Taliban targets in the Makeen area of South Waziristan, Pakistan, killing 12 militants associated with the band of Baitullah Mehsud.

July 8

AVIATION: A U.S. Predator drone launches missiles at a Taliban target in South Waziristan, Pakistan, critically wounding noted leader Maulana Fazullah and killing 45 of his associates.

MARINES: In southern Afghanistan, Brigadier General Larry Nicholson declares that more Afghan police and security forces are needed in order to completely contain the Taliban insurgency.

MILITARY: In Nuristan, Farah Province, Afghanistan, a U.S. soldier is killed in a clash with Taliban militants.

July 9

MILITARY: Lieutenant General James Dubik, who spent several months training and equipping Iraqi security forces since June, 2007, states that their progress is mixed and so they may require additional help throughout the near-distant future. The Iraqi army has expanded from 444,000 to 566,000 but still lacks qualified, experienced officers at every level.

July 10

AVIATION: A U.S. airstrike in Ghazni Province, Afghanistan, results in the deaths of 22 Taliban insurgents.

July 12

MILITARY: Coalition forces attack a Taliban compound in Uruzgan Province, Afghanistan, killing 12 militants.

MARINES: Roadside bombs take the lives of four Marines in Helmand Province, Afghanistan, as a major offensive continues through the southern part of that nation.

July 13

MILITARY: In Baghdad, Iraq, a roadside bomb wounds seven U.S. Army troops and their Iraqi translator. This is the first major attack since American forces turned over urban centers to Iraqi security forces.

July 14

MARINES: As U.S., coalition, and Afghan security forces push through Helmand Province, Afghanistan, two Marines are killed by sporadic gunfire.

NAVAL: In the Black Sea region, the guided-missile destroyer *Stout* drops anchor off Batumi, Georgia, ahead of joint military exercises. These are the first held since the Russian invasion in Ossetia in 2008.

July 16

MILITARY: Defense Secretary Robert Gates visits Fort Drum, New York, for a question-and-answer session from personnel of the 10th Mountain Division stationed there. At the time he notes there is a good chance additional troops would be deployed in Afghanistan, and he might also call for an increase in the U.S. Army's manpower ceilings.

July 17

AVIATION: A missile launched by a U.S. Predator drone strikes the home of militant Abdul Majid and kills five Taliban militants in Garhiwam Bahadur Khel, North Waziristan, Pakistan.

- In Washington, D.C., Senators Carl Levin and John McCain argue for striking additional funding for the F-22 jet fighter; President Barack Obama has threatened to veto any defense appropriation bill containing more money than for the 187 aircraft requested.

MILITARY: Iraqi insurgents shell the Contingency Operating Base in Basra, Iraq, killing three U.S. Army soldiers.

July 18

AVIATION: An Air Force F-15E Strike Eagle inexplicably crashes in eastern Afghanistan, killing its two crew members. The cause of the crash remains speculative but enemy action is ruled out.

NAVAL: At Pascagoula, Mississippi, the Northrop Grumman company lays the keel of the first LHA-6 amphibious assault vessel, which is intended to replace vessels of the older *Tarawa* class.

MILITARY: In Afghanistan, the Taliban release a video of Private Bowe R. Bergdahl, 501st Parachute Infantry Regiment, whom they claim to have captured after he strayed from his base.

July 20

MILITARY: A roadside bomb explodes in eastern Afghanistan, killing four U.S. Army troops. This brings the total number of coalition deaths to 55, making July the deadliest month of the Afghan war thus far. At least 30 of these deaths have been American.

July 23

AVIATION: A missile launched from a U.S. Predator drone reportedly kills the son of Saudi terrorist Osama bin Laden at an undisclosed location in Pakistan.

July 24

MILITARY: In Washington, D.C., President Barack Obama awards Staff Sergeant Jared Monti, 10th Mountain Division a posthumous Medal of Honor. He was killed on June 21, 2008 near Gowardesh, Afghanistan, while attempting to rescue a fellow soldier.

- Two U.S. Army troops are killed by a roadside bomb in southern Afghanistan.

July 30

AVIATION: In a major policy shift, U.S. Predator drone attacks will be refocused from neutralizing Al-Qaeda targets in Pakistan to local Taliban efforts. The change is undertaken to help shore up the Pakistani regime in the face of a protracted radical insurgency.

July 31

MILITARY: A U.S. Army soldier is killed in fighting in southern Afghanistan during a firefight with Taliban insurgents. This brings the total number of American slain in July to 40, making it the deadliest month of the Afghan conflict.

August 1

MILITARY: In southern Kandahar Province, Afghanistan, roadside bombings take the lives of three U.S. Army troops.

August 2

NAVAL: In southern Iraq, the remains of Lieutenant Commander Michael "Scott" Speicher are found and identified. His F/A-18 Hornet jet was shot down on January 17, 1991, on the first night of the Persian Gulf War.

August 4

AVIATION: The Quinnipiac poll organization releases a national survey that found 61 percent of the American public support the dropping of atomic bombs on Hiroshima and Nagasaki in August 1945. Twenty-two percent said it was wrong and 16 percent were undecided.

August 5

AVIATION: A missile launched by a U.S. Predator drone strikes the home of wanted Taliban leader Baitullah Mehsud in South Waziristan, Pakistan, killing one of his two wives.

August 6

MARINES: A roadside bomb strikes a vehicle and kills four Marines in western Afghanistan. Casualties continue to rise as U.S. and coalition forces push deeper into Taliban territory.

August 7

AVIATION: A missile launched from a U.S. Predator drone kills Taliban leader Baitullah Mehsud as he laid on a rooftop in South Waziristan. Mehsud, who suffered from diabetes, was observed having his legs massaged—a clear indication of who it was—when the missile struck his father-in-law’s house.

August 8

AVIATION: The Canadian government announces that it has possibly found the wreckage of a U.S. Army OA-10A Catalina amphibian aircraft that crashed in the St. Lawrence River on November 2, 1942. The United States and Canada will work together to recover the wreckage and any human remains still extant.

MILITARY: President Barack Obama asks Congress to shift at least \$1 billion from next year’s defense budget to recruiting an additional 15,000 troops for the U.S. Army. This addition will raise the number of active duty personnel from 547,000 to 562,400.

August 10

AVIATION: The U.S. Air Force revives the concept of the Strategic Air Command (SAC), which was disbanded in 1992 following the collapse of the Soviet Union. The new organization is called the Global Strike Command.

- In Afghanistan, U.S. and coalition officials point to declining numbers of Afghan civilian casualties due to new restrictions and rules of engagement for dropping bombs on Taliban targets. Taliban militants routinely use civilians as “human shields” to evade bombing attacks, but the trade off in terms of better public relations is viewed as worth the sacrifice.

August 11

AVIATION: A missile launched from a U.S. Predator drone strikes a house used by Taliban militants in Kani Guram, South Waziristan, Pakistan, killing 14 people.

August 12

MARINES: The town of Dahaneh, Helmand Province, Afghanistan, is assaulted by 500 helicopter-borne of the 2nd Battalion, 3rd Marines backed by AV-8B Harrier jump jets. The Taliban in town resist fiercely, losing eight fighters in a stand-up firefight, then withdraw into the countryside.

August 13

MARINES: In southern Afghanistan, Marines continue assaulting Dahaneh, Afghanistan, securing it from resident Taliban units that refuse to abandon their strong point.

August 14

NAVAL: The remains of Lieutenant Commander Scott Speicher are laid to rest in Jacksonville, Florida, following his death 18 years earlier in the 1991 Gulf War.

August 17

MILITARY: General Ray Odierno expressed his desire to keep U.S. forces in contested areas of the country separating the Arabs and Kurds to the north. This represents a departure from an earlier security arrangement requiring American forces to leave all urban areas by June 30, but the general maintains this is a temporary “confidence-building” measure intending to enhance local security there.

MARINES: A roadside bomb kills a Marine in southern Afghanistan, bringing to 22 the number of Americans killed this month.

August 19

AVIATION: A U.S. Army UH-60 Black Hawk helicopter crashes on the slopes of 14,421-foot tall Mount Massive, Colorado, killing all four soldiers onboard.

MILITARY: The U.S. government reveals that the American death toll in Iraq stands at 4,332 since Operation Iraqi Freedom commenced in March 2003. Of this total, 3,465 were killed in hostile actions.

- A roadside bomb in Kabul, Afghanistan, takes the life of 59-year old First Sergeant Jose San Nicolas Crisostomo of Spanaway, Washington State. He is the oldest soldier to die in action there.

August 21

AVIATION: A missile launched from a U.S. Predator drone strikes a suspected Taliban hideout in Dande Darpa Khel, North Waziristan, Pakistan, killing 11 insurgents. This town is the stronghold of militant leader Sirajuddin Haqqani, who reputedly has close connections to the terrorist group Al-Qaeda.

MILITARY: In Iraq, four U.S. Army sergeants are charged with cruelty and maltreatment of their troops. They are identified as Enoch Chatman, Bob Clements, Jarett Taylor, and Daniel Weber of B Troop, 2nd Squadron, 13th Cavalry Regiment from Fort Bliss, Texas.

MARINES: Adrien E. Augustin, a 20-year old recruit from Kenton, Kentucky, collapses and dies during a fitness test at the Marine Corps Recruit Depot at Parris Island, South Carolina.

August 23

AVIATION: The Air Force test launches another Minuteman 3 ICBM from Vandenberg Air Force Base, California, which splashes down at a target range in the Kwajalein Atoll, 4,200 miles distant.

August 25

MILITARY: A bomb blast at Kandahar, southern Afghanistan, takes the lives of four U.S. Army soldiers.

August 27

AVIATION: A helicopter from the guided-missile cruiser *Chancellorsville* is fired on by Somali pirates in the Gulf of Aden.

- A missile launched by a U.S. Predator drone strikes a Taliban hideout operated by Waliur Rehman in Tapar Ghar, South Waziristan, Pakistan, killing six militants.

August 28

MILITARY: A roadside bomb kills a U.S. Army soldier in eastern Afghanistan, bringing the total number of Americans killed this month to 45. August is now the deadliest month of Operation Enduring Freedom, with a total of 732 dead American since the war began in October 2001.

August 31

MILITARY: Two separate bombing incidents in southern Afghanistan take the lives of two U.S. servicemen, bringing the monthly total to 47 dead Americans.

- In Kabul, General Stanley McChrystal, commanding all U.S. and coalition forces in Afghanistan, calls for a new strategy to defeat the Taliban, one which will include an increase in the number of U.S. forces there.

September 3

MILITARY: An improvised explosive device (IED) takes the life of two American servicemen in southern Afghanistan as they were on patrol.

September 4

MILITARY: The Pentagon announces that tours of the 82nd Airborne Division in Afghanistan will be extended from 12 to 14 months. This is being done to allow newly returning members of the 101st Airborne Division a full 12 months at home.

September 6

MILITARY: A bomb blast in southern Afghanistan takes the life of a U.S. serviceman.

September 7

AVIATION: A missile launched from a U.S. Predator drone strikes a Taliban compound in the village of Machi Khel, North Waziristan, Pakistan, killing five militants. It is suspected that al-Qaeda leaders Ilyas Kashmiri and Mustafa al Jaziri also died.

MILITARY: Soldiers from the 10th Mountain Division break into a hospital in Wardak Province, Afghanistan, searching for fleeing Taliban operatives. Afterwards, members of a Swedish charity who operated the facility accuse the Americans of violating Muslim customs by entering female wards.

September 8

MILITARY: A roadside bomb detonated in southern Baghdad, Iraq, strikes a U.S. Army patrol, killing one soldier. Three more subsequently die in a similar attack in northern Iraq. This brings the total number of American dead since March 2003 to 4,343.

- Defense officials declare that a U.S. Army patrol caught up in a “complex attack” in Afghanistan loses four soldiers dead.

September 9

MARINES: Defense Secretary Gates condemns as “appalling” a decision by the Associated Press (AP) to release photographs of a mortally wounded Marine lance corporal Joshua M. Bernard, who died of his wounds following an April 14 ambush in Helmand Province, Afghanistan.

September 11

MILITARY: Senate Armed Services Chairman Senator Carl Levin advised President Barack Obama to refrain from sending additional U.S. troops to Afghanistan

until more Afghan security forces have been trained and deployed. He also added that additional equipment can be shifted there from Iraq as the military commitment winds down.

MARINES: A court-martial sentences Corporal Mathew Nelson to eight years in prison, demotion to private, and a bad-conduct discharge for the death of Lane Corporal Patrick Malone during a hazing incident in Anbar Province, Iraq, on March 3, 2009.

September 12

MILITARY: Two roadside bombings in Afghanistan take the lives of five U.S. Army troops.

September 13

AVIATION: Airstrikes by U.S. and coalition warplanes kill several dozen Taliban militants in the Bala Baluk district of Farah Province, Afghanistan.

MILITARY: Taliban forces ambush a U.S. Army patrol in Farah Province, Afghanistan, killing three Americans and seven Afghan troops. Air power is called in with deadly results to the attackers.

September 14

AVIATION: A missile launched from a U.S. Predator drone strikes a car in the town of Mir Ali, North Waziristan, Pakistan, killing four Taliban militants.

- A Muslim terrorist opens fire at an American military helicopter near Tal Abta, Iraq, and is killed after the helicopter fired back.

September 15

MILITARY: Admiral Mike Mullen, chairman of the Joint Chiefs of Staff (JCS), goes on record today as favoring the immediate deployment of additional combat forces to Afghanistan.

September 16

MILITARY: President Barack Obama, feeling pressure from Democrat Party liberals not to send additional forces into Afghanistan, declares that there is “no immediate decision pending.”

- The U.S. military closes its largest detention camp at Bucca in Iraq, having released or transferred several thousand detainees to Iraqi control. The camp was christened after Ronald Bucca, a former Green Beret and New York City fire marshal who died in the September 11, 2001 attack on the World Trade Center.

September 17

AVIATION: A missile fired by a U.S. Predator drone kills two dangerous al-Qaeda leaders in Pakistan. One, Najmiddin Kamolitdinovich Jalolov, was from Uzbekistan and apparent head of the ultra violent Islamic Jihad Union.

September 20

AVIATION: An Army UH-60 Black Hawk helicopter crashes near Balad Air Base, Iraq, killing a U.S. service member and injuring 12 others.

MILITARY: Fighting and a roadside bombing in southern Afghanistan takes the lives of the three American servicemen.

September 21

MILITARY: General Stanley McChrystal, commander of all U.S. forces in Afghanistan, submits a 66-page report to President Barack Obama, outlining the case for

sending additional troops there. He warns the commander in chief that underresourcing the war effort could lose that country to an ongoing Taliban insurgency.

MARINES: Sergeant David Budwah is charged by Marine Corps officials with faking war injuries for personal gain. The 34-year old native of Springhill, Louisiana, is to face a court-martial for claiming to have served in Afghanistan, when he actually spent all his time on Okinawa.

September 24

AVIATION: A missile launched from a U.S. Predator drone kills 12 Taliban militants in the village of Dande Darpa Khel, North Waziristan, Pakistan.

September 25

MILITARY: A combination of firefights and roadside bombings throughout southern Afghanistan takes the lives of five more U.S. service personnel.

September 28

AVIATION: An amateur historian conducting a sonar search off the Southern California coast discovered the wreckage of a Lockheed T-33 jet trainer that had been missing since October 15, 1955.

MILITARY: A large raid in Farah Province, Afghanistan, by U.S. Army troops and Afghan security forces results in the deaths of at least 30 Taliban fighters.

- General Stanley McChrystal, during an interview on CBS television, admits that he has conferred only once with President Barack Obama over the past 70 days. This revelation fuels ongoing political speculation that the president is waiting too long to deal with the general's request for additional troops in Afghanistan.

September 29

AVIATION: Missiles launched from a U.S. Predator drone strike two buildings operated by Taliban militants in North and South Waziristan, Pakistan, killing 13 people including commander Irfan Mehsud.

MILITARY: General Ray Odierno announces that he is prepared to send 4,000 U.S. troops home from Iraq by the end of October. He cites the dramatic reduction in terrorist activity, dropping from 4,000 attacks per month in August 2007 to 600 in August 2009.

- A line mine detonated by the al-Qaeda linked Abu Sayyaf group kills two U.S. Army soldiers in the Muslim-dominated southern Philippines.

MARINES: A Marine judge has dismissed murder charges against Sergeant Jermaine Nelson after he agreed to a plea bargain that included no jail time and an honorable discharge. Previously, he and three other Marines had been accused of killing an unarmed Iraqi detainee in heavy fighting at Fallujah in 2004.

September 30

AVIATION: In Washington, D.C., the U.S. Senate brushes aside criticism by Defense Secretary Robert M. Gates and votes \$2.5 billion to continue production of the Boeing C-17 transport jet; another 10 aircraft will be procured to keep the assembly lines open.

MILITARY: General Ray Odierno, top U.S. commander in Iraq, addresses a Congressional committee and warns them not to lose sight of the ongoing problems in that region. He also declares that the controversial troop surge in 2007 has greatly enhanced Iraqi security against terrorism.

- The Ibn Sina hospital in Baghdad, Iraq, which had been administered by the U.S. Army as an emergency medical facility for wounded soldiers, is turned over to Iraqi authorities.
- A U.S. Army soldier is killed by a suicide bomber in Khost Province, Afghanistan, raising the total number of fatalities for that month to 43.

October 1

MILITARY: General Ray Odierno, addressing reporters at a Pentagon news briefing, said he doubts that the United States can declare victory by the time all U.S. forces are withdrawn from that country in 2011. He feels that five or even ten years will pass before the true extent of Iraqi national security can be determined.

October 2

MILITARY: In Copenhagen, Denmark, President Barack Obama schedules an impromptu conference with General Stanley McChrystal on Air Force One to discuss the recent turn of events in Afghanistan. The general had previously delivered a speech in London, England, whereby he rejected a call to scale back the war against the Taliban in favor of concentrating upon al-Qaeda.

- A suicide bomber in eastern Afghanistan strikes a U.S. Army convoy, killing two U.S. Army soldiers.

October 3

TERRORISM: In Wardak Province, Afghanistan, an Afghan policeman, possibly a Taliban infiltrator, kills two U.S. servicemen then flees.

October 4–6

MILITARY: In Nuristan Province, Afghanistan, U.S. forces engage in a protracted engagement with Taliban operatives, killing more than 100 foreign fighters; eight Americans are killed in a major attack on their remote outpost near the Pakistani border.

October 5

MILITARY: In Washington, D.C., President Barack Obama concurs that withdrawal from Afghanistan is not an option.

October 6

MILITARY: In Nuristan Province, Afghanistan, U.S. and Afghan security forces engage Taliban militants in mountainous terrain, killing at least 40.

October 14

DIPLOMACY: In Baghdad, Iraq, the government all but accuses Syria of having aided and abetted the series of large truck bombings the previous August and asks that the United Nations step in and help investigate. Former Baathist extremists are suspected of being responsible for the blasts.

MILITARY: In London, England, Prime Minister Gordon Brown declares his willingness to dispatch additional 500 British troops to Afghanistan, but only on condition that NATO and the Afghan government also commit more resources to fighting the Taliban insurgency. At the time, Britain is deploying 9,000 troops in Afghanistan.

- In Washington, D.C., excerpts of General Stanley McChrystal's assessment of Afghanistan are released, wherein he states that even the addition of as many as 80,000 additional troops many not win the war unless there is a major crackdown

on Afghan government corruption. He feels that the Afghan government's indifference to its own populace is forcing many desperate citizens to assist the Taliban.

TERRORISM: In Baghdad, Iraq, the government human rights agency releases a report that declares 85,694 Iraqi citizens have been killed in acts of terrorism between 2004 and 2008. The toll includes 263 college professors, 21 judges, 95 lawyers, and 269 journalists, all of whom appear to have been targeted.

October 16

MILITARY: In Washington, D.C., the Department of the Army cancels plans to deploy a brigade of 3,500 troops from the 10th Mountain Division to Iraq, citing the improved security situation there. This renders them available for deployment in Afghanistan, however.

October 20

MILITARY: In Baghdad, Iraq, top U.S. commander General Raymond T. Odierno predicts a very rapid drawdown of U.S. forces from the country following the January 2010 elections. He intends to withdraw all combat forces by August of that year, with a complete withdrawal no later than 2011.

October 26

AVIATION: In Badghis Province, Afghanistan, a U.S. Army UH-60 Black Hawk helicopter crashes, killing 14 Americans on board. To the south, two other helicopters collide in midair, killing four troops and injuring two others. The cause of the accident is not known.

October 27

AVIATION: In Nuristan Province, Afghanistan, NATO forces uncover the wreckage of a U.S. Army C-12 Huron transport aircraft that crashed two weeks earlier. Enemy action is ruled out, so the accident is attributed to the violent downdrafts common in the region's mountain ranges.

TERRORISM: In Iraq, the militant Sunni group al-Qaeda in Iraq claims responsibility for the bombing in Baghdad two days earlier.

- In Afghanistan, a rash of roadside bombing takes the lives of eight American servicemen.

November 4

TERRORISM: In Helmand Province, Afghanistan, an Afghan policeman, most likely a Taliban infiltrator, kills five British soldiers. Six other soldiers are wounded, in addition to two Afghan policemen.

November 6

MILITARY: In Ottawa, Canada, Chief of the Defence Staff General Walter Natynczyk announces that Canada will commence pulling its 2,800 troops out of Afghanistan beginning in the summer of 2011.

November 8

MILITARY: In Washington, D.C., army chief of staff General George Casey endorses President Barack Obama's plan to deploy additional forces to Afghanistan to combat the Taliban insurgency.

December 1

MILITARY: In Washington, D.C., Pentagon officials declare that marines will constitute the majority of 35,000 reinforcements to be sent to Afghanistan by the

spring. This is part of President Barack Obama's "surge" for the region once American forces in Iraq begin to withdraw.

December 4

AVIATION: In Helmand Province, Afghanistan, MV-22 transports drop the 3rd Battalion, 4th Marines behind Taliban lines at Now Zad. A second column of marines simultaneously pushes northward from their Forward Operating Base (FOB) at Now Zad, penetrating Taliban minefields with armored steamrollers. This is also the first major Afghan operation undertaken since the surge was announced the previous spring.

December 9

MILITARY: In Washington, D.C., General David H. Petraeus informs a congressional committee that progress against the Taliban in Afghanistan is likely to be slower than the military surge in Iraq was two years previous. He anticipates that at least 18 months will lapse before real progress can be measured in terms of reducing terror attacks against civilians and Coalition personnel.

December 18

TERRORISM: In Baghdad, Iraq, a series of coordinated car bombings kills 118 people and wounds 261 more. Officials begin to question if the Sunni-based al-Qaeda insurgency, largely dormant, is making a comeback.

December 21

AVIATION: In Afghanistan, it is reported that the first MC-12W spyplanes, which are highly advanced and classified, are due to be deployed under the aegis of the U.S. Air Force. This four-crew, twin-engined aircraft is equipped with video cameras and other sensors and is capable of beaming real-time intelligence to troops on the ground.

December 25

TERRORISM: In Afghanistan, the Taliban release a videotape of captured Idaho National Guard private Bowe Bergdahl, who made anti-American statements, presumably under duress.

December 30

TERRORISM: In Kandahar Province, Afghanistan, an improvised explosive device strikes a Canadian armored vehicle, killing four soldiers and a female journalist.

- In Khost Province, Afghanistan, an apparent Taliban double agent recruited by the Central Intelligence Agency (CIA) strolls into CIA headquarters at Forward Operating Base Chapman and detonates himself, killing seven agents and injuring six more.
- In Anbar Province, Iraq, a bomb explodes in Ramadi, killing 23 people, 13 of them policemen.

December 31

MILITARY: For the first time since 2003, the month of December sees no recorded American combat-related fatalities in Iraq. "That is a very significant milestone for us as we continue to move forward," General Raymond T. Odierno declares, "And I think it also speaks to the level of violence and how it has decreased over time." Since the beginning of Operation Iraqi Freedom, 4,373 U.S. service personnel have been killed, including 898 from noncombat incidents. The Iraqi Interior

Ministry also notes that 2,773 civilians were killed and 8,900 wounded—the lowest toll since 2003. The story is reversed in Afghanistan, where 304 U.S. service members were killed in the previous year, 151 more fatalities sustained than in 2008. This brings the death toll of Operation Enduring Freedom, launched in October 2001, to 933 service members. Among coalition partners, Canada is second in fatalities, with 32 deaths, while 2,021 Afghan civilians are also reported killed—465 of these by U.S. and Coalition forces.

U.S. Invasion of Grenada, October 25–26, 1983

© Infobase Publishing

- 1. October 25, 5:00 A.M.:** Helicopters with 400 U.S. Marines leave the USS Guam and commence an assault on Pears Airport. They secure the airport within two hours, and the Guam then moves to the west coast.
- 2. October 25, 5:36 A.M.:** Flying from a staging area in Barbados, hundreds of U.S. Army Rangers parachute into the Point Salines area. They meet heavy resistance, but by 7:15 A.M. the airport is secured.
- 3. October 25, 8:50 A.M.:** Rangers secure the True Blue campus of the St. George's University School of Medicine.
- 4. October 25, 7:30 P.M.:** In the St. George's area, the Governor's House is secured after 250 U.S. Marines land with five tanks and 13 amphibious vehicles; later Richmond

Hill Prison and Fort Frederick nearby are captured. By this time, the island is overrun by a combined force of 2,200 U.S. and Organization of Eastern Caribbean States troops. Pockets of resistance from some Cuban troops continue.

- 5. October 26, 9:00 A.M.:** The evacuation of medical students begins from Salinas Airport. Meanwhile, additional troops arrive from Barbados; the invading force will eventually exceed 5,000.
- 6. October 26, 4:00 P.M.:** Following a helicopter assault on the Grand Anse medical campus, students are evacuated.
- 7. October 26, late afternoon:** U.S. planes strafe positions still occupied by Cuban soldiers. However, the fighting is effectively over, and the entire island is soon secured.
